MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

It is unequalled for cleaning painted walls and wood work, Plate and Silver ware,—also for Crockery, Glass, Marble and Parian ware.

Daily Intelligencer.

Soiling Plants.

The subject for discussion at the last meeting of the Central New York Farmers' Club was Soiling Plants.

Soiling, it was agreed, was to mean the entire feeding of cattle confined in a small space by means of green plants. The subject discussed was really the best methods of partial soiling, no one advocating complete soiling to any extent, though Mr. Cleveland maintained that by that means he managed to get more from his farm of 12 acres than he could in any other way.

Harris Lewis opened the discussion. He said rye, when complete soiling is practiced, is almost an essential, as it could be cut very early in the spring, and when not cut too low could be cut again later. He did not advocate its use. All the millets are used, but in our soils and climate it is not possible to get them ready for use before the middle of August. A well balanced food has been produced by sowing peas and oats together in equal or nearly equal quantities, but that too was late. The want is to get something to occupy the space from June to late July. The early maturing grasses and clovers, the Kentucky blue grass and others, are perhaps the best. They can be followed by the late maturing grasses, and then corn. Almost everybody uses corn. I have found that it does not pay me for the cost of growing and feeding it. I never have tried it under the present method. I have passed in my experiments successively, from the ever green corns to the large western varieties, the Dent and others, to the common and later, to the different kinds of sweet corn. The black Mexican sweet corn, which is very sweet, is one of the best foods I know of for cows. When I have sown corn broadcast it grew up shading itself, and with little chance for the air to circulate through it, and never paid. The greatest improvement I made was by cutting two or three days before I wanted to feed, which saved carrying an immense weight of water. The same thing is true of clovers or grasses. The best results I have obtained by soiling in connection with pasture. My method is simply to have certain meadows with early maturing grasses, from which I cut a first crop early, and lay by for early spring. Then about the last of July or the first of August I cut again, cure and store convenient for feeding when the pastures begin to fail I find it cheapest to cut, cure and store aftermath as usual, rather than attempt to mow and feed from day to day. I know of no soiling, if it be proper to call it soiling, equal to this feeding of the cured, long leaved grasses mixed with a little clover, night and morning, when the dry pastures make it impossible for cows to pick up a full sufficiency of grasses in the field without too great physical labor. I have meadows from which I have cut four tons a year for twenty consecutive years with only top-dressing eight or nine times, and I see no change in fertility. I have them filled with all the grasses which are indigenous to them, and all which will take hold.

Seth Bonfoy of West Winfield said his experience of thirty years in running a dairy has gone to show that corn is very useful. He used the large Dent variety planted in rows with 12 to 15 grains of seed to the foot with a broad line for sowing, and obtained from 35 to 40 tons of green corn to the acre. Fed as pasture failed, it kept up the flow of milk in his cows and kept them in condition. He fed a pint of meal a day the year round. Harris Lewis said that 92 per cent. of his fresh corn was water, which cattle could get as well at a fountain. Mr. Bonfoy replied that Professor G. C. Caldwell, of Cornell University, has told him that plants were never so nourishing and easily digested as when most full of water, and besides his four tons of aftermath had a great per cent. of water in it. Mr. Lewis admitted it had about 70.

Dr. Wight thought that soiling corn did best sowed in rows three feet apart, but seven to ten grains to a foot he thought enough. He could not agree with Mr. Lewis in his condemnation of corn. It was not right to pass over the modern system of soiling by ensilage, Ensilage, he apprehended, could not well be used without grain. It did not contain enough of the albumenoids. This was a reason why pure soiling in stables or close yards failed. I have visited several silos, and have always found the food somewhat sour with more or less acholic fermentation going on, and the cattle in not good condition.

It was maintained that Mr. Lewis' system was impossible for farmers back on the hills where no second crop or grass could be counted upon. Corn was there the best chance. It was agreed that planting in rows was better than sowing broadcast.

Daniel Batchlor, who is a member of the state board of control and of the committee chosen to select a site for the New York state experiment station, stated to the club that the chances are that the station will be located in the western part of the state, though the sharp rivalry between Rochester and Geneva may give an opening to a third party. A very favorable offer had been received from Ithaca, where John Sage offered to give a farm of about 130 acres outright for the purpose and where the faculty of Cornell University had offered their service free for a number of years, at any rate for analyses and anything else in their line. The station would have no other connection with the University. Wherever it is located the sense of the board of control is that it will best accomplish its objects if its experiments are scattered through the state. It is probable, therefore, that the man in charge of the station will be authorized to arrange with competent persons at different points for experiments under his charge.

The best receipt for going through life in a commendable way is to feel that everybody, no matter how rich or how poor, needs all the kindness they can get from others in the world. Let us remember this great truth, and commence with those around us. Let the poor and needy, and those who do not take the daily or weekly newspaper, be kindly informed, if in sickness, whether it be from coughs, lung diseases, asthma or consumption, that by the use of N. H. Downs' Vegetable Balsamic Elixir they can be cured. Keep not the good news to ourselves, but spread the sunshine of hope around.

Mrs. Mary Harrington, Kouchibouguoc, N. B., says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents. Large bottles $1.00.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause acbility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Management with Hops.

Many devices and methods have been employed to improve hop culture, but with only indifferent success, the chief reliance now as always being in the attention given the soil, which must always be a principal element in all hoed crops, and in none more than hops. Neglect never fails to tell here, not only the same season, but the year after. To allow weeds to grow is to check the vine correspondingly. Rich ground is no preventive, as the foul growth thrives in proportion. Many a yard has in this way been ruined, occurring usually when the price of hops was low and it is thought it did not pay to raise them. This is a very great error, as good treatment, thorough, continued culture, never fails, take one year with another. In neglected yards, the first season is required to restore the ground while the crop is but little advanced by good cultivation. Thorough work through all the years without regard to the market is the true way. By thorough work is not meant deep ploughing, which I have known to check the growth of the vines through harm done to the roots. Persistent shallow culture is but another thing: why not plough a yard in the fall, first disposing of the poles to the best advantage? In removing the crop the ground becomes packed, and in places hard, and wants breaking up to expose it to the air and the action of the frost. Without this the first ploughing in the spring will leave the surface rough and not easily reduced, especially with clay. The improvement will be still greater if manure is applied after such a fall ploughing. Where the soil is of a sandy character, so it can be worked up mellow with harrow or cultivator, sow rye. This done immediately after the crop is removed will afford a good growth and will be still further advanced in the spring by ploughing time, when it may be lightly turned under. This is especially necessary in yards of some years' standing. In this way no doubt a hop yard can be kept up or improved indefinitely if the drainage is good; and nowhere is drainage more required.

The next most important thing in hop culture is the free admission of sun and air to the vines. As with corn, so with hops, the stand is generally too close, especially if there is an excess of growth, which does not proportionately benefit the size and quality of the hop, Anything that interferes with quality must be avoided, as it is this that rules the market. Hops, when of a heavy growth, derive but little benefit from the sun, as through the earlier and later hours of the day the mass of vines form an obstruction. With such an arrangement in a cloudy season the amount of sunlight is too small to grow a fully developed crop. Humidity is also a bane to the hop, the more so if associated with heat. Hops are not grown on the river flats here, the soil being too rich, it is said. This is a mistake, as the ground there needs manuring to grow successfully even the ordinary farm crops. The cause is the river fog. With the smaller streams there is less of this, and hence hops are there raised with considerable success. A breezy upland is the most favorable situation for hops, quality and quantity and health considered. It only requires that the soil has depth and drainage. We see the advantage of an exposed situation to isolated vines when a few hills are cultivated in a garden with full chance for sun and air.

This reminds me of a novel yet successful device where, in a garden, the vine of one hill was extended to the pole of another hill which had been winter killed. The vine with cultivation made a good growth, almost literally covering the pole with hop arms and hops from the place where the vine was fastened to the pole up to near the top, without the usual "mophead," which is formed where there is an excess of growth or a short pole, the distance between it and the hill. Why not try this plan, at least in a small way? It must certainly be an advantage with short poles. It is true it allows of only one way of cultivating the yard, and necessitates some hand labor. The poles may be set anywhere in the space between the hills, thus lengthening or shortening at pleasure the reach of the vine. This also saves the hill from the injury of setting the pole. The plan has besides the advantage of letting in more sun and air on account of the lessened vines on the poles and the absence of mop-heads. This favors the hops and covers the poles with burrs. The hop will be brighter, larger, firmer and richer, brought about largely by the aid of the sun and the free circulation of air which have a similar affect upon all crops grown above ground. A great growth vine of usually disappoints when the crop comes to be gathered and weighed. It will lack in weight and quality, while the reverse in the case with a light growth of vine.—*Utica Herald.*

ACQUATICS.—The St. John N. B., *Telegraph* publishes the following challenge from Wallace Ross to Smith, Riley, Hosmer, and Courteney:—"As there has been a lot of dispute as to the merits of Smith, and myself, I would like to have it settled. I will row Warren Smith any distance he may name on the Kennebeccasis, and allow him $200 for expenses. Or I will take $200 and row on Bedford Basin for $1,000 a side any time in June. If he will not row me at either of the places named, I will row him on Lake Memramcook, Maine, each man to pay his own expenses; Smith to be allowed to name his own distance. This challenge will remain open seven days. Geo. Hosmer, of Boston, Riley, of Saratoga, or Courtenay, of Union Springs, can can be accommodated with the same terms. Articles sent to me at St. John will receive attention."

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestiible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

A peddler writes: "Within the last year I have disposed of about five hundred bottles of Dow's Sturgeon Oil Liniment. There are endless calls for it, both from parties who have used it, and know its virtues, and also from those who have heard of it from others. Last week it cured a man who had been lame with a sprained ankle, by two applications.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

Leave Belleville	3:30 p. m.
Arrive in Madoc	5:30 p. m.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, FRIDAY, APRIL 1.

Not A Party Triumph.

The Brighton *Ensign*, which ought to know, and which rather favored Mr. Crouter, states that the result in East Northumberland cannot be set down as a party triumph. It says:

> Those who are in a position to know say that a considerable number of Conservatives recorded their votes for Mr. Crouter, while many more stayed at home, preferring to do so rather than vote for the nominee of the party, who was evidently distasteful to them.

The *Ensign* does not state what made Mr. Kennedy distasteful to certain Conservatives, but the closing sentences of its article show that it attributes this result to the religious cry raised by means of the infamous circulars to which allusion has been made, and otherwise. We quote:—

> "Those who have endeavored to make the question of the religious belief of either candidate do duty as an election cry are extremely censurable, for it is the boast of our country that under the flag of Britain every man has the right and privilege of worshipping God as his conscience dictates, and whether a man be a Catholic or a Protestant he is equally eligible to positions of trust and emolument."

A Comparison.

The St. John (N. B.) *Sun* points out that, whilst the present Government at the end of its third session of Parliament have WON six seats from the Opposition, the Mackenzie Government, at the end of *its* third session, had LOST to the then Opposition, led by Sir John A. Macdonald, the following seats:—

MARQUETTE,
SOUTH NORFOLK,
VICTORIA, N. S.,
EAST TORONTO,
SOUTH HURON,
LONDON,
TWO MOUNTAINS,
BERTHIER,
BELLECHASSE,
CHAMBLY,
CHARLEVOIX,
NORTH RENFREW,
WEST TORONTO,
NORTH VICTORIA.

In all fourteen seats.

In the thirty-seven elections which have taken place since the present Government took office, the Opposition have but two gains to solace themselves with, whilst their losses foot up to six, as above stated. Besides this, they have lost Niagara and Portneuf by decisions of the Courts.

The Montreal Banquet.

The first of the series of banquets which the Grits of several large cities are to give in honor of their leader took place in Montreal on the night of Tuesday, the 29th ultimo. It was largely attended, and proved to be a success in every particular except the main one, namely the speech of the gentleman in whose honor it was held. Whether it was that he felt himself restricted in his utterances by being obliged to forego his usual sneering references to the Province of Quebec; whether he felt he had nothing new to say on the great question that so lately engaged the attention of Parliament, and as to which his speeches and those of his followers had exhausted the subject from the Opposition point of view; or whether the labors of the session had been too much for him, we cannot tell. Certain it is, however, that Mr. Blake's speech on this momentous occasion—an occasion when he was bidding for the support of the people of the great Province of Quebec—was as flat and dull and dreary a production as ever was perpetrated by any of the bores of his party who empty the House of Commons when they rise in that august body for the purpose of making a set speech. The speech consisted of but three topics, namely the Pacific Railway, the tariff and the twenty years' struggle for Responsible Government. In regard to the first he said nothing new; as to the second he was careful not to commit himself to more than a readjustment of the tariff to the extent of repealing or lessening the duties on raw materials in the event of that very unlikely contingency, namely his party being successful in the general elections of 1883; and as to the third topic he gave some not very interesting reminiscences of his boyhood. Altogether, the speech was alike unworthy of Mr. Blake and of the occasion, as not a single new idea was broached in it—not even a theoretical reform as much as hinted at.

The real hero of the occasion was Mr. Huntington, who assured his hearers that the Grits would not materially alter the tariff, and would not interfere with the industries created under it, winding up with a declaration of peace and good-will to all men, especially the so-called "ultra-montanes," whom he so severely denounced in his famous speech in Argenteuil in 1875.

Evidently Mr. Blake will need the member for Shefford to accompany him in any missionary tour which he may undertake in Quebec.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

The Pacific Railway.

A cable despatch from London gives the following important intelligence:—

At a shareholders' meeting of the Canadian Pacific Railroad Company today all the necessary financial arrangements for the vigorous prosecution of the work were completed and the construction of the main line is to be pushed on both the eastern and western sections as rapidly as possible. Three hundred and fifty miles of railway west of Winnipeg is expected to be in operation by the close of the present year. The company has also resolved to build a branch line from a point near its eastern terminus to Sault Ste. Marie and another branch from the western trunk line beyond Red River in the direction of the coal fields and the international boundary. A provisional agreement for the acquisition of the Canada Central railway by the company was also concluded.

News Condensed.

—Lord Beaconsfield has considerably improved.

—The Pacific Railway Commission meets next Wednesday.

—Ottawa lumbermen consider the prospects for a successful drive as good.

—The new Union Depot at Chicago will cost $2,000,000. It will be occupied next Monday.

—On the 31st ult., a box of diamonds valued at $5,000, was stolen from a jewellery shop in Philadelphia.

—The Prince and Princess of Wales, and the Duke of Edinburgh, have left St. Petersburg for London.

—A Bill to incorporate the Orange body has been defeated in the Legislative Council of Prince Edward Island.

—Owing to the severity of the weather water will not be drawn off from the Welland canal until the 9th prox.

—The Court of Appeals has decided against Mr. Bradlaugh, and he has decided to appeal to the House of Lords.

—Lord Colin Campbell, brother of the Marquis of Lorne, who went to South Africa for his health, has returned rather worse.

—On the 31st ult., an accident occurred on the Atlantic Railway at Colton, Ohio, by which several persons were seriously injured.

—A meeting of the Board of Dominion Land Surveyors will be held next month. Quite a number of candidates will come up for examination.

—Floods are again reported in various parts of Dakota. Besides the destruction of property, a large number of persons are supposed to be drowned.

—Mr. Lawrence Lawless, postmaster at London, Ont., has been superannuated. He has been over 40 years in the service. His successor has not yet been named.

—The Dominion Board of Arbitrators will meet at Port Colborne about the middle of next month. They will after that meet at Chaudiere, and St. Anne's, Quebec.

—The name of Mill Point has been changed to Dessronto, the change to take effect to-day. The change in the name of Clifton to Niagara Falls, Ont., also takes effect to-day.

—The "old pine tree' on the Bank street road, Ottawa, a landmark, has been felled. It was 176 feet high and measured 16 feet at the base. It contained eight cords of wood.

—Two hundred and seventy-three ounces of gold were produced from 374 tons of quartz at the Sherbrooke gold mines, Nova Scotia, during February, the result of 2,328 days labor.

—The owners of the Hull iron mines will commence the construction of a line of railway from the Gatineau railway bridge to their property as soon as the frost leaves the ground.

—Forty-six brakesmen were dismissed from the New York Central and Hudson River Railroad on the 31st ult. The perfected system of signalling does away with the necessity of more than two brakesmen to each train.

—Peckhamite is a new mineral, discovered in the great meteor which fell in Emmett county, Iowa, May, 1879. It is said to be different from any other mineral ever found in meteors. It is a silicate of magnesia and iron.

—It appears that the number of immigrant families who settled in Cape Colony during the year 1880 was eighty-eight, and seventy-three single men. The amount of capital in their possession on their arrival was £10,743.

—Persons using the new automatic pencils are reminded that the purple lead used is deadly poison. It is said that a piece one-half the size of a pea will cause the death of a robust man. Don't put the lead in your mouth.

—In Great Britain there has been no instance during the past one hundred years of any three consecutive Januaries having so low a mean temperature as those of 1879 81, the mean for these last three being only 33.2 degrees.

—The traffic receipts of the Grand Trunk for the week ending March 26th were $217,488, as against $209,882 during the corresponding period last year—an increase in 1881 of $7,606 The aggregate increase for thirteen weeks has been $115,975.

—The American storms which reach Europe originate in Mexico, Central America and the north of South America. They are felt severely on the other side of the Atlantic. Storms originating in the United States pass northward, and do not touch Europe.

—On the 30th ult., a woman named Smith arrived in London from Detroit in search of her brother-in-law. A man undertook to show her where her brother-in-law lived, and succeeded in drugging and robbing her of $24 in money and a gold watch and chain.

—It is learned that Dr. Mostyn was responding to a professional call when drowned near Almonte on Tuesday evening. The boat was taken because the roads were bad. Young Mr. Manning went along as company, taking a gun in case there should be an opportunity for fowling.

—A girl named Maud Barker, who hailed from Belleville, was robbed of a watch at a questionable house in Toronto on the night of the 30th ult. She says she was recommended to the place as a respectable boarding house, and didn't know its character. The watch has not been found.

—A London report says that E. H. Graydon and a young man named McEachren, who were respectively accountant and assistant-accountant of the Federal Bank at London, have absconded, taking with them a considerable sum of money. The amount in default is not yet known, as the books are falsified.

—The mirage at Morris, Man., was really wonderful. Objects on the Turtle Mountain, fifty or sixty miles distant, could be seen quite distinctly. Smoke ascending from the chimneys of several houses could be easily distinguished, and the operations of a man chopping wood were watched with interest.

A Pin in a Girl's Throat Three Years.

Miss De Ferne Gale, a young lady of Norwich, Ont., has been ill for upwards of three years with a bad cough, which did not yield to treatment, and the physician pronounced her disease consumption. During the latter part of last week, for three successive days, she coughed more than usual, and on Saturday morning, during a severe spell, she coughed up a pin. The action of the acids of the system has reduced it to one half the original length, and the lower part of the remaining portion was worn as small as the finest silk. How long the pin has been swallowed she does not know, but from the fact that she is rapidly recovering it is supposed to have been about three years, the period of her illness.

CIVIC AFFAIRS.

MEETING OF THE JOINT COMMITTEE.

The Site of the Ferry Landing to be Changed.

The Public Works and Ferry Committees met jointly yesterday afternoon, chiefly for the purpose of considering Capt. Jellett's petition. The petition asked either for the compulsory removal of the railway siding constructed by Messrs. Downey & Preston, near their grain elevator, or for the locating of a new ferry slip

The petition having been read,

Ald. Lingham said that the question to be considered was whether it would be more advisable to remove the siding or locate a new ferry slip. He said further that there was a proposition from the citizens to the effect that if a slip was constructed at Bushy Island they would subscribe $2,000 towards filling up the open space between the Island and the mainland.

Ald. Costello, Chairman of the Ferry Committee, said it was absurd to think of constructing a slip at Bushy Island. It would cost fully $8,000 to carry out that work, and the results would not be beneficial to the city, on account of its being so far away. We already had a ferry slip, constructed at a cost of $3,000, which was lying unused. At an additional expense of $2,000 this could be put into a condition to meet all the requirements of the Prince Edward trade. We should do all in our power to increase our trade with Prince Edward, which was of great value to the city.

Ald. Vandusen said that the only advantage to be gained by the Bushy Island route will be, that the ferry will run longer during the season, as the ice on that route did not form so early in the fall nor break up so late in the spring, as on the present route. He would, on the whole, favor the removal of the landing to the Prince Edward slip.

Ald. Clarke said the length of time gained by adopting the Bushy Island route would not be more than two or three days.

Ald. Starling said he found, on consulting Bolger's chart, that the water within four chains of Bushy Island was only four feet in depth. He moved that in the opinion of this Committee it is desirable that the site of the ferry slip should be changed, on account of the bad state of the approach to it.

Ald. Frost did not think that a change was desirable at present. The approach to the slip was not in such a bad state as had been represented.

The motion was carried.

Mr. Marsh, lessee of the Street Railway, was, on motion, heard. He explained his reasons for removing the Street Railway from the city. The road, he said, had not paid him as well as he had expected, and as he had doubts as to the future of the city he did not think that his property would grow very rapidly in value. While in Ottawa recently he had met gentlemen from Winnipeg, who entered into negotiations with him in regard to the sale of the railway. The result of the negotiations had been satisfactory to him, and the only thing necessary to complete the sale was his consent. He wished to explain that he did not wish to push the street railway out of the city. He had the city's interest at heart, and he would rather retain the road here than remove it to Winnipeg. He believed that the road might be worked profitably under favorable circumstances; but he could not make it pay with a double line of conveyances running to and from the station at the same rate as charged on the road. In answer to a question, he said he would be willing to sell the road to the city for $2,000 less than had been offered him in Winnipeg; or he could probably sell it to private individuals here if the city would protect it. If no satisfactory arrangement could be made the railway would be removed early in May.

The City Solicitor said the City had no power to purchase or possess the road.

The matter then dropped, and the consideration of the ferry matter was resumed.

Ald. Clarke moved that the ferry landing be removed to the Prince Edward ferry slip at Wallbridge's Corner, and that the west wing be extended by piers towards Mill Island; and that the channel be deepened sufficient to allow of the access of the Ferry.—Carried.

Ald. Starling moved that the Committee recommend that tenders be asked for the purchase or lease of the old ferry slip and the stone buildings adjoining.—Carried.

Street pay list No. 7 was then passed. The amount was—Public Works, $84 22; Water and Gas, 90c.

The Committee then adjourned.

For the Intelligencer.

Bethel Quarterly School Report.

The names of four of the pupils out of each class, arranged in order of merit, are:

JUNIOR II.—E. Wells, E. Chambers, L. Sayers, C. Ketcheson.

SENIOR II.—B. Sills, M. Dafoe, P. Sharp, L. Trickey.

JUNIOR III.—P. Crouse, F. Holgate, S. Chambers, S. Phillips.

SENIOR III.—E. Chambers, J. Ketcheson, W. Sharp, W. Sayers.

JUNIOR IV.—M. McMichael, M. Moore, E. Sayers, E Thrasher.

SENIOR IV.—W. Vankleck, A. Thrasher, W. Ketcheson, B. Phillips.

Average attendance during the quarter, 50 or thereabouts.

A HANNA, Teacher.

NEW RAILWAY.—A project is now under way for connecting Carleton place with Cornwall by rail, giving a still shorter route to Montreal than is now had by the North Shore road from Ottawa. It is said by the construction of this link the distance between the two points will be shortened by twenty miles. The portion of road to connect the Canada Central and Grand Trunk line, at the points named, is 75 miles. Some capitalists have the matter in hand.

NORTHERN RAILWAY.—At the meeting of the Board of Directors of the Northern and North-Western Railway in Toronto on the 30th ult., the annual report submitted showed the gross earnings for the last eighteen months to have been $1,830,205, and expenditure, $1,122,602. The following Board of Directors were elected: The Hon. Frank Smith, Major Greig, Mr. Thompson, N. Barnhardt, F. W. Cumberland, Wm. Lethbridge, Wm. Ford, John Rigby, C. J. Campbell, John Fisken and J. L. Blaikie. At a subsequent meeting of the Directors, the Hon. Frank Smith was re-elected President and F. W. Cumberland Managing-Director. Mr. Wm. Lethbridge was appointed chairman of the London Board.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

Dr. Wilson's Anti-bilious and Preserving Pills are the most effective remedy for indigestion, and bilious and liver complaints. For elderly persons and those who are prone to be costive, no safer and better regulator can be found.

A long experience with Dow's Sturgeon Oil Liniment has proved to us that nothing surpasses it for the cure of rheumatism, gout, contracted cords and muscles, and weak limbs.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

SPRING OPENING.

WEDNESDAY, THE 6TH OF APRIL.

ON Wednesday, the 6th APRIL, we will be prepared to show the latest styles in London and Paris pattern Millinery and Mantles, with a complete stock of Hats, Bonnets, Ostrich Feathers, French Flowers, Ornaments, &c.

Our customers may expect really the finest and most extensive display we have yet made in this department. All being of our own importing, the styles will not only be the latest out, but the prices very moderate.

GEO. RITCHIE & CO.

P. S.—The untrimmed Hats and Bonnets, also Feathers, Flowers and Trimmings, are now opened out and ready for inspection at any time.

G. R. & CO.

Wisconsin's Pet Gone.

MADISON, Wis., March 27.—"Old Abe," Wisconsin's war eagle, died at the capitol last night. The bird was sold to the 8th Wisconsin infantry in 1861 and was with the regiment four years in the army. At the close of the war he was presented to the State. He has been all over the nation since. In 1865, at the great fair in Chicago, his exhibition netted $16,000, and at the Milwaukie fair the same year, $6,000. He was four months at the centennial in Philadelphia. All the State officials, headed by Governor, visited and viewed the remains of the historical bird.

TO BE DISSOLVED.—The Prince Edward Island Assembly will be dissolved at the end of the present session, when the Government will appeal to the country on the issue of the abolition of both Houses of the present Legislature, and the substitution therefor of a Legislative Assembly of fifteen members in lieu of forty-three.

ABORTION.—Another fatal case of abortion has occurred in this province, the victim being the daughter of a farmer named John King, in Keppel. The coroner's jury returned a verdict to the effect that deceased came to her death by abortion by means of medicine administered by her own hand, and incriminating her brother, who is said to have procured the medicine, and who has been arrested.

INTERESTING RELICS.—The Ottawa *Free Press* says:—"A Government official is in possession of several historical relics, among which are: A cane and umbrella, which belonged to Napoleon I., and which were used by him at St. Helena; a dirk, the property of Lord Nelson, when a midshipman; a cutlass used on board the *Victory* at Trafalgar; the sword worn by Sir David Baird at the storming of Seringapatam; an Afghan knife, taken from a prisoner at Lucknow, during the mutiny, and the stiletto with which Spiletti stabbed Mr. Posonby, at Naples, in 1831.

A GOOD MOVEMENT.—A movement is on foot in England to extend the advantages of the Post Office Savings Bank system by opening branch savings banks under the control of the department at large factories when wages are being paid. A few weeks ago one of the partners of the firm of Messrs. Bass, at Burton-on-Trent, applied to the Postmaster-General to allow an official from the local post office to attend at the works at the time wages were paid in order to open a post office savings bank on the premises, and Messrs. Bass would pay all the expenses. Directly the proposal had been read to him he cordially assented to have it carried out. It had been in operation for some weeks. If other firms would make similar proposals on like conditions, Mr. Fawcett promised to give effect to them as far as the resources of the local post office would allow. Such a system is to be highly commended, as calculated to inspire and promote habits of thrift where they are often entirely absent.

DEATH OF A NOTABLE PRINCE.—The cable announces the death of the Sirdar Bahadur Nawab Gholam Hussein Khan, C. S. I,, who was one of the most notable princes in India. He sided consistently with the British in their war of conquest against the tribes of the Northwest Provinces. His assistance to Lieutenant Reynell Taylor enabled that officer with a few untrained levies and two old cannon—the only shot for which were stones—to reduce by siege the fort of Lahi, which was defended by 500 men and ten guns. During the mutiny he placed his Mooltani horsemen at the service of the British; took part in no less than sixteen engagements, and all he received for his assistance was the title of Khan Bahadur, the Third Class Order of Merit, the Mutiny Medal and a pension of £60 a year. After the suppresion of the revolt he went as British envoy to Cabul, and returned thither to open negotiations before the late Afghan war. Failing in this he retired to a small estate in the Bannu district. A Punjaub officer said of him, "Gholam Hassein Khan is a perfect gentleman, with chivalrous ideas of honor, a peacemaker among his equals, kind and benevolent to those under him. In soldierlike spirit there was not his superior in India."

Time tests the truth. A puffed up preparation, without real merit, cannot last long. But the longer it is before the public, the stronger does the faith become in the efficacy of Wilson's Pulmonary Cherry Balsam, for the cure of all lung diseases.

"Epileptic Fits"

ST. PAUL, Min., Jan. 4, 1878.

JAMES I. FELLOWS, ESQ.

DEAR SIR,—I have deferred writing to you ere this that I might be able to give an account of the effect of your medicine. I can now safely say that it is undoubtedly the best I ever tried, as there can be no doubt that my little girl is in a fair way of recovery, and you must bear in mind, that this was a very bad case, and I do honestly believe that had I not given it to her, she would have been dead ere this, now she eats hearty and is gaining in flesh, the fits are only partial and the action of the heart less terrible: I am, sir, yours very respectfully,

D. WALTER OAKES.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—— ——and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

Wants.

WANTED.—Two General Servants. State references. Apply at this office.

FOSTER & REID,

SPRING OPENING!

WEDNESDAY, APRIL 6TH, 1881.

WE HAVE pleasure to announce that we will exhibit on the above date New York, London, and Paris Pattern Hats and Bonnets, together with all leading novelties in Flowers, Feathers, Ribbons, Laces, &c.

Our Stock of Millinery Goods this season is more than usually choice and well selected, and we have spared no pains to make it the most successful opening we have yet held.

All Departments replete with a large assortment of novelties in too great variety for enumeration.

FOSTER & REID,

IMPORTERS OF DRY GOODS.

AT THE SYNDICATE STORE

They sell you all classes of goods at wholesale prices and cut any length required

LADIES:—By purchasing your goods from us we guarantee that on a purchase of $10.00, we will give you $2,00 worth more than any other store in Belleville, smaller purchases in proportion.

HOW IS THIS?

Because we buy for cash and sell for cash, all our goods are bought direct from the manufacturers, by this means you save the profit of the middlemen, we mean the big wholesale houses.

Call and examine our stock of Dry Goods Clothing, Boots and Shoes, Groceries, Crockery and Glassware, &c., &c.

W. & D. PATERSON,
Harrison Block.

1881. SPRING OPENING 1881.

AT

BRIGNALL & THOMPSON.

March 28th, 1881.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly, Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood, As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

For Sale Cheap,

ONE Brewster-spring Top Buggy only been in use a short time, and one Canopy Top Phæton, in good repair. Apply to

S. A. HYMAN,

or to RALPH PURDY,
Auctioneer.

Belleville, March 28, 1881. 317d1w

For Sale or to Let.

in the latest styles, to which we invite the attention of the Ladies; and we have still 2 pieces of our celebrated **$1.29 Black Silk**, the best value in the market. It cannot be equalled under $1.75 to $2.00 per yard.

GLASGOW WAREHOUSE.

N. B.—We trust our customers will remember that our terms are *cash*, and *will not ask us for credit*. By strictly adhering to our terms, we can sell goods much cheaper than if we did a credit business.

Daily Intelligencer.

BELLEVILLE, FRIDAY, APRIL 1.

5 O'CLOCK EDITION.

City and Vicinity.

The Finance Committee will hold a meeting to-night.

Three tramps were in the cells last night. No prisoners.

The Police Magistrate drew another blank this morning.

Neither of the Grand Junction trains was a minute late to-day.

A meeting of the Curling Club takes place this evening at Hambly's.

The Fire and Harbor and City Property Committtees will meet to-night.

The plan for the Litta Concert is nearly filled up, but a few more seats remain.

Three months of 1881 are gone, and Mother Shipton's prophecy yet unverified.

The chimney sweep is the most stylish fellow in town. He dons a new soot every day.

It is expected that the Campbellford paper mill will be in operation by the 1st of June.

The sparrows have proven their ability to withstand the rigors of a long and tedious winter.

A large train of cars loaded with cordwood, arrived per Grand Junction yesterday evening.

The big egg season has arrived. Peterborough leads off with a goose egg weighing 12 ounces.

Butter is going up in price. As high as 27c per pound was paid on the market yesterday.

Work on the light house here is progressing rapidly, and the light will probably be lit by the 1st of May.

The mania among the young people at the present time is the collection of different styles of business cards.

An adjourned meeting of the Fire Brigade is to be held to-night at the hall of No. 3 Hook and Ladder Company.

The revival services in Holloway Street Methodist Church are still going on, with increasing interest and success.

Any person who will look in the 5th chapter of the book of Nahum and 6th and 7th verses will find how All Fools' Day originated.

An old gentleman who picked up a nicely done up parcel of earth on Coleman St. this morning realized that this is "April Fool" day.

The ice on the bay is still crossed with horses by those who are aware of the location of bad spots. Its early break up is, however, looked for.

Mr. Emo, the Census Commissioner for North Hastings, had a class of his Enumerators at Stirling yesterday, at which Dr. Beatty, one of the Staff Officers, was present.

The Eagle mill is ready for work, which will be resumed as soon as the ice permits of the logs being taken out of the water. The same remark applies to the big mill at Deseronto.

The ferry landing is to be removed to the abandoned ferry-slip at the foot of Dundas St.—that is, if the City Council ratifies the decision of the joint committee.

Reddick has commenced ferrying across the ice. He uses a punt fixed on runners. Strangers who do not know the peculiarities of the ice will find the ferry the safest mode of crossing.

To clean out a stove pipe the following is recommended: Place a piece of zinc on the live coals in the stove and the vapor produced by the zinc will carry off the soot by chemical decomposition.

Brick continues to be shipped in large quantities to Campbellford, for use in the construction of the new woollen mill in that village. Enough has already been sent out to erect a large building.

Dr. Canniff, one of the Census Staff Officers, met Mr. Kelly, the Commissioner for East Northumberland, at Campbellford yesterday. Nearly all the Enumerators of the District were present.

Fred Plaisted, who is to have a race in Toronto harbor with Nagle, for $500, was in Trenton on Wednesday evening, being the guest of Mr. Robert Cumming. The race with Nagle, it is said, will come off in June.

Mr. Andrews has taken down his boat house at the Dundas Street ferry dock, which, if the Council adopt the recommendation of the Ferry and Public Works Committees, will be required for business purposes.

The new lighthouse is now the most conspicuous object in the harbor. The woodwork is as high as it will be carried, and the only addition to the height of the structure will be the glass lantern, which is to be 30 inches high.

Potatoes are being shipped in large quantities from Peterborough and vicinity to the United States. Within the last ten days, Mr. Bray of Toronto, purchased at Peterborough twenty four cars of potatoes and shipped them to the United States, via the Midland and Grand Trunk. Mr. Bray came to Belleville yesterday, and will purchase here if he can find it to his advantage.

Mr. Wm. Monahan, we are pleased to say, is recovering from his recent paralytic attack.

Amongst the junior honor list at the Veterinary College, Toronto, we notice the name of Mr. Lyman Vandervoort, Belleville.

Two car loads of horses, shipped by Mr. James Walsh at Peterborough for Boston, arrived per Grand Junction on Wednesday. Amongst them were two handsome matched teams which cost about $1,000.

The *Mail* says: Mr. S. Balkwell, President of the Young Men's Liberal-Conservative Association of London, was entertained at a complimentary supper on Wednesday night, on the occasion of his departure for Belleville.

Mr. A. E. Wallbridge crossed the ice in safety this morning with a team of horses drawing a waggon heavily loaded with corn. Another person who followed with a single horse and waggon was not so fortunate, as the horse broke through and was rescued. There are numerous places where the ice is very soft.

Mr. Townsend, one of the Inspectors of the Montreal Telegraph Company, was at Blairton yesterday making arrangements to have the office at that place re-opened. The office was moved to the Railway Station, and is now open for business. The principal reason for re-opening the office is to accommodate the Iron Company, who intend resuming operations there on an extensive sale this season.

Weather Probabilities. — Toronto, April 1.—Lakes, brisk to high northwesterly to northerly winds, cloudy to fair cold weather, with snow flurries.

P. E. Railway.—The Picton *Times* says: "Work on the extension of the Prince Edward County railway northward to Madoc, and also on the extension into Picton, will be commenced as soon as the frost is out of the ground.

Vital Statistics.—The following are the vital statistics of Belleville for the month ending 31st March:—Births, 25; marriages, 6; deaths, 7. There must have been some neglect in registering deaths last month, as the number was certainly more than seven.

Sale of Property. — The Madoc *Review* says: "Mr. John Soby, of Belleville, has made a purchase of Moon's Hotel in this village, and, we understand, will take possession, on May 1st. The amount paid was $9,500. The hotel is one of the finest in this part of the country."

Sugar Making. — The Campbellford *Herald* says: "Mr. R. Oliver, of Seymour township, has manufactured two hundred pounds of maple sugar and three gallons of molasses this season. If the weather is suitable for sugar making, he will add a heavy lump to this quantity during the next two weeks."

New Warehouse.—A new warehouse is to be constructed by Messrs. Rathbun & Son just below the present ferry slip, near their new docks, which have just been completed. The old plaster-sheds which now occupy the site are being torn down to make way for the new building. It will be an unassuming and cheap wooden structure, and will be finished before the opening of navigation.

Jupiter and Saturn.—Jupiter and Saturn, which have long been a leading attraction in the western sky, are now fast disappearing. Such a brilliant exhibition of these two planets as has been accorded us this winter will not occur again in years. Venus, now the brightest star in the heavens, reached the culminating point in its brilliancy on Tuesday, and from this time on will slowly diminish in splendor.

Enforcing the Cow By-law.—A vagrant pig was set upon on Front Street this morning by a bull-dog, which seized and severely worried the porker, despite the efforts of the owner of the dog and Mr. Harry Robinson to choke the brute off its squealing victim. This should be a lesson to owners of pigs to keep them shut up, instead of allowing them to wander about the streets in defiance of the By-law, which the dog was by all odds too earnest in enforcing.

A Nice Round Sum.—The Peterborough *Review* says:—"Mr. W. H. Ellis, Engineer of the Grand Junction Railway, who was thrown from his buggy and badly injured last fall, while driving through the township of Otonabee, has effected a settlement with that corporation for the sum of $800, without the case going before the courts. The accident was caused by the negligence of the authorities in not keeping their roads in a good state of repair."

Canadian Fruit.—Messrs. Dudley & Son, of Colborne, have shipped 9,000 barrels of apples to Liverpool this season. They recently received a telegram from Liverpool to the effect that the Canadian apples were of such excellent quality that they had driven the French and German fruit from the Liverpool market. The apples from this district are especially popular in England, and it appears to be fated that "by our fruits shall we be known" even more than by our grain.

A Threat or a Joke.—A vacant lot lies between the north end of William St. and Forin St. but vehicles have for a long time been driven through it to to get from one street to the other. This morning, however, those who wished to pass through were confronted with a board fence which had been hastily constructed. It thought that the owner of the lot intends to shut off his property and thus attempt to coerce the city into acquiring it in order to open up William Street. It is possible, however, that the construction of the fence is a bit of April-fooling.

No. 1 Literary Club.—At a very large and enthusiastic meeting of the literary club in connection with No. 1 Company, 15th Batt., a novel and decidedly original form of organization was agreed upon. The club resolved itself into a regularly constituted Government and Opposition. The Government is modelled after our Dominion Government, with Premer, Ministers of Finance, Militia, &c., and a few supporters; and the Opposition have a leader to whom they are bound to pay deference. The Government will shortly submit their policy on questions of paramount importance to the state, and there is no doubt it will be as faithfully and energetically defended by the Government and their supporters, and as bitterly assailed by the Opposition, as is the policy of the real Government at Ottawa.

The Missing Link.—There is at present a great rivalry between the Grand Junction and Midland Railway Companies as to which shall build the "missing link" from Peterborough to Omemee. The *Review* says: "The missing link from Peterborough to Omemee is to be built this spring, that much is certain, with a possibility if not a probability of the two links. Mr. Bickford informs us that the Grand Junction Company intend to proceed with the work as soon as the weather is fine enough. Mr. Geo. A. Cox goes one better, and early this week put a number of men under the charge of Mr. W. H. Ellis, an experienced engineer, to locate the line from Peterborough to Omemee for the Midland Railway. So far they have been merely running trial lines, but Mr. Ellis informs us that on Monday next an additional number of men and engineers are to be put at work, and the line finally located. He thinks the route up Bethune street will be followed as far as Brock street, when a deviation will be made to the north-west, and the line run up somewhere in the vicinity of W. Hamilton's foundry."

A New Work by Mr. Faughnan.—The Picton *Gazette* has the following notice of a new work by Mr. Thos. Faughnan of that town:—"Mr. Thomas Faughnan, author of "Stirring Incidents in the life of a British Soldier," we are much pleased to announce is now busily engaged giving the "coup de grace" to another military story of his own creation entitled:—"The Young Hussar, or Lady Iris's Adventures." We have perused some of the Ms. and looked through all of it. We can, therefore, candidly assert that it is not only abounding in facetious effusions, such as only an Irishman and a British soldier can produce, but the moral is also excellent. Its perusal cannot fail to impart both knowledge and pleasure, while it shows that the way of the transgressor is hard. It also verifies that to be virtuous and noble is to be happy. The plot is laid on the banks of the Shannon in Ireland. The incidents, natural and striking, are graphically delineated, the characters all masterly conceptions from which spontaneous life-like pictures are vividly drawn. The heroine is a sweet creature, of all that is magnanimous and lovely in the fair sex, her great love and fidelity to Hubert being a remarkable trait in her character. The story cannot fail to captivate the public, and we predict for it a popular reception.

All-Fool's Day.—To-day, being the 1st of April, is the day which is consecrated to the dishonor of fools. The custom of playing practical jokes on this day has been observed from time immemorial. Some antiquarians even go so far as to say that the custom dates back to the flood, and arose from the mistake of Noah in sending the dove out of the ark before the water had abated, on the first day of the month among the Hebrews, which answers to the 1st of April; and to perpetuate the memory of this deliverance it was thought proper, whoever forgot so remarkable a circumstance, to punish them by sending them upon some bootless errand, similar to that ineffectual message upon which the bird was sent by the patriarch. Whatever the origin of the custom may be, it is certainly one of great antiquity, being commonly practised among the ancient Romans and even among the Hindus. Like many of the old anniversaries, April Fool's Day is fast losing its significance. It has sadly degenerated of late, and now, alas! the humorous vein of most people is exhausted when they succeed in fastening a bit of paper or an old rag to the boy of some man or brother. If the shop-keepers don't take hold of it soon and revive it by making people buy "April Fool cards" or some such remembrances, the custom of celebrating the 1st of April may soon sink into disuse and be forgotten.

Sarah Bernnardt.—Just received, a beautiful assortment of the celebrated Bernhardt checks in sky blue, old gold, navy cardinal, pink, salmon, grena, seal brown, myrtle, and suitable for dresses and trimmings.—James Hennessy.

Marine Notes.

The schooners *Baltic* and *Jane McLeod* are chartered to take coal from Oswego to Trenton at 25c per ton.

Sailors wages at Chicago are $1.25 to $1.50 per day, fitting out.

The schooner *Marcia Hall*, loaded with coal, left Oswego for Toronto on Wednesday afternoon, being the first departure from that port this season.

The *Wheeler* is the first tug in commission at Oswego this year.

Oswego light house was lit up for the first time this season last night.

Grain freights in Chicago, 8c asked on wheat to Buffalo and shippers nominally holding at 7c.

Toledo vessel-men think that there will be no trouble in securing a 7½ cent freight on corn or eight cents on wheat at that port for Kingston or Oswego, during the coming season.

Another Very Sudden Death.

A YOUNG LADY COMES OUT SHOPPING, TAKES ILL, AND DIES ON THE WAY HOME.

The Montreal *Star* contains the following account of a sad and sudden death of a young lady, who was well known in Belleville:—"Of late the number of sudden deaths here has been very numerous, but none more startling or to be regretted than that of Miss Agnes Greenshields, second daughter of the late Mr. Henry Greenshields, of this city. It appears that Miss Greenshields left home yesterday afternoon in her usual health to do some shopping in the city. She called at the store of Mr. Palmer on Notre Dame street, where she took suddenly ill. A cab was called and a gentleman who was in the store at the time, started to take her home in it. Before getting to Craig street she seemed to faint, when the cab was driven hastily to Dr. Kennedy's on Bleury street, but he was not in. Several other doctors' residences were tried with like result. On coming to Doctor Reddy's on St. Catharines street, Miss Greenshields was carried in there and a medical man sought for. At length Dr. Lapthorn Smith was found and he attended at once, but his skill was of no avail, as the young lady was then beyond all earthly aid. Dr. Reddy soon arrived and advised the sending for her friends, as he expected her to breathe her last at any moment. This was done and within fifteen minutes of being taken out of the carriage, she peacefully passed away in her 21st year. What adds to the painfulness of this sudden bereavement is the fact that Miss Greenshields was engaged to be married shortly.

Who is the Prettiest Girl in America?

Is a question that would perplex a congress of connoisseurs assembled to nominate the most beautiful. But such an assemblage would not be surprised to learn, that the most charming of their of sex, on this side of the Atlantic, enhance the beauty and preserve the soundness of their teeth with SOZODONT, since everybody knows, that the ladies prefer it to any and all dentifrices. Let no man say after this, that women lack judgment.

Thos. Dempsey, St. Leonards P. Q., desires to say that he was cured of a lame side of three years standing caused by being run over by a load of lumber, by using two bottlet Dow's Sturgeon Oil Liniment. He says it is a wonderful medicine.

Physicians having consumptive patients, and having failed to cure them by their own prescriptions, should not hesitate to prescribe Allen's Lung Balsam. It has cured cases where all other remedies have failed. It is harmless to the most delicate child.

Murray & Lanman's Florida Water.—The most delicate invalids, the greatest sufferers with sea-sickness, and those whose nervous systems are most sensitive, prefer it before all others, and use to the exclusion of all others, not for a time only, but always and continuously. The sense of smell never tires of its oft, refreshing odor.

S. E. Burwell, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

MORNING DESPATCHES

AMERICAN.

FEARFUL SNOW STORMS IN WEST.

Chicago, April 1.—Fearful snow storms are reported in Iowa, Minnesota, Mississippi, Illinois, and northern Michigan yesterday, accompanied by a high wind.

A SHOOTING AFFAIR.

Louisville, Ky., April 1.—Mrs. Canfield, a prominent lady, attempted to shoot Daniel Spaulding, a clerk in a dry goods store, yesterday, the bullet grazing the heads of two lady customers. Spaulding is engaged to marry Mrs. Canfield's daughter. The mother declares the wedding shall not take place.

FATALLY STABBED.

New Orleans, April 1.—Early yesterday morning, in a drunken row, Police Magistrate Brecker fatally stabbed Geo. Coogaves, a noted Ward politician, and in another row John Callaghan.

FATALLY SHOT.

The Clerk of the Court fatally shot District Street Commissioner Mike Tracy.

A $10,000 FIRE.

Red Bank, N. J., April 1.—Robert Van Chesick's carriage factory, Shrewsbury, was burned. Loss $10,000. Supposed incendiary.

A SHERIFF'S DUTIES.

Nashville, April 1.—The Legislature passed a Bill declaring that any Sheriff who permits a prisoner to be taken from custody and lynched shall forfeit his office.

UNFIT FOR THE VOYAGE.

San Francisco, April 1. — The Vallejo *Chronicle* reports that the steam monitor *Mary Helen*, purchased by the Government to find the lost *Jeannette*, is unfit for an arctic voyage.

WASHINGTON DESPATCHES.

New York, April 1st.—The *Times'* Washington despatch says that Sherman and Hazen are quarrelling about the details of officers for instruction in signal duty.

REORGANIZING.

Postmaster Pierson yesterday reorganized his office, making no important changes. The removals included Dwight Lawrence, superintendent of the foreign department for many years.

A CONVENTION.

Davenport, Ia., April 1.—The Illinois and Mississippi River & Canal Improvement Commission have arranged for a north-western convention in Davenport on May 25th. The object is to appeal to Congress for a speedy extension of the Illinois & Michigan Canal to Mississippi river *via* Hennchin, and for the purpose of opening all the water routes from the upper Mississippi to Chicago, by the lakes and Erie canal.

THE GREEK QUESTION.

Anxiety to Persuade the Greek Ministry from War.

Troops Still Moving to the Front.

London, March 31.—The *Times'* leading article says:—We cannot imagine that Greece will reject the award of Europe.

The *Pall Mall Gazette* says:—The general assumption that the Greek question will not lead to war is premature. The powers ought to decisively restrain Greece from plunging into an abyss.

An Athens despatch says that four battalions, each numbering 1,200 men, are marching for the frontier of Epirus and Thessaly. Fortifications at Lamia have been commenced. The organization of the commissariat and transport service has much advanced lately.

AFTERNOON DISPATCHES.

THE BOER QUESTION.

London, April 1.—The first attack on the Government's policy in the Transvaal was made by Lord Cairns, Conservative, in the House of Lords last night. He alluded to the announcement in the Queen's speech that the authority of the Crown would be promptly vindicated in the Transvaal. He entertained grave doubts that in surrendering Seretong the prerogative of the Crown had not been stained. He emphatically protested against handing hundreds of thousands of British subjects back to as bad a system of slavery as ever existed in the world. He argued that they had no security that the Boers would accept the decisions of the Commissioners. He concluded by a general denunciation of the terms of peace in a peroration of striking eloquence, which elicited an outburst of cheering.

Lord Kimberly replied that there could be no doubt if the war continued the greater part of South Africa would be involved. He said he was convinced that for some years there has been no slavery in the Transvaal.

Lord Cranbrook mainly attributed the rising in Transvaal to the speech of Gladstone at Midlothian.

Lord Salisbury said it was the some wretched story as that of Candahar. It would raise disgust which would be fatal to all our future power in South Africa. The subject then dropped.

THE GREEK DIFFICULTIES.

Athens, April 1.—It is reported that the Premier will telegraph to the Greek agents that Greece cannot accept the Porte's proposals.

Washington, April 1.—The decrease in the debt for March was $6,192,629.

New York, April 1.—Arrived, the *City of Chester*, from Liverpool; the *State of Florida*, from Glasgow; the *Belgin Land*, from Antwerp.

A DEADLOCK

Washington, April 1.—It is reported that the President is tired of the Senate deadlock and may terminate it by calling an extra session of Congress, or by withdrawing all nominations, leave it no business.

Washington, April 1. — Indications:—Lakes, generally colder; light snow to-morrow; cool, fair.

DESORONTO.

The name of this village was to-day changed from Mill Point to Deseronto.

An Incendiary Fire.

Otterville, Ont., April 1.—This morning the tannery owned by Mr. Durkee, was consumed by fire along with all its contents. The building was insured in the Phoenix of Toronto for $600. The loss on the building and contents is about $2,000. It is supposed to have been the work of an incendiary.

The Prospects of Navigation.

Windsor, April 1.—The vessels in port are fitting out, and making usual spring repairs. The freight prospects are good. Lake St. Clair is not yet open, the ice moved on Wednesday from the lake shore points in Pigeon Bay, and it is now supposed that a steamer could work her way to Cleveland, although she would encounter much loose and broken ice.

Cape Vincent, April 1.—The river at this point is still full of ice, and there is not much sign of opening of navigation at present. Only one lake vessel is wintering here.

'They all do it.'—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

"Hail bounteous, beauteous, gladsome Spring" — this was Mark Twain's prize poem-but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

Dyspepsia.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. Yeomans.

Zopesa from Brazil.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. Yeomans.

BIRTH.

On Wednesday, March 30th, 1881, the wife of Roger D. Conger, of a son.

MARRIAGES.

On the 23rd ult., by the Rev. J. A. Chapman, M.A., at the residence of the bride's mother, Mr. Neil McArthur, of Seymour, and Miss Mary E. Dale, of the township of Brighton.

In Percy, at the residence of the father of the bride, on the 17th ult., by the Rev. D. Sutherland, M.A., Mr. James O'Connor, of Brighton township, and Miss Jane Campbell, of the township of Percy.

DIED.

In Campbellford, on the 24th ult., Elsie, infant daughter of Mr. H. Williams, aged 16 months.

At her father's residence, township of Thurlow, on the 20th March, Maretta Kent, daughter of Mr. Albert Kent, and sister of J. N. Kent, Campbellford, aged 24 years.

Commercial.

HOLTON, BOTTOMS, & CO.

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville.

THE BEST REMEDY

FOR

Diseases of the Throat and Lungs.

AYER'S
CHERRY
PECTORAL.

In diseases of the pulmonary organs a safe and reliable remedy is invaluable. AYER'S CHERRY PECTORAL is such a remedy, and no other so eminently merits the confidence of the public. It is a scientific combination of the medicinal principles and curative virtues of the finest drugs, chemically united, of such power as to insure the greatest possible efficiency and uniformity of results. It strikes at the foundation of all pulmonary diseases, affording prompt relief and rapid cures, and is adapted to patients of any age or either sex. Being very palatable, the youngest children take it readily. In ordinary **Coughs, Colds, Sore Throat, Bronchitis, Influenza, Clergyman's Sore Throat, Asthma, Croup, and Catarrh**, the effects of AYER'S CHERRY PECTORAL are magical, and multitudes are annually preserved from serious illness by its timely and faithful use. It should be kept at hand in every household for the protection it affords in sudden attacks. In **Whooping-cough and Consumption** there is no other remedy so efficacious, soothing, and helpful.

Low prices are inducements to try some of the many mixtures, or syrups, made of cheap and ineffective ingredients, now offered, which, as they contain no curative qualities, can afford only temporary relief, and are sure to deceive and disappoint the patient. Diseases of the throat and lungs demand active and effective treatment; and it is dangerous experimenting with unknown and cheap medicines, from the great liability that these diseases may, while so trifled with, become deeply seated or incurable. Use AYER'S CHERRY PECTORAL, and you may confidently expect the best results. It is a standard medical preparation, of known and acknowledged curative power, and is as cheap as its careful preparation and fine ingredients will allow. Eminent physicians, knowing its composition, prescribe it in their practice. The test of half a century has proven its absolute certainty to cure all pulmonary complaints not already beyond the reach of human aid.

LADY THORNHURST'S DAUGHTER.

By MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

CHAPTER XXXIV.

Captain Holm had counted the moments of Tessa's absence with an increasing impatience, but he summoned a smile on his bloated face as the young girl re-entered the room, fully equipped for her walk. He saw that she had been crying, and suspected the actual father had fallen far short of the probable ideal one in her estimation, but he experienced no sense of disappointment in the thought. He was, in truth, cool-blooded and heartless as he was fond of proclaiming himself, and had no special desire to win her love, promising himself that he should not fail to exact what was of more importance to him than her affection—her obedience.

"All ready, Tessa?" he said pleasantly, not caring to unsheath his tiger's claws at present. "You are looking almost ill. I shall see that you lead an easy life at the Grange. Todhetly is anxious to do all in his power to counteract the effect of this morning's affair, and would organize parties and balls in your honor if you would allow him. But come. We shall be late to luncheon, I fear," and he looked at his watch.

He led the way toward the door, but before he could reach it it opened from without, and Mrs. Gwynne, in a tight-fitting purple silk gown, very stout, very red and very coarse and vulgar as usual swept in the room.

"I heard that you were meeting gentlemen from the neighborhood in my house, Miss Holm!" she exclaimed, in a high, dissagreeable voice. "And you are a perfect stranger in Dorsetshire, as you told me yourself! You are getting on rather too fast, Miss. Do you suppose you can meet perfect strangers by appointment in *my* house?"

She elevated a gold mounted eye-glass that swung by a chain from her neck, to her red nose, and stared at Holm insolently and superciliously.

The Captain drew from his waistcoat a similarly mounted eye-glass, and daintily set it upon the bridge of nasal promontory, and returned her glance with one of greater insolence and coolness.

"Well, upon my word!" ejaculated Mrs. Gwynne.

"Queer people, these Gwynnes, to allow their cook in the parlor!" drawled Holm.

Mrs. Gwynne's eyes sparkled with anger. She drew herself up until her stout figure nearly burst its silken confines. Her fat face grew purple with rage and mortification. In that moment all her insolence to Tessa was amply revenged.

"I am Mrs. Gwynne," she said in a thick choked voice.

"You? Impossible!" ejaculated Holm, incredulously, continuing to survey her coolly through his eye-glass, and feeling a spirit of antagonism to her so strong that he would have stopped at nothing in the way of her humiliation. "Mrs. Gwynne is a lady by birth, I believe. Be kind enough to inform your mistress, my good woman, that Miss Holm's father—Captain Holm, late of Her Majesty's army—has just succeeded in finding his daughter, after losing sight of her for years, and has removed her from Heathstead. And also request your mistress, my worthy creature, to have Miss Holm's luggage sent to the Grange, where Miss Holm and her father will spend some weeks on a visit."

"At Todhetly's?" gasped Mrs. Gwynne.

"Exactly," said Holm with exasperating coolness. "Come, Tessa, my dear. We are detaining Todhetly's luncheon."

He offered Tessa his arm with great politeness, and the young girl, blushing and half bewildered at the singular scene, took it in silence. Holm then, bestowing a last supercilious stare upon Mrs. Gwynne, withdrew with his daughter, and the house door clanged heavily behind them.

"The—the impertinent scoundrel!" gasped Mrs. Gwynne, sinking upon a sofa and becoming fairly apoplectic in her rage. "He took me for a cook! And they are stopping at the Grange! This Holm must be that wild Captain Holm that Todhetly told me about so often, and whose wife Tom says got a divorce from him and married a duke or somebody. I can see that Captain's drift. He means to marry that bold minx to Todhetly, and live in ease for the remainder of his days. I'll block that game. I'll drive over and see Todhetly this very afternoon."

Thus vengefully solacing herself, Mrs. Gwynne plied her fan and calmed her outraged feelings.

Meanwhile Captain Holm and Tessa crossed the bare and wintry lawn and passed out into the road. Holm was in fine spirits, and dropping his eye-glass into his waistcoat pocket, engaged in a lively recital of some of his adventures in America such as were fit for Tessa's pure ears, and the girl was smiling long before they turned into the grounds belonging to the Grange.

The smile on her face gave place to an anxious expression as, when they mounted the tall porch, they were met at the door by Squire Todhetly, his red rotund face beaming with welcoming smiles, and his short thick hand thrust out towards Tessa.

"You have forgiven that little affair of this morning, Miss Holm, I hope," he said, in a tone of quiet respect, sufficiently regretful. "Your presence at my house is a sign that you do not harbor resentment against me. I will take care that you find me worthy of your noble forgiveness and kindness. Perhaps you find it easier to pardon my inexcusable folly and impertinence, since I have been the means of restoring you and your father to each other. I congratulate you both upon your happiness. Holm has mourned for you as one dead, Miss Tessa. But how I am rambling on, forgetting my duties as host. Welcome to the Grange, Miss Holm. Yours is the fairest face that ever passed under this portal, and I take your appearance here as an omen of good fortune."

He relinquished Tessa's hand, of which he had coolly taken possession, and conducted his guests into the wide hall that traversed his house from front to rear, opening upon a porch at each end. The floor of this hall was paved with red and blue tiles, and the few settles along the wall were of ancient and uncouth pattern. Upon one side of the hall were the drawing-rooms; upon the other a sitting, dining and breakfast room; and in the wings were the library, smoking room and kitchen offices.

Todhetly ushered Tessa into the drawing-room, with the remark,

"I have only a bachelor establishment, as you see, Miss Holm. It is some years since a lady presided at the Grange, and the house shows it. If I should ever marry," he added significantly, "I should furnish the house now throughout."

TO BE CONTINUED.

The Pill Box.

This familiar little receptacle often contains, under the guise of medicine, cheap mineral compounds the most dangerous. Before you take a remedy for cough or cold, or pain, or ache, etc., make inquiries regarding the virtues of DR. HERRICK'S SUGAR-COATED PILLS.

FOR COUGHS.—Mix one teaspoonful of Perry Davis Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every half hour, till relief is obtained.

In Bristol's Sarsaparilla we have the most potent and reliable of all purifiers and regulators and in BRISTOL'S SUGAR-COATED VEGETABLE PILLS we have the best regulator of the Bowels and liver that has, thus far, been discovered by the medical faculty.

In cases of Chronic disease which doctors have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING'S NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful." "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Feaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines. It is the only diploma ever issued for grapes and grape vines in this province."

MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL use.
THE OLDEST BEST & MOST WIDELY KNOWN FAMILY MEDICINE

SUBSTITUTES!

☞The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

SMOKE GOLD FLAKE CUT PLUG.

GOLD FLAKE

Cut Plug is the best pipe smoking tobacco ever introduced into Canada. It is made from the best selected fine old Bright Virginia Leaf. (*The raw leaf from which this tobacco is made costs more than any other tobacco manufactured in Canada after it is ready for the pipe.*)

It is made absolutely pure and neatly packed in handy tin-foil packages.

It is sold by all respectable dealers in all parts of the Dominion.

Manufactured by
THE GLOBE TOBACCO CO., WINDSOR, ONT.

N. H. DOWNS'
VEGETABLE BALSAMIC
ELIXIR

Is a sure cure for Coughs, Colds, Whooping-Cough, and all Lung Diseases, when taken in season.

People die of consumption simply because of neglect, when the timely use of this remedy would have cured them at once.

Fifty-one years of constant use proves the fact that no cough remedy has stood the test like **Downs' Elixir.**

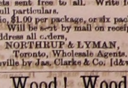
Belleville, March 12, 1880. dtf

TO NERVOUS SUFFERERS—THE GREAT EURO. REMEDY—DR. J. B. SIMPSON'S SPECIFIC MEDICINE.

DR. J. B. SIMPSON'S SPECIFIC MEDICINE is a positive cure for Spermatorrhea, Impotency, Weakness, and all diseases resulting from Abuse, as Nervous Debility, Irritability, Mental Anxiety, Languor, Lassitude, Depression of Spirits and Functional Derangements of the Nervous system generally, Pains in back or side, Loss of memory, Premature Old Age and diseases that lead to Consumption, Insanity, and an early grave, or both. No matter how shattered the system may be from excesses of any kind, a short course of this Medicine will restore the lost functions and procure Health and Happiness, where before was despondency and gloom. The Specific Medicine is being used with wonderful success. Pamphlets sent free to all. Write for them and get full particulars.



Price, Specific, $1.00 per package, or six packages for $5.00. Will be sent by mail on receipt of money. Address all orders,

CINGALESE
HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

BRANCH OFFICE
OF THE
DETROIT

THROAT AND LUNG INSTITUTE,

M. Hilton Williams, M.D. }
S. L. Nash, M.D., } Proprietors

PERMANENTLY ESTABLISHED AT THE
DAFOE HOUSE
BELLEVILLE, ONTARIO.

For the cure of all the various diseases of the Head, Throat and Chest, including the Eye, Ear and Heart.

It was an old dogma, as false and pernicious as comfortless, that all who were victims of Lung Diseases must die—there was no hope; but happily that day has gone by, and he who clings to that theory is a long way behind the times. Medical science has kept pace with the spirit of the age. New discoveries, new improvements, new inventions, have been made in medicine; new theories have taken the place of the fallacies of former days, and experience year by year demonstrates their truthfulness; and thousands are to-day living and well who under the old regime would have been in their graves.

We say confidently to those who are suffering from Catarrah that the disease is curable—that a cure can be effected in every instance where there is no other serious complication. Asthma, once so obscure and hard to manage, can, in most cases, be cured. Throat Diseases and Bronchial Inflammations readily yield to the new treatment, and Consumption itself, in most stages, may be cured and the sufferers live for years to bless their friends with their society, and to attest the wonderful efficacy of the treatment which is rapidly gaining respect and popular support—"The System of Inhalation."

The remedial agents by the practice of Inhalation are conveyed directly to the parts diseased and thus the work of restoration is begun. By simultaneous constitutional treatment the secretions become normal, the functions of the various organs are performed in a natural manner, and final recovery is the fruition of our hopes and of this rational plan. All this is accomplished without the use of much medicine—without the necessity of exile from home or any inconvenience whatever.

The very best of references given from all parts of Canada from those already cured. Remedies sent to any part of Ontario. Consultation free.

If possible, call personally for consultation and examination, but if impossible to do so, write for "List of Questions" and "Medical Treatise." Address

MANHOOD
HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

FATHER FABER'S HYMN.

I was wandering and weary
When my Saviour came unto me,
For the ways of sin grew dreary
And the world had ceased to woo me.

CHORUS.—And I thought I heard Him say,
As He came along His way,
"O silly souls, come near me!
My sheep should never fear me,
I am the Shepherd true."

At first I would not hearken,
But put off till to-morrow,
But life began to darken,
And I was sick with sorrow.

And I thought I heard, etc.

At last I stopped to listen,
His voice could ne'er deceive me,
I saw His kind eyes glisten,
So anxious to relieve me.

And I thought I heard, etc.

He took me on His shoulder,
And tenderly He kissed me,
And bade my love grow bolder,
And said how He had missed me.

And I'm sure I heard Him say,
As He went along, etc.

I thought His love would weaken,
As more and more He knew me;
But it burneth like a beacon,
And its light and heat go through me.

And I always hear Him say,
As He comes along, etc.

Let us do then, dearest brothers,
What will best and always please us,
Follow not the ways of others,
But trust ourselves to Jesus.

We shall ever hear Him say,
As He goes along His way,
"O silly souls, come near me!
My sheep should never fear me,
I am the Shepherd true."

OUR MASTER.

We may not climb the heavenly steps
To bring the Lord Christ down;
In vain we search the lowest deeps,
For him no depths can drown.

But warm, sweet, tender, even yet
A present help is he;
And faith has still its Olivet
And love its Galilee.

The healing of his seamless dress
Is by our beds of pain;
We touch Him in life's throng and press,
And we are whole again.

Through Him the first fond prayers are said
Our lips of childhood frame;
The last, low whispers of our dead
Are burdened with his name.

O Lord and Master of us all,
What'er our name or sign,
We own Thy sway, we hear Thy call,
We test our lives by Thine.

TABERNACLE SERMONS.

Discourse by Rev. T. De Witt Talmage.

HELP FOR ALL.

"In me is thy help."—Hosea xiii., 9.

Those of you who have visited Versailles know that the picture galleries were full of representations of the Napoleonic victories. It was Napoleon at Austerlitz, Napoleon crowned, Napoleon here, and Napoleon there. When the Germans, a few years ago, took Versailles, the first thing they did was to cut out of the canvas all the representations of these Napoleonic victories. They wanted nothing that showed the defeat of the Germans and the triumph of the French. I would to God that this morning all trace of sinful victory in our souls might be obliterated and that nothing might be left but the triumphs of grace. The first thing that a man does after waking up to his sinful condition is to try to help himself. He looks over his character. "Now," he says, "here I have some bad habits I must get rid of. I'll stop this, and I'll stop that. I have been given to profanity; I'll stop swearing. I have been given to over-reaching my neighbors in bargaining; I'll be honest. I have been in the habit of Sabbath-breaking; I'll observe the Lord's day, and whatever I did wrong I'll do right." There is no war between the gospel and morality. We must give up our evil habits if we are going into the Kingdom of God, but if you have the idea that by changing your habits you can change your nature, you have made an awful mistake. A pomologist goes into his orchard and he sees a valuable tree dying, and he knows that it has a worm gnawing at the root. Does he begin by chopping off branches in order to get back the health of that tree? No; he begins to dig in the earth, and he comes down until he is able to destroy the worm at the root. Now, how are we to come to moral and spiritual health? Well, we accomplish the thing by chopping off this bad habit, and chopping off that bad habit, chopping off this evil proclivity and chopping off that evil proclivity? No; there is trouble at the root. "The heart is deceitful above all things and desperately wicked." As long as the heart is wrong the life will be wrong. Now, in a great many things, it is well for people to help themselves. If you want to get the favor of the world, go to work and win it. If you want to get a fortune, go to work and earn it. If you want to be a geologist, delve with your own crowbar; or a mineralogist, smite with your own hammer; or a surgeon, cut with your own knife; or a poet, chime your own cantos: but if you have any idea that you are going to change your heart and hew your own way into heaven by your own strength, you are attempting an impossibility. You know very well that if a man be sinking in a quagmire, the more he struggles the deeper he sinks. If you are now in the depths of your sin, struggling by your own power to get out, you will only sink deeper and deeper. You want a strong arm on the outside to clutch you and lift you up, and plant you on the rock. In other words, you want some one to cry out from the solid land, "In me is thy help." Well there are those in this audience who not only feel they have a sinful nature, but that they are helpless. I congratulate you. I am glad of it that you feel you are helpless. You say, "That isn't brotherly, that isn't humane." Well, I say that in the same spirit in which Lady Huntingdon said it to a man who exclaimed, "I am a lost man." She said, "I am glad of it." He said, "That's a most unkind remark." "Ah!" she said, "I am glad of it because you must first feel you are lost before you will want salvation." And so if there are those here this morning who feel not only that they have a sinful nature, but that they are helpless, I congratulate you. For now comes the clarion voice of my text—it comes like ten thousand thunders bursting from the throne: "In me is thy help." There is a fountain in the city of Rome about which is the superstition that if a man once drink of it he will some time certainly come there to drink again. He may be gone fifty years, he may wander all the world over; but the superstition says that that man will certainly come back and drink again of the fountain. He cannot help it. But it is no superstition for me to say that when a man drinks of this fountain of grace he is sure to come again, and coming this morning, some of you the hundredth time, the thousandth time, you will yet again and yet again—this morning, perhaps, with more joy than when you came the first time. Drinking once, you drink again. Now, I feel the great heart of God, the great heart of a loving and symphetic God, throbbing against the heart of this assembly, and every word is a throb: "In—me—is—thy—help."

God, in the first place, is willing to help you by giving you the Holy Spirit to show you and me just the position we occupy. "Now, what is the use of conviction?" some one says. "If God is going to save me, why not save me? What is the use of my being hurried up by the sense of my past deficits? I am ready now to begin a new life, why be bothered about the past?" My brother, I will tell you the use of conviction. You go out into the street and there is a gay equipage dashing past, and you rush out and take the horses by the bit, and you stop them. The occupant of the carriage says, "Why do you stop me, sir?" and you offer him fifty cents. He throws the money back in your face. He says: "Do you think I am a beggar? How dare you stop me? Get out of the way or I will ride over you, Drive on!" Next morning, you are coming out of your front doorway, and you see a poor man on the steps, hungered and in rags, and you give him fifty cents. He says: "Thank you, God bless you. I was near unto death for lack of bread. Thank you, thank you." In other words, the gospel of the Son of God is a charity to our impoverished race. You offer that charity to a man who deems he is in want of nothing, he says: "Why do you offer me deliverance? I am not incarcerated. Why do you offer me pardon? I am no sinner. I want none of your help Drive on!" Another man, by the power of the Holy Ghost is persuaded that without Jesus Christ he is pauperized, impoverished, and beggared for eternity. You offer him the gospel. He says: "God bless you for this offer. Hear, all the earth and all the heavens, that I am to be pardoned and blessed. Thank you, thank you." In others words, without conviction a man does not want Christ and his salvation. The Holy Spirit coming in the heart, a man wakes up to see his true state. If the Holy Spirit should come in this assemblage this morning, with unwonted power—we all feel His presence now, but if He should come with unwonted power, what a scene! I remember in the first year of my pastorate in the little village of Belleville, I was very much discouraged because there were so few conversions, and one Sabbath morning I went into the pulpit utterly disheartened, and preached what it seemed to me was a very lame sermon. The next morning, passing down the street, a lady of one of the first families of the village said to me, "I wish you would come in and see my family." I said, "Are any of them sick?" I passed in, and I found the Holy Ghost was mightily working upon all their hearts, and before that nightfall the most of that family were in the kingdom of God. Moreover, it was the beginning of a great awakening, and the Holy Spirit moved on scores of hearts. And if the Holy Spirit should mightily appear this morning, there is an aged man who would drop his head and say: "O Lord! though it is the eleventh hour, have mercy on me." And there is a worldling who would say, "O God, give me a better portion than this world offers." There is a young man who would say, "Lord, I have been a wanderer, I would like to come home." Did I not hear a whisper going along from seat to seat? I think it was a prayer, a prayer, "God help me!" I look into your faces this morning, my beloved people, and I ask you the potent question which Paul asked of the Ephesians, "Have you received the Holy Ghost?" Pliny says that the first three days of a young lion's existence it seems to be dead, and the lioness is in seeming grief at the unconsciousness of her young. But on the third day the lion lifts up his voice, and at the roaring the young lions seem to wake out of death. Oh! that the lion of Judah's tribe would this day utter his arousing and resurrecting voice until all the dead should rise!

Again, I remark that God is ready to help you by giving you repentance. There is a great difference between seeing my sin and turning from it. There is a great difference between finding my lost condition and getting out of it. There is a great difference between finding myself on the wrong road and getting on the right road. I explode the delusion that conviction and conversion are the same thing. Thousands of people get convicted who never get converted, I will illustrate the difference. A man is picked up from a scene of riot and debauchery and thrust into a prison at night. In the morning he wakes up and sees the prison walls, and feels his own wretchedness and says: "Aching head, aching feet, aching heart; miserable, miserable." He sits down and mourns. That same night another man is picked up from a scene of riot and debauchery and thrust into prison, and in the morning he wakes up and sees the prison walls, and feels his own wretchedness, and says: "Aching head, aching feet, aching heart; miserable, miserable I can't endure it," and he raps on the wicket of the prison, and he calls the jailor. He says, "Come here, come here. There is a man on such and such a street who is my friend, and he knows the Governor. You just ask that friend to go to the Governor's office and get a pardon for me, and get it right away." The message is carried, the pardon is obtained, the prison doors are swung open the man comes forth. In the first case it was conviction; in the last case it was conversion. Now, where are we to get this repentance from? From God. "Prove it," you say. I will prove it. "Him hath God exalted to be a prince and a Saviour." What for? "To give repentance unto Israel." Oh! that this morning the Lord would help us all to repent. Rowland Hill says, "When I put down my pilgrim's staff at the gate of heaven, if I drop a tear it will be because I have to part forever with the sweet and pleasant companion, repentance." You hear about the sorrows of repentance. This morning I tell you of the joys of repentance.

Again: God is willing to help you by enabling you to exercise faith in Christ. Now, you say, we have come to a technicality, There is no technicality about it. You tell me that a man can believe as easily as turning his hand over. You make a misstatement. I often hear Christian men in prayer-meetings say: it is easy to believe, perfectly easy to believe." I deny it. The most exhausting undertaking to which I ever put the energies of my soul, the most exhausting undertaking to which you ever put the energies of your soul, was to believe in Christ. I go further and say it is so great an undertaking that no man can accomplish it of himself. "Prove it," you say again. I will prove it. "By grace are ye saved through faith, and not of yourself, It is a gift of God." "Well," you say, "if it is a gift of God, that discharges all responsibility. If God is the only one who can give, I have no responsibility in the matter," Ah! you make a mistake, my brother. A farmer plants the corn. He knows he cannot raise the corn, he cannot make the corn grow. He knows the sun and the shower do that. The farmer does his work; the sun and the shower do their work. God's work is to give faith. What is your work? To ask for it, to implore it, to agonize for it until you get it. If you could exercise that faith this morning, my brother, my sister, what a revolution in your feelings! At a religious meeting a man heard the gospel, and he mounted his horse and rode homeward during the night. While riding homeward Christ spake peace to my soul. The man believed, and the burden was gone, and he was so overjoyed he could not contain the joy. He knew if he rode on to his home there would be no one there to sympathize with this spiritual joy, and so he turned his horse about and he rode back through the darkness to the pastor's house. It was quite late. He called the pastor out, and seizing him by the hand, he said, "Oh! what a God we have." And if this morning you could only trust Him, that man's exclamation would not seem at all extravagant, and as you went out of this house to-day you would take some Christian by the hand, and with all the concentrated emotions of your soul you would cry, "Oh! what a God we have."

I remark again: God is willing to keep you by giving you the pardon and the peace of the gospel. God is not a king hard to get at. Earthly kings are sometimes almost unapproachable. You have to go with a certain style of dress, and you have got to come at a certain hour. Not observing those rules, the guard will roughly thrust you back from the castle-gate, and will say to the officers of the law, "Take that man into custody; he has no business here in that attire." History tells us of a man who, having offended a king, had to stand barefoot on the cold pavement day after day doing penance before the king would admit him. Our King is not of that sort. He throws open the palace door, and He says: "Come in; never mind the court dress; come in your rags, come in your poverty, come now. Come any hour of the day, come any hour of the night. You cannot come any time when I won't be glad to see you. Come in, come in." And while he is calling, all the bells of the tower begin to ring, and they chime just one thing, "Come, come, come come!" Oh, what a tremendous thing it is to have God put His hand on your shoulder and say, "As far as the East is from the West, so far I will move your transgression from you. I have loved you with an everlasting love. The mountains shall depart, and the hills be removed; but my kindness shall not depart from thee." Oh, that unhorses the last terror, that sheathes the last sword, that raptures the soul with a great joy, that turns the face of God, the full face of Christ on you. He can do it. He can save you. He hushed Genesaret, and he can quiet your perturbation. He gave sight to Bartemeus, and he can fill you with irradiation. He restored Malchus's ear, and he can make you hear the glad tidings of great joy. Do not look back, it is all sin—do not look down, it is all destruction: but look up and see written over the mangled brow, printed on the bleeding hand, punctured in the pierced side, and hear dropping from the blessed lips, "In me—in me is thy help." Oh! God, that is what we want, that is what we all want. It is help. Help for that formalist who is depending upon his ceremonies. Help for that moralist who is depending upon his good deeds. Help for that wanderer who is so discouraged. Help for the young. Help for the old. Help now—infinite, instant, and everlasting help. Hear it ringing from the throne. Hear it in the multitudinous chorus of the white-robed choristers. Hear it in the jarring open of the gate of heaven. "In me is thy help." Oh! yes, my friends, we want help. We want help while we live, and we want help when we die. There is no need of my fooling away the time this morning, or you fooling away time in flatteries. What we want is help. You have perplexities the world cannot sympathize with. You have annoyances the world cannot help you in. When some trouble comes you have sympathizers, but there are annoyances in your life that nobody understands. Now, you want God to help you just at that point. When the doctor told Walter Scott he must stop worrying, stop fretting, he said, "Ah, doctor, Molly might as well put the kettle over the fire and tell it not to boil, as for you to tell me not to fret, when I have so many things to fret about." Yes, you want God in those days where the world cannot give you sympathy. It is a rough path, it is a rugged path, it is a very narrow path many of you have to travel. I know, I know all about it. God only can guide you and strengthen you. I speak right to the mark now, in talking to you. When a man came in a stormy night, and during a great freshet, and rapped at a farmer's door, the farmer opened the door and said, "Why, what are you doing here to-night? How did you get across the brook?—the bridge is down." "Oh, no," said the man, "the bridge isn't down; I just came across the bridge." "But the bridge is down," said the farmer; "it fell this afternoon and was washed away in the freshet." The man said: "The bridge isn't down; I just rode over it." Then they went out with their lanterns, and just one timber remained. The man's horse had cautiously walked that timber. A few inches either way, and it would have been certain death; but God helped that man right across. And it is a narrow path some of you walk—a dangerous path. God only can help you, and he will help you. "In me is thy help." Then we will all soon want help, when we leave the world. Skepticism does very well, or seems to do very well, while we live and everything goes brightly; but it fails at the last, as it did with the Princess Alice, when she wrote to Strauss, the world-renowned skeptic, saying to Strauss: "I am about to leave the world, and I want you to send back all my letters, all my infidel letters; for I am dying now, and I am going to die in the faith of Christ, and I want to burn my letters." Ah! your skepticism may do a little while longer, but it will not do all the way through. "In me is thy help." I would rather have the experience of that good woman who a few Sabbaths ago sat at the head of the stairs in her house and said, "Come, come, my daughter." The daughter came, and the Christian mother, putting her hand on her, said—standing at the head of the stairs, "If this be death, I am satisfied," and fell senseless, and in a few moment was with God on high, I shall be satisfied when I awake in His likeness, and so will you. I would rather have this experience than all the experience of the brilliant skeptics of the world—I would rather have the experience of the young man who on his dying bed had such enrapturing views of the world to come that he wanted to go, and after the physician had said some encouraging words about convalescence, the mother took the doctor into the next room and said, "Doctor, don't discourage him by telling him that he is going to get well" Oh! yes, in that hour we will want help, we will want Christ. I pray God that the effect of this service may be eternal. We will depart in a few moments. Let those of us who are children of God be earnest. Let there be nothing in our conversation to indicate that religion is a trivial thing, that this Divine help is of no importance. A Christian father with his impenitent son passed out of the church, passed down the street, and the Christian father said to the impenitent son, "My son, that was a good sermon, that was a very good sermon, one of the best sermons I ever heard." And in a few moments he whistled and he laughed. Getting to their home, the son went to his room, and said, "The gospel is a lie; if father thought I was on my way to a judgment and I was unprepared for the great future, and I was in infinite peril, he couldn't have whistled and laughed all the way home, if he knew I wasn't a Christian. The gospel is a lie." God forbid that we should throw dishonor upon a religion which is a tremendous reality—tremendous. Let me say to this vast audience, in which there are many earnest souls who have not yet found God, but they are in earnest now—let me say, decide the matter quicky and now. Adjournment is perilous. More souls lost through adjournment and procrastination than in any other way.

When Sir Colin Campbell with his army retreated from Lucknow, there was one man left. Captain Waterman overslept himself in a place where they did not see him and did not arouse him. At two o'clock he wakened, and lo! the English army was gone, and he was surrounded by fifty thousand savages. He said his horror was indescribable, and he sped away as rapidly as he could until he came to the rear guard of the English army, and he was almost insane with excitement. God forbid that it should be said of any man in this house, while multtudes march on into the Kingdom of the Gospel, you have overslept in sin, waking up amid ten thousand spiritual enemies, the overlasting captive of your own somnolence. Awake, thou that sleepest, and rise from the dead.

> "Seize the kind promise while it waits,
> And march to Zion's heavenly gates.
> Believe, and take the promised rest;
> Obey, and be forever blest."

Cheerfulness.

Some wise man once remarked that he would rather be born possessed of a cheerful disposition, than heir to twenty thousand a year. He was right in his choice; for a cheerful disposition, like a Claude Lorraine glass, tinges all objects with sunlight; while a discontented disposition makes itself miserable everywhere, and in the greatest prosperity can sing,

> If it's fine to-day, it will rain to-morrow;
> So let us all be unhappy together.

Everyone, however, does not prize cheerfulness equally. Not alone in Shakespeare's days

> Young gentlemen would be as sad as night
> For very wantonness.

Sixty years ago Lord Byron set a fashion for misanthrophy, and young men who felt themselves geniuses turned down their shirt collars and pronounced life a weariness and delusion. Young people, as a rule, are the least cheerful members of the community. Young authors almost invariably write on the saddest themes; young poets (especially if their talents are of a mediocre order) fill their pages with deathbeds and partings, and broken hearts and blighted affections. Perhaps it is for the very reason that they have not known real sorrow and trouble that the young are so fond of dwelling on imaginary scenes of sadness. Coleridge showed a knowledge of human nature when he wrote:—

> Few sorrows has she of her own,
> My love, my joy, my Genevieve;
> She loves me best whene'er I sing
> The songs that made her grieve.

Probably, had Genevieve's life been less cloudless she would have preferred less melancholy ditties. We care less to hear of imaginary troubles when we have experienced real ones of our own. Cheerfulness is, after all, more a matter of temperament than circumstances. If we look around on our own acquaintance we shall probably find some of the most sunny natures where there seems least reason to expect to find them. Chronic invalids who are prisoners to their room or sofa, hard-worked mothers of families, husbands or brothers on whose shoulders rests a heavy weight of care for helpless relatives, may all exhibit a cheerful content that is far from being shared by their wealthy neighbor who appears to possess all fortune's gifts.—*London Queen.*

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

Hollaway's Ointment and Pills.—For bad legs, bad breasts, scorbutic and scrofulous sores this is a genuine specific. The grateful earnest gratitude of thousands who have experienced its unrivalled power over these complaints, and who have been raised from prostrate helplessness and a condition loathsome to themselves and others, renders it quite unnecessary to enlarge in this place upon its extraordinary virtues. The parts affected should be bathed in luke-warm water, and when the pores are thereby opened the Ointment should be well rubbed in, at least twice a day. It is always advisable to take Hollaway's Pills in these disorders, as this much assists the Ointment's action. The Pills check the fever, purify the blood and eject all morbid matter engendered by these diseases.

The best receipt for going through life in a commendable way is to feel that everybody, no matter how rich or how poor, needs all the kindness they can get from others in the world. Let us remember this great truth, and commence with those around us. Let the poor and needy, and those who do not take the daily or weekly newspaper, be kindly informed, if in sickness, whether it be from coughs, lung diseases, asthma or consumption, that by the use of N. H. Downs' Vegetable Balsamic Elixir they can be cured. Keep not the good news to ourselves, but spread the sunshine of hope around.

Mrs. Mary Harrington, Kouchibouguac, N. B., says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents. Large bottles $1.00.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestiible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

Leave Madoc	8.00 a. m.
Arrive in Belleville	10.00 a. m.
Leave Belleville	3:30 p. m.
Arrive in Madoc	5:30 p. m.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, SATURDAY, APRIL 2.

The Prince Edward Ferry.

During several years past, the subject of improving the means of communication between this city and the County of Prince Edward has received much and deserved attention from all who were interested. The granting of the right of way over Pinnacle Street to the Grand Junction Railway, and the consequent danger to horses and vehicles caused by the laying of the tracks and the passage of trains, have largely impaired the usefulness of the present ferry landing, and as the business of the line is certain to increase very largely, the necessity for the removal of the landing to some other place has become of pressing importance.

The idea of building a bridge across the bay was, amongst other projects in that connection, mooted some years ago, but the immense cost of such a structure has led to its abandonment as impracticable. The Council sought by the erection of a ferry dock at the foot of Dundas Street, some years since, to solve the difficulty, but the channel which was dredged not being sufficiently wide, the Dundas Street landing was only used for a short time for the purposes for which it was intended. Other sites have been suggested for the landing, namely Bushy Island, Mill Island, the foot of Wharf Street, and the town line road separating Belleville from Sidney, and each of these routes has its advocates.

The supporters of the Bushy Island scheme have lately been very active in the endeavor to achieve their object. They have had a plan prepared by Messrs. Evans & Bolger, showing the present and the proposed ferry routes, accompanying which is the following statement of the advantages of the proposed route over the old one:

Shortest from land to land—only one half as far.

Trips can be made in half the time.

Nearest from Ferry Point to Lower Bridge.

Route open earlier in spring and later in fall.

Better for merchants.

Better for hotels.

Better for housekeepers by keeping up communication with Prince Edward later in fall and earlier in spring, and markets consequently better supplied.

Avoidance of Trains.

And as a consequence of the above, increased trade.

The depths of water at the distances noted from the island are given as under:

At 1 chain	3 feet
" 2 chains	4 "
" 3 "	4 "
" 4 "	4 "
" 5 "	5 "
" 6 "	7 "

These depths are to the top of the gravel.

The distances, as marked on the plan, are as follows:—

Ferry Point to present Ferry Slip	1750 yds.
Present Slip to Lower Bridge	1040 "
Total	2790
Ferry Point to Bushy Island	872 yds.
Bushy Island to Marsh Street	847 "
Marsh Street to Lower Bridge	940 "
Total	2659 "

The opponents of the Bushy Island project condemn it because it would entail a very huge expenditure for the construction of a roadway across the marsh, for the erection of piers at the island, and for dredging a channel in order to enable the steamer to reach the landing. They contend that for a considerably less sum the channel on the eastern side of the island could be dredged and the Dundas Street dock utilized, thus landing passengers within 200 yards of the market. Also, that by securing a larger and more powerful steamer of light draft, adapted for ice breaking, the traffic could be satisfactorily worked and ferriage carried on longer at the setting in of winter and resumed earlier in the spring than by locating the ferry at Bushy Island.

The Ferry Committee and the Public Works Committee have in joint session recommended the use of the Dundas Street landing, and it is now for the Council to decide in the premises. It is to be hoped that no time will be wasted in coming to a conclusion, as the subject is one of too much importance to be trifled with or dillydallied about.

The Effect of Protection.

The London *Free Press* thus convincingly states some of the more apparent advantages of a protective tariff:—"Free traders who have not pondered the matter very deeply, find themselves often put out of countenance by the stern facts which stare them in the face. Free trade between America and England, if continuous for the last thirty years, would have left America a huge farm, dependent for all but bread and beef upon Europe, and jug-handled trade between the United States and Canada if continued for five years longer, would have reduced this country to very much less than a farm for the supply of bread and beef. There is much more in the question than "buying in the cheapest and selling in the dearest markets." There is a self-preservation, which can often be translated self-independence, in this yet imperfect world."

"Instead of allowing Canada to remain as a slaughter-market to be raided upon by Americans every time they desired to work off old stock, or to crush a rising industry, the Tilley Tariff has made it so attractive for the American manufacturers that many of them are coming here to locate, in order to carry on their business. *It hardly seems necessary to explain that one of the objects of the N. P. was to induce any Americans who wished to continue to furnish the Canadian market with their wares, to remove to Canadian soil, employ Canadian labor, and pay Canadian taxation.* That was an object, however, and it is bearing fruit in different parts of the country."

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Behind the Times.

Our local contemporary publishes a long string of figures, being the "returns sent "to the U. S. Treasury Department by "Customs Collectors at border ports, re- "presenting the number of persons enter- "ing the United States from Canada dur- "ing each of the ten years mentioned," namely from 1871 to 1880 inclusive, and on these so-called returns founds an article claiming that during Grit rule the "exodus" was smaller than before or since, during the period mentioned. Has the organ been asleep, that it does not know that Mr. Lowe, Secretary to the Department of Agriculture, visited the United States a few months ago and made a thorough investigation of the returns, proving them to be purely fictitious! The *Globe* endorsed Mr. Lowe's statement, which it considered amply borne out by the reliable evidence which he adduced in its support, and a few days ago the same journal declared, with regard to the figures for the eight months ending February 28th, that "after the report of Mr. Lowe it is scarcely possible to accept these figures regarding Canadian immigration." Thus our contemporary is behind the times. It is poor policy and an unprofitable task, to say nothing of the unpatriotic nature of the work, to endeavor to found an argument against the N. P. by the use of alleged statistics which have been proved to be false to the satisfaction of the chief, ablest and most bitter journalistic opponent of the Government. But as the truth does not afford material for attack, the untruthful and exploded statements of the servants of a foreign country, whose interest it is to misrepresent Canada, have to be resorted to.

Torture in Russia.

A New York journal states that, in order to force them to confess, the assassins of the Czar were put to merciless torture by electricity, in the presence of Gen. Melikoff. The torture inflicted by electricity is of two kinds—by contraction of the muscles at rapidly recurring intervals and by burning with sparks. The tortures of old days, when not done by fire or compression, were the straining and tearing asunder of the muscles. Of this kind were the rack, scavenger's daughter, and the cages of Louis XIV., in which a man could not stand up or lie down. The electric shock exactly reverses these conditions. It produces an enormously rapid contraction in the body of the muscles at very short intervals. The degree of pain produced is about the same. The force of the electricity has to be nicely graded, as a too powerful shock would numb or kill a man. The other method is by condensing a number of intermittent sparks on the flesh. This burns the skin, and at the same time produces contractions of the muscles. If put to the side of the jaw it would make every tooth ache.

The idea of torturing criminals by electricity is a British invention, and was suggested, about five years ago, by an English mechanical journal, in commenting upon the execution of criminals by electric shocks instead of by hanging. The English writer wanted to do away with the cat-o'-nine-tails, which is administered in England to garroters and other criminals of certain classes, and use the electric battery, as he somewhat grimly expressed it, so as to produce absolutely indescribable torture (unaccompanied by wounds or even bruises), thrilling through every fibre of such miscreants. There was an American inventor who had a design for inflicting this species of punishment. He fitted brackets of iron on the arms and thighs of the criminals, and placed in them wet sponges. When connected with a current of electricity the shock would by this system pass through the legs and shoulders, and avoid the vital parts of the body. No man could bear such torture. Any man would confess under it: would confess anything to escape the agony. The question would be what dependence could be placed on it.

Asking the Clergy to Assist.

The Census Commissioner of Hamilton is evidently a believer in pulpit advertising, but we must confess it looks a little "cheeky" to make such a request of the clergymen as is contained in the following letter, and we fancy some of the Hamilton ministers will tell him so. There is no question that a large amount of ignorance exists among the masses as to the object of the Census, and when the enumerators are engaged in their work they will no doubt have a great deal of difficulty in obtaining the information desired. But we would earnestly advise the people when called upon to answer all the questions cheerfully, promptly and truthfully, and thus save themselves and the enumerators a great deal of unnecessary trouble. All those who in any way obstruct the Census Officers in the discharge of their duty by refusing to answer, are requested to read the following clause in the Census Act: "Every "person who without lawful cause, refuses "or neglects to answer, or who wilfully "answers falsely, any question requisite "for obtaining any information sought by "census or pertinent thereto, which shall "have been asked of him by any enumer- "ator or other person employed in the ex- "ecution of this act, shall for every such "refusal or neglect, or willfully false "answer, incur a penalty of not less than "five nor more than twenty dollars."

It is, however, to be hoped that it will not be necessary to have recourse to the enforcement of this provision of the Act.

The following is a copy of the letter sent by the Commissioner of Hamilton to the different clergymen asking their influence in assisting to make the census as complete as possible:

REV. AND DEAR SIR,—You are no doubt aware that according to the terms of the Census Act of 1879, the enumerators appointed for the purpose will begin their work on Monday next, 4th April, 1881. In view of this, may I request you kindly to call the attention of your people to this matter from the pulpit on Sunday first, and urging them to assist in this great national work by giving to the enumerators full and accurate answers to all the questions put by them to householders and others. The enumerators are sworn to secrecy, and therefore no use will be made of the information given which will be in any sense detrimental to the interests of those giving it. Hoping that you will thus aid in getting a census from our city which will be complete and therefore valuable by making such an announcement as you deem fit for the purpose, —I am yours,

JOSEPH KENT, Commissioner.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

'THEY ALL DO IT.'—Every body uses "Teaberry," the now toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

Editorial Notes.

INTERNATIONAL TRADE.

The Peterborough *Review* says: We gladly extract from a contemporary the following very interesting and satisfactory pieces of information:—

"One Ontario firm paid $25,000 in freight charges last year on importations of agricultural implements from Ontario to Manitoba, and there are many other firms doing a large trade in the same business. Inter-provincial trade is assuming enormous magnitude."

This is not, as might be imagined, from the Toronto *Mail*, the Hamilton *Spectator*, the Belleville INTELLIGENCER, the London *Free Press*, the Ottawa *Citizen*, the Montreal *Gazette*, or any other ardent supporter of the National Policy, but it appears in the columns of our local contemporary, the Peterborough *Examiner*, which certainly cannot be suspected of straining facts to the advantage of our present system, and therefore is a most satisfactory witness.

It is especially gratifying to those who fought hard to introduce a tariff which would foster our Canadian industries, to find that the relentless logic of facts compels even the staunchest Free Traders or revenue tariff men to admit the great benefits that have resulted from our present fiscal policy. Every true Canadian indeed must rejoice that by wise legislation and administration our industries are being developed, and the general prosperity of the whole country is being augmented.

POLITICS AND RELIGION.

The Montreal *Evening Post* says:—"Is there any use in asking the politicians on both sides to cease sympathising with the Irish Catholics? We fear not. And yet their sympathy is political death to them. If the politicians would only refrain from ringing the changes on the words "Irish Catholics" we would be satisfied that the electors generally would do them justice and accept them on their merits when—like their fellow-citizens—they present themselves for election. When a Methodist, an Anglican, a Presbyterian, or a Freethinker is nominated for Parliament the world is not made acquainted with his religious tenets; the world doesn't care what they are, but when Mr. Ryan is nominated for West Toronto and Mr. Kennedy for East Northumberland, the news is immediately flashed over the wires that they are Irish Catholics. Why should it make a difference at all? Why should it be necessary to inform the world that the Conservative candidate for East Northumberland is an Irish Catholic? We remarked in Saturday's issue of this paper that if the people are not prejudiced they will vote for the man on his merits, and that is all the Irish Catholic requires. In future when we see a journal insinuating that such a candidate is an Irish Catholic we shall know what it means." We must refer the *Post* for an answer to its queries to the *Irish Canadian*, which upholds all that its Montreal *confrere* condemns. Evidently the *Post* has a very large bone to pick with its brother.

Customs Returns.

The Collector of Customs furnishes the following return of goods entered for consumption at the port of Belleville during the months of March 1880 and 1881. The increase in every department shows a healthy state of trade, the value of imports and the amount of duty collected being nearly twice as large as in March of last year, and the value of exports more than doubled:—

IMPORTS.

	Value.		Duty.
1881	$42,938		$8,899 41
1880	22,639		5,160 99
Increase	$20,299	Increase	$3,738 42

EXPORTS.

	Value.
1881	$16,772
1880	7,950
Increase	$8,822

To the Editor of the Intelligencer.

SIR,—I have just read a communication signed "A Voter," published in your Grit contemporary of Belleville. It is not my intention to comment upon the reference to "our friend Mac," further than to say the writer knew when penning the sentences that he was writing what was untrue. My purpose is to call attention to the following paragraph, which for the credit of the Returning Officer referred to let me hope is as false as many other portions of the letter:

"A good story is being told (and for truth) of our friend Cochrane, who has been going the rounds arm and arm with Mr. Kennedy. Bright and early Mr. C. was on hand, and as soon as the polls were open he was the first man to record his vote. The returning officer being somewhat anxious to know how Mr. C. would vote, examined very closely the ballots, and to his surprise found the first one dropped in to be a *blank*, he not voting at all. Our Catholic friends are feeling very indignant about the matter, and so they may."

There could be but one object in penning this paragraph, and that was to damage Mr. Cochrane, whose influence and position the Grits are beginning to fear. What does the statement imply? Simply that the returning officer forgot the oath he had taken and divulged the secrets of the ballot-box, that is if he knew them. The whole election law is based upon the principle of full and unreserved secrecy, so much so that no provision is made even for a scrutiny. The returning officer is sworn to conduct the election according to law, and every agent is sworn not to divulge how any man voted. Now, if this statement be true, in what position does "A Voter" place the returning officer who illegally and contrary to his oath of office took steps to ascertain how Mr. Cochrane's ballot was marked and then blazoned it forth to the world? "A Voter," in his endeavor to injure Mr Cochrane, has overshot the mark by accusing an official of a flagrant violation of duty, which if true subjects him to severe penalties.

Let me, however, express the belief that there is not one word of truth in the whole story—that it is simply a fiction of the Grit writer to destroy a rising political opponent in East Northumberland. I am inclined to think you will hear more of this before the matter ends. If not, the returning officer has less respect for himself and his reputation than I think he has.

Let me ask you, Mr. Editor, to reflect a moment, and then tell me, admitting the returning officer to be the bad man he is represented to be by "A Voter," how it could be ascertained by that official, when the ballots were counted at night, which was the "first" one put into the ballot box in the morning? It must be remembered that polling goes on all day, and at night the ballot box is opened, and the ballots taken out indiscriminately, and counted. How in the name of common sense could this official know which was put into the box first? There is but one answer to the question, and that is that the returning officer *marked* the ballot paper before it was given to the voter for a purpose, and if he did so, violated his duty and oath of office, and deserves all the punishment the law imposes for such offences.

I would advise Mr. Cochrane to probe this charge to the very core, and make the guilty party suffer, or retract his slander.

Yours, ARGUS.

Trenton, April 1st, 1881.

Marine Notes.

The schrs. *Baltic* and *Jane McLeod* get 40c on coal from Oswego to Toronto—not 25c as previously reported.

The schr. *Hartford*, Capt. McCarty, is at Oswego ready to bend sail and go to Toronto for her three cargoes of lumber as soon as she can get into Toronto harbor.

Capt. H. J. Dagget will command the tug *Sumner* this season. She will probably engage in towing lumber barges between Bay City and Buffalo.

—The Montreal *Witness* says the Credit Foncier Franco-Canadien having obtained charter from the New Brunswick, Ontario and Quebec Legislatures is now in full operation. The Montreal branch has already placed over $200,000, principally in the hands of the farmers of this Province.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

THE CANADA CONSOLIDATED

Walter Shanly's Report on their Marmora Gold Mines.

The following is the report of Mr. Walter Shanly, the eminent Civil Engineer, on the Canada Consolidated Gold Mining Company's property in Marmora:—

MONTREAL, January 17, 1881.

Richard P. Rothwell, Esq., Mining Engineer, New York:

DEAR SIR: I have pleasure in conveying to you my impressions of the Marmora Gold Mines, forming the property of the Canada Consolidated Gold Mining Company, as gathered from my visit to, and examination of, the ground and workings last month.

The situation of the property in affording every possible facility for cheap working is probably not to be equalled by that of any important gold mine on this continent.

Most of the great mines are to be looked for in regions difficult of access, where labor has to be imported and highly paid for; where even the simplest necessaries of life have to be brought from afar, and at great expense; where fuel is commonly a scarce and precious article, and where even water has to be paid for by the inch.

The Marmora mines lie in the midst of a highly productive wheat growing and cattle-raising country, where provisions and all the other requisites of "living" are as abundant as, and cheaper than, in England or New York. The county of Hastings, of which the Township of Marmora is a subdivision, is intersected by macadamized highways and railways. One of the former extends from the city of Belleville, on the Bay of Qaint to the mine, and there is a railway station within ten miles.

In respect of geographical position, measured by time, relatively to the great business centers of Canada and the adjoining States, Marmora, lying 33 miles back from Belleville, is distant from—

Toronto, about 10 hours;

Montreal, about 14 hours;

New York or Boston, 30 hours.

Fuel-wood of the choicest description can be bought at the mine for $1 25 per cord of 128 cubic feet, while the River Moira, passing through the property, affords abundant supsupply of water for all ordinary mining uses in all seasons, and (with 30 feet fall) ample power for driving machinery for nine months in the year.

The great Homestake Company (Gold), in the "Black Hills" country, publishes the following statement for the two years and nine months ending with August, 1880:

Total tons of ore crushed, 278,283

Net bullion extracted, $1 888,289.98.

Total working expenses, $959,825.98,

The cost of plant, stamp-mills, etc., was $455 210.10.

And dividends paid in same two years and nine months, $600,000.

This great result was obtained from ore yielding, net, only about $6.80 per ton.

The working expenses per ton of rock, averaged $3.46.

Comparing prices for labor and "supplies" of all kinds at the Homestake mine with what we know will be ruling rates in Marmora, and allowing for any probable increase over present rates, the relative cost of extracting the bullion in the two localities, supposing the ores to be identical in character, would be as follows:

	Homestake.	Marmora.
Labor of mining and milling per ton	$1 40	$0 70
Shafts and dead-work	36	20
Machine and blacksmith shops and all else	71	47
Fuel	28	10
Water	11	..
All other "supplies	60	50
Whole cost, per ton, of rock	$3 46	$1 97

As, however, the Marmora ore requires to be roasted and chlorinated, the cost will be increased; although, since only the concentrates, or say one ton in three, will be roasted and only one ton in four will be chlorinated, the total cost of mining, milling, etc., reduced to the ton of ore as extracted from the mine, will still not exceed from $3 to $3 50 per ton, or not more than at the famous Homestake, whose ore yields only $6 80 per ton, and where fuel is $4 75 per cord.

And this comparison, so widely if favor of Marmora "facilities," does not take into account the large saving to be effected there by the use of water-power for the greater part of the year as against steam-power, with wood at $1 75 per cord all the year round at the Homestake mine.

The Homestake ore yields, net, as stated above, $6 80-100 per ton.

The average of 108 assays, from 108 five-ton samples of Marmora rock, shows $13.37.

These tests, chiefly from your own sampling and assays, must be taken as having been very *safely* made; for I find reports from nine other well-known mineralogists giving far higher results. The average of all the tests made seems to leave no room to doubt that the per ton value of the ore is fully $18 65.

As an offset to the high prices of labor and supplies in the Black Hills region, the Homestake ore is admitted to be "soft and friable, breaking into small pieces after being shattered by blasting, and is readily crushed in the mill. It is in the highest degree a free-milling ore and is readily amalgamated, the gold it contains being mostly coarse, and easily saved in the batteries."

These are large advantages, and did the Marmora rock possess them in equal degree, the value of the property would be almost incalculable. None of the veins is yet exposed however, mine as easily or will "mill" as freely as the Homestake ores. On the contrary, they are roasting ores, and the cost of treatment is consequently much increased.

The counterbalancing advantages of Marmora are to be sought for in the greater richness of the ore, almost three to one, and in the immensely greater working facilities in respect of labor, materials, and water-power, and I confidently predict that the "counterbalancing" will prove so entire and complete as to place the Marmora mines in the front rank of paying gold mines.

But a small part, comparatively, of the Canada Consolidated Gold Mining Company's property has as yet been "proved," but your estimate of the value of the "ore in sight" appears to me to be not overstated at $575,000; and with proper application of capital and skill, the enterprise cannot fail of proving a notable succes.

W. SHANLY.

MINING NEWS.

(*From the Madoc Review.*)

Mr. Charlton, an English assayer of ores, arrived on Saturday from New York at the Consolidated Gold Mining Campany's works. He has been employed by the company as resident assayer at the mines.

Work at the Seymour mine is progressing as usual, although no shipments have been made for some weeks past. A new shaft is being opened, and the hoisting apparatus changed from the position it has occupied for some months past. The use of compressed air for working the drills, instead of steam, has been found a great improvement in this mine. A steam pump is in constant operation to keep the mine free from water. Work goes on day and night.

We hear that active preparations are being made by the proprietors of the Gladstone gold mine to resume extensive operations here this spring. New machinery is being put in, and the prospects are spoken of as exceedingly encouraging.

A number of men are constantly engaged at the slate quarry, on Mr Aylsworth's place. A large excavation has been made here, and the men are now clearing the bottom of loose slate preparatory to blasting. A large quantity of cut slate is now on hand, some of which is a very fair sample.

A valuable discovery of iron ore was lately made on lot 6, in the 7th concession of Madoc, owned by Mr. Jno. R. Ketcheson. Mr. Pusey secured the claim, and has had a small force engaged in opening it up for some time. The ore is said to be the purest and best of any yet discovered in this district. About two tons have been taken out, and there is every indication of a large deposit. We understand work will be proceeded with on a much larger scale shortly.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist——— ——— and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

A country doctor writes: "I am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

After trying many medicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

"Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there."

Dr. C. Clay

SPRING OPENING.

WEDNESDAY, THE 6TH OF APRIL.

ON Wednesday, the 6th APRIL, we will be prepared to show the latest styles in London and Paris pattern Millinery and Mantles, with a complete stock of Hats, Bonnets, Ostrich Feathers, French Flowers, Ornaments, &c.

Our customers may expect really the finest and most extensive display we have yet made in this department. All being of our own importing, the styles will not only be the latest out, but the prices very moderate.

GEO. RITCHIE & CO.

P. S.—The untrimmed Hats and Bonnets, also Feathers, Flowers and Trimmings, are now opened out and ready for inspection at any time.

G. R. & CO.

News Condensed.

—Sir Leonard and Lady Tilley are at the Fifth Avenue hotel, New York.

—Destructive gales and floods have visited the southern provinces of Spain.

—During 1880, there was collected $21,941 in the Toronto Police Court for fines.

—The Grand Duke Constantine, St. Petersburg, is strongly suspected of Nihilism.

—The Governor-General has not yet arranged a programme for his summer tour.

—The ice on Burlington Bay is as solid as ever. That on Toronto Bay is porous but firm.

—There are 39 news and periodicals published in Toronto, of which 16 are religious.

—On the 31st inst., L. Kennedy of Hibbert, near London, was killed by a tree falling on him.

—The water in the St. Lawrence is so low that the current in the rapids is doubled in speed.

—Messrs. J. & P. Lyons are the lowest tenderers for the Parliamentary buildings at Winnipeg.

—The 16th Battalion of volunteers will probably go into camp at Kingston during the summer.

—More loss of life and destruction of property through floods and ice gorges are reported from Dakota.

—It is said the Grand Trunk Railway Co. intend building a new passenger station facing Chaboilez Square Montreal.

—D. Mansell, of Farmersville, has been appointed Treasurer of Leeds and Grenville, in place of F. Schofield, resigned.

—The French Chamber of Deputies has voted six million francs to indemnify the sufferers by the *coup d etat* in 1851.

—Great Britain's revenue receipts for the were £84,041,228, a net increase over those of the previous year of £2,776,233.

—The original "Black Hawk," sire of many of the fastest Canadian trotters, died in Montreal on the 1st inst., at the age of 36.

—A line of steamers is to be established designed to convey passengers and mails from London to New York within seven days.

—The British House of Commons have declared Mr. Bradlaugh's seat vacant, and have ordered the issue of a writ for a new election.

—The Conservative leaders in the House of Lords yesterday made a vigorous attack upon Mr. Gladstone's policy in relation to the Transvaal.

—An order for ten screw steamers for the Cochin China trade has been received at Greenock from French firms desiring to profit by the bounties law.

—Premier Norquay was given a banquet at Winnipeg on the 1st inst., on his return from Ottawa, which was described as the most successful ever held in Winnipeg.

—From South Africa comes the news that the Middleburg Boers ignore Joubert and the terms of peace agreed upon with England, and that there is a prospect of the war recommencing.

—Mr. C. S. Rodier, a French Canadian local manufacturer, has presented the munificent donation of $60,000 to the Sisters of the Grey Nunnery, Montreal, where one of his daughters entered a few days ago as a novice.

—It is said that the English Cabinet has approved of the Ambassadors' protocol endorsing the Porte's offer. The war feeling in Greece is increasing all the time, and only very great pressure from the Powers can avert a conflict.

—There has been more trouble at Oka, the Seminary people having pulled down a council room used by the Indians. The Seminary claims to have purchased the same from two Indians, and the tribe say these had no power to sell it.

—Greydon and McEachren, of the Federal Bank, London, who absconded with a large amount of funds, took the keys of the vault with them, and a man had to be brought from Toronto to open it. It is not known how much they got away with.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in Warner's Blood Purifier are combined the three qualities of Simplicity, Safety and Success. A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Mark—Warner's Blood Purifier.

Sold at all druggists'.

Price 50 cents per bottle. d&wtf

RECEPTION!

—OF THE—

RIGHT REV. DR. CLEARY,

BISHOP OF KINGSTON.

P. P. LYNCH, Secretary.

DR. MURPHY, Chairman.

NOTICE.

To Whom it may Concern.

WE, the undersigned, Health Officers of the City of Belleville, under an Act respecting the Public Health, R. S. O., Cap 190, do hereby give NOTICE that all persons resident within the City of Belleville are hereby called on to cleanse their premises and to remove what is so found there, on or before the

First Day of May, 1881.

The undersigned have secured grounds for the deposit of all night soil, and other accumulations injurious to health.

The person appointed by the Board of Health as Scavenger is William Hale, who, with the undersigned will give all information.

Any person who wilfully disobeys or resists any lawful order of the Health Officers, or wilfully obstructs any person acting under the authority or employed in the execution of this Act, will be dealt with as the law directs.

JAMES SMITH.
JAMES F. CURLETT.
JAMES ROSS.

Belleville, April 2, 1881. 322d3tawtd

Dr. McCULLOCH,

THE celebrated European and American Physician, Itinerant of the Hospitals of the chief cities of England, Ireland, Scotland, France, Germany, and the United States of America and the Dominion of Canada, will visit Belleville professionally, and may be consulted at the

QUEEN'S HOTEL,

FROM

Wednesday, April 6, till Tuesday, April 12th, 1881,

To 10 o'clock a. m., by all who are suffering from Chronic Lingering Diseases, such as

COSTELLO'S SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris London and New York Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

TESTIMONIALS TO MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.

Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

PREPARED ONLY BY W. H. MITCHELL, HAIR DRESSER

BELLEVILLE, ONT.,

And Sold by all Druggists.

FOSTER & REID,

SPRING OPENING!

WEDNESDAY, APRIL 6TH, 1881.

WE HAVE pleasure to announce that we will exhibit on the above date New York, London, and Paris Pattern Hats and Bonnets, together with all leading novelties in Flowers, Feathers, Ribbons, Laces, &c.

Our Stock of Millinery Goods this season is more than usually choice and well selected, and we have spared no pains to make it the most successful opening we have yet held.

All Departments replete with a large assortment of novelties in too great variety for enumeration.

FOSTER & REID,

IMPORTERS OF DRY GOODS.

AT THE SYNDICATE STORE

They sell you all classes of goods at wholesale prices and cut any length required

LADIES:—By purchasing your goods from us we guarantee that on a purchase of $10.00, we will give you $2,00 worth more than any other store in Belleville, smaller purchases in proportion.

HOW IS THIS?

Because we buy for cash and sell for cash, all our goods are bought direct from the manufacturers, by this means you save the profit of the middlemen, we mean the big wholesale houses.

Call and examine our stock of Dry Goods Clothing, Boots and Shoes, Groceries, Crockery and Glassware, &c., &c.

W. & D. PATERSON,
Harrison Block.

1881. SPRING OPENING 1881.

BLACK CASHMERES.

SPECIAL VALUE offered in these Goods.

We have a Black Cashmere over one and a quarter yards wide **at 65 cents** per yard, that cannot be equalled in the city, and another 38 inches wide **at 52½ cents,** which is equal to what is usually sold at 75c.

We have also **Union Cashmeres** and BLACK PERSIAN CORDS very cheap.

We have just received a large assortment of

Spring Dress Materials,

in the latest styles, to which we invite the attention of the Ladies; and we have still 2 pieces of our celebrated **$1.29 Black Silk,** the best value in the market. It cannot be equalled under $1.75 to $2.00 per yard.

GLASGOW WAREHOUSE.

N. B.—We trust our customers will remember that our terms are *cash*, and *will not ask us for credit*. By strictly adhering to our terms, we can sell goods much cheaper than if we did a credit business.

Daily Intelligencer.

BELLEVILLE, SATURDAY, APRIL 2.

5 O'CLOCK EDITION.

City and Vicinity.

MR. E. O. BICKFORD is in town.

THE City Council meets on Monday night.

ADVERTISING is a "blister which draws trade."

THE County Court term opens on Tuesday next.

THE channel is now opening in the vicinity of the lighthouse.

BORED OF WORKS.—The gentlemen who stand around the street corners.

THE meeting of the Fire Brigade which was to have been held last night did not take place.

TWENTY-SIX petitions were read, considered, and acted on last night at the Finance Committee.

MR. H. CORBY's shipments of flour and spirits within the past week amounted to eight carloads.

THE Superintendent of the P.E. Railway is advertising for 75,000 new ties, to be delivered at Trenton.

"When the spring time comes quoth Annie," we will let you know by mail. It has not arrived yet.

IT is reported that a silver mine has been discovered on the farm of Mr. Garner Chesebro in Rawdon.

THE Prince Edward County Council will meet on the 11th or 12th inst., for the purpose of electing a Warden.

MR. W. H. MARSH left this morning for Winnipeg, where he will in future reside. His many friends here wish him success.

MR. J. B. WATSON, "the Canadian orator," was lecturing in Ottawa this week with greater success than he did in Belleville.

IF all the material for the lighthouse is promptly furnished by the Government it will probably be completed in another month.

MR. COSTELLO will have his spring opening on Wednesday next, when a display of the season's novelties in millinery, &c., will be made.

FOUR hundred dollars towards the purchase of the old curling-rink property, was subscribed at the meeting of the Curling Club last night.

SEVERAL members of the Shelby, Pullman & Hamilton "Mastodon Show," which starts from Belleville in a few weeks, have arrived in town.

BRIDGET BEATTY fell into the hands of the police last night again—drunk as usual. She and one tramp were the occupants of the cells last night.

THE steamer *City of Chester*, of which Dr. Cleary, the new Roman Catholic Bishop, of Kingston, was a passenger, has arrived in New York.

WE would remark for the benefit of the local itemizer of the *Globe*, that a bootblack has recently started in business here, and that he is from Toronto.

IF you think a story lacks plausibility, don't, please don't, say that "it is too thin." Merely shrug your shoulders and say that it has too many characteristics of the Bernhardt.

THE important question of a water supply for the city will be discussed at the Council meeting on Monday evening. The location of the ferry landing will also be finally determined.

THERE was a very large market this morning. The weather being so fine, a great number of farmers came into town, and the amount of farm produce was consequently great.

HAD there been a meeting of the Harbor Committee last night, it was the intention of the Chairman to have its members discuss the advisability of purchasing a dredge for the corporation.

VENNOR's stock is beginning to rise. He predicted sharp frosts in the beginning of April, with a snowfall about the 4th or 5th. The frosts have come; let us see whether the snow will follow.

APRIL proverbs: A cold April the barn will fill. An April flood carries away the frog and his brood. April showers make May flowers. When April blows his horn it's good for hay and corn.

BRANTFORD is going through the same experience which Belleville did last summer. On Thursday seven disreputable women were fined in the Police Court of that town and another batch yesterday.

THE Woman's Christian Association intend holding another of their popular entertainments in aid of their building fund in the Workingman's Temperance Hall on Thursday evening, April 7th. The entertainment will consist of readings, recitations and music. No tickets issued.

A GREAT deal of excitement was caused in Moon's Hotel, Madoc, late last night, by the bursting of a lamp. The lodgers thought the hotel was on fire, the alarm having been given, and the halls were soon crowded with ladies and gentlemen *en dishabille.* The excitement was quickly allayed and no harm was done.

IT is understood that Mr. Michael Lally will be appointed License Inspector for East Hastings, in succession to Mr. L. A. Appleby, who will next week enter on the discharge of his duties as gaoler. Mr. Lally will make a good officer. His appointment will create a vacancy in the County Council, he being Second Deputy Reeve of Tyendinaga.

WE desire to call attention to the advertisement in another column of "Warner's Blood Purifier." As this is the season when every one requires a thorough cleansing of the impurities which have settled in the system during the winter, we advise all to try this efficient and inexpensive remedy, feeling sure that those who do so will experience a great relief from that feeling of lassitude and dullness which effects us at this time of the year. Although this is a new medicine, yet it has given such thorough satisfaction in the places where it has been introduced that we feel secure in asking our readers to test its merits for themselves.

R. R. EXTENSION.—The Trenton *Advocate* says that the Messrs. McMullen are fully determined to build the Trent Valley Railway as far north as Stirling this summer, and the work will be begun as soon as the frost is out of the ground.

ST. ANDREW'S CHURCH.—The Rev. O. R. Lambly, M. A., will occupy the pulpit of St. Andrew's Church to-morrow forenoon. The pastor, Rev. M. W. McLean, we are glad to learn, is slowly improving, and will likely be able to resume his duties next week.

WEATHER PROBABILITIES. — Toronto, April 2.—Lakes, moderate to fresh winds shifting towards the south by morning, fine cool weather followed by milder weather to-morrow.

BIG EGGS.—The time for big eggs has arrived, and Mr. John Carr, 2nd con. of Sidney, comes to the front with an egg from a hen of the Black Spanish variety, measuring 9½ inches lengthwise and 7½ inches around.

PARLOR CONCERT.—Our readers are reminded of the concert to take place at Mr. Dunnet's residence on Tuesday evening next. In addition to the concert there will be shown some unique Parisian curiosities. Proceeds in aid of Christ Church organ fund.

WHITE STAR LINE.—The advertisement of this well-known steamship line, whose vessels ply between New York, Queenstown and Liverpool, appears in another column. The steamships of this line are first class in every respect, and the passage rates are low. Mr. Thos. Donnelly is the agent for Belleville and vicinity.

PERSONAL.—Dr. Williams, of Detroit, will be in personal attendance at his Branch Office of the Detroit Lung and Throat Institute, at the Dafoe House Belleville, with Dr. Nash his partner, on Thursday and Friday April 7th and 8th. Therefore all who so desire, had better call at the office on these days. Consultation free.

SOCIAL.—The young men of Mr. L. W. Yeomans' Sabbath School class intend giving a Social at the house of Mr. Thos. Donnelly, on Tuesday evening next, to raise funds for the furnishing of their new rooms in Bridge Street Sunday School. The programme is one of the best yet got up for this series of socials.

INLAND REVENUE.—The following are the returns of the inland revenue collected in the Belleville district during the month ending March 31st, as compared with the returns during the same period last year:—Spirits, $3560 55; tobacco, $1,229; malt, $228.60; total, $4,958,15. The returns for March, 1880, having been $5,316,48, there is consequently a decrease of $358,33 this year.

OYSTER SUPPER.—The Irish Catholic Benevolent Union gave an oyster supper to one of its prominent members, Mr. Frank Flynn, at Fitzpatrick's hotel yesterday evening, on the occasion of his going to Colorado. A very pleasant evening was spent, and the kindest wishes were expressed for the welfare and future prosperity of their brother. Mr. Flynn leaves for his western home early in the week.

MATRICULANTS' EXHIBITION.—The candidates for matriculation in June will give the annual entertainment in the College Chapel on Wednesday, the 6th. Original essays will be delivered. Three lady candidates participate in the exercises this year. The programme is the best that has ever been presented to the public. Vocal and instrumental music will be interspersed under the direction of Prof. Stanistreet.

IMPORTANT TO THE SICK.—Doctor McCullough, the Celebrated European and American Physician, so famed for his unrivalled success in the treatment and cure of all chronic and lingering diseases, will visit Belleville professionally, and may be consulted at the Queen's Hotel from Monday April 6th to Tuesday April 12th, 1881. Therefore all so afflicted would do well to consult the doctor at once and be restored to health, and happiness. N. B.—See posted bills, also hand bills.

BISHOP CLEARY'S RECEPTION. — The Right Reverend Dr. Cleary, the new Bishop of Kingston, will arrive next Thursday from New York. He will arrive at Belleville by the regular noon train from the west, and the special car in which he will travel will be detached from the express train and attached to a special train which is to be run from here to Kingston. His Lordship will meet with a magnificent reception in Kingston. As the special rates for the round trip are remarkably low (see advt.), it is likely that a great number of our citizens will go down to Kingston on the special train with which His Lordship will travel.

CURLING CLUB.—A meeting of this Club was held last night at Hambly's, at which the Secretary reported that there will be a balance on hand after settling up all the liabilities. Messrs. John Jellett, D. Pitceathly, W. H. Ponton, Jas. Gordon, D. B. Robertson and Angus McFee were appointed a Committee for the following purposes: To incorporate the Club under the name of "The Belleville Curling Club;" to purchase the property on Pinnacle Street now occupied by the Club; to obtain stock subscriptions for that purpose; and to procure plans for a new rink to be erected on the site of the present one. To carry out these designs about $1,300 will be required, and it is thought that the necessary amount can be raised, as the investment is likely to be a paying one.

ONTARIO VETERINARY COLLEGE.—Amongst the senior students in attendance at this institution during the college session of 1880 1 were Messrs. John Butler, Stirling, and Albert Detlor, Belleville. Lyman Vandervoort, Belleville, was one of the junior students. Mr. Boulter was second in Pathology; carried off the silver medal in Anatomy; honors in Entozoa; 1st prize in Physiology; 1st in Materia Medica; 1st in Microscopy; 1st prize (books to the value of $20 presented by the Commissioner of Agriculture) in Breeding and Management of Live Stock, and also the gold medal presented by the Ontario Veterinary Medical Association for the best general examination. Amongst the juniors Mr. Vandervoort received honors in Pathology and 3rd prize in Physiology.

POLICE COURT.—The notorious Bridget Beatty was before the Police Magistrate again this morning, on a double charge of drunkenness and vagrancy. She was entertaining a large crowd of idle people at the corner of Bridge and Pinnacle streets at noon yesterday, with snatches from her choicest songs and a number of the most startling epithets from her vocabulary. She pleaded hard with the Magistrate, making the somewhat unnecessary confession that she "knew the evil of drunkenness," and that she was ashamed of herself and if allowed to go she would immediately reform. seeing that she made this same confession and promise on Thursday, the Magistrate did not place much value on them, and sent her to gaol for three months.—Ed. Maxon was fined $1.00, without costs, for allowing his cow to run at large.—Mrs. John Dunn was fined $1.00, without costs, for the same offence.

THE LITTA CONCERT.—All the arrangements for the event which takes place in the Metropolitan Hall on Monday evening, have been completed. Those who attend it will undoubtedly hear one of the very finest concerts ever given in Belleville by any musical organization. Besides M'lle Litta herself, the company consists of five ladies, and gentlemen each a star in his or her own department of music. Of Litta, it is unnecessary to say more than that she is one of the queens of the concert room. The following notices of members of the company are from leading newspapers. Of Litta the Seymour *Courier* says: Litta first appeared in Benedict's elaborate and immensely difficult variations on "Carnival of Venice," which exhaust all possibilities (and impossibilities) of vocal culture, and which would tax the fingers of a skilled pianist to execute. To attempt to describe this performance would be simply absurd as well as an impossibility. One heard the notes of birds, the brilliant tones of a flute, the resonant voice of a violin, and again the mellow tones of a clarionet in succession, and all done with a consummate ease which laughed at mountains of difficulties. She was of course encored, and sang "The last Rose of Summer" in a manner that commanded breathless attention. Miss Zeline Mantey is thus spoken of by the *Chicago Inter Ocean*: Miss Mantey is a musician of fine attainments, and unquestionably one of the very best violinists in this country. Mr. John Skelton, Cornetist, received the following notice from the Detroit *Free Press*: A cornet solo, an aria from "La Favorita," was executed by Mr. John Skelton, who, in response to thunderous applause, came back, and made the hall ring with the wild notes of "Killarney," followed by the "Echo" effect, which always carries an audience. Secure seats for Monday evening early at Reynolds.

SARAH BERNHARDT.—Just received, a beautiful assortment of the celebrated Bernhardt checks in sky blue, old gold, navy cardinal, pink, salmon, grena, seal brown, myrtle, and suitable for dresses and trimmings.—JAMES HENNESSY.

CIVIC AFFAIRS.

MEETING OF THE FIRE AND FINANCE COMMITTEES.

A Legion of Petitions Considered and Acted Upon.

The Finance and Fire Committees met last night. A meeting of the Harbor and City Property Committee was also called, but it being eight o'clock before a quorum arrived, the Finance Committee absorbed its members and no meeting was held. The members present, besides those in attendance on the Finance Committee, were Ald. Petrie (Chairman) and Holden.

FIRE.

PRESENT—Ald. Smith (Chairman), Vandusen, McIninch, Clarke and Frost.

ABSENT—Ald. Niles and Farley.

The following accounts were recommended to the Finance Committee for payment:

Wm. Barrett	$ 6.75
Wm. Brodie	3 25
Chas. Doran, rent for chemical engine	18.00

The Chairman thought it advisable to sell the old hand fire engine, but as the Finance Committee were waiting to meet, the consideration of the matter was deferred till the next meeting.

The Committee then adjourned.

FINANCE COMMITTEE.

PRESENT—Ald. Jellett, [Chairman], Dunnet, Costello, Ostrom, Smith, McIninch and Petrie.

ABSENT.—Ald. Lingham, Niles, Farley and Dickson.

The petition of Irvine Diamond, for remission of taxes on property in Coleman ward on which he had no claims was considered. It was, the petitioner stated, the property of the Merchant's Bank. Goods belonging to petitioner's wife had been seized for the payment of the taxes.

The petition of D. E. Filliter, asking for a clear receipt for taxes on property which the petitioner claimed, had already been paid, was considered.

It was agreed to leave both those petitions to be considered by the Solicitor and Collectors they to report at the next meeting of the Committee.

The petition of Thos. Hardy, asking for remission of taxes, was on **motion** granted.

The petition of Christopher Macdonald, asking to be relieved from taxes on a portion of the Burdon estate which petitioner claimed was unjustly levied, was laid over, and it was decided to levy on the land.

The petition of the widow Stewart was, on motion, granted. The petition asked for remission of taxes.

The petition of Lieut.-Col. Otter, asking for a grant of $10 to the Ontario Rifle Association, was, on motion, laid over.

The petition of Capt. Simpson, asking for remission of taxes on the rooms occupied by the 15th Batt. Band and No 4 Company was granted.

The petition of P. J. M. Anderson for remission of taxes amounting to $3.65, was not entertained.

The petition of John H. Gordon, asking to be heard with reference to his taxes was laid over.

The communication of Francis Clarke and James Maguire, offering to sell the city a lot on which to erect a fire shed and police cells, was referred to the special committee appointed to consider them.

The petition of Edward Harkins, asking that labor done on the street in front of his property be applied on his taxes, was granted, the work to be done under the supervision of the Street Surveyor.

The petition of C. Maguire, asking for remission of his taxes in consideration of his supporting an old woman, was granted.

The petition of Catharine Brennan, asking for the remission of a portion of her taxes for 1879, was granted.

The petition of Wm. Young, asking for time to pay his taxes, was granted.

The petition of the English and Scottish Investment Company, asking for reduction in the assessment of the Dorland property, was not entertained.

The petition of Jas. Craig, asking for time to pay his taxes, was granted

The petition of A. L. Bogart, asking for remission of taxes on the Reynolds estate, was not entertained.

The petition of Spencer C. Sloan, asking to be relieved from the payment of his taxes, was not entertained.

The petition from the trustees of Masonic property in Baldwin Ward, asking for the equalization of the assessment on the property was not entertained except with regard to the room occupied by the 49th Battalion in 1878-9, which portion was granted.

The petitions of sundry individuals, asking for the remission of the taxes of Patrick Tansey for 1880, was not entertained.

The petition of Mrs. Pine, for remission of taxes for 1879, was referred to the Collector.

The petition of Edward Maloney, asking to have his taxes collected from the present occupant of the property assessed, was laid over.

The petition of Daniel Foster, asking for remission of taxes, was not entertained.

The petition of Hugh Walker, asking for reduction in the assessment for 1881 on property which was burned down in November last, and for certain changes in the assessment, was laid over until the rolls for 1881 are in the hands of the Collector.

The petition of John Sturton, for remission of taxes, was referred to the Collector for him to act upon.

ACCOUNTS.

The old, much-disputed and oft-considered account from the assignee of Miles, Rankins & Co., amounting to $21.21, was passed.

The account submitted by the Principal of the Deaf and Dumb Institute, for clothing supplied to pupils at the Institute partially supported by the city during 1879 (amounting to $25.15), was rejected.

An account of $48 88, for railway passes, was passed.

The accounts submitted by the Fire and Poor & Sanitary committee, were passed.

The Mayor moved that the Auditors' report be adopted, and that the Chairman of the Printing Committee be instructed to have it published in the city papers.—Carried.

The Committee adjourned.

Hastings Notes.

The Hastings *Star* has recently removed into the new premises over Mr. Fife's store. The office is large, and well-lighted, and when "fixed up," will be all that is to be desired in a village printing office. We are glad to learn that the business is exceedingly prosperous.

Amongst the improvements going on in the village is the erection of a new Town Hall, which will be an ornament to the place. The size of the building will be 34 × 64, the basement to be of stone, second story of brick, surmounted by a handsome tower. The basement will be used for the Council room, a dwelling for the caretaker, and a lock-up, the upper flat to be used as a public hall, court room, and will seat about 500 people. The plans were prepared by Mr. D. S. Neson, of Hastings. Mr. John Peters has the contract. Materials are now being brought to the ground, the work of excavation has commenced, and it is expected to be completed about the first of September.

Mr. Collins, who has for years been engaged in shipping cattle from this district, has commenced the erection of a warehouse on the corner of the lot adjoining the railway station. The building is to be of wood, with stone foundation 34 × 50. In connection with the warehouse will be a cattle yard, with pens and facilities for loading. Mr. Collins ships on an average one car load of cattle a week to Montreal via the Grand Junction Railway.

A gang of men, under the supervision of a Government officer are engaged in cleaning up and repairing the locks, preparatory to the opening of navigation, and in anticipation of a large business being done in the iron ore trade the coming season.

Messrs. Hogg, Hill & Co., large retail men here, are getting in their spring supplies of goods, and are offering great inducements to buyers. Their business is rapidly increasing.

Mr. John Peters, who carries on a large hardware business, is also engaged in tinsmithing, and makes a specialty of milk cans. He claims to make the best and cheapest can in Ontario. At present he has contracts for over $1,000 worth of cans.

During the months of February and March, 20 car loads of Liverpool salt, have been sold here for manuring purposes. The farmers hereabout have great faith in salt as a fertilizer.

Mr. Howard has on exhibition at the *Star* office, a most wonderful curiosity, which ought to be obtained for the Ottawa museum. It is thus described by the *Star*: "On Tuesday of last week while Mr. O'Neille and his brother were cutting wood into stove lengths with a sawing machine, in a fallow which he was clearing on his farm in Asphodel, they discovered a curiosity. They had cut two blocks, 2 feet long from the end of a beach log, 22 inches in diameter, when on splitting the second block a portion of the antlers of a deer were found in the centre. An examination was forthwith made and it was seen that the saw had cut through the horn, the balance being in the third block, which was immediately split open and the missing part brought to light. Very many years must have elapsed since the horn, which has four prongs, graced the left side of a "noble buck's" head as it is completely enveloped with growth of wood and bark. The distance from the ground to the apparent point of entrance was eight feet, the base of the horn lying at right angles to the tree, the point extending downward a distance of twelve inches; the second prong from the base extends downward and outward, terminating near the exterior on the opposite side, the third being parallel with the second. The horn is perfectly sound, and the tree,—although the centre is now partially decayed—had formed a [illegible] growth [illegible] it, there being yet a ring of solid green timber surrounding the whole. Hundreds have called in to see this freak of nature, which is now in our office, and with amazement depicted upon their countenance, unconsciously exclaim: "How did it ever get there?"

MORNING DESPATCHES

EUROPEAN.

FRAUDS IN CUBA.

MADRID, April 2.—In the Council of Ministers, the Secretary of State for the Colonies announced that in consequence of fresh discoveries of frauds in Cuba, and the difficulty encountered in local influences, he deemed it necessary for the appointment of Royal Commissioners with extraordinary powers to reform the administration of the colony.

A SENSATIONAL REPORT ABOUT EGYPT.

A sensational but apparently authentic report has reached here from Paris to the effect that the Sultan a few weeks ago made a secret proposition to the French Government for a *coup d'etat.* He proposed to depose the Khedive and to put in his place any one named by France. By this measure the influence of England in Egypt would be destroyed and the prestige of France be vastly increased. The *quid pro quo* for all this was to be that France should float a new loan for the Sultan and furnish military support if necessary. The story goes that the French Government, after getting the whole scheme laid before it, declined to accede to the proposition, and revealed the whole proposal to the English Government. The whole story throws other sensations in London completely in the shade.

AMERICAN.

A DESPERADO.

LITTLE ROCK, Ark., April 2.—A desperado named Currie, reported killed in New Mexico, is not the man who murdered the actor Porter. Currie, who was killed was well known here as a desperado.

FALL IN BONDS.

NASHVILLE, April 2.—Little hope is felt of the passing of the bill for funding the state debt. After the defeat of the Bill by the House yesterday the state bonds fell from 60 to 48.

GARFIELD'S MOVEMENTS.

NEW YORK, April 2.—Garfield and Secretary Hunt are expected here in July. The President, it is believed, will attend Williams College commencement, and it believed will visit the home of his ancestors, the Ballons of Cumberland.

A LECTURER STONED.

HARTFORD, Conn., April 2.—Bishop McNamara, of the Independent Catholic Church, while lecturing against Roman Catholicism last night, was driven from the hall and stoned on the street. The police escorted him to his hotel. He announces his intention to lecture to-night. There haev been no arrests, but it is believed the matter will not be permitted to drop, although McNamara's course does not meet with general approval.

WASHINGTON SPECIALS.

NEW YORK, April 2.—The *Sun* says it is not improbable that the Senate may go into executive session early to-day.

The *Times* says the words used by Mahone yesterday to Voorhees are almost exactly those used by Lamar to Conkling two years ago. They are regarded as the regulation of the Southern formula in the legislative bodies and as an invitation to the field of satisfaction. Yesterday's session is one of the warmest known for years. It is said that the President, should Robertson be confirmed, expressed a determination to instruct him that any attempt to use his office for the promotion for political interests of any man or faction will be result in his speedy removal. Blaine disclaims any responsibility for Robertson's appointment. He has no special interest in the question, for the reason that he is determined never again to be a candidate for the Presidency.

CONCUSSION OF BRAIN.

NEW YORK, April 2.—George Engle, aged 8, while playing tag at Hoboken school yesterday, ran violently against another boy, sustaining a fatal concussion of the brain.

WINDOM CONFERENCE.

At Windom's conference yesterday much diversity of opinion existed, and a general opposition to syndicates, and equal unanimity in favor of offering bonds for public subscription. Windom said to a *Tribune* reporter: "I have really received no formal propositions of any character, hence there is really nothing to say; everything is just as vague at present as it could be. My conference has simply been informal, and I doubt if anything that has been said thus far is of sufficient importance to lay before the public."

AFTERNOON DISPATCHES.

THE SITKA INDIANS.

WASHINGTON, April 2nd.—Commander Glass reports from Sitka that the condition of the natives of Alaska is improving. The distilleries are suppressed, schools established and sanitary improvements were made with success.

THE PROSECUTION OF "THE FREICHEIT."

LONDON, April 2.—A public meeting convened by the *Freiheit* defence committee was held last night, an Englishman President. The English edition of the *Freiheit* was distributed containing an appeal to socialists of all nationalities. A resolution was passed declaring that the arrest of Most and the seizure of the *Freiheit* are arbitrary and unjust, and worthy of Russian despotism. The *Times* reports that Most's writing in the *Freiheit* has long been republished by responsible chiefs of socialists in London and Germany. Recently he and his followers in London had been formally excluded from the party where he was regarded as a hindrance.

THE U. S. MINISTER AT BERLIN.

A Berlin correspondent says that United States minister White will shortly resign.

FATAL BOILER EXPLOSION.

NORFOLK, April 2nd.—This morning nine workmen assembled at the furnace room of Booth, Carman & Co.'s steam sawmill at Berkley, when an explosion occurred. One white and three colored workmen were scalded to death instantly, and two colored were fatally scalded, and three colored badly scalded. The cause is supposed to be a patch on the boiler or the bursting of a pipe from the donkey engine.

FIRE AT CINCINNATI.

CINCINNATI, April 2.—The central factory of Robinson's wagon works was burned, with three hundred wagons stored in the yards, also, Adam Moore and Co's varnish factory and the Queen City varnish factory. The total is $100,000.

QUEENSTOWN, April 2.—Arrived, the *Abyssinia*

THE WHITEHEAD TORPEDO.

WASHINGTON, April 2.—The local agent of the Whitehead torpedo charges that Commodore Jeffers, Chief of the Ordinance, has obtained a description of said torpedo surreptitiously from some foreign Government, to which the right to manufacture them has been sold.

ATTEMPTED SUICIDE.

BUFFALO, April, 4—S. H. Schiffer, who has been missing for a day or two, was found at Continental Hotel this morning. He had taken two bottles of laudanum. His condition is critical.

WASHINGTON, April 2. — Indications;—Middle States, partly cloudy, slightly warmer, occasional light snow to-morrow, cool, fair.

—A severe snow storm has prevailed in Manitoba for the last day or two, causing a very wintry appearance. Trains on the Portage La Prairie division of the Pacific Railway have been blockaded. The telegraph wires are also down between Winnipeg and St. Paul and trains are delayed in consequence.

—The officials of the Federal Bank at London were busy all day yesterday over the books in order to try and discover the amount of the defalcation of Gredon and McEachren, the two clerks who absconded. They say that the total loss will not reach $3,000 and that the bank is more than doubly secured. McEachren speculated in stocks, and it is said the pair carried off no money with them, the sudden visit of the inspector driving them out of the city without even a change of clothing.

"Hail bounteous, beauteous, gladsome Spring" – this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* [illegible]

Proclamation by the President.

Fault-finding is so seldom indulged in by those who use medicines manufactured by the World's Dispensary Medical Association, that the President of that corporation the Hon. R. V. Pierce, M. D., has issued a special request or proclamation to any and all persons, if there be such, who may have taken or shall hereafter use any of the family medicines made and sold by the said Association, in all countries of the world, and who have not derived full benifit from said medicines, that if they will write the said Association a description of their maladies the Faculty of the Dispensary will advise them with respect to the successful treatment of their diseases. Dr. Pierce's Golden Medical Discovery is gauranteed to cure all humors, from the common blotch, pimple or eruption, to the worst scrofula or king's evil, and those virulent poisons that lurk in the system as a sexuel or secondary affection resulting from badly treated or neglected primary diseases. It also cures bronchial, throat and lung diseases. Favorite Prescription is guaranteed to cure female weaknesses and kindred affections. Extract of Smart-Weed cures bowel affections, colds, and all painful rheumatic and neuralgic affections. Dr. Pierce's Pellets (little sugar-coated pills), are the little giant cathartic. Address, Warld's Dispensary Medical Association, Buffalo, N. Y., or Great Russel Street Buildings, London, England.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

Commercial.

BELLEVILLE MARKETS

INTELLIGENCER OFFICE,
Belleville, April 2, 1881.

There was no change to-day in the price offered for any kind of grain. In Oswego Rye is quoted to-day firm at 96c in bond.

Dressed hogs were quiet to-day; $8.50 per 100 lbs was the general price offered and taken.

Hides were steady at $5.00 to $6.00 per 100 lbs. Sheepskins sell from $1.00 to $1 40 for for the best, Deakins are in good demand, 64c was the highest price we heard of being paid.

Butter was in good demand, the best rolls sold readily at 25c, and in a few cases 27c was paid. Some lots of butter, as a buyer remarked, "strong enough to draw a hearse," was offered at 18c, but at the close of the market remained unsold. There is very little tub butter offering.

Eggs were plentiful and sold from 11 to 14c. The ruling price was 12½c.

Hay is plentiful at $12 per ton.

Buyers are taking all the potatoes offering at 50c per bag for shipment.

IN CHANCERY.

CRATHERN vs. THOMAS et al.

PURSUANT to a decree and final order for sale, made in this cause, and dated respectively the 13th day of April, A. D. 1880, and the 11th day of February, A-D 1881, there will be sold by Public Auction, with the approbation of Samuel Shaw Lazier, Esquire, Master of this Court at Belleville, at Chancery Chambers, Shire Hall, in the City of Belleville, on

Friday, the 8th day of April,

next, at 2 o'clock p. m., the following land and premises:—

Parcel 1.—Being the rear or west end of lot No. 6, according to G. B. Spencer's plan of part of Lot No. 34, on the west side of Pinnacle St in the City of Belleville, in the County of Hastings, and being the said lot No 6, less a parcel thereof, the full width thereof of the depth of one hundred feet, from the said west side of Pinnacle St., heretofore sold to Jacob Lockwood by John Lewis. The said Spencer plan was deposited in the Registry Office for the County of Hastings, the 30th day of October, 1846.

Parcel 2—Being composed of parts of Lots 36 and 37, on the east side of Pinnacle Street, and Lot 36 on the west side of Church Street, in said City of Belleville, and may be better known and described as follows, that is to say:—Commencing at a point in the easterly limit of Pinnacle Street, at the distance of 50 feet on a course south, 16° east from the north-west angle of said Lot 37, thence north 74° east along the southerly limit of the northerly 50 feet of said Lot 37, 158 feet more or less to a point at the distance of 16½ feet, measured westerly, and perpendicularly from the centre line of the Grand Junction Railway track, thence southerly, parallel to the said centre line of the said Grand Junction Railway track, to the southerly limit of Lot No. 37, thence south 74° west, along the said southerly limit of the said Lot No. 37, 96 feet 4 inches, more or less, to the easterly limit of Pinnacle Street, thence north 16° west 77 feet 7 inches, more or less, to the place of beginning.

Also—Commencing at the south-east angle of Lot No. 37, on the east side of Pinnacle Street, thence north 74° east along the northerly limit of Lot No. 36, on the west side of Church Street, 50 links, thence south 16° east, 45½ links, thence south 74° west, 98 links, more or less, to a point at the distance of 2 chains and 13 links from the east side of Pinnacle Street, thence north 16° west, 45½ links, more or less to the limit between Lots numbers 36 and 37, thence south 74° west, 3 feet 10 inches, more or less, to a point at the distance of 16½ feet, measured easterly, perpendicularly from the centre line of the Grand Junction Railway track, thence northerly, parallel to the centre line of the Grand Junction Railway track to the centre line of the block, thence south 16° east, 45 feet, more or less to the place of beginning.

Upon parcel No. 1, is erected a stone building, now occupied as a stable.

Upon parcel No. 2, is a frame building, lately occupied by John Lewis as a residence; and also a Frame Barn used by him as a Wood Shed.

The Vendor will not be bound to furnish any better title than appears in the Registry office, or such title by possession as the Mortgagor had in the premises.

The purchasers shall pay down deposits in the proportion of $10 for every $100 of the purchase money, and the balances thereof within one month thereafter. In all other respects the conditions of sale are the standing conditions of sale of the Court of Chancery.

For further particulars apply to the Vendor's Solicitor, and to Messrs. Bell & Bonton Belleville,

S. S. LAZIER.
LEWIS WALLBRIDGE, Master.
Vendor's Solicitor.
Dated 11th March, 1881. 306dtaw.

NOTICE.

SEALED TENDERS addressed to the Superintendent General of Indian Affairs, and endorsed "Tender for Indian Supplies," will be received at this office up to noon of THURSDAY, 14TH APRIL, 1881, for the delivery of the usual Indian Supplies, duty paid, at Fort Walsh and Fort Macleod for the year 1881-82, consisting of Flour, Bacon, Groceries, Ammunition, Twine, Oxen, Cows, Bulls, Agricultural Implements, Tools, &c.

Forms of Tender and full particulars relative to the supplies required, can be had by applying to the undersigned or to the Indian Superintendent, Winnigeg.

Each tender must be accompanied by an accepted cheque of a Canadian Bank for the sum of five thousand dollars, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The lowest or any tender not necessarily accepted.

[No Newspaper to insert without special authority from this Department through the Queen's Printer.]

L. VANKOUGHNET,
Deputy of the Superintendent
General of Indian Affairs.
Department of Indian Affairs
Ottawa, 25th March 1881. 316d3tawtd

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallible cure, it was used for similiar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &c.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

What! can't you guess?

STRACHAN'S GILT EDGE SOAP

ALL LEADING DEALERS RECOMMEND AND SELL IT.

No. 36 Jacques Cartier St.,
Montreal.
2763meod

SEALED TENDERS, marked "For Mounted Police Provisions, Forage and Light supplies," and addressed to the Hon. the Minister of the Interior, Ottawa, will be received up to noon on Thursday, 14th April.

Printed forms of Tender, containing full information as to the articles and quantities required, may be had on application at the Department.

No Tender will be received unless made on such printed forms.

Each Tender must be accompanied by an accepted Canadian Bank cheque, for Two Thousand Dollars, which will be forfeited if the party making the tender declines to enter into a contract when called upon to do so, or if he fails to complete the service contracted for. If the tender be not accepted the cheque will be returned.

No payment will be made to newspapers inserting this advertisement without authority having been first obtained.

Belleville, March 11, 1881.

Daily Intelligencer.

DON'T STAY LONG.

A look of yearning tenderness
  Beneath her lashes lies,
And hope and love unutterable
  Are shadowed in her eyes,
As in some deep unruffled stream
  Are clouds and summer skies.

She passed to early womanhood,
  From dreamy, sweet girl life,
And crossed the rosy threshold but
  To find herself a wife;
Oh! gently should he lead her steps
  Along the path of life!

And as she clasped her small white hands
  Upon his arms so strong,
How often like a summer sigh,
  Or a sweet pleading song,
She whispers with a parting kiss,
  "Beloved one don't stay long."

They're almost always on her lip,
  Her gentlest parting words,
Sweet as the fragrance from rose leaves
  When by soft zephyrs stirred,
And lingering in the memory
  Like songs of summer birds.

And in his heart they nestle warm
  When other scenes amid;
He stays not till she weary grow,
  And her fond eyes are hid
In tears which lie in bitterness
  Beneath each veiling lid.

And, oh, how many hearts are kept
  By that love-uttering song!
There's scarcely one who on life's waves
  Is swiftly borne along,
But what has heard from some dear lips
  These sweet words, "Don't stay long."

TWO OF THEM.

In the farm-house porch the farmer sat,
With his daughter having a cosy chat:
She was his only child, and he
Thought her as fair as a girl could be.
A wee bit jealous the old man grew,
If he fancied any might come to woo
His one pet lamb, and her loving care
He wished with nobody else to share.

"There should be two of you, child," said he;
"There should be two to welcome me
When I come home from the field at night:
Two would make the old homestead bright.
There's neighbor Gray with his children four
To be glad together. Had I one more,
A proud old father I'd be, my dear,
With two good children to greet me here."

Down by the gate 'neath the old elm tree
Donald waited alone; and she
For whom he waited his love-call heard,
And on either cheek the blushes stirred.
"Father," she said, and knelt her down,
And kissed the hand that was old and brown—
"Father, there may be two, if you will,
And I—your only daughter still."

"Two to welcome you home at night;
Two to make the old homestead bright:
I—and somebody else." "I see,"
Said the farmer, 'and whom may 'somebody'
  be?"
Oh, the dimples in Bessie's cheek,
That played with the blushes at hide-and-seek!
Away from his gaze she turned her head,
"One of neighbor Gray's children," she said.

"H'm!" said the farmer; "make it plain;
Is it Susan, Alice, or Mary Jane?"
Another kiss on the aged hand,
To help the farmer to understand (?)
"H'm," said the farmer: "yes; I see;
It is two for yourself and one for me."
But Bessie said, "There can be but one
For me and my heart till life is done."

The Dog.

The dog is a digitigrade carnivorous mammal. This will be news to most persons, who had always supposed that a dog was simply a dog.

It has been bruited about that the dog is the best friend to man among the brute creation.

When you notice how affectionately the dog clings to the stranger that knocks at your door, you can readily believe this.

He pants after the thief. When once he gets hold of the thief's pants, he makes breaches.

The dog leaves off his own pants during cold weather.

A barking dog never bites; that is to say, when he begins to bite he stops barking. Conversely, a biting dog never barks, and for similar reasons.

The hair of a dog will cure his bite. This is a cure-ious superstition among hare brained young men who are fast going to the dogs.

Dogs are dentists by profession. They insert without charge.

The dog never barks, excepting when he is awake. The dog is always awake.

The dog has no other way to express his joy than to bark. He always feel joy when he sees a man. When there is no man to see he expresses his joy to the man in the moon.

As we remarked, the dog is always awake. This is no tale, though he carries a tail in his wake.

The sea dog loves his bark. Did you ever see dog that didn't.

The Jews considered the dog unclean.

And yet a dog will clean out a crowd, no matter how dirty.

The bulldog is a stubborn fellow. He is not easily cowed.

Of course the gentler sex is the more stubborn of the two. You have heard of the dogma.

Puppies are born blind. They are not sea dogs then.

There are many types of dogs, including the doguerrotype.

The dog has four legs; two of them fore legs.

But perhaps we had better paws here.

Howl this do for the dog.

Remarks on the Mule.

(From Sam Porte's Zoology.)

The mule is a vertybrayte. He has four legs, the rear ones being steam boiler explosions in disguise. He has also a pair of lungs larger than an emigrant's valise, and he can execute the most fatal love taps of any animate creature in all creation and part of New Jersey. The idea of nitro glycerin was taken from the kick of a mule. More profanity has been expressed upon him than would, if judiciously distributed, stock up all the theological seminaries in the land. The mule is extremely musical, and, like all grand musical instruments, is composed mostly of stops; and as a stoppist he is a success. In this respect he is like the day laborer. Neither can go as fast as an express train or a false rumor, but they can stop 137 degrees quicker by actual count.

I remember once being in the country. It was in the season when the small boy was being tied up in a hard knot by the first peaches of the season, which consisted of a piece of buckskin wrapped around a piece of cobble-stone. The flowers were in bloom and the country swain was coming home with a huckleberry pie war map on the seat of his pants. It was at this time, then, that I resolved, while enjoying all the comforts and soul-stirring beauties of pastoral life, to see the mule upon his native heath. I found him quietly dozing as though at his own fireside, surrounded by his own immediate relatives. His mind was filled with peace and his hide with splinters—from numerous clubs that had been used to fondle him with. He was running over with virtuous serenity. I wanted to hear him warble. So after I had used up a spade on him, he suddenly sucked into his lungs all the air in the three adjoining counties, and then issued a specimen of his bray that was enough to lift the mortgage from a two-thousand acre farm, or give a mummy the rinderpest. I have heard Nilsson sing for $1,200 a night, heard the opera of "Fra Diavolo" by a Choctaw brass band, and Rory O'Moore" on a bass-drum by a toothless private, but this was the most astounding musical matinee I ever had a free pass to in all my life. Every note was bred forth in a solid chunk, and the sound was enough to make a man's spirit go down like the price of linen pants in January. I stayed until that mule had brayed down a rail fence and retired a frame shed from active business, and then I left, a sadder but a deafer man.

* * *

A Galveston woman, just married, wishing to impress her husband with her ability as a housekeeper, bawled out to the servant as she entered the door, "Matildy, bring me the washboard, I want to wash the potatoes for dinner."

A gentle hint: They stood at the door preparatory to saying good night. "When shall I call again?" he asked, with an emotion that made his eyes misty and his voice soft. "When papa returns," she answered, calmly. "And when will that be?" he eagerly asked. "Well, he starts for a voyage around the world to-morrow, and I'll let you know when he gets back."

Humorous.

Turn about is fair play in a circus.

A disturbing element: Nitro-glycerine.

Is a mushroom city builded with toads' tools.

Punch says that "The wind is ill-tempered to the shorn lamb."

No strict vegetarian will eat kidney beans or marrowfat peas.

The chap that puts the meat into the brine is the real corner in beef.

The archery season is about to open, and the girls are all bent on having a beau.

Although there is only one second city in the Union, there are many minute ones.

If Prof. Swift ever discovers a baby comet he is advised to let the sky-rocket.

A boy's drum is bad enough, but a fellow that is always asking you conundrums is worse.

If handwriting is indicative of character, some reputed good men have very bad characters.

"Judges," said a lawyer, "have always a advantage over us poor fellows, for they guess last."

Says a French critic, 'I like a girl before she becomes womanish, and a woman before she gets girlish.

If the shell of an egg was as hard as the shell of an oyster there would be less poor actors on the American stage.

'What is home where love is not?' asks a susceptible young poet. It's a mighty interesting place—to the neighbors.

A New York store is occupied by two firms; on one window is the word "Dyeing," and on the other "Undertaker."

'Jacob, is there much difference between a sea and a saw?' 'Yes, the difference between sea and saw is in tense.

One of the first requisitions received from a newly appointed railway station agent was, 'Send me a gallon of red oil for the danger lanterns.'

'How do you define 'black as your hat?' said a schoolmaster to one of his pupils. 'Darkness that may be felt,' replied the youthful wit.

An exchange speaks of a Chicago man who 'has one foot in the grave.' Presume it's all they could get in without enlarging the cemetery.

"Astronomer:" No sun spots, so called are not freckles on the face of the god of day; but that would be just an awfully sweet way of saying it.

Mark Twain says there is something very fascinating about science—It gives you such wholesome returns of conjecture for such trifling incidents of fact.

'It is harder to get ahead in this world,' said Clorinda's young man, as her father assisted him out of the door with his boot, 'than it is to get a foot.'

Encouragement.—Jones (who has just added the last finishing touch to his picture): 'Well?' Smith: 'Well, you've just got it into a capital state to begin working upon!'

A poor young man remarks that the only advice he gets from capitalists is 'to live within his income,' whereas, the difficulty he experiences is to live without an income.

Shades of new honeysuckle will be used on new bonnets. They will probably be 'too sweet for anything,' but the wearers will be exposed to the risk of having a bee in their bonnets.

My little boy went to his first tea-party when 4 years and 3 months old. Upon the hostess asking him how he liked his tea, he replied: 'It is very nice, but I think it tastes very much of the water.'

Young America in America: When a Chicago little boy is bad and his mamma orders him to stand in the corner, he edges towards the door and remarks: "Say, ma, is it a corner in lard or a corner in pork?"

X., arriving, from Naples, is questioned by a friend: "Had you no adventures in Italy?" "No." "No brigands?" "I turned them all to flight." "How so?" "Why, if I saw an ill-looking individual I went and begged charity of him."

Said Jones to Smith, "It's almost the first of April, and 'three removes are as bad as a fire.'" "Yes," answered Smith, "and yet one fire is equal to but one remove. I would not have moved this spring if I hadn't been 'fired.'"

'I pin these flower in thy hair,' murmured a sentemental young man, and as he proceeded to do so, he awkwardly unfastened the very hairpin that held her bangs in subjection, and they floated gracefully to the floor. They met in dignified silence since that evening.

An American miilionaire, not long since, visited Europe. A traveled friend asked him what he had seen, mentioning all the noted sights; amongst other places, he inquired if he had seen the Dardanelles.

'Oh, yes,' replied old Money-bags, 'they dined with us the last night we were in Paris!'

'You young scamp,' cried an elderly gentleman as he caught a little urchin in the act of picking his pocket, "aren't you ashamed of yourself? You so young and a thief already?' 'Oh, gammon,' retorted the urchin, 'I like that! Ain't you ashamed of yourself—you so old and ain't got a silk handkerchief yet!'

'More trouble in Ireland,' read Mrs. Partington. 'I wonder,' said the old lady, laying down her spectacles and blandly regarding Ike, who was trying to tie a hard knot on the cat's tail, 'I wonder that Government doesn't incorporate that Parnell for life and send the ringleaders into blandishment, and then there wouldn't be any more aquarium outrages.'

The popular kindergarten: A Galveston clergyman was talking to a male parent about the latter's little boy, Johnny. Said the fond father: 'He is the cutest little cuss you ever saw. He can swear like a trooper, chews tobacco, ties tin pans to dogs' tails and—' 'Does he attend school?' 'Why parson, he is too young for that, you know; he is not far enough advanced.'

A gentleman in a restaurant yesterday told the waiter that he was all the way from Toledo, that he was tired out and did not know what light thing to order. "Take a sweetbread and a glass 'o wine," said the waiter. "No," said Mr. Toledos "I can't eat anything heavy like pies, cake, or sweetbreads. Give me some cold corn beef and some boiled potatoes."

The Wrong Leg.

The Portland *Advertiser* tells the following story: There was an eminent sergeant-at-law some years ago who had a cork leg that was a triumph of aristic description. None but his intimates knew for certain which was the real and which was the sham limb. A wild young wag of the "utter bar" who knew the sergeant pretty well, once thought to utilize this knowledge of the sergeant's secret to take in a newly-fledged young barrister. The sergeant was addressing a special jury at Westminister in his usual earnest and vehement style, and the wag whispered to his neighbor, "You see how hot old Buzfuz is over his case; now I'll bet you a sovereign I'll run this pin into his leg up to the head, and he'll never notice it, he's so absorbed in his case. He's a most extraordinary man in his way." This was more than the greenhorn could swallow, so he took the bet. The wag took a large pin from his waistcoat, and leaning forward drove it up to the head into the sergeant's leg. A yell that froze the blood of all who heard it, that made the hair of the jury stand on end and caused the Judge's wig almost to fall off, ran through the court.

"By Jove, it's the wrong leg, and I've lost my money," exclaimed the dismayed and conscience-stricken wag, regardless of the pain he had inflicted on the learned sergeant.

A Layeryman's Trouble.

Last week, young Keepitup was out with a team all one afternoon. When he drove into the stable, oh, but the man was mad.

'Look at that hoss,' he wailed, 'look at that hoss! Ain't a dry hair on him, an' he's nigh ready to drop. That's a pretty lookin' way to bring in a hoss. Nice man, you are, to let a good hoss to!'

Young Keepitup was astonished.

'Man alive,' he yelled, picturing his amazement in his voice; 'and what did you expect when I hired him? When a horse is costing me an even five dollars an hour, he's got to keep moving, you understand. When I'm paying out more than eight cents every minute, I can't afford to let no horse loaf up against a feed box while he figures out the oat crop of the United States for 1880. I did my level best to keep my whip arm warm, and then I couldn't get more than 4 dollars and 25 cents an hour out of him. I didn't hire the horse to rest him. Now, if you had only charged fifteen cents an hour, I would have had the horse fed every thirty minutes while I was out, and I would have rocked him to sleep in my arm, wrapped him up in blankets, and hauled him back to the stable myself. That is the difference, you see, Mr. Silkcracker.' And he went away, while Mr. Silkcracker stood looking alternately at the money and the horse, thinking it all over.

* * *

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. David B. Robertson,

HAVING resigned the Secretaryship of the Grand Junction Railway Company, will devote his whole attention to the practice of his profession in all its branches.

OFFICE—No. 4 Post Office Block, Bridge Street, Belleville, Ont.

N. B.—Mr. R. has been appointed agent here of the Landed Banking and Loan Company—a company offering special low yearly rates of interest to farmers. Mortgages bought and sold.

A MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL Use.

SUBSTITUTES!

The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED,
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest.

SOLD BY ALL MEDICINE DEALERS.

THE LEADING
CLOTHING HOUSE

WE beg to notify our numerous patrons and the general public, that we are now in receipt of our

New Spring Stock of Fine Woollens,

Consisting principally of English, Irish, Scotch and Canadian Tweeds, Scotch and Irish Serges, French and English Worsteds, Fine West of England Trouserings, Black and Blue Broadcloths, Black and Blue Venetians, Doeskins, Cassimeres, &c., in all the largest and most complete stock of the kind in Canada.

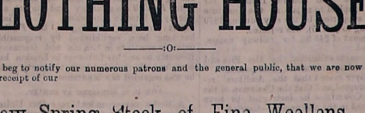
OUR CLOTHING is, without doubt, quite equal if not superior to the best New York Clothing for style, fit and materials, a proof of which is the large number of First Prizes awarded, as at Toronto, Hamilton and other Exhibitions during the past season.

Gentlemen requiring FINE CLOTHING will find it to their advantage to inspect our Stock before purchasing.

We are this season, in addition to our Large Trade in Fine Ordered Clothing, making a specialty of Low Priced Tweed Suits, which we will make to order at the following prices:—

$12, $13.50, $15, $16.50.

PETLEY & COMPANY,
(Golden Griffin),
KING ST. EAST, TORONTO



NORMAN'S
ACME ELECTRIC APPLIANCES
FOR ACUTE AND CHRONIC DISEASES
AND RESTORER OF THE NERVES & GENITAL ORGANS
A. NORMAN, 4 QUEEN ST. EAST
TORONTO

NORMAN'S
ACME ELECTRIC APPLIANCE.

THIS Electric Appliance is made of separate galvanic cells, connected with pliable wire, thus making a complete galvanic battery in belt form, which can be readily applied to any part of the body for curative purposes. This appliance may be used so as to direct the full force of the united cells directly through any part of the body, either lengthwise or across; or it can be used along or around any part, so that each cell may impart its amount of power consecutively. In one case it is a constant, intense current, which can be increased to a point almost unbearable; in the other it is a constant, mild current, nearly imperceptible. Medical men and electricians will at once see the immense advantage of this appliance for diseases of the Sexual Organs, Nervous Debility, and all those diseases peculiar to young men, and affections of the womb in women. It is particularly adapted to cases where the nerves are lacerated and the organs sore, contracted, weak or relaxed. A suspensory attachment is made to use with it where it is necessary. This appliance does not soil the underclothing like Pulvermacher's, and is much more powerful and beneficial, combining the best features of other belts without any of their disadvantages. It can be worn on any part of the body, either round the waist or down the back, or leg or arm, so that it can be used with advantage in all diseases where electricity is beneficial. [*See large Circulars.*] This appliance can be repaired at small cost, so that practically it is indestructible.

The price of the Acme Appliance is $10.00 to $15.00, according to power. The Suspensory Attachment $1.00 extra. Short Belts of the same construction are made, and may be had at the following prices: Back Belt $5.00 and $7.50; Body Belt $5.00 and $7.50; Leg Belt, $5.00; Arm Belt, $3.00; Head Belt $2.50; Chest Belt, $5.00 and $7.50.

These can be used in all the cases where the Belts of the same name are mentioned in large circulars.

The buckle end of the belt is a negative pole.

Consultation and large circular free.

SMOKE
GOLD FLAKE
CUT PLUG.

GOLD FLAKE

Cut Plug is the best pipe smoking tobacco ever introduced into Canada. It is made from the best selected fine old Bright Virginia Leaf. (*The raw leaf from which this tobacco is made costs more than any other tobacco manufactured in Canada after it is ready for the pipe.*)

It is made absolutely pure and neatly packed in handy tin-foil packages.

It is sold by all respectable dealers in all parts of the Dominion.

Manufactured by
THE GLOBE TOBACCO CO., WINDSOR, ONT.

N. H. DOWNS'
VEGETABLE BALSAMIC
ELIXIR

Is a sure cure for Coughs, Colds, Whooping-Cough and all Lung Diseases, when taken in season.

People die of consumption simply because of neglect, when the timely use of this remedy would have cured them at once.

Fifty-one years of constant use proves the fact that no cough remedy has stood the test like **Downs' Elixir.**

GRAY'S Specific Medicine.

Before Taking

After Taking

The Great *English Remedy*—an unfailing cure for Seminal Weakness, Spermatorrhea, Impotency, and all diseases that follow as a sequence of Self Abuse, as Loss of Memory, Universal Lassitude, Pain in the Back, Dimness of Vision, Premature old Age, and many other diseases that lead to Insanity or Consumption and a Premature grave.

Full particulars in our pamphlet, which we desire to send free by mail to every one.

The Specific Medicine is sold by all druggists at $1 per package, or six packages for $5, or will be sent by mail on receipt of the money, by addressing

THE GRAY MEDICINE Co.,
Toronto, Ont. Canada.

April 8, 1880. d&wly

MANHOOD RESTORED.

Prescription Free. For the speedy Cure of Seminal Weakness, Loss of Manhood, and all disorders brought on by indiscretion or excess. Any Druggist has the ingredients. Address

DAVIDSON & CO., 78 Nassau St., N. Y.

Ayer's
Sarsaparilla

Is a compound of the virtues of sarsaparilla, stillingia, mandrake, yellow dock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sustaining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so potent to cure all diseases resulting from impure blood. It cures **Scrofula** and **all scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.**

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impurity of the blood need despair who will give AYER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numerous low-priced mixtures, of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly seated. AYER'S SARSAPARILLA is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-purifier known. Physicians know its composition, and prescribe it. It has been widely used for forty years, and has won the unqualified confidence of millions whom it has benefited.

Prepared by Dr. J. C. Ayer & Co.,
Practical and Analytical Chemists,
Lowell, Mass.

SOLD BY ALL DRUGGISTS EVERYWHERE.

CHEAP MONEY.

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

BRANCH OFFICE
OF THE
DETROIT

THROAT AND LUNG INSTITUTE,

M. Hilton Williams, M.D. }
S. L. Nash, M.D., } Proprietors

PERMANENTLY ESTABLISHED AT THE
DAFOE HOUSE
BELLEVILLE, ONTARIO.

For the cure of all the various diseases of the Head, Throat and Chest, including the Eye, Ear and Heart.

It was an old dogma, as false and pernicious as comfortless, that all who were victims of Lung Diseases must die—there was no hope; but happily that day has gone by, and he who clings to that theory is a long way behind the times. Medical science has kept pace with the spirit of the age. New discoveries, new improvements, new inventions, have been made in medicine; new theories have taken the place of the fallacies of former days, and experience year by year demonstrates their truthfulness; and thousands are to-day living and well who under the old regime would have been in their graves.

We say confidently to those who are suffering from Catarrah that the disease is curable—that a cure can be effected in every instance where there is no other serious complication. Asthma, once so obscure and hard to manage, can, in most cases, be cured. Throat Diseases and Bronchial Inflammations readily yield to the new treatment, and Consumption itself, in most stages, may be cured and the sufferers live for years to bless their friends with their society, and to attest the wonderful efficacy of the treatment which is rapidly gaining respect and popular support—"The System of Inhalation."

The remedial agents by the practice of Inhalation are conveyed directly to the parts diseased and thus the work of restoration is begun. By simultaneous constitutional treatment the secretions become normal, the functions of the various organs are performed in a natural manner, and final recovery is the fruition of our hopes and of this rational plan. All this is accomplished without the use of much medicine—without the necessity of exile from home or any inconvenience whatever.

The very best of references given from all parts of Canada from those already cured. Remedies sent to any part of Ontario. Consultation free.

If possible, call personally for consultation and examination, but if impossible to do so, write for "List of Questions" and "Medical Treatise." Address

DRS. WILLIAMS AND NASH,
10 Dafoe House Belleville, Ont.

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞ Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞ This Lecture should be in the hands of every youth and every man in the land.

For the Intelligencer.

RAPID CITY, N.W.T.

Upon my arrival in Winnipeg, I sent you a very brief account of my travel from Belleville to the Manitoban capital; and now I am going to tell you about my trip over the prairie west, the weather that is experienced, the evidence of the people that I met concerning the climate of the great North-West, and of the class of people that made up the party conducted by Mr. Taylor, the Grand Trunk Immigration conductor, that left Ontario on March 2nd. Just before proceeding further, let me say that Winnipeg is rapidly improving both in size and in appearance. The predictions of Prof. Macoun concerning Winnipeg are rapidly being realized. Building operations will be very brisk this summer in that city. A prominent contractor informed me while staying in the city, that contracting was very probable. Good carpenters would there draw this coming summer $3 per day. It is commonly considered among builders and contractors that there will be upwards of two millions of dollars' worth of buildings erected within the city limits this present year. It would be well for the idle hands around Belleville to direct their attention westward. Among the buildings to be erected this year will be the Parliament buildings, the Lieutenant Governor's residence, and five new and costly churches. The Methodist body will put up a church built in the form of an amphitheatre, that will cost nearly $30,000.

After a very short stay in Winnipeg we pushed across the prairie as hurriedly as possible to avoid the bad roads. The snow is rapidly disappearing and sleighing is very nearly a thing of the past. However by an early movement I succeeded in reaching Rapid City without any serious trouble, after enjoying one of the most pleasant drives that I ever experienced in all my life, journeying over one hundred and sixty miles across a broad undulating prairie, wrapped in a mantle of white glistening snow, with a bright, warm sun overhead, a clear, dry atmosphere, and in some districts where settlement is thin, everything appearing motionless, not a sound to be heard save the ringing and the echoing of the sleigh bells, shaken by the motion of a fast team of horses.

The weather since my arrival in this country is the finest that I ever enjoyed, and the settlers all have the same story to tell when asked about their winter, and that is, they never saw anything like it, it was so very mild and calm, and althoug the thermometer went very low in the earlier part of the winter, still it did not appear cold. I send you a statement of the degrees of temperature as taken by Mr. William Kain, living near Rapid City.

Temperature at sunrise from January, '81, to March 10th, inst.

This statement shows very plainly that they or we have been enjoying finer weather in the North-West this winter than what was experienced in Ontario.

I will give you the result of a few inquiries I made in the train coming out, which will go to prove to those who are in an unsettled state in Ontario, and who would like to make a change, that their is just as good a field for their labor in the great North-West of Canada as there is in Minnesota or Dakota, and where they will reap just as great return for the attention they bestow upon their land.

Daniel W. McCuaig, a young man formerly from the township of Lochiel, Glengarry county, Ontario, had on board the special one car load of stock, taking it to his farm near Oakland, seven miles northeast of Portage La Prairie where he settled four years ago next May. He and his three brothers last fall reaped 5,500 bushels of grain, and netting a profit of over $1,200, which is pretty good considering that a new settler has always a heavy expense to meet and prices of everything high. They have a large frame house and an extensive granary with a capacity of 10,000 bushels. He would not go back to Glengarry again to farm upon any consideration, having collected together in the short space of time that he has been here 8 head of horses and 30 head of stock. Let some of the young farmers of our county look at this and ask themselves are they not spending their time to very little account by remaining in an old settled country, trying to gain an independency where it costs almost a life, or the pleasure of of a life, to furnish themselves with enough of that what we are striving to amass to keep us in our riper years free from the abuses that the moneyless part of the world are subject to, and have with calloused hands and tottering nerve to yield to the pressure of those brain maddening demands.

I purpose to give you for the benefit of your readers as much of this kind of news as possible, because I know of nothing more satisfying and conclusive than a candid statement of what one actually sees in the course of their travels, and depend upon it I will tell the truth in every instance, and even that, the truth, will appear to an Antanionian like an exaggeration.

T. H.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

England.

Two regiments of militia will shortly be embodied for home service.

A son of Sir Evelyn Wood has been appointed one of the pages to the Queen.

A Coventry Bible, sold at the sale of the late Lord Hampton's library, brought $1,425.

English cavalry regiments are to be exercised as much as possible in the duties of mounted infantry.

A Birmingham butcher has been sentenced to three months' imprisonment for dressing tainted meat with red ochre to give it a fresh appearance.

Photography by electric light is the latest. The London Stereoscopic Company recently took an excellent portrait of Gen. Roberts by the light.

It is proposed in London to erect a statue of Carlyle on the Thames Embankment, opposite Cheyne Row, and to place a bust of him in Westminster Abbey.

An errand boy in a draper's shop at Sheffield has had a windfall in the shape of the sum of £10,000, left him by an uncle in Manchester after whom he had been christened.

The Channel tunnel works are reported to be actively going on. A very powerful boring machine recently arrived, and no difficulty has yet arisen calculated to impede the undertaking.

Out of the £300,000 which the Wesleyan Methodist community set themselves to raise as a thanksgiving fund, £187,600 has already been received, and over £7,000 more has been promised.

Major Bromhead, one of the defenders of Rorke's Drift, went to Windsor Castle the other day, conveying for Her Majesty's inspection a relic of the colors of the 2nd Battalion of the 24th Regiment recovered from the battlefield of Isandlwana.

A curate in Lincolnshire has been committed for trial by the Newport (Mon.) magistrates for attempting to obtain money by means of a forged cheque. He had taken a cheque-book belong to a rector in Pembrokeshire with whom he was staying.

General James Butler, of Holt Lodge, Kintbury, Berks, who was seriously burned in his bed through the clothes taking fire, died recently. The deceased officer, who had attained the age of 82 years, carried the colors of his regiment through Waterloo.

The vicar of a village near Gravesend, who is somewhat unpopular with some of his parishoners, made certain remarks in a recent sermon at which a lady smiled scornfully. The vicar walked down from his rostrum to the pew where the lady was seated, and, having given her a good shaking, returned to his place and finished his discourse.

A revised army estimate has been issued. The vote for the number of men of all ranks on the establishment of the regular army, exclusive of India, will be in 1881-82 134,060. In 1880-81 the number was 131,859. The vote shows an excess of 850 men above the numbers stated in the army estimates. The addition is required to provide for the reinforcements proceeding to Africa.

An anti-vaccination riot occurred recently at Brighton. The public vaccinator, whose duty it was prosecute a batch of persons who had refused to be vaccinated, was roughly handled on leaving the Police Court, to which the anti-vaccination party had accompanied their friends with a brass band and with flags flying. The person who had served the summons was likewise assaulted. Several rioters were arrested and fined, and one was sent for trial.

The Rajah of Rampoor appeared at Queen Victoria's recent levee in a curious costume—a compromise between the East and the West. While his extremities were encased in the black dress trousers and patent leather boots of what we term civilization, the upper part of his body was draped in rich Cashmere shawling, which hung about his shoulders in graceful festoons, while at the same time it formed a sort of Highland jacket fastened down the chest with gold button; his head-dress consisted of a plain gold forage-cap.

The River Bradford, a tributary of the Derwent, at Alport, Derbyshire, flows above a worked-out-mine. The village was terrified the other morning to find that the river had disappeared in the night. A vast chasm is left and down below at a great depth the waters can be seen. Fifty miners are employed in the task of attempting to fill up the chasm with rocks and trees, but up till the present everything cast into the chasm had been carried into the Derwent, where the stream still finds its way after flowing underground for several miles.

A dressmaker named Agnes Locke was summoned at Birmingham lately by John Armes for assault. Armes claimed to be the husband of the woman, and she had taken to herself another husband, and had turned him adrift, refusing to let him have his clothes. The woman said she had been deserted by her first husband, with whom she was now living, and, under the impression that he was dead, married the complainant; but finding out the whereabouts of her lawful spouse, she had turned her second husband out of doors, and taken her old love back again. Under these circumstances the summons was dismissed.

A serious accident happened lately to the industrial training-ship *Shaftesbury*, to which boys are sent to be instructed as sailors for mercantile marine. This ship by the immense pressure of the floating ice was torn from her mooring at Grays, on the Essex shore of the Thames, and carried up stream until she grounded and heeled over, and was in imminent danger of foundering. She had then on board 26 officers and 350 boys. Two tugs, however, went to her assistance, and all on board were taken off safely; but they had to undergo the rigor of a winter night, the severity of which is but very seldom felt in this climate.

The best receipt for going through life in a commendable way is to feel that everybody, no matter how rich or how poor, needs all the kindness they can get from others in the world. Let us remember this great truth, and commence with those around us. Let the poor and needy, and those who do not take the daily or weekly newspaper, be kindly informed, if in sickness, whether it be from coughs, lung diseases, asthma or consumption, that by the use of N. H. Downs' Vegetable Balsamic Elixir they can be cured. Keep not the good news to ourselves, but spread the sunshine of hope around.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes. which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a laboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents. Large bottles $1.00.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

Daily Intelligencer.

BELLEVILLE, MONDAY, APRIL 4.

East Northumberland.

The *Globe* is peculiarly jubilant over the victory in East Northumberland, at which we are not at all surprised, considering that it was the first ray of hope for its party since the elections in 1878. The *Globe* is very anxious to break the force of the position assumed by its party in raising the religious cry in this contest, and tries to cast the blame upon the shoulders of the Orangemen, in its remarks that it was "prepared to believe that part of Mr. "Crouter's majority was due to the un- "willingness of the Orangemen to follow the "lead of their Grand Masters. This is an attempt to convey an impression that the Orangemen are as narrow-minded and bigoted as the Grits who raised the howl. The best answer to this is to be found in the fact that all Catholics who have seats in the Commons of Canada represent Conservative constituencies, while on the other hand, the Grits did not elect a man of that faith in Ontario, from the fact that they never gave one of them a nomination except in a constituency which they were certain to lose. This is a fact which it would be well for the *Irish Canadian* to bear in mind when it next pretends to support a candidate, and at the same time denounces those who try honestly to elect him.

Let us notice the reasoning of the *Globe* and the deductions it draws from the polling in East Northumberland. It says:—"The fact that Mr. Kennedy ran as a "Roman Catholic converted a majority of 6 "against Mr. Keeler in Percy and Hast- "ings in 1878 into a majority of 163 for "Mr. Kennedy last week, a Liberal loss of "169. The Murray Canal question re- "duced a majority of 96 against Mr. Keel- "er in Murray Township in 1878 to a "majority of 7 against Mr. Kennedy, a "Liberal loss of 89. The majority there- "fore, for Mr. Crouter should have been "on a square issue, and would no doubt "have been at any other than a bye elec- "tion, at least 300, making every allow- "ance for Orange repugnance to a Roman "Catholic candidate." If these facts mean anything, and if there is any argument in the figures given, the only deduction that can be drawn from them is that politics did not enter into the contest at all. Let us look at the facts as they stand, and we find that in 1878 Murray gave Mr. Biggar a large majority, Mr. Biggar being a resident of that township. At the same election, Colborne and Cramahe gave Mr. Keeler a respectable majority, it being the township in which he lived at the last election. Those municipalities gave Mr. Crouter a respectable majority, thus reversing the vote. In 1878, Percy, Hastings, and Warkworth gave a small majority against Mr. Keeler. At the election just closed these municipalities gave a sweeping majority for Mr. Kennedy, he living and doing business at Warkworth. Brighton and the townships adjoining, at the election in 1878, gave a small majority to Mr. Biggar, but at the election just closed, Mr. Crouter received 186 majority in the township and some 48 in the village, it being the section of country in which Mr. Crouter lives. So that we find that at each election the locality in which the candidate lived gave large majorities in favor of what is termed the "home man." But, says the *Globe*, if it had been a "square issue," Mr. Crouter's majority would have been at least 300. Let us reverse this reasoning, and say that had Colborne and Cramahe remained true to their vote of 1878, and not been swayed by prejudice, and Seymour cast the same vote for Kennedy that it did for Keeler —and had Brighton, etc., not been swayed by local considerations, the Conservative majority would have been from 400 to 500. All this kind of reasoning is absurd. There was but one reason for Mr. Kennedy's defeat, and that was the howl raised by the Grit party against the man and the creed he professed. Even this is shamelessly blazoned forth in the extract given above, when the *Globe* says, "Mr. Kennedy ran as a Roman Catholic." This is not correct. Mr. Kennedy defined his position boldly and honestly as a supporter of the Government of which Sir John was the head, declaring himself to have been a supporter of that gentleman for the past thirty years, and as such he asked support. It was the Grits who raised the religious cry, and not Mr. Kennedy. It is, therefore, a slander on the part of the *Globe* to say that he ran as a Roman Catholic, or that he was supported on that ground, while it is true that the Grit candidate declared that it was a contest between Roman Catholicism and Protestantism, and not a political one. This, with the *aid* rendered by the *Irish Canadian*, succeeded in electing Mr. Crouter. No matter how much the *Globe* and its echoists may attempt to cover up their old tactics, these are facts which cannot be controverted.

'THEY ALL DO IT.'—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

The Revenue.

The *Mail* says:—The revenue continues to exhibit an agreeable expansion. The returns for March are as follows:

	1880.	1881.
Customs	$1,423,054 98	$1,619,340 15
Excise	380,347 12	385,992 55
Other sources	282,627 01	400,854 04
Total	$2,086,029 11	$2,406,186 74
Increase in March		$320,157 63

This cannot be otherwise than satisfactory to the Ministry. The anticipations of a handsome surplus will probably be more than realized. The account stands at present as follows for the year so far as it has elapsed:

Estimated revenue	$25,517,000
Receipts for nine months	20,991,074

Of course the last three months have been comparatively dull months, and the best quarter of the year is yet to come. The increases over the same months in the previous year is as follows:

Months.	*Increase.*
July	$509,541
August	837,799
September	693,165
October	448,945
November	480,607
December	467,992
January	600,993
February	394,217
March	320,157

Of course we may expect that April, May, and June will give more than the average revenue of the other months. The Finance Minister's revised estimates for the current year are as follows:

Revised estimate of receipts	$27,586,000
Revised estimate of expenditure	25,573,394
Revised estimate of surplus	2,012,606

Figures like the above go a long way in consoling a Government for the loss of two seats, out of a majority of nearly ninety members.

To the Editor of the Intelligencer.

SIR,—I find a short paragraph in the *Ontario* of the 1st April, in which the editor says that "a voter," who was "jolly" over the Northumberland election, only "indulged in a joke," when he in his letter of the 29th ult. accused the Returning Officer, who took Mr. Cochrane's vote, of having violated his oath of office, and then seriously and solemnly called upon the Roman Catholics of the riding to remember him should he ever present himself to the electors again.

Fear of a criminal prosecution, I fancy, has compelled the editor to try to turn the serious crime of traducing honest men's characters into a "joke." It is very much like the thief who stole an article and carried it some miles away from the owner, he found he had carried the joke too far.

This is another illustration of Grit tactics. No act is too base, nor is any character too sacred for calumny when a Grit has a political object to attain, and nothing but the severest punishment will prevent its continuance.

Yours truly,

ARGUS.

Trenton, April 2nd, 1881.

To the Editor of the Intelligencer.

SIR,—In the report of the meeting of the Finance Committee in your issue of Saturday, it is stated that my petition for remission of $3.65 taxes was "not entertained."

As my petition was for what I consider merely an act of simple justice, and not the evasion of payment of any taxes which the City has a just right to claim from me, I desire to submit the grounds on which that petition was based:

1. The premises occupied by Holden & Anderson as law offices were fully assessed—but only in the name of my partner, Mr. Holden —and all the taxes were paid by the firm.
2. I neither owned nor occupied any other premises whatever in Ketcheson Ward at that time.
3. The City claims $3.65 taxes on premises as occupied by me in Ketcheson Ward.
4. I am in this way deprived of a vote on property on which I pay taxes and forced to pay taxes on property I never owned nor occupied, and which is insufficient to entitle me to a vote in that ward on that assessment.

These facts were before that Finance Committee, whose severely economical views make the Corporation take $3.65 out of my pocket for no value with one hand, while with the other taxes justly due on property that is *not* imaginary are being affably returned.

Yours truly,

P. J. M. ANDERSON.

April 4, '81.

Black Mail.

A FACSIMILE COPY OF LETTER.

The Kingston *News* says: As was announced in the *News* a few days ago, a system of black mailing is being carried on in the city. Our reporter received a copy of one of a dozen letters now in the hands of a city lawyer, whose advice has been asked in the matter. It is as follows:

To MR—

KINGSTON, 27th March.

SIR,—I am informed you was spreading reports round town against my character and the good name of my house which have given me great troubel and has tended to hurt my reputation with manny of my friends; in consekence of your vile language about me my landlord has given me notice to quit his house; now sir I want you to know I demand from you some satisfaction for the injury done me; you know well I would never would have let you visit me only you told me you was a single man and ment matrymoney; but I now see you was only a snak in the grass all the time; fifty dolers will not cover my damage; so if you wish to setel with my layer Mr——you can do so by payin him 50$ and cost at onset; if you dont I will expose you to your family in Coort; I mean bizness and to clear my charracter.

YOU KNOW WHO THIS IS FROM SO NO NAME.

A BOLD MOVEMENT.—The Legislature of Wisconsin has adopted a very bold method of dealing with the liquor question. A bill has been carried through that body and signed by the Governor, which provides that any person who shall hereafter ask another to drink at his expense, or any person consenting to drink at another's expense, shall be liable to arrest and punishment.

WIMBLEDON.—The following compose the Wimbledon team for the current year:—Sergeant T. Mitchell, 10th Battalion; Major Macpherson, Governor's Foot Guards; Private C. N. Mitchell, 10 Battalion; Captain Thomas, 54th Battalion; Captain Balfour, 8th Royal Rifles; Lieutenant Ewan, 35th Battalion; Sergeant D. Mitchell, 13th Battalion; T. W. Mitchell, 32nd Battalion; Private A. Nelson, 53rd Battalion; Staff Sergeant Walker, Queen's Own Rifles; Private Anderson, Governor's Foot Guards; Sergeant Weyman, 8th Cavalry; Captain Weston, 66th Battalion; Color-Sergeant Hencock, 13th Battalion; Sergeant Sutherland, Governor's Foot Guards; Private Walker, Wakefield Infantry; Color Staff Sergeant Saucier, 18th Battalion; Sergeant Payne, 13th Battalion; Quarter-Master Corbeil, 63rd Battalion; Private Bradley, 25th Battalion.

—Lorenzo A. Pickles, of Rochester, N. Y., has reached his 70th year, but he looks only 40. He claims that salt is the secret of his good health. He lives on salt pork, salt fish, and vegetables well salted. He uses salt instead of sugar in his tea. Besides this he eats several tablespoonsful of clear salt every day. It will be seen from this that the old man is far from being too fresh. He never tasted pie or cake in his life, and that at least shows Mr. Pickle's good sense. It is generally supposed that vinegar is necessary for the preservation of Pickles, but in this instance the preserver seems to be salt.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

News Condensed.

—Hon. O. Mowat will sail for Europe early in May.

—Kingston Assizes open to-day, Judge Osler presiding.

—England has $550,000,000 invested in American railway securities.

—The crossing between Bath and Amherst Island is still reported as good.

—The Allan mail steamer *Caspian* arrived at Halifax at 3:30 a m. yesterday.

—The schooner *Marcia Hall* has arrived at Toronto from Oswego with coal.

—Hon A. Mackenzie and Mrs. Mackenzie will sail for Europe early in May.

—A banquet is to be given Hon. Mr. Langevin at Quebec on the 3rd of May.

—On the 2nd inst Geo. Quinn was killed at Hull by being run over by a train.

—In one family in Newburg there are seven children sick with the measles.

—The Canadian Pacific telegraph line has worked successfully for the past five months.

—Large quantities of sulphur flour fell in a snow-storm at Saluda Township, Ind., on the 31st.

—On the 2nd inst. the hotels of Messrs. Legers and Lespera co, at Vaudreuil station were burned.

—The number of deaths in Montreal during February, were 77 less than in the same month in 1880.

—Over 60,000 bushels of wheat were shipped from Hamilton Wednesday per G. W. R. for Liverpool.

—The Prince Edward Mutual Fire Insurance Company, head office at Picton, has gone into liquidation.

—The plasterers and bricklayers of Toronto now get $2.50 per day, having succeeded in obtaining their demands.

—Among the pensioners paid in Ottawa on the 1st inst, was a Waterloo veteran named Short, who is 101 years of age.

—Five hundred negroes have left Huntington, Tenn., since Tuesday for Kansas; one thousand more will go in May.

—De Lesseps has obtained a concession from Egypt for a fresh-water canal and a railway from Ismalia to Port Said.

—The Crown Prince Rudolph of Austria and the Princess Stephanie of Belgium are to be married on the 10th of May.

—A bomb was exploded yesterday under the windows of the palace of the Duke of Santona without injuring anyone.

—The pay-roll of the Stormont Cotton Company, when the extension of the mill is completed, will embrace about 700 names.

—Mr. C. Merrimen, near Elgin, Leeds, tapped 1,100 trees this spring, and has sold 1,500 lbs. of sugar at Kingston, besides contracting for 1,000 lbs. more.

—The Canadian Engine Works Company, at Kingston, on the 2nd completed arrangements with the Credit Valley Railway for the manufacture of eight engines.

—The Northampton election is fixed for Saturday next. Mr. Bradlaugh will have an orthodox opponent (Rev. Henry Varley), and a Conservative opponent will also be put up.

—The Montreal *Herald* says there is a rumor current of the failure of a prominent Ontario cattle shipper in whose operations the Federal Bank is reported to be largely interested.

—Mr. Stickney, Superintendent of the Canada Pacific Railway, is expected in Ottawa to-day on business connected with the transfer of the finished portion of the line to the Syndicate.

—The Kingston & Pembroke R. R. Company are increasing their rolling stock, and the company have contracted with one lumberman for carrying one thousand carloads of square pine timber.

—On the 2nd inst., Angus Raymond, in getting off the train at Ernestown while it was yet in motion, fell between the train and the station platform, was dragged some distance and seriously injured.

—The Rev. John Bridge, of Liverpool, is expected to arrive shortly with a party of English immigrants, who will settle in Southern Manitoba. Lands have been chosen for them in the Turtle Mountain District.

—The New York *World* says when the *Globe's* whiskey-hunting commissioners return from their mission to the "Prohibition" States the chances are they will be seized on by the temperance crusaders as "dreadful examples."

—On the 1st inst., Francis Charon, Kingston, cut off a portion of his tongue and nearly bled to death. His only reason for committing the act was that he talked too much, and was always getting himself into trouble.

—The report of Prof. Cherriman, Superintendent of Insurance, now in course of preparation, will show the net cash received for fire premiums by Canadian companies in 1880 amounted to $1,203,872, being in excess of the previous year.

—Mr. Pew, representing James McLaren & Co., has returned from New York, where he succeeded in organising companies to work the silver mine on Pie Island, Lake Superior, and the Placer gold mine at the Chaudiere, Province of Quebec gold fields.

—An Order in Council dated 1st April directs that the waters of Puslinch Lake, in the township of Puslinch, County of Wellington, Ontario, be set apart for the natural and artificial propagation of fish during the space of three years from 1st May, 1881.

—The Kingston *Whig* says: A fire occurred at Delta on Thursday morning, by which the oldest couple of the township were turned up on the street. Mr. Robinson is 91 years of age, having fought under Wellington at Waterloo. His wife is about 95 and very feeble.

—The steamship *European* is loading 755 head of cattle at Richmond depot, Halifax, shipped by Elliott, Wiliams and Goodfellow, of Kingston, and J. & C. Coughlin of London, Ont., and sails to-morrow for Liverpool. This is the largest shipment of cattle yet made from any port in Canada.

—A private despatch received at Winnipeg from Battleford states that the water in the Saskatchewan is rising rapidly, and the ice is moving fast. Wild ducks and wild geese have made their appearance on the plains, and herds of buffalo are roaming in great numbers in the vicinity of the Red Deer river.

—The Messrs. Currie, hardware dealers, Montreal, have made an offer of settlement with their creditors on the basis of fifty cents in the dollar cash, and in addition 5 cents in two years, and 5 cents in three years unsecured dating from May 1st. The deed of settlement has already been signed by a number of influential creditors.

—At Saginaw, lumber freights are expected to be much better than last season. There are 250,000,000 feet of lumber on the docks, a large portion of which is sold, to go forward, and should the season open late there will be a pressure for capacity to meet the requirements of the business. It is thought that freights will not open less than $3.25 to Buffalo.

—A Montreal despatch says: It was feared a few days since that the Tunnel Company would not strike rock upon the land side of the proposed line, but at the depth of 28 feet yesterday rock was encountered in such a position as to lead to the belief that the whole bed of the river is underlain with a stratum of rock which answers admirably for tunnelling purposes.

—One hundred pounds sterling is what intending emigrants for Manitoba should possess when they arrive at the nearest point of settlement to their location. This at least is the amount of money which the *Winnipeg Times* thinks is necessary. Oxen, cart, seed, implements and all the necessary, in fact indispensable, articles for the commencement of farming and for provisions, cost nearly the whole of this sum.

—A Quebec despatch says: A curious monster was seen by the captain and crew of a schooner crossing the St. Lawrence between Murray Bay and Kamouraska. The apparent length of the monster was fifty feet, with long fins upon the back and the head resembling those of a shark. It raised itself out of the water a short distance from the schooner, and floundering upon its surface, caused it to boil for some hundreds of feet around it.

SPRING OPENING.

WEDNESDAY, THE 6TH OF APRIL.

ON Wednesday, the 6th APRIL, we will be prepared to show the latest styles in London and Paris pattern Millinery and Mantles, with a complete stock of Hats, Bonnets, Ostrich Feathers, French Flowers, Ornaments, &c.

Our customers may expect really the finest and most extensive display we have yet made in this department. All being of our own importing, the styles will not only be the latest out, but the prices very moderate.

GEO. RITCHIE & CO.

P. S.—The untrimmed Hats and Bonnets, also Feathers, Flowers and Trimmings, are now opened out and ready for inspection at any time.

G. R. & CO

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—— ——and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

RECEPTION!

—OF THE—

RIGHT REV. DR. CLEARY,

BISHOP OF KINGSTON.

A SPECIAL TRAIN!

will leave the Belleville station immediately after the departure of the "noon train" on

THURSDAY, APRIL 7th.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in Warner's Blood Purifier are combined the three qualities of Simplicity, Safety and Success. A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels. and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Mark—Warner's Blood Purifier.
Sold at all druggists'.
Price 50 cents per bottle. d&wtf

COSTELLO'S

SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York

Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

TESTIMONIALS TO

MITCHELL'S CANADIAN

HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.

Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

PREPARED ONLY BY W. H. MITCHELL, HAIR DRESSER

BELLEVILLE, ONT.,

And Sold by all Druggists.

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville. 316d21t-8w1t.

Wanted,

A YOUNG Man to read for two or three hours daily to a Phonographer. One who would be willing to take instructions in the art as remuneration preferred. Apply by letter to P. O. Box 39

Would also like to correspond in corresponding style with Lady or Gentleman, with a view to mutual improvement. 310tf

MANHOOD RESTORED.

A victim of early imprudence, causing nervous debility, premature decay, etc., having tried in vain every known remedy, has discovered a simple means of self-cure, which he will send free to his fellow sufferers. Address J. H. REEVES, 3 Chatham St. New York. 135eod&w1y

JAS. MACOUN,
Chairman Building Committee.

Belleville, March 29, 1881. dtd

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallible cure, it was used for similar diseases to great advantage until the list of those eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

BLACK CASHMERES.

SPECIAL VALUE offered in these Goods.

We have a Black Cashmere over one and a quarter yards wide **at 65 cents** per yard, that cannot be equalled in the city, and another 38 inches wide **at 52½ cents**, which is equal to what is usually sold at 75c.

We have also **Union Cashmeres** and BLACK PERSIAN CORDS very cheap.

We have just received a large assortment of

Spring Dress Materials,

in the latest styles, to which we invite the attention of the Ladies; and we have still 2 pieces of our celebrated **$1.29 Black Silk**, the best value in the market. It cannot be equalled under $1.75 to $2.00 per yard.

GLASGOW WAREHOUSE.

N. B.—We trust our customers will remember that our terms are *cash*, and *will not ask us for credit*. By strictly adhering to our terms, we can sell goods much cheaper than if we did a credit business.

Local Notices.

Notices under this head 5cts. a line each insertion. After six insertions 5 cts. a line.

Dr. Williams, Proprietor of the Detroit Throat and Lung Institute, and joint partner with Dr. Nash (who is resident physician of their branch office, Dafoe House, Belleville) will arrive in this City on Wednesday evening of this week and will remain the balance of the week in consultation with Dr. Nash on all the various diseases of the Head, Throat and Chest, including the Eye, Ear and Heart. See their advertisement in another column of our paper.

Daily Intelligencer.

BELLEVILLE, MONDAY, APRIL 4.

5 O'CLOCK EDITION.

City and Vicinity.

JUDGE JELLETT, of Picton, is in town.

THE water in the river is falling rapidly.

COL. A. A. STEVENSON, of Montreal, was in the city to-day.

HON. MR. BOWELL passed east on the noon train to-day.

THE yacht *Dauntless* is now clear of the ice, but there is a good deal of water in her.

WORK was commenced in Messrs. Flint & Holton's saw mill on Thursday afternoon last.

THE ice in the curling rink is now in fair condition. It is rarely so good at this time of year.

MR. G. E. HENDERSON, Belleville, will conduct the business of the Crown at Kingston.

THE cells were occupied by four prisoners and a tramp on Saturday night, and by two prisoners last night.

MR. W. H. KETCHESON has made about 400 pounds of maple sugar and a considerable quantity of molasses.

THE evangelical meeting at Bethel Hall on Saturday evening was well attended. These meetings are growing in interest.

THE promoters of the Napanee, Tamworth and Quebec Railway are taking steps to secure the right of way between Napanee and Tamworth.

THE taking of the census begins to-day. Ladies, there is no help for it: you will have to give your real ages, when called upon to do so.

THE City Council meets this evening. Several of the Aldermen have secured seats for the Litta concert, so that it is by no means certain that there will be a quorum.

MR JOHN H. ROBINSON, who has recently been appointed General Agent of the Ontario Mutual Insurance Association for the districts of Kingston and east, leaves town to-night for Kingston.

"PROBS" was altogether wrong as to yesterday's weather. Instead of the wind shifting to south and higher temperature succeeding, the wind continued north-west and the temperature was quite as low as on Saturday.

DESPITE the coldness of the weather, the ice in the river is yielding rapidly. The channel is now open to a point just east of the Grand Junction wharf, and the area of open water is extending rapidly. Except near Ferry Point, where there is a small opening, there is no open water elsewhere visible.

Two boys were on Saturday night discovered in the club room at the curling rink, where they had lighted a fire and made themselves comfortable for the night. They were discovered by Chief McKinnon, who questioned them and directed them to the police station, to which the youths promised to go for their night's lodging—but they did not do so.

WEATHER PROBABILITIES. — Toronto, April 4.—Lakes, moderate to fresh westerly to northerly winds, fine continued cold weather.

ORE SHIPMENTS.—General Spencer Munson made to-day his first shipment of iron ore this year. The amount shipped was seven car-loads, and it was consigned to Cleveland, Brown & Co., Youngstown, O.

PERSONAL.—Dr. Williams, of Detroit, will be in personal attendance at his Branch Office of the Detroit Lung and Throat Institute, at the Dafoe House Belleville, with Dr. Nash his partner, on Thursday and Friday April 7th and 8th. Therefore all who so desire, had better call at the office on those days. Consultation free.

PROSPECTING.—The Kingston *News* says: —"Recently Mr. Pringle, sr., of Pringle & Sons, Belleville, was in the city looking for a site upon which to erect a branch of his door and sash factory now in operation at Belleville. He left for home favorably impressed, and it is probable, if nothing transpires in the meantime to prevent it, the branch will be located here."

A LATE SPRING.—Mr. Geo. Boulter says that he remembers well that in 1838 the trees did not begin to get green until early in June. He remembers that particular year so well for the reason that it was just about the time the trees were budding that the volunteers returned home from active service in the Rebellion. People should remember this when they are inclined to grumble over the backwardness of spring.

THE LITTA COMPANY.—On Saturday evening M'lle Litta and her company gave a concert in Cobourg. The house was packed, many persons from Port Hope, who had already heard the company there, being present. The performance was most enthusiastically received, nearly every number being encored. Those who attend the concert this evening will undoubtedly enjoy a rare musical treat. A number of good seats are yet untaken.

ACCIDENT.—Last evening Mr. Peter Macdougall, of 2nd concession of Thurlow, met with a severe accident. He was driving home from the city, and a little beyond the G. T. R. station his horses took fright, ran away, and threw him out of the buggy. He fell to the ground with such force as to break his left arm; but he did not relinquish his hold on the reins, and after being dragged a considerable distance he succeeded in stopping the horses. He came back to the city, had the broken arm set by Dr. Curlett, and is now doing well.

HORSE BUYING.—Mr. James Hastings, of New York, has been in town for three or four days past, engaged in buying horses for the New York market. He has already purchased six fine animals, having paid good prices for them. When he has obtained seven or eight more—enough to make a car load—he will ship them. Mr. Hastings deprecates what he considers the unsightly custom of "square-cutting" the tails of horses, which prevails here. The price of a horse with its tail so trimmed would, he says, in the New York market, be greatly lowered on that account.

UMBRELLA FLIRTATION.—The following from an exchange hits the mark every time:—"To place your umbrella in a rack indicates that it is about to change owners. An umbrella carried over the woman, the man getting nothing but the drippings of the rain, signifies courtship. When the man has the umbrella and the woman the drippings it indicates marriage. To carry it at right angles under your arm signifies that an eye is to be lost by the man who follows you. To put a cotton umbrella by the side of a nice silk one signifies 'exchange is no robbery.' To lend an umbrella indicates 'I am a fool.' To carry an open umbrella just high enough to tear out men's eyes and knock off men's hats signifies 'I am a woman'"

THE PROPOSED INTERNATIONAL YACHT RACE.—A well informed correspondent in New York, who has been interesting himself in the proposed race for the *America* cup, writes:—"There is something of a scare here about Cuthbert's sloop, and our people are anxious to hold all the advantages they can, as they seem to think there will be need of it." Evidently our clever cousins at New York do not regard the defeat of the *Countess of Dufferin* by the *Madeleine* as conclusive of their superiority and have a strong regard for the abilities of Capt. Cuthbert. They are wise in holding the Canadian builder in high estimation, as they will find that the fault which was in the model of the *Countess* has not been repeated in that of the *Atlanta*, which embodies the experience thus gained and the result of long and careful study besides.

POLICE COURT.—At the Police Court this morning James Lowry, Wm. Smith and Austin French were charged with drunkenness. Lowry was fined $2.00 and the others were discharged. William Campbell, a vagrant, was sent up for three months. Two small boys were charged with breaking window-panes in a house owned by Mr. J. G. Robinson. They were dismissed with a caution, the Magistrate declaring that hereafter any boy convicted of a similar offence would be either sent to gaol or to the Reformatory. Selim Pettit brought a charge of abusive language against Allan Frederick. The specific charge was that Frederick had called him a liar, but an immense number of charges and counter-charges were brought and whole buck-basketsful of dirty linen were exposed in Court. The case was adjourned for a week.

THE ILLUSTRATED SCIENTIFIC NEWS.—The April number of this interesting and popular magazine is just out. Among the various subjects illustrated in this number is an engraving of the late Emperor of Russia's steam yacht *Livadia*; a series of views illustrating wood working attachments for foot lathes; Prof. Secchi's solar photographic apparatus, with six distinct views of the sun taken by this instrument; engravings of the boats and apparatus used on Lake Geneva for determining the velocity of sound in water; a new machine for decorating enameled surfaces; engravings of several curious animals and objects in natural history, and an elaborately illustrated article on Bee Culture. Every number contains thirty-two pages, full of engravings of novelties in science and the useful arts. Published by Munn & Co., 37 Park Row, New York, at $1.50 a year, and sold by all newsdealers.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

Opening and Closing of Navigation at Belleville.

Mr. Watters, Harbor Master, furnishes the following statement of the opening and closing of navigation at this port for the years named:

Closing.	Ferry began.	First arrival.

Spring Poetry.

To the Editor of the Intelligencer.

DEAR SIR

You seam to work up bisnes snug
I will give you a skeatch on those little frogs
As for the spring we nothing to say
Till those little froggeys come out of the Clay

Then at once their band will play
Spring time is come gentle Annie
One of the finest tunes of those days
So says your Poet James Gay

Belleville, Ontario

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

A country doctor writes: "I am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

MORNING DESPATCHES

EUROPEAN.

SPANISH AFFAIRS—TERRIBLE FLOODS.

MADRID, April 4.—Castellar says he formally intends to advocate universal suffrage and every reform of the revolution of 1869, and will never accept office under the restoration.

In the Provinces south of Madrid, immense destruction of property, cattle and crops, by floods is reported.

A despatch from Seville says: Sixty miles of the valley is flooded. It is impossible to relieve the villages, even in Seville it is difficult to assist the people.

STORM ON THE THAMES—BOATS AND LIVES LOST.

LONDON, April 4.—A violent squall prevailed yesterday. A number of pleasure boats were on the Thames and it is feared are lost. Eight failed to return and it is thought sixteen lives were lost. Four bodies were washed ashore.

A FATAL AFFRAY.

LONDON, April 2.—An affray has occurred between the people and the police, who were protecting a process server on an estate near Ballingbardin, in County Mayo. Two men were killed and many wounded.

The details of the riot at Ballingbardin on Saturday are as follows: The people attacked the police, who were obliged to fire in self-defence. Two of the rioters were killed and thirty-two wounded, four so badly that they are not expected to live. One policeman was killed and several were severely injured by stones.

WHOLESALE EVICTIONS,

LONDON, April 3.—Reports from Ballina state that a large number of evictions have taken place on the property of a Galway gentleman in the last few days. Some of the scenes were pitiable in the extreme. Over one hundred police accompanied the bailiffs and sub-sheriff in two townlands, where thirteen families were put out. Many of these families were very destitute. Only two of them were allowed to return, one as caretaker and the other after paying the rent. The Parish Priest did all he could to relieve the wretched people, who had probably refused or been unable to pay rent for some years. In every case the evicted tenants carried away the doors of the houses. The Sheriff's assistant had to build up the place with stones. The latter obtained possession peaceably. It is however stated, that it would be impossible for anybody to live in these buildings, even at a much lower rent than had been put upon those evicted. The district is very barren. The police are engaged almost every day in evicting and process serving. The master of the Kildare hounds issued a notice in consequence of the hounds having been poisoned in different parts of the country, that the pack would not hunt any more this season. A large number of processes for rent and ejectment had been served on the estates of Gup Lloyd, Justice of the Peace of Croghan, and will be heard at the ensuing Quarter Sessions, when nearly 1,000 processes for rent will be heard. Upwards of 350 civil bills, writs, and ejectments for rent have been issued on the estate of Colonel King Harman, M. P, for Sligo. The majority of the tenants have resolved to hold out against the present rents until ejected. It is stated that the coming evictions were discussed at the last Cabinet Council, together with a possible outbreak.

MASSACRE OF AN ALGERIAN EXPLORATION PARTY.

An Algiers despatch says four natives belonging to Colonel Flatters' mission of exploration for the trans-Sahara railway arrived at Ouargla on Monday last, bringing details of the almost complete annihilation of the expedition by natives. The natives report that the expedition was surprised by a tribe when four day's march from Haixer, south of Assimu, and Colonel Flatters and nearly all the members of the expedition were killed. One member named Dianons with a subordinate officer named Polequin and sixty-one men escaped, but they were subsequently overtaken by another tribe, who declared they had no share in the massacre. The tribes offered the fugitives some dates, but the fruit was poisoned, and Dianons and twenty-eight men died after partaking of them. Polequin with thirty men continued the retreat, but when four days march south of Messenquen they were surrounded by hostile tribes. Polequen then despatched these four natives to Quargla. On their arrival succor was immediately despatched to the remnant of the expedition. Little hope however is entertained of their relief, as when the messengers left they were closely beset and poorly supplied with food and ammunition.

AMERICAN.

MORMON CONFERENCE.

SALT LAKE CITY, April 4.—Thirteen thousand were in the Tabernacle yesterday. Gonner declared that the Mormons were loyal. The 51st annual conference was attended by delegates from Idaho, Nevada, Arizona, and Colorado, Wyoming, and every town in Utah.

CRIMINAL CARELESSNESS.

FERGUS FALLS, Minn., April 4.—The coroner's jury found that the collision on the St. Paul, Minn. and Manitoba R.R. on Thursday, was due to the criminal carelessness of conductor Galvin, of the freight train. The evidence disclosed that Galvin went to the steps instead of having the ordinary signals put out to warn of the approaching passenger train. Galvin was arrested.

HUNG HIMSELF.

NEW YORK, April 4.—Chas. Tallinson, wholesale grocer, of Trenton, hung himself yesterday. Cause unknown.

STORMY PASSAGE,

The British bark *Queen* arrived from London yesterday and reports a very stormy passage. One sailor fell overboard and was drowned, and another fell from the rigging and was killed,

POLITICAL CONFERENCE.

The *Times* says the rumor of a political conference between Arthur, Platt, James and Cornell is unfounded. The meeting of so many prominent Republicans in the city was purely accidental. Arthur, Platt, and James started for Washington last night.

ROBBED AND MURDERED.

GREENFIELD, O., April 4.—The mangled body of Jno. Barenburg, a wealthy man who lived alone, was found yesterday under the feet of a horse in his stable. An examination disclosed that he had been dead 24 hours and marks of a sharp instrument on his head. It is suspected that he was murdered and robbed and then thrown into the stall.

FROM BROCKVILLE.

SAD DROWNING ACCIDENT.

Two Lives Lost.

Another Severely Injured.

BROCKVILLE, April 4th, 1881.

Early this morning W. Fraser, barber, Arthur Wright, a cornet player in the Brockville Band, and a young man from Maitland, brother of Mrs. Fraser, went up the river in a skiff duck shooting. It apears the boat was capsized, and Wright and the young man from Maitland were drowned. Fraser was found clinging to the boat and now lies in an insensible condition at the residence of Mr. Wilson, three or four miles west of here.

BROCKVILLE, April 4, 11 a.m.—The bodies of Wright and the young man from near Maitland have just been recovered about 75 feet from shore. Fraser is some better, but is still unable to give an account of the accident. The ice cut the bow of the boat. Fraser would have undoubtedly been drowned if his arm had not frozen to the boat. He was rescued by Mr. Wilson, druggist, who heard his cries.

After trying many medicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

AFTERNOON DISPATCHES.

SERIOUS EARTHQUAKE—MANY LIVES LOST.

CONSTANTINOPLE, April 4.—A strong shock of earthquake at Chivin, an island of that name, occurred yesterday; it destroyed many houses, and seriously damaged nearly all the remainder. Many of the inhabitants were killed, and the remainder encamped in the fields. Many neighboring villages are destroyed. During the panic the Eastern telegraph Co.'s office was pillaged. Shocks were felt on the island of Syria.

BOATS WRECKED ON THE THAMES.

LONDON, April 4.—During the high wind on Saturday, two 8 oared boats were capsized on the Thames off Chiswick, and 6 persons drowned. It is feared that others have perished.

AN AUTHORESS DEAD.

Mrs. D. H. Burton, authoress of the novels of Jennie and Princess, and other popular works of fiction, is dead.

ARREST UNDER COERCION ACT.

George Marshall, recently charged with robbery of arms, was arrested last night near Tralee, Ireland, under the provisions of the Coercion Act.

DILLON INVOKING CURSES.

Dillon, in a speech at Clough yesterday, in alluding to an affray at Claghan on Saturday, said that four innocent men had been murdered by Menials of the English law. He hoped the blood and curse of their children might rest on the heads of Gladstone and Forster.

THE EASTERN QUESTION.

LONDON, April 4.—It is understood the Cabinet Council on Saturday discussed the precise language in which its acceptance of the Turkish proposal to Greece is to be conveyed. It is reported the decision taken by Gladstone and his colleagues has been arrived at by the Powers, and it is anticipated that in the course of a week the international document, which will have all force of identical note, will be presented to Greece.

SENATE OFFICERS.

WASHINGTON, April 4.—A Republican caucus this morning decided to support the effort to procure the passage of a pending resolution for the immediate election of Senate officers by adhering persistently to the policy and programme heretofore pursued.

WASHINGTON, April 4.—Indications: Lower Lakes, partly cloudy, areas of snow to-morrow, warmer, fair.

The Census.

EAST NORTHUMBERLAND.

The following are the Divisions and the names of the Enumerators for Census District No. 123, East Northumberland, Mr. Wm. Kelly, Commissioner:

TOWNSHIP OF CRAMAHE.

1st division, Mr. Andrew Coffeen; 2nd division, J. M. Doyle; 3rd division, Geddis Duncan; Colborne village, N D. Snetsinger.

TOWNSHIP OF PERCY.

1st division, I. H. Platt; 2nd division, A. S. Platt; 3rd division, George H. Boyce.

TOWNSHIP OF SEYMOUR.

1st Division, Richard Bonnycastle; 2nd division, Stewart Cock; 3rd division, James Donald; village of Campbellford, William Morton; village of Hastings, Joseph Kemp.

TOWNSHIP OF BRIGHTON.

1st division, W.H. Smith; 2nd division, J. H. Morrow; 3rd division, John A. Robinson; Brighton village, J. M. Wellington.

TOWNSHIP OF MURRAY.

1st division, J. W. Thompson; 2nd division Albert Wessells; 3rd division, Wm. Litte.

—One hundred carloads of hop poles are being shipped to the States from along the line of the St. Lawrence and Ottawa railway.

—Freights at Cobourg will be $1.25 on lumber to Oswego and 2½ cents on grain to Kingston. There will probably be a large amount of iron ore shipped thence this summer.

—The investigation into the circumstances connected with the murder of the Czar has led to the arrest of a Nihilist named Kibaltschitsch, the son of a priest, who, it is said, has made a confession that his was the hand that threw the fatal bomb.

—The Hull *Despatch*, speaking of the lumber trade, estimates the cut of logs in the Ottawa district at 1,200,000, or an increase of thirty-three and a third per-cent on last year's operations. The cut of square timber last year was only 2,000,000 feet. This year it will probably be 12,000,000 ft.

—The shipment of 765 head of cattle in the SS. *European* from Halifax by Ontario dealers, is said to be the largest ever made in one steamer this side of the Atlantic. The cattle will not be insured. The *European* will make four trips from Quebec and Montreal during the summer, taking 700 or 800 head each trip.

—Mr. Blake may rail as he will against the protection of the Canadian sugar industry; but so long as the poor man, "or any other man," can get a bright, refined sugar from Montreal at 11 pounds for the dollar, as he now does, he is not likely to complain. It is a common remark that not in many years has so good an article been sold for the money.

"Hail bounteous, beauteous, gladsome Spring" - this was Mark Twain's prize poem-but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopseas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1.00.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

"Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

BIRTHS.

In Sidney, on the 31st ult., the wife of George Cruikshank, of a son.

At Stirling, on the 21st ult., the wife of Martin Seeley, jr., of a son.

At Stirling, on the 29st ult., the wife of Omar Butler of a daughter.

MARRIED.

At the M. E. Parsonage, Frankford, on the 23rd ult., by Rev. A. Martin, MR. GEORGE DREWRY to MISS NANCY CAVERLEY, both of Rawdon,

By the same at the residence of the bride's father on the 30th ult. MR. WILLIAM WESLEY BIRD to MISS ANNAH, second daughter of Aaron Sine, all of Sidney.

Commercial.

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

By MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

Tessa, not feeling specially interested in the burly Squire's intentions, made no reply. Todhetly's apologies were amply justified by the condition of his drawing-room. The furniture, originally upholstered in red plush, was worn and threadbare, and was sufficiently dilapidated to be eligible for a furniture infirmary. The red curtains were faded and torn. The room was redeemed from utter forlornness only by a genial fire, and an air of perfect neatness.

They lingered in the drawing room only long enough for Tessa to remove her wrappings, and then went out to the breakfast room, where luncheon was served. Tessa was silent and thoughtful during the meal, as might be expected after the great change in her life, and seized the opportunity after the repast was over, of begging to be shown to her room.

Todhetly summoned his housekeeper, an elderly woman, who was servant as well as housekeeper, and introduced her as Mrs. Podd, and ordered her to show Miss Holm every attention during the young lady's stay at the Grange. Mrs. Podd, having been well drilled in her part beforehand and desiring to win the good-will of the supposed future mistress of the Grange, was all smiles and affability to Tessa, as she conducted her up stairs to a front chamber, which was fitted up as a lady's private sitting-room.

The bedroom opened from this room, and both apartments were neatly furnished, having been but little used since Todhetly came into possession of the Grange. There was a fire in each room, a necessary precaution against dampness, and the same scrupulous neatness distinguished these rooms as those below.

Tessa dismissed the housekeeper, who was disposed, with a little encouragement, to be garrulous, and sat down in any easy-chair before the fire. She felt still that vague sense of dread that had oppressed her before leaving Heathstead. She did not know whether to feel glad or sorry at the discovery of her father, and reproached herself for her hardheartedness in feeling no impulse of affection toward him.

"He has the manners and appearance of a gentlemen," she thought; "but I do not feel quite at ease with him. He looks to me like a man given to evil thoughts and evil deeds. I did not like his manner of speaking of my dead mother. I will not believe that she was bad. There can be no doubt that he is really my father. When I saw him yesterday, I felt that I had seen him before, or that he was in some strange way connected with me. He did not impress me as an utter stranger. My father! How strangely the words sound! He is my father, and I owe him my filial duty, if I cannot give him my love."

She arose presently, and searched a small writing-table between the windows for writing materials. Finding them, she wrote a letter to Reuben Dennis, informing him of her discovery of her father, and of her expectation to return to London soon in Captain Holm's company. She added a full account of her experience since leaving home, and many affectionate assurances that her father had by no means taken the place of her dear "Uncle Reuben" in her heart.

"I will not write to Mrs. Kiggs, she decided, after a little thought. "I am perfectly convinced that Captain Holm is my father, and her assurance to that effect would not make me more so."

Taking her letter in her hand she descended to the drawing-room, where Holm and Todhetly sat in close conversation. She gave her letter to her host, requesting to have it posted; and he rang the bell and dispatched a servant with it on the instant, exhibiting a zealous promptness to do her service.

He then wheeled a chair for her to the pleasantest window, and devoted himself to her entertainment. He brought for her inspection an old portfolio of drawings, which he found in a cabinet where they had lain for years, and said:

"I had, years ago, a fine talent for drawing, Miss Holm, and I do not believe, if my father had not such a horror at the very idea, I should have been an artist. He put me into the army in order to rid me of my foolish love of art, as he termed is, and he succeeded in his attempt. I have never put pencil to paper since those days of our sojourn in Lincolnshire—you remember, Holm!"

"Yes, I remember," said Capt. Holm, a shadow crossing his face.

Tessa turned over the drawings, which were very creditable. She had a fine talent for painting, and looked at these sketches with a keen interest and pleasure.

"I should like to copy some of these sketches in oil, or water colors," she said, continuing to examine them. "That is a spirited sketch of a windmill. That must have been drawn in the north country."

The next picture that interested her was a picturesque old stone house, with peaked gables and steep roof and an old little belfry. Her eyes fairly devoured this.

"What place is this, Mr. Todhetly?" she asked.

It is—it's Redruth Moor. Dang it!" cried Squire Todhetly, the last two words, be it understood being an *aside*, and a anathema upon his own stupidity in replying so truthfully to Tessa's question. "It's—it's a fancy sketch, Miss Holm!"

"Is it?" said Tessa, studying it. "It has a charmingly realistic look. That a fancy sketch! You have a fine imagination, Squire Todhetly. You wronged yourself in not clinging to art. I should like to copy that picture."

"I can find you a dozen better ones," said Todhetly hastily, rather intimidated by a portentous frown on Holm's face. "That sketch is really not worth your notice. Look at this."

He slipped into her hands another picture, and strode towards the fire, crumpling the unlucky picture of Redruth Moor in his hands and flinging it on the coals.

"What did you bring out that dead rubbish for?" whispered Captain Holm fiercely and angrily. "You were always making pictures in those old days, Todhetly. Have you got any more in the portfolio that bring up my past? Burn the whole lot. Get the portfolio away from her if possible. You have got a host of portrait sketches among the rest, and a dozen or more of Ignatia. What you want to keep such rubbish for, I can't guess. Get them away from her."

Todhetly, considerably abashed and crestfallen, returned toward Tessa to obey the command of Holm.

Too late! As he approached the girl, she uttered a wild cry that rang through the room, and seizing one picture from the rest, held it up, looking at it with wild dilated eyes.

Todhetly recognized the picture with a sudden horror, as that of Ignatia Redruth.

"It is the face of my dreams!" cried Tessa, in a rapture, her face transfigured with her joy

"The glorious, dark, tender face; the sweet dark eyes, so sad and lovely; the beautiful proud, winning mouth. It is the girl face that has haunted my life! Thank God, it is no dream but a glorious reality! Oh, Squire Todhetly, was she—was she my mother?"

TO BE CONTINUED.

Mrs. Mary Harrington, Kouchibouguoe, N. B., says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

In cases of Chronic disease which doctors have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL USE.

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

☞ The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

Ayer's
Sarsaparilla

Is a compound of the virtues of sarsaparilla, stillingia, mandrake, yellow dock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sustaining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so potent to cure all diseases resulting from impure blood. It cures **Scrofula** and **all scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.**

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impurity of the blood need despair who will give AYER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numerous low-priced mixtures, of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly seated. AYER'S SARSAPARILLA is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-purifier known. Physicians know its composition, and prescribe it. It has been widely used for forty years, and has won the unqualified confidence of millions whom it has benefited.

Prepared by Dr. J. C. Ayer & Co.,
Practical and Analytical Chemists,
Lowell, Mass.

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

BRANCH OFFICE

OF THE

DETROIT

THROAT AND LUNG INSTITUTE,

M. Hilton Williams, M.D. } Proprietors
A. L. Nash, M.D.,

PERMANENTLY ESTABLISHED AT THE

DAFOE HOUSE

BELLEVILLE, ONTARIO.

For the cure of all the various diseases of the Head, Throat and Chest, including the Eye, Ear and Heart.

It was an old dogma, as false and pernicious as comfortless, that all who were victims of Lung Diseases must die—there was no hope; but happily that day has gone by, and he who clings to that theory is a long way behind the times. Medical science has kept pace with the spirit of the age. New discoveries, new improvements, new inventions, have been made in medicine; new theories have taken the place of the fallacies of former days, and experience year by year demonstrates their truthfulness; and thousands are to-day living and well who under the old regime would have been in their graves.

We say confidently to those who are suffering from Catarrah that the disease is curable—that a cure can be effected in every instance where there is no other serious complication. Asthma, once so obscure and hard to manage, can, in most cases, be cured. Throat Diseases and Bronchial Inflammations readily yield to the new treatment, and Consumption itself, in most stages, may be cured and the sufferers live for years to bless their friends with their society, and to attest the wonderful efficacy of the treatment which is rapidly gaining respect and popular support—"The System of Inhalation."

The remedial agents by the practice of Inhalation are conveyed directly to the parts diseased and thus the work of restoration is begun. By simultaneous constitutional treatment the secretions become normal, the functions of the various organs are performed in a natural manner, and final recovery is the fruition of our hopes and of this rational plan. All this is accomplished without the use of much medicine—without the necessity of exile from home or any inconvenience whatever.

The very best of references given from all parts of Canada from those already cured. Remedies sent to any part of Ontario. Consultation free.

If possible, call personally for consultation and examination, but if impossible to do so, write for "List of Questions" and "Medical Treatise." Address

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of interna medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himsel cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

It is unequalled for cleaning painted walls and wood work, Plate and Silver ware,—also for Crockery, Glass, Marble and Parian ware.

Daily Intelligencer.

reland.

The driver of a car engaged by the police to convey Mr. Hannigan, Secretary of the Drumcolloghor Land League, to Charleville, *en route* for Dublin, after his arrest, was Boycotted.

The President of St. Patrick's College, Maynooth, acknowledges the munificent generosity of the Most Rev. Dr. Croke, Archbishop of Cashel and Emily, in sending him an order for the erection of one of the large stained glass windows in the new church of the college, in honor of His Grace's patron, St. Thomas of Aquin.

The tenants of Mr. Thos. Rice Henn, in Kildysart District, who have been served with writs for refusing to pay more than Griffith's valuation, after taking the advice of the Coolmaine Land League, of which they were members, proceeded to the rent-office, at Ennis, and paid the full rent, with costs. Other tenants in the district have been served with processes.

A Land League meeting was held at Clabby, Fermanagh, on March 7th. Mr. Francis Little, Master of Caranbeen Orange Lodge, presided. Mr. Thomas Little, another Orangeman, spoke. The meeting was principally composed of Protestants. Mr. Jordan, Enniskillen, said the Coercion Bill would make no difference in the county of Fermanagh; that they would continue, as before, legally and constitutionally.

The Rev. Dr. Stubbs, F. T. C. D., has just now in the College Chambers, Dublin, two old parchment rolls which possess very considerable interest in a national and historic estimate. The rolls contain the original signature of the members of the old Irish House of Commons to the then requisite Declaration against Transubstantiation, and to the Oath of Allegiance to his Majesty George III. It is hardly necessary to say that one does not see without a sort of thrill a combination of names and autographs as Lord Edward Fitzgerald, Henry Grattan, John Parnell, Henry Flood, Thos Connolly, Arthur Browne, Arthur Hutchinson (Provost), Charles Tottenham (of the Boots), Hercules Dangrish, &c., &c. The two rolls are for sale.

Electric Lights in London.

From the London News.

The electric lighting which is about to begin in the city is the largest and most important experiment of the kind which has yet been carried out in London. Hitherto the electric light has been used, as on the Thames Embankment and Waterloo bridge, in conjunction with gas; but in the city the thoroughfares selected are to be lighted by electricity alone. The Embankment lights are put out and the gas lamps lighted at 10 in the evening; in the city the gas will not be used at all, the electric lighting being continued all night. The first district begins with Blackfriars bridge, and extends along Bride street, Ludgate Hill, the north side of St. Paul's Church yard, and down Cheapside as far as King street. The distance is 1,648 yards, and is to be lighted by the Brush system, which is in use in Palace Yard. At King street the Siemens system will begin, and will extend along the rest of Cheapside, the Poultry, Mansion House street, King William street, and Adelaide street, and across London Bridge. The same system will be extended down King street, Queen street, and Mansion House street. The whole length of street covered by the Siemens light will be 1,821 yards. Another district to the south of these will be lighted by the Jablohkoff lamps, like the Embankment. It will include Southwark bridge, Queen Victoria street, a distance of 1,703 yards. The experiment is to be continued for a year, at an outlay of about £6,000. There is a curious difference in the three systems. The Siemens system, for which the lofty lamp-posts are now being erected near the Mansion House, has the smallest district, but will cost for the year £3,720; the Jablochkoff, which has a somewhat larger space to light, is to do it for £2,930; while the Brush, which covers more space than the first and rather less than the second, is to cost only £1,410. The whole experiment is now to be tried under conditions which will afford a fair test of the three systems: but, to make the comparison with gas at all fair, an equal area should be lighted with the shadowless burners, so that the amount of light got from the gas may be as nearly as possible the same as that which will be given by the electric lights.

Manufacturing Items.

(From the Monetary Times)

The Young Manufacturing Company is about enlarging and refitting the building on Merrick Street in Hamilton formerly Herd & Roberts; for a woollen and shoddy goods factory.

The shares in a joint stock company which shall erect works at Aylmer for evaporating and canning fruit and veg tables, have been subscribed in that place and neighborhood. Work is to be begun very shortly.

Clinton has a flax mill, of which Mr. D. A. Forrester is the owner. It is worth noticing that the fuel for the engine, which was made by the Thompson Williams Co'y at Stratford, is the refuse of flax, nothing else. The mill is 45×70 ft., and the barn 40×140 feet. The number of hands employed varies from 16 just now to 60 in the summer, 600 tons was treated last season at this factory. The "scutchers" are wheels with iron spokes or knives radiating from them, to beat out or scutch the flax, which has previously been threshed. After the scutching process the "tow" having been removed is packed in bales, to be used in making twine, coarse thread cloth and even paper, the remainder is called "live flax" used for making linen fabrics.

Portsmouth, near Kingston, has a brush factory in contemplation, the moving spirit in it being Mr. H.P. Lindsay who was formerly, we believe, manager of the Napanee Brush Company. He thinks that $10,000 will set the enterprise agoing.

The manufacture of cotton in this country is developing fast. We understand that the directors of the Hochelaga Cotton Company are sending their engineer to England, to order $200,000 worth of new machinery. The Stormont Cotton Mills Company it is said is also ordering $150,000 worth.

The St. John, N. B., Bolt Company was formally opened in that city a week ago. It employs about thirty hands at the start, and intends using Londonderry, N. S., iron, which is very suitable for that purpose. The capital stock of the company is fixed at $30,000, of which about $20,000 has been subscribed and paid up. The following gentlemen were elected directors:—B.R. Lawrence, president, Levi H. Young, S. Hayward, G. F. Burpee, Secretary-Treasurer. At present, the company's business will be limited to the heavier classes of work, such as railway track and bridge bolts, lag screws, fish plates and other heavy work.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aobility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

The Newfoundland Seal Fishers.

Commander E. T. Woodward, commanding the Yantic, which has just arrived at Norfolk from St. John's, Newfoundland, where she went to get the remains of the late Passed Assistant Paymaster Baughman, submits to the Navy Department a detailed report of the voyage. In the course of the report he says:—"While in St. John's we had the opportunity of witnessing the sailing of the sealing fleet, the steamers of which fleet started for the fisheries on the morning of March 10th. The sailing vessels started on the 1st, as they were allowed by law to do. The sealing fisheries of Newfoundland are steadily declining since the introduction of steam. Before that time there were about 200 vessels, of from 50 to 150 tons, engaged in the business, employing about 12,000 men, all of whom were seamen. But at the present day there are clearing from the port of St. John's twelve steamers and three sailing vessels, with a total tonnage of 5,107 tons, carrying 3,204 men, and from other ports about 1,000 men find employment, making only about 4,000 men against 12,000 a few years ago; and none of these men are able seamen, as these vessels are manned by a special crew, with firemen, &c., and the rest are only sealers, who take and kill seals. The largest of the steamers carry 325 men and the smallest 165. The general run is about 180 men."

A Valuable Invention.

(From the London Telegraph)

Should M. Gentilli, of Leipsic, succeed in persuading members of Parliament, popular preachers, and other popular speakers in different parts of the world, to deliver themselves of their sentiments and opinions for the future throught an apparatus recently invented and patented by him, stenography will ere long become an obsolete science, and the shorthand writer will have reason to lament, like Othello, that his "occupation's gone." Something between a mouth organ and a jew's-harp is to be lightly held between the teeth by the orator while speaking. The mechanism is connected by electric wire with a metal roller, upon the exterior surface of which, as it revolves, the utterances of the person declaiming through the apparatus appear in luminous characters as fast as they are spoken. Possibly the spectacle of a legislator performing his speech, as it were, upon an instrument beginning like a hautboy and ending like a printing-press, might appear somewhat ludicrous at first, but we might soon get accustomed to it, and the blessings of Gentilli's apparatus would more than compensate those using it for any trifling ridicule they might have been subjected to while it was still an absolute novelty.

Learning the Ways of Polite Society.

From the Springfield (Mass.) Republican.

One of our leading business men recently gave an evening dinner party to a dozen of his friends, at which every man—unprecedented circumstance for Democratic Springfield—appeared in a claw-hammer coat and the necessary appendages of faultless full dress. Each guest was provided with a bill of fare expressly prepared for his individual use, on which was painted, in oil-colors, by the hand of a clever artist, something to represent his calling in life. The President of a sewing machine company noted with surprise the picture of an old woman scrutinizing most intently one of his machines. The President of the telephone company beheld himself in a grotesque position while receiving a message, with his most successful subscription book under one arm. A railroad official could hardly deny the soft impeachment that he is a "ladies man," when he was brought face to face with a bewitching damsel, and the physician who beheld a very sick patient with the legend proceeding from her mouth "Go away from me, doctor, and I shall get well," felt for a moment as though he would like to number the artist among his transient patients.

Uses of Charcoal.

Charcoal, laid flat, while cold, on a burn, causes the pain to abate immediately: by leaving it on for an hour, the burn seems almost healed when it is superficial. And charcoal is valuable for many other purposes. Tainted meat, surrounded with it, is sweetened; strewn over heaps of decomposed pelts, or over dead animals it prevents any unpleasant odor. Foul water is purified by it. It is a great disinfectant, and sweetens the air if placed in trays around apartments. It is so very porous in its "minute interior," it absorbs and condenses gasses most rapidly. One cubic inch of fresh charcoal will absorb nearly one hundred of gaseous ammonia. Charcoal forms an unrivalled poultice for malignant wounds and sores, often corroding away dead flesh, reducing it to one-quarter in six hours. In cases of what we call proud flesh it is invaluable. It gives no disagreeable odor, corrodes no metal, hurts no texture, injures no color, is a simple and safe sweetener and disinfectant. A teaspoonful of charcoal in a half glass of water often relieves a sick headache; it absorbs the gasses and relieves the distended stomach pressing against the nerves, which extend from the stomach to the head. If often relieves constipation, pain, or heartburn.

Mrs. Mary Harrington, Kouchibouguac, N. B., says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

The best receipt for going through life in a commendable way is to feel that everybody, no matter how rich or how poor, needs all the kindness they can get from others in the world. Let us remember this great truth, and commence with those around us. Let the poor and needy, and those who do not take the daily or weekly newspaper, be kindly informed, if in sickness, whether it be from coughs, lung diseases, asthma or consumption, that by the use of N. H. Downs' Vegetable Balsamic Elixir they can be cured. Keep not the good news to ourselves, but spread the sunshine of hope around.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

NOTICE.

SEALED TENDERS addressed to the Superintendent General of Indian Affairs, and endorsed "Tender for Indian Supplies," will be received at this office up to noon of THURSDAY, 14TH APRIL, 1881, for the delivery of the usual Indian Supplies, duty paid, at Fort Walsh and Fort Macleod for the year 1881-82, consisting of Flour, Bacon, Groceries, Ammunition, Twine, Oxen, Cows, Bulls, Agricultural Implements, Tools, &c.

Forms of Tender and full particulars relative to the supplies required, can be had by applying to the undersigned or to the Indian Superintendent, Winnipeg.

Each tender must be accompanied by an accepted cheque of a Canadian Bank for the sum of five thousand dollars, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The lowest or any tender not necessarily accepted.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, TUESDAY, APRIL 5

Not all Sunshine.

Many of those who go away from Canada to the Western States do not even get manna. One hears occasionally of some one "striking oil," but of the hundreds and thousands who fail but little is heard. On this point a correspondent of the Windsor, N. S., *Mail* says:—"When in the States a few weeks ago, I saw at least a dozen men from this place who were earning merely sufficient to pay their board, they would gladly return if they had the means. Two of the number have families here depending upon charity, one has sent home to his wife and children *two dollars* this winter, and the other nothing, simply because they could not earn it. The same men could have been employed at home cutting wood at 60cts. per cord, but they preferred 'going to the States.'"

In corroboration of the fact that all is not sunshine in the Western States, we are permitted to make the following extract from a letter written by a clergyman who had settled in Kilbourn City, Wisconsin:

> KILBOURN CITY, March, 1881.
>
> I have had enough of Wisconsin and intend to go back to Canada as soon as possible. The golden prospect that was held out to induce me to come here was like the apples of Sodom—beautiful till touched, when they all turn to dust. I shall go back to Canada a much poorer but wiser man.

The experience of the writer of the above is but that of thousands of others, who, deceived by the glowing statements of land and immigration agents, were led to imagine the Western States a paradise, but have found themselves sadly mistaken, and would gladly return to Canada if they could. Despite the unpatriotic depreciation of our North-west Territories by Mr. Blake in 1879, those who are inclined to follow Horace Greeley's advice and "go West," will find in our North-west much better soil and climate and better business openings than in the Western States—even Mr. Blake's Eden—Kansas.

A Disgusted Organ.

Previous to the two last elections the London *Advertiser* was disgusted with the result of the by-elections, and no wonder, for the result then had been a gain of six seats to the Government and the consequent knocking into the proverbial cocked hat of all the prophecies of a great reaction against the Government in which the *Advertiser*, in common with many of its co-laborers in the cause of "Liberalism" have indulged during the past two years. Our contemporary was so disgusted with the result in Charlevoix and Bellechasse that it moralizes over the result of the two elections, styling them "as worthless tests," here is what it said:

> "There is nothing so deceptive as a by-election, if it is judged solely as a barometer of public opinion. All the probabilities are in favor of a Government candidate, particularly in constituencies that are in the least degree doubtful. Experience is on the side of this theory, and reflection will show why it is so. In the case of a by-election there is necessarily more or less indifference in the public mind. Where a Government is so strong that one supporter more or less is of little consequence, there is not the incentive to work among the Opposition that there is when men are nerved by the prospect of ousting an objectionable Government, and replacing it with one in accord with their views. Government influence, on the other hand, is never idle.
>
> "From whatever point of view it may be looked at, it is seen that the probabilities of success all lie with the Government of the day in a by-election. The same influences are not so potent in a general election.
>
> "One needs only to recollect that Disraeli carried the by-elections, and at the dissolution was ignominiously routed, to be convinced that the result of an interim election is worthless as a guide to the state of the public mind."

Now that the Opposition has gained two seats, it changes its tune, and is loud in its declarations that by-elections are sure indications of public opinion! Such is Grit consistency.

Newfoundland's Financial Position.

The Newfoundland Treasurer in his recent budget speech showed, as we gather from an exchange, that the revenue of Newfoundland for 1880 was $928,565, a decrease of over $60,000 as compared with 1879, caused by smaller importations of molasses, sugar, tobacco, rum, brandy, whiskey, gin and wines. The total expenditure was $1,105,490. The amount still to credit of Newfoundland's share of the Halifax fishery award is $746,277. The consolidated and debenturee debt of the colony on the 31st of December last was $1,150,990, but this has since been reduced by $100,000. During the year 132 vessels of 4,998 tons were constructed on which a drawback of $14,896 was paid. The total shipping now owned in the colony is 1,830 vessels, of 86,561 tons. The bank fishery made encouraging progress, 33 vessels of 2,231 tons having caught equal to 25,703 quintals, and received $10,902 as bounty. There is a floating debt of $77,825. The revenue required for next year is $989,860. The principal items of expenditure are:—Relief of poor, $142,350; steam services, $137,800; postal services, $28,000; telegraph extension and maintenance, $9,000; education, $90,000; roads and bridges, $106,000; administration of justice, $165,000; interest on public debt, $63,000; geological survey, $5,000; administration of Government and Legislature, contingencies $160,000. An increase of $50,000 is estimated in customs duty from molasses, sugar and tobacco. In 1880 the imports were $6,966,243, or $38.33 per head of population, and the exports $6,684,883, or $37.33 per head. The tariff was amended by placing a duty of 8 per cent. on worsted and woollen yarns of all kinds. Ploughs, harrows, reaping, mowing, raking, ploughing and seed-sowing machines are to be admitted free of duty.

Editorial Notes.

OVER-CONFIDENCE.

There can be little doubt but Carleton, New Brunswick, was lost to the Conservatives from over-confidence. But 2,500 votes were polled, or 613 fewer than at the general election, and Mr. Irvine received 161 fewer votes than Mr. Appleby, who was the unsuccessful Grit candidate in 1878.

A COMPARISON.

The following is taken from the *Globe* of Saturday, and slightly altered to suit the difference between the respective comparisons to which it applies: "The official returns of the polling in East Northumberland show that keen as the contest was in 1879, the struggle the other day was just as much so on the part of the Grits. The total Liberal vote cast was 1,887, a loss of 3 as compared with June 1879; the total Conservative vote was 1,700, a loss of 139 on the same comparison. The net Liberal gain is thus 136, and but for peculiar circumstan stances, already sufficiently explained," the Conservative candidate would have been elected by a considerable majority."

THE NOVA SCOTIA COAL TRADE.

The Halifax *Herald* informs us that one hundred and fifty new coal hoppers, to carry 15 tons each, are being built for the Intercolonial. Six hundred are required to meet the demands of the trade. This fact shows that the coal trade of the Maritime Provinces is booming, all because of the N. P.

Exports to the United States.

Col. Prince, United States Consul at this port, furnishes the following statement of the value of declared exports from the Consular District of Belleville, Canada, to the United States during the quarter ending March 31, 1881:

Iron ore, 1,085 tons	$ 2,829 58
Barley, 54,416 bushels	48,362 10
Household goods, representing 53 persons	5,358 45
Baled straw	1,581 90
Live stock, cattle and horses	3,183 00
Apples, (for export)	1,712 40
Butter and cheese (for export)	3,328 00
Eggs	1,047 60
Beans and pease	614 96
Bones	480 00
Dried fruits	305 88
Miscellaneous	673 20
	$69,504 07
Corresponding quarter, 1880	63,075 46
Increase	$ 6,428 61

Correction.

To the Editor of the Intelligencer.

SIR.—In my reported trial trip of the Hunter Cattle Car from Chicago to Boston I used the following sentence:—"Detained at Montreal 7 hours to make up train." I regret having so put it, what I intended to say was, that I stopped 7 hours in Montreal from early morning till the afternoon train was made up. This I did on my own account for the purpose of showing the car, and not because I could not have gone forward sooner.

I think it just to the G. T. R. to make the correction.

J. K. FULLER.

Belleville, April 4. 1881.

Railway News.

A letter from British Columbia states that the contractors for the British Columbia section will have five thousand men at work on the line shortly, about half the number being Chinese.

Work will be resumed about the middle of this month on section 15 of the Canada Pacific, the section formerly awarded by the Whitehead contract, which was taken off the hands of the contractors by the Government, under the superintendence of Mr. Haney. The work remaining to be done consists of filling and ballasting. Some 500 men and two steam shovels will be employed. It is intended to complete the work this summer, and also to finish the ballasting on section 14.

It is understood that the arrangements for the transfer of the Canada Central Railway to the Pacific Syndicate have been perfected, and will shortly take place.

The latest Railway project arising in the Ottawa section is the construction of a branch line from Smith's Falls, on the Canada Central, to Moose Creek Station, on the proposed Canada & Atlantic Road, which is to run from Ottawa to Coteau Landing south.

The Fisher-Waubuno Case.

AFTER A TRIAL OF EIGHT DAYS THE JURY DISAGREE.

TORONTO, April 2.—In the Fisher case which has occupied the attention of the court for eight days, His Lordship began an impartial charge at ten o'clock this morning and spoke until about half-past one this afternoon. Before the jury retired he submitted to them several questions for consideration.

The jury returned to court at 3 o'clock and informed His Lordship that they could not agree. His Lordship said that they should give the matter more consideration, and requested them to retire again. At 7 o'clock they again filed into court, and through their foreman informed His Lordship that an agreement was impossible. Counsel then requested the polling of the jury, which resulted in nine declaring in favor of the plaintiff and three for defendants. They were then discharged from custody.

The widow occupied a seat in the court during the greater part of the hearing, in company with several lady friends. She was very much agitated as the jury entered the court for the last time, but did not appear disconcerted when the disagreement was announced. Two trials have cost her already $10,000, but she informed the Associated Agent to-night that she is determined to enter upon a third suit, as she is certain she is entitled to the damages. She says the existence of the company depended upon the result of this suit, for behind Mrs. Fisher are about eighteen other plaintiffs waiting to advance their claims should a jury ratify hers. The expense to the defendents has been very heavy, and it is probable that they will compromise rather than enter upon another suit.

'THEY ALL DO IT.'—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

Bridgewater Notes.

BRIDGEWATER, April 4, 1881.

The surveyors of the T. & O. R. R. move their quarters from here to-morrow and will for some time be in camp. They report having found an excellent line with no obstacles worth mentioning, and have on that account run the line much more rapidly than they expected.

Weather still cold. Scarcely any open water in the river yet.

News Condensed.

—A large emigration from Scotland to America is expected this year.

—It is said the recent severe frosts have injured the fall wheat in the Ottawa country.

—Among the freight on one of the trains for Manitoba on the 3rd were several hives of bees.

—Several further arrests have been made in Ireland under the provisions of the Coercion Act.

—The Synod of the Reform Episcopal Church in Canada will meet in Ottawa on the 20th of May next.

—Over twenty lives are supposed lost on the Thames, England, through the upsetting of boats by squalls.

—The Kingston & Pembroke Railway have secured four new coaches, which cost from $2,900 to $3,000 each.

—The war feeling in Greece is reported to be very strong, but faint hopes of preserving peace are entertained.

—The subscription to the Cotton Mill in Kingston now foots up $117,000. The Directors are choosing a site.

—An Ottawa despatch says the thermometer registered two degrees below zero on the morning of the 4th inst.

—Lieutenant-General Sir E. Selby Symth has been gazetted to the coloneley of the Seventy-second Highlanders

—The honorary degree of LL.D. has been conferred on Professor Selwyn, F.R.S., of the Geological Survey, by McGill University.

—A man named Cahill has been arrested near Tullamore on the change of his being the murderer of Daly recently, in Westmeath.

—During the quarter ending March 31st, 1881, horses to the value of $20,524 were shipped from the Consular district of Kingston to the United States.

—The deed of amalgamation of the Manitoba Telegraph Company with the Great North-Western Telegraph Company was executed on Saturday.

—The Hon. J. C. Pope, Minister of Marine and Fisheries, has gone to New York for change of air and scene as advised by his physician. Mrs. Pope accompanies him.

—Although Emperor Dom Pedro of Brazil is a Catholic, he is such a believer in missions that he offers to pay the expenses of Protestant missionaries in his country.

—The condition of Sheriff Chauveau, of Montreal who fell down the stairs of the Richelieu Hotel while they were undergoing repairs, causes much uneasiness to his friends.

—To prevent the spread of Chinese immigration a poll-tax of £10 per head is to be levied on all Chinese arriving in the Colony of Victoria, Australia, whether by sea or land.

—Chicago, according to a lecture just delivered there, had in 1880 a divorce suit to every eight marriages, and the average for six years has been one divorce to every ten marriages.

—$94,488 worth of barley was shipped from the Kingston Consular district to the United States during the three months ending March 31st. Napanee and Picton are included in this district.

—It is now stated that the evacuation of Candahar by the British will begin on the 10th inst. Another despatch says that the Ameer's troops will probably reach Candahar by the 12th inst.

—A water pipe on Richmond street near Simcoe street, Toronto, became choked up and when the plumbers examined it they found it plugged by a dead eel, thirteen inches in length.

—There is now no doubt entertained by the promoters of the scheme to tunnel the St. Lawrence being successful. The engineers have in several places bored to a depth of 25 feet, and they report most favorably.

—A gentleman just returned from the country about Joliette says the crop of maple sugar is larger than was ever known before in that section. The *habitants* say they are worn out with hard work in the sugar bush.

—Yesterday Mr. Gladstone made his budget speech in the English House of Commons, and stated that the country might meet all the outstanding and current obligations for the year, and still have a surplus of £1,345,000.

—The death is announced at St. Hyacinthe of Mr. Tache, Sheriff of the district of St. Hyacinthe, after a lingering illness of some months. He was brother of His Grace the Archbishop of Manitoba, and nephew of the late Sir E. P. Tache.

—Mr. Thos O'Brien, the wealthy land proprietor, of Montreal, was placed on trial on the 4th inst. for the forgery of an $18,000 receipt, particulars of which were given some time since. The case excites considerable interest in Montreal

—It is reported that the Czar has received a letter bearing the official stamp of the Nihilists, threatening him with the fate of the late monarch if within six weeks a liberal constitution and representative Government were not granted to Russia.

—Oswego harbor gets $50,000 from Congress for harbor improvement. There will be 100,000 cubic yards of dredging, and what is possible of the money will be put into the east breakwater. The west breakwater will also be finished this year.

—Mr. Louis Trudel and Mr. Massue of Montreal, left on the 4th inst. for a tour round the world. They contemplate an absence of two years, during which they intend to visit Japan, China and the East Indies, returning to Europe by the Suez Canal.

—On the Grand Trunk special excursion trains for Manitoba and the North-West, which left Ottawa on Wednesday, March 30th, there were on board when passing the western terminus of the Grand Trunk six hundred passengers and over forty cars of live stock, farming implements, household goods, &c.

A Bad Ice-Shove.

DESORONTO, April 4.—Yesterday the wind broke up the ice a great deal here. A large cake got loose from behind Captain John's Island, and was blown out into the bay, taking the schooner *Proctor* with it for about a mile, when the ice struck the shore. The *Proctor* is in a bad shape in case of another ice-shove. The sloop *Monitor* was also taken about two miles down the reach, towards Picton, where she is now. The scow *Empress* is sunk down below the deck. The water is washing over her, but the other schooners are all right at present.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrice, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

SPRING OPENING.

WEDNESDAY, THE 6TH OF APRIL.

ON Wednesday, the 6th APRIL, we will be prepared to show the latest styles in London and Paris pattern Millinery and Mantles, with a complete stock of Hats, Bonnets, Ostrich Feathers, French Flowers, Ornaments, &c.

Our customers may expect really the finest and most extensive display we have yet made in this department. All being of our own importing, the styles will not only be the latest out, but the prices very moderate.

GEO. RITCHIE & CO.

P. S.—The untrimmed Hats and Bonnets, also Feathers, Flowers and Trimmings, are now opened out and ready for inspection at any time.

G. R. & CO

UNHAPPY PERU.

A Dreadful State of Anarchy and Bloodshed.

Many Thousands of Chinese Massacred.

FORCED LOANS AND CONTRIBUTIONS TO THE CHILIANS.

LIMA, March 10.—Labor here is scarce, and poverty increases daily. Double the amount of food required to feed the troops contained in the city is daily dealt out to poor families. Pierola is in Jango where he has been issuing decrees. He convoked a constituent assembly to meet at Hiranicayo, and before it he declares he will resign the dictatorship to enable it to make terms with the Chilians. It is thought that the assembly will never meet. The Chilians declare they will hold no intercourse with Pierola. The provisional President tried to persuade the Chilians to leave Lima, but they refused to do so. Montero collected a million soles from the customs houses in the north, and also made a forced loan in Trujillo, whence he fled to Cajamaica. It is thought that he is disposed to come in under the new Government. A war of races has broken out in the valley of Canete, where more than 2,000 Chinamen have been barbarously murdered by the negroes and Cholos. On one plantation 600 inoffensive men were murdered in cold blood. All the corn fields, sugar houses, machinery, etc., has been burned and property to the value of millions has been wrecked by these miscreants. All foreigners fled from the valley, which is one of the most fertile and productive in Peru. Some of them have been killed. The work of murder and plunder is still going on. It is feared that the adjacent valley of Chincha will suffer next. The Chilians refuse to send troops to quell the disturbances. A number of women and children sought refuge on a couple of vessels anchored at Cerro. An Azul steamer has been sent to bring the refugees to Callo. It is feared that similar scenes have been enacted throughout Peru. Even if the Chilians leave Lima the foreigners will certainly have to fight for their lives and put down the *canaille*. All the plunders caught are flogged through the streets. They are safer now than a few weeks ago. A list of fifty property-owners has been issued by the Chilians, from each of whom they demand $20,000. The Chilians are determined to collect a million per month for the expenses of the army. The penalty for non-payment is the destruction of property worth three times the amount of the quota. The houses of those who have not paid by the 18th will be destroyed on that day.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

GLOBE TOBACCO CO.,
DETROIT, MICH., and WINDSOR, ONT

RECEPTION!

—OF THE—

RIGHT REV. DR. CLEARY,

BISHOP OF KINGSTON.

A SPECIAL TRAIN!

will leave the Belleville station immediately after the departure of the "noon train" on

THURSDAY, APRIL 7th.

Fare to Kingston and return $1.25, good for two days from date. All friends are cordially invited. There will be a grand reception at Kingston, with a torch light procession at 7 p. m. The excursion train will return at 8 p. m., arriving home at 10 p. m.

P. P. LYNCH, Secretary.
DR. MURPHY, Chairman.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in Warner's Blood Purifier are combined the three qualities of Simplicity, Safety and Success. A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Mark—Warner's Blood Purifier.
Sold at all druggists'.
Price 50 cents per bottle. d&wtf

SPECIAL NOTICE TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage, Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late. The winter is approaching, and if you neglect this opportunity you may be obliged to carry your disease until the opening of spring, and then sever your connections with those you love so well.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

DRS. WILLIAMS & NASH,
Daofe House, Belleville, Ont.

SPRING, SPRING, SPRING!

FOSTER & REID,

SPRING OPENING!

WEDNESDAY, APRIL 6TH, 1881.

WE HAVE pleasure to announce that we will exhibit on the above date New York, London, and Paris Pattern Hats and Bonnets, together with all leading novelties in Flowers, Feathers, Ribbons, Laces, &c.

Our Stock of Millinery Goods this season is more than usually choice and well selected, and we have spared no pains to make it the most successful opening we have yet held.

All Departments replete with a large assortment of novelties in too great variety for enumeration.

FOSTER & REID,
IMPORTERS OF DRY GOODS.

COSTELLO'S

SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris London and New York

Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.

Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

JAS. MACOUN,
Chairman Building Committee.

Belleville, March 29, 1881. dtd

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similar diseases to great advantage until the list of those eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &c.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

FOR SALE.

A DARK BAY MARE, a good roadster. Also a first class leather top, leather trimmed buggy; only been in use a short time. Apply to

BLACK CASHMERES.

SPECIAL VALUE offered in these Goods.

We have a Black Cashmere over one and a quarter yards wide **at 65 cents** per yard, that cannot be equalled in the city, and another 38 inches wide **at 52½ cents**, which is equal to what is usually sold at 75c.

We have also **Union Cashmeres** and BLACK PERSIAN CORDS very cheap.

We have just received a large assortment of

Spring Dress Materials,

in the latest styles, to which we invite the attention of the Ladies; and we have still 2 pieces of our celebrated **$1.29 Black Silk**, the best value in the market. It cannot be equalled under $1.75 to $2.00 per yard.

GLASGOW WAREHOUSE.

N. B.—We trust our customers will remember that our terms are *cash*, and *will not ask us for credit*. By strictly adhering to our terms, we can sell goods much cheaper than if we did a credit business.

Local Notices.

Notices under this head [illegible]cts. a line each insertion. After six insertions 5 cts. a line.

Drs. Williams and Nash can both be consulted at their office, Dafoe House, on Thursday, Friday and Saturday of this week, on all diseases of the head, throat and chest. The doctors have treated a great many persons in this and adjoining counties.

Daily Intelligencer.

BELLEVILLE, TUESDAY, APRIL 5.

5 O'CLOCK EDITION.

City and Vicinity.

Two tramps shared the cells between them last night.

THE curlers had good ice yesterday and the ice is equally good to-day.

COUNTY Court term commenced yesterday forenoon, and was concluded this afternoon.

THE clans Babcock and Clapper had another pitched battle last night. It resulted in a draw.

LIEUT. PERRY, who graduated from the Royal Military College at the head of his class, was in the city last night.

IF April showers bring May flowers, the present April weather can at least boast of bringing blossoms to men's noses.

MESSRS. Palmer and Bonar have been engaged in fitting up their tug steamer *Eliza Bonar*, which wintered at Deseronto.

IF the Black Death is coming to this continent this year, as some scientists tell us, we hope it will come now and get frozen out.

THE social at the residence of Thos. Donnelly, Esq., Charles St., this evening, should be borne in mind. It will be an unusually pleasant one.

FOUR of the city dry goods houses will have their spring openings to-morrow, namely, Messrs. Geo. Ritchie & Co., Foster & Reid, Costello and Muir. The votaries of fashion have a busy but delightful day in prospect.

LITTA is spoken of by the papers as the "great little star." She is not very little, though by the side of the other three ladies of her company, whose Amazonian proportions completely overshadowed her, she looks somewhat *petite*.

A NUMBER of the waitresses at the Dafoe House left to day for Chicago, to take situations there, and a dance was held in the Dafoe House last night for the purpose of sending those on their way rejoicing. A large number of guests were invited, and dancing was kept up all through the night.

WEATHER PROBABILITIES. — Toronto, April 5.—Lakes, brisk to high westerly to north westerly winds, fair continued cold weather.

POLICE COURT.—John Malee was charged, at the Police Court this morning, with having brutally assaulted a little girl named Maggie O'Donnell last July. The evidence was insufficient to convict, and the prisoner was discharged.

PERSONAL.—Dr. Williams, of Detroit, will be in personal attendance at his Branch Office of the Detroit Lung and Throat Institute, at the Dafoe House Belleville, with Dr. Nash his partner, on Thursday and Friday April 7th and 8th. Therefore all who so desire, had better call at the office on these days. Consultation free.

ALBERT COLLEGE.—The entertainment at the close of Hilary Term is provided by the most advanced students in the Grammar School. This year the number is large and the class superior. All are anxious to see and hear the Matriculants of 1881. Hilary term closes to-morrow. Matriculants' Exhibition to-morrow night in the College Chapel at 7.30 p. m. Admission 10 cents.

FIRE.—At an early hour this morning a house on North Front-st. occupied by a man named Dafoe and a woman named Jane Moody was discovered to be on fire. It had not obtained much headway and was easily extinguished without the necessity of giving an alarm. The people living in the vicinity do not fancy this loving couple as neighbors, and, it is thought, took this mode of expressing their feelings regarding them.

LITTELL'S LIVING AGE.—The numbers of The Living Age for the weeks ending with March 26th and April 2nd, respectively, contain the following articles: The Progress of Ship-building in England, Westminster; Lord Herbert of Cherbury, and Ophelia, Blackwood; Voltaire and Shakespeare, and The Origin of London, Cornhill; Singular Connection between Dust Fogs, Effects of Frosts and Thaws upon Plants, and Recollection of a Highland Ceosus, Chambers' Journal; The Lesser Barbarians, Spectator, with instalments of "Don John," "Visited on the Children," and "The Freres" and the usual amount of poetry. A new volume begins with the number for 2nd April. For fifty two numbers of sixty-four large pages each (or more than 3,300 pages a year), the subscription price (8) is low; while for $10.50 the publishers offer to send any one of the American $4 monthlies or weeklies with the Living Age for a year, both postpaid. Littell & Co., Boston, are the publishers.

TRIMMING HORSES.—Three horses belonging to Mr. W. R. Graham, of Huntingdon, had their tails secretly trimmed by some unknown parties on Sunday night. Their tails were entirely stripped of hair, shears or scissors having evidently been used for the purpose. It is supposed that the act was done through spite against Mr. Graham; but it was a rather strange act of revenge, seeing that Belleville horsemen do the same thing through a desire to improve the looks of their animals.

NOT SOLD YET.—It appears that the report that the plant of the Belleville Street Railway Company has been sold to a Winnipeg firm is not true. The Winnipeg *Times* of the 31st ult., has the following in reference to the report:—"Ontario papers say that 'the Belleville street railway has been sold to a company in Winnipeg. The whole plant of the road, rails, cars, 'buses, horses, sheds, and all, are to be shipped to Winnipeg early in the summer.' This is entirely incorrect. The offer was made the Winnipeg Street Car Company, but has not yet been accepted. Two other offers have also been received, and the company meets to-day to discuss them."

THE "MASTODON SHOW."—Shelby, Pullman & Hamilton's Mastodon Show takes the road early in May. The first performances will be given on the Agricultural Grounds on Saturday, the 30th inst. The show will travel in the Dominion for about two months, and will then cross the line. The little army of performers, canvas-men, &c., who have been engaged will soon be here; numbers of them are arriving every day, and in a week or two seventy or eighty employees of the show will be in town. Those who have already arrived are respectable gentlemanly men; if the remainder resemble these the show will be above the average in point of respectability.

AN OLD PAPER.—The Kingston *Whig* says:—"Mr. Ainslie, Queen Street, exhibits a copy of the Kingston *Gazette* dated Mar. 30, 1816, the publication of Mr. Stephen Miles, father of Mr. Elijah Miles, now attached to the Belleville INTELLIGENCER. Every item in it is interesting, and many announcements are made which revive recollections of now almost forgotten men and things. In contemplating the little paper, a marvel in its day, we see the advancement that has been made in local journalism. The newspapers of any place are an index of it and its citizens." Bound volumes of the old *Kingston Gazette* for 1813 4 are now in Mr. E. Miles' possession, and are highly valued.

THE ASHBURNHAM ELEVATOR.—The Peterborough *Review* says:—"A number of workmen are now engaged in putting together the timber for the frame of the elevator and storehouse to be erected near the Grand Junction Station in Ashburnham. As soon as the timbers are properly fitted they will be drawn to the site of the building and placed in position. It is intended to put in the latest and most improved machinery, so that the grain can be handled with as little trouble as possible. The work is to be pushed right on at once, and the building finished in time for next season's trade. From the well known energy of the gentlemen comprising the company we have no doubt they will finish the construction as expeditiously as possible."

THOUGHTS AT THE CONCERT LAST NIGHT BY AN ENTHUSIAST.—

Twinkle, twinkle, Litta star!
How I wonder where you are!
Trilling as you soar on high—
Like a skylark in the sky.

Goodness gracious! you must be
Far above high D or E.
Of all high-toned stars, you are
The high-tonedest, Litta star.

Patti, Nilsson, Hauk, Albani,
Gerster, Kellogg, and the many
Other screamers, near and far,
(Though we never heard them) are
Crows to thee, O Litta star!

ENCORING.—The audience at the concert last night, though not unintelligent, did not display its intelligence or good taste in a very marked degree by the indiscriminate *encores* which it showered on the different performers. There were fourteen numbers on the programme, and every one of these numbers, with only three exceptions, was encored. When an occasional *encore* is demanded it means that the particular performance so rewarded is appreciated, and a repetition of the piece or a portion of it is taken as a mark of honor to the performer; but when everything on the programme is indiscriminately *encored*, it means simply that the audience are not satisfied with what they are getting for their money and want more—it is an insult, instead of an honor, to the performers. If everybody is *encored*, where is the honor to anybody?

THE BISHOP'S RECEPTION.—Great preparations are being made by the Roman Catholics of Kingston to receive the new Bishop, Dr. Cleary, who is expected to arrive on Thursday next. A procession is to escort the Bishop to the Cathedral. The *Whig* says: "It is confidently expected that Archbishop Lynch, of Toronto; Bishop Crinnon, Hamilton; Bishop Walsh, London; Bishop Duhumel, Ottawa; Bishop Favre, Montreal; Bishop Wadhams, Ogdensburg; and possibly Bishop Jamot, will be here. All the clergy of the diocese have been summoned, and they and several from other dioceses will be present. At Belleville the bishop's train will be joined by a number of gentlemen who will accompany his Lordship to Kingston, and who may bring a band with them." When Dr. Cleary set sail from Queenstown he was accompanied to the *City of Chester* by Archbishop Croke, of Cashel, Bishop McCarthy, of Cloyne, Mgr. Byrne, the Vicar-General of the diocese of Cork, and the parish priest of Lismore, attended by a deputation from the town of Dungarvan, of which Bishop Cleary was the parish priest. Dr. Cleary is a graduate of Salamanca and Rome, and took his Doctorate in Divinity after defending a public thesis at the Catholic University of Dublin. He was also for twenty years President of St. John's College, Waterford.

THE LITTA CONCERT.—For the first time since Remenyi charmed us with the witchery of his playing, the Belleville public have been enabled to enjoy an evening of really good music of the higher class. The public appreciated the privilege as it should, and the Metropolitan Hall was filled with as attentive and enthusiastic an audience as any artist could wish to appear before. It can safely be said that the audience were well pleased with the evening's performance, and they had good reason to be so. The company is one that would be listened to with keen enjoyment by more critical audiences than Belleville can furnish. It is a good "all-round" company. No member of it but is good, and at least three are extremely good. The bright particular "star of the evening," Litta herself, is indeed worthy to be called a star, though not an orb of the first magnitude. In the upper register her notes are remarkably rich, pure and powerful, and capable of the most exquisite modulation; but her lower notes are not so pleasing, though the defect has been covered by careful cultivation. She succeeds much better in operatic than in ballad singing: her "Comin' thro' the Rye" was not very happy; in her effort to be arch and piquant she overdid it and became jerky. In her duet with Miss McLain the flexibility of her voice was marvellously displayed. Miss McLain sang the air, while M'lle Litta sang a sort of light running accompaniment in imitation of the sound of bells. In short, while Litta is hardly deserving of the ludicrously extravagant eulogiums which have appeared in the press concerning her singing, she is still an artiste of great natural powers, whose voice will probably grow yet richer and more powerful instead of deteriorating. The remaining members of the company are deserving of more extended notice than we have space for. The best of them is Miss Bangs, the pianiste. Her performance of Thalberg's arrangement of the prayer in "Moses in Egypt," was simply superb, and well merited the *encore* which it received. The medley of popular airs which she gave in response to the *encore*, however, and the beautiful little fancy, "Fairy Bells," given in response to a second recall, pleased the audience better and were played equally as well. Miss Hattie McLain has a rich contralto voice of great expressive power, and she knows well how to manage it. Her song "My Love and I" was a truly fine performance. Mr. Skelton is the only cornetist that has been heard in Belleville since Levy who can make the cornet tolerable as a solo instrument. Miss Mantey's violin playing was characterized by the delicacy and fine expression which are nearly always found in the playing of lady violinists; but, like nearly all such playing, it lacked power. Her rendition of "The Maid of Dundee" in response to an *encore* was beautiful in its tender expression. Mr. Cleveland has a tenor voice of fine quality but lacking in power. It showed to the best advantage in the duet with Litta. On the whole the concert was one for which the public owes Mr. Reynolds a debt of gratitude. It was he that brought the company here, and he should receive the credit. It is to be hoped that all his future ventures in the same direction will be equally as successful.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

THE POOR SYSTEM.

The Poor & Sanitary Committee Reject the Proposition of the W. C. A.

The Poor and Sanitary Committee met a few minutes before the council met last evening.

PRESENT—Ald. Ostrom (Chairman), Petrie, McIninch, and Vandusen.

The following proposition from the Women's Christian Association was read:

Moved by Mrs. McLean, seconded by Mrs. Tannahill, that the Woman's Christian Association express their desire and willingness to undertake the control, in conjunction with the Chairman of the Poor and Sanitary Committee, of the poor fund of the City, and that a certain amount be placed in the hands of their Treasurer for that purpose, and that they place in the hands of the Chairman of the Poor and Sanitary Committee a monthly statement, in detail; also, that the Chairman of the Poor and Sanitary Committee be added to the advisory Board of the Association.—Carried unanimously.

Ald. McIninch moved that the proposition be not entertained.—Carried.

The Committee then adjourned.

CITY COUNCIL.

The City Council met last night.

PRESENT—His Worship the Mayor; Aldermen Campion, Clarke, Dickson, Diamond, Dunnet, Durand, Frost, Holden, McIninch, Ostrom, Petrie, St. Charles, Smith, Vandusen.

The minutes of the last meeting were read and approved.

COMMUNICATIONS, &C.

The following were presented and read:

From the School Board, submitting the annual requisition, amounting in all to $11,415.

From the Separate School Board, submitting the annual requisition, amounting in all to $2,043 43.

From Marian Thompson, asking for remission of taxes.

From G. E. J. Hanwell, in reference to assessment of the old Opera House.

To His Worship the Mayor, and Aldermen of the City of Belleville:—

GENTLEMEN,—It being quite apparent that the present landing in this city of the ferry steamer between Belleville and the County of Prince Edward is quite unsuitable, dangerous to life and property, and greatly injurious to the trade of the city with that county, and that it should be changed,

And further, a desire having been expressed for a cheaper, better, and more frequent ferriage between the County of Prince Edward and this city, which would largely increase the valuable trade we might enjoy with the people of that County;

In view of these circumstances I beg to make the following proposition for the consideration of your honorable body:

I will build a new steamer similar to the *Prince Edward*, but of greater power, and to be iron-plated and so constructed that she would be able to run through ice until it got strong enough for ordinary crossing—each boat to leave either shore every half hour, and the fares to be say one-half the present rates, or lower, as may be agreed upon.

On other days than market days one boat to run to Massassaga Point and to the cemetery at almost nominal rates to be agreed upon between us, the city to extend my lease for a term of years longer, and give me a reasonable subsidy per annum.

I have the honor to remain,
Your obd't serv't,
JOHN JELLETT.

Belleville, 4th April, 1881.

From N. McCoy, asking for time to pay taxes.

From Jas. Craig, asking for the position of Cow Inspector, at a salary of $70 per annum.

From W. Alford and J. G. Thompson, to the same effect.

From Jas. Ross, Collector, stating that the amount of taxes collected in Bleecker, Baldwin, Murney and Coleman wards since the beginning of 1881 was $17,200.

From Shelby, Pullman & Hamilton, asking for a free license for an exhibition to be given by them on the Agricultural Grounds on the 30th inst.

A number of accounts were also presented.

The above were referred to their respective Committees.

NOTICES.

Ald. Diamond gave notice of a motion requiring James Ross, Inspector of Poor, to furnish a detailed statement of the wood furnished to the poor of the city during the months of November and December, 1880: also a statement showing the ages, occupations, &c., of those who have received assistance from the city during the same period.

Ald. Diamond gave notice of a By-law to amend and consolidate the By-laws relating to drunkenness and immorality.

The Street Pay-list having been passed,

Ald. Dickson moved that the Council adjourn till next Monday evening, seeing that there were so few Aldermen present.

The motion was carried, and the Council adjourned.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

A country doctor writes: "I am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

MORNING DESPATCHES

AMERICAN.

CAR SHOPS BURNED.

DOVER, N. Y., April 5.—The car shops of the Delaware, Lackawana and Western Railway, were burned here last night. Loss $75,000.

KILLED.

RICHMOND, Va., April 5.—Mayor C. Maurice Smith, aged 65, was thrown from a car near Port Royal, and killed. While United States District Attorney in Utah, he prosecuted Lee, and other Mormons implicated in the Mountain Meadows massacre, and was the first man who ever prosecuted Brigham Young, for which the Mormons made several attempts to assassinate him.

BILL VETOED.

MADISON, Wis., April 5.—The Governor yesterday vetoed the Legislative Appointment bill, greatly to the satisfaction of the Democrats.

EX-PRESIDENT HAYES.

CLEVELAND, O., April 5.—Ex-President Hayes arrived here yesterday on his way to Cincinnati to attend the re-union of the army of the Tennessee.

BASE BALL.

NEW YORK, April 5.—At base ball yesterday the Metropolitan Club made six runs and the Detroit League Club three.

A DISORDERLY COUPLE.

Charles Vance and a companion were arrested at a prominent hotel last evening for being drunk and disorderly. It is stated that Vance is the son of U. S. Senator Vance, of North Carolina. It is rumored that he is on his wedding trip.

ENLARGING CANALS.

The Produce Exchange yesterday adopted resolutions for enlarging canals and abolishing tolls.

WASHINGTON SPECIALS.

The *Herald* says the general belief is that both sides of the Senate are more than ever determined to remain obstinate, and there are still a number of Senators ready to speak if the dead-lock lasts long. The southern political situation will be thoroughly ventilated. There is some talk among Republicans about giving the New York collectorship to some one entirely unconcerned with New York politics.

There is a growing belief that there will be a pretty thorough reorganization of the Cabinet before the administration gets under fair headway.

The *Times* says that Gen. Hazen says that there is no controversy between himself and Gen. Sherman towards using officers from the line for signal duty.

The Ute Commission, which has been in session a fortnight, concluded its labors yesterday, and stated that if the people of Colorado so desired the Commission will locate the Utes outside of that State.

The *World* says it is reported that Gov. Foster will be offered the Berlin Mission to succeed White. If a vote could be had now on Robinson's nomination, he would be confirmed by at least a two-thirds vote. It was understood in the caucus yesterday that Conkling said that so far as the nominations were concerned he was ready to proceed at once, but for other reasons thought it best to wait.

POLITICAL PROSECUTIONS.

CHARLESTON, So., April 5.—Information has been filed by the United States District Attorney in 620 political cases. Forty-three of the ablest lawyers of the State will defend the prisoners.

MORE FLOODS EXPECTED.

OMAHA, Neb., April 5.—The Missouri River has risen 18 feet above low water mark, and continues to rise slowly. Considerable damage is threatened to establishments on the river bottom. The fires in the smelting works have been put out. It is anticipated there will be a much greater rise from breaking gorges above.

AFTERNOON DISPATCHES.

GLADSTONE IN THE COMMONS.

LONDON, April 5.—Gladstone, at the end of his speech in the Commons last night, said this was his eleventh and probably last budget. In enforcing the arguments in favor of a further reduction of the debt, he pointed out that during two years, to March, 1880, while the population increased one per cent. and the expenditure 2 1-16 per cent., the revenue receipts declined one-half per cent.

THE TIMES ON GLADSTONE.

The *Times* says that Gladstone's speech last night of over two hours was delivered without any perceptible abatement of his characteristic energy.

STRIKE AT BELFAST.

There is a partial strike of the Belfast linen operatives against the ten per cent. reduction of wages. From six to seven thousand looms have stopped.

RELIEF TO EARTHQUAKE SUFFERS.

ATHENS, April 5.—The Government are sending a number of surgeons and some money to Clio, to relieve the overwhelming distress caused there by the earthquake last Sunday.

NEWSPAPERS TO RUSSIA LIMITED.

BERLIN, April 5.—The despatch of foreign newspapers to Russia is limited to persons specially priviliged, and provided with police permits.

FLOODS IN SPAIN.

SEVILLE, April 5.—The inhabitants of Triana Subur are being rescued in boats from the first floor windows of their houses, except some who prefer to remain at home. The water is still rising. From the towers of the Cathedral the country appears like a vast lake. The inundation is the most serious this century. The gas works, Duke Monthenseir's Palace, and many streets in the upper part of the town, are flooded.

FEELING IN RUSSIA.

ST. PETERSBURG, April 5.—At an extraordinary meeting of the Slavophil Society, Aksakoff, the editor of the *Moscow Russ*, maintained that the country did not require a constitutional account of the intimate connection between the monarch and the people which did not exist in Eastern Europe. Prince Imeretinski and Attorney-General Pabedonossteff drew up an address to the Emperor which was numerously signed.

QUEENSTON, April 5.—Arrived, the *Germanic*.

WASHINGTON, April 5.—Indications: Lower Lakes, fair during the day, areas of snow during the night.

"Hail bounteous, beauteous, gladsome Spring" – this was Mark Twain's prize poem–but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

"Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

After trying many midicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—— ——and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4eod&wly

Proclamation by the President.

Fault-finding is so seldom indulged in by those who use medicines manufactured by the World's Dispensary Medical Association, that the President of that corporation the Hon. R. V. Pierce, M. D., has issued a special request or proclamation to any and all persons, if there be such, who may have taken or shall hereafter use any of the family medicines made and sold by the said Association, in all countries of the world, and who have not derived full benifit from said medicines, that if they will write the said Association a description of their maladies the Faculty of the Dispensary will advise them with respect to the successful treatment of their diseases. Dr. Pierce's Golden Medical Discovery is gauranteed to cure all humors, from the common blotch, pimple or eruption, to the worst scrofula or king's evil, and those virulent poisons that lurk in the system as a sexuel or secondary affection resulting from badly treated or neglected primary diseases. It also cures bronchial, throat and lung diseases. Favorite Prescription is guaranteed to cure female weaknesses and kindred affections. Extract of Smart-Weed cures bowel affections, colds, and all painful rheumatic and neuralgic affections. Dr. Pierce's Pellets (little sugar-coated pills), are the little giant cathartic. Address, Warld's Dispensary Medical Association, Buffalo, N. Y., or Great Russel Street Buildings, London, England.

DIED.

In Sidney on the 4th inst. after a lingering disease RILLA daughter of W. H. Knox, aged 12 years, 10 months 17 days.

At Buffalo, on the 5th inst., WILLIAM KING, only brother of Mrs. M. B. Roblin, aged 57 years.

Commercial.

CHAPTER XXXN.

ONE DISCOVERY FOLLOWING ANOTHER.

The consternation of both Captain Holm and Squire Todhetly at Tessa's discovery of her mother's picture in the old portfolio of sketching was overwhelming. They looked at each other blankly with wild and staring eyes, while Tessa gazed upon the little sketch in a species of ecstasy, seeing in the picture the lovely girlish face that had haunted all her dreams.

Captain Holm broke the dread silence by a smothered imprecation at Todhetly's carelessness, but his words reached Tessa's ears only in a low, incoherent, muttering.

"Whose picture is this?" agaid demanded Tessa, drawing a long inspiration, as she looked up at last into Todhetly's face. "It is no fancy sketch. I have seen this lady somewhere, I know, long, long, ago in my very early childhood. Tell me, Squire Todhetly," and her bright face grew eager and tremulous; "was she not my mother?"

Todhetly looked apprehedsively toward Holm. The latter had averted his face and taken up a newspaper thus throwing the whole burden of explanation upon his host. That he was intently listening to every word of Tessa and Todhetly, his manner and attitude indicatedr

"What a strange thing instict is?" said Todhetly, making up his mind on the instant to carry the matter with a high hand and resolving to make capital for himself by winning Tessa's confidence if that were possible.

"You were but a mite of a child when she died, but that is a picture of your mother at your age, or a little earlier."

"My mother!" breathed Tessa softly, as if murmuring a prayer her tearful gaze again settling upon the sketch.

Holm's paper rustled angrily.

"Your father cannot bear to hear her name uttered," said Todhetly, in a voice barely loud enough to reach the strained hearing of the Captain. "She—it is hard to say it to her daughter, but I must say it in justice to Holm,—she caused your father a great deal of sorrow, misery and shame. He cannot bear to hear her name mentioned—"

"I will believe nothing ill of her," interrupted Tessa, in a passionate voice. "The owner of that face could have done nothing wrong. Look into the pure eyes; at the sensitive noble face; at the proud, firm mouth! She never did a disgraceful action—and you must not tell me so?"

"Some of the most wicked women in the world have been very fair and beautiful," sighed Todhetly.

"But she was not wicked. I will not believe it."

"She broke your father's heart," said the Squire artfully. "She wrecked his life. Poor fellow! If you had known him as I knew him in his youth, you would wonder that one woman could have wrought the change."

"Did you know my mother?" asked Tessa abruptly.

"Ah, yes, I saw her repeatedly. Holm and I blonged to a regiment that was quartered in her neighborhood. I made several sketches of her face for Holm This picture was less than what she was, than what she promised to be. She was sallow and thin, but there were in her possibilities of wonderful beauty. Let me beg of you never to speak of her to your father, and as for the picture, I will destroy it."

He reached out his hand for it, but Tessa held it beyond his reach.

"It is my mother's picture—all I have in the world to speak to me of her, and it should be mine," she said. "You must let me keep it, Squire Todhetly. It is worthless to you, but it is priceless to me."

She rolled up the sketch and put it in her pocket.

Todhetly, with a discomfited look, took up the portfolio and returned it to the ancient cabinet.

"Your father will not be pleased to have you retain that picture, I fear, Miss Holm," he said, when he returned to her.

"He cannot refuse to allow me to keep my mother's picture," answered Tessa quietly.

"One would think," said Todhetly, "that the memory of your mother with all her faults, is dearer to you than the actual presence of your father!"

Tessa's face changed slightly, and a troubled expression quivered about her sensitive mouth.

"I refuse to believe that my mother had any grave faults," she said; "and as to my father, I am not yet acquainted with him. With me, a love for my mother is instinctive. My affection for my father must be a growth of time."

Holm again rustled his paper loudly, and muttered a stifled imprecation.

Tessa was silent and thoughtful for a brief space, during which a carriage entered at the open gates and rolled up the drive. It was the Heathstead barouche, as Todhetly recognized at a glance, and was occupied by Mrs. Gwynne, who reclined upon the rear seat in great state, with her voluminious purple silk drapery heaped around her, a very small purple bonnet perched upon her ponderous arrangement of hair, and with an ermine sack enveloping the upper part of her immense figure. Her purple gloved hands were thrust into a tiny ermine muff. She looked even more red and apoplectic than usual, and an expression of severity made her face almost rigid.

"My cousin Molly!" said the Squire in dismay, having heard a humorous account from Holm of the Captain's interview with Mrs. Gwynne. "She has come to give me a rating I suppose, now to receive it."

He arose and went out to meet his cousin assisting her to alight, a task requiring considerable time and patience. Then, puffing heavily, and quite out of breath, Mrs. Gwynne seized the arm of the stout Squire, and was conducted into the house, and into a room across the wide hall from the drawing-room.

There was no fire in this room, and the air was chill and damp, indicating that it was seldom used. Mrs. Gwynne sank heavily upon the nearest seat and shivered, her countenance becoming a lively purple in hue.

"This is decidedly hospitable, Todhetly," she said complainingly. "But I suppose the drawing-room is given up to your guests!" and she sneered. "I saw my late governess sitting at the window as I drove up. Shameless creature! I suppose she does not know or care that it is highly improper for her to visit at the house of an unmarried gentleman."

"Her father is with her," suggested Todhetly.

TO BE CNNTINUED.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL use.

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

THE LEADING

CLOTHING HOUSE

WE beg to notify our numerous patrons and the general public, that we are now in receipt of our

New Spring Stock of Fine Woollens,

Consisting principally of English, Irish, Scotch and Canadian Tweeds, Scotch and Irish Serges, French and English Worsteds, Fine West of England Trouserings, Black and Blue Broadcloths, Black and Blue Venetians, Doeskins, Cassimeres, &c, in all the largest and most complete stock of the kind in Canada.

OUR CLOTHING is, without doubt, quite equal if not superior to the best New York Clothing for style, fit and materials, a proof of which is the large number of First Prizes awarded, as at Toronto, Hamilton and other Exhibitions during the past season.

Gentlemen requiring FINE CLOTHING will find it to their advantage to inspect our Stock before purchasing.

We are this season, in addition to our Large Trade in Fine Ordered Clothing, making a specialty of Low Priced Tweed Suits, which we will make to order at the following prices:—

$12, $13.50, $15, $16.50.

PETLEY & COMPANY,

N. H. DOWNS' VEGETABLE BALSAMIC ELIXIR

Is a sure cure for Coughs, Colds, Whooping-Cough, and all Lung Diseases, when taken in season.

People die of consumption simply because of neglect, when the timely use of this remedy would have cured them at once.

Fifty-one years of constant use proves the fact that no cough remedy has stood the test like **Downs' Elixir.**

Price 25 cents and $1.00 per bottle
For Sale Everywhere.

HENRY & JOHNSON'S

ARNICA AND OIL LINIMENT

For Man and Beast.

The most perfect liniment ever compounded. Price 25 cts. and 50 cts.

For Sale Everywhere.

Ayer's

Sarsaparilla

Is a compound of the virtues of sarsaparilla, stillingia, mandrake, yellow dock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sustaining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so potent to cure all diseases resulting from impure blood. It cures **Scrofula** and **all scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.**

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impurity of the blood need despair who will give AYER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numerous low-priced mixtures, of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly seated. AYER'S SARSAPARILLA is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-purifier known. Physicians know its composition, and prescribe it. It has been widely used for forty years, and has won the unqualified confidence of millions whom it has benefited.

Prepared by Dr. J. C. Ayer & Co.,
Practical and Analytical Chemists,
Lowell, Mass.

SOLD BY ALL DRUGGISTS EVERYWHERE.

MANHOOD RESTORED.

Prescription Free. For the speedy Cure of Seminal Weakness, Loss of Manhood, and all disorders brought on by indiscretion or excess. Any Druggist has the ingredients. Address DAVIDSON & CO., 78 Nassau St., N. Y.

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Drington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge. Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

It is unequalled for cleaning painted walls and wood work, Plate and Silver ware,—also for Crockery, Glass, Marble and Parian ware.

Daily Intelligencer.

FRANCE AND CANADA.

Organization of an International Steamship Company.

An Extensive Immigration Scheme.

LONDON, April 4.—Mr. J. H. Perrault, who has been to Paris promoting the formation of a Franco-Canadian steamship company to take advantage of the subsidy to be given by the Canadian and French Governments for steamship service between the two countries, arrived in Montreal on Monday last, and came to Ottawa to-day. He claims to have been entirely successful in forming a powerful European syndicate, composed of social, political and financial leaders in Paris and on the Continent, representing capital to the amount of 350,000,000 francs, and willing to undertake the service. This syndicate has received the approval of the Ministre de Porte and Minister of Marine of France, and only needs like approval from the Canadian Government to enter upon the work. They will engage to put chartered vessels on the fortnightly service between the two countries within sixty days from the date of the conclusion of the arrangements, and will build steamships as rapidly as possible specially for this line to continue the service. Mr. Perrault is the bearer of a definite proposition from the parties to the Canadian Government, which he will submit at an early day.

In connection with the steamship syndicate another company has been formed for the purpose of establishing a colony in the Canadian North-West. For this some two and a half million francs are pledged. It is proposed to establish the colony on the line of the Pacific Railway in a compact body. For this purpose some eight townships will be needed to begin with. Mr. Perrault while on the way from Paris visited the offices of the Pacific Railway Syndicate in London and arranged satisfactory terms with them. They professed themselves much pleased with the prospect of a powerful colonization company undertaking to settle a portion of their lands, and are understood to have given very favorable terms to the promoters. Should the steamship syndicate succeed in obtaining the agreement sought with the Canadian Government the colonization company, also represented by Mr. Perrault, will negotiate for the alternate blocks of land belonging to the Government, so that the lands obtained from the Syndicate and the Government will form a compact block for the colony. The colonization scheme is designed as subsidiary to the steamship line, and will promote emigration to Canada from France. The company will furnish each emigrant a lot of land, with a portion of it made ready for a crop, and a house erected in advance. They will also supply one yoke of oxen, farming implements, and seed and provisions sufficient to keep the family till the first crop is grown, the whole at cost, and to be repaid with interest at 6 per cent. in ten equal annual payments. It is intended immediately that the proposals are accepted to enter upon the preparation of the lands, so as to have this year's ploughing done and the buildings erected in advance for next year, preparatory to a large influx of emigrants then and in the following years. For this purpose emigrants brought out this year will be employed at good wages by the company, making the improvements himself, also erecting saw and flouring mills, &c.

While in Paris promoting these extensive and important schemes, Mr. Perrault delivered a number of lectures on these subjects, which were reported and extensively published in the Paris newspapers ; and he read prepared papers before the Paris Chamber of Commerce and other similar bodies representing various interests in France. He had likewise repeated interviews with President Grevy and members of the French Government. A very deep interest was taken in the several projects by leading statesmen, publicists, manufacturers, and exporters. In this connection the Paris Chamber of Commerce have decided to hold an exhibition of French goods in Montreal in September next. They will also at that time send out special commissioners to inquire and report concerning the chance of securing their supplies of breadstuffs and other products of Canada direct. Mr. Perrault speaks very hopefully of the tariff revision now being made in the French Parliament, and has no doubt that Canada will be placed upon the same footing as the most favored nation by the tariff amendments, which will be passed before Easter.

Defrauding the Revenue.

(*From the Peterborough Review.*)

Whatever room there may be for difference of opinion as to the merits or demerits of a particular tariff, there can, among honest men, be no difference of opinion as to the advisability of honestly and rigidly enforcing an existing tariff as long as it remains in force. If the tariff be a bad one, nothing will remove it so speedily as its proper enforcement ; if it be a good one its benefits cannot be realized so long as it is not properly enforced.

The circumstances connected with the contract for the Chaudiere Bridge, at Ottawa, fully illustrates the truth of the last remark. When the tenders for its construction were called, two Canadian and five American companies tendered, and upon their being opened the two Canadian tenders stood lowest on the list, with the exception of that of Messrs. Clarke, Reeves & Co., of Philadelphia, who were accordingly awarded the contract. When the bridge arrived it was, however, entered at such a ridiculously low valuation, compared with the contract price, ($112,000) that the authorities seized it for under-valuation. Of course the American contractors and their agents complained loudly of the treatment they were receiving at the hands of the present energetic and determined Minister of Customs and his subordinates. The thing was an outrage instigated by jealous Canadian competitors. The investigation, however went on, and after an examination by experts into the whole matter Messrs. Clarke, Reeves & Co., have not only had to pay the sum of $26,000 in cash over and above the amount they intended to pay, and nearly three times the difference between their own and the next lowest tender, but one of the experts in his report calls attention to the necessity which exists for a strict system of inspection into all entries of iron work imported into the Dominion, and adds that in this particular item of bridge work entries have been made at from three to three-and-a-half cents per pound when it should have been valued at from five to six cents per pound, and in an article upon the subject the *Monetary Times* calculates that within the past five years the Dominion has been defrauded out of fully $40,000, chiefly by this firm, in this one item alone, and recommends that the Minister of Customs proceed against them for the purpose of recovering all the money they appear to have defrauded the country out of—a suggestion in which we concur.

While we would not have the Minister of Customs and those under him treat every importer as a rogue, it is obvious that in order to do simple justice to the honest importer a very sharp look-out must be kept on all. The honest man will be benefitted by it, while the dishonest man will soon, it is to be hoped, be taught that in dealing with the Custom House, at any rate honesty is the best and only safe policy. Of course it will be easily understood that what has been going on in the case of 'bridges" is no doubt going on in other branches of trade, to the great injury of our manufacturing industries, as well as the revenue, but if the people generally will only eschew the false fear of being called "informers," and inform the Department, as they ought to do, whenever, and as often as they have good reason to believe that goods have been passed at a less valuation than an honest interpretation of the law requires, and the Department does not hesitate to enforce the penalties upon all who are wilfully caught defrauding the revenue, fear of the consequences, if nothing else, will soon put a stop to such unjust and dishonest practices.

The Largest Farm.

The wheat ranch of Dr. H. J. Glenn, about twenty miles above the town of Colusa, Colusa county, California, is perhaps the largest and best known in the State. The Chicago *Tribune* says that on being asked recently why he raised nothing but wheat, Dr. Glenn replied : "It is the only crop that will bear transportation ; it is the only crop not perishable. I must not raise on my land what ruins me, but what is profitable." Dr. Glenn's ranch comprises about 60,000 acres of land, and the number of acres in wheat each year ranges between 40,000 and 50,000. Reckoning an average each year amounts to something more than 1,000,000 bushels. This enormous amount of grain requires vast appliances for planting and bringing it to market ; and the capital invested in machinery alone sums up a considerable fortune.

During the harvest time there are employed on the entire ranch some 500 men, Dr. Glenn is general-in-chief of his forces, and the ranch is divided, for convenience of operations, into nine smaller ranches—each with dwelling house, barns, blacksmith shop, and other necessary buildings. In charge of these are seven foremen, under whom are sixteen blacksmiths, fourteen carpenters, six engineers, six machinists, five commissaries, and numerous cooks and servants. The common workmen are divided into gangs, and detailed where they are needed. There are 130 gang ploughs ; 60 herders, to which belong 180 waggons ; 6 cleaners, 100 harrows, 18 seeders, 6 threshers, 6 engines. Besides, there are many smaller instruments and vehicles, which cannot be classified. Co-operating with their human brethren in the great labor are 1,000 work horses and mules, with a kinship of 1,000 brood mares and younger stock which has not yet achieved the dignity of labor. There are 32 dwelling houses, 27 barns, 14 blacksmith shops, and other structures sufficient to swell the aggregate to 100. The machinery could not be replaced for $125,000; the work horses and mules are worth $110,000 ; the brood mares and young stock $75,000, and the buildings on the place $100,000. —*Scientific News.*

Ireland.

The construction of the double line of railway between Waterford and Fiddown is being rapidly proceeded with.

The Irish party now declare that it is their intention to remain quiet, and to allow the unobstructed progress of public business until the Irish Land Bill has been introduced.

Owing to dullness in trade the Belfast spinning mill have been working short time for several months past. On the 12th inst., however, it was decided to run the mills on full time, and reduce the worker's wages 10 per cent.

On the last occasion the pack of the United Hunt Club hunted near Castlemary, Cloyne some of the dogs partook of a poisoned substance, which was doubtless, laid for them over the hunting country, and five died on returning to the kennel at Middleton. Three others were sick, but recovered from the effects of the poison.

Scotland.

Several veins of lead ore have been laid bare in a field on Deeside by the action of ice brought down by the Dee.

A serious explosion of fire-damp took place on the 4th inst. in the Robroyston Coal and Ironstone Pit, belonging to Dunlop & Co.

Oyster fishing is being profitably followed on the West coast of Shetland, and large quantities shipped by the steamers for the South.

In a blocked train at Dava lately there were a number of cattle and pigs. Of the former 27 perished from cold and suffocation, and over 40 pigs have also died.

For some time several of the farms on the estate of Arbuthnott have been greatly infested by enormous numbers of grey rats of an extraordinary size. Children and cattle have been severely bitten by them.

The winter at Innerleithen is recorded as being the most extreme frost, the deepest snow-drift, and the highest flood, besides being in itself the longest winter that has occurred in this district for many years back.

The father of the present Attorney-General of the United States, John M'Veigh, married Susan Roddan, of Pleasance of Kirkmichael, and with their family emigrated from this country 47 years ago to Ohio.

During the recent storm several adventurous people made a journey to Trinity Muir Village on the tops of dykes and hedges, and they state that the snow was level with the eaves of the cottages there, and that they were speaking to the villagers through the attic windows.

A lady, writing from Golspie to a friend, refers to the great abundance of snowdrops in the vicinity, and gives an interesting account of their appearance as they clothe the woods with a mantle of white, which rivals the snow in purity. The appearance presented by these charming little flowers growing together in such abundance must be very remarkable.

Mrs. Mary Harrington, Kouchibouguac, N. B., says : "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

CROUP.—This disease is caused by the formation of a false membrane lining the wind-pipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat, This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OR THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a laboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause debility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

VALUABLE FARM FOR SALE

CLOSE TO THE

VILLAGE OF ROSLIN

THE farm lately occupied by William Gibson, being the west ⅔ of lot 3 in 1st Con. Hungerford, 150 acres, more or less, of which 100 acres are cleared and under cultivation. Soil,

Clay Loam and Well Watered,

good farm house, barn and drive house and outbuildings. Farm vacant. Possession given at once. A bargain offered. Apply to

BELL & PONTON,
Vendors' Solicitors.

FOR SALE

THE following valuable freehold property, being the East half of Lot No. 16, in the 1st concession of the Township of Marmora, in the County of Hastings, containing 100 acres of land, more or less, and the east half of Lot No. 17, in the 1st concession of the said Township of Marmora, containing 100 acres of land, more or less.

The above property is situate six miles back of the village of Marmora. About 150 acres of the above premises are cleared. The soil is of a sandy loam.

Apply to
MESSRS. BELL & PONTON,
Vendor's Solicitors.

FOR SALE.

THE following valuable farm lands, parcel 1 being composed of the west half of the south half of lot number 13 in the 6th concession of the Township of Tyendinaga, and County of Hastings. Parcel 2 being the east half of the north half of lot number 15, in the 5th concession of the Township of Tyendinaga aforesaid, each lot containing 50 acres.

Parcel I. has about 5 acres under cultivation, the remainder being wood land, all cedar. Parcel II. is entirely under cultivation, and on it there is a good frame house, 24x36, with a kitchen attached. The land is clay loam, near a church, post office and school house. It is situated 9 miles from Shannonville and 18 miles from Belleville and will be sold at a bargain. Title indisputable.

Apply to
MESSRS. BELL & PONTON,
Vendor's Solicitors.

FOR SALE.

THE following valuable Farm Property: The north half of lot number twelve, in the sixth concession of the Township of Murray, in the County of Northumberland, containing one hundred acres more or less. The land is rich clay loam. Good large concrete house with kitchen and woodshed recently built; good barn, sheds and carriage house, nearly new; on the premises is a large orchard of young apple trees of the best varieties. The farm is well fenced and well watered, convenient to a school, market and railroad. It is about two miles from Smith's Corners, on the gravel road, and situate in a good neighborhood about four miles from Frankford. The farm is a choice one. As this farm must be sold at once a bargain is offered. Apply to

BELL & PONTON
Vendor's Solicitors.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, APRIL 6.

The Shrievalty.

Dismissal of Sheriff Taylor.—Dr. Hope appointed.

Rumors have for some days past been current to the effect that the Sheriff of the County of Hastings was to be dismissed, as it was well known that strong pressure had been brought to bear on the Ontario Government by the numerous applicants for that office. Nothing came of those reports until to-day, when it was more persistently reported than before that Dr. Hope had been appointed. A representative of the INTELLIGENCER interviewed the doctor on the subject, and he candidly stated that, for once, rumor had spoken the truth; that a few days ago he had gone to Toronto at the request of Mr. Mowat, who tendered him the office, stating that it was the unanimous wish of the Cabinet that he should accept it, which wish he (Dr. Hope) decided to accede to. The Doctor further stated that he had not been an applicant for the position, and felt all the more gratified on that account. So far as this appointment is concerned, we have no hesitation in saying that it is a good one. Dr. Hope is well qualified for the discharge of its duties, and has deserved well of his party, to which he has rendered valuable services for a long series of years. His appointment will, however, be a grievous blow to sundry members of the party who have themselves looked forward to securing the office.

The public will require a full statement of the causes of Mr. Taylor's dismissal, and in their name we ask that the information be given without delay.

The present incumbent of the office has had no intimation of the action which the Government has taken in the premises, which is, to say the least, very remarkable under the circumstances.

What is the Reason?

What is the reason that Belleville is not making equal progress with other places in Ontario, similarly situated and having equal advantages with respect to location and facilities for trade development? What is the reason that Belleville is comparatively at a standstill, while other localities not so highly favored are going ahead with marvellous rapidity? It is a fact which will be generally conceded, that so far as situation is concerned, facilities for manufactures, natural advantages, access to the great markets of the Dominion and the world, Belleville occupies an exceedingly favorable position for becoming a manufacturing centre, and a much more advantageous position than other places which are already becoming famed for their manufactures. Then, what is the reason that Belleville has not taken advantage of the protective policy of the Government, and established industries which would very soon multiply our population, greatly increase our wealth, give an impetus to all kinds and descriptions of trade, and place us in the front rank of manufacturing towns and cities? There is no lack of faith in the benefits of the National Policy, for those engaged in manufacturing in this city, acknowledge with one accord that since the policy came into force, their business has greatly increased, and they are prospering as they never before prospered. There is no lack of industries to choose from, for although the field is being rapidly occupied, it is far from being covered, and there are a hundred minor industries besides those of larger growth, which might safely and profitably be gone into. There is no lack of capital, for there is money enough lying in the bank vaults, yielding only 3 per cent interest, owned by residents of Belleville and vicinity, sufficient to start and put in successful operation half a dozen cotton mills the size of that proposed to be established at Kingston. It used to be that that there was no lack of enterprise, for it was universally conceded that there was no more enterprising people in Ontario than in Belleville. What, then, is the reason? We ask the question in all sincerity, earnestly hoping that it will have the effect of inducing our citizens to find out the cause of the apathy and indifference that prevails with the view of applying a remedy.

We find that in Hamilton, Toronto, London, Montreal, Brantford, and many other localities, an exceedingly prosperous state of affairs exists, and this prosperity is mainly attributable to the increase in manufacturing establishments. It is not only to the mammoth concerns such as Rolling Mills, Sugar Refineries, Cotton Mills, &c., that this prosperity is owing, but the hundreds of small industries, which the wise protective policy of the Government has brought into existence, are building up these cities, and making them wealthy and prosperous. Although the ground occupied by these industries is being rapidly covered, still there is ample room for more. Take the question of Cotton production alone. At a meeting of the promoters of the Kingston Cotton mill on Friday last, Mr. Bullough, of England, who has had much experience in the manufacture of cotton, in answer to a question, said he did not anticipate an over-production in this country. The United States has 12,000,000 spindles, and Canada in proportion should have 1,000,000, whereas there were only 230,000. So that we have yet room for several Cotton mills in Canada before there is any danger of over-production. And so it is with other industries. The ground is not yet fully covered, and there is room to establish half a dozen or a dozen industries in Belleville, which would yield a profitable investment to their promoters, and make us a wealthy and prosperous manufacturing centre. We know of a number of people, men of small capital, who have expressed their willingness to subscribe stock in any well developed scheme that may be submitted by practical men. Now suppose the men of large capital take hold of some enterprise—say Smelting works—Car manufactures—Woollen mill—Pail and tub factory—or any other enterprise employing from 20 to 100 men; get all the possible information connected with such enterprise, obtain all the necessary facts and figures, and have some practical man acquainted with the working details—a man of reputation and experience—to assist in making its advantages known to the public, and we venture to say that even amongst the smaller capitalists—those who can afford to invest from $200 to $1,000—they will find a sufficient number to put into successful operation several manufacturing establishments.

It is of the highest importance that whatever is to be done should be done at once. Other places are making great efforts to win increased prosperity by establishing manufactures. Kingston, within the last few weeks, has made great headway in the race, and has already secured the permanent location and extension of the Locomotive Works, the construction of a Cotton Mill, the building of a Charcoal and Iron Furnace, the establishment of a Knitting Factory, and now talks of adding to her industries a Pin Factory. The enterprising people of Napanee have in successful operation an extensive Brush Factory, which Belleville might have had, if there had been more pluck and push exhibited here, and is now making arrangements to start a Glass Factory. Every day or so, we read of some new industry being started in Montreal, Hamilton, Toronto, and other places, and the same might be written of Belleville, if we had shown a little more push and enterprise. What is wanted is for some leading man to make a speciality of this business, and spend all his time and energy to obtain information about the kind and character of industries it would be wise to establish, and to get capitalists interested. It would pay the Civic Committee to employ such a man. Something should be done, and at once.

Editorial Notes.

DEFRAUDING THE REVENUE.

Under this heading we reproduce in another column a very interesting article from the Peterborough *Review*, in reference to the attempted fraud upon the revenue by the contractors for the Chaudiere railway bridge at Ottawa. The action taken by the Government in this, as in other cases of a somewhat similar nature, shows that the present Minister of Customs takes a different view of his responsibilities from that upon which his predecessor acted, and is determined to enforce the law as he finds it. This is a course of which every honest man will approve, as laws which are not enforced are worse than waste paper, because their non-enforcement engenders contempt for all law.

"STRATEGICAL NECESSITY."

Referring to the fact that the Opposition did not divide the House on the "coal tax," *Bystander* says "it was the fear of losing the support of the Maritime Provinces," which prevented their doing so. "For this," says *Bystander*, "they consented to dry up their tears of pity and harden their hearts to the sufferings of the western poor. Once more we recognize the strategical necessity."

To the Editor of the Intelligencer.

Religion and Politics.

DEAR SIR,—From the date that the Reform and Conservative Conventions selected their candidates to contest the representation of East Northumberland in the House of Commons, I closely watched the movements and utterances of both parties during the election campaign. No sooner had the Conservatives made public their nominee than the Grit press of the country announced that he was a Roman Catholic, and, sir, it seemed to me from the fact of their keeping that point continually before the public view, that they considered it the greatest barrier to his success.

When a position is sought by two Protestants, the world is never informed that one is an Anglican and the other a Methodist; but if a Roman Catholic opposes one who differs from him in religion, the persuasion of the former will certainly be associated with his name.

I, sir, am a Roman Catholic, but I must say that I have become heartily disgusted with those demagogues who would advocate the cause of another, because they are of the same religious persuasion, or would deprecate that man's cause on account of their differing from him in religion.

As a constant reader of your paper, I have noticed your course on this subject generally, a course which, if universally pursued, would produce pure legislation, and I must express my regret that every journal and every public man in the country cannot perceive the desirability of shunning that which is the chief cause of fanning those religious animosities which should never have a place in matters pertaining to our country's welfare.

You will pardon me for occupying this much of your valuable space, and, in conclusion, I hope that if the present generation cannot see the evil consequent upon such tactics, the rising one will not follow in their footsteps; for so long as this state of affairs exists, so long as religion is drawn into politics—no matter what religion it may be—never shall we have representative men who will possess that patriotism necessary for their position.

Yours very truly,
LUX.

BELLEVILLE, April 5th, 1881.

'THEY ALL DO IT.'—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing those disorders, and what is better, by their aid, they will stay cured.

FASHION'S FESTIVAL.

The Spring Openings.

A Fine Display of the Latest Novelties.

To-day was an eventful day for the ladies who follow the fashions—and who does not? No less than four of the dealers in millinery, mantles, dress goods and articles of that description announced the formal display of the latest novelties decreed by Dame Fashion, and the ladies who had been in a flutter of pleasant anticipation in regard to the forthcoming exhibit for some days past, sallied forth to see what was to be seen. Unfortunately the weather was cold and raw, the light coating of snow which covered the ground being more in consonance with the opening of the fashions for winter than those for spring; but despite this there was the usual large turn out and the show rooms of the different establishments were thronged during the day.

MESSRS. GEO. RITCHIE & CO'S.

This old-established house was the first visited by a representative of the INTELLIGENCER, and a survey of the various departments showed that their display is one of the finest and most extensive that they have made in years, their importations in all lines having been very heavy this season. In trimmed millinery the display is very large, and gives a complete exposition of the various styles, as no two of the hats and bonnets are alike. The articles shown are rich and in good taste, but amongst the whole there was nothing gaudy or pretentious—nothing which a lady of taste would not wear. The patterns are chiefly London copies of Paris models; two are direct from the hands of Parisian modistes, but the great bulk of the stock is of course the manufacture of the firm, and shows excellent taste and beautiful workmanship. Very pretty effects are produced by the use of *ombre* or shaded satins in various tints. The newest things in trimming are plaid ribbons and Roman stripes, whilst another popular style of trimming this season is satin merveilleux. The "terra cotta" is the most novel amongst the new shades of coloring. Laces are used in profusion, and there seems to be an endless variety produced by the manufacturers this season, to meet the demand both for millinery and neck wear. Fancy Tuscan hats and bonnets are prominent for dress wear. Black chips, with Tuscan braid trimming, are much fancied, also both white and black straws trimmed with steel, gold or silver braids. Ladies' evening head dresses are very pretty, and a great variety of untrimmed hats in straw, twist, Leghorn, Tuscan, chip, &c., are exhibited. Children's and misses' head wear are even prettier than usual this season, and the variety shown is very large.

A number of rich mantles are shown in various materials. The black satin merveilleux makes up beautifully; being softer, it drapes more gracefully than either satin de Lyon or gros grain. Laces and fringes are largely used for trimmings, and hood and sleeve linings are generally of old gold and plaids. One mantle lined in heliotrope color was pretty and attractive.

In parasols there is a great change in styles, many articles of this description being shown. Elaborate trimmings and linings of bright colors are the noticeable feature. The large sunshades will of course be in vogue, they being more useful than the smaller parasols.

Of dress goods Hindoo serges, French buntings and soft twills are the most prominent. They are used in combination with the same soft material in Roman stripes and likewise in checks. Washing materials, such as prints, sateens and muslins, will be much worn this season. There are some remarkably pretty goods in these latter materials. Buttons and trimmings are in endless variety.

The glove and hosiery department is well assorted, especially in fine goods. Several novelties are shown in gloves, amongst which is a new style, "the Mousquetaire," which as its name indicates is of French origin, and which is manufactured in kid, thread and silk.

The carpet department is very extensive, and comprises tapestries ranging from 50c per yard up to Crossley's best; Brussels from 90c upward; wool, union and real Dutch carpets; stair carpetings in tapestry, wool and Brussels, and a large assortment of floor oil cloths of English and American manufacture.

Of house furnishing goods, including lace curtains, this firm have a fine assortment, and of staples they carry a good stock in all lines. Buying from the manufacturers and importing direct, they are in a position to offer goods to the public at the lowest possible rates.

FOSTER & REID.

The display of spring and summer bonnets made by this firm is large and choice—the best, probably, of the many fine displays which Messrs. Foster & Reid have made. The imported bonnets and those made up from patterns deserve to be called gems of the milliner's art, but many of which have been trimmed at Foster & Reid's own establishment show an equal amount of taste and skill. It is difficult to select particular bonnets for special mention, those which would please the taste of one might be overlooked by another; but there are several which must strike every one as being handsome. Among these is a black satin one trimmed with jet; a black chip trimmed with jet and a wreath of coral-pink geraniums; a salmon-colored satin, trimmed with ostrich feathers of the same delicate color, and ribbon-ties to match (a superb piece of millinery, trimmed at their own establishment); a straw with straw trimmings and cardinal plumes; and one with a crown covered with steel lace, a wreath of button-roses and beautiful ribbon tails to match. A set was on display, consisting of a hat, pocket and fan, which was altogether unique. The hat was a Leghorn trimmed with cream plumes and crushed roses of different colors; the pocket was of black velvet trimmed with lace, and suspended by cord-and-tassel of straw; the fan was a huge weapon of Spanish lace ornamented with rose-buds—a most formidable weapon in the hands of a syren well skilled in its use.

The display of hats is not a whit behind the bonnet display. Some very captivating street hats are shown. One of black chip and trimmed with gold and steel lace, old-gold satin and black plumes, would be dangerous to the peace of mind of the majority of impressionable swains, when set saucily above a pretty face. A hat for a miss of fourteen is calculated to attract attention. It is a Leghorn trimmed with a cascade of cream lace with two wee humming-birds nestling in the midst of it, and crowned with two magnificent ostrich plumes. A flat black chip, simply trimmed with cardinal velvet and chenille, is far more attractive than many which are loaded with trimmings. A large number of children's hats and bonnets are to be seen, including several of the old-fashioned "Mother Hubbard" style. One of these, trimmed with cream lace and blue satin, will not probably remain long on display: some fond mother will secure it to set off the blooming face of her own particular cherub.

One of the most attractive things to be seen in this display was a cream-lace fichu with India muslin trimming and a bouquet at the breast.

The display of flowers was both large and varied. Crushed roses and poppies were the most numerous, but some beautiful straw-trimming, including wonderfully natural imitation of oats, were on view. The stock of untrimmed straw hats and of shaded plumes is also large and varied.

In the Mantle department some beautiful goods are shown. The most noticeable, perhaps, are the lace over-skirtings; these are of a very delicate fabric and are black, pink, ecru and delicate blue in color. They are intended to be worn over different colored silks or light goods. Their black lace buntings, all wool, Messrs. Foster & Reid make a specialty of. A splendid display of fine Satin-de-Lyon, for mantles, is also shown. Both these lines are imported direct. Near these is a large lot of fine stockingette cloth, intended for jerseys or tight-fitting over-dresses. This class of goods will probably become very fashionable this summer. The fine lot of Cretonnes for lambrequins and curtains should not be overlooked. A great number of quaint and pretty patterns are to be seen among these goods.

One of the most attractive features of Foster & Reid's opening is their display of black and colored lace gloves of silk and Lisle thread. They claim to carry the largest stock of gloves and hosiery in the city.

The parasol display is also worthy of notice. One magnificent specimen—a white satin one covered with black lace—is certainly "a thing of beauty," though it could not be called "a joy forever." Parasols during the present weather would not be much of a joy, and will not be until Vennor can be persuaded to send us enough sun to make them useful.

COSTELLO'S.

Mr. Costello makes his usual neat and tasteful display of all the leading novelties from London, Paris and New York. To describe styles, materials, trimmings, &c., would be but a repetition after what has gone before, but it may be said that the show-room has been arranged with excellent taste and that the same good taste is apparent in the trimming of the hats and bonnets shown, whilst in dress goods there is a large stock of all sorts of fashionable goods. Mr. Costello has a good assortment of staples, and anything in the line of dry goods and millinery can be procured from him at reasonable prices.

MUIR'S.

In his display of several of those
"Articles of ladies' fair,
To keep them beautiful and leave them neat,"

Mr. Muir is very little, if at all, behind the larger millinery establishments. A number of the bonnets and hats to be seen at his establishment are almost perfect models of tasteful millinery. Several beautifully trimmed specimens of the new and jaunty "Horseshoe Cap" are shown. As a lady's headdress these caps will supplant the old "Mob Cap." All of the hats and bonnets to be seen at this establishment were trimmed there, and many of them would rival the productions of Parisian millinery art. In the trimming of the Leghorn hats a new kind of maize trimming is largely used, which has a most artistic effect. Four of the most noticeable hats to be seen here are—the "Reckless," which is trimmed with white satin, steel lace and moss roses; the Bernhardt, trimmed with ecru lace, old-gold, and maize satin and a large maize plume, and shirred in front—(the lady who gave this hat its name probably wore it when she was dubbed "the divine Sara"); a black chip trimmed with old-gold, maize, and cardinal satin, and a black plume; and a poke-bonnet trimmed with a willow plume and old-gold. The flower display to be seen here is as large and varied as can be seen at any other establishment in the city.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by those celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

LOST,

A BOOK containing an agreement between certain parties whose names appear in the wording of the agreement. The finder will be rewarded by leaving it at this office.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health. Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

$5 TO $20 per day at home. Samples worth $5 free. Address STINSON & Co., Portland, Maine.

IN CHANCERY.

CRATHERN vs. THOMAS et al.

PURSUANT to a decree and final order for sale, made in this cause, and dated respectively the 13th day of April, A. D. 1880, and the 11th day of February, A. D. 1881, there will be sold by Public Auction, with the approbation of Samuel Shaw Lazier, Esquire, Master of this Court at Belleville, at Chancery Chambers, Shire Hall, in the City of Belleville, on

Friday, the 8th day of April,

next, at 2 o'clock p. m., the following land and premises:—

Parcel 1.—Being the rear or west end of lot No. 6, according to G. B. Spencer's plan of part of Lot No. 34, on the west side of Pinnacle St. in the City of Belleville, in the County of Hastings, and being the said lot No. 6, less a parcel thereof the full width thereof of the depth of one hundred feet, from the said west side of Pinnacle St., heretofore sold to Jacob Lockwood by John Lewis. The said Spencer plan was deposited in the Registry Office for the County of Hastings, the 30th day of October, 1846.

Parcel 2.—Being composed of parts of Lots 36 and 37, on the east side of Pinnacle Street, and Lot 36 on the west side of Church Street, in said City of Belleville, and may be better known and described as follows, that is to say:—Commencing at a point in the easterly limit of Pinnacle Street, at the distance of 50 feet on a course south, 16° east from the north west angle of said Lot 37, thence north 74° east along the southerly limit of the northerly 50 feet of said Lot 37, 158 feet more or less to a point at the distance of 16½ feet, measured westerly, and perpendicularly from the centre line of the Grand Junction Railway track, thence southerly, parallel to the said centre line of the said Grand Junction Railway track, to the southerly limit of Lot No. 37, thence south 74° west, along the said southerly limit of the said Lot No. 37, 96 feet 4 inches, more or less, to the easterly limit of Pinnacle Street, thence north 16° west 77 feet 7 inches, more or less, to the place of beginning.

Also—Commencing at the south-east angle of Lot No. 37, on the east side of Pinnacle Street, thence north 74° east along the northerly limit of Lot No. 36, on the west side of Church Street, 50 links, thence south 16° east, 45½ links, thence south 74° west, 98 links, more or less, to a point at the distance of 2 chains and 13 links from the east side of Pinnacle Street, thence north 16° west, 45½ links, more or less, to the limit between Lots numbers 36 and 37, thence south 74° west, 3 feet 10 inches, more or less, to a point at the distance of 16½ feet, measured easterly, perpendicularly from the centre line of the Grand Junction Railway track, thence northerly, parallel to the centre line of the Grand Junction Railway track to the centre line of the block, thence south 16° east, 45 feet, more or less to the place of beginning.

Upon parcel No. 1, is erected a stone building, now occupied as a stable.

Upon parcel No. 2, is a frame building, lately occupied by John Lewis, as a residence; and also a Frame Barn used by him as a Wood Shed.

The Vendor will not be bound to furnish any better title than appears in the Registry office, or such title by possession as the Mortgagor had in the premises.

The purchasers shall pay down deposits in the proportion of $10 for every $100 of the purchase money, and the balances thereof within one month thereafter. In all other respects the conditions of sale are the standing conditions of sale of the Court of Chancery.

For further particulars apply to the Vendor's Solicitor, and to Messrs. Bell & Bonton Belleville.

S. S. LAZIER.
Master.

COSTELLO'S

SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris London and New York

Trimmed Millinery.

We are pleased to announce to the ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

TESTIMONIALS TO

MITCHELL'S CANADIAN

HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.
MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.
MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

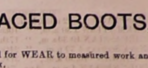
SPECIAL NOTICE TO THE AFFLICTED.



Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late. The winter is approaching, and if you neglect this opportunity you may be obliged to carry your disease until the opening of spring, and then sever your connections with those you love so well.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

DRS. WILLIAMS & NASH,
Daofe House, Belleville, Ont.

CITY BAKERY.

Oranges, Lemons, Oysters, &c.

Jas. Wallace,
Successor to J. & A. Wallace.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallible cure, it was used for similar diseases to great advantage until the list of those eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &. Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

BLACK CASHMERES.

SPECIAL VALUE offered in these Goods.

We have a Black Cashmere over one and a quarter yards wide **at 65 cents** per yard, that cannot be equalled in the city, and another 38 inches wide **at 52½ cents,** which is equal to what is usually sold at 75c.

We have also **Union Cashmeres** and BLACK PERSIAN CORDS very cheap.

We have just received a large assortment of

Spring Dress Materials,

in the latest styles, to which we invite the attention of the Ladies; and we have still 2 pieces of our celebrated **$1.29 Black Silk,** the best value in the market. It cannot be equalled under $1.75 to $2.00 per yard.

GLASGOW WAREHOUSE.

N. B.—We trust our customers will remember that our terms are *cash*, and *will not ask us for credit.* By strictly adhering to our terms, we can sell goods much cheaper than if we did a credit business.

Local Notices.

Notices under this head 10cts. a line each insertion. After six insertions 5 cts. a line.

Dr. Williams will arrive at the Dafoe House this evening and will be ready for the rush of patients to-morrow, also Friday and Saturday, with his partner, Dr. Nash, the resident physician in charge. The doctors have had wonderful success in our city since the opening of their office in January last, in treating patients for the various diseases of the head, throat and lungs. Many of the first families in Belleville have been treated by them and are loud in their praise of the success which has attended their efforts. The system of Medical Inhalation, as adopted by Drs. Williams and Nash, has proved very successful throughout Ontario, insomuch that both physicians and people have come to regard it as the only system of practice by which these diseases can be cured. The doctors will charge nothing for consultation on those three days, viz. Thursday, Friday and Saturday of this week.

SPRING suits, says almost every exchange received at this office. Up to the present time spring does not suit the people at all.

COOL BURGESS and company, in his new play "Our Sleighing Party," at the Metropolitan Hall on Tuesday evening, the 12th inst.

THROAT maladies are prevalent, and the persons afflicted should exercise the greatest care about exposing themselves to draughts.

THE river was thickly dotted with "snow ice," this morning, the froth created by the water tumbling over the dams freezing readily.

THE weather for the past three days has completely settled the oldest inhabitant, who has been ransacking his memory in vain for a precedent.

WHEN the weather is wet, we must not fret; when the weather is cold, we must not scold; when the weather is warm, we must not storm, but be thankful together whatever the weather.

THE Parlor Concert given at the residence of Alderman Dunnet last night proved a great success, a very large number being present. The Ladies' Aid Society also held a bazaar and the Organ Fund was increased by about $60.

IF the old Wiltshire proverb,

"As many mistisies in March
So many frostises in May"

be true, we are booked for the most intolerable of springs.

THE fortnightly entertainment given by the W. C. Association takes place in the Workingmen's Hall to-morrow evening. A good programme has been prepared. The admission fee, which is only 10 cents, will be taken at the door.

IT is advantageous to ærate the water of an aquarium occasionally by blowing into it a few times with a pair of bellows. The fish will be delighted. The side of the aquarium towards the light should be covered with yellow paper. A cover not to fit too closely, but calculated to keep out the dirt.

ONE of the latest musical creations is a piano solo entitled "Sounds of Spring." The most touching passage is that which depicts in "harmonious discords" the average citizen with pick and shovel, trying to clear his southerly walk of the icy snow, that sticks with a tenacity only equalled by that with which "winter lingers in the lap of blushing spring."

THE social at the residence of Mr. Thos. Donnelly, Charles St., last evening, was well attended, the rooms being almost overflowing. Such an unusually pleasant evening was spent that many pronounced it the pleasantest social of the series. The programme was furnished principally by the members of Mr. L. W. Yeomans' bible-class in Bridge St. Sunday School.

WEATHER PROBABILITIES. — Toronto, April 6.—Lakes, westerly to northerly winds, fair, cold weather.

THE MARRIAGE QUESTION.—Remember the Social and Lecture in the City Hall on Easter Monday evening in aid of the Bleecker St. Church. The Rev. Dr. Hunter will deliver his celebrated Lecture on the above subject. Admission to both Social and Lecture only 25 cents.

POLICE COURT.—At this court this morning Charles Lapointe was convicted of a charge of striking a woman, and was fined $10.00 and costs. Geo. Boulter brought a charge of fradulently removing property in order to escape paying rent, against James Patterson. The Magistrate adjourned the case for a week, and advised the defendant to pay his rent in the meantime.

HORSES FOR EXPORT.—Mr. Walter Fanning is buying a car load of horses for Mr. Jacobs, of Montreal, and has secured six nice animals. He is also purchasing three teams of the best horses that can be got for Mr. Welch, of the West Indies, whither they will be shipped *via* Montreal. This latter order came through Messrs. Redpath, of the Montreal sugar refinery. This is a small, though appreciable benefit of the N. P., without which the sugar refinery would still be lying idle and the Messrs. Redpath would have no correspondents in the West Indies. Mr. Fanning makes his headquarters at the Dominion House.

SUDDEN DEATH.—Mr. William Cowan, of Madoc, died suddenly in Kyle's Hotel last night of congestion on the lungs. About 3 o'clock in the afternoon he complained of illness and retired to his room At 6 o'clock he was called to tea, but not making any reply the room was entered and he was found lying on the bed breathing heavily and groaning. His brother instantly summoned three physicians to his bedside, but it was too late; all that medical skill and energy could could do was done, but done in vain, and a few minutes before 9 the patient breathed his last. The deceased was employed in Simmons' Hotel, Madoc. He was only married last fall. The body was removed to Madoc to-day.—Since the above was written Dr. Burdett, who was one of the physicians who attended Mr. Cowan, has informed us that the cause of his death was apoplexy.

THE CENSUS.—The work of taking the census has progressed with tolerable smoothness in the city, and as a consequence the Enumerators have made good headway. Occasionally they visit people who are stupid enough to seek to be obstructive. A man of this kind was encountered by one Enumerator, at a hotel where he is employed, yesterday. He flatly refused to tell his name or give the other information required, and returned to his work in the yard, but the census taker followed, read the clause of the law bearing on the case, and succeeding thus in achieving his object. It is as well for everybody to understand that the information sought by the Enumerators *must* be given.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

Marmora Correspondence.

Mr. D. Hamilton had a hair-breadth escape from severe injuries or death on the 25th March. A tree trunk from which the top had been broken was being felled by him, and when it began to totter he hastily tried to get out of the way. The stub went one way and the top the other, and as he was fleeing he fell and the top just struck the ground between his knees with great force, throwing up the soil in a shower.

Mr. D. Bentley, postmaster, has been taken ill again and is unable in consequence to attend to his duties. His place, however, has been filled in a satisfactory manner by Miss C. Bentley.

William Anderson, Esq., and wife, of Mountain View, Ameliasburg, have been lately for some days in the village.

Sporting Notes.

The New York *Spirit of the Times* gives the dimensions of the yacht which Cuthbert is now building here for the purpose of going to New York and competing for the *America* cup. It says: "In case she does not turn out to be a joint-stock concern, as the *Countess of Dufferin* was, there is little doubt but that the club will promptly accept a challenge, and waive the six months' notice. The *Gracie* this season will be faster than she ever has been before, and may safely be trusted to retain the Cup in contest with anything from Canada." The *Atlanta*, we may inform our contemporary, will be the property of her builder, and it is to be hoped that the six months' notice will be waived, as August would be the most favorable month for the contest.

The New York *Turf, Field and Farm* says: "At a meeting of the New York Yacht Club on Thursday evening, it was semi-officially announced that the famous English steel cutter *Vanduara* would come over here this season to race for the Queen's Cup. As it is reported that a Canadian sloop is in course of erection to enter for the trophy, the prospects are good for a very lively yachting season. A new Committee on the *America* cup was appointed. It was decided to have the annual regatta on June 16. Rear Commodore Herman Oelrichs offered a cup for sloops, to be sailed for druing the annual cruise." It is to be hoped that the *Vanduara* will try her speed against the New York Club's fleet, but there is just a probability—and not a very remote one—that the coveted prize will, by means of the *Atlanta*, be transferred to the custody of the Bay of Quinte Yacht Club before her arrival.

The Queen's Plate is to be run for this year on the Woodbine Park track, Toronto, under the auspices of the Ontario Jockey Club, and Dominion Day has been fixed for the inauguration of the club and for the race for Her Majesty's fifty guineas.

BOSTON, April 4.—For the stallion race at Beacon Park for a purse of $10,000, on Sept 15th, the stallion Piedmont, of Chicago, has been entered. He is owned and entered by Samuel J. Morgan.

Marine Notes.

The *Globe* reports no charters made at Toronto as yet. Lumber is offered at $1.25 per 1,000, but has not been taken. It is said that grain has been offered at 2¼ cts, but other by shippers 2c is all that has been offered.

Some one has been making the computation that Canada has 6,450 sailing vessels, and 918 steamers, with a gross tonnage of 190,159 tons.

A rule classifying the grade of steamboat engineers has been adopted in which a first-class engineer may be second to a first-class chief engineer; first-class assistant engineer may be second to a second-class chief engineer; second or third-class assistant engineer may second to a third-class chief engineer. In cases where the grade of the certificate does not qualify the applicant for the position, he may, if, on examination, he be found competent, obtain a limited certificate as provided in the Act.

The schooner *Baltic*, Capt. John Andrews, cleared this morning with coal for Toronto.—*Oswego Times, Monday.*

Sailors wages on the Baltic are $1.25 per day and this will probably be the rate on Canadian vessels running from this port. The Union here is evidently dissatisfied with the wages offered through the canal, which are said to be $1.50.—*Ib.*

The tonnage dues to be levied on all vessels in Montreal harbor after the first of April, 1881, are:—On steamboats, for each day of twenty-four hours, or part of a day, they remain in the harbor, reckoned from the hour of their arrival to that of their departure, 1 cent per ton register. On all other vessels per day, as aforesaid, ½c per ton register.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist——— ——— and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

—A special guard of troops is to be formed for the purpose of protecting the Emperor of Russia wherever he resides.

News Condensed.

—The Kingston Cotton Factory is to have 10,000 spindles.

—Sir John A. Macdonald is confined to his house by illness.

—The crossing is yet good between Kingston and the islands.

—Another enterprise talked of being established in Kingston is a pin factory.

—On the 5th, Thos. York, colored, aged 111 years and 10 mos., died in Niagara.

—Messrs. Gibbard & Son, of Napanee, are about to engage in the wholesale furniture trade.

—The carpenters of Toronto have struck for higher wages. The bosses refuse to grant the demand.

—Two manufactories of Canadian tobacco are about to be established at St. Cesaire, Quebec.

—Reports of floods in Dakota continue to be received. A large number of lives have been lost.

—No less than 30,000 persons are said to be without food in Spain, caused by the disastrous floods there.

—The City Council of Kingston has been asked to give a bonus of $25,000 to the proposed Cotton Mill.

—A company is being formed in Windsor, Nova Scotia, for the manufacture of cotton, with $100,000 capital.

—The Roman Catholic College at Rimouski, Quebec, was burned on the 5th inst. Loss $50,000; insurance $35,000.

—The number killed in the earthquake in Chio is now set down at 5,000 and 40,000 people are said to be destitute.

—It is stated that in the convention concluded with the Boers there is a secret clause forbidding the British to occupy Laing's Nek.

—Mr. Vennor told a *Witness* reporter yesterday that the present cold snap would be followed by a period of unusually warm weather.

—150 emigrants arrived at Montreal on the 5th inst. by the *Caspian*. They were of the better class, and destined for Ontario and Manitoba.

—The doctors announced yesterday that Lord Beaconsfield was maintaining his strength, about the only change in his malady being an aggravation of the gout.

—The Grand Trunk Railway Company have purchased 350 feet of water frontage east of the yacht club, including the Rees wharf, and the earth wharf east of Simcoe street, Toronto.

—About a dozen tenders have been received by the Marine and Fishery Department for the supply of 100,000 gallons of coal oil per year for the light-houses of Canada for five years.

—On Saturday last Charles Gallaney, from near Hamilton, perpetrated a nameless crime. He was arrested, and yesterday morning was sentenced to the Kingston Penitentiary for ten years.

—Hon. Mr. Chapleau, Premier of Quebec, and Mr. J. S. C. Wurtele, M. P. P., are at present in Toronto arranging for the establishment of the Ontario division of the Credit Foncier Franco-Canadian.

—It is said Buckley & Allan, of Amherst, Nova Scotia, have contracted to furnish 600 tons of meat, monthly, to an English Company, the promoters of which came out in the steamer *Parisian* a fortnight ago.

—Napanee is to have a glass factory. The capital will be $50,000, $25,000 to be expended in erecting the works, and $25,000 reserve capital to pay expenses until the business is established on a firm and paying basis.

—Great excitement prevails in Tunis over the troubles with France, and there is every chance of a war, but hostilities are not expected before Sunday. The French troops at the frontier will await reinforcements.

—A proclamation in the Dublin *Gazette* yesterday ordered all the arms and ammunition in several counties, cities, towns, and baronies in Ireland to be lodged at the nearest police station for the purpose of procuring licenses.

—Lieut-Colonel Gibson, M. P., of Hamilton has consented to take command of the Wimbledon team. His Excellency the Governor-General telegraphed an earnest request to Mr. Gibson on Saturday that he would take command.

—A long and interesting discussion of the temperance question took place yesterday at the meeting of the Toronto Presbytery. A resolution, moved by the Rev. D. J. Macdonnell, recommending all members of the Church to practise total abstinence was finally carried.

"THERE will be sharp frost in the beginning of April with a snow fall on the 4th or 5th, but the spring will open favorably and everything will be pretty well advanced by April the 5th." This was Mr. Vennor's prediction written for his almanac in September last. His snow-storm has arrived sharp on time. The Chicago *Times* says: "Vennor is getting to be most dissagreeably accurate in these matters."

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

After trying many medicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopseas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

A country doctor writes: "I am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

'Hail bounteous, beauteous, gladsome Spring"—this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

CHICAGO MARKET.

CHICAGO, April 6.—Close S. R. $7.60 bid April; $7.67½ bid May; $7.77½ bid June. Pork $15.60 nom. April; 67½ May; 77½ June. Lard $10.52½ nom. April; 60 asked May; 67½ to 70 June. Wheat 1¼ to ¼ nom. April; 6 May; 7 June. Corn, 38⅞ April; 42⅞ May; 2⅞ June; 3¼ July; 4¼ Aug. Oats, 32¼ asked April; 35 to 35⅞ May; 35⅞ June; 33⅞ asked July.

MORNING DESPATCHES

AMERICAN.

THE NEW BROOM.

WASHINGTON, April, 6.—The first month's operation under James, shows a saving of $22,300 in the expenses of mail service.

N. Y. STREET CLEANING.

NEW YORK, April 6.—A petition signed by many of the prominent merchants here, favoring the retention of Merrit as Collector, was sent to the President last evening. In the case of street cleaning, the Bill as it passed the Senate becomes law. The Mayor will make Lieut-Commander Gorringe, superintendent of the street cleaning bureau.

LEAVE OF ABSENCE.

Gorringe has gone to Washington to obtain leave of absence from the Secretary of the Navy.

BOYCOTT ARRIVED.

Capt. Boycott, whose treatment by the Land Leaguers gave rise to the term, "Boycotting," arrived from England yesterday. He travels under an assumed name.

DR. TYNG RESIGNED.

Stephen H. Tyng, Jr., on account of ill health has resigned the pastorship of the church of the Holy Trinity and will retire from active work in the ministry. Dr. Wilbur Watkins of Baltimore has been called to succeed him.

UNSEAWORTHY VESSELS.

A mutiny occurred on board the ship *Aurora* yesterday, the crew alleging that the vessel was unseaworthy. The shore gang compelled the crew to return to duty, after an encounter in which a sailor was severely stabbed by a mutineer. The latter was put in irons and the vessel sailed.

WASHINGTON SPECIALS.

The *Sun's* Washington special says that developments the past two days have caused it to be generally regarded as probable that the deadlock in the Senate will remain unbroken many weeks. Seven of nine members of the Judiciary Committee, including Edmunds, are distinctly committed against the confirmation of Matthews.

The *Tribune's* Albany special says that Robertson says that he will not withdraw from the Custom House contest.

Republican politicians claim that the original street cleaning Bill if it becomes law will deprive the Republican party of 10,000 votes.

TOWN DESTROYED BY FIRE.

BRISTOL, Tenn., April 6.—Irvington, County town of the new County Dickenson, has been totally destroyed by fire.

SEVEN PERSONS DROWNED.

BRANCHVILLE, D. C., April 6.—A boat with nine persons was capsized during a gale on the Ashlee River near Bennett's wharf. Seven, including two women and two children, were drowned. The survivors were almost frozen when rescued.

MISSING COUPONS.

RICHMOND, Va., April 6.—The members of the Legislative Committee, which investigated the second auditor's office, announces that from 80,000 to 90,000 receivable coupons are missing from the office. Among the coupons found are many unstamped, unpunctured or unindorsed, as required by law, and in this condition could be used again if abstracted. It is said the Assistant Treasurer at Richmond has received the some coupons a second time in payment of taxes.

OBNOXIOUS TAX BILL.

NASHVILLE, April 6.—The low tax Democrats last night decided to endeavor to defeat a bill which provides for interest on bonds for the settlement of the State debt.

SITTING BULL AGAIN.

BUFORD, Dakota, April 6.—200 more Sioux are coming here to surrender. Sitting Bull sends word that he will come to Buford and surrender as soon as the ground is sufficiently dry to make travelling good.

BANK COLLAPSE.

NEWARK, N. J., April 6.—The collapse of the First National Bank was attributed to the defalcation of $90,000 on the part of Lewis Davell, receiving teller. Davell's mother had assigned all her property to the bank to make the loss good. She now sues for the restoration of her property on the ground that her son did not misappropriate the bank's money. She alleges that the apparent deficiency was caused by memoranda which the cashier and paying teller required Davell to hold as cash.

NEW YORK, April 6.—Arrived, *Vandalia* from Hamburg.

ELECTION RETURNS.

ST. LOUIS, April 6.—Complete returns show that a most remarkable revolution has taken place in the Democratic party. Ewings' (Republican) majority for Mayor is 13,255. The remainder of the Republican ticket was elected by majorities of from 12,000 to 16,000 and six Republican members of the upper house of the Municipal Assembly received majorities of from 4,500 to 5,000. This is not claimed as a straight Republican victory, but is the result of a bitter contention among the Democrats and a most determined opposition to Overstoltz and the manner in which he was nominated by a large faction of that party.

CLAIMING BACK SALARY.

RICHMOND, Pa., April 6.—Mahon filed a petition in the United States Court praying that $125,000 salary be allowed him as president for five years of the Atlantic, Mississippi & Ohio R R.

SAD TALES OF SUFFERING.

SAN FRANCISCO, April 6.—Chinamen from Peru give a sickening account of their countrymen during the war and since the cessation of hostilities. In sacking the Chinese quarter at Lima over 80 Chinese merchants were killed and upwards of $1,000,000 worth of property was destroyed. Since the close of the war large numbers of coolies have been murdered. Leading men have appealed to foreign representatives for protection.

AFTERNOON DISPATCHES.

LORD BEACONSFIELD'S CONDITION.

LONDON, April 6.—Beaconsfield's condition is very encouraging.

THE LAND BILL,

LONDON, April 6.—It is expected that Gladstone's speech introducing the Land Bill into the Commons to-morrow will occupy three hours. It it anticipated that the Bill will provide under the head of sale of tenures that every tenancy will first be offered to the landlord, and the landlord may prohibit the sale of the tenancy where reasonable grounds exist. The question what are reasonable grounds may be referred to the land court.

Where the landlord proposes to raise the rent to purchasing tenants, the latter may resell and shall be entitled to demand from the landlord capitalization equal to ten times the amount of increase demanded. The sale of tenancy bars the claim to compensation for disturbance or improvement, and the receipt of such compensation bars the right of sale. Where a tenant devises interest to his children, or any other persons, only one of the devisees shall occupy the tenancy, the object being to prevent a subdivision contrary to the wishes of the landlord. When a tenant accepts the increased rent proposed by the landlord, the tenant may not be disturbed for fifteen years.

There shall be no eviction compulsory or increased rate, except as in consequence of the breach of clause in statutes conditions. If the tenant declines the proposed increase and quits, he shall if he sells the holding be entitled, from the landlord to ten times the amount demanded by the increase. The statutory conditions which bind the tenant as above, are for the punctual payment of rent, a guarantee against waste, submission to the ordinary rights of inspection &c., and prohibition to sublet or divide without a written permission from the landlord.

The limitation in the Land Act of 1870 of compensation for disturbance to £250 will be amended by a sliding scale. Where rent is under £30 the compensation will be seven years' rent. Where the rent is under £50 not to exceed five years rent. Where the rent is £100 and upwards three years; the Act of 1870 will be further amended to tully protect the tenant's right for compensation for improvement; where the tenant surrenders to a new tenant at landlord's wish, or takes a different holding, the Act of 1879 relating to compensation for improvements or eviction by title paramount is affirmed; what is fair rent may be decided by the court on application of a landlord and tenant from time to time during the period of the tenancy; but the courts of decision shall have no retrospective action. When the court has fixed rent there is to be no disturbance for 15 years. This period of 15 years security for the tenant occurs frequently in the Bill and is constituted the statutory term, which must expire before the new term can begin or the new proceedings be had. In Dublin arbitration may be had on agreement. The machinery of the Land Courts will chiefly be in the hands of the Land Commissioners. A second Bill, amendatory of the Act of 1870, relates to the purchasing powers under the Bright clauses.

WASHINGTON, April 6.—Indications: Lower Lakes, areas of light snow, partly cloudy.

BIRTH.

On the 5th inst. the wife of ex-alderman Doyle, of a son.

Commercial.

BELLEVILLE MARKETS

INTELLIGENCER OFFICE,
Belleville, April 6, 1881.

There is no wheat offered. The last sale of a car load was made at $1.21. To-day car loads are held at $1.22. Messrs. Lingham and Downey & Preston are offering a car load of Manitoba spring wheat for seed.

Barley is lower in sympathy with a dull market in Oswego, where 20,000 bush. bright Canada was sold a few days since on private terms, understood to be under $1.15.

Rye is firmer. About 300 bush. was sold here yesterday at 85c. In Oswego rye is higher at 97c in bond.

Dressed hogs are scarce. The price varies considerably; about $8 50 is the average.

There is no change to note in hides and pelts. Deakins sell readily at 60c and in some cases for prime 65c is paid.

Clover seed being slow of sale, buyers have dropped the price offered to $4,25 per bush.

Timothy seed is also lower at $2.75.

Butter still remains scarce and commands ready sale at our outside quotations,

Eggs are plentiful at 12½c per doz.

Hay $10 to $12 per ton.

WHEAT, FALL—$1.00 to $1.20.
BARLEY—60c. to 70c.
RYE—80c. to 85c.
OATS—35c. to 36c.
PEAS—65c. to 70c.
LAMB—6c to 7c per pound.
HOGS—Dressed, $8.50.
BEEF—Dressed, $4.00 to $6.50.
HAMS—9c. to 12c.
BUTTER—Tub, 16c to 20c.
BUTTER—Roll 20c to 25c.
EGGS—11c. to 13c. per dozen.
HIDES—Rough $5.00 to $6.00, inspected $7.50.
SHEEPSKINS $1.00 to $1.40
CALF SKINS—10c per lb.
DEAKENS—40c. to 60c.
WOOL—25c. per lb.
CLOVER SEED—$4.25
TIMOTHY SEED—$2.75.
LARD—9c to 11c.
TALLOW—Rough, 4½c.
TALLOW—Rendered, 6½c.
CABBAGE—50c per doz.
POTATOES—40c. to 50c per bag.
FLOUR—Wholesale, $5.50 per bbl.
FLOUR—Retail, $6.00 per bbl.
HAY—$11.00 to $12.00 per ton.
CHICKENS—40c to 60c per pair
DUCKS—50 to 60c per pair.
GEESE—50 to 60c.
TURKEYS—75c to $1.50
STRAW—$4 to $5 per. ton.

TORONTO MARKET.

TORONTO, April 6. — Fall wheat No. 1 $1.15; No. 2, $1.12; No. 3, $1.09. Spring—No. 1, $1.20; No. 2, $1.17; No. 3, $1.10. Barley—No. 1 97; No. 2, 90 to 93; No. 3 extra, 83; No. 3, 73. Peas—No. 1, 76; No. 2, 74. Oats—No. 1, 38; No. 2, 37c. Corn—59. Flour—superior, $5.00; extra, $4.90; fancy, $4.80; strong bakers $5.35; spring extra, $4.90, superfine, $4.50; fine, $4.00. Bran—$14.50. Clover seed—$4.50 to $4.75. Timothy $2.50 to $2.75. Hogs—$7.50 to $8.00. Butter 12 to 18. Barley (street) 75c. to 90. Rye, 87 to 88c. Spring wheat, $1.15 to $1.20. Fall wheat $1.08 to $1.13. Oatmeal $4.10 to $4.30. Cornmeal $3.00. Pork $18.50.

Wheat firm. Flour held higher. Barley steady. Peas and rye in demand. Oats and corn unchanged. Bran scarce and wanted. Hogs dull.

MONTREAL MARKET.

MONTREAL, April 6.—Flour, receipts 1,000 bls.; sales 500 bls. Market turn stronger, holders asking advances. T. MUIR.

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville. 316d21t-Sw1t.

Wanted,

A YOUNG Man to read for two or three hours daily to a Phonographer. One who would be willing to take instructions in the art as remuneration preferred. Apply by letter to P. O. Box 39.

Would also like to correspond in corresponding style with Lady or Gentleman, with a view o mutual improvement. 310tf

To Cure Consumption,

Bronchial affections, weakness of the lungs, take a small teaspoonful of Dr. Wilson's Pulmonary Cherry Balsam every two hours.

To Cure Coughs Take

Dr. Wilson's Pulmonary Cherry Balsam in small quantities as often as the coughing fit comes on.

To Cure Whooping Cough Take

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After gargling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

BY MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

"Her father! I suppose the person who called for her this morning is her father? He insulted me shamefully, Todhetly, and in my own house too—took me for a cook, you know, and called me 'good woman,' and 'worthy creature.' I declare, I was almost paralyzed with anger and astonishment. I have come here to warn you that these persons are scheming to entrap you into a marriage, and to insist that you dismiss them from your house this very day."

Todhetly smiled at her suggestion and at the domineering tone in wich it was uttered.

"I am sorry that you don't like my friends, Molly," he said coolly, "but I can't turn them out of my house to please you, you know."

"Then you have no sense of your family dignity? No consideration for me—a Todhetly?"

"Well, you see, a man must think of himself first of all," said the Squire good-naturedly. Captain Holm belongs to a fine old family, very rich—"

"But they cast him off. You told me so years ago. The man has been your ruin, Tom. He led you into bad courses, and brought a great deal of sorrow upon your parents. He is no gentlemen, and if you have any regard for my wishes, you will send him away immediately. Is it possible that you do not see what the pair are aiming at? They would like to rule the Grange—"

"There's no use talking in that tone to me, Molly," said the Squire impatiently. "You have acted very foolishly toward Miss Holm from the beginning, and you may as well understand first as last, that I am her suitor, and that I mean to marry her."

Mrs. Gwynne uttered a shriek of dismay.

"You will allow that minx to rule here?" she exclaimed.

"You had better speak of her differently," said Todhetly, his face darkening. "She will be Mrs. Todhetly in one month from to-day, whether she is willing or not."

"As if she would not jump at the chance!" cried Mrs. Gwynne, rather inelegantly. "And you have kept single all your life, Tom, to get taken in by that shameless governess creature at last! I am shocked. You need not expect me to recognize her as your wife. Why, you told me once, about the time you went out to Canada, that there was some scandal about this Captain Holm and his wife, and that Mrs. Holm's father had paid money to keep the matter out of the papers. And after you came back to England, when I asked you about the fellow, you said he had gone to the bad, and that his wife had married a person of quality. You must remember telling me so. These people that get divorces never amount to anything, and the scandal is terrible. No doubt the girl's father and mother were both improper. The mother may have found some foolish nobleman to give her the shelter of his name, but in that case she won't recognize the offspring of her first marriage. They are a bad lot, Tom, and I advise you to rid yourself of them.'

"You might as well talk such nonsense to a wooden post as to me," said Todhetly, in a tone of annoyance. "I know what I am about. You can be polite to Miss Holm or not, just as you please, but if you are not you will regret it. She will be a great heiress some day, and I love her."

"An heiress?" sneered Mrs. Gwynne. "I suppose Captain Holm told you so? I should think you were too old a bird to be caught with such chaff. Do not say I did not warn you. The man insulted me grossly—cook, indeed!—and I wouldn't forgive him if he turned out to be the Duke of Kamschatka, and had the wealth of the Rothchilds. 'Worthy creature!' He will learn if I am a 'worthy creature,' if you are so infatuated as to marry his daughter. You have connived at his insults, I dare say. You have not treated me with common civility since I came into your house, Thomas Todhetly. You have put me into a cold room, and behaved very badly to me. Under the circumstances, I feel justified in leaving you to your fate, and warn you that the doors of Heathstead will be closed to you until you make a proper apology to me for what has passed, and until you have recovered from your foolish infatuation for that—that mink.

Mrs. Gwynne arose, swelling with indignation and self-importance, and throwing her head back until the plumes of her bonnet touched her shoulder, swept out of the room. Todhetly followed her, angry and sullen.

She was about to pass out to her carriage when the sound of voices in the drawing-room reached her ears, seeming to turn her self-righteous anger in an unreasoning fury. She swerved in her course, hurrying toward the drawing-room, and throwing open the door widely, halting upon the threshold.

Captain Holm was standing with his back to the fire, and Tessa still sat at the window. The father had just addressed some unimportant remark to his daughter, and the young girl was in the act of replying to him when the door was flung violently open and Mrs. Gwynne flushed and apoplectic, looked in upon them with angry eyes.

Capt. Holm stared at her in a haughty surprise, but she was too thoroughly aroused to heed him. Fixing her gaze upon Tessa, she said, with a sneer:

"I have been talking to my cousin, Miss Holm, about the impropriety of having a young lady in his bachelor establishment. The fact may injure his reputation. You know best whether you care to preserve yours. I own I don't expect much from a girl of your history, but I advise you to leave your worthless father if you have any self-respect, and go to your mother. No doubt you could force her to take you in, although she has another husband. She is a woman with a history," and Mrs. Gwynne indulged in another sneer, "but she may decide to rescue you from the scandal that made busy with her and hers."

With this outburst of her low and vulgar nature, and her spiteful malice, Mrs. Gwynne beat an abrupt retreat to her carriage, and departed triumphant.

It is needless to say that her three hearers were alike overwhelmed with amazement.

Todhetly turned red and pale by turns, and stood by the door utterly panic-stricken. Capt. Holm was paralyzed, and remained on the hearth as if turned to stone, save that his eyes blazed with demoniac rage that must have appalled Mrs. Gwynne, had she but seen it.

Tessa became pale as any snow-drift, and looked at the two conspirators with wild appeal, and she could not command her voice to speak. Her hands flew to her throat, a sudden constriction occurring there.

TO BE CNNTINUED.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

In cases of Chronic disease which doctors have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co., a trial bottle for 10 cents, or a regular size bottle $1. For sole by JAS. CLARKE & Co

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Beaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines. It is the only diploma ever issued for grapes and grape vines in this province."

A MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL Use.
THE OLDEST BEST & MOST WIDELY KNOWN FAMILY MEDICINE

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

Ayer's
Sarsaparilla

Is a compound of the virtues of sarsaparilla, stillingia, mandrake, yellow dock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sustaining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so potent to cure all diseases resulting from impure blood. It cures **Scrofula and all scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.**

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impurity of the blood need despair who will give AYER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numerous low-priced mixtures, of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly seated. AYER'S SARSAPARILLA is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-purifier known. Physicians know its composition, and prescribe it. It has been widely used for forty years, and has won the unqualified confidence of millions whom it has benefited.

Prepared by Dr. J. C. Ayer & Co.,

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞ Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞ This Lecture should be in the hands of every youth and every man in the land.

General Superintendent.
Belleville, Dec. 18th, 1880. 189d

For washing Flannels so they will not shrink, use THE CHINESE WASHER or Dry Soap. It possesses all the properties of the Finest Soap in a concentrated form.

It is unequalled for cleaning painted walls and wood work, Plate and Silver ware,—also for Crockery, Glass, Marble and Parian ware.

Daily Intelligencer.

To Fasten Cloth on Wooden Surfaces.

The following is said to be an excellent method of fastening cloth to the top of tables, desks, etc. : Make a mixture of 2½ pounds of wheat flower, 2 tablespoonfuls of powdered rosin, and 2 tablespoonfuls of powdered alum; rub the mixture in a suitable vessel, with water, to a uniform, smooth paste ; transfer this to a small kettle over a fire, and stir until the paste is perfectly homogeneous without lumps. As soon as the mass has become so stiff that the stirrer remains upright in it transfer it to another vessel and cover it up so that no skin may form on its surface. This paste is applied in a very thin layer to the surface of the table ; the cloth, or leather, is then laid and pressed upon it, and smoothed with a roller. The ends are cut off after drying. If leather is to be fastened on, this must first be moistened with water. The paste is then applied, and the leather rubbed smooth with a cloth.—*Scientific News.*

Raspberry Culture Made Easy.

It is a source of common regret with farmers that small fruits require so much care and attention, and that, too, in the season when they are hardest at work at something else. Field work must be done at all events, and so the "berry patch" struggles on single-handed with weeds and grass till it submits to the inevitable sward. Some years ago, coming into possession of a batch of black-cap raspberries that had received the usual shiftless culture, I treated them in the following way : After carefully ploughing and hoeing them, I covered the ground with a heavy layer of strawy manure, and the work was done, not only for that year, but for the two years following, only renewing the mulch each spring. Only a few straggling Canada thistles will ever grow through such a mulch ; the soil is always rich and moist, and the berries can ask no better treatment. Since that time I have tried the same plan without removing the sod, and find that the result is quite as satisfactory. Late as it is in the season now, any raspberry plot can be reclaimed by a liberal application from the horse manure pile. Farmers, try it, and you will not need to complain that berries cost more than they are worth.—*J. C., in N. Y. Tribune.*

Lawn Grasses.

A lawn always handsome adds great beauty to any country or village residence ; but the matter of making and keeping it so is found some trouble by many. We have mixtures of seeds, sold by seedsmen, claimed to be specially adapted to the lawn, but they often fail to prove entirely satisfactory. A better result is often attained by simply relying upon manuring with manure from stock fed on old meadow hay. Either of the following grasses will give alone a fine sod, and often succeed where other varieties will not : *Poa annua*, a soft, dwarf grass, common around back doors of old residences, foot paths, and shaded places, will often succeed in places where no other grass will grow, such as on the northerly side of buildings, or beneath the drip of trees. It also thrives admirably in shaded angles much trodden. Probably the seed of this little poa (which is true to name), sold in this country, is imported. A small quantity of seed suffices to cover the ground in a few years, where there is sufficient richness of soil. The other species is that very common wayside grass, a species of red-top, which differs from ordinary red-top (*Agrostis*) as sold in the seed stores, in size and character of growth. This grass is specially adapted for dry and gravelly soils not abundantly supplied with manure, but is easily destroyed by ploughing, although it will bear a closer feeding than *Poa pratensis*. The annual poa is claimed by botanists to be an annual, but it can hardly follow the law of common annuals, as it will continually reproduce itself when cut with the lawn-mower. May there not be reason to believe that some other plants, if not allowed to seed heavily and often cut, will survive more than one winter? A thin soil, heavily manured in spring, induces a rank growth, requiring frequent cuttings, expending the necessary store of water in the soil, showing often withered spots by August and September.—*W, H. White, in Country Gentleman.*

Position of Married Women in the United States.

There are thirty-eight States in the Union. In twenty-eight of these a married woman has legal ownership and separate control of all property owned by her before, or descending to her after, marriage. In ten States her proprrty owned before marriage is secured against any attempt of her husband to alienate it without her consent, but he has full control of incomes resulting from it ; and in two of these states the husband receives property which, were she single, would descend to her. In twenty-one States a married woman's earnings are her separate property ; in eight States her right to such earnings is legally restricted in various ways, as in Georgia, where a married woman can own absolutely as separate property her own and her children's earnings deposited in a savings bank "if the same do not exceed $2,000 ;" and in nine States a woman can hold absolutely in her own control all property coming to her from any source save by gift of her husband—as in Massachusetts, where a recent decision of the court under this law was that a woman could not own her own wardrobe if her husband gave her the money to buy it ! This decision, we may add, a legislative enactment has very recently attempted to overrule by ordaining that a married woman *may own* her personal apparel in Massachusetts.

In twenty-one States a married woman is solely liable for her antenuptial debtf ; in five States her husband is liable for them to the extent of the property she brought to the common stock at marriage.

In sixteen States a married woman can make a will devising her separate property according to her wish ; in twelve States she can so will her estate, provided she gives her husband as much as the law of that State would give him if she died intestate ; and in one State she can make a will by her husband's written consent.

In nine States special enactments qualify a married woman to be executrix or administratrix ; in others the right is secured under other forms of law.

In twenty-four States a married woman may sue and be sued separately from her husband; in other States provision is made for their union in various specified suits.

In fourteen States married women can cause their husbands' lives to be insured for their benefit, and retain the policy against all outside claims, within certain limits of amount. In twenty-two States there a homestead acts which secure a certain amount of property, the home and its belongings, to the widow or wife, against all creditors of the husband. In fifteen States a married woman may carry on and control a separate business without limitations ; in ten States she can do so with some restriction, which vary from a simple requirement that she shall file her intention to do so in court to the necessity of proving that her husband does not support her properly.

Cement for Leather.

One who has tried everything says that after an experience of fifteen years, he has found nothing to equal the following as a cement for leather belting : Common glue and isinglass, equal parts, soaked for ten hours in just enough water to cover them. Bring gradually to a boiling heat, and add pure tannin until the whole becomes ropy or appears like the white of eggs. Buff off the surfaces to be joined, apply this cement, and clamp firmly. —*Scientific News.*

England.

In few cities are there more than half a dozen railway stations. In London there are at least 150.

Lord Napier of Magdala is to be offered the rank of field-marshal, in which case he will vacate the Governorship of Gibraltar.

Major General Alister Macdonald, aide-de camp to the Duke of Cambridge, it is understood will succeed to the command of the force in North Britain.

A recent calculation of Professor Geikie's puts the species of English mammals at forty, of reptiles at thirteen, of land birds 136. Of flowering plants and ferns 1425 species are now known.

There are no fewer than six different breeds of ponies in Britain, varying in height from seven to fourteen and a half hands. They are the Shetland, the Welsh, the New Forest, the Exmoor, the Dartmoor, and the Yorshiremoor.

British heads are gradually growing smaller. Within the last quarter of a century the dimensions of the head have shrunk on an average one-seventh of an inch, at least so says a paper recently read before the Bristol Naturalist Society.

But one mechanical working man has ever been honored with a burial in Westminster Abbey ; and that was Graham the clockmaker. Graham made exact astronomy possible by his great improvements in time-pieces. He invented the dead-beat escapement and the grid-iron compensating pendulum, and he was the first to make clocks that would run for many days without winding. Graham was also a maker of great quadrants, and instruments of that sort. His funeral was attended by all the members of the Royal Society.

STRENGTH OF INSECTS.—At a meeting of the Maryland Academy of Sciences recently Dr. Theobald showed a species of a beetle and gave the following figures : Weight of beetle, two grains ; weight moved by it 5½ ounces—2,540 grains, or 1,320 times the weight of the bettle. A man weighing 150 pounds, endowed with the strength of this insect, should therefore be able to move 108,000 peunds, or nearly 100 tons.

EMIGRATION TO QUEBEC.—The Montreal *Gazette* says : "We learn from Quebec that the Land and Emigration Company, under the presidency of Lord Dunmore, and the active management of Mr. Stockwell, have paid the full instalment of the purchase money upon a hundred thousand acres of land, in the Eastern Townships, purchased from the Quebec Government with a view to its colonization, and that the balance will be paid promptly according to the terms of the purchase. The Company propose to enter energetically upon the work of bringing out and settling people on the lands, and we may fairly look forward to a great impetus to the settlement of the waste lands of this Province. In no part of the Dominion are the prospects of settlers better than in the Eastern Townships.

—By special request of the Governor General, the lecture delivered by Prof. Macoun on the "Fauna and Flora of the North-west prairie lands," is to be repeated at Ottawa on Thursday next.

—The scandal which has been exciting high social circles in Germany has resulted in the divorce of Prince Carolath from his wife, and the final act in the drama is expected shortly in the shape of a marriage between Count Herbert Bismarck and the divorced lady.

—It is stated that nine million feet of square timber will find its way to the Quebec market from the Upper Ottawa this season. A number of shantymen are returning to Ottawa from Michigan, the inducement being the improved wages paid by the Ottawa lumberman.

—Since the first shipment of cattle from Halifax to England on the 23rd of January 1879, to the last, per steamer *European*, nearly 8,000 head and 3,500 sheep have been sent across. They comprise 32 shipments, and their total value in round figures was $830,000.

—The Montreal Board of Trade held its monthly meeting yesterday, and discussed the question of the abolition of tolls on the Canadian canals. The feeling seemed to be in favor of urging the Government to follow the example of the State of New York and abolish all tolls on our canals.

—A Utica architect has made plans for a spoon factory to be built at Niagara Falls, Canada side, by the Oneida community. The main building will be 45 by 100 feet, four storeys and a basement. A tinning factory near by will be 40 by 130 feet, and two storeys high. Both are to be solidly built of brick.

—The Intercolonial traffic at Halifax for the six months ending March, was 8,996 cars inwards, and 4,352 outwards, an increase of 2,438 and 737 respectively over the corresponding period of 1879. The increase inwards was principally coal, hay, cattle and deals. There was a decrease of 300 cars of flour, caused by home production. The increase in outward shipments was in sugar, molasses and fish. There was a decrease in traffic in English freight, caused by the Allan Line making Boston instead of Halifax the winter port.

RULE for calculating the pressure of steam on a cylinder boiler at any given number pounds of steam : Multiply the diameter in inches by the length in inches and by the pressure per square inch ; the result is the total pressure tending to rupture the boiler.

Mrs. Mary Harrington, Kouchibouguoc, N. B., says : "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

Mothers ! Mothers !! Mothers !!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth ? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

TESTIMONIALS TO

MITCHELL'S CANADIAN

HAIR RESTORER.

TO THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.
MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.
MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

Daily Intelligencer.

BELLEVILLE, THURSDAY, APRIL 7.

France and Canada.

The efforts of the Government to extend the direct trade of the Dominion with foreign countries is meeting with very gratifying success. The establishment of a line of steamships between Halifax and Brazil was announced some time since, and now we learn that a steamship line, to trade between France and Canada, has been inaugurated; that there will be a very large emigration from France into our North West Territories; and that, no doubt largely owing to the strong representations of our Government on the subject made some time since, Canada will be placed on the same footing as the most favored nation with respect to her trade with France.

This is highly gratifying intelligence, which will no doubt be received with the favor that it deserves. Canada has heretofore traded with France, which needs the products of the Dominion, just as the Dominion requires many of the manufactures and products of France. But this trade has in the past been carried on in an indirect manner, namely through the exporters and importers of New York. By establishing direct trade between the countries, the profits of the New York middlemen will be struck off the exports to and the imports from France, besides unnecessary railway freight and other charges, so that the products of each country will be cheapened to the other, and thus the trade will be encouraged and extended, and be made more profitable to all concerned. The Government are entitled to a very large amount of credit in this matter, as the effect of their action cannot fail to afford a considerable stimulus to some of our manufacturing industries as well as to the agricultural interest, and will besides attract to the Dominion a large number of immigrants of a highly desirable class.

East Northumberland.

The Toronto *Tribune*—which is the organ of Mr. Fraser—has the following significant remarks concerning the recent election in East Northumberland:

"It would be equally ridiculous in us to say that there is no politics in religion, or no religion in politics. In point of fact, religion is either everywhere, or it is nowhere. But it is to be understood that the mere question of tariff, or of party politics, has nothing to do with religion. If a man be a Conservative, or if he be a Reformer, let him act according to his belief. In this respect the Reformer may be a Christian and the Tory a Pagan, or *vice versa*; the thing is one which belongs to the individual, and who dare be his judge? Yes! There is one. The Editor of the *Irish Canadian* has a creed of his own. He believes that every Catholic should vote for every other Catholic, and that all political principle should be sunk in the one notion that the man is of a certain nationality and has the endorsement of Mr. Boyle. The contest in East Northumberland was not one of politics, but of bigotry. The Tories had the constituency at their feet, and their leaders thought they could make a little capital for the general election by placing Mr. Kennedy forward as their standard bearer. Now, we have no objection to Mr. Kennedy as a politician. It is possible that he has studied the different system of political economy, and found the Tory one to square with his judgment. If so, we do not blame him for posing as a Tory candidate. We did not ask our friends in the riding to interfere one way or the other, and we do not reproach them now, because Mr. Kennedy has been left more than 200 behind. The *Globe* and the *Mail* may say what they please; *but we maintain that public questions had little or nothing at all to do with the issue. It was a mere trial of bigotry against principle, interjected into politics*, and bigotry proved the stronger. When the *Irish Canadian* threw its arms around and asked everybody to vote for Kennedy, because Kennedy was a Catholic, it was manifest that it had given the note to every Protestant elector in the riding to vote for Kennedy's opponent. The Belleville INTELLIGENCER may be right or wrong in attributing a criminal alliance between the *Irish Canadian* and the Hon. Mr. Mowat. Certainly we are bound to admit that the *Irish Canadian* could have adopted no more effective means than it did to defeat Mr. Kennedy. We are glad that it succeeded in this instance; but the policy which trades upon the patriotism and the principle of one's fellow-countrymen is something to be despised."

The *Tribune* is in error in stating that we charged that Mr. Mowat and the *Irish Canadian* had formed an alliance. Our allegation was that the *Canadian* was playing a double game, namely, by professing to support Mr. Kennedy because of his religion and his nationality, irrespective of politics, it took the best means to ensure his defeat, and did so with that very purpose. This belief is strongly entertained by Conservatives hereabouts, and by none more so than by those Irishmen who profess the Roman Catholic faith. The letter of "Lux" in our yesterday's issue, expresses this feeling in a perfectly clear manner.

'THEY ALL DO IT.'—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

Those Appointments.

Up to noon to-day, neither the Sheriff nor his Deputy had received any intimation as to the action of the Ontario Government in dismissing them, nor the reasons which led to their dismissal. Both gentlemen are surprised at the turn which affairs have taken, as they are unconscious of any cause whatever for their dismissal from office, definite information as to which first reached them through our columns yesterday afternoon. This star-chamber mode of procedure has been received most unfavorably by the people of Belleville, and it is imperative on the Government to give full explanations at once. It is the general belief here that the Sheriff and Deputy Sheriff have been dismissed without any substantial reason, in deference to the long-continued pressure of a number of hungry office-seekers, who have for some years past been clamoring for these coveted offices. Certainly the circumstances of the case seem to bear out this view. There have been no charges brought; no form of investigation, which would have enabled the Messrs. Taylor to defend themselves, no intimation that any hostile action was intended, yet, with a total disregard for British fair-play, the official heads of two important officers have been chopped off without the slightest ceremony. This sort of tyranny, unless satisfactory explanations be forthcoming, will be resented as it deserves.

We further learn that Mr. Patrick O'Brien, of this city, has been appointed Deputy Sheriff, greatly to the annoyance of not a few members of the party, who claim to have served the Grit cause longer and more faithfully than he has done.

There is also a rumor abroad that Dr. Murphy has received the appointment of Physician of the Deaf and Dumb Institute, and to the jail in succession to Dr. Hope, and we have reason to believe that the report is true, as it reaches us on good authority.

Editorial Notes.

THE GLOBE AND MR. O'CONNOR.

Says the *Mail*: "The *Globe* made an untrue statement about Hon. John O'Connor. The statement was corrected in Parliament, but repeated with a professed belief in its truth the next day. Mr. O'Connor gave a more explicit denial yesterday in a letter to the *Globe*, the editor of which intimates that Mr. O'Connor must receive the benefit of his denial, but 'before a parliamentary committee further interrogatories may be put.' The *Globe* is trying to kill Mr. O'Connor politically in order that it may write on his tombstone, 'Done to death by slanderous tongues.' The attempt, like many others of the same kind, will fail: and as to a parliamentary committee, the remains of the Reform party now in Parliament will never ask for for it." This is another exemplification of the *Globe's* "cardinal principle" of never accepting as true the statement of a political opponent. The only wonder is that it published Mr. O'Connor's brief but clear and convincing statement.

Prince Edward Correspondence.

HUFF'S ISLAND.

The Sabbath School at this place is said to be the best in the township. There is no coaxing there; all, old and young, feel they have a part to bear.

ROBLIN'S MILLS.

Revival services are to commence at this place this week. They will be conducted by Rev. Mr. Potter.

CONSECON.

A lecture is to be given here on Friday evening by Wm. Anderson, Esq. Mr. Anderson has given a number of lectures this winter and they have been appreciated fully, and we venture to say his lecture in this place will be valued much.

MASSASSAGA POINT.

The niece of James Broad, Esq., who was kicked by a horse a short time ago, is getting along as well as can be expected. For a time her recovery was considered doubtful.

FERRY POINT.

Great preparations are being made here for starting the saw mill. The mill has been repaired and placed in first class condition, and will doubtless do a large sawing business this year.

REDNERVILLE.

It causes us much regret to have to report the death of Milla Scales, third daughter of our esteemed pastor, Rev. W. Scales. This sad event took place on Sunday afternoon. She had been ill only a short time, with congestion of the lungs. The funeral sermon was preached in the Rednerville Church on Tuesday by the Rev. Mr. Shorey, from whence the remains were taken to the Cemetery across the bay. She was 10 years old and a general favorite with all. We join with the many in expressing our sympathy to the bereaved family in the loss they have sustained.

Wm. Rose has suffered a great amount of pain from his arm since his return from Toronto, the operation performed there doing him more harm than good. He fears that he will yet be obliged to have it amputated above the elbow.

The writer has been informed that Mr. Blakely, License Inspector for the County, has expressed his intention of not granting hotel license at Rednerville. The Inspector deserves a great amount of credit if he follows this out, as a hotel at this place has been more of a damage to young men and boys than a necessary accommodation to the public, and could be done away with quite easily.

Mr. J. K. Ostrom, one of the most successful and extensive egg buyers in the country, has just completed his first trip for the season, and predicts that the egg business will be a successful one this season.

Some farmers believe that fall grain will be almost a total failure after this cold snap, the grain being in no way sheltered.

Quite a number will insure in the Grange Insurance Co. now, as in their opinion it is the only Msafe utual Company.

Mr. J. B. Morden left a few days ago for Oaklawn, Illinois, where he will purchase a thoroughbred Percheron horse, valued at $2,000. This is a step in the right direction, and it is to be hoped some one else will take up the improving of cattle as well.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

News Condensed.

—Mersie's boat house in London, with thirty boats, were burned on the 6th inst.

—Prof. Oldham, organist of St. Paul's church, Kingston, died on the 3rd inst.

—Some Trappists are on their way from France to found a Monastery in Canada.

—The Scott Act will be voted upon by the citizens of Hamilton on Wednesday next.

—Ducks are beginning to make their appearance in considerable numbers on Toronto Bay.

—On the 6th inst., J. L. Barber's Cabinet factory at Waterford, Ont., was burned. Loss $3,000.

—A Company has been formed with a capital of $30,000,000 to build a ship-canal across Florida.

—The widow of John Brown, the famous abolitionist, is reported to be living in great poverty near San Jose, Cal.

—Crop reports in California show nearly everywhere in the State prospects favorable for a good average yield of wheat.

—Mr. Charles Wiman, of Dun, Wiman & Co., of New York, formerly of Toronto, is to present the latter city with public baths.

—Further destruction has been caused by floods in Spain, Portugal and Hungary. Several persons have been drowned at Seville.

—Mr. Forster in the House of Commons on Tuesday night said that 215 tenants had been evicted in Ireland during the past month.

—On the 6th inst., a special train for the Hamilton Colony in Manitoba, left Hamilton. By the time the train reached Detroit it had 500 people.

—The Rev. Septimus Jones, of the Church of the Redeemer, has been appointed commissary for the Anglican diocese of Jamaicain the Toronto diocese.

—Mr. Bradlaugh (Radical) and Mr. Corbett (Conservative) were nominated yesterday to contest Northampton. Rev. Henry Varley is not to be a candidate.

—Spurgeon's tabernacle is prosperous. The church roll contains a grand total of 5,284 members' names. There has been an increase of 453 members during the past year.

—Reports from Collingwood, Owen Sound and other places on the upper lakes show the weather to be cold and stormy with no prospect of the early opening of navigation.

—The steamer *California* has been engaged for the season to carry boxed meats from Cleveland to Montreal. All this trade formerly reached the sea by way of New York,

—The Grand Trunk Railway receipts for the past week were $228,424, an increase of $24,926 as compared with the corresponding week of last year. The aggregate increase in 14 weeks is $140,901.

—The report that Mr. E. R. Rees, cattle dealer, Kingston, is an insolvent, is not correct. The *News* says he is in difficulty, but is likely to make arrangements for an extension, having only one creditor.

—The authorities of the Custom House at London, Eng, have received a second warning of a plot to blow up the Treasury with dynamite. Every precaution has been taken to prevent such an attempt being made.

—Recruits for the Northwest mounted police are sending in their applications already. Those accepted will undergo a doctor's examination next week, and if found satisfactorily will leave for Sarnia on the 10th of May.

—There is a rumor of the betrothal of the Princess Louise, eldest daughter of the Prince of Wales, to Prince Oscar Gustavus Adolphus, the eldest son of the King of Sweden. The Princess Louise is fourteen years of age, and the marriage will not take place for two years.

—A woman, in Ottawa, who suspected her husband of paying his attentions to another woman, shadowed him a night or two ago and made things rather lively for a time. She caught them in the act of embracing, and there and then proceeded to chastise them both with the aid of a horsewhip.

—Twenty-five members of a deputation from the City and County of Toronto are on a carpet bag expedition to the United States, visiting Court houses. They were in Buffalo yesterday, and were to go to Albany, but the Erie Railway refused to dead-head them; so they will have to return without seeing the sights of the capital.

Proclamation by the President.

Fault-finding is so seldom indulged in by those who use medicines manufactured by the World's Dispensary Medical Association, that the President of that corporation the Hon. R. V. Pierce, M. D., has issued a special request or proclamation to any and all persons, if there be such, who may have taken or shall hereafter use any of the family medicines made and sold by the said Association, in all countries of the world, and who have not derived full benifit from said medicines, that if they will write the said Association a description of their maladies the Faculty of the Dispensary will advise them with respect to the successful treatment of their diseases. Dr. Pierce's Golden Medical Discovery is gauranteed to cure all humors, from the common blotch, pimple or eruption, to the worst scrofula or king's evil, and those virulent poisons that lurk in the system as a sexual or secondary affection resulting from badly treated or neglected primary diseases. It also cures bronchial, throat and lung diseases. Favorite Prescription is guaranteed to cure female weaknesses and kindred affections. Extract of Smart-Weed cures bowel affections, colds, and all painful rheumatic and neuralgic affections. Dr. Pierce's Pellets (little sugar-coated pills), are the little giant cathartic. Address, World's Dispensary Medical Association, Buffalo, N. Y., or Great Russel Street Buildings, London, England.

A country doctor writes: "I am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopseas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

NOTICE!

To Whom it may Concern.

WE, the undersigned, Health Officers of the City of Belleville, under an Act respecting the Public Health, R. S. O., Cap 190, do hereby give NOTICE that all persons resident within the City of Belleville are hereby called on to cleanse their premises and to remove what is so found there, on or before the

First Day of May, 1881.

The undersigned have secured grounds for the deposit of all night soil, and otheraccumulations injurious to health.

The person appointed by the Board of Health as Scavenger is William Hale, who, with the undersigned will give all information.

Any person who wilfully disobeys or resists any lawful order of the Health Officers, or wilfully obstructs any person acting under the authority or employed in the execution of this Act, will be dealt with as the law directs.

IN CHANCERY.

CRATHERN vs. THOMAS et al.

PURSUANT to a decree and final order for sale, made in this cause, and dated respectively the 13th day of April, A. D. 1880, and the 11th day of February, A D 1881, there will be sold by Public Auction, with the approbation of Samuel Shaw Lazier, Esquire, Master of this Court at Belleville, at Chancery Chambers, Shire Hall, in the City of Belleville, on

Friday, the 8th day of April,

next, at 2 o'clock p m., the following land and premises:—

Parcel 1.—Being the rear or west end of lot No. 6, according to G. B Spencer's plan of part of Lot No. 34, on the west side of Pinnacle St in the City of Belleville, in the County of Hastings, and being the said lot No 6, less a parcel thereof, the full width thereof of the depth of one hundred feet, from the said west side of Pinnacle St., heretofore sold to Jacob Lockwood by John Lewis. The said Spencer plan was deposited in the Registry Office for the County of Hastings, the 30th day of October, 1846.

Parcel 2—Being composed of parts of Lots 36 and 37, on the east side of Pinnacle Street, and Lot 36 on the west side of Church Street, in said City of Belleville, and may be better known and described as follows, that is to say:—Commencing at a point in the easterly limit of Pinnacle Street, at the distance of 50 feet on a course south, 16° east from the north west angle of said Lot 37, thence north 74° east along the southerly limit of the northerly 50 feet of said Lot 37, 158 feet more or less to a point at the distance of 16½ feet, measured westerly, and perpendicularly from the centre line of the Grand Junction Railway track, thence southerly, parallel to the said centre line of the said Grand Junction Railway track, to the southerly limit of Lot No. 37, thence south 74° west, along the said southerly limit of the said Lot No. 37, 96 feet 4 inches, more or less, to the easterly limit of Pinnacle Street, thence north 16° west 77 feet 7 inches, more or less, to the place of beginning.

Also—Commencing at the south-east angle of Lot No. 37, on the east side of Pinnacle Street, thence north 74° east along the northerly limit of Lot No. 36, on the west side of Church Street, 50 links, thence south 16° east, 45½ links, thence south 74° west, 98 links, more or less, to a point at the distance of 2 chains and 13 links from the east side of Pinnacle Street, thence north 16° west, 45½ links, more or less to the limit between Lots numbers 36 and 37, thence south 74° west, 3 feet 10 inches, more or less, to a point at the distance of 16½ feet, measured easterly, perpendicularly from the centre line of the Grand Junction Railway track, thence northerly, parallel to the centre line of the Grand Junction Railway track to the centre line of the block, thence south 16° east, 45 feet, more or less to the place of beginning.

Upon parcel No. 1, is erected a stone building, now occupied as a stable.

Upon parcel No. 2, is a frame building, lately occupied by John Lewis, as a residence; and also a Frame Barn used by him as a Wood Shed.

The Vendor will not be bound to furnish any better title than appears in the Registry office, or such title by possession as the Mortgagor had in the premises.

The purchasers shall pay down deposits in the proportion of $10 for every $100 of the purchase money, and the balances thereof within one month thereafter. In all other respects the conditions of sale are the standing conditions of sale of the Court of Chancery.

For further particulars apply to the Vendor's Solicitor, and to Messrs. Bell & Bonton Belleville.

S. S. LAZIER.
LEWIS WALLBRIDGE, Master.
Vendor's Solicitor.

Elegant drawing-room and palace Sleeping cars through (from Hamilton) to Detroit, Chicago, Boston and New York, without change.

Dining cars run from Suspension Bridge to Chicago. Grand Trunk and other lines make close connections at Toronto.

For Tickets and necessary information *via* this most desirable route, apply to

T. DONNELLY,
Ticket and Ins. Agent,
322 Belleville.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallible cure, it was used for similiar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

TO RENT IN SUTHERLAND'S TERRACE.—The house lately occupied by Mr. Wm. Sutherland, also the house lately occupied by Mr. Wolfe, of the Customs Department now vacant. The above premises have been put in first class order. Apply to N. B. FALKINER.

Aug. 24, 1880. dtf

Drs. Williams and Nash have been very busy all day in attending to the many patients and others who have called upon them at their rooms at the Dafoe House—suffering with some form of head, throat and lung trouble. Their new system of medicated inhalations is taking like wild fire, and many who have tried almost everything else have tried the medicated inhalations and have been quickly cured of their troublesome disease. Two days more only to see the two doctors together.

Daily Intelligencer.

BELLEVILLE, THURSDAY, APRIL 7.

5 O'CLOCK EDITION.

City and Vicinity.

FOUR tramps enjoyed the comforts that a police cell affords last night.

RATHBUN & SON shipped this week to Glasgow, Scotland, a carload of broom-sticks.

MESSRS. PULLMAN & HAMILTON offer for sale a number of waggons, &c. See advertisement.

TEN cars of ore and two of potatoes arrived this morning by the G. J. R. train from Madoc.

THE oldest known piece of furniture in universal use is discovered to be the multiplication table.

YOU are specially invited to the Young Men's meeting in Bethel Hall to-night at 7:45 o'clock. Come.

THE proper thing for the society belle is to have a satin bag, hand painted, to carry her gumdrops and handkerchief in.

A NEW "pleasures of Hope" might be written, quite as interesting and of greater length than Campbell's immortal poem.

THE entertainment to be given to night in the Workingman's Hall under the auspices of the W. C. Association should be kept in mind.

MR. I. J. LOCKWOOD, formerly of this city, has sold out his stock in the Napanee Cement Works (limited) and retired from the management.

DR. TRACY, of this city, is a candidate for election, to the Medical Council. See his card in another column. Dr. Day of Trenton, is also a candidate.

THE second half of the match between the Trenton and Belleville Curling Clubs will be played here to-morrow, provided that the ice remains good.

THIS is a world of shams. It is has been discovered that 'new maple sugar' is not only made from sugar cane, but that it is adulterated with soapstone also.

ACCORDING to the school Act of 1880, it is at the option of rural school teachers to open their school on the 3rd of August or on the 18th of the same month.

ANOTHER new "Mogul" freight engine, for use on this division of the Grand Trunk, arrived last night. It was manufactured in the Company's works at Montreal.

THE Kingston newspapers were represented at the reception of Bishop Cleary here to-day—the *News* by Mr. L. W. Shannon and the *Whig* by Mr. Elliott.

THE air has had the true flavor of spring all day. The buds on the earlier trees are ready to burst, and will do so with a little more encouragement on the part of the sun.

THE address presented to Dr. Whiteford by his Masonic brethren at Ottawa is on view in the window of Mr. Angus McFee's jewellery store. It is a beautiful work of art, the illumination being very fine.

AMONGST the successful candidates at the recent examinations at Trinity Medical College, Toronto, Mr. E. D. Vandervoort, of Sidney, passed the final for the fellowship and diploma (F. T. M. S.) of the College.

AN Archery Club has been organized in Belleville. It is to consist of about forty members, who are to be divided into two sections. All the necessary apparatus has been sent for, and practise will be commenced as soon as the warm weather sets in.

THE semi-annual concert given by Miss Davy's music pupils in the City Hall last evening was well attended by the parents and friends of the pupils. The progress and efficiency shown by the performers was most gratifying to those who listened to their playing and was exceedingly creditable to their teacher.

LORD BEACONSFIELD'S ILLNESS.—Lord Beaconsfield is reported to be worse, and it is stated that his death may be expected at any moment.

ALWAYS IN SEASON.—The time to advertise is, when you have bargains to offer, when sales are dull, when specialities are in season, when competition is keen, when new goods arrive, when you have old stock to clear, when business is booming, when you have goods to sell.

CRICKET.—The Hastings Cricket Club has reorganized for the season with the following officers:—Patron, Jas. S. Fowlds, Esq.; President, J. A. Kemp; 1st Vice do., Dr. O'Gorman; 2nd Vice do., W. A. Curtis; Secretary, A. Wilson, jr.; Treasurer, Wm. Hogg; Captain, Dr. O'Gorman. Committee of Management, Messrs. Kemp, O'Gorman, Hogg, Curtis, and D. Robertson.

WEATHER PROBABILITIES. — Toronto, April 7.—Lakes, winds gradually shifting towards the east; fair to cloudy milder weather, probably followed by rain to-morrow.

CURLIANA.—Never before has the "roaring game" been enjoyed in Belleville up to so late a date as the 7th of April. Some years ago a game was played here on the 5th of the present month, but that is the latest date recorded.

POLICE COURT.—The only cases before the Magistrate this morning were that of Weller Johnson, a vagrant, up on remand, who was discharged, and that of Eliza Weir against her husband Matthew Weir, the old man being accused by his wife of having refused to support her. The case was settled by both Matthew and Eliza being bound over to keep the peace towards each other.

THE N. T. AND Q.—The Napanee *Standard* says:—"The directorate of the N. T. & Q. R. R. decline to accept the by-law for an extension of time, on the cast iron conditions imposed by the Town Council. A meeting of the directors will be held in town next Saturday to direct the engineer in charge as to the location of the line, the employment of a staff and the grading of the roadbed."

FACT.—The following incident actually occurred at a house on Mill St. one day this week:—CENSUS ENUMERATOR (to woman who answered his knock): "I have come to take the census, ma'am." SHE (calling shrilly to some one within): "Tildy, hev you got any cenzes to sell?" VOICE from within): "No." SHE (turning to C. E.): "We haint got none to-day" (closes the door in his face).

RUNAWAY.—A team of horses on the market this morning became frightened at the sight of a train passing up Pinnacle Street, and struck out for Front Street at a lively rate. An attempt was made to intercept them at the corner of McAnnany Street, but without success, and the animals pursued their course up Front Street. There were several very narrow escapes from collision with the frightened animals, but they were finally brought to a stand-still in front of Mr. Crothers' store without having done or sustained the slightest apparent damage.

COOL BURGESS.—The great Cool will be here next Tuesday. It appears that this time he does not only rely on his own merit solely, and present the public with poor sticks as apologies for actors, but has a really good company. This is what the Toronto *Telegram* says of his company:—"At the Royal Opera House last night, Cool Burgess appeared with his 'Sleighing Party.' The piece is rather better in conception than the usual run of such *melanges*. The idea of the piece is a birthday party, a sleigh ride in honor of it, an upset, and a detention at the Maple Leaf tavern, whose landlord provides costumes from the wardrobe of some disrupted company, besides himself contributing to the musical entertainment with which the time is wiled away, while another sleigh is on the way. The burden of the piece falls on Cool and James Douglass, in whose hands the movement almost entirely lies, the others doing their specialities and filling the movement. Everybody knows what Cool is and what Cool can do, so all that need be said of him last night is that he is the same old Cool. James Douglass is a clever low comedian and vocalist. Though apparently ill last night he was still the life of the piece. Mr. Jos. Killy's musical specialties are very clever, especially his tumbler playing. Miss Marie Dearing sings sweetly, and the Etzeltine sisters in their dances were attractive, as they always are in whatever they may undertake. "The Sleighing Party" runs for the balance of the week."

COMPLIMENTARY SUPPER.—In order to express in a marked and unmistakeable manner the high respect and strong affection which they entertain towards him as a man and brother, a large number of the Oddfellows of this city held a supper last evening in honor of Bro. Allan McFee, who has been so closely identified with the Order in Belleville for the past eight or ten years. The supper was held in the Grand Junction House, now managed by Bro. D. Coyle. Fully fifty Oddfellows were present, several of whom came long distances in order to be present. The bountiful repast furnished by Mr. Coyle having been partaken of, the company adjourned upstairs to the large parlor of the house, where, after the feelings of the company towards the guest of the evening had been expressed to him by Bro. G. E. J. Hanwell, N. G., a most interesting ceremony took place. This was the presentation to Bro. McFee of a magnificent gold-headed cane, by G. T. R. Oddfellows. The presentation was accompanied by a most flattering address, which was read by Bro. J. Kane. Mr. McFee was for a time almost overwhelmed, the presentation having taken him completely by surprise: but recovering his self-possession, he made a very touching and eloquent reply, disclaiming any special merit for himself other than the fact that he had always done what he conceived to be his duty. He might he said, and doubtless had made mistakes; no man but had done so; but he had never pursued any course which he was not convinced was right. He thanked the brethren in the most feeling and affectionate terms for the honor done him. The remainder of the evening was spent very pleasantly. The Oddfellows' Band being present rendered a number of their best selections, and songs, recitation and speeches filled up the remainder of the evening. The company dispersed about midnight.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

Separate School Examination.

The following is a report of the written examination recently held in the Separate Schools of this city. The names of the pupils are given in order of merit, the maximum number of marks obtainable being 775:

GIRLS' DEPARTMENT.

First Division.	
Conlin, Isabella	766
Yorke, Susan	755
Donohue, Agnes	684
Second Division.	
Durand, M. A.	583
Murphy, Mary	517
Farrell, Annie	480
Cahill, Sarah	477
Conlin, Katie	448
Grace, May	435
Conway, M. J.	415
Gregg, Annie	415

BOYS' DEPARTMENT.

First Division.	
McHugh, John	763
Power, William	709
Lynch, Maurice	704
Second Division.	
Dolan, James	578
McCarthy, O.	556
Wade, Stephen	495
McCarthy, Thos.	421
McCormick, E.	411

FOR FROST BITES AND CHILBLAINS—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

THE NEW BISHOP.

DR. CLEARY ON HIS WAY TO KINGSTON.

Reception at Belleville.

PROGRAMME OF THE DAY.

Dr. Cleary, the new Bishop of Kingston, passed down from Toronto to-day. From Toronto to Belleville the special car in which he travelled was attached to the regular noon express; but when the train arrived at Belleville the car was detached from the express and attached to the special excursion train which was made up here. A very large crowd had gathered at the station, (the majority of whom went down to Kingston by the excursion train), and when the express moved up to the station the platform was crowded with men, women and children, all eager to see the new Bishop. His Lordship's special car having been attached to the excursion train, a representative of the INTELLIGENCER went on board, and through the kindness of Father Farrelly, was granted a short interview with Dr. Cleary. A little ante-room had to be passed through before His Lordship's compartment was reached, and this was filled with black-robed clergy of all ages—remarkably refined and gentlemanly looking men. Passing through them, the inner part of the car was reached. Several clergymen were also grouped in here. Among them were a number of high dignitaries of the Church of Rome in Ontario, including His Grace Archbishop Lynch; Dr. Welsh, Bishop of London; Dr. O'Mahoney, Auxiliary Bishop of Toronto; Dr. Jamot, Bishop of Sarepta, Vicar Apostolic of Northern Canada; Vicar-General Rooney, of Toronto; Vicar-General Heenan, of Hamilton; Vicar-General Laurent, of Toronto; and Dr. Vincent, President of St. Michael's College, Toronto. His Lordship was most gracious, and entered into a lively conversation. He said he had had a most pleasant voyage across the ocean, and, so far, his impressions of the country had been very favorable. He is rather under the average height, and is slightly built. His hair is iron-grey, his eyes large, dark, and with a keen yet kind look in them. His face is florid, and wears a most pleasant, not to say jolly expression: his mouth is continually expanded in a smile, which reveals a set of even white teeth. Altogether, he is a very kindly, genial and comfortable looking ecclesiastic.

The crowd soon gathered on the platform near the special car, and in a few moments there was a densely packed throng of some four or five hundred people, with eager and expectant faces. When quiet was obtained His Lordship was conducted to the platform in rear of the car. At sight of him the men in the crowd set up a cheer. The air, however, was too keen for the Bishop, who had been in the warm, close car for several hours, and he went back for his cloak. Wrapping it round him he returned and stood in full view of the people, with the portly form of Archbishop Lynch behind him—the little bits of purple silk on the heads of the two dignitaries glancing in the bright rays of the sun and contrasting oddly with their vestments of solemn black. The hurrahs having died away, His Lordship addressed the assembled crowd in a clear resonant voice, and with a rich Irish accent. He spoke to them in endearing terms, calling them his children, the sheep of his flock. He told them that he had come among them to lead and instruct them in their most holy Catholic religion. "I have, my dear people," said he, "come to you from my own dear country across the sea—come to live, to work, and to die among you. I will remain with you for the rest of my life, and when I die my bones will be buried among you. I pray God that my coming among you may be blessed to your spiritual good, to mine, and to that of the Church at large." His Lordship then began to pronounce the *Benedictus*, but the Archbishop leaned over and suggested that he should sing it in order that it may be the better heard. Then Dr. Cleary raised his hands and began that solemn and touching chant. At the first note the people fell upon their knees, and remained in that reverent attitude while the Bishop, with arms extended towards them, gave them his benediction. The other priests who stood near joined in the chant, and the effect was impressive and touching in the extreme. When the chant was finished the people rose from their knees, and gave three rousing cheers for Dr. Cleary; after which cheers were given for His Grace the Archbishop, for Father Farrelly, and for the Catholic Church in Belleville. Dr. Cleary and his friends then retired into the car, and the people hurried to get on board the train, which afterwards moved out of the station. Nearly two hundred persons must have gone down from Belleville.

His Lordship stood on the rear platform of his special car, which was the last one, bowing and smiling to the people who remained upon the platform of the station, who cheered him vigorously.

After the train left Belleville the following address was presented to Dr. Cleary. It was read by Dr. Murphy:—

To the Right Reverend James Vincent Cleary, Bishop of Kingston:

MAY IT PLEASE YOUR LORDSHIP:—It is a source of unfeigned pleasure to the Catholic people of Belleville to be privileged with this early opportunity of offering to your Lordship on your safe arrival over the sea, a hearty greeting and to give expression to the joy we feel in welcoming to our Canadian shores an ambassador of Christ—a ruler of the Church—an illustrious son of beloved Ireland, which it hath pleased Almighty God, for his own good purpose, to visit with a chastening hand—Ireland, whose learned sons have shed lustre on religion and letters. Ireland, whose exiled children propagate the faith in every clime. Ireland, to-day we offer a *cead mille failtha* to another of thy gifted sons.

It is fitting that we should, on this joyous occasion, testify our gladness and gratitude for the appointment over us by the Vicar and Representative of Christ on earth, one so distinguished by his virtue and learning, one capable of assuming the responsible charge of a see already made important by gifted and holy predecessors.

Ever since the news of your Lordship's consecration in the Eternal City reached us, it has been our earnest desire that you might speedily arrive in our midst; and with all the fervor of our hearts did we participate in the public devotions which our Very Reverend and beloved Pastor prescribed for your safe voyage across the Atlantic.

Permit us to lay at the feet of your Lordship the homage of our profound respect, to heartily congratulate you on your elevation to the Episcopacy, and to assure you of our humble prayers that you may long live the guardian of our spiritual interests, the ornament of the See of Kingston.

In conclusion, we beseech your Lordship to bestow upon us the Episcopal benediction.

Signed on behalf of the Catholic people of Belleville.

J. B. MURPHY, M. D.,
Chairman,
P. P. LYNCH,
Secretary,

April 7th, 1881.

AT KINGSTON.

The *Whig* gives the following programme of the arrangements at Kingston on the arrival of the Bishop and his attendants there:—"When the Bishop arrives in the city he will wear the Cappa Magna; at the palace he will take his pontifical robes. A procession will be formed and proceed to the cathedral, the bishop walking under a canopy borne by six members of the congregation, the priests singing the anthem, *Sacerdos Magnus*. At the door the formal giving over of the Cathedral will take place. The procession will then proceed up the aisle, the choir and clergy singing the *Te Deum*. The Bishop having reached the sanctuary will go upon the altar of the Blessed Sacrament and pray a short time, after which he will return to the middle of the sanctuary in front of the main altar and the Administrator pray for his success as Bishop of Kingston. He is next placed on the throne, where the clergy of the diocese are presented to him by the Administrator and they pay their allegiance. Next is addresses, next the Benediction of the Blessed Sacrament, and then all will be ended.

MORNING DESPATCHES

EUROPEAN.

FATAL RIOT IN IRELAND.

Police Sergeant Armstrong, who was dreadfully injured in the affray at Clogher, county Mayo, last Saturday, died this morning. The whole district around Ballaghadereen is in the most excited condition. It is little short of civil war. Another horrible affray is reported from the same country. A process-server was attacked by two hundred women armed with sticks and stones at Ballinamore. His police escort fired on the women, mortally wounding a girl named Byrne, and severely injuring another. The girl who was killed was twenty years old.

AMERICAN.

DIGGING OUT RAILWAYS.

SLEEPY EYE, Minn., April 7.—Eight hundred men are digging out the Chicago and Northwestern R.R., west of here. It is stated the Company have expended almost enough money shovelling snow on this line this winter to have constructed a new road.

WASHINGTON SPECIALS.

NEW YORK, April 7.—The *Tribune* says the President told a visitor that the action of the Senate was a thing with which he had nothing to do, and he had been careful not to give any one a right to say he was seeking to influence the Senate in any way. He was, however, being made aware by new evidences daily that early executive action by the Senate upon some appointments was a pressing necessity. Some District Courts were closed and all business in connection with them suspended because there were no Judges.

The *Herald* says that some Democrats think the Senatorial deadlock has lasted long enough for the good of their party, and that it would be good policy for the Democrats to give way. All business in the criminal court of the District of Columbia has been suspended for a month, because no successor to Marshall Douglass has been confirmed. Hay, First Assistant Secretary of State, is obliged to remain in office until his successor, Hitt, is confirmed.

The *World* says that Conkling returned last night accompanied by ex-Secretary Fish, who will act as intermediatory between the President and Conkling.

PRESIDENT'S SUMMER RESIDENCE.

WASHINGTON, April 7.—It is stated that the President and his family will occupy a cottage at the Soldiers' Home during the summer.

A BRIBE DEMANDED.

NEW YORK, April 7.—Before the Assembly sub-committee of Commerce yesterday, Col. Bliss caused a sensation by declaring he would hereafter prove that one of the harbor masters demanded a bribe of $150,000 for certain vessels' pier privileges.

ANTI-HIGH RENT LEAGUE.

The executive committee of the anti-high rent league appeal to all rack payers to organize against the oppression of the landlords.

A FERRY MONOPOLY.

It is stated that Vanderbilt will purchase the Staten Island north shore ferry. This will give him complete control of the ferries from here to Staten Island.

HATTIE DUELL'S FAST.

IOWA CITY, April 7.—The Iowa medical society have adopted a resolution censuring the parties abetting Hattie Duell's fast. It is said the authorities will take charge of her.

AFTERNOON DISPATCHES.

SLAVONIC REACTION.

ST. PETERSBURG, April 7.—The nominations of Ignatieff and Nicolai to portfolios, and the expected appointment of Tchernaieff as governor of Orenberg, indicates a strong Slavonic reaction in the tendency of the Government, at least in home affairs.

ENGLISH IMPORTS.

LONDON, March 7.—The imports for March show an increase of £79,500 compared with the same month last year. The exports increased £27,790.

SOUTHAMPTON, April 7.—Arrived, the *Rhein*.

NEW YORK, April 7.—Arrived, the *Scythia*, from Liverpool.

FLOODS IN DAKOTA.

YANKTON, Da., April 7.—The ice gorge broke last night. Two hundred buildings have been partially submerged, and much damage done. A steamer was carried away with the gorge and stranded on the railroad track. Two hundred persons here were rescued from the submerged farming districts. The fuel supply has been reduced to a minimum. Many kinds of provisions are running short. The freshet swept away thousands of cords of wood, and to-day there is not a cord for sale.

WASHINGTON, April 8.—Indications: Lower Lakes, stationary or a slight rise in temperature, increasing cloudiness, rain or snow.

Condition of Lord Beaconsfield

An Improvement.

LONDON, April 7.—Beaconsfield has suffered a severe attack, with difficult breathing. During the night there was some congestion in the right lung. The symptoms for some time created great anxiety, but have nearly passed leaving the patient not materially worse.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist———and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4eod&wly

Hagyard's Pectoral Balsam; a few doses will relieve the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

'Hail bounteous, beauteous, gladsome Spring'—this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

DEATHS.

At the parsonage, Rednersville, on Sunday afternoon, April 3rd, AMELIA H., youngest daughter of Rev. Wm. Scales.

Commercial.

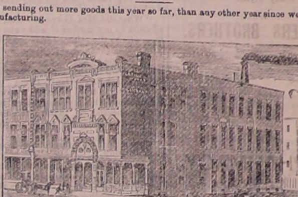
All Silver Show Cases



EBONIZED AND Walnut Show Cases.

SEND YOUR ORDERS AT ONCE TO

W. Millichamp & Company,
29, 31, 33 and 35, Adelaide Street East,
TORONTO.

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired. Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late. The winter is approaching, and if you neglect this opportunity you may be obliged to carry your disease until the opening of spring, and then sever your connections with those you love so well.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

By Mrs. Harriet Lewis.

Author of "The Double Life," "Tressilian Court," &c., &c.

"If your ideas of hospitality to your invited guests permit them to be grossly insulted, Todhetly," said Holm, in a hoarse, unnatural voice, "I think I had better remove my daughter at once."

"Curse the woman!" said Todhetly violently. "She has the nature of a low-fish wife, and deals in Billingsgate as if it were her natural tongue. She sprung a trap upon me. I never dreamed of her coming in here. My doors will be shut againt her, henceforth. I will give orders to the servants to never allow her to enter my house."

But these declarations did not appease the outraged dignity and self-love of Captaim Holm. He chaffed under the insult with an increasing passion.

"I will not remain in a neighborhood where I am likely to meet that vulgar, low-bred creature," he asserted, "unless, indeed, I meet her as her social superior. I shall take my daughther to London tonight."

Todhetly in an agony of apprehension lest his prize should slip from him, began to entreat and apologize so fluently, that Holm finally allowed himself to be placated, and agreed to remain at the Grange: but he was angry with himself for the concession, and became sullen and ill-natured. When peace had been in a manner restored Tessa's clear voice was heard for a first time since blow of Mr. Gwynne had been dealt. The young girl had a firm and resolute expression, and her gray eyes glowed darkly, as she said calmly:

"What did Mrs. Gwynne mean, in her allusion to my mother?" and she looked from one to the other of the conspirators. "Is my mother living?"

"I decline to answer any questions that are called up by that creature's silly and vulgar attack," said Capt. Holm peremptorily. "She tried to bring discord into my relations with my daughter, but she will not succeed in making trouble. I will not take the pains to contradict her falsehoods."

Tessa's clear eyes sought his face in a keen scrutiny.

"I am old enough, sir, to know the whole truth," she said firmly. "There was something in your faces when Mrs. Gwynne made her assertion that convinces me that there was truth in it. I ask again—is my mother alive?"

"And I decline to answer," said Holm harshly.

"Then you force me find out the truth for myself," said Tessa, with quiet decision. "Now that I have a suspicion upon the subject, I will not rest until I know the truth. It would be better to confide in me, sir."

"Since you are so obstinate and unfilial," said Capt. Holm, scrowling, "I will tell you the truth. Your mother is alive?"

"*Alive?*" breathed Tessa. "Alive?"

Holm assented by bowing his head.

"Where—where is she?"

"Where you are not likely to see her!" returned Holm, in a domineering voice. "I will tell you something of her story, since you force the truth from me, and then I desire to never hear her name from your lips again. She was a bad woman, and the villain's eyes sparkled with delight at the audacity of his wicked lie. "There was a divorce—scandal—and shame. She went abroad to hide herself in a foreign land. Afterward she married a nobleman of the most upright character, but who happened to be as jealous as a Turk. She concealed from him her past history, lest he should refuse to marry her, or having married her, should expel her from his house. She has borne to this second husband children, and is a proud, haughty, fashionable woman, bound up in her social rank and position. Her present husband does not dream that he has a predecessor living, nor that his wife and her first husband were divorced, or that a child of the first marriage exists. If he did know these three facts, her ladyship would be ruined."

Tessa looked like one stricken with a sudden and terrible blow. She was silent for a few moments, and then said, in a faint and quivering voice:

"What is her name now?"

"I cannot tell you," said Holm. "Any appeal from you to her would ruin her. She is a rich, and titled lady, and all she wants of you and me is to let her alone. All that she fears is, that you or I may suddenly appear to her and claim relationship with her, and thereby ruin her!"

Tessa's cheeks glowed with a sudden scarlet. There was so much of bitterness, so much of genuine anger in Holm's tone and manner, that she did not doubt his truthfulness. Her mother was a great and fashionable lady, she thought, her heart swelling, who only desired to be let alone by those who were connected with her ladyship's past.

"I wiil not trouble her!" she said, proudly, adding, in a pained, sorrowing voice, "I would not bring one tear to her eyes, one pang of sorrow to her heart! Whatever she is, or has been, she is still my mother. I would not claim kinship with her, but I would like to see her at a little distance and know that she is my mother. I would not speak to her but I would go away with her image in my heart to live there forever."

Her passionate fervor seemed to touch Holm's heart.

"Perhaps I will allow you to see her some day, he said. "As I told you," and a sinister light shone mockingly in his eyes, "she is a bad woman, and not a fit friend or counsellor even for her cast-off daughter. But I have no objection to your looking at her from a distance if the opportunity should arise. For the present, however, I do not wish to hear her name from your lips. She must be dead to you until I choose to resurrect her. The truth is, Tessa," conclnded Holm, with sudden savageness, his real nature leaping to the surface, "I have sworn revenge upon your mother, and I mean to exact it to the uttermost. And I mean that you will help me to that revenge! Curse her! With you and me linked against her, she cannot hold her proud head erect much longer!"

TO BE CNNTINUED.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

After trying many midicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

—At the lunch given by Sir Hugh Allan on board the *Parisian* at Halifax on Saturday to the principal business and commercial men of Halifax, speecees were made by Sir Hugh Allan, Lieut.-Governor Archibald, General Macdougall, and several others. Sir Hugh, in referring to Halifax as Canada's winter port, said that his present fleet of steamers were too large for the trade to make Halifax their terminal, but he thought that there was plenty of business to make Halifax the terminal of a line of smaller steamers.

In cases of Chronic disease which doctors have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL use.
THE OLDEST BEST & MOST WIDELY KNOWN FAMILY MEDICINE

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

THE LEADING CLOTHING HOUSE

—:0:—

WE beg to notify our numerous patrons and the general public, that we are now in receipt of our

New Spring Stock of Fine Woollens,

Consisting principally of English, Irish, Scotch and Canadian Tweeds, Scotch and Irish Serges, French and English Worsteds, Fine West of England Trouserings, Black and Blue Broadcloths, Black and Blue Venetians, Doeskins, Cassimeres, &c, in all the largest and most complete stock of the kind in Canada.

OUR CLOTHING is, without doubt, quite equal if not superior to the best New York Clothing for style, fit and materials, a proof of which is the large number of First Prizes awarded, as at Toronto, Hamilton and other Exhibitions during the past season.

Gentlemen requiring FINE CLOTHING will find it to their advantage to inspect our Stock before purchasing.

We are this season, in addition to our Large Trade in Fine Ordered Clothing, making a specialty of Low Priced Tweed Suits, which we will make to order at the following prices:—

$12, $13.50, $15, $16.50.

28d1y. Proprietors.

N. H. DOWNS' VEGETABLE BALSAMIC ELIXIR

Is a sure cure for Coughs, Colds, Whooping-Cough, and all Lung Diseases, when taken in season. People die of consumption simply because of neglect, when the timely use of this remedy would have cured them at once. **Fifty-one years** of constant use proves the fact that no cough remedy has stood the test like **Downs' Elixir.** Price 25 cents and $1.00 per bottle For Sale Everywhere.

Dr. Baxter's Mandrake

BITTERS

Will cure Jaundice, Dyspepsia, Liver Complaints, Indigestion, and all Diseases arising from Biliousness. Price 25 cents per bottle. For Sale Everywhere.

HENRY & JOHNSON'S
ARNICA AND OIL LINIMENT
For Man and Beast.

The most perfect liniment ever compounded. Price 25 cts. and 50 cts.
For Sale Everywhere.

Ayer's
Sarsaparilla

Is a compound of the virtues of sarsaparilla, stillingia, mandrake, yellow dock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sustaining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so potent to cure all diseases resulting from impure blood. It cures **Scrofula and all scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.**

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impurity of the blood need despair who will give AYER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numerous low-priced mixtures, of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly seated. AYER'S SARSAPARILLA is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-purifier known. Physicians know its composition, and prescribe it. It has been widely used for forty years, and has won the unqualified confidence of millions whom it has benefited.

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darrington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge, Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

DR. G. S. RYERSON, L.R.C.P. and S. E Lecturer on Eye, Ear and Throat, Trinity College, Toronto, and Surgeon to Mercer Eye and Ear Infirmary, late Clinical Assistant. Moorfield's Eye Hospital, London, England, and Central London Throat and Ear Hospital 317 Church Street Toronto.

Will visit Belleville on TUESDAY, MAY 10th, and can be consulted at the Dafoe House.

RUPTURE!

CHAS. CLUTHE'S

PAT. SPIRAL TRUSS

FOR CURE OF RUPTURE. ENTIRELY NEW PRINCIPLE.

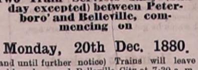
Nothing better and more substantial under the sun! If you are ruptured or deformed send for book on RUPTURE AND HUMAN FRAME, by Chas. Cluthe. Best information of a life-long study. Natural mechanical advantage s; 18 years' material experience and best tools money can buy, made him perfect master of his profession. Will visit as follows. Come early Don't wait for the last hour.

Late of Hamilton. CHAS CLUTHE.
118½ King St. West, Toronto; Ont,

BELLEVILLE—At Anglo American Hotel, Thursday and Friday, March 10th and 11th.

PETERBOROUGH—At Huffman House, March 9th, with supply.

CHAS. CLUTHE.



GRAND JUNCTION RAILWAY.

Two Train Services daily (Sunday excepted) between Peterboro' and Belleville, commencing on

Monday, 20th Dec. 1880.

(and until further notice) Trains will leave Ashburnham and Belleville City at 7:30 a. m. and 3 p. m., and will be due at Belleville City and Ashburnham at 11:30 a.m. and 7:30 p. m. respectively, stopping en route at all regular Stations, and at Flag Stations when duly signalled.

MADOC BRANCH.

Train will leave Madoc for Belleville City at 8 a. m., arriving at 10 a. m. Returning will leave Belleville City for Madoc at 3:30 p. m., arriving at 5:30 p. m.

NOTE—Trains will be run by Belleville time which is 14 minutes slower than Montreal time.

T.S. DETLOR,
General Superintendent.
Belleville, Dec. 18th, 1880. 189d

For washing Flannels so they will not shrink use THE CHINESE WASHER or Dry Soap. It possesses all the properties of the Finest Soap in a concentrated form.

It is unequalled for cleaning painted walls and wood work, Plate and Silver ware,—also for Crockery, Glass, Marble and Parian ware.

Daily Intelligencer.

Curing Cheese.

(*Read before the Dominion Dairymen's Association by L. B. Arnold, its President.*)

The changes which go on in the curd after it has been pressed are called curing, but they are identical with those which begin upon the introduction of rennet. Their natures are not understood by maker or chemist. The common theory is that they are induced by living germs of fungoid character, similar to mold. The action is like that in distilling liquor or that caused by yeast. But a study of the facts does not at all sustain this theory. It has been demonstrated by rigid proof that the curing of cheese goes on without obstruction under conditions in which it would be impossible for yeast fermentation to act. All fermentation depending on yeast or organic germs, is suddenly arrested when the fermenting substance is immersed in chloroform, but in cheese curing goes on as readily as if the chloroform was not present, hence we know that it is not cured by fermentation. It must be cured by rennet, because there is no other agent to act upon it when it is known that fermentation takes no part in the curing, no other agent having been added. The action of rennet is the action of digestion, since rennet is only a digestive agent from the stomach of a calf. It is therefore eminently proper to call the curing of cheese a digestive process.

The lactic acid which is generally present in curing does not prove that it is necessary to the changes. In fact, it is well known to every observant cheese-maker that acid retards curing. The sourer the cheese the longer it takes to cure, and the less fine flavor in the mature cheese. It is unreasonable to suppose that the curing process should depend on an agent which is known to retard it, and that flavor should depend on what is known to abate it. Second, the cheesy flavor is often observed to commence developing before there is any lactic acid present. Third, the lactic acid, which is so prominent a feature in the young cheese, is not there permanently. After a time it entirely disappears, and the reaction of the cheese becomes alkaline, yet the curd continues to keep on curing. It grows more and more plastic and salvy, and the flavor peculiar to cheese continues to develop. These facts do not look much like everything depending on lactic acid.

Another error which has crept into the creed of cheese-makers, is that the cheesing process—the changes by which curd is changed into salvy and plastic changes—and the development of the flavor peculiar to cheese must necessarily go on together and are inseparably connected. It is true that they go on pretty nearly alike, so nearly that the progress of one may generally be taken as a measure of the advancement of the other. When curd made with rennet is sealed up in an air tight vessel it breaks down readily into a soft, rich and ripe cheese, but has none of the flavor common to cheese. Cheesing goes on, but flavor does not. On the other hand, the greater the exposure to the free oxygen of the air, the more rapid the development of flavor. By subjecting to a strong current of air, flavor can be made to go on faster than cheesing. These facts are sufficient for concluding that the perfect curing of cheese involves the action of the atmosphere. But by analyzing the air passing over cheese while curing, Dr. S. M. Babcock, of Cornell University, has proved beyond question that cheese while curing are continually taking in oxygen and giving off carbonic acid gas, and that the process is therefore one of oxydation.

From these data it is evident that with milk at the same temperature, a greater quantity of rennet, the curing will be most rapid, and the lifetime of the cheese shorter. Of two messes of milk of the same quality, if one has rennet applied at 80° and the other at 100, the latter may receive less rennet and yet show curing first. So in curing, a greater use of rennet may be counteracted by higher salting, greater dryness, or lower temperature, and in effect fall behind a less use of rennet. But where other conditions are equal, the curing progresses according to the quantity of rennet used. When it is desired to have cheese fit for use in 30 to 60 days, and have keeping quality to last from four to six months, rennet enough should be used to cause coagulation to begin in night's and morning's milk mixed in 15 minutes, at 90 degrees, provided it is to be cured at 70 degrees in air of average moisture. Cheese is sometimes made and cured without rennet or any coagulating agent. There is always in milk a variable quantity of some agent which acts like rennet, and it aids both in curding milk and forming the curd into cheese. There is usually so much, that if milk is curded with alum or alcohol, or even with some acid, the curd so made will very slowly devolve into cheese.

The amount of moisture in curd affects the length of time required for curing, since whey contains four or five per cent. of milk sugar, which is liable to be changed into lactic acid, which, as has been stated, hinders curing. In the manufacture of Stilton cheese, it is a common occurrence that cheesing does not begin under about three months, on account of the large amount of acid developed in the large per cent of whey retained. By pressing the whey out of Stilton cheese, I have found it to cure as much in six weeks as it would cure in six months when unpressed, and the cheese was the better for it.

On the other hand, if there is too little water in the curd, the action of the rennet will be retarded, and the curing go on slowly, notwithstanding there is a less acid formed to hinder its progress. The action of rennet has been explained to be the action of digestion, and digestion to go on well must have plenty of moisture. The drier the curd, all other conditions being the same, the slower the curing and the longer the lifetime of the cheese. The life of a cheese may be prolonged almost indefinitely, simply by reducing its moisture, with but little variation in other respects. A cheese which is a very long time in curing, seldom cures as evenly and as perfectly, and is consequently not so easily and perfectly dissolved and digested, as when cured more rapidly.

There is usually a large excess of casein in skims, as the butter being out, there is little else left besides casein and water; and as the water separates from the curd more readily than in whole milk, on account of the greater age of the skim milk, there is seldom enough retained for the best effect in curing. This lack of water seem to be the principal reason why skim cheese are generally so imperfectly cured, and much poorer in quality than they need be. It would be a safe rule to leave in water enough to equal the weight of casein, no matter whether it was large or small. When a pound of cheese is made from ten pounds of average milk, the per cent, of water and of casein will be very nearly equal.

Another important factor in curing cheese is temperature. A variation of temperature in the curing room may be made to hurry or retard the progress, or alter the character of the curing. There is always some particular temperature at which a cheese, according to its make, cures best. A cheese with a tight rubber-like rind, must be cured slowly, or more gas will be pressed into it than can escape through its rind, and it will puff. A cheese full of fat must also cure slowly to prevent overheating, on account of the heat developed within it. The inside of a cheese cures faster than the outside, for the reason that the outside is dryer than the inside, from the easier escape of moisture, and also because the heat developed by the oxidation going on all through the cheese is given off, like the moisture, more rapidly from the exterior than the interior. A cheese with but little fat in it oxydizes slowly, and of course, develops but little warmth. Skim cheese requires a little warmer room than one from whole milk.

Salt enters into the question of curing, because it affects the amount of water in curd. It gives firmness and flavor to cheese, but it absorbs three times its own weight in dissolving. A green cheese then placed in the curing room is affected by the amount of rennet and moisture it contains by temperature, air, acid, fermentation and salt, and at the same time it may be added that it has a power of absorbing odors from its surroundings.

Some of the agencies are fixed in making. A perfect curing room puts all the others in the control of the maker. Cheese is not more than half made when it is taken into the curing room. The outside air may be of the right temperature, but there is no safety in relying on the fickle weather. Thousands of dollars are lost every year by using curing rooms which are sometimes too warm and at others too cold. The supply of air and state of moisture are also to be controlled. My idea of a curing room for cheese is a basement, half above and half below ground, with walls and floors of concrete. Such a room, with close jointed double doors and windows, would give the most complete control to temperature, air and moisture within it. Concrete walls are poor conductors of both heat and dampness, and they are impervious to air. These conditions we never secure with walls of wood. The poorest curing rooms I find are those covered with a single thickness of rough boards with the cracks covered with narrow battens. This leaves the cheese almost entirely at the mercy of the wind and sun. If the owners were aware how much is lost every year by injury done to cheese in such rooms, they would soon go out of use. Nobody would think he could afford the loss. Upper stories are not good places for curing cheese, especially if they are at all open. The abundance of fresh air common in such rooms gives a development of flavor in advance of quality. The curd is stubborn in breaking down because the too dry state of the air absorbs away too much moisture from the curd before it has time to cure, and this makes the curing very slow. The cheese becomes hard and firm enough, but too much resembles dried curd instead of dried cheese.

The curing of the celebrated Rocquefort cheese is affected in a way to accelerate the development of flavor and retard quality. It is first cured in ordinary curing rooms till quality is fairly developed, and then it is taken to the caves, where it is subjected to a strong current of air at about 44° to 46°. Under this low temperature the cheesing or development of quality make but little progress, while the increased oxydation from the strong current of air hurries on the development of flavor, till it become remarkable for its fullness. I know of no cheese made in any part of the world that equals the Rocquefort cheese in amount of pure cheesy flavor.

I remarked a little while ago that the taste of the great cheese consuming public prefers a mild flavor with plenty of quality, so that it is rich, soft, tender and melting on the tongue. A manufacturer who wishes to make cheese of this description—after using proper skill in the make room—will put his cheese to curing in a room with walls tight enough to admit of controlling the ventilation and the temperature. He will keep the temperature at 70° with a view to pushing along the development of quality; but checks the admission of fresh air with the view of holding back the development of flavor. The oxygen in the room will be rapidly used up in the oxydation going on in the cheese, and become so diminished that the increase of flavor will be so slow as to remain mild, so that the curing can be safely continued till the cheese becomes ripe and rich, without danger of becoming too strong in flavor.

If a curing room such as I have described as best can not be obtained, I insist it will pay all concerned to use sheathing paper or boards or both upon the walls, to make them double and even trible if necessary, till the temperature within them can be kept within a range of 20°, and as near 70° as possible. Any one can do this with a little trouble, expense and attention. There is no use in building up with one hand and tearing down with the other, no use in insisting that dairymen shall furnish only the best milk and in the best order, and that the manufacturer shall make with the highest skill cheese which is certain to be reduced to second or third class by the imperfections of a faulty curing room.

Vine Culture.

Our readers will be pleased to peruse the following directions for planting and after culture. We are convinced that success in the culture of the vine is certain if the directions given are steadily adhered to.

The conditions necessary to the successful cultivation of the vine in the open air are: 1st, to have the vineyard so located that it may be thoroughly drained and have direct sunshine at all times, especially in the morning.

Avoid low-lying, hot or damp situations, and do not train against walls, or in places where the air does not freely circulate.

No other preparation of the soil is necessary than is ordinarily used for crops of corn or grain.

Well rotted manure may be used to encourage the growth of young vines.

When handling a quantity of vines, first lay the vines side by side in a slanting position in a trench, then cover them with moist earth to keep them fresh till planted. When taken from the trench, cut back each branch to two eyes. Cut off vines as seen before it is planted. Carry the vines from this to the place of planting in a wet sack or cloth of coarse material well saturated with water.

For vineyard culture, plant ten feet between the rows, eight feet between the plants. For garden culture, plant six feet each way, dig holes two feet wide, two feet deep.

Throw in a little good surface earth, spread out the roots and fine fibrous roots of the vine and fill up the hole with fine surface earth, continually shaking the vine and drawing up with the hand every root whose shoulder shows above the earth, spreading out all the roots in a horizontal position and continually shaking the vine, that the earth may settle among the smallest fibres and roots.

Fill the hole completely, press the soil around the plant with the foot, then cover the surface to a diameter of about three feet, with a mulch of manure, straw, chips or shavings, anything that will hold moisture, to keep the roots always moist. Keep this mulch well broken and permeable, during the summer, hoeing it in, and renewing it with fresh material when necessary.

Do not allow any fresh manure to come in direct contact with the vines or the roots. The above description will apply to all small roots and shrubs.

For fall planting, cover the tops of plants with one foot of earth, which remove in early spring as soon as the frost is out of the ground.

After trying many medicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.
MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.
MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

PREPARED ONLY BY W H. MITCHELL, HAIR DRESSER
BELLEVILLE, ONT.,

And Sold by all Druggists.

Daily Intelligencer.

BELLEVILLE, FRIDAY, APRIL 8.

Sir Charles Tupper and the Globe.

The *Globe* has always been the bitter assailant of Sir Charles Tupper, ever since he entered upon the field of Dominion politics. This is in one sense a compliment to Sir Charles, involving as it does the full recognition of his great powers as a Parliamentary debater, as an orator on public platforms, and generally as one of the most dangerous and formidable opponents of the Grit party. Hence the organ's frantic and long-continued efforts to weaken the able and eloquent Nova Scotian in the estimation of the people. Had the *Globe* attacked Sir Charles on public grounds, no fault could have been found with it, as, no matter how hard the blows given, they would have been returned with interest. But, having tried this line and failed most signally, the *Globe* has resorted to personal aspersion, charging untruth and personal dishonesty—charges which its party, although repeatedly challenged to formulate in Parliament and press to a decision before a Parliamentary Committee, never ventured to express their belief in. It will be remembered that in the early part of the last session, Sir Charles, indignant at the *Globe's* cowardly and persistent attacks upon him, took the occasion of Mr. Gordon Brown's presence in the gallery to chastise the publisher of the slanders referred to as he deserved, the effect of which wholesome castigation has been to cause the *Globe* to snarl and snap at its castigator whenever opportunity offers, much to the amusement of those who understand the moving cause of the organ's wrath. As is well known, Sir Charles was taken ill from overwork towards the close of the session, and sailed for England in order to recruit his health; but the *Globe*, in its issue of the 6th inst., with an entire disregard for decency, takes occasion to make of this unfortunate circumstance the foundation for one of the meanest and most contemptible articles that ever appeared in its columns, which we reproduce in full as follows:—

If half the strange stories in circulation concerning Sir Charles Tupper may be believed he is the centre of a mystery. It is said that when supposed to be lying at death's door he was really locked up at his work in his office, and it is certain that his recovery was remarkably rapid if his prostration was so complete as reported at the time. Even while extreme weakness was the alleged reason for his refusal to be seen at the Capital, he took the long journey to Halifax, and soon afterward embarked for England. Whether he arrived there or not no one seems to know. Can it be that he has "the receipt of fern seed," and walks invisible, or is he like Gadshill, "more beholden to the night?" Has he partaken of the elixir that rejuvenates beyond recognition, or does he intimate the veiled Mokanna? The Man with the Iron Mask was not more carefully nor more inexplicably concealed than Sir Charles has been for months. For all any one tells he has disappeared as completely as Mr. Kero, and as strangely as the brothers De Birchington of the Ingoldsby Legends. Yet there is a growing rumor that he is actually in London taking part in the arrangements of the Pacific Railway Syndicate, and perfectly able to look after any interests that he champions. All this is very mysterious, and the public would really like to know what has become of Sir Charles. Let the answer be what it may, there is a general belief in the Conservative party that he will never again take his seat in the Cabinet, though exactly why that impression prevails no fellow seems to have ascertained.

The insinuated untruths in the above meet with a fiting reply from the *Mail*, which says:—

We are pleased to learn from cable telegrams received by the Premier that Sir Charles Tupper's health is improved, and that the rest from work has been beneficial to him. The trip to Halifax over the Intercolonial was, of course, fatiguing, and his state of health on embarking was not, therefore, as good as was hoped for. The ocean voyage was very severe, the weather being stormy most of the time. Therefore all the conditions of his trip were at first against him, but the rest he has since enjoyed has proved beneficial, and his recovery will not, we trust, be long delayed.

* * * * * * *

It is untrue that he was working when he refused to see his supporters at Ottawa. If he took the long voyage to Halifax it was because he could not go by telegraph or in a balloon, and had to take the steamer at that port, and there is not the slightest mystery at all in the ill-health which has followed an intense and too-prolonged devotion to the public business. That there is any feeling among the Liberal-Conservatives that Sir Charles Tupper will not resume his portfolio we deny most emphatically. It is the hope and wish of the party, strongly expressed in caucus, that he may long be spared to conduct the business of his department, and to be as he has always been, one of the most powerful and eloquent—one of the most industrious and patriotic—members of a ministry which have conferred so much benefit upon the people and the industries of this country.

Dastardly attacks such as that above quoted are a disgrace to their authors, and will be resented by every respectable man.

'They all do it.'—Every body uses "Teaberry," the now toilet gem to beautify the tooth and give fragrance to the breath. Get a five cent sample.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

The Irish Land Bill.

This measure was introduced in the House of Commons yesterday, and its provisions prove to be in accordance with the summary forwarded by telegraph, with this notable addition, that advances to any extent in aid of emigration may be made to Colonial Governments or to Companies. This provision will not meet with the approval of the Land Leaguers, who are strenuously opposed to emigration. Several Irish members expressed themselves as fairly satisfied with the Bill, but beyond doubt the Government will have a strong opposition to meet.

Their first trouble is the resignation by the Duke of Argyle, of his seat in the Cabinet on account of differences of opinion with his colleagues in regard to its provisions. The resignation of so strong a Liberal as his Grace shows that the landed interest of the United Kingdom will be strongly arrayed against the Government measure.

It is reported that Sir William Harcourt, Home Secretary, will follow the example of the Duke of Argyle, in which case a crisis may not unlikely occur.

A Slander Refuted.

The Brighton *Ensign* thus shows conclusively the falsity of the cock-and-bull story published by our local contemporary regarding the manner in which Mr. Cochrane voted, or rather did not vote at all, in the election in East Northumberland:

After reading the above we had an opportunity of interviewing the returning officer referred to. He says that "there were *no blank* ballots," that "Mr. Cochrane did *not* vote *first*," and that, further, "he could not tell, if on oath, how Mr. C. voted." The returning officer was Smith Hinman, Esq., a Reformer and Justice of the Peace, one of the most respectable residents of the township of Cramahe, and who would do nothing so dishonest as that which has been laid to his charge by the party who gave the *Ontario* its information if it would win a dozen elections or cover a political opponent with shame and obloquy for ever. The report is also most unfair to Mr. Cochrane, who, we are bound to say, as far as we know, supported Mr. Kennedy from the first day of his candidature to the end with all the influence he could command. We feel that the above correction should be made by us, as it is the province of an independent journal to tell the whole truth, no difference if the telling thereof hurts friend or foe. We regret that our contemporary should have been so grossly deceived as regards its information, and thus led to make a serious charge againt an honest officer and a private citizen.

The correspondent who invented or at least retailed the scandalous charge against Messrs. Cochrane and Hinman ought to be forced to make a public apology.

BISHOP CLEARY AT KINGSTON.

A Magnificent Reception.

The Kingston papers contain lengthy reports of the reception accorded to Bishop Cleary, and both publish portraits of the new Bishop.

The *News* states that the address from the Roman Catholic people of Belleville was presented at Tyendinaga Station, and that His Lordship replied as follows:

Dr. Murphy and gentlemen of the Reception Committee—I am exceedingly thankful to you for your kind address of welcome. This is the first place in the diocese which has honored me with lay sentiments of love and fidelity and I can assure you that this will endear your city to me. At other places along the line, two or three representative gentlemen have paid their respects to me, but yours is the first city which has presented me with a formal address of welcome. I am thankful to you and will not forget you. To one coming among you from another country I feel as one who is totally undeserving of the high praise which has been bestowed upon me, but I can say heartily I have come to devote my life to you, whatever life and spirit is in me. From the expressions of kind and warm sympathy I have received from Bishops, priests and laity, and all members of the House of Faith, I have commenced to feel at home among you. I am very pleased to find in this address, as well as the address which has been forwarded to me from Kingston, tender, reverential and affectionate expressions to the memory of my predecessors. I am pleased to find you loyal to your bishops, not only in life but when their tongues are silent in death. And I trust that whether my course be short or long, when I am gone you may also remember me. I am thankful to your loyalty to me. I come only as the representative of Christ's successor here on earth and in the name of the Catholic Church. I thank you for your loyal sentiments of love and fidelity to the Catholic Church.

His Lordship then chanted the Episcopal benediction and the deputation retired. The bishop wore the handsome gold chain and cross set with amethyst which was presented to him by His Holiness the Pope on the day of his consecration.

The train arrived at the foot of Brock Street, where sundry members of the Reception Committee were in attendance and the programme, as arranged, was gone through with.

Vicar General Farrelly read the address from the clergy, and Dr. Sullivan that on behalf of the laity, to both of which Bishop Cleary made suitable reply. Amongst the clergy present were Vicar General Farrelly, Father Leahy, Belleville; Father Brophy, Tyendinaga; Father Casey, Campbellford; Fathers Davis and Connolly, Madoc; Father Brennan, Picton; and Father Mackey, Tyendinaga.

A country doctor writes: " am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

Editorial Notes.

WHICH IS BEST?

The London *Free Press* thus refers to the recent attempt of the *Globe* to show a heavy increase of prices of manufactured goods under the present tariff: "Have any of the poor men of Ontario or of anywhere else commissioned the *Globe* to whine on their behalf? Have any of them complained of their inability to buy their clothes since the revival of trade under the Tilley tariff? Have they ever asked the organ to aid them in the solution of this conundrum—Whether is better a cheap garment and no money to buy it, or one a few cents a yard dearer with plenty of money to pay for it, and a happy heart to enable him to wear it with pleasure when he has it? No doubt, there was plenty of cheap goods in every store during the Grit *regime*; no doubt, they were held at a low figure; no doubt, bankrupt stock could have been obtained every day in the week for little more than a song, and no doubt the few dollars necessary to buy them were so difficult of attainment that the very cheapness was more productive of irritation than pleasure. But all this is changed now. If the present Government were obliged to readjust the tariff and raise the duties on many articles of import to meet the necessities of the State, they have so arranged these duties, that the increase in business has brought money into the pockets of the artisans, and they now feel no difficulty in providing both food and clothing for their families."

THE OUTLOOK.

The London *Free Press* says:—"The fact is, that the prophet Jeremiah, so well personated by the hon. leader of the Opposition, is terribly out of place at present in the Dominion. Canada never had so good an outlook as it has to-day. See what a reversal of the economical condition two short years have brought about. In 1878 we imported $93,081,787 worth of goods; in 1880 we imported $87,489,948, a difference of $5,582,040 in favor of Canadian industry. This amount was kept in circulation amongst ourselves instead of being sent to a foreign country. In other words, to the extent of this sum Canadian industry has been substituted for foreign industry. Of that we are sure. Then our exports in 1880 were $8,135,011 in excess of 1878, and this sum may properly be added to the former amount in showing the extent of our progress. Here, then, it is demonstrable by the trade returns that Canada has become better off in two years by $14,717,052. To this may be added the appreciation of stocks of all kinds amounting in the aggregate to at least $14,000,000, showing the country is richer now by nearly $30,000,000 than it was in 1878, the memorable year that the Grits were turned out of office. But a far larger amount still is about to be expended in the building of the Pacific Railway, a great proportion of which will enter into the immediate circulating medium. The prospect of such a flood of commercial and industrial life-current being started must quicken the dullest pessimist into hopefulness. In presence of such an outlook, the voice of Jeremiah crying woe! woe! sounds harsh and discordant."

NOT RUINED.

Evidently the N. P. has not quite ruined Toronto, at least as yet, judging from the following item which appeared in the *Globe* on the 7th inst.:—"Five years ago, Mr. William Barber, of Queen-street, purchased a corner lot opposite the site of the town hall, Parkdale, for $2,000. On Monday he sold the lot for $5,000."

To the Editor of the Intelligencer.

SIR,—A score or more of my friends in this vicinity whom I have chanced to meet within the past few days, have informed me that they saw a statement in the *Ontario* to the effect that I was going to "Dakota," and another report was that I had *sold out*, and was about to remove to "Florida." In reply, I say that I have never had any intention of going to "Dakota," or any other country where there is five or six months winter. As for Florida, I have not sold out, neither have I had a chance to sell out, and I fully expect to continue farming for another season at least. I should very much like to visit Florida another winter and shun the long cold winter here.

Yours, &c.,
J. H. PECK.

The Canada Consolidated Gold Mining Company.

To the Editor of the Daily Intelligencer:

DEAR SIR—Having observed a paragraph in your issue of last Saturday which mentions my arrival, I beg to ask that you will kindly correct a mistake made by the Madoc *Review* in calling me an assayer, for although assaying will for the time being be part of my duty I am engaged by the Company as a general assistant to the Superintendent.

Yours truly,
A. G. CHARLTON, M.E.
Marmora, April 6th, 1881.

Campbellford Correspondence.

CAMPBELLFORD, April 6th, 1881.

The foundation for the new factory is now ready for the commencement of building, and we understand that a gang of men will be put on to-morrow morning. Mr. Brown, the architect, is here, and has inspected the work so far advanced, with which he is said to be highly pleased. Mr. Russell, the contractor, it appears is well up to his business and will have everything done in proper order. A great quantity of brick has already arived from Belleville by the G.J. Railway and been lodged on the lot.

A crowd left here by the morning train for Mr. Bennett's great sale. Arrangements had been made with Mr. Detlor, General Superintendent, for the stoppage of the cars on the track to give people going and coming the advantage of attending the sale, a great favor certainly conferred on Mr. B, and as such I am sure he will acknowledge it.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

THE UNIVERSITY BOAT RACE.

Oxford the Winner.

BARNES, April 8, 7:30.—The crowd of spectators does not equal that of former years. Vehicles of every kind are arriving, but waggons and other accommodation for standing by spectators are not much patronized yet.

PUTNEY, 8:40.—The haze began to clear away at 8. Before 8 the two crews were on the ground, also a large accession to the spectators. The Oxford crew took a preliminary spin before 8. The Cambridge crew did not take the water until they were ready for a start. The umpire's boat appeared soon after 8.

On entering their boats the crews were greatly cheered, Cambridge seeming to hold the first place in public estimation.

PUTNEY, 8:30.—University boat crews have just started for the race. The Cambridge boat has the Surrey side of the river, and Oxford the Middlesex side.

LONDON, 9 a.m.—At Hammersmith bridge, Oxford was leading by scarcely a boat's legth.

LONDON, 10 a.m.—Oxford has won the race.

Oxford got the best of the start and led for a short distance, but nearing Hammersmith bridge Cambridge, who were evidently working very hard, made a strong effort and drew nearly on a level, amid great cheering. The Oxfords did not appear much distressed, but quickened their strokes lightly and passed the bridge a clear length ahead. As soon as the boats were through the bridge, Cambridge again made a bid for first place, but the Oxfords stood them off without difficulty and increased the gap to nearly two lengths. The Oxfords evidently felt they had the race in their hands, and were rowing strongly and steadily.

Fatal Railway Accident.

TORONTO, April 8.

A collision occurred on the Northern Railway at 6:30 this morning between Barrie and Allandale. David Thornton, a fitter from the Toronto shop, was killed, and another was badly injured. An engine and three cars were destroyed.

Church News

The following is from the correspondence of the *Dominion Churchman*:—

STIRLING.—A new church is about to be built on the 8th line, Rawdon, in this mission. It is to be as far as possible a copy of the neat little church recently erected at Shannonville. Whether it will be of wood or stone we are not informed. The Rev. T. Godden B. A., is the missionary.

MARMORA.—There is also a church talked of here in the 12th con., Rawdon, the result of the very successful labors of the missionary the Rev. C. M. Harris, B. A., who has, since his appointment to Marmora, won golden opinions for his earnestness and zeal.

—A company for the purpose of manufacturing peat has been started in Winnipeg. If its operations are successful the fuel problem will be solved.

$5 TO $20 per day at home. Samples worth $5 free. Address STINSON & Co., Portland, Maine.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similiar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

BLACK CASHMERES.

SPECIAL VALUE offered in these Goods.

We have a Black Cashmere over one and a quarter yards wide **at 65 cents** per yard, that cannot be equalled in the city, and another 38 inches wide **at 52½ cents**, which is equal to what is usually sold at 75c.

We have also **Union Cashmeres** and BLACK PERSIAN CORDS very cheap.

We have just received a large assortment of

Spring Dress Materials,

in the latest styles, to which we invite the attention of the Ladies; and we have still 2 pieces of our celebrated **$1.29 Black Silk**, the best value in the market. It cannot be equalled under $1.75 to $2.00 per yard.

GLASGOW WAREHOUSE.

Local Notices.

Notices under this head *cts. a line each insertion. After six insertions 5 cts. a line.*

Drs. Williams and Nash have been very busy all day in attending to the many patients and others who have called upon them at their rooms at the Dafoe House—suffering with some form of head, throat and lung trouble. Their new system of medicated inhalations is taking like wild fire, and many who have tried almost everything else have tried the medicated inhalations and have been quickly cured of their troublesome disease. Two days more only to see the two doctors together.

Daily Intelligencer.

BELLEVILLE, FRIDAY, APRIL 8.

5 O'CLOCK EDITION.

City and Vicinity.

THERE was no Police Court this morning.

THE cells contained two prisoners and one tramp last night.

THE City Council will hold an adjourned meeting on Monday night.

SEVERAL skiffs were observable on the open water in front of the city this morning.

THE Lowell *Caurier* says that the first black Friday occurred in Robinson Crusoe's time.

A TRAIN load of material for filling in the Grand Junction wharf extension arrives each day.

THE fields along the line of the G. J. R. begin to wear a smiling aspect. Very little snow remains.

THE organ in Christ Church has been set up, and the work of tuning it will be commenced to-morrow.

DR. MURPHY has not been appointed Goal Physician. That appointment rests with the County Council.

THE St. George's Society will hold a meeting to-morrow for the purpose of arranging for the annual celebration.

THE *Globe* says: "A vessel firm here has been offered 50c. a ton on iron ore from Belleville to Fairhaven. It was not taken.

TEN more men arrived last night for Pullman & Hamilton's show, making forty now here. They will employ ninety people in all.

THE mild weather of yesterday spoiled the ice in the curling rink, and it is not probable that there will be any more play this season.

THERE was comparatively small attendance at the entertainment given last night under the auspices of the Woman's Christian Association. The performance was of average merit.

A SOCIAL will be held in the S. S. Room of John Street Presbyterian Church on Friday, the 15th inst, the auspices of the Literary Association. A good programme is in preparation.

RAIN is now very much desired by farmers, as warm showers would take the frost out of the ground and settle the fall wheat, which has been a good deal heaved by the late severe weather.

THE area of open water in front of the harbor has widened greatly since yesterday morning. The east channel is now clear, the ice which extended across it from the Island to the ferry slip having broken up and moved out.

VENNOR hit it when he guessed that there would be a snow fall on the 4th or 5th inst., but he was altogether wrong in predicting that navigation would open on Lake Ontario on or about the 7th, and that the St. Lawrence would be open about the 9th or 11th.

THURSDAY evening next is the time fixed for the re-delivery at Ottawa, of Prof Macoun's lecture on the fauna and flora of the North-West, which was delivered before the Ottawa Field Naturalists' Club. The lecture is repeated by special request of His Excellency the Governor-General.

MR. ALEX. ROBERTSON, M. P. P., who has been confined to his house by malignant sore throat for five weeks past, has so far recovered that he was able to be abroad today. The ailment is of a very lingering character, but it is to be hoped that Mr. Robertson will soon be fully recovered from its effects.

THE Board of Health ought to take some action with regard to the removal of the cells from the Police Station. The stench which arises from them is almost unbearable and must be detrimental to the health of the policemen and civic officials whose offices are in the building. This is no new grievance, and as all attempts to prevent the effluvia have proved unsuccessful, the Council ought to deal with it now.

WEATHER PROBABILITIES. — Toronto, April 8.—Lakes, easterly to northerly winds; fair, mild weather.

ODDFELLOWS' EXCURSION. — Belleville Lodge 81 I. O. O. F. intend celebrating the 53rd anniversary of American Oddfellowship, on the 26th inst., by running an excursion to Peterborough over the Grand Junction on that day. The Oddfellows' Band will accompany the excursionists. As this will be the first popular excursion from Belleville to Peterborough there is no doubt that it will be well patronized by our citizens.

LONG SERVICE.—The *Whig* says: "Very Rev. Vicar General Farrelly has completed his thirtieth year's service in the priesthood. On three occasions he has acted in the responsible position of Administrator of the Diocese of Kingston. It would not be surprising if the clergy and people acknowledged his long service in some befitting way."

FINE LOT OF LIVE STOCK.—About twenty head of short-horn cattle were shipped to Mr. J. Snell, of this city, by his brother in Galt, and weighed on the market this morning. They were splendid specimens of highly bred cattle. Mr. Snell sold ten of them to Mr. J. Brooks, of Trenton, and two to Mr. Geo. Thomas, of Belleville. He retained the remainder for his own use.

NEEDS LOOKING AFTER.—We would respectfully call the attention of the Public Works Committee to the railing on Church St. from St. Michael's Church down the hill to great St. James St. For nearly half the distance the railing is down, leaving no protection against the possibility of falling sheer down forty or fifty feet into the ravine below. Walking on that part of Church St. is very dangerous to children and near-sighted pedestrians, and should be seen to at once.

ASTRONOMICAL.—Whoever gazes at the heavens this month will see that a great change is going on. The stars that made the winter evening brilliant are giving place to those that adorn the summer nights. As Sirius disappears in the west, Vega rises in the northwest, glittering in the Harp, fabled to be the very instrument with which Orpheus made rocks and trees to dance. Just as the last bright star in the giant Orion sinks from sight behind the Orange hills, over in the opposite quarter of the sky a very red flashing star may be seen rising. It is the Heart of the Scorpion. The fable says this is the Scorpion that, with one deadly stroke, killed the almost invincible Orion to avenge a woman's wrongs. So when it rises Orion disappears and thus year after year the chase is kept up across the sky.

A FINE HORSE.—The Percheron stallion "Matchless," which has been purchased from Mr. Dunham, of Oaklawn, Illinois, by Messrs. Morden, Sprague, Brickman and Badgely of Ameliasburg, for the improvement of stock in this vicinity, arrived safely this morning. "Matchless" is a jet black, stands a trifle over 15½ hands high, and weighs 1,450 pounds. He is a very fine sample of the heavy draft horse, having a heavy body set on short, clean legs, with powerful fore arm and very strong back, loins and neck, yet clean in throat and jaw. His appearance is good, the general contour being taking, with heavy mane and magnificent crest. The horse is very docile and tractable, which is a great desideratum. Those interested can see the animal at Mr. Foster's stable, where he will remain for a few days.

NICE TO BE AN INSECT.—An exchange philosophizes after this fashion:—"Insects generally must lead a truly jovial life. Think what it must be to lodge in a lily. Imagine a palace of ivory or pearl, with a pillar of silver and capitals of gold, all exhaling such a perfume as never rose from human censer. Fancy again the fun of tucking yourself up for the night in the folds of a rose, rocked to sleep by the gentle sigh of the summer air, nothing to do when you wake but wash yourself in a dew-drop, and fall to and eat your bedclothes." Very nice, no doubt, but imagine a dose of whale oil soap, or the death-dealing hellebore, or tobacco water, or being suffocated with tobacco smoke or worse than all, being impaled on a pin and attached as an ornament to a lady's hat or bonnet. "All is not gold that glitters."

No. 1 LITERARY CLUB.—A meeting of the literary club in connection with No. 1 Company, 15th Batt., took place last night in the rooms of the club, Carman's Block. It was the first meeting since the new organization. The attendance, both of the Government supporters and supporters of the Opposition, was very large. Each member of the Cabinet was in his place, and the Governor, Mr. Bleecker, presided. The speech from the throne was read by him. It set forth the policy of the Government on all the important questions connected with the Company. When it was read, Premier Hastings moved the adjournment of the House; which motion was easily carried, the Premier having a servile majority at his back. The adoption of the speech from the throne will be moved next Thursday evening, when a lively debate is expected.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50, The best bargains in the city.—JAMES HENNESSY.

CANADA PACIFIC RAILWAY. — Messrs. Stickney and Drinkwater, Chief Engineer and Secretary respectively of the C. P. Syndicate, left Ottawa for Montreal on Wednesday night, from which place they will go to Winnipeg. It is understood that active work on the railway will be begun about the middle of May.

OBIT.—A telegram from Morrisburg on the 7th says:—"Mr. John Pliny Crysler, Registrar for the County of Dundas, died this morning in his 81st year. Mr. Crysler was one of our oldest and most respected inhabitants. He represented this County for a number of years in the old Parliament of Canada, and was appointed to his late position some thirteen years ago. In politics he was a strong Conservative."

VICE-REGAL.—An Ottawa paper says:—"The Princess Louise, on her return to Canada the first week in June, will be accompanied by Lady Sophia McNamara and a party of English friends, who will enjoy some fishing on the St. Lawrence along with the Governor-General. After spending several weeks on the St. Lawrence and a brief stay at Rideau Hall, the vice-regal party will make their trip to Manitoba and the North-West.

CROUP.—This disease is caused by the formation of a false membrane lining the wind-pipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat, This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

News Condensed.

—Sheriff Chauveau is somewhat better.

—Bricklayers in Toronto now get $2.50 per day.

—Sir John Macdonald was much better yesterday.

—The Pacific Railway Commissioners met again at Ottawa this morning.

—Thirteen years ago yesterday the Hon. D'Arcy McGee was murdered in Ottawa.

—The gold coin in the Bank of England is £15,500,000, the greatest amount for many years.

—The Easter holidays at the public schools will comprise only Good Friday and Easter Monday.

—Rev. Alexander Mackonichie's appeal against his sentence of deprivation has been dismissed.

—The Montreal Lacrosse Club played ten matches last season, winning 6, losing 3, and 1 was a scratch match.

—An earthquake at Malaga has caused the death of eleven sailors and soldiers, and the overthrow of numerous houses.

—The G. T. R. are erecting a shed 300 feet at South Quebec to accommodate western freight designed for European shipment.

—Midland Railway traffic receipts for the week ending March 31st show an increase of $1,286 over the corresponding week of 1880.

—Thirty-five car-loads of steel rails have arrived at the St. Lawrence and Ottawa railway depot, Ottawa, within a few days past.

—The Italian Government was defeated in the Chamber yesterday by a vote of 192 to 171. It is announced that the Premier has resigned.

—Earthquake shocks continue at Chio, and are completing the work of ruin. Out of 4,000 inhabitants in one village only 150 can be found alive.

—During the three months of the present year 180 emigrants, principally Germans, have arrived at Ottawa. They have settled on the Upper Ottawa.

—The joint note of the Powers has been presented to Greece. They give assurance that if the terms are accepted the surrender of territory will be guaranteed.

—John McGuinn was found guilty at St. Catharines yesterday and sentenced to three years in the penitentiary for killing John Smith in Wellandport in February last.

—Robert McHolme, of Liverpool, England, whose case has been before the Toronto Courts for the past two or three weeks, was committed for trial on the 6th inst., and will be extradited.

—There is not much news to report concerning Lord Beaconsfield's condition save that the patient is free from spasms, but is on the other hand very weak, and can scarcely resist the disease.

—Mr. Henry Tandy, Mechanical Superintendent of the Canada Pacific Railway, who has been stationed at Selkirk, Man., has resigned his position, having been offered a better position in Montreal.

—England will not send any delegate to the Monetary Conference at Paris. A delegate will be sent on behalf of the India Government, but will not take part in the discussion on bimetallism.

—The nomination of candidates to fill the seat in the Local Legislature rendered vacant by the death of Dr. Harkin, M. P. P. for Prescott, took place yesterday at L'Orignal. Eight candidates were nominated.

—Lord Randolph Churchill's question regarding alleged contributions to *Die Freiheit* by Sir Charles Dilke and Mr. Brassey came up in the House of Commons yesterday and received a decided negative answer.

—On the 6th inst. an omnibus containing three passengers, was struck by a train at Georgetown, and smashed to pieces, Mrs. McPherson, of Arthur, and Miss Austin, of Georgetown, were seriously injured.

—There is talk as to the approaching formation of an Anglican brotherhood in the diocese of Toronto, modeling according to the constitution of the Cowley Brotherhood. Its headquarters will not be in Toronto.

—The Queen is about to purchase the famous historical estate of Stoke Park. She went through the mansion the other day with the Princess Beatrice, and was greatly pleased with it. The price set is $1,250,000.

—The question of establishing a Canadian Curling Association and severing connection with the Royal Caledonia Club of Scotland is mooted at Ottawa, and there appears to be little doubt but that it will soon be consummated.

—A man named Charles Verret, while boiling maple sugar at Lake St. Charles, Que., on Tuesday, during an epileptic fit fell into the fire and was horriblly burnt and scalded, some of the pots of boiling liquid having become capsized over him.

—The Grand Duke Nicholas, cousin of the Czar, has been arrested and interned on the charge of being concerned in political intrigues in favor of his father the Grand Duke Constantine. It is not known whether the latter is privy to the intrigues.

—A fatal accident occurred on the Intercolonial Railway on the 7th. The van of a freight train left the track at Folly Bridge, near Londonderry, and went half over, Conductor Berry was thrown to the bottom of the gulch, one hundred feet, receiving fatal injuries.

—The Montreal Rolling Mills Company is putting in additional machinery costing $150,000. It is about to manufacture iron pipes and tubes. This is an entirely new enterprise in Canada, and there is only one other establishment of the kind on the continent of America.

—A young man named Alfred Lefebre, living about a mile from Martintown, Ont., had his left arm completely shattered, necessitating amputation at the shoulder joint, caused by the accidental discharge of a shot gun which he was carelessly handling on the 7th inst.

—On Wednesday night a lad Geo. Merritt, of Toronto, attempted to repair an old revolver of which he had become possessed. The weapon, it appears, was loaded in three chambers, one of which was discharged in the handling. The unfortunate lad was shot through the heart, and died immediately.

—An unknown disease has broken out among the cattle east of Watertown, N. Y. The stock attacked are blooded animals in the best condition. Several have died. They are taken first by intense coughing, followed by loss of appetite and shrinkage of milk. When let out they appear almost crazy, bite themselves, tearing out chunks of flesh, and appear in the greatest agony.

—The Montreal *Witness* of the 4th inst says: "A Company with a capital of $80,000 is to go into the business of manufacturing candies and similar goods in this city. Application will be made for an Act of incorporation to the Quebec Legislature, and among the applicants are Messrs. T. J. Claxton, J. S. McLachlan, R. W. McLachlan and John Crediford.

—The late Dr. Mostyn, of Almonte, who was drowned a few days ago while going on a professional visit was very much beloved by the people of the Ottawa valley. A public funeral was given him. Shops and mills were closed, and 4,000 to 5,000 people accompanied the remains to the Railway Station. He was buried in Kingston, his old home, with Masonic honors, a number of prominent Masons accompanying the body from Almonte, Smith's Falls and other places.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing those disorders, and what is better, by their aid, they will stay cured.

Mrs. Mary Harrington, Kouchibouguoc, N. B., says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

MORNING DESPATCHES

AMERICAN.

THE CHIO EARTHQUAKE.

NEW YORK, April 8.—The Greek Consul General here appeals for aid for the sufferers by the earthquake at Ohio.

NEW YORK STREET CLEANING.

The Citizen's Committee of 21 are dissatisfied with the street cleaning bill ordered for third reading in the Assembly yesterday and propose to hold an indignation meeting. The Mayor is not willing to divide the responsibility for keeping streets clean.

BOOK SALE.

A sale of the third part of Brenley's library was completed yesterday, amounting to $30,000. The Guttenburg bible, the first book printed with types, brought $8,000.

BURGLARS SURPRISED.

A gang of professional "second story" and "French flat" lifters, while plundering the mansion of a large jewelry and diamond dealer a block from the police station last night, were surprised, and after a desperate struggle two were captured. The same house was recently robbed of $3,000 worth of property. The police say the prisoners have been concerned in over 100 similar robberies within the last five months, whereby $50,000 worth of jewelry was stolen.

ERIE'S EARNINGS.

The net earnings of the Erie Railway from October to February inclusive, show an increase of $485,000.

WASHINGTON SPECIALS.

The *Sun* says it has been intimated that it is the desire of Garfield and Blaine that the deadlock be broken, at least so far as to secure the confirmation of important nominations.

The *Times* says the present nominations for offices in the Southern States, seem to indicate that the administration intends to stand by the active working Republicans of the South.

The *Herald* says it is stated Mahone means to bring out proofs that a Democrat Senator tried to induce him by an offer of places on committees and senatorial patronage, to vote with them, and it was only since he rejected their proposition that they discovered to their great horror his programme.

LAND GRAB CASES.

CLEVELAND, April 8.—In the Missouri land cases in which Vanhise, Linn and Corwin were charged with conspiring to defraud the Government by forged affidavits, all were dismissed yesterday for want of evidence.

DROWNED AT OMAHA.

OMAHA, April 8.—Michael Cunningham and Nicholas Keenan were drowned yesterday by rowing too near a break in the Government rip-rap.

ROLLING MILL BURNED.

TOPEKA, April 8.—A rolling mill owned by the Union Pacific and Atchison, Topeka and Santa Fe Railway Companies was burned last night, The workmen barely escaped before the roof fell. Loss $10,000. Three hundred are thrown out of employment.

THE WESTERN FRESHETS.

SIOUX CITY, Io., April 8.—All the gorges in the river above Siox City are undoubtedly broken. The flood is now at its height. The lowlands on the opposite side of the river are flooded and the people compelled to flee. Apprehensions of trouble in this city are dispelled. There are 200 refugees in town.

PROTECTION TO AMERICAN CITIZENS.

NASHVILLE, April 8.—The Legislature yesterday adopted a resolution calling on the Government to protect American citizens in Great Britain from the penalties of the Coercion Act and other outrages.

IRON AND STEEL WORKERS.

PITTSBURG, April 8.—The Amalgamated Association of Iron and Steel Workers have given the manufacturers notice that all scales of wages terminate on June 1st, causing much anxiety among the employers.

KILLED BY MORPHINE.

NEW YORK, April 8.—Col. Lafayette Beach, aged 68, brother-in-law of the Tennesse Congressman and formerly wealthy, was found dead in bed at his hotel here yesterday. It is supposed he died from an over dose of morphine.

Arrived—*State of Georgia* from Glasgow.

THE IRISH LAND BILL.

The *Herald's* London correspondent says certain provisions of the new Land Bill will perhaps foreshadow the downfall of the law of entail and settlement.

AFTERNOON DISPATCHES.

A BOSTON EDITOR DEAD.

BOSTON, April 8.—Stephen Stockwell, one of the editors of the *Journal*, died this morning. He was one of the oldest journalists in New England, and had held prominent public positions.

COLLISION AT SEA.

VINEYARD HAVEN, Mass., April 8.—The schooner *N. H. Skinner* collided off Cape Cod with the schooner *Fred. Brown*. The latter sank immediately. Only one person saved. The captain, mate, the mate's wife and three children, and one seaman were drowned.

WASHINGTON, April 8.—Indications: Lakes, partly cloudy, areas of snow or rain, nearly stationary temperature.

LONDON, April 8.—Arrived out, the *Alabama* and *Wiser*.

Condition of Lord Beaconsfield

An Improvement.

LONDON, April 8.—Beaconsfield's condition is more hopeful than yesterday.

A BURNING QUESTION.—The burning question in Newfoundland at present is that of the railway. On the 14th of March a large procession, headed by a band, paraded the streets of St. John's bearing a petition of the people for the immediate construction of the road to Hall's Bay, with branch lines to Harbor Grace and Brigus. The work is to be done by a company for a subsidy of $180,000 a year for 35 years, and a grant of 1,000,000 acres of land. The question is not a party one, and was carried without debate. In the "tight little island" the railway is not regarded in the light of a "vampire," but is looked upon as a means of opening up a valuable mining territory and affording desirable facilities over a large extent of country.

It is said that the Militia authorities are considering a proposition to grant Nos. 2, 3, and 4 military districts for camp purposes with a view to having a monster review on the National holiday.

—The Baroness Burdett-Coutts has been seriously ill with what the eminent physician Sir William Gull, at first pronounced to be typhus fever. Subsequently he changed his opinion. At last accounts she was able to go out for a short airing. Her illness is attributed to the mental strain to which she has been subjected for several years.

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

MANHOOD RESTORED.

A victim of early imprudence, causing nervous debility, premature decay, etc., having tried in vain every known remedy, has discovered a simple means of self-cure, which he will send free to his fellow sufferers. Address J. H. REEVES, 3 Chatham St. New York. 135eod&wly

'Hail bounteous, beauteous, gladsome Spring" — this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure If you have not used this medicine yourself, go to your Druggist——— ———and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

MARRIED.

On the 6th instant, by Rev. A. Martin, at the residence of the bride's father, Mr. HERMANN BLEECKER, late of Belleville, to Miss SARAH ELEANOR, third daughter of Daniel Vandewaters, Esq., all of Sidney.

Commercial.

Aug. 24, 1880. 4tf

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage, Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the later stages of consumption. Climatic changes alone will effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhaltion we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late. The winter is approaching, and if you neglect this opportunity you may be obliged to carry your disease until the opening of spring, and then sever your connections with those you love so well.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

CHAPTER XXXVI.

TESSA'S SITUATION DARKENS.

The morning succeeding the arrival of Tessa Holm at the Grange was cold and clear with a sky unusually bright for the season. The wind was blowing keenly and strongly over the wide Dorset heaths, but the air was so bracing that Tessa was tempted out for a walk. Wrapping herself up well against the weather, she left Captain Holm and Squire Todhetly with cigars and newspapers in the dingy little smoking-room, and crossed the lawn and let herself out at the gates into the road.

And then she paused, with a wistful glance in the direction of the Squire's Coppice and Heathstead. This was the morning on which Sir Victor Cheswick had promised to call upon her at Mrs. Gwynne. Since his defence of her from Squire Todhetly's assault on the previous day, she had thought of the gallant young Baronet nearly as much as she had thought of her mother. The thought of him had power to bring a blush to her cheek, a brighter light to her eye, a glow to her heart.

"I should like to meet him again," she said to herself. "He is so noble, so handsome, so grand! But he is rich and I am poor, and our paths lie apart forever."

She sighed, and turning her face resolutely toward the west, walked along the road leading to Wimborn Minster, going in a direction opposite to that by which Sir Victor would probably arrive at Heathstead.

Upon the windy heaths she found that solitude for which was longing. She was dissatisfied with her father, with Todhetly, and with her prospects. She did not wish to stay at the Grange. The words of Mrs. Gwynne when the two had last met still rang in her ears. Her father's savage threat to make his child the instrument of his revenge upon her mother, still rankled in the girl's heart like a knife thrust. Let her mother be what she would, she resolved she would never help any hand to wound her. And despite all that she had heard, and all the mystery that pressed so heavily upon her, Tessa's instincts assured her that her mother was pure and good, and the girl's soul yearned to that unknown mother with a dreary, sick longing that was terrible to bear.

"But I will never seek her, should I learn her name," she thought. "I will never reveal myself to her, I will do nothing to imperil her, or make her husband angry with her. But, oh, if I might only look upon her face, myself unseen, and know her to be my mother?"

That prayer arose to her lips again and again in a bitterness of anguish. She walked on and on upon the desolate highway, with the wintry heaths stretching far on either hand, and at last turned and began to retrace her steps toward the Grange.

She had advanced but a litte way on her return, when she beheld a horseman riding toward her at a swift space. Almost at the first glance she recognized him as her defender of the previous day, and her heart quickened its throbbings, and her eyes brightened, and a scarlet flush stained her cheeks.

Sir Victor did not recognize the light young figure, with its springing step, its resolute air, and sober, gray garments, until he was almost abreast of the girl. Then he uttered a joyful exclamation, checked his horse abruptly, and dismounted, flinging his bridle-rain over his arm. Thus leading his horse he hurried toward Tessa, his hands outstretched, his face beaming.

"This is an unexpected pleasure, Miss Holm," he exclaimed, his rich voice full of warmth and kindliness that might have been easily taken as proceeding from an awakening love for her. "A moment ago I was the unhappiest of mortals. You are feeling well, I hope, after yesterday's adventure?"

Tessa gave him her hand, as she answered:

"I am quite well, thank you, Sir Victor."

"I have just called at Heathstead," said the young Baronet, "and learned to my dismay, that you were gone. Mrs. Gwynne made her appearance, but declined to tell me your present whereabouts. I feared—that is, I fancied—that you had returned to London."

"I am stopping in the neighborhood," answered Tessa, with an effort. "I am at the Grange."

Sir Victor looked amazed.

"Not—not at Todhetly's?" he exclaimed.

"Yes," said Tessa painfully. "You wonder that I should be a guest in his house, after that scene yesterday? I wonder at it myself. But my life has changed entirely since the occurence of that affair, Sir Victor. Yesterday morning I was only a governess, but my own mistress. I did not know that I had a relative on earth. But I have since found my father, who is a guest of Squire Todhetly, and who insisted that I should remain with him a brief time time in the Grange."

Sir Victor looked puzzled and anxious.

"Does your father know that Todhetly insulted you?" he asked.

"I told him all," said Tessa sorrowfully; "but Squire Todhetly was his oldest and best friend, and apologized for the occurrence, and my father insisted that I should overlook the insult. My father is an utter stranger to me, Sir Victor," and Tessa's face flushed, "but none the less I owe him a daughter's obedience, I suppose."

"You look very grave and troubled, Miss Holm," said the young Baronet gently. "There is an expression of unrest and desolation in your eyes. Let me be your friend, for you look as if you needed one. Pardon me if I am intrusive; but it seems to me that I have known you years. How is it that your father is a perfect stranger to you? And how is it that a father can prefer his friend to his daughter, and allow you to remain in his friend's house after his 'friend' has insulted you."

These questions from a stranger would ordinarily have aroused all the haughty pride of Tessa's nature. But Sir Victor did not seem to her a stranger. Besides, his tone of kindly sympathy, and his gentle authoritative manner, seemed to compel the girl's confidence

TO BE CNNTINUED.

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

In cases of Chronic disease which doctors have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264'y

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everyhing else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co., a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Beaconsfield, P. MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL Use.

SUBSTITUTES!

The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer**, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer**; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer**, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

For Sale Everywhere.

Ayer's
Sarsaparilla

Is a compound of the virtues of sarsaparilla, stillingia, mandrake, yellow dock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sustaining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so potent to cure all diseases resulting from impure blood. It cures **Scrofula** and all **scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.**

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impurity of the blood need despair who will give AYER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numerous low-priced mixtures, of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly seated. AYER'S SARSAPARILLA is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-purifier known. Physicians know its composition, and prescribe it. It has been widely used for forty years, and has won the unqualified confidence of millions whom it has benefited.

Prepared by Dr. J. C. Ayer & Co.,
Practical and Analytical Chemists,
Lowell, Mass.

MANHOOD
HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

EARLY TAKEN.

She seemed so young, so young to die!
Life, like a dawning, rosy day,
Stretched from her fair young feet away,
And beams from the just-risen sun
Beckoned and wooed and urged her on.
She met the light with happy eyes,
Fresh from the dews of Paradise,
And held her sweet hands out to grasp
The joys that crowded to her clasp,
Each a surprise and all so dear;
How could we guess that night was near?

She seemed so young, so young to die!
When the old go, we sadly say,
'Tis Nature's own appointed way;
The ripe grain gathered in must be,
The ripe fruit from the laden tree,
The sere leaf quit the bare, brown bough;
Summer is done, 'tis autumn now,
God's harvest-time, the sheaves among
His angels raise the reaping song,
And though we grieve, we would not stay
The shining sickles on their way.

She seemed so young, so young to die!
We question wearily and vain
What never answer shall make plain;
"Can it be this the good Lord meant
Which frustrates his benign intent?
Why was she planted like a flower
In mortal sun and mortal shower,
And left to grow, and taught to bloom,
To gather beauty and perfume;
Why were we set to train and tend
If only for this bootless end?"

She seemed so young, so young to die!
But age and youth—what do they mean
Measured by the eternal scheme
Of God, and sifted out and laid
In his unerring scales and weighed?
How may we test their sense or worth,
These poor glib phrases, born of earth,
False accents of a long exile,
Or know the angels do not smile,
Holding out truth's immortal guage,
To hear us prate of youth and age?

She seemed so young, so young to die!
So needed here by every one,
Not there; for heaven has need of none.
And yet, how can we tell or say?
Heaven is so far, so far away;
How do we know its blissful store
Is full and needeth nothing more?
It may be that some tiny space
Lacked just that little angel face,
Or the full sunshine missed one ray
Until our darling found the way.

He Giveth His Beloved Sleep.

He sees when their footsteps falter, when their hearts grow weak and faint;
He marks when their strength is failing, and listens to each complaint;
He bids them rest for a season, for the pathway has grown too steep;
And, folded in fair, green pastures,
He giveth His loved one sleep.

Like weary and worn out children, that sigh for the daylight's close,
He knows that they oft are longing for home and its sweet repose;
So He calls them in from their labors, ere the shadows round them creep,
And silently watching o'er them,
He giveth His loved ones sleep.

He giveth it oh, so gently! as a mother will hush to rest
The babe that she softly pillows so tenderly on her breast.
Forgotten are now the trials and sorrows that made them weep,
For with many a soothing promise
He giveth His loved one sleep.

He giveth it! friends the dearest can never this boon bestow;
But He touches the drooping eyelids, and placid the features grow;
Their foes may gather about them, and storms may round them sweep,
But, guarding them safe from danger,
He giveth His loved ones sleep.

All dread of the distant future, all fears that oppress to-day,
Like mists that clear in the sunlight, have noiselessly passed away.
No call nor clamor can rouse them from slumbers so pure and deep,
For only His voice can reach them
Who giveth His loved ones sleep.

Weep not that their toils are over; weep not that their race is run;
God grant we may rest as calmly when our work, like theirs, is done!
Till then we would yield with gladness our treasures to Him to keep,
And rejoice in the sweet assurance—
He giveth His loved ones sleep.

TABERNACLE SERMONS.

Discourse by Rev. T. De Witt Talmage.

What shall we do with Jesus?

"What shall I do, then, with Jesus?"—St. Matthew xxvii., 12.

Pilate was an unprincipled politician. He had sympathies, convictions of right, and desired to be honest, but all these were submerged by a wish to be popular and to please the people. Two distinguished prisoners were in the grasp of government, and the proposition was made to free one of them. There stands Barabbas, the murderer. There stands Christ, the Saviour of the world. At the demand of the people the renegade is set free, but Jesus is held in custody. As the hard-visaged and cruel-eyed Barabbas goes among his sympathizers, receiving their vulgar congratulation, Pilate turns to his other distinguished prisoner—mild, meek, inoffensive, loving, self-sacrificing—and he is confounded as to what course he had better take, so he impanels the mob as a jury to decide, saying to them:—"What shall I do, then, with Jesus?" Oh! it is no dried or withered question, but one that throbs with warm and quick pulses in the heart of every man and woman here. We must do something with Jesus. He is here. You and I are not so certainly here as He is, for He fills all this place—the loving, living, dying Christ, and each one of us will have to ask and answer for himself the question, "What shall I do, then, with Jesus?"

Well, my friends, there are three or four things you can do with him. You can, in the first place, let him stand without one word of recognition; but I do not think your sense of common courtesy will allow that. He comes walking on such a long journey, you will certainly give him a chair on which He may sit. He is so weary, you would not let Him stand without some recognition. If a beggar comes to your door, you recognize him and say, "What do you want?" If you see a stranger faint in the street, you say, "What is the matter with you?" And your common humanity, and your common sympathy, and your common sense of propriety will not allow you to let Him stand without recognition,—this wounded one of the hills. You will ask, what makes Him weep? where He was hurt; who wounded Him; whence He came; whither He goes. I know there have been men who have with outrageous indifference treated Christ; but I know very well this morning that that is not what you will do with Jesus.

Another thing you can do [illegible] person comes and persists in standing close up to you, and you have in various ways given him to understand that you do not want his presence or his society, then you ask the reason of his impertinence and bid him away. Well, that is what we can do with Jesus. He has stood close by us a great while. Ten, twenty, thirty, forty years. He has stood close by you three times a day, breaking bread for your household; all night, watching by your pillow. He has been in the nursery among your children. He has been in the store among your goods. He has been in the factory amid the flying wheels, and now, if you do not like His society, you can bid Him away—aye, if He will not go, you can take Him by the throat and tell Him you do not want His interference, that you do not want His breath on your cheek, that you do not want His eye on your behavior. You can bid Him away, or, if He will not go in that way, then you can stamp your foot, as you would at a dog, and cry, "Begone!" Yet, I know you will not treat Jesus that way. I know you too well. Why, Pilate could not do that—you could not. If you were desperadoes and outlaws, I might expect it of you. But I know that that is not the way you will treat Him, that that is not the way you will do with Jesus.

There is another thing you can do with Him, you can look on Him merely as an optician to help blind eyes, or an aurist to tune deaf ears, a friend, a good friend, a helpful companion, a cheerful passenger on shipboard; but that will amount to nothing. You can look upon Him as a God and be abashed while He hushes the storm, or blasts a fig-tree, or heaves a rock down the mountain side. That will not do you any good—no more save your soul than the admiration you have for John Milton or Oliver Cromwell. I can think of only one thing you can do with Jesus, and that is to take Him into your hearts. That is the best thing that you can do with Him. That is the only safe thing you can do with Him, and may the Lord omnipotent, by His spirit, help me this morning to persuade you to do that. A minister of the gospel stood speaking to some children and said: "I will point you to Christ." A little child rose in the audience and came up and put her hand in the hand of the pastor and said: 'Please, sir, take me to Jesus now. I want to go now." Oh, that it might be this morning with such simplicity of experience that you and I join hands and seek after Christ, and get an expression of His benefaction and His mercy.

In the first place, my hearer, take Christ into your confidence. If you cannot trust Him, whom can you trust? I do not offer you a dry theological technicality. I simply ask you to come and put both feet on the "Rock of Ages." Take hold of Christ's hands and draw Him to your soul with perfect abandonment, and hurl yourself into the deep sea of His mercy. He comes and says, "I will save you." If you do not think that He is a hypocrite and a liar when He says that, believe Him and say: "Lord Jesus, I believe. He is my heart. Wash it. Save it. Do it now. Aye, it is done, for I obey Thy promise and come. I can do no more. That is all Thou hast asked. I come. Christ is mine. Pardon is mine. Heaven is mine." Why, my friends, you put more trust in everybody than you do in Christ, and in everything; more trust in the bridge crossing the stream, in the ladder up to the loft; more trust in the stove that confines the fire, more trust in the cook that prepares your food, more trust in the clerk that writes your books, in the druggist that mixes the medicines, in the bargain-maker with whom you trade—more trust in all these things than in Christ, although he stands this morning offering without limit and without exception universal pardon to all who want it. Now, is not that cheap enough? All things for nothing. This is the whole of the Gospel as I understand it—that if, with all your heart, you believe that Christ died to save you, you are saved. When? Now. No more doubt about it than that you sit there. No more doubt about it than that you have a right hand. No more doubt about it than that there is a God. If you had committed five hundred thousand transgressions, Christ would forgive you just as freely as if you had never committed but one. Though you had gone through the whole catalogue of crime—arson, and blasphemy, and murder—Christ would pardon you just as freely, you coming to Him, as though you had committed only the slightest sin of the tongue. Why, when Christ comes to pardon a soul He stops for nothing. Height is nothing. Depth is nothing. Enormity is nothing. Protractedness is nothing.

"Or sins like mountains for their size,
The seas of sovereign grace expand,
The seas of sovereign grace arise."

Lord Jesus, I give up all other props. I give up all other expectations. Ruined and undone, I lay hold of thee. I plead thy promises. I fly to thy arms. "Lord, save me, I perish."

When the Christian Commission went into the army during the war, there were a great multitude of hungry men, and only a few loaves of bread, and the delegate of the commission was cutting the bread and giving it to wounded and dying men. Some one came up and said, "Cut those slices thinner or there will not be enough to go around." And then the delegate cut the slices very thin and handed the bread around until they all had some, but not much. But, blessed be God, there is no need of economy in this gospel. Bread for all. Bread enough and to spare. Why perish with hunger?

Again, I advise you, as one of the best things you can do with Christ, to take him into your love. Now, there are two things which make us love anyone—inherit attractiveness, and then what he does in the way of kindness toward us. Now, Christ is in both these positions. Inherent attractiveness. Fairer than the children of men. The lustre of the morning in his eye. The glow of the setting sun in his cheek. Myrrh and frankinscence in the breath of his lip. In a heaven of holy beings, the best. In a heaven of mighty ones, the strongest. In a heaven of great hearts, the tenderest and most sympathetic. Why, sculpture has never yet been able to chisel his form, nor present the flush of his cheek, nor music to strike his charms; and the great surprise of eternity will be the first moment when we rush into his presence, and with uplifted hands, and streaming eyes, and heart bounding with rapture, we cry out, "This is Jesus!"

"All over glorious is my Lord,
He must be loved and yet adored;
His worth, if all the nations knew,
Sure, the whole earth would love Him too."

Has He not done enough to win our affections? Peter the Great, laying aside Royal authority, went down among the ship carpenters to help them; but Russia got the chief advantage of that condescension. John Howard turned his back upon the refinements, and went amid prisons to spy out their sorrows and to relieve their wrongs; yet English criminals got the chief advantage of that ministry. But when Christ comes the sacrifice is for you and me; the tears for you and me. If I were hopelessly in debt and some one came and paid my debts and gave me a receipt in full, and called off the pack of hounding creditors—if I were on a foundering ship, and you came in a lifeboat and took me off, could I ever forget your kindness? Would I ever allow an opportunity to pass without rendering you service or attesting my gratitude and love? Oh! how ought we to feel toward Christ, who plunged into the depth of our sin and plucked us out? Ought it not to set the very best emotions of our heart into the warmest—aye, a red-hot glow? The story is so old that people almost get asleep while they are hearing it. And yet there He hangs—Jesus the man, Jesus the God. Was there anything before or since, anything to be compared with this spectacle of generosity and woe? Did heart-strings ever snap with worse torture? Were tears ever charged with a heavier grief? Did blood ever gush, in each a globule the price of a soul? The wave of earthly malice dashed its bloody foam against one foot, the wave of infernal malice dashed against His other foot, while the storm of God's wrath against sin beat on his thorn-pierced brow, and all the hosts of darkness, with gleaming lances, rampaged through His holy soul! Oh! see the dethronement of heaven's King! The conqueror fallen from the white horse! The massacre of a God! Weep, ye who have tears, over the loneliness of His exile and the horrors of His darkness. Christ sacrificed on the funeral pyre of a world's transgression. The good for the bad. The great for the mean. The infinite for the finite. The God for the man! Oh! if there be in all this audience one person untouched by this story of the Saviour's love, show me where he is, that I may mark the monster of ingratitude and of crime. If you could see Him as He is, you would rise from your seat and fling yourselves down at His feet, crying, [illegible] Do you want more of His tears? Why, He has shed them all for you. He has no more. Do you want more of His blood? His arteries were emptied dry, and the iron hand of agony could press out nothing more. Would you put him to worse excruciation? Then drive another nail into His hand, and plunge another spear into His side, and twist another thorn into His crown, and lash Him with another flame of infernal torture. "No" says some one "stop stop! He shall not be smitten again. Enough the tears. Enough the blood. Enough the torture. Enough the agony." "Enough," cries earth. "Enough" cries heaven. "Aye, "Enough," cries hell. At last, enough. Oh, look at Him. Thy butchered Lord. Unshrouded and and ghastly as they flung Him from the tree. His wounds gaping for a bandage. Are there no hands to close these eyes? Then, let the sun go out and there be midnight. Howl, ye winds, and howl, ye seas, for your Lord is dead! Oh, what more could He have done for you and for me than He has done. Could He pay a bigger price? Could He drink a more bitter cup? Could He plunge into a worse catastrophe? And can you not love Him? Groan again, O blessed Jesus, that they may feel Thy sacrifice. Groan again. Put the four fingers and the thumb of Thy wounded hand upon them, that the gash in the palm may strike their soul and Thy warm life blood in them. Groan again, O Jesus, and see if they will not feel. Oh! what do you do with such a Christ as that! You have got to do something with Him this morning. What will you do with Jesus? Will you slay Him again by your sin? Will you spit upon Him again? Will you crucify Him again! What will you do this morning with Him who has loved you with more than a brother's love, more than a father's love—yea, more than a mother's love, through all these years. Oh! is not enough to make the hard heart of the rock break? Jesus! Jesus! What shall we do with thee?

I have this morning to say that the question will, after a while change, and it will not be what shall we do with Christ, but what will Christ do with us. Ring all the bells of eternity at the burning of the world! On that day what do you think Christ will do with us? Why, Christ will say: "There is that man whom I called, there is that woman whose soul I importuned; but they would not any of my ways. I gave them innumerable opportunities of salvation. They rejected them all. Depart, I never knew you." Blessed be God, that day has come. Halt, ye destinies of eternity, and give us one more chance. Oh! men and women, repent or perish. That is the message I bring. There is no half way work about it. Believe and live; refuse and die.

Some travellers in the wilderness of Australia a few years ago found the skeleton of a man and some of his garments, and a crusty kettle on which the man had written or scratched with his finger-nail these words: "O God, I am dying of thirst. My brain is on fire. My tongue is hot. God help me in the wilderness." Oh! how suggestive of the condition of those who die in the wilderness of sin from thirst. We take hold of them today. We try to bring the cool water of the rock to their parched lips. We say, "To every one that thirsteth, God, thy Father, awaits thee." Ministering spirits, who watch the ways of the soul, bend now this moment over this waiting, weeping, sinning, dying auditory, to see what we will do with Jesus.

Think While you Read.

The *Teacher's Journal*, in an article on methods of study, reminds the student that the first essential to successful study is the power of concentration of thought. This power is largely a matter of habit and cultivation. Read five pages of history in a lackadaisical manner. Close the book and write out all you can remember. Then compare your production with the printed matter, and you will be able to judge of your proficiency. Read five pages more with fixed attention and a resolution to retain the subject, and compare as before. You will find a marked improvement. If your memory is treacherous read but very little, and always write on the subject. When you hear a sermon or address, *hear* it, and afterward reduce it to writing. Read no novels, and do not read aloud to please others unless you care (nothing) for the article yourself. A practiced reader can read aloud for hours and carry on an independent train of thought all the time. This ruins the faculty of study as well as the memory. Dismiss all other subjects but the one in hand. Let the ear be deaf to all sounds, and the eye blind to all sights. Let the sense of touch sleep, and smell and taste be as though they were not. A lesson learned in this state of mind will stay with you, and will not need to be "crammed" again the night before examination. It will be like lines carved deep into the rock, or chiseled on the Rosetta stone. The other method is the dim tracing of obscure letters in the sand, which the next wave obliterates.

Ingersoll's Mistakes.

I have had occasion recently to listen in the Brooklyn Academy of Music to Mr. Ingersoll, and to admire the lambent play of his wit and to form some idea of its lightening power when it is made to interpret the doctrines and creeds of the church. The mistake that Mr. Ingersoll makes is to take the excrescences that are of human origin that have grown around and about as the religion of Christianity and the religion of the church, and then, with his play of fancy at the same time sweep away the truth and the influence of those who have lived and are living a true religious life. If I were to establish a new school of medicine, and if I were to collect all the idiots and all the men who had warts on their faces, and say, "There's a humanity for you; what do you think of it?" I should be doing what Ingersoll is doing when he takes single instances from the old and new Testaments and represents himself, through them, as opposed to religion, and in so doing gives a portraiture of it. There were such criticisms upon the bible hundreds of years before Ingersoll was born. I am afraid he does not read his bible very much, and when he does read it he does not find the honey and the marrow of it. When I look upon the dove as she flies in the ambient air with her eyes resting upon the fields and the inhabitants of man I see that which gives me joy, but when I see the vulture flying high I know that it is a bird that is looking for another harvest, and that there is nothing that is loathsome, nothing that is of the nature of carrion, that it fails to see. It is so with Mr. Ingersoll.—*Henry Ward Beecher.*

Old Letters.

Old letters! It is so strange, so very strange, to draw them from their dark hiding-place in the dusty cabinet, and tenderly untie the knots of faded ribbon; it is so sweet to bend lovingly over the yellow, time-stained, ink-dimmed pages; and, oh, it is so sad to think that the dear hands which traced the friendly words are folded in death over the still hearts that prompted them!

Old letters! The red fire gleams fitfully and brightly, as though it would claim them for its lawful prey; but, ah, be merciful; do not burn, do not destroy them yet, the old, old letters!

She is only an elderly spinster, I hear you say—that woman with snow-touched hair and furrowed cheeks; but friend you are mistaken. She is reading a note written to her in years that are past by one who was once her lover—who is now no more. And I think that there must be magic in old letters, because of a single instant she is not sixty but sixteen!

And that gray bearded bachelor yonder—how eagerly he pores over a gilt-edged *billet doux*, battered and somewhat torn, but nevertheless pregnant with the scent of violets which time has made only more sweet! Ah, the perfume has wrought a miracle; for once more with all the ardor of youth, he thinks of a pair of scarlet lips, and, kind reader, I pity him when he wakes from his day dream, and remembers that a certain blue-eyed, golden haired girl of long ago is now another man's wife, and the mother of seven children!

Old letters; A fond mother still cherishes some'filled with youthful enthusiasm and written by her soldier boy, who fell at Shiloh. A widow treasures those penned by the husband who has gone before her; and although the words upon the pages may be dimmed by years, are not they imprinted on the heart?

Old letters! Old letters! They are photographs of the soul; they are souvenirs of the dead and buried past; they are so strange, so sweet, so sad, you cannot, must not burn them.

Labor.

[illegible] of life and its highest relish. Luxuries and conquests are the result of labor; we can imagine nothing without it. The noblest man of earth is he who puts his hands cheerfully and proudly to honest labor. Labor is a business and ordinance of God. Suspend labor and where is the glory and pomp of the earth? The fruits, fields and palaces, and the fashionings of matter for which men strive and war? Let the labor scorner look to himself and learn what are the trophies. From the crown of his head to the sole of his foot (unless he is a Carib, naked at the breast) he is the debtor and slave of toil. The labor which he scorns has tricked him into the stature and appearance of a man. Where gets he his garmenting and equipage? Let labor answer. Labor, which makes music in the mine and furrow and the forge. Oh, scorn labor, do you, man who never yet earned a morsel of bread? Labor pities you, proud fool, and laughs you to scorn. You shall pass to dust, forgotten, but labor will live on forever, glorious in its conquests and monuments.

ZOPESA FROM BRAZIL.—[illegible] a result of the new commercial enterp[illegible] assuming importance with Brazil, is [illegible] introduction of Zopesa, so justly celebra[illegible] where it is known for the cure of all forms [illegible] Indigestion. The company have opened a[illegible] ratory in Toronto. Zopesa comes to [illegible] highly endorsed and recommended itse[illegible] wonderful affinity to the Digestive Organs, [illegible] certainty to relieve and cure Dyspepsia and [illegible] Constipation, makes this remarkable compo[illegible] necessity in Canada. The company ma[illegible] Sample bottles at trifling cost of 10 cent[illegible] had of L. W. YEOMANS.

A stubborn cough [illegible] not yield to ordinary remedies ma[illegible] thoroughly cured by Wilson's Pulmona[illegible] Balsam, a reliable medicine in [illegible] Complaints of the throat, chest and lung[illegible]

A mi[illegible]

It is a great and ofte[illegible] mistake to take repeated drastic purgat[illegible] constipation of the bowels, the[illegible] and causes [illegible] Blood Bitters is a safe and perfect re[illegible] the bowels, arousing the torpid [illegible] all the secretions to a healthy [illegible] acting on the Kidneys, and renovating [illegible] the system in the most perfect [illegible]

Sensible [illegible]

You are asked every [illegible] the columns of newspapers and [illegible] Druggist to use something for your [illegible] Liver Complaint that you know [illegible] about; you get discouraged spending [illegible] but little success. Now to [illegible] satisfactory proof that GREEN'S A[illegible] will cure you of Dyspepsia [illegible] Complaint with all its effects, [illegible] stomach, Sick Headache, Habitu[illegible] tion of the Heart [illegible] ness at the pit of the [illegible] Coated Tongue, Indige[illegible] head, low spirits, &c., [illegible] your Druggist and get [illegible] GREEN'S AUGUST FLO[illegible] try it, or a regular size [illegible] doses will relieve you.

Mothers! Mother[illegible]hers!!!

Are you disturbed at [illegible] your rest by a sick child [illegible] crying with the excruciating [illegible] teeth? If so, go at once and [illegible] WINSLOW'S SOOTHI[illegible] relieve the poor little su[illegible] depend upon it; there i[illegible] There is not a mother [illegible] used it, who will not te[illegible] will regulate the bowels, [illegible] mother, and relief and [illegible] operating like magic. TESTIMON[illegible]
MITCHELL'S [illegible]ADIAN
HAIR RES[illegible]ER.

To THE PUBLIC:
I desire to state that [illegible] Canadian Hair Restorer" has [illegible] permanent change in my hair, in [illegible] restoring (not dyeing) it to its nat[illegible] and original healthy condition. So[illegible] ago my hair got so grey and [illegible] my friends noticed the change. [illegible] only one bottle of the Restorer w[illegible] satisfactory results.
C[illegible] GREEN, Butcher.
Belleville, April 2nd, [illegible]

BELLEVILLE, Se[illegible]rd, 1877.
MR. W. H. MITCHELL, [illegible]
DEAR SIR:—I have us[illegible] Canadian Hair Restorer, and find it [illegible] good article, the best, in fact, I have ev[illegible] and knowing all the ingredients o[illegible] composed, I can recommend it [illegible] public as a valuable preparation, fre[illegible] poisonous qualities.
JAMES FOR[illegible], M. D.

BELLEVILLE, [illegible] 20th, 1880.
MR. W. H. MITCHELL, [illegible]
DEAR SIR:—I have [illegible] pleasure in expressing my entire satisf[illegible] using your "Canadian Hair Restorer[illegible] have used what has been called the best [illegible] market, namely, Hunt's, Ayer's, Hall[illegible] Allen's, and thought no other could e[illegible] these, but after a long use of y[illegible] Restorer, I am convinced it is the best [illegible] ever used, and my friends who have se[illegible] express the same opinion. It gives the ha[illegible] very natural color, after it has faded [illegible] some grey. I recommend it to all.
Yours tr[illegible]
[illegible]N COLEMAN, Artist.

BELLEVILL[illegible]TURDAY, APRIL 9.

T[illegible]rievalty.

Yesterday a[illegible]on Sheriff Taylor received formal n[illegible] of his dismissal from the office of Sheri[illegible] County of Hastings, which he has [illegible]or so many years; but the notice co[illegible] not a line of censure or complaint. [illegible]herefore to suppose that the new [illegible] things so clamorously demanded [illegible]he Mowat Government by the local [illegible]ress, that "to the victors belong [illegible]ils," is to be carried out to the fulle[illegible]mity. This American system, w[illegible]tario might be christened "Mo[illegible]," as it is one of the chief pla[illegible] Reform platform, was first inst[illegible] by the shameful dismissal of [illegible]as. Ross as License Inspector and [illegible]ointment of Mr. Grainger in his st[illegible] Now the Sheriff is dismissed withou[illegible] of complaint, and people ask the[illegible] who next? The Deputy Sheriff h[illegible]n appointed by the Sheriff, o[illegible]ves with him on Monday, and [illegible]y naturally arises, who will secu[illegible]tion? The local Grit organ is [illegible]hen it says Dr. Hope will act [illegible]e, as the Ontario Government [illegible]lows its officers nor the local le[illegible] party to act their pleasure. A[illegible] stands Mr. Patrick O'Brie[illegible] the appointment, but of cour[illegible] does not know for a certain[illegible] Mr. O'Brien has the promise[illegible] it does not want to know; [illegible]know that certain leaders of t[illegible] moving heaven and earth, [illegible] prevent Mr. O'Brien from g[illegible]ointment. The result will b[illegible] O'Brien will get the office, [illegible]e press will cry long life to [illegible]former, and his Prime Minist[illegible]

Inde[illegible]—The Blake Platform.

The [illegible] never-satisfied mind of the H[illegible] Blake, the present leader of th[illegible], has with a frankness that wi[illegible]any of his warm and ardent [illegible] Ontario, appeared in a new [illegible]n advocate of a doctrine w[illegible]duced to its legitimate conclu[illegible] separation from the mother [illegible] and simple. That sentime[illegible]haracter should have been re[illegible] loud and vociferous cheers b[illegible]f rouges, in Montreal, led by s[illegible] Lucius Seth Huntington, who [illegible]attempted to disguise his indep[illegible]ntiments, will not surprise an[illegible]s watched and studied the politi[illegible]ies of that party for the past f[illegible]

Mr. Bl[illegible]ite evident, has determined [illegible]all not be accused of leading a [illegible]rty that has nothing to reform. [illegible]standing the fact that Canada ha[illegible]owers necessary to enable her t[illegible] successfully the great future w[illegible]ore her, Mr. Blake's restless n[illegible]e to acquire fame will not permit [illegible]d his aid in practical legislation, [illegible] him to propound new theories wh[illegible]ims to be reforms and necessary t[illegible]overnment; the most dangerous o[illegible] is his demand that Canada shal[illegible]powered to enter into treaties with [illegible] powers, irrespective of Imperial int[illegible] Imperial authority, or whether such [illegible]ies would militate against the int[illegible]f Great Britain or not. That w[illegible]ot be accused of misstating the O[illegible]n leader's position, we quote his ow[illegible], as uttered at the dinner given [illegible] lately in Montreal. He said in disc[illegible] the position of Canadians as freem[illegible]We quote from the Montreal Hera[illegible]

"You know w[illegible]ference to our foreign policy, with [illegible]ce to our commercial treaties, and with [illegible]rence to all these things which are called [illegible]ters of imperial concern it is not the em[illegible] present decides, but it is the Ministers [illegible] Crown who reside in England. It is [illegible] the subjects of the Empire who have [illegible] upon the matter, and in which they are [illegible]eply interested, but it is the Ministers of [illegible]land and the representatives of the En[illegible] constituencies to whom they are respon[illegible] We are in this particular respect in a subor[illegible]ate and dependent position, we are the [illegible]ly subjects of the Queen [illegible] of the Queen's sub[illegible] (laughter and ap[illegible]plause). For my part I don't feel con[illegible] so long as that state of things exists. [illegible]ite agree with the suggestion made by [illegible] Mercier, this afternoon that we ought t[illegible] a voice in the making of the commer[illegible] treaties, and that we ought to have a [illegible] in the making of treaties, which affect [illegible]lves, and that in all matters which aff[illegible] the common interests of the Empire, these [illegible] millions of British on this side of the [illegible]tic ought to have some voice in their [illegible]ation, (applause)" And waxing warm in [illegible]ubject he declares that "Canada will de[illegible] to submit exclusively to the governm[illegible] other people in matters in which those peo[illegible] have no concern."

The reader may [illegible]irly ask, What does all this mean? We [illegible] not governed by the Queen, says this [illegible]te politician, but by the subjects of th[illegible]ueen, represented in her Ministers of t[illegible]day. Does the gentleman want the Que[illegible] to become absolute, in order that Can[illegible]ns may be ruled and governed by her di[illegible]t, without the intervention of responsi[illegible] Ministers? Or does he desire a thoroug[illegible]and complete separation on the part of [illegible]is country from England? This is wha[illegible]is proposition means, [illegible]t he endea[illegible]ver it up by a myth[illegible] idea about [illegible] [illegible]resentatives in th[illegible]deration of the [illegible] abolition of the [illegible] relegation of all [illegible] the different Local [illegible] to the provinces [illegible]ust be his meaning, [illegible]gislatures. This [illegible] expect England to [illegible] he could scarcely [illegible] Imperial Parliament, [illegible] us a voice in the [illegible]ate upon all questions [illegible] with the right to legis[illegible]mmerce, and treaty [illegible] war, taxation, co[illegible]owers, without sur[illegible]aking with foreign [illegible] the will of the power [illegible]ndering ourselves t[illegible]ing our proportion, [illegible]hich taxes, thus bea[illegible] local expenditure, of [illegible] addition to all our [illegible] general taxation of the Empire. Are [illegible] prepared for that change in our condi[illegible]on, merely for the sake of giving Mr. [illegible]lake an opportunity to air his theories, [illegible]d revel in his vagaries, in the Imperial [illegible]ouse of Commons? We incline to the [illegible]lief that when the people of Canada fair[illegible] understand this question, and the responsibilities which the change would involve, they would think long before they would accept it.

As to the power of treaty making, that has been virtually conceded in all cases where the interests of Canada are in any way directly effected. Witness the Reciprocity, and Washington treaties; and now to recognize that principle to a still greater extent, England has consented to and has accepted a High Commissioner sent from Canada to reside in London, with a view to advise the Imperial authorities upon all questions which interest and affect Canada. In fact, that High Commissioner is, so far as he can be, a minister from Canada to England, representing Canada in the same manner as the United States is represented by her Minister. This however, is not sufficient for the great leader of the Canadian Radical party. He must have sole power and authority to enter into treaty relations with all the world, irrespective of Imperial interests—or a seat in the Imperial Parliament. We are not alone in this view. The Canadian *Spectator*, a no party journal published in Montreal, in reviewing this speech of Mr. Blake's wrote as follows:—

> He said: "A Radical goes to the root of things"—and himself went to the root of things in Canada. He demanded self-government, which, he stated, we have not got in Canada. The audience was excited at this, and wondered. What next? It came: We have not self-government. We cannot control our foreign relations. And Mr. Blake declared that he does not feel comfortable under such a state of things. He doesn't want a partnership under which one partner has all the say. The Canadians ought to have some control over their own foreign affairs. In words, it was a demand for Imperial Confederation, but in spirit and meaning—apparent to all who heard the speech—*it was for independence*. The sentiment was cheered to the echo.

Do the honest and loyal yeomen of Canada want a separation from England? If so, they should join the ranks of the man who is forming a Reform party with something to reform—and that something the throwing off of our allegiance to England, for the sake of being able to make treaties with the world without consulting the mother country.

Health Registration.

Mr. Monk, of the Meteorological Office, Toronto, has prepared, at the request of the Canadian Medical Association, a scheme for the registration of the state of health throughout the Dominion. The outline of the scheme, which is embodied in a circular before us, is now under the consideration of the Dominion Government.

The information which it is desired to obtain comprises: (1) a statement of the number of cases of each disease coming under the notice of the physicians reporting, old cases (those carried over from the previous week) being distinguished from new ones, or those of persons taken sick with the severity of the disease, the age of the patient, and the termination in recovery or death. This would give a record of the inception, progress and issue of every case reported. (2) Information regarding the features of the locality—drainage, aspect, water supply, kind of soil, topographical features, etc. It is proposed to obtain this information by supplying each physician who is willing to assist with blank forms for his weekly report and another form for the entry of cases daily attended—the latter for his own information and convenience. Remarks regarding any change in the sanitary condition of the locality or any special disease will be noted in the regular weekly form.

The information so procured will be utilized by the publication every two weeks of a revision of the reports, stating the diseases which are most prevalent in the different localities. For this purpose the Province will be divided into districts, and special reports will be made for each district, particular attention being paid to pointing out the existence of contagious or infectious disease. Copies of this review will be furnished to the Minister of Agriculture, to the Secretary or President of each medical society, to the Mayor and health officers of each city, town or municipality, as well as to every physician reporting. It will not be necessary to wait for the publication of these fortnightly reviews when an epidemic prevails in any locality, as a special return regarding the increase or decrease in the amount of sickness will be forwarded to all interested persons as soon as possible after the receipt of the weekly returns. An annual report will be prepared for the information of the Government, which will contain a digest of all the reports received during the year, and disease charts may also be prepared to accompany this report, showing the most prevalent diseases in the different localities. The data contained in the report will also be compared with the meteorological returns, so that the influence of the weather may be investigated. The benefits to be derived from the system are: A stimulus to health officers to keep up the reputation for healthfulness of their several localities. Accurate knowledge as to disease in proportion to population in the various localities, so that the localities which are most free from any special disease may be pointed out, and persons predisposed to or afflicted with consumption, rheumatism, malarial and other fevers, etc., may learn in which places there is the greatest likelihood of their recovery, or where they will be removed from those influences which tend to a protraction or increase in severity of such diseases. The proportion between the sickness rate and the death rate from the different diseases at certain ages. By the interchange of such reports with the authorities in the United States will be gained a knowledge of the contagious or infectious diseases which may prevail there, and thus enable us to take precautions to prevent their introduction into Canada. One important result to be attained from the accumulation and discussion of these statistics, will be the knowledge we shall gain of the influence of the weather on health.

There can be no doubt that such a system, if successful, would be of great benefit to the public, and that the ends which it has in view are well worth striving after. The weak point in Mr Monk's scheme appears to us to be the difficulty of securing the voluntary assistance of the medical profession. Those who have observed the working of the Registration Act in this Province, know that a very great deal of difficulty has been experienced with medi[illegible] services from these gentlemen's returns which they could make, or not, at their pleasure? Moreover, unless *all* the doctors furnished returns, the information obtained would be of, comparatively speaking, little or no value. These are the difficulties which we see in the way, and without effective means of removing them, we cannot see that the proposed system would be workable.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

Some Effects of Protection

For the benefit of those who believe in the virtues of free trade, we give the following comparative statement, taken from the United States census returns, of the effect which a strongly protective tariff has had upon the cotton and silk manufacturing industries in that country during the past ten years:

	1870.	1880.
Looms	157,810	230,323
Spindles	7,132,416	10,921,427
Persons employed	135,369	181,628

Thus during the decade there has been an increase of nearly 50 per cent. in the number of looms, over 50 per cent. in number of spindles, and about 30 per cent. in number of persons employed.

As to the silk manufacturing industry the returns are equally conclusive of the benefits of protection. This industry is of such recent growth that the returns extend no farther back than 1875, but during that short period the number of hands employed has been nearly doubled. The figures are as follows:

	1875.	1880.
Operatives	18,019	34,440
Wages paid	$ 6,392,256	$ 9,017,839
Capital invested	17,013,858	18,899,500
Value of products	27,158,071	34,410,463

Such facts as these confound all the theory that free traders can advance, and completely refute the arguments of those resident in the United States who urge Canada to adopt a policy different from that which has proved so successful in their own land.

Editorial Notes.

A SIGNIFICANT CIRCUMSTANCE.

The project of establishing a glass factory in Napanee is meeting with much success. The capital stock is $14,000 in shares of $100 each, and of this amount $9,500 has been subscribed. Amongst the subscribers is Sir Richard Cartwright, who has taken 23 shares. This is a practical admission by the ex-Finance Minister that the policy of his successor is benefiting the country. Under the Cartwright tariff the Hamilton glass factory had to be closed; under that of Sir Leonard Tilley it has been reopened and other industries of the same kind are springing into existence elsewhere. We congratulate the Finance Minister on having secured this unwillingly given testimony to his ability and the benefits of the tariff which he framed.

TORONTO CUSTOM HOUSE.

The *Telegram* has the following reference to the Collectorship of Customs at the Port of Toronto:

> "Mr. Mackenzie Bowell was never really in the field. If he had been, he could have had the office. His experience as Minister of Customs would have stood him in good stead, but he doubtless felt that his acceptance of the office would look like pitch-forking himself into himself and making hay while the sun shone, and the Reform journals would have been sure to raise a cry about rats deserting the sinking ship."

Months ago we stated on the authority of the Minister of Customs, that he had no intention of accepting the office of Collector of Customs at Toronto, or any other position outside of the Cabinet, thus showing that all statements to the contrary were purely imaginary. Therefore the consideration which the *Telegram* advances could never have been taken into account at all.

THE COTTON TRADE.

There is a tremendous "boom" in the cotton trade, some of the factories in Canada having orders nine months ahead. With no danger of over-production in that line of business, and good profits assured, there is every encouragement for the establishment of a cotton manufactory in Belleville. Who will first move in the matter?

VALUABLE TESTIMONY.

The Ottawa *Free Press* is a bitter enemy of the N. P., and yet it shows that the effect of the tariff has been to largely increase wages at the capital. It says: "Tailors' wages have been increased to $10 per week tailoresses $6, cutters $20, shoemakers $1,25. tinsmiths from $8 to $12, cabinetmakers $1.25 to $1.70, broommakers from $8 to $15, tanners from $6 to $8.50 weekly, marble-cutters $1.25 to $1.60, plumbers $8 to $10 per week; machinists, moulders, and blacksmiths from $1.75 to $2.50, carpenters $1.50, ship-carpenters from $1.50 to $1.75, laborers $1 a day; bakers $8 to $10 per week." Because wages did not advance at once after the tariff went into effect the Grit press loudly proclaimed its failure in the direction of increasing wages. Let those critics study the figures above given and they will arrive at the conclusion, whether they confess it or not, that this, as well as all the rest of their predictions as to the effect of the tariff, has been altogether wrong.

QUEER IDEAS.

The Grit party is certainly the party of queer ideas. As the St. John *Sun* points out, when under the Mackenzie *regime* they had lost fourteen seats in the Commons, that was accounted by them as nothing. When they had lost six seats in the present Parliament, that was nothing. When three members elected in 1878 went over to the support of the Government—it was of "no consequence" as Mr. Toots was wont to say on similar embarrassing occasions. But, says our contemporary, when just two seats have been captured by themselves from the Liberal-Conservatives, then,—why, then it would really seem as if such a feat had never before been accomplished. We are now assured that the loss of seats has a real significance. We are told that although their loss of two seats had no meaning, their capture of two seats was a tremendous victory. We have, based on these two elections, solemn deliverances by card, in which the four millions of people in the Dominion are told that East Northumberland and Carleton have rung the death knell of the present Government. In fact, people are given to understand that since the creation of the world no such uprising of the people has been witnessed as we have just seen indicated by a majority 190 in one constituency and of 45 in the other. What must be the importance of a gain of six seats to the Conservatives, when the Opposition make so much of their little gain of two?

THE TEMPERANCE QUESTION.—The Montreal *Witness* says:—"A Resolution recommending total abstinence to officers and members of churches by the Toronto Presbytery was carried on Tuesday by a vote of seven to five, Mr. King and Mr. MacDonnell being amongst the opponents. Mr. MacDonnell afterwards moved a rider, which a temperance minister said would practically have the effect of nullifying the other, which was carried by nine to six. A resolution in favor of the Scott [illegible]

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

A Husband's Crime.

HE ATTEMPTS TO KILL HIS WIFE WITH A SHOT FROM A REVOLVER.

THE WOMAN BADLY WOUNDED.

FERGUS, April 8.—This morning our quiet village was thrown into a state of great excitement by a man's attempt to shoot his wife. The would-be murderer is Andrew Forrester, who resides at 66 Caroline-street South, Hamilton, and is a builder by trade. The shooting was done with a revolver, about nine o'clock this morning. The bullet entered Mrs. Forrester's right cheek, below the eye, passing inward and downward a distance of between three and four inches, and is supposed to be lodged in the vicinity of the nose passage. It has not been extracted yet, but the woman is likely to recover, unless inflammation or erysipelas sets in.

Forrester and his wife were formerly residents of Fergus. They have not got along well, part of their troubles having arisen from quarrels between themselves, and part from quarrels between Mrs. Forrester and the children of a former wife. They have been separated for some time, and since their separation the wife and her children have lived here, while the husband lived in Hamilton with his first wife's children. Forrester owns some property, and his wife having left him because of ill-treatment, the Court of Chancery last fall ordered him to pay her $25 a month, which is about one-half of the rent that he draws. This money was not paid, and recently steps were taken to have some of the property sold in order that the woman might secure what the Court had allowed to her. No doubt this action was what brought about the tragedy.

About a week ago Forrester came up from Hamilton, and he has been drinking heavily while here. He went to see his wife several times, and by persuasions and threats endeavored to induce her to sign some document, which is supposed by her friends to be of such a nature as would relieve her husband of the payment of $25 per month. He threatened her life repeatedly, but still she refused to either comply with his request or go and live with him or let him live here with her. This morning he bought a small revolver, having first priced it in the shop and then borrowed from a friend the money with which he paid for it. After loading every chamber in the revolver he started over to his wife's dwelling, and on arriving there he told her to get down on her knees and pray, as she had only a few moments to live. She caught his hands and managed to get the revolver from him. She then gave the weapon to her sister, Mrs. Peter Atcheson, and told her to run for her life and take it with her. Forrester got the revolver from Mrs. Atcheson, and immediately fired at his wife, who was out on the street at the time, the bullet taking effect as described above. The woman ran a short distance, her face covered with blood, and turning round a corner sought refuge in the residence of A. Taylor, J.P., where she hid in the cellar. Forrester followed at some distance with the revolver at full cock, still in his hand, ready, and threatening to shoot any person that interfered. Fortunately Constable Alpaugh came along at this time, and approaching the rum-crazed maniac from behind, seized and held his arms until the revolver was wrenched from his grasp. The would-be murder was safely lodged in the lock-up, and would now give his wife all the property he owns in the world to undo this morning's work. The woman is in a favorable condition.

The New Bishop.

Kingston papers of yesterday give extended reports of the concluding ceremonies connected with the reception of the New Bishop. The *Whig* says the address of the people was that in which most interest centred. When it was announced, and Dr. Cleary signified his desire to hear it, Dr. Sullivan, Messrs. J. Meagher, W. Power, M. Morrison, D. Donohoe, D. R. Murphy, Trenton, and D. Macauley and Joseph Redmond, Picton, formed in a semi-circle before the Bishop, and the first named, before reading the address, intimated that the occasion had a double significance, that that day was the festival of St. Celestine, the Pope who had sent St. Patrick to Ireland, and surely history was in some extent repeating itself after a period of 1,500 years in the sending of the bishop to the descendants mainly of those whom St. Patrick served to christianize. He could well understand the doubt and uncertainty which filled the mind of St. Patrick in setting out upon his mission, but his lordship would, he felt sure, have none of these doubts and uncertainties, because he already held a high place in the love and affection of the people. The sentiments not only of the city, but of the whole diocese, were conveyed in the address. He proceeded in a clear, ringing voice to read the message of the people.

The Bishop, after blessing the Committee, made a reply which was remarkable for its vigor, fluency and point.

The arrival of the Bishop, and the entrance upon his episcopal duties, have relieved the Administrator and Chancellor, Vicar General Farrelly and Rev. Father Twohey, of responsibilities which have pressed heavily upon them, because added to their ordinary cares and duties. The labors of both are fully appreciated by those whose appreciation is the most desirable reward.

Messrs. P. P. Lynch, D. Murphy, and R. Costello, Belleville, were prominent representatives of the Belleville people present at the reception.

Amongst others present from this section of country were Messrs Rev. Father Brettaugh and D. R. Murphy, of Trenton; Father John Brennan, J. Redmond and D. McAuley of Picton, and Mr. Blute, of Campbellford.

Opposition Predictions Belied.

THE FIRST RESULTS.

There was no argument more frequently and persistently used against the Pacific Railway bargain than this:—That the company, once having possession of the railway, would charge exorbitant rates, and thus paralyze all efforts for the settlement and development of the North-west. Mr. Blake's most magnificent periods were rounded in the denunciation of this feature of the bargain, and in the prediction of these results from it. The Syndicate got possession of the railway *last week*, and one of the first results is a substantial *reduction* in the charges of *last* year. The lowest price for grain obtained by the largest dealers was twenty-one cents from Manitoba to Duluth, and the lowest price obtained over the Northern Pacific from Glyndon to Duluth was twelve and a half cents. Already arrangements have been made by the Syndicate for the carriage of grain from Manitoba to Duluth for *fifteen cents*, being a reduction of *six cents*, or more than twenty-five per cent. on the charges of last year. That is a fact which is worth more than all the magnificent periods or platitudes, as the reader may prefer, of the leader of the Opposition.

Then, again, another argument used was that the Syndicate would charge enormous prices for lands, that in fact they would hold them purposely at a high price, so as to derive hereafter the advantage of the advance caused by the settlement of the Government lands adjacent to those of the Company. Already that prediction has been falsified by the result. The Company have resolved to offer their lands at from *two dollars and a half to three dollars an acre*, and they agree with purchasers that if [illegible] money will be remitted; so that the Company have actually agreed to sell their land to actual settlers at from one dollar to one dollar and a quarter less than the price of railway lands, that is, lands within the twenty-mile belt, in the United States. On this subject of the Pacific Railway bargain, the logic of facts is dissipating the logic of Opposition orators with a rapidity which could hardly have been anticipated.—*Montreal Gazette.*

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

News Condensed.

—There is a large quantity of lumber waiting shipment from Toronto.

—The Prince Edward Island Legislature was prorogued on the 7th inst.

—The Commons have adjourned till the 25th inst., and the Lords till the 5th of May.

—A Hamilton firm is about to erect a scale factory, employing 30 hands, in London, Ont.

—The cattle disease affecting several herds at Watertown, N. Y., is thought to be murrain.

—Cattle are said to be dying in the neighborhood of Ogdensburg, of a disease called black foot.

—Lord Beaconsfield seems now to be in a fair way of recovery, unless a relapse should occur.

—Mr. Goldwin Smith sails for Europe on the 22nd of June, and is expected to be absent for a year.

—A freshet has caused the destruction of many lives and much property in the city of in southern Spain.

—The ice is still packed close in the lake off Chicago harbor, and but little prospect of an early break-up.

—A despatch from St. Paul's Bay, Q., says an earthquake shock was felt there on Wednesday about midnight.

—The number of killed by the earthquake in Ohio is now set down at 3,000 and 40,000 are said to be without food.

—Rev. M. Parnell, Rector of Kemptville, and financial Secretary of the Diocese of Ontario, has resigned his position.

—The Boers are reported to be constantly violating the terms of peace, maltreating the loyalists, looting their property, etc.

—The Canada Central Railway will shortly give a press excursion along the entire line, which extends from Ottawa to Nipissing.

—Mr. R. J. C. Dawson has received notification of his appointment as Postmaster at London, Ont., in the room of I Lawless, superannuated.

—An Immigrant Company, with a capital of $100,000, is to be formed in Toronto. Mr. Goldwin Smith and Capt. McMaster are at the head of the movement.

—The Great Western Railway traffic for the week ending April 2nd amounted to $118,774, which is $16,664 in excess of the corresponding period last year.

—Mr. F. W. Cumberland, of the Northern Railway, has gone to England to make the financial arrangements for changing the gauge of the line under his arrangement.

—Sir Charles Tupper is at present the guest of Major Cameron, R. A., at Newbridge, County Kildare, Ireland. A cablegram received last evening states that his health continues to improve.

—Several of the Hamilton butchers attended the fat-cattle sale at Guelph on the 6th, at which some 1,000 head were offered for sale. Four hundred of the cattle were brought to Hamilton.

—H. J. Cote, census enumerator, was thrown down stairs yesterday afternoon at Montreal by an irate Frenchman named Alphonse Gussier. The latter will be prosecuted for assault, which was unprovoked.

—A Toronto paper says the number of Presbyterian Sabbath-schools in Toronto and Montreal are equal—seventeen. In the former there are 3,519 scholars and 356 teachers, and in the latter 2,908 scholars and 322 teachers.

—Taylor's third Grand Trunk excursion party, made up of three excursion trains, arrived at Winnipeg on the 6th. About five hundred were distributed between Emerson and Winnipeg out of the 800 comprising the the party.

—Mr. Ellis, superintendent of the Welland Canal, again announces that the water will not be drawn off the canal until the weather moderates and the thick ice at present on many of the levels is sufficiently melted, then two or three days' notice will be given.

—The jury in the case of the man killed on the Northern Railway on the 8th inst. by a collision, brought in a verdict in accordance with the facts, blaming both conductors and both firemen for negligence, and expressing their belief that the Company should see that its rules are strictly enforced.

—The Hon. Mr. Cochrane has 98 head of cattle which were landed at Halifax from Europe last week in quarantine at Levis. They are some of the best English breed, and according to new regulations, must remain in the cattle shed at Levis for ninety days before being set at large. There are also 8 head of cattle for the Hon. Mr. Pope, Minister of Emigration.

THE STOLEN LETTER.—In a case which was tried at Montreal on the 7th, Thomas Boyes testified, after some pressure, that it was he who sent Sir John Macdonald's letter which was stolen in Montreal to the late Hon. John Young, and wrote the address. This fact has been known before, but this is the first time it has been stated under oath.

THE GRABURN MURDER.—An Ottawa despatch says: "The Department of Justice, to whom was referred the letter received by the relatives of Marmaduke Graburn, murdered in the North-West, have been unable to get any further information from the person at Ridgetown, who professed to have intelligence that would lead to the arrest of the murderer. It is believed that the writer of the letter is either a fraud or else a little out.

'THEY ALL DO IT.'—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

Proclamation by the President.

Fault-finding is so seldom indulged in by those who use medicines manufactured by the World's Dispensary Medical Association, that the President of that corporation the Hon. R. V. Pierce, M. D., has issued a special request or proclamation to any and all persons, if there be such, who may have taken or shall hereafter use any of the family medicines made and sold by the said Association, in all countries of the world, and who have not derived full benifit from said medicines, that if they will write the said Association a description of their maladies the Faculty of the Dispensary will advise them with respect to the successful treatment of their diseases. Dr. Pierce's Golden Medical Discovery is gauranteed to cure all humors, from the common blotch, pimple or eruption, to the worst scrofula or king's evil, and those virulent poisons that lurk in the system as a sexuel or secondary affection resulting from badly treated or neglected primary diseases. It also cures bronchial, throat and lung diseases. Favorite Prescription is guaranteed to cure female weaknesses and kindred affections. Extract of Smart-Weed cures bowel affections, colds, and all painful rheumatic and neuralgic affections. Dr. Pierce's Pellets (little sugar-coated pills), are the little giant cathartic. Address, Warld's Dispensary Medical Association, Buffalo, N. Y., or Great Russel Street Buildings, London, England.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4need&wly

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. [illegible] Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

SPECIAL VALUE offered in these Goods.

We have a Black Cashmere over one and a quarter yards wide **at 65 cents** per yard, that cannot be equalled in the city, and another 38 inches wide **at 52½ cents**, which is equal to what is usually sold at 75c.

We have also **Union Cashmeres** and BLACK PERSIAN CORDS very cheap.

We have just received a large assortment of

Spring Dress Materials,

in the latest styles, to which we invite the attention of the Ladies; and we have still 2 pieces of our celebrated **$1,29 Black Silk**, the best value in the market. It cannot be equalled under $1.75 to $2.00 per yard.

GLASGOW WAREHOUSE.

N. B.—We trust our customers will remember that our terms are *cash*, and *will not ask us for credit*. By strictly adhering to our terms, we can sell goods much cheaper than if we did a credit business.

Daily Intelligencer.

BELLEVILLE, SATURDAY, APRIL 9.

6 O'CLOCK EDITION.

City and Vicinity.

PALM SUNDAY to-morrow.

THERE was but one prisoner in the cells last night.

PICTON market fees have been let for $466 for the ensuing term.

THE regular train from Madoc brought ten cars of ore this morning.

THE Prince Edward County Council will meet on Monday for the election of Warden

THE old vault of the Customs and Inland Revenue offices has been entirely removed.

TWELVE new *attaches* of Shelby, Pullman & Hamilton's show arrived in town yesterday.

MESSRS. DOWNEY & Co. are loading a number of cars with potatoes for Toledo, Ohio.

NOTWITHSTANDING that there was a very large market to-day, prices were unusually high.

MRS. JENNINGS is canvassing the city for a fine steel plate engraving of the Lord's prayer.

REV. MR. MCLEAN, of this city, preaches in the Presbyterian Church, Trenton, to-morrow.

THE City Council meets again on Monday night. It will no doubt be an important and lengthy session.

A BROTHER of Mr. E. King Dodds, the celebrated anti-temperance orator, is G. J. R. station agent at Hastings.

BUSINESS on the Grand Junction is growing better every day. The prospects for the summer trade are very bright.

MR. HUNGERFORD, Masonic District Deputy Grand Master of the London District, was in town to-day visiting friends.

DIPHTHERIA is very prevalent in the Township of Percy and Village of Warkworth. Several deaths have resulted from it.

CAPT. JELLETT has been getting up steam in the *Prince Edward* all afternoon. She will commence running on Monday morning.

PASSION WEEK, beginning to-morrow, will be observed with the solemn closing services of the Lenten season in both Catholic and Episcopal churches.

No. 1 Company, 15th Batt., will probably engage the third story of the new building to be erected on the corner of Bridge and Pinnacle streets, for an armory and club rooms.

LAST night was a glorious spring night—the first really fine one we have had. Many persons took advantage of the comparatively mild weather by promenading in the moonlight.

THE body of young Haig, son of Mr. Thos. Haig, Sr., who was drowned at Crow Bay, on the Trent, about three months ago has not been found, and it is doubtful if ever it will be recovered.

MRS. J. O. CONGER, of Picton, celebrated her 82nd birth-day at the residence of her son, S. M. Conger, of the *Gazette*, on Monday last. There were present four ladies whose united ages reached no less than 316 years.

COOL BURGESS and his "Sleighing Party" will be here on Tuesday evening next. Cool should have a warm reception. He has a novel method of advertising, which he will no doubt put into practice here: he drives about two huge Newfoundland dogs hitched to a small sleigh or carriage.

WEATHER PROBABILITIES. — Toronto, April 9.—Lakes, light to moderate winds, continued fine, mild weather.

TO BE REPAIRED.—Bleecker's dam, some forty feet of which was carried away by the ice-jam, is to be temporarily repaired on Monday. When the water becomes low in the summer permanent repairs will be made. The expense is borne by Messrs. Ostrom, Burrell and Lingham.

HIS DEEP MEANING.—"Pa," asked little Tommy Tantalus the other evening at the tea table, "what's the meaning of 'spring openings,' that you see so much about in the papers?" "Humph!" grunted the father of the family in no very pleasant humor, "they mean shows of bonnets and ribbons and flowers and things, that your mother and sisters go to, and that make my purse *spring open*—and stay open till they are closed."

ACCIDENT.—The Trenton *Advocate* says that on Tuesday morning last, while Mr. Reuben Cronk, of the 1st concession of Sidney, an old man over 60 years of age, was crossing a platform in his barn, by some means he was tumbled headlong off, falling on his head and shoulders on a fanning mill below, a distance of about 15 feet. He was considerably bruised and cut about the head and shoulders, but, happily, received no very serious injuries.

THE BAY.—The ice is no longer safe for horses in the vicinity of the city, and persons who cross generally take passage by Mr. Reddick's ferry. Some men who crossed on foot this morning report the crossing dangerous, and states that the bay will probably be open in front of the city and the ferry running on Monday. We also learn that there is a narrow passage in the ice on the south of the city, and through this a man crossed in a skiff this morning towing a punt loaded with fish.

ASTRONOMICAL.—The April moon fulls on the 14th. The new moon of the 29th of Mar[illegible] comes into conjunction with Venus or[illegible] passing about three and a half [illegible] of the radiant planet. The

MEETING TO-NIGHT.—There will be a religious meeting in Bethel Hall, over Haines & Lockett's Store, this evening, commencing at 8 o'clock, to which all classes of the public are invited. The meeting will be led by Rev. A. Schuster, City Missionary.

REMOVAL.—The two-story frame house which stood in the rear of the old Custom House has been removed from the site which it has occupied for so many years, in order to make way for the extension of the new building which Mr. Nosworthy intends erecting this summer. It was last evening removed to the corner of Bridge and Pinnacle streets, where it remained in the middle of the road all night. The house has been bought by Mrs. Rosa Thompson, who intends removing it to one of her lots near the gas house and making a tenement of it.

TOO GOOD TO BE TRUE.—It has been currently reported about town that a well-known resident of Belleville, formerly a grocer here, had fallen heir to the title and estates of a Scottish marquis. We are sorry to say that the rumor is not true, though it is not quite without foundation. The gentleman in question, in company with a number of others, thinks he can establish a claim to a certain portion of the estate of a Scottish nobleman who died nearly a hundred years ago, and has placed his interests in the hands of a Belleville solicitor. It is doubtful whether he will be able to establish his claim.

POLICE COURT.—A lad named Wm. Rogers was accused before the Police Magistrate this morning of disorderly conduct on the streets last night. This being his first appearance before the Magistrate, he was dismissed with a caution. A case of perjury was also tried. Pat McCambridge brought a charge of this nature against C. A. Tompkins, the case arising out of an action brought by Tompkins against McCambridge at the Division Court in Trenton, in which case McCambridge claims that Tompkins perjured himself. Both parties are from Frankford. After considerable evidence was taken, the case was adjourned till Monday.

GOOD STOCK.—In our issue of a few evenings ago we advertised for sale $500 of paid up stock in the Hastings Loan Society, the property of Mr. J. H. Peck, and have since had over half a dozen applicants for its purchase. The Company is now charging a premium of 10% for all stock sold by them, at which rate we are informed a large amount has been disposed of. Judging from the demand for the shares it is only reasonable to infer that the stock of the Hastings Loan will rapidly rise in value. Sales of stock have been made at 10% premium, and we should be not at all surprised to see it reach a premium of 25 per cent. This speaks well for a local enterprise.

A HEAVY FALL.—An old Frenchman named Joseph Burgoyne fell from the tree in front of Mrs Lister's, on the corner of Bridge and Pinnacle Sts., this morning shortly before 11 o'clock. He was sawing away the branches which overhang the street, in order to allow a clear passage to the house which is in course of removal. It is said that, sitting on a branch, he sawed it between himself and the trunk of the tree, and when the branch was cut through it fell and he with it. He fell to the ground, a distance of fully thirty feet. Strange to say he was not seriously injured, though he received a contusion on the hip which caused him great pain, and which has been sufficient to incapacitate him from work.

THE POLICE CELLS, &C.—The special committee appointed by the City Council to take into consideration the advisability of removing the police cells, police court, and No. 1 fire station from the sites at present occupied by them, and to take steps towards selecting the most desirable site for a building to be used for such purposes, met yesterday afternoon. The committee consisted of the Mayor and Aldermen Jellett, Smith, Starling and Dickson. It was unanimously decided that it was desirable that some change should be made in the location of the police cells, police court, and fire station. Two sites were inspected, but no definite conclusion as to which of them to recommend was decided upon.

THE CANADIAN MILITARY REVIEW.—The editorship of this review having been again given by the Commandant, Col. Strange, R. A., to Lieut. Geo. F. Cole, late of the Royal School of Gunnery, an effort will be made to give the journal a local as well as the extended circulation it now possesses throughout the Dominion, by a liberal treatment of the important topics of the day (politics excepted), combined with its military intelligence. We understand that serial tales of interest will run through its numbers, and should increasing patronage warrant the experiment, the paper will be issued fortnightly. Our volunteers should, in any case, support a journal that has for its aim the welfare and improvement of the service.

EVANGELISTIC SERVICES.—During the week large and interesting meetings have been held nightly in the lecture room of John St. Presbyterian Church. It is, we believe, the intention of the session to hold special services on Monday and Tuesday evenings, when the Rev. E. F. Lawrance, M.A., of St. Paul's Church, Peterborough, will be present. Mr. Lawrance comes fresh from an extended work which has been going on for some time in Peterboro' and adjoining places, and will be able to tell of the things he has seen and heard. Bible readings on the afternoons of these days may be also expected. It is hoped that efforts will be made by all to invite those whom they can reach to be present at these meetings.

MAN MISSING.—A report was current in town to-day that Mr. James Miller, boss lumber piler at the Eagle saw mill at Ferry Point, had been drowned in the bay on Thursday night last. It was stated that Mr. Miller left Deseronto on that day for Ferry Point, walking on the ice, and that on the same night cries for help were heard in the vicinity of the Grand Junction wharf, apparently proceeding from a person in the water. Mr. Miller has not as yet arrived at Ferry Point, and enquiry of Messrs. Rathbun's employees here failed to elicit any further information than that he was a steady, sober man and not likely to have met his fate in the way indicated. A telegram from Deseronto, received since the above was written, tends to confirm the worst fears as to Mr. Miller's fate, as it states that he is missing from that place.

DUNGANNON AND FARADAY.—A correspondent writes to the Madoc *Review*:—"The lumbermen have broke up their shanties after a favorable season, and a large number of logs have been drawn to York Branch. Bronson & Co. have also upwards of 40,000 logs in Egan creek to drive down to the Branch as soon as the water rises. Two jobbers from an adjoining township have cleared out after victimizing some of our store keepers and others. Warrants have been issued for their apprehension, and men have started in pursuit but so far without success. A meeting has been held at L'Amable and a Cheese Company at length formed. Mr. A. Riddell is President, and Messrs. D. Kavanagh, F. Mullett, J. Gould, J. C. Jarman, B. Hague, and H. Easton, Directors. The cheese factory is to be erected at once and will be built at L'Amable, on the banks of the creek a short distance east of the grist mill."

MURCHISON CLUB.—At the last regular meeting of the Murchison Club the President, Dr. James, in the chair, Mr. John

THE BEST CRITERION.—A gentleman named Johnson, and claiming to be the veritable "Buckshot Bill" who figures so largely in the dime literature which so delights the heart of the average schoolboy, has been lecturing in Stirling, telling the good people of that village of his miraculous escapes and tremendous adventures among the red men of the prairies, and giving an additional interest to his narrative by exhibiting "a ghastly array of the scalps of his enemies, which he took with his own hand." (In justice to Buckshot Bill it should be said that the gentlemen who were the proprietors of those scalps before they came into his possession had taken an active part in the murder of his brother.) It seems that a number of those who listened to his thrilling tales, and who are skeptics by nature, are inclined to doubt of the genuineness of his pretensions; but the Stirling *News-Argus* silences these doubters by declaring that "if the prompt manner in which he settled his printing and other bills is any criterion, many more presuming and officious persons had better be termed humbugs than he." The *News-Argus* is right. Hereafter let men be judged according to the comparative promptitude with which they discharge their little bills with the printer.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

TERRIBLE ACCIDENT.

AN OLD MAN RUN OVER BY A LOCOMOTIVE.

An accident occurred at the G. T. R. station last night, which will almost certainly prove fatal. An old man named Weller Johnson, from Rawdon, was wandering about the station yard about midnight, "looking for a hotel" as he himself says. The midnight express had come in and the engines were being changed. The engine which had brought the train had been detached and was being backed into the engine-house at the eastern end of the yard. The old man, who was walking on the track, did not notice the engine coming until it had almost reached him and it was too late to get out of the way. It struck him, knocked him down, and the wheels passed over his left leg and right hand, crushing them into a shapeless mass. A switchman who was standing near saw the engine coming and rushed forward to save the old man: but it was too late—and he had a narrow escape from being run over also. Johnson was carried into the ladies waiting room of the passenger station and laid on one of the benches, and Drs. Tracy and Willson were immediately sent for. On their arrival they found the patient in a semi-unconscious condition, with an occasional gleam of intelligence. It was deemed wise not to proceed with amputation until reaction had set in, and the patient was accordingly allowed to remain undisturbed, especially as he did not appear to be suffering any pain. He was visited by an INTELLIGENCER reporter this morning about 9 o'clock and was then almost unconscious, breathing heavily, ghastly pale, and showing evidences of approaching dissolution.

According to his own statement, he is eighty years of age, and his appearance would indicate that he is between seventy and eighty. He is respectably connected in Rawdon, his relations being well-to-do farmers. He informed Dr. Willson this morning that he had a son-in-law named Smith working for Mr. Ashley in Foxboro, and the Doctor immediately telegraphed Mr. Smith, informing him of the accident.

At an early hour this morning Dr. Willson informed Johnson that his condition was very critical, and asked him if he would not like to have a clergyman visit him. He said he would, and stated that he had at one time been a member of the Methodist Episcopal Church. Rev. Mr. Lane was accordingly sent for and arrived shortly after. He remained a considerable time with the old man, giving him what spiritual counsel he could under the circumstances.

About 11 o'clock this morning Johnson was removed from the station to the house of Mrs. Rosa Thompson, Church street. He remained unconscious during the process of removal. It is the opinion of Dr. Willson that he cannot survive much longer than to-day.

Address to the Principals from the Students of Ontario Commercial College.

The following address, expressing the students' appreciation of Ontario Commercial College, its course of study and the earnest increasing labors of the Principals, was presented to Messrs. Robinson & Johnson a day or two since;

MESSRS. ROBINSON & JOHNSON,
Principals Ontario Commercial College.

GENTLEMEN:—We the students now about graduating from Ontario Commercial College, before leaving for our respective homes, desire to express our heartfelt thanks for the painstaking and deep interest you have taken in us during our course of study.

We feel that we can cheerfully recommend the course as that which every young man desirous of obtaining a business education, should pursue.

We desire to congratulate you upon the honorable places which Ontario Commercial College occupies, standing as it does at the head of the Commercial Colleges of Canada

But, while thus endeavoring to give utterance to our appreciation of your unceasing labor in training us to those habits, and in those subjects which shall be of inestimable value to us in after life, permit us to say that we hold yourselves personally in the highest esteem, and that we feel we have in you true friends.

We will, we assure you, carry through life pleasing recollections of the time spent at the College.

We tender you our best wishes for the continued success of the College, and pray that the Almighty may abundantly bless you in all the relations of life. We are the students of the graduating class.

BELLEVILLE, April 1st, 1881.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—— ——and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of

MORNING DESPATCHES

EUROPEAN.

THE DUKE OF ARGYLE.

Mr. Gladstone this afternoon said in reply to Sir Stafford Northcote that he confirmed with the deepest concern the resignation of the Duke of Argyle, Lord Privy Seal, and gave the reason therefor, namely, his objection to a portion of the Land Bill. He said further in reply to a question that he could not defer the debate on the second reading of the Land Bill beyond April 25.

Lord Carlingford will succeed the Duke of Argyle as Lord Privy Seal.

In the House of Lords the Duke of Argyle expressed deep sorrow at leaving the Cabinet. He said he did so because of the Land Bill alone. He heartily approved of every measure which could tend to increase the ownership of land in Ireland. He thought the Government scheme tended to paralyze the ownership of land by placing it under limitations unknown in any civilized country. Under this scheme neither landlord nor tenant would be owner. The ownership would be in commission or abeyance. This would result injuriously to the agricultural interest in any country, especially in Ireland. He felt he could not, as an honest man, be responsible for recommending the scheme as a whole to Parliament. He regretted to separate from his friends, especially Mr. Gladstone.

AMERICAN.

The Western Floods.

Great Suffering—Many Lives Lost.

SIOUX CITY, April 9.—The river is rapidly receding within its banks in the country above. The house of Wm. Cunningham, an old settler of Dakota Co., Neb.; was surrounded with water, and the family had to go to higher ground. Cunningham was escaping on horseback, when the horse went through a bridge, and he was lost.

YANKTON, Dakota, April 9.—The damage to steamboats, railroads, and private property by the ice gorge here, has been fearful. The steamers at the levee were carried inland, and now lie on the railroad track. The steamer *Peneate* struck the railroad machine shops, completely demolishing them. The boat is now on the prairies, about a mile from the channel. The Government warehouses are destroyed, and many goods stored in them carried away. Rescuing parties report great suffering and destitution amongst settlers on the bottom lands between Yankton and Vermilion. A number of houses at Yankton were moved from their foundations, and in some instances carried off.

COUNCIL BLUFFS, Ia., April 9.—The unprecedented rise in the Missouri River resulted in the general overflow of the lower part of the city. Many persons last night were compelled to vacate their houses here. The bottom land between the city and river is inundated, forming a mighty lake several miles wide. The Union Pacific was compelled to load down their bridges over a small stream within the city limits and last night the water was several inches over the tracks and flowing in the vicinity of the large union depot. The river is nearly 22 feet above low water mark, being several feet higher than it was ever known here, and is still rising. Some fears are current that it may force a passage through the low land of the city, a mile this side of the iron bridge between here and Omaha on the Union Pacific road.

SIOUX CITY, April 9.—It is reported from Elk Point that the suffering in that section from floods is terrible. In some one story houses families had to live for days on beds and tables to keep out of the water. In a few cases they had been obliged to get on the roofs of dwellings. In one house two aged women were imprisoned for days without food. An effort to rescue them failed because of thick ice. Vermilion is not as badly wrecked as was at first reported. One depot, a hotel and several stores still stand. A large number of buildings have been floated off. The County Records have been saved. Two families at Bonhamme were drowned. The destruction of Green Island is complete. Henry Moreton, one of the wealthiest settlers on Green Island, with his daughter, was swept away in his house, his wife and son witnessing it from high ground. They offered a thousand dollars to any one who would rescue the father and daughter. Two men named VanAllen, declining the reward, pushed out in a boat at the risk of their lives, and with the utmost difficulty saved the father and daughter through a hole in the roof just as they were about perished.

CATTLE DYING.

NEW ORLEANS, April 9.—In Attakapas county, tens of thousands of cattle are reported to be dying for want of proper nourishment. Three men near New Eden, lost nearly 3,000 head. Owing to the prolonged severe winter, there is no grass upon the prairies. The cattle eat the young grass just springing up, with fatal consequences.

WASHINGTON SPECIALS.

NEW YORK, April 9. — Walstrom, the Swede, a well known billiard player, is reported to be insane.

The *Tribune* says the general sentiment yesterday was one of indignation at the defeat of the street cleaning bill by the Assembly.

The *Herald's* Washington special says a number of Republican senators now favor holding a caucus early next week with a view to try and come to an agreement to hold an Executive session to consider important nominations. This movement does not include the abandonment of the previous contest over the organization of the Senate.

REMORSE.

HARTVILLE, April 9.—Jack Freeman suicided by shooting himself. The supposed cause is remorse on account of murders he committed years ago.

AFTERNOON DISPATCHES.

THE CHIO EARTHQUAKE.

CHIO, April 9.—A medical commission are considering the expediency of covering the rubbish in the fortress with earth, as there is no hope of saving any lives, and the disinterment of the dead might produce an epidemic. It is now believed that throughout the whole island, which contained 70,000 inhabitants, 6,000 or 7,000 were killed, and 25 per cent. were wounded. The French, British, United States and Austrian gun vessels in the harbor are doing all in their power to assist the authorities in the work of relief. Only ten inhabitants of Chesme were killed, but many houses are in ruins and 30,000 people are without shelter.

PARNELL ON THE LAND BILL.

LONDON, April 9.—Parnell at Birmingham yesterday said he would consult his colleagues and give the League's view of the Land Bill in his speech at Cork on Sunday. Though the Bill fell far short of the abolition of Landlordism, he would, he said, welcome any amelioration of the lot of the tenant farmers.

BEACONSFIELD'S CONDITION.

LONDON, April, 9.—Beaconsfield was restless this morning but said to be no worse.

THE TRIAL OF THE NIHILISTS.

ST. PETERSBURG, March 6.—In the trial of the Nihilists implicated in the assassination of the Czar, the president of the court asked whether the prisoners wished to say anything. Russakoff spoke half an hour and said he primarily desired to agitate peacefully, but entered the late conspiracy, seeing no other way out of the social troubles. Michaeloff said he belonged to the terrorist faction party, but denied Russakoff's statement that he participated in the arrangements for the murder of the Czar. HessyT elfmann acknowledged she kept the conspirators in her lodging house which was the depot for their implements, but denied actively participating in the Czar's assassination. Kebaltshchesh avowed his connection with the will of the people of the party—their wish, he said, being to gain objects by peaceful propaganda, but they were reluctantly obliged to adopt terrorist measures. He admitted preparing five bombs. Sophie Pieffosky avowed she was a party in the preparation of the Moscow mine and the murder of the Czar. Jalabad bluntly related with diabolical satisfaction the history of the two Alexanders. Olskymines said he was the head of one group of the party which was charged by the Executive Committee with organizing the attack by bombs, and was connected with the Sadowa Street mine as a simple worker.

WASHINGTON, April [illegible]

"Hail bounteous, bounteous, gladsome Spring"—this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benefit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

A country doctor writes: "I am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

BIRTHS.

On the 8th in inst, MRS. B. R. WOLEVER, of a daughter.

Commercial.

BELLEVILLE MARKETS

INTELLIGENCER OFFICE,
Belleville, April 9, 1881.

The receipts of Rye during the past week have been fair for this time of the year; the price remains firm, with a tendency upwards. 83cts. is paid on the street, and the Oswego market is higher and firm at 98c. in bond.

The receipt of other kinds of grain is light For the best Pease 67c. is paid. Black-eyed pease command from 85 to 90c. per bush.

No Dressed Hogs were offered to-day, except a few small ones, which commanded exceptional prices.

Butter remains about the same, with fair receipts. Eggs are becoming more plentiful. At the close of the market, sellers were glad to take 10c. per doz.

Hides are quiet to-day at our quotations, but buyers claim that lower prices will rule on Monday. Deakins opened at 60c., but before the close of the market 55c., was the highest price offered, dealers claiming that even at 55c deakins are higher than they should be.

Clover seed made a sudden drop to-day from $4.25 per bush. to $3.50 per bush.

Timothy steady at our quotations.

The receipts of potatoes for shipment during the last few days has been heavy at 45c to 50c per bush. To-day 52½c per bush. Messrs. Downey & Preston shipped 4 cars of potatoes yesterday to St. Louis and 2 cars to day to Cleveland,

WHEAT, FALL—$1.00 to $1.20.
BARLEY—60c. to 70c.
RYE—83c
OATS—35c. to 36c.
PEAS—65c. to 67c.
LAMB—6c to 7c per pound.
HOGS—Dressed, $8.50.
BEEF—Dressed, $4.00 to $6.50.
HAMS—9c. to 12c.
BUTTER—Tub, 16c to 20c.
BUTTER—Roll 20c to 25c.
EGGS—11c. to 13c. per dozen.
HIDES—Rough $5.00 to $6.00, inspected $7 50.
SHEEPSKINS $1.00 to $1.40
CALF SKINS—10c per lb.
DEAKENS—55c.
WOOL—25c. per lb.
CLOVER SEED—$3 50
TIMOTHY SEED—$2,75,
LARD—9c to 11c.

SCHOOL-DAYS.

Once more by mount and meadow side
The merry bells are ringing;
Once more by vale and river wide
The schoolroom doors are swinging;
Forgotten books with pensive looks,
And slates come forth from cover,
For hand in hand to lesson land
Go little lass and lover.

What meed of bliss were ours, my friend,
If we, like these, were able
Our cares and discontent to spend
In vanquishing a table—
If we could be so light and free
Amid our garnered pleasures,
As those who sweet the tale repeat
Of runic weights and measures?

Ah! children dear, our later days
Have brought us wise anointing;
We see in all your sunny ways
The father's kind appointing;
Your morning bell is ours as well—
We go to school to duty,
Whose brow severe from year to year
Wears fadeless wreaths of beauty.

The Second Place.

Unto my loved ones have I given all:
The tireless service of my willing hands,
The strength of swift feet running to their call,
Each pulse of this fond heart whose love commands
The busy brain unto their use; each grace,
Each gift, the flower and fruit of life.
To me
They give, with gracious hearts and tenderly,
The second place.

Such joy as my glad service may dispense
They spend to make some brighter life more blest;
The grief that comes despite my frail defense
They seek to sooth upon a dearer breast.
Love veils his deepest glories from my face;
I dimly dream how fair the light may be
Beyond the shade, when I hold, longingly,
The second place.

And yet 'tis sweet to know that though I make
No soul's supremest bliss, no life shall lie
Ruined and desolated for my sake,
Nor any heart be broken when I die.
And sweet it is to see my little space
Grow wider hour by hour; and gratefully
I thank the tender fate that granted me
The second place.

—SUSAN MARY SPAULDING.

A Matrimonial Speculation.

MR. NASBY GIVES AN ACCOUNT OF HIS FIRST MARRIAGE—WHAT HE EXPECTED AND WHAT HE GOT.

Confedrit X Roads (which is in the State uv Kentucky), Feb. 15.—I was a young man, and singerly averse to work. Work never agreed with me. My principle employment wuz to lay under trees all day and commence with nacher, onless there was a grocer convenient, wich wuz liable to ask the house up to take suthin. I didn't feel the need uv much eggsercise, but wat I needed I cood git at playin' seven up or euchre in the grocery I hev menshuned. Shufflin and deelin' keerds develeps the muscles uv the arms wonderful. Billyards wuz allus tu much fer me.

The time cum, however, when it becum necessary to do suthin for a livelihood. I wuz too yung to go into politix, and the old man, my father, he got to that age when it wuz a gettin old and wuznt ez strong ez he wunst hed been.' He intimated to me that the sooner I shifted for myself the better he'd be pleased. Wat could I do? I hed no perfeshen that would enable me to live without labor, and labor I wouldn't.

My father solved the problem. "Marry a widder," said he, "a widder with a farm and make her do the work. You are ekal to overseein a farm. Aint yer?"

I remarked that I could see other men swet without materially fatiguin myself, and that I thot his suggestion a good one. I would adopt it.

Hard-by wuz the widder Tomson, which wus the owner uv one uv the best farms uv the seckshun. It was 200 acres of good land, well improved and well-stocked. She wusn't eggsackly wat would be called a handsome woman, and wuz 15 years older then me, but I didn't mind that. What cared I that her teyth wuz out, and that she had a goiter, and weighed 200 pounds? Wat cared I that she had a habit of goin about with her stockins down at the heels, and that she considered the time spent in comin her hair ez wastid? She hed a farm, and that was enough for me.

I laid seige to this venerable female, and to my delite found her not averse to a second chance at matrimony. I wuz a healthy young man, and not bad lookin', and looked ez tho I mite run two or three farms to wunst. She wuz rather lonesome on the farm, and it cost a pile of money to hire help, and then they needed a man to look after em; and, to make a long story short, she accepted me, and we wuz yoonited in the holy bonds uv matrimony.

For a few days I lived in a elysium, whatever that may be. I hed the best uv eatin, suthin the Nasby family did not indulge in, and Mrs. Nasby wuz ez complaisant ez a woman cood be. I hed cider to drink, the late Tomson left a good supply uv tabacker and things wuz a goin ez smooth ez cood be.

The fourth day Mrs. Nasby remarked that we'd hed a long rest, and it was time we got about our work.

"Pete," said she. "Yoo want to take the oxen this mornin and go out and break that lot behind the path. It must be done to wonst, and shood hev been a week ago, but for this marryin' biznis."

"Oxcoose me, Mrs. Nasby," sez I, goin' out and laying down under an apple tree, with my pipe lightid, "breakin' ground is not my best hold. This soots me better. I didn't marry to break ground."

"What!" she eggsclaimed.

"I merely sav that I shall not break ground. My biznis on this farm is merely ornamental. I am willing to go and lay down in the field to be broke ann oversee the breakin' pervidid there is a shade tree under which I kin lay. But es for takin' hold uv a plow myself, never."

The womhn looked at me in a dazed sort of way for a minit. She hed in her right hand a pale of soap-suds which she wuz agoin to pour on the roots uv a grape vine near me. Without a word uv warnin she hoisted that bucket of suds, hot ez it wuz, all over me, and in another second hed me by the hair. It wuz time that I assertid myself. I made up my mind to whale her then and there, wunst for all, and hevin establisht my sooperiority, hev it all my way ever afterward.

Assertin one's sooperiority is all well enuff, but you want to be shoor about your strength, that bein the main thing in any assertin biznis. I riz and grappled her, and found that assertin wuz one thing, and establishin quite another. In less than a minit that infoorated and muskeler female hed me on my back, and amaking me baldheded at a rate wich I never dreamed possible. She tore out my hair by the handful, she peeled my face in a minit, and in less than four minits I looked very much like an oldfashioned frigate after an encounter at short range.

"You won't work, won't ye? Well, I guess you will! You'll work on this farm, or ye won't eet. You won't work, won't ye?"

And then, ez ef the thot incited her to madnis, she tore out wat little hiar I hed left, and knocked the last bet of skin off uv my face, and dragged me out to the lot.

"There is the plow, there is the oxen, and there is the ground. Yoo sooperintend! I'll do that eend of the business. Git to work, yer broot, er——"

I saw she wuz in earnest; and I yoked them oxen meekly, and went to work, in the hot sun, and she sot down under a shade tree, and kept me at it, without a minit's rest, till nite.

The Goat.

The goat is a native of the vacant lots about the city, and there are lots of them.

The goat is omnivorous. He will goat anything that he sees, and will seize anything that he may goat.

His principal food, however, is play bill. He is very fond of letters.

Let us honor him for his love of bill letters.

The gentleman goat is called Billy, but he is a Billy that no policeman can handle.

The lady goats are called Nanny. This is their own Nanny-mous name.

The young goat is called a kid. Kids are on hand the year round.

The goat is generous to a fault. He presents a couple of horns to everybody he sees.

In the matter of more cash, the Cashmere goat is the most famous.

Goats are fond of the outskirts of large cities, also hoopskirts.

The goat wears a beard. It is called a goatee, though not confined to the he goat.

The goat is noted for his bunting, but he never flags.

The goat is one of the sign of the zodiac, signifying that he has a propensity to knock things sky-high.

He never gets high himself. That is to say, never gets over the ba a-a.

Shakespeare understood the spontaneity of the goat when he said, 'Stand not upon the order of your going, but goat once.'

The goat is a wide-awake animal. He is never caught napping, notwithstanding the many cases of kid-napping you may have read about.

For many years the goat was the only butter known.

Goats love to get on a high rock and sun themselves. Give them a chance and they will always seek a sunny climb.

The god Pan was a sort of half goat. All goats do not pan out as well as he did.

Baaa!

The Letter-box Editor.

SATISFACTORY EXPLANATION TO A SORROWING ENQUIRER.

(*From the Brooklyn Eagle.*)

'Are you the gentleman who answers the questions sent to the Brooklyn *Eagle*?'

The voice was filled with music, and as the bent and grey philosopher who officiates as encyclopædia for the institution looked up from the question "Was the walking match between the wise men of the east and the star of Bethelem a square shake or a hippodrome?' his eyes were blinded. A flash of golden hair! A bewildering sea of blue eyes! A passionate struggle between the red and white roses.

'I am the man,' he said, wondering what such grand loveliness could want of him.

'May I—ask you—a—question?' enquired the voice, as the beautiful head bowed and the long lashes swept the flowers of her cheek and lay as lightly as dew across the moist lids.

'Certainly, anything. Can I do something for you?'

'It's about Frank,' she faltered. 'I want to ask you about Frank. Oh! why does he treat me so!' and the sweet face was turned upward toward the staggered philosopher, wet with tears, and imploring consolation.

'Is it—is it a matter of ice cream or oysters, or something of that sort?'

'No, no! oh, no! I have plenty of those. Bu why does he let me pine?'

'Something about theatres? Concert business? Bouquets the matter? Candy? Bong bong?' asked the philosopher, ending his interrogations with some respectful French.

'Nothing, nothing of that kind,' murmured the red, quivering lips. 'Why am I so desolate!' and the sobs racked the glorious frame.

'Something about presents? Makes you walk to the park? Won't hire a hack? Another girl? Won't go to church? Plays pool for drinks? Something of that sort?'

'How strangely you mistake him! How cruelly you wrong him!' and the sweet eyes looked tender reproach. 'You don't know Frank, or you wouldn't say so. What I want to ask is—is—Oh? why am I so wretched?' and the tears rained down her face.

'Maybee he's growing a beard,' said the encyclopædia, tenderly. 'Perhaps he parts his hair in the middle. Possibly he belongs to a baseball club, or maybee he stands in front of the theatre on matinee afternoons. Is it that?'

'No he don't! none of them,' flashed the angel. 'If he did I wouldn't care. You shan't abuse him. I came here to ask why—why—oh, why am I so utterly hopeless?'

'Possibly he gets drunk,' suggested the philosopher. 'Or his pants may bag at the knees. Does he brush his plug hat the wrong way? Is his moustache too long on one side? Don't he believe in the doctrine of the atonement?'

'Oh! cruel, cruel!' said the maid, sinking into a chair. 'You are unjust to him. You don't know how grand, how manly he is,'

'What is the matter with him, then?' jerked out the philosopher. 'How has he made you miserable? What has he done? What do you want of me?'

'I want to know—why—he gets up—between every—act and goes—out of the—theatre. I know—he's got—another girl—and he goes—to see—her.'

'My dear,' said the philosopher, solemnly, raising her up and putting his arm around her waist. 'My dear, you are mistaken. I have known Frank for years, and he has no love for anyone but you. Let me tell you something. Frank has got the itch, and he goes out to scratch. Trust me, that is all.'

'If I could only believe that,' murmured she doubtingly.

'On my honor.'

'Then I am happy. If that is all, I am content, but I thought some nasty girl had attracted Him.'

The red roses had come back, and the saphire flash to the eyes, and she went out a grand crash of lovely color, fragrance, and rare beauty, and the philosopher turned to the question, 'What was Eve's maiden name?'

Humorous.

There are two things which will make us happy in life. Only two things. The first is 'Never vex ourselves about what we cant help,' and the second is, 'Never to vex ourselves about what we can help.'

Two friends meeting, the following colloquy ensued: 'Where have you been?' 'To my tailor, and I had hard work to make him accept a little money.' 'You astonish me! Why?' 'Because he wanted more!'

There is probably nothing so exhilarating in the experience of the amateur gardener as when he steps upon the hoe and the responsive handle immediately arises to implant a fervent kiss between his eyes.

It takes five gallons of whiskey to cure an elephant's cold, and since this fact came out, seven New York men have been sent to insane asylums, as nothing can convince them that they are not elephants suffering with colds.

A man rushed frantically up an Omaha principal street, the other night yelling:

'Where'll I get a policeman?'

Some one stopped him and said:

'Drop a letter in the post office for one. That's about the quickest way.'

'You must admit,' said a red nosed vagabond to a temperance lecturer, 'that alcohol is good for one thing at least, and that is to clean silver.' 'Yes,' retorted the lecturer, 'and it is well known that alcohol has 'cleaned' all the silver out of your pockets.'

'What train is this?' asked the benevolent Mrs. Girdeles of the gate keeper, as she was returning from her visit to the city.

'The mail train, madam.'

'Well—when'll the female train start?' I [illegible] trains.

In cases of Chronic disease which doctors have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Bucklen's Arnica Salve.

THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestiible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everyhing else has failed. Satisfiy yourself as thousands have already done by getting of your druggist, JAS. CLARK & CO., a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

Hollaway's Ointment and Pills.—For bad legs, bad breasts, scorbutic and scrofulous sores this is a genuine specific. The grateful earnest gratitude of thousands who have experienced its unrivalled power over these complaints, and who have been raised from prostrate helplessness and a condition loathsome to themselves and others, renders it quite unnecessary to enlarge in this place upon its extraordinary virtues. The parts affected should be bathed in lukewarm water, and when the pores are thereby opened the Ointment should be well rubbed in, at least twice a day. It is always advisable to take Hollaway's Pills in these disorders, as this much assists the Ointment's action. The Pills check the fever, purify the blood and eject all morbid matter engendered by these diseases.

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Feaconstield, P. Q, has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines. It is the only diploma ever issued for grapes and grape vines in this province."

COSTELLO'S
SPRING OPENING
Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York
Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

David B. Robertson,

HAVING resigned the Secretaryship of the Grand Junction Railway Company, will devote his whole attention to the practice of his profession in all its branches.

OFFICE—No. 4 Post Office Block, Bridge Street, Belleville, Ont.

MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL use.

SUBSTITUTES!

☞The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED,
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

THE LEADING
CLOTHING HOUSE

WE beg to notify our numerous patrons and the general public, that we are now in receipt of our

New Spring Stock of Fine Woollens,

Consisting principally of English, Irish, Scotch and Canadian Tweeds, Scotch and Irish Serges, French and English Worsteds, Fine West of England Trouserings, Black and Blue Broadcloths, Black and Blue Venetians, Doeskins, Cassimeres, &c., in all the largest and most complete stock of the kind in Canada.

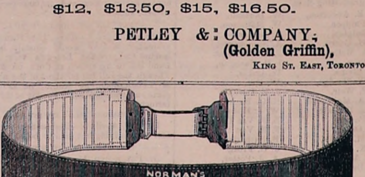
OUR CLOTHING is, without doubt, quite equal if not superior to the best New York Clothing for style, fit and materials, a proof of which is the large number of First Prizes awarded, as at Toronto, Hamilton and other Exhibitions during the past season.

Gentlemen requiring FINE CLOTHING will find it to their advantage to inspect our Stock before purchasing.

We are this season, in addition to our Large Trade in Fine Ordered Clothing, making a specialty of Low Priced Tweed Suits, which we will make to order at the following prices:—

$12, $13.50, $15, $16.50.

PETLEY & COMPANY,
(Golden Griffin),
KING ST. EAST, TORONTO.



NORMAN'S
ACME ELECTRIC APPLIANCES
FOR ACUTE AND CHRONIC DISEASES.
AND RESTORER OF THE NERVES & GENITAL ORGANS.
A. NORMAN, 4 QUEEN ST. EAST
TORONTO.

NORMAN'S
ACME ELECTRIC APPLIANCE.

THIS Electric Appliance is made of separate galvanic cells, connected with pliable wire, thus making a complete galvanic battery in belt form, which can be readily applied to any part of the body for curative purposes. This appliance may be used so as to direct the full force of the united cells directly through any part of the body, either lengthwise or across; or it can be used along or around any part, so that each cell may impart its amount of power consecutively. In one case it is a constant, intense current, which can be increased to a point almost unbearable; in the other it is a constant, mild current, nearly imperceptible. Medical men and electricians will at once see the immense advantage of this appliance for diseases of the Sexual Organs, Nervous Debility, and all those diseases peculiar to young men, and affections of the womb in women. It is particularly adapted to cases where the nerves are lacerated and the organs sore, contracted, weak or relaxed. A suspensory attachment is made to use with it where it is necessary. This appliance does not soil the underclothing like Pulvermach... is much more powerful and beneficial, combining the best features of other belts ... advantages. It can be worn on any part of the body, either ... und the ... be repaire...

CINGALESE
HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

☞THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge, Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.
Wholesale by H. HASWELL & CO.,
Montreal, P. Q.

Ayer's
Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

IT is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The VIGOR cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair

The VIGOR is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.

Prepared by Dr. J. C. Ayer & Co.,
Practical and Analytical Chemists,
Lowell, Mass.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of interna medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himsel cheaply, privately and *radically*.

This Lecture should be in the hands of every youth and every man in the land.

ST. LAWRENCE HALL, MONTREAL

THIS Hotel has been recently retaken by Mr. HENRY HOGAN, the former proprietor, who has handsomely and appropriately decorated and renovated the interior, and completely refitted the whole of the apartments with new furniture. The Hotel is admirably situated, being in the very heart of the city, and contiguous to the General Post Office, the principal Banks, public buildings, law courts, commercial exchanges, railway and telegraph offices. 144d1yr

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville.
316d21t-8w1t.

AFTER THE FIRE.

MR. THOMAS gives notice to his customers that he will open out in WHITTON'S old stand, Front Street, opposite the Dominion Hotel, to-morrow morning, with a complete stock of Fresh and Salt Meats,—where he hopes to see all his old friends.

It is unequalled for cleaning painted walls and wood work, Plate and Silver ware,—also for Crockery, Glass, Marble and Parian ware.

Daily Intelligencer.

A Scientific Railway Car.

There arrived at our railway depot, recently, a passenger car the like of which is not to be found anywhere in the world. It is the property of Mr. P. H. Dudley, inspector of the tracks and apparatus of railroads, and this gentleman and his wife live in this car. A reporter of the *Sun* called on the occupants yesterday afternoon, and was entertained for nearly an hour with the explanations of and experiments made with the large piece of machinery by which the gentleman accomplishes his work. It is of the most complicated and delicate nature, and the amount of work done by it is marvellous. A description of it would be wearisome, with its system of cogs, switches, wires, pens, etc., etc., and would be almost unintelligible, but an idea of its extraordinary work may be gained from the following summary of its accomplishments :

A band of plain paper, about twenty inches wide, is fed from a roll into the machine, passing under a complex set of overflowing pens. For every fifty feet of track passed over by the car this paper band moves one inch, thereby taking eight and a fraction feet for a mile of road. By carefully constructed and adjusted machinery, connected with the wheels of the car, the operator obtains upon the paper a perfect chart of every foot, yes, every inch, of the road. The instrument shows : first, the power required to draw the train ; second, a pen marks on the paper the seconds of time in transit ; third, another pen marks every tenth second in the same way ; fourth, still another pen marks each minute. Then comes a schedule showing the distribution of coal used by the engine ; a perfect diagram of the track is delineated, showing all curves, grades, etc.; the number of revolutions which the driving wheels of the engine make in a minute or mile, or parts of these two ; the location of the mile posts are shown, as also the bridges ; the work done by the engine, so given that the foot-pounds of work can be readily ascertained by multiplying the ratios ; the velocity and resistance of the wind. All these are plainly and accurately shown upon the diagram. When used to inspect the track, the machine shows the surface of each rail, giving the condition of each joint, frog, etc,, and shows at a glance whether the rails are fitted perfectly true, or the least trifle out of place, or if one is a hair's breadth higher than another.

The elevation of the rail on a curve is shown, and a machine has just been added, which Mr. Dudley invented, giving the exact amount in feet and inches that the rails are depressed from a true line. Another section of the chart gives the exact movements of the engineer when the brakes are applied, when steam is put on, and the power required to start and stop the train. Mr. Dudley examines a road in this way, hands his chart to the superintendent, and that gentleman knows at once just where to make repairs and all other needful particulars. The machine is the invention of Mr. Dudley, he having spent eight years perfecting it, and save one which he made and sent to Australia, his is the only one in existence.

Besides this workroom there are a nicely furnished library and parlor, containing cabinets and a fine piano, a dining room, kitchen, bedroom, and storeroom. All this in a common size passenger coach, and in it Mr. and Mrs. Dudley have lived for the last four years, traveling all over the United States. The lady says the life is a very pleasing one, and she enjoys it much. Both the lady and gentleman are finely educated and entertaining people, and an hour spent in their company is a very profitable one.—*Pittsfield* (*Mass.*) *Sun*.

Russakoff, the Regicide.

THE SCENE AT HIS CAPTURE.

(*From the London Daily News.*)

A very interesting account is given by an army surgeon-assistant, who states that he was one of the first to seize Russakoff, and accompanied him to the perfecture. The writer, Wassill Gorokhoff, narrates that he was proceeding along the Katerinofsky canal toward the Neusky Prospect when he overtook a man of middle height and long light hair, dressed in a thin overcoat and a tall fur cap. The man was carrying a small white parcel. The Emperor's carriage appeared on the canal road, and after having saluted the Emperor, who, Gorokhoff says, returned his salutation, he heard a violent explosion, which impelled him forward, and looking round he saw a Cossack fall from his horse and another staggering. The man whom he had previously observed then ran toward the Neusky Prospect without any parcel in his hand, and he seized him, a policeman and two soldiers immediately laying hold of the man. The Emperor approached them, asked if he was the criminal, ordered him to be searched, and turned, proceeding toward his carriage. Gorokhoff appears to have a dim recollection of having seen a man of short stature go quickly toward the Emperor, and then something was thrown either by this man or from between the railings of the canal, which fell at the Emperor's feet with a deafening explosion. The Emperor, and all standing around, including the man he had noticed, fell to the ground as if mowed down. Gorokhoff saw the Emperor lying on his right side, and an officer with white epaulettes—this was the Police Colonel Dvoljisky—drag himself toward his Majesty, who slightly raised his head, which then sank again on the snow. Whilst the young man who had been seized running away was being held after this second explosion, a soldier came up and struck him on the head, saying, "You miscreant, what have you done?" Russakoff replied, "For God's sake don't strike me. You will know afterward. You are ignorant people." He was then placed in a sledge and taken to the Prefecture, where he was undressed and examined. He was respectably clad, and had a purse containing three rouble notes, a passport, and other papers. When interrogated in another room Russakoff first gave a fictitious name, but soon acknowledged his real name. Amongst other things, he stated that he had met his friends the week previously, who had explained to him that on the Sunday following he would have to shoot at the Emperor. Russakoff also affirmed that he knew others would be appointed to carry out the same deed, but did not know who they were. About 1 p. m. he had proceeded to the Canal road, but, being too early, walked across the bridge to the small market-place adjacent. There Russakoff says he met a young woman, seventeen years of age, good looking and well dressed, who knew him, and whom he knew by sight, not by name. She handed him a parcel, telling him he was to throw it and it would explode violently. After remaining a short time in the market-place he returned to the canal road. What followed is only too well known.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Preachers and Churches.

The prayer meeting is the pulse of the church.

A pew in Dr. Hall's church sold last week for $3,200.

The electric light is favored by the trustees of several Albany churches as a substitution for gas.

The English Church within the last nine years has contributed $28,000,000 for religious education.

One church in Lagos, Western Africa, has contributed during the past three years £3,412 for church purposes.

The London Religious Tract Society has circulated over 79,500,000 books and tracts in one hundred and thirty languages and dialects.

Bishop Huntington says : It is small honor to stand in the apostolic line and wear the apostolic garments, unless we do the apostolic work.

In Scotland during the last five years, more new Baptist chapels have been built and more debts cleared off than in the previous forty years.

The "dim religious light" in the highly-arched nave and aisles of St. Paul's Cathedral, London, is about to disappear. The building is about to be lighted with electricity.

A clergyman of San Francisco calculates that one-third of that city's population are habitual church-goers, one-third are skeptical as to religion, and one-third indifferent.

The Rev. Mr. Silcox, a Congregational minister, formerly of Toronto, draws large houses in Winnipeg. The City Hall is crowded to its utmost capacity every Sunday evening.

According to Dr. Joseph Parker, London, "It is uncertain whether geologists contradicted Moses, but it is positively certain beyond all doubt that geologists contradict one another."

The Sunday School Times says : The best thing to do with the balky worker in any department of Christian activity is to put a good substitute in his place—and the sooner the better.

The Congregationalists of Manchester, N.H., have brought the question before the Supreme Court of that State as to the constitutionality of the law imposing a tax upon church property exceeding $10,000.

"Cold, dead formalism," says Mr. Moody to a San Francisco reporter, "is what is making infidelity. There is too much formalism in both the Catholic and the Protestant churches. Healthy Christianity is not formalism. The adoption of the principles of Christ is what we go in for,"

The greatest pecuniary prizes of English clerical life are said to be the head masterships of the great Public Schools. Those of Eaton and Harrow are worth from $25,000 to $35,000 a year, and those of Westminster, Winchester, Rugby, Charter House and Merchant Taylors are worth from $12,000 to $20,000 a year, including the spacious abodes attached to them.

Golden rule : More of the fibre of practical business management is needed in the conduct of church affairs, and more of common sense waiting as a handmaid upon faith. Superstitious idleness is not Christian trust. Men are to work as well as pray, and wilful neglect of ordinary precautions has no Gospel to justify it, and no Divine promise that its losses shall be made good.

The Rev. George Dana Boardman, of Philadelphia, is making an effort to raise a fund of $50,000 to establish a lectureship of Christian Ethics in that city. By Christian ethics he is understood to mean "Christ's precepts and behavior as regards everyday life." If Dr. Boardman succeeds in his endeavor, the lectures will be delivered in Philadelphia and then published for circulation throughout the country.

"When you preach as a supply," says the Christian at Work, "or in some other pulpit than your own, have regard to appropriateness and the eternal fitness of things. One minister, invited to preach to a congregation, mostly sailors, discoursed for full forty-five minutes against horse-racing ; while we know of another minister who preached in an old ladies' home against sowing wild oats in one's youth."

Composition of Serpents' Venom.

What a wonderful thing the venom of a serpent is ! Chemical analysis fails to detect anything in it to account for its action. Water, a little albumen, some mineral salts, and traces of mucous epithelial cells, etc., lumped together as "extractive." Nothing more—nothing specific about it all. Tasteless, colorless and inodorous, and may be rubbed on the sound skin, or applied to the eye, or taken into the mouth without any result whatever. The bites of different kinds of snakes produce different effects; some act as depressant to the vascular system, some as a powerful narcotic, some cause inflammation of the spine while others seem to give rise to disorganization of the structural constitutients of the blood. All were attended more or less with rigors, delirium, syncope, convulsions, paralysis, coma. Whether the poisons of any two or more species are identical I do not know—it seems probable; but in the five distinct and separate venoms. I imagine, for instance, that the rattlesnake and copperhead will prove to possess the same and perhaps several of the viperine snakes. I hope so. Some of the fluids are very unstable, and decompose if kept only a short time or if their specific gravity is disturbed, while others retain their deadly properties even when dried. That of the common French viper (*Vipera aspis*) may be diluted down till it forms a mere local irritant. No true antidote has ever been discovered for the bite of any snake.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

Mothers ! Mothers !! Mothers !!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth ? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the child, mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

Daily Intelligencer.

BELLEVILLE, MONDAY, APRIL 11.

Those Appointments and Dismissals.

BUYING UP THE CATHOLIC VOTE.

After the lapse of a whole week since the dismissal of the Sheriff of the County of Hastings, a semi-official statement of the reasons which induced this action of the Ontario Government has been put forth on their behalf. This announcement is not made in the local organ of the party, as might have been expected—that journal having been passed over, probably as being of too little consequence—but in the columns of the chief organ of the party, to which has been entrusted the brief for the defence of Messrs. Fraser, Mowat & Co. This so-called "defence" is so flimsy in its nature that it is really worse for the *Globe's* clients than would have been the preservation of a discreet silence, for the evidence for the defence is condemnatory of the defendants. In order that none of its fine points may be lost to the reader, we reproduce it in full, as follows:

> The Belleville INTELLIGENCER endeavors to arouse some feeling against the Government in connection with the dismissal of the Sheriff and Deputy-Sheriff of Hastings, and the appointment of new incumbents in their stead. No political motive, it is evident, can be assigned for what has been done, inasmuch as the dismissed officials were appointees of a Reform Government, and were generally supposed to have no Conservative sympathies. The real explanation of the dismissal of Sheriff Taylor and his deputy is not the mystery that the INTELLIGENCER wants to make out. The truth! is that the Sheriff has not for years actively discharged the duties of the office, and that a most scandalous state of affairs had grown up in and about the county gaol. Some time ago the Inspector of Prisons investigated the matter, when all parties interested were allowed to put in sworn statements and make what defence for themselves they could. The gaoler and turnkey were dismissed at once, and after some deliberation it was considered necessary to dismiss also the sheriff and his deputy. Let other Sheriffs take warning. Even the INTELLIGENCER does not find any fault with the new appointees. Dr. Hope succeeds to the Shrievalty, and his place as physician to the Deaf and Dumb Institute and the Gaol will be taken by Dr. Murphy. Mr. Patrick O'Brien, of Belleville, succeeds Mr. Taylor as Deputy-Sheriff.

The organ has evidently been but poorly instructed, or it would have been able to present a more plausible case. As it is, it blunders fearfully. In the first place, the Sheriff and Deputy Sheriff were not "supposed to have no Conservative sympathies." The contrary is notoriously the case, witness the howl that was raised against the Sheriff when he took part in the procession which welcomed Sir John Macdonald to this city on the occasion of the great political demonstration which occurred here in 1876, and the Deputy Sheriff has never sought to conceal the fact that his sympathies were with the Conservative party. The plea set up that the Sheriff and his Deputy were dismissed because of the evidence taken at the gaol investigation is a mere subterfuge put forward to cloak an action which was dictated by political motives, and which was really based on a complete disregard of British practice and in accordance with the American system, which is summed up in the words "to the victors belong the spoils." Those who heard the evidence adduced in that investigation know that nothing was proved against the Sheriff or the Deputy Sheriff. This was the view which the public took of that affair, and that it was, until a few days before the act of spoliation was consummated, the view of the Premier, of another member of his Government, and of the Inspector of Prisons and Asylums, before whom the testimony was taken, we have the word of those gentlemen themselves. After the close of the investigation the Deputy Sheriff asked the Inspector—who then had all the testimony fresh in his memory—whether the Sheriff would be affected thereby, and Mr. Langmuir replied that there was nothing to justify the dismissal of the Sheriff, as he could not be held strictly accountable for derelictions of duty on the part of the gaol officials, when he could not possibly be present. This was a fair view of the case, and Mr. Mowat shared it, as after reading the evidence he said to an influential gentleman, hostile to the Sheriff, who went to Toronto to consult with him on the subject, that there was nothing to justify a change; that if reasonable ground could be shown he would dismiss the Sheriff, but that he would not do so for purely political reasons. The Provincial Treasurer, who visited Belleville on March 29th, only four days before Dr. Hope's appointment, said no change could be made in the Sheriff's office, as nothing had occurred to justify the Government in doing so. When it is considered that the Gaoler and the Turnkey had been dismissed previous to Mr. Wood thus expressing himself—not, as the *Globe* falsely states "at once," but evidently after full and mature consideration, it will be seen that the Government are condemned not only by their own Inspector, but out of their own mouths. Can there be any doubt, after this statement of facts, that there was some other reason than the evidence taken at the gaol investigation for the action of the Government? But even were it conceded that the Sheriff had deserved dismissal, why should the Deputy Sheriff be dismissed? Mr. John Taylor kept his uncle's office in an irreproachable manner. By doing so he stood well with the public and with the legal profession, having been complimented by the late Chief Justice Moss and other Judges upon the manner in which he transacted the business. The answer is but too evident. His position was required for one of the hungry supporters of the Government. There cannot be a doubt that the Sheriff and Deputy Sheriff, being Conservatives, were sacrificed to appease the clamor of hungry office-seekers, and to suit the objects of Mr. Fraser, the real head of the Mowat Government, who boasts that he controls by purchase the votes of the Irish Roman Catholics of this Province. This has been a vain boast so far as West Hastings is concerned, but nevertheless the game is being played consistently in this part of the country, in the hope that West Hastings will yield, and if not, that other constituencies will be more complaisant. Hence the dismissal without cause of Mr. Ross, License Inspector for West Hastings, to make room for Mr. Grainger—a Roman Catholic; the appointment of Mr. Lally—a Roman Catholic—as License Inspector for East Hastings; of Mr. Patrick O'Brien—a Roman Catholic—as Deputy Sheriff; and of Dr. Murphy—still another Roman Catholic—as Physician to the Institution for the Deaf and Dumb. This is a bold bid for the support of the Roman Catholics of West Hastings, but we do not believe that they are for sale. Such are the motives which we attribute to the Government, and such is the opinion of not a few of their supporters here, whose censure of Mr. Fraser may not be loud, but is none the less deep and heartfelt on that account.

So far as we can learn from conversation with members of the Reform party, the Government would have stood better in Belleville at all events had they refrained from perpetrating the outrage of which they have been guilty, as the appointments have given the utmost dissatisfaction to their supporters generally. The appointees themselves and a few of their intimates may be pleased, but the party are not satisfied, and express themselves to the following effect: Dr. Hope, as is well known, has not been in strict accord with his party for some time past, and although his fitness for the position is not generally questioned, yet it is felt that some one more in accord with the party here should have been appointed. Mr. O'Brien is even less satisfactory, as he was a warm opponent of the Grit party no longer ago than 1872, when he supported Mr. Frizzell, the candidate of the Macdonald Government, in East Hastings, and is besides considered unreliable and incompetent. Dr. Murphy's appointment is worst of all, as he has only resided in the city for some three or four years, and is appointed over the heads of old residents of the city who have served the party for a lifetime. It is felt that he and Mr. O'Brien have been appointed at Mr. Fraser's instance, with a view to purchase Catholic support, and gloomy are the mutterings amongst the Protestant Grits in consequence.

Could the Reformers but rise above the trammels of party for a moment, they would find their eyes opened to the fact that, under the specious guise of "Reform" in Ontario, they have created an autocracy in Toronto which is more tyrannical than the Family compact was ever alleged to be. They would find that, in the name of "Reform," the Government had aggrandized themselves to this extent: They have seized the printing patronage of all their officials, who are obliged *by statute*, passed by a "Reform" Government, to give all their printing to newspapers which support the Government; they have seized the support of the liquor trade by taking from municipalities the appointment of License Inspectors and adding to that the appointment of three License Commissioners; they have taken into their own hands the appointment of Division Court Clerks and Bailiffs in cities, towns and villages; they have also seized, in an underhanded and contemptible way, the appointment of Deputy Sheriffs, Gaolers and Turnkeys, which latter officials they really appoint under the pretence of exercising the power of veto. And, in addition they attempted to seize the power of appointing Q. Cs. Thus, step by step, the Government have proceeded in fortifying themselves in office, and have such an army of officials at their back that they can almost bid defiance to public opinion. Is this satisfactory to Reformers? Is it in accord with the traditions of their party? Is it a state of affairs which ought to be continued? Should officials be dismissed because of their politics, or appointed because of their religion and nationality? If they can conscientiously answer these questions in the affirmative, we pity them, that is all, because the action of the Government has been subversive of all that the Reformers of old contended for.

Ashamed.

The Montreal *Herald*, even, is ashamed of the *Globe's* blackguard attack on the Minister of Railways, and takes occasion to let the public know that it has no share in the brutality exhibited by its liberal *confrere*. In its Saturday's issue the *Herald* says:—"We will not indulge in any lengthened criticism, or question the propriety of the *Globe's* doubt as to the truth of the recent illness of Sir Charles Tupper. It would have shown a much better spirit to have given the Minister of Railways the benefit of the doubt which appears to have seized our Toronto contemporary. If the suspicion is entertained at all, it must be amongst a very narrow circle. The Reformers of the Dominion, we are sure, do not suspect the honesty of Sir Charles in asking to be relieved for a short period, to regain his strength, which many are aware he had lost during the work of the session, certainly not an idle one. We can afford to face the Minister when convalescent, but we do not share in his being traduced under such circumstances."

Mrs. Mary Harrington, Kouchibouguac, N. B., says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

A Fruitless Determination.

A few days after the funeral of the late Hon. Geo. Brown, his brother, Mr. J. Gordon Brown, announced through the columns of the *Globe* that he had assumed the position of Managing Director of that journal. In that announcement occurred the following sentences:—

> "Before the open grave on Wednesday last were men of all parties and creeds assembled to pay respect to one who held decided opinions, from which many there strongly dissented. In such scenes the strifes of to-day shrink into insignificance, *and lessons are taught of toleration and forbearance.* Though wrong must be exposed, and wrong doers condemned, *I hope to be enabled to avoid much of the bitterness which too often saddens party strife.*"

How the above praiseworthy determination was kept, let the recent brutal attack on Sir Charles Tupper answer.

AN ADDRESS.

WHAT THE CLERGY OF THE DIOCESE THINK OF THE VICAR-GENERAL.

The following, which we copy from the Kingston *News* of Saturday, will be read with interest by the numerous friends of Rev. Father Farrelly, of Belleville, Protestant and Roman Catholic alike:—

On Thursday evening, after the presentation to His Lordship Bishop Cleary had been concluded, the Rev. Father McCarthy, of Brockville, read an address, on behalf of the clergy of the diocese, and presented it to the Rev. Father Farrelly, Vicar-General. It is as follows:—

To the Very Reverend Father Farrelly, late Administrator of the Diocese of Kingston;

Very Rev. and Dear Sir:

Before the close of this day, pregnant with hope for the Church of Ontario, and full of gladness for the Diocese of Kingston, especially for the laborers in the vineyard, this day on which we welcome into our midst, with pleasure and with pride, a Prince of the Church who combines every quality of mind and of heart that ennobles man? Before the close of this day, Very Rev. and dear sir, we, the Clergy of this diocese, desire to give expression to the sentiments of respect, of esteem, and of brotherly affection which we entertain for you. For the last thirty years you have held aloft the banner of faith in this mother See of Ontario, laboring "in season and out of season" for the cause of your Divine Master. And those best acquainted with you can bear testimony to your personal piety and sacerdotal zeal—a fervent priest of the Holy Church of God. In your long career in the ministry you have unflinchingly upheld, regardless of the opposition of the lukewarm and liberal, the principles and the discipline of our holy mother, ever ready to lift up the fallen, never weary in preserving in righteous paths the souls committed to your care, on all occasions, by your untiring energy and unflagging zeal. You have manifested in your life those noble virtues characteristic of the faithful pastor, twelve years ago you became "Ex-Officio" the confidential advisor of the Most Rev. Dr. Horan, "clarum et venerabile nomen," and it is simply truth to tell, that, during that prelate's failing years and in his declining days, you were ever "usque ad finem" to your Bishop, the faithful counsellor and sympathetic friend and to your "Alma Mater" a loyal priest of undivided and unswerving allegiance. This last we are especially proud in mentioning, for the honor of our Diocese, your own gratification and the pleasure it may afford to the eminent prelate who now presides over us. When for the fifth Bishop of this See, the great Pius IX. sought the learned, the eloquent the meek and the gentle John O'Brien, the honors that had been yours in the past were conferred anew. In St. Mary's Cathedral, in words more commendable than ours, the meed of praise due you was bestowed by that eloquent Bishop for the able and judicious manner in which you had administered that portion of the Diocese confided to your care. Twice within the last decade of years the sole administration of this important Diocese was placed in your hands. Twice within that period, in the vaults of St. Mary's Cathedral, it fell upon you to perform the last sad duties over the great ones that lie there, and as you quietly removed from them the pectoral cross ere the silence of the tomb closed forever over them, you carried away the consolation of the "Mens Conscia Recti," the same knowledge which their last words and their last acts gave, "that you had been weighed in the balance and not found wanting." Therefore, Very Reverend and dear Sir, you shall ever be to us the golden link which bind the social memories of the great and glorious past with the glad and joyful present. If this day is one of great gladness to the parish of this diocese, appreciating as we do the great honor which has been conferred upon us by the Holy See in selecting as our chief pastor the choicest that our fatherland could procure, you more than all have every right to experience the highest sense of satisfaction, great joy and an honest pride in presenting to His Lordship on this day your brother priests, old and young, one and all firm in the bonds of faith and of gentle charity such as they came into your hands, from the great lamented dead. With this pleasing fact before you we may ask you to accept our most sincere congratulations, for in the preserving of this, you deserve no small share of just consideration, having in all your feelings with us helped to enlighten the labors if our ministery in the remembrance of the injunction of the Apostle, "Alterius onera portate et sic adimplebitis legem Christi." If recalling the past on this day, you may find much reason to rejoice, we, also, your confreres, may most aptly inscribe in the years of your administration, the sentence of the inspired: "Quam bonum et quam jucundum habitare fratres in unum," and say Rev. and dear Sir, may yours ever be the happy years ours have been under your wise, kind, and courteous administration.

THE REPLY.

The Vicar-General, in reply, said the evening was too far gone and those present too tired for a reply from him to be appreciated. However, he would say that he was happy to be made aware that he had done his duty with such satisfaction to the clergy. He thanked them from his heart for their kind sentiments.

The *Whig* adds the following particulars respecting Father Farrelly's pastoral career:

THIRTY YEARS' MINISTRY.

Rev. Father Farrelly finished his theological studies at Regiopolis College, being a fellow student of the late Bishop O'Brien, whom he admired and loved for his virtues as well as rare scholastic accomplishments. He was ordained by the late Bishop Phelan, and during the first two years of his priesthood was attached to the cathedral. Then he was appointed to the parish of Hastings and Asphodel, where he remained and labored for between four and five years. Next he was appointed to Lindsay, in which town he resided for eleven years. Upon the death of the late Father Dollard he was made Vicar-General and parish priest of Kingston. Finally he replaced, some seven years ago, the late Father Brennan, at Belleville. While located in Kingston and during the absence of Bishop Horan, summoned to attend the Æcumenical Council in Rome, he was first assigned the administration of the diocese; a second time the direction of affairs devolved upon him during the illness and at the death of the same prelate, and lastly the unfortunate demise of Dr. O'Brien forced upon him duties which he has satisfactorily discharged, and of which he has been relieved by the arrival and installation of the new bishop. It is unnecessary that we should say more. Those who know the value of the Very Rev. Father Farrelley's services, the clergy of the diocese, have put on record an opinion which does both him and them infinite credit.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters, Sample bottles 10 cents, regular size $1,00.

News Condensed.

—The Scott Act has been carried in Lisgar, Manitoba.

—Thirty new sewers are in course of construction in Toronto.

—Iowa's butter and cheese product last year was worth $19,000,000.

—A valuable quicksilver mine has been discovered forty miles from Victoria, B. C.

—Judge Wells, for many years County Judge of Kent, Ont, died in Toronto yesterday.

—It now appears to be certain that the Oka Indians will be removed to the Parry Sound district.

—The weekly mail steamer *Moravian* arrived at Halifax at an early hour yesterday morning.

—A considerable portion of the Grand Trunk offices at Brantford was destroyed by fire on the 9th.

—The Ottawa *Citizen* contradicts the rumor that Sir John A. McDonald is suffering from Bright's disease.

—Extensive floods have occurred in Hungary, some 140,000 acres of arable land being under water.

—The Napanee woollen mills have received orders enough to tax their capacity night and day for six months.

—The Queen's Own and Tenth Royals are to attend the military review to be held in Ottawa on the 24th of May,

—The Ministerial crisis in Italy has culminated in the resignation of the cabinet, which the King has accepted.

—Mr. Bradlaugh was re-elected on Saturday to represent Northampton in the House Commons by a majority of 125.

—Considerable quantities of square timber have already been brought down the Toronto, Grey & Bruce Railway this spring.

—The stream of emigration from Ireland to the United States and Canada is said to be assuming unwonted proportions.

—The Indian Department at Ottawa has received advices that Sitting Bull is on his way to surrender to the United States authorities.

—The St. Lawrence is opening for navigation as far as Quebec. It is expected steamers will begin to run about the middle of the month.

—The Court at St. Petersburg has returned a verdict of guilty in the case of the Russian prisoners. Sophie Picoffsky was sentenced to be hanged.

—Lady and Miss Macdonald go to New York for the benefit of the health of the latter. It is understood that Sir John A. will accompany them

—The Baths, which Mr. Wiman of New York, intends giving the City of Toronto, will cost $6000. One is to be in the East end, the other in the West.

—A parallel to the Colonel Synge case is reported from Constantinople, brigands having captured an Englishman and demanded a ransom of $15,000.

—Mr. O'Brien, the wealthy land owner of Montreal, after several days trial has been found guilty of uttering a forged instrument with intent to defraud.

—The Nova Scotia Sugar Refining Co. have commenced operations, and the Hon. A. G. Jones' Sugar Refinery at the Northwest Arm will commence operations next week.

—It is stated that there is a detective in London, under instructions from the general manager of one of the banks, keeping an eye on the personal habits of bank clerks.

—The Case of Fisher *vs* The Georgian Bay Transportation Company will be opened up again next June at Toronto and an effort will be made to have it tried by a judge without a jury.

—By careful calculation, it is estimated that 60,000 deer were killed in Michigan in 1880. The carcasses weighed 7,500,000 pounds. Of course, such slaughter as this will in a few years exterminate the game.

—The report of Mr. Shanly respecting the Hochelaga tunnel survey is so favorable that it is believed the tunnel will be built. The promoters are in New York now with the view of obtaining capital to carry the enterprise through.

—The Scott Act will be voted on in Hamilton on the 13th of this month, in the county of Halton on the 19th, and in the county of Wentworth on the 22nd. If the Act carries in Hamilton, an attempt will likely be made to carry it in Toronto.

—Mr. Collingwood Schreiber, Chief Engineer of Government Railways, has left Ottawa for Winnipeg. Is is believed that his business is to arrange for the complete transfer of the finished portions of the Canada Pacific Railway to the Syndicate.

—Mr. Murdock, chief engineer of the South-Western railway, has arrived at Winnipeg. It is reported that the work of location and construction of this line is to commence immediately. The bonds are reported to have been successfully floated by Dr. Schultz.

—The *Mail* of to-day gives an account of a pugilistic encounter between Alex. Grant, of Montreal, and Jack Smith, of Toronto, which took place last week a short distance west of the city. Thirteen rounds were fought, when Smith was declared the winner of the purse of $50.

—A telegram from Mr. R. P. McLea, Halifax, states that the catch of Newfoundland seals has been quite large. The following steamers have returned with cargoes: *The Resolute*, 36,006; *Esquimaux, Eagle, Greenland, Mastiff, Panther, Narwhal*, and *Aurora*, all filled.

—At the special general meeting of the Canada Cotton Manufacturing Company, of Cornwall, held in Montreal on the 8th it was unanimously resolved to increase the capital stock of the Company by the issue of 1,250 shares of $100 each, for additions to mills and machinery, and other purposes.

—Some eight or ten tenders have been received by the Railway Department for the supply of about 100 box, flat, and coal cars and 10 locomotives for the Intercolonial railway. The Canadian tenders are said to be lower than tha American ones, so that the work will scarcely be given out of the country.

—The Registrar for the county of Dundas, Mr. John Pliny Chrysler, died on Thursday morning, in his 81st year. Mr. Chrysler was one of the oldest and most respected inhabitants of Dundas. He represented that county for a number of years in the old Parliament of Canada, and was appointed to his late position over thirteen years ago.

—Knox's Great Western excursion train arrived at Winnipeg at seven o'clock on Saturday night with ten passenger coaches and three baggage cars. A considerable number departed at Emerson for Southern Manitoba. The stock and freight belonging to the party is following close behind. The party had a splendid run from Toronto.

—The man Coleman, supposed to have been concerned in the attempt to blow up the Mansion House in London, and who was a passenger by the Australia to New York, turns out to be an inoffensive Englishman, a resident of New York State. It is believed the true Simon Pure whom the Government are desirous of intercepting left the Australia before she sailed.

—Under the heading, "Delay to passengers," the Chicago *Sunday Times* says:—"It is but justice to the Chicago and Grand Trunk and to the Grand Trunk railroads to say that the recent delay in Chicago of Manitoba emigrants was not owing to any fault of those roads, but it was owing to the Chicago and Northwestern Railway being blockaded with snow. This last named road could not take the emigrants from the Chicago and Grand Trunk road, and, as a result, they were forced to remain here about three days.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

THE CATTLE TRADE.—The Montreal *Star* says: "It is estimated that freights have been engaged from this port for May and June to accommodate from 10,000 to 12,000 head. The following represents the closing operations of Canadian shippers from American ports this year:—Warren Line, Boston to Liverpool SS. *Pembroke*, April 7, C. M. Acer & Co., 50 head, R. Craig & Co., 50 head, and Alderman McShane, 100 head; SS *Canopus*, April 9, C. M. Acer & Co., and R. Craig & Co., 202 head each; SS. *Minnesota*, April 12, C. M. Acer & Co., and R. Craig & Co., 100 head each; SS. *Massachusetts*, April 17, Thos Crawford & Co., 134 head; SS. *Iowa*, April 29, C. M. Acer & Co, and R. Craig & Co., 100 head each. The SS. *Clifton* sails from Baltimore for London on the 15th instant with 200 head, divided equally between C. M. Acer & Co., and R. Craig & Co Besides these, Elliott, Williamson & Goodfellow ship 400 head from Halifax on board the SS. *Rossmore* about the 15th instant.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopseas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

NOTICE.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

BELLEVILLE, MONDAY, APRIL 11.

5 O'CLOCK EDITION.

City and Vicinity.

MR. H. CORBY received eight cars of corn from Chicago to-day.

THE erection of Rathbun & Son's new storehouse will be begun to-morrow.

ONE tramp stretched himself on the benches of the police cells last night.

THE filling in of the southern part of the G. J. R. wharf extension is approaching completion.

SEE advertisements of the Syndicate Store, including great sale of horses on the 14th at O'Brien's.

ANOTHER glorious spring day. There are few among us who are not affected by "the spirit of the season."

THE City Council meets this evening, and will probably not go home till morning. There is much matter for discussion.

THE questions of water-works and of the removal of the police cells, police court and No. 1 fire station will be considered at the City Council this evening.

THERE are at present 245 pupils in the Institution for the Deaf and Dumb—the largest number that has attended since the opening of the Institution.

THE "Yeo-he-vo's" of the gang of men engaged in removing the old wooden building down Pinnacle Street, have made that part of the city musical all day.

THE next Social in aid of the Bridge St. Sunday School Improvement fund, is to be held a week from to morrow (Tuesday) evening, at the residence of Mr. C. P. Holton, Charles St.

THE St. George's Society, at their meeting on Saturday night, resolved to have a procession to church on the afternoon of Sunday, the 24th inst., and to have the annual dinner on the following evening.

TO-MORROW evening Cool Burgess and his "Sleighing Party," appear in the Metropolitan Hall. From all accounts the performance is full of fun, and is thoroughly enjoyable, without being offensive, from first to last.

SPORTSMEN have a fine opportunity for shooting in the neighborhood of Consecon, where large numbers of wild geese and ducks have gathered to feed on the wheat which was lost from the barque *T.C. Street* last autumn.

THE new street scraper which has been engaged by the city on trial will be put to work on the streets in a day or two. If it can be successfully operated it will do away with the work of the army of street shovellers now employed.

MR. WM. POLSON, the new Mechanical Superintendent of the G. J. Railway, took charge of the shops at the Junction to-day. Mr. M. Wakefield, the late Superintendent, has accepted a position on the Quebec & Occidental Railway.

IT was rather strange to see staid, elderly folks, who disapprove of dancing, hopping and skipping on the bit of loose sidewalk at the corner of Bridge and Church sts., on their way to and from church yesterday. The sidewalk here has been loose for weeks, and should be repaired at once.

TURNED UP.—The man Jas. Miller, who left Deseronto on Thursday, and who was supposed to have broken through the ice and been drowned, turned up all right on Saturday night. He had been visiting friends in Prince Edward, and was surprised to hear of the fuss which was being made over his supposed death.

ORGAN RECITAL.—The date of the organ recital to be held in Christ Church — at which the qualities of the new organ will be fully tested— has been fixed for Wednesday evening, the 20th. Mr. F. H. Torrington, organist of the Metropolitan Church, Toronto, and one of the best organists on the continent, has been engaged for the occasion.

CHILDREN FOR MARCHMONT.—Miss A. Bilbrough sends the following telegram from Halifax announcing the safe arrival of children from Glasgow for Marchmont Home:

April 11.—Just arrived, all well. Rough passage. Party of sixty-six boys.

They will probably arrive in Belleville on Wednesday evening.

OCCUPIED HIS PULPIT.—The many friends of the worthy pastor of St. Andrew's Church will be glad to learn that he has so far recovered from his recent illness as to be able to resume his pastoral labors. Through some blunder it was announced in Saturday's paper that Rev. M. W. McLean would preach in Trenton yesterday. He occupied his own pulpit at both morning and evening service and preached powerful and effective sermons to large congregations.

RETURNING.—A correspondent of the Bobcaygeon *Independent* says: "While at Haliburton the other day I heard that sundry of the inhabitants who left that part of Canada for Dakota, some time ago, are soon to return again to their old homesteads, if not beyond their means of re-occupation." Numerous other Canadian who were similarly deceived as to the soil and climate of the Western States, will either cross the lines into Manitoba, or return to Ontario.

WEATHER PROBABILITIES. — Toronto, April 11.—Lakes, moderate to fresh winds, fair weather, stationary or slightly lower temperature.

POLICE COURT.—On Saturday evening John Hull was brought before the Magistrate on a charge of injuring shade trees on Pinnacle St. in the removal of a house. Evidence was taken and judgment was reserved till to-day, when Hall was fined $2.00 and costs. The case brought by Patrick McCambridge against C. A. Thompkins came up this morning and was adjourned till this afternoon.

CRICKET.—The prospects of a very prosperous season for the Belleville Cricket Club are very fair. The best of last year's players are still members of the club and intend taking an active part in this season's campaign. Two or three new men—excellent players, it is said—will also add strength to the club. A meeting for organization is to be held on Wednesday evening at "The Hub" saloon. It is to be hoped there will be a large attendance of all who are interested in the noblest of outdoor games.

THE "AMERICA" CUP.—New Yorkers are already discussing with much interest the coming race for the *America* cup. A correspondent of the *Forest and Stream* holds that the New York Yacht Club has but four sloops from which to make a selection to meet Capt. Cuthbert's new vessel. These are the *Hildegarde* (formerly *Niantic*) *Gracie*, *Mischief* and *Vixen*. The merits of these crafts he holds to be in the order named, but *Forest and Stream* considers *Mischief* to be the best, and she will not unlikely be the defender of the cup.

DIED FROM HIS INJURIES.—Weller Johnson, the old man who was so terribly injured at the G. T. R. station early on Saturday morning by being run over by a locomotive, died shortly before midnight on Saturday night, at the house of Mrs. Rosa Thompson. An inquest having been deemed advisable, a coroner's jury was empannelled this morning. After viewing the body, the jury adjourned until this evening at 7:30. The inquest will be held in Doctor's Hotel, near the G. T. R. station. The body was removed to Smithville this morning.

THE FERRY.—The *Prince Edward* made her first trip to Ferry Point on Saturday evening. This is rather earlier than the average period of her first trip during the past ten years. The narrow channel through which Mr. Reddick had come to the city in a skiff on Saturday morning widened during the afternoon fully a hundred yards, and the *Prince Edward* left her dock at 5 o'clock, having a clear run across and making the round trip in about half an hour. Since then her course has become entirely free of ice, and she has been running regularly all day to-day.

ANOTHER DANGEROUS SPOT.—We are pleased to see that the railing on Church St., to which we referred in Friday's issue, has been repaired, and thus a great danger has been averted. Another spot almost as dangerous is on the corner of Dundas and Pinnacle Sts., within a short distance of the place where Mr. Flynn injured himself (and recovered $70 and costs from the city for so doing). There is a deep ditch here into which a person would be very liable to step on a dark night and break a leg, or perhaps his neck. It should be covered in immediately, or the city will probably have to pay another bill of damages before long.

THE ICE.—About 3 o'clock on Saturday afternoon, the narrow channel from Ferry Point to the City widened fully a hundred yards, leaving a free passage for the ferry steamer. Throughout Saturday night and Sunday morning the action of the water kept breaking up the ice, which had grown very soft and thin. About 2 o'clock yesterday afternoon a mass of ice that remained, extended from Ferry Point to the new lighthouse, and west as far as Bushy Island, began to move. When it reached the firmer ice near the G. J. R. dock it was broken up, and left a wide space of open water. The ice which remains in the bay is a mere shell, and cannot last much longer. A wide channel has been formed for nearly two miles eastward, and if the present high wind continues it will, in a few hours, probably reach as far as Massassaga Point.

MASSASSAGA POINT.—This old and well-known summer resort has been purchased by Mr. H. Corby, Jr., who intends to transform it into a far more popular resort than it has ever been before. Mr. John Pepper has received the contract of constructing four wooden cottages 13x13 feet, with kitchens in the rear, 6½x6½ feet. The cottages are to be placed in a row, about 100 feet apart and fifty feet from the shore, facing Belleville. They are to be oiled on the inside and painted white on the outside. Three of these cottages have already been leased for the season by Belleville people; if more are required they will be built. The hotel at the Point is also to undergo a course of repairs. A new verandah is to be erected all round it, and it is to be painted and oiled throughout, both inside and outside. The dock is to be repaired, and enlarged so as to give it a frontage of eighty feet, with ten feet of water in front. A thorough cleaning up of the brush in the vicinity of the hotel and cottages will take place, and the ground for a space of thirty acres is to be levelled. Access to the Point from the city will be both easy and cheap, as the steamer *Annie Gilbert* is to make three trips a day at a rate of 15c. for the round trip. The whole Point has been placed under the superintendence of Mr. Geo. Pretty, whose able management during the past four seasons has made it so popular as a summer resort. Massassaga will be opened to the public on the 24th of May.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

A CHANGE.—It is announced by the Hamilton *Times* that Mr. Hunter, whose conduct as principal of Brantford Blind Institute has been undergoing a public investigation, has either resigned, or has been removed from that post, and has accepted the position of Inspector of Insurance for the Province of Ontario, in the place of Dr. O'Riley, the present inspector, who, it is understood, retires from office. Mr. A. H. Dymond, for some years the principal leader writer on the *Globe*, and during the last Parliament M.P. for North York, has, we understand, been offered the position held by Mr. Hunter, and has accepted the same. Mr. Dymond has well earned the position, and we have no doubt will fill it with credit to himself and satisfaction to the Province.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

Stirling Notes.

One of the best evidences of a healthy, as well as a prosperous state of things in Stirling, is the fact that there are no empty houses, and that preparation for a large amount of building is going on. Another evidence of the healthy state of business is the fact that those buildings are to be put up with the money of their owners and not money obtained on mortgage. There are two good brickyards in the vicinity of the village, which supply ample material for building. Amongst the projected buildings we give the following:

A new Methodist Episcopal Church, to be built of brick with stone foundation. It is to be 40x70 feet, exclusive of tower and orchestra. It is also to have a gallery running across one end and along each side to the third window. Height of tower and spire, 123 feet; height of walls, 28½ feet; basement, 10 feet from floor to ceiling. To cost $6,100. The church is to be ready for occupation on the first of December next.

Mr. Jas. Boldrick, one of the most enterprising merchants, has torn down the old stone building on the corner of Front and Charles Streets and commenced the erection of a new and commodious brick block. The plans show a frontage of 60 feet on Charles Street or Marmora Road and a frontage of 50 feet on Front Street. The building is to be two stories in height with 12 and 10 feet ceilings respectively, the upper windows are to be circular and have cut stone arches, and judging from the plans it will be the handsomest building in Stirling. The corner store will have two entrances. It is expected to be completed about August next, and will cost about $4,000.

Mr. Jas. Milne intends putting up on the ground adjoining the store of Milne & Clute, two shops of brick two stories high, at a cost of probably $2,000.

Mr. Ira Williams, merchant, has given out the contract for a brick dwelling in the north-east part of the village, to cost about $2,000.

Mr. Fred Ward, foreman in Mr. Craig's merchant tailoring department, has commenced the erection of a brick residence for himself on Edward Street, which will cost about $2,000.

Mr. Wm. Reynolds, cabinet maker, has given out the contract for a dwelling for his own use on Mill Street. It will also be of brick, and cost about $1,500.

Dr. Parker intends putting up a frame dwelling in the southern part of the village.

Mr. Walter S. Martin, shoe manufacturer, has greatly enlarged his premises and reports the manufacturing part of his business as exceedingly prosperous.

It is said that Mr. Bickford intends building a new railway station this summer. A much larger building is certainly needed to accommodate the growing business of the place.

To accommodate the growing business wants of Stirling, a Bank has been established here, of which Dr. Faulkner, has the management. It is, we believe, in connection with the Bank of Commerce. It certainly will be a great convenience to the business men of the village, as well as to the farming community. It is likely this Bank will do the cheese business of this section of the country, which will be of great advantage to cheese producers. The Bank is already doing a large business.

During the past winter, Messrs. R. E. Campion & Bro. have shipped from Stirling and Huntingdon Stations some 200 tons of pressed straw. They are now operating at Peterborough, and from there will in a few days complete a shipment of over 200 tons of hay. Their market is New York City and Troy, N. Y. The straw is chiefly used by paper makers, the finer qualities being used for upholstering purposes. The press which Messrs. Campion have is one of the newest and most improved kind, and we understand the business is one which will admit of a considerable extension.

Dr. Boulter has shown us a number of new Early Rose Potatoes, being the first growth of this coll season's production. They are of good size, and were taken from a pit in a field of Mr. Charles Reid in the 9th concession of Sidney, near Chisholm's rapids.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless. ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure If you have not used this medicine yourself, go to your Druggist—————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

'THEY ALL DO IT.' — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

"Hail bounteous, beauteous, gladsome Spring" — this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

MORNING DESPATCHES

EUROPEAN.

PARNELL ON LAND BILL—ACTION OF BISHOPS, &C.

DUBLIN, April 11.—Parnell is reported as saying that no tenant can derive benefit from the first part of the Land Bill unless he had plenty of money to spend in litigation. The Land Leaguers will try and remedy the Bill's defects during its passage. After its enactment we shall use influences for the organization of the League to enable farmers to make the best of its provisions. The complete organization of the tenantry and the power of the League will enable us to overcome many of its defects and make the most of any advantages it offers. The second part of the Bill is more satisfactory and is in accordance with the recommendation of the Land League Committee last year. Parnell remarks: I think the measure on the whole will lead to very remarkable results, if our people maintain their organization and are assisted as up to the present by the sympathy and practical help of America, I trust in a few years it will lead to the abolition of landlordism, and the prosperity of our country. The Irish Catholic bishops meet on Tuesday to consider the land bill, and determine on some course of united action. The importance attached to the subject is considered so great as to allow the calling of a meeting on Tuesday of holy week The meeting is convoked by Archbishop McCabe, and it is assumed that he must have been especially empowered by the Pope. This would indicate that the holy see is determined to throw its influence with the medium section of the hierarchy.

AN ENVOY FROM TUNIS.

PARIS, April 11.—A Tunis correspondent states that an envoy of the Bey was sent to the frontier to investigate the state of affairs and claim retrievement of the frontier by annexing a large slice of French territory.

A ROBBER TRACED UP.

LONDON, April 11.—Frank Kavanagh, recently sentenced to five years penal servitude for swindling at Manchester, is believed to be the man who in 1877 became notorious in connection with the Manhattan Cab robbery. His accomplice, Alice Parks, was sentenced to a year.

AMERICAN.

A DOUBTFUL STORY.

BROOKLYN, April 11.—At a Land League meeting here yesterday, Parnell's mother stated that Gladstone had made overtures to her son and also to herself, saying: "Only let your son pull with us and he will be the saviour of Ireland."

A DOWNWARD COURSE.

CHARLESTON, Sc, April 11.—Ex-Governor and Ex-Congressman Ranier, formerly wealthy, is now working as a common laborer on the streets here. Among a cart load of dirt dumped near him on Friday was a copy of a Congressional record containing a speech by himself on the Civil Rights Bill.

A NEW PARTY.

LITTLE ROCK, April 11.—A division in the Democrat party of this State upon the question of the payment of a portion of the State's indebtedness, has culminated in an attempt to found a new party, which will run a separate ticket at the next election in opposition to the nominees of the Democrats.

THE CHIO SUFFERERS

NEW YORK, April 18.—Thurlow Weed heads the subscription for the sufferers of the Chio earthquake with $500.

THE BUILDING BOOM.

There is more building going on here now than for many years.

THREE SUICIDES.

Frederick Schlamy, aged 51, married two weeks ago, laid down on the floor and strangled himself with a cord; cause, despondency.

Francis Bedell yesterday applied for employment at a boarding house and being refused went secretly into the cellar and hung himself with a chain.

A man giving his name as Jno. Smith, suicided at a hotel here on Saturday night by leaving the gas turned on in his bed-room.

LOSS OF STOCK.

ST. PAUL, April 18.—Despatches from various points in Montana and throughout the grazing region of Yellowstone Valley, show the loss by winter on stock not to be as great as expected.

WASHINGTON SPECIALS.

WASHINGTON, April 11.—The Senate meets to-day with a few votes to spare above a quorum. There is some talk to the effect that the session will expire through absenteeism.

The school population of the United States is stated to be 14,596,183; pupils enrolled, 9,373,195; teachers, 271,144. The school age of this country averages 14 years.

RAVAGES OF SMALL POX.

READING, Pa., April 11.—Small pox is raging in Berks County Almshouse and Insane Hospital, in which 500 men, women and children are confined. Thirty cases and four deaths. The disease was brought there by two tramps.

RESTITUTION.

BALTIMORE, April 11.—In 1873 Nicholson and Whalen were hanged for murdering and robbing an old lady. Whalen left a large share of the plunder in the hands of his brother. The latter, influenced by Moody's preaching, has just made restoration of the original sum with interest.

AFTERNOON DISPATCHES.

THE TUNIS TROUBLES.

PARIS, April 11.—Intelligence from Tunis says that the Bey has decided to refuse to co-operate with the French troops and is determined to act independently on their own side of the frontier. The Bey has sent a protest to the foreign consuls at Tunis accusing France of violating his rights, as well as those of the Porte and friendly powers. The Italian Government declined to accede to a request for the depatch of a squadron to Tunisian waters. It is reported that the Turkish General Hussan, residing in Italy and a widely declared enemy of France, has been invited to come to Tunis. The strength of the marauding tribes is estimated at from 15,000 to 20,000.

£200 FOR A LETTER.

LONDON, April 11.—Hand bills have been circulated offering £200 to anybody bringing to the Social Democratic Club a letter Bismarck wrote to Granville, Foreign Secretary, instructing the Government to prosecute the *Freiheit*, of London.

Arrived out, *City of Richmond.*

A DARING ROBBERY.

LITTLE ROCK, April 11.—A party of masked men yesterday rode into Toledo and half surrounded the court house, others entered the treasury, blew open the safe and stole from $5,000 to $10,000. All escaped.

WASHINGTON SENATE.

WASHINGTON, April 11.—In the Senate the motion for an Executive Session was lost. Davis of West Virginia, and Dawes made remarks tending to show that each side were determined in its course.

SENTENCE OF RUSSIAN ASSASSINS.

ST. PETERSBURG, April 18.—Jellaiboff, in his speech at the trial of the Nihilists on Saturday, asked that his last speech might be published word for word. Sophia Feioffsky asked that she might be dealt with regardless of her sex. The prisoners received their sentences with perfect calmness and indifference.

WASHINGTON, April 11.—Indications: Lakes region, areas of snow, stationary or slight rise in temperature.

NEW YORK, April 11.—Arrived, *Anchoria* from Glasgow,

HALIFAX N. S. April 11th.—Arrived SS, *Parisian.*

A country doctor writes: " am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

Earl Beaconsfiield.

His Condition Critical.

LONDON, NOON, April 11th

Beaconsfield's strength is somewhat diminshed, and his condition is very critical, although the Doctors have not abandoned all hope.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there."

Dr. C. Clay

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

Commercial.

BELLEVILLE MARKETS

INTELLIGENCER OFFICE,
Belleville, April 11, 1881.

WHEAT, FALL—$1.00 to $1.20.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels. and of cleansing the blood, and in this lies the grand secret of the enjoyment of health. Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

NOTICE.

THERE being a vacancy in the Medical Council of Ontario, caused by the resignation of Dr. Irvine, of Wolfe Island, I hereby announce myself as a candidate for election to the Medical Council for Quinte and Cataraqui Division, and respectfully ask the support of members of the profession.

NOTICE.

To Whom it may Concern.

WE, the undersigned, Health Officers of the City of Belleville, under an Act respecting the Public Health, R. S. O., Cap 190, do hereby give NOTICE that all persons resident within the City of Belleville are hereby called on to cleanse their premises and to remove what is so found there, on or before the

First Day of May, 1881.

The undersigned have secured grounds for the deposit of all night soil, and other accumulations injurious to health.

The person appointed by the Board of Health as Scavenger is William Hale, who, with the undersigned will give all information.

Any person who wilfully disobeys or resists any lawful order of the Health Officers, or wilfully obstructs any person acting under the authority or employed in the execution of this Act, will be dealt with as the law directs.

To Cure Consumption,

Bronchial affections, weakness of the lungs, take a small teaspoonful of Dr. Wilson's Pulmonary Cherry Balsam every two hours.

To Cure Coughs Take

Dr. Wilson's Pulmonary Cherry Balsam in small quantities as often as the coughing fit comes on.

To Cure Whooping Cough Take

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After gargling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

J. W. BRAYLEY,
Montreal.

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage, Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late. The winter is approaching, and if you neglect this opportunity you may be obliged to carry your disease until the opening of spring, and then sever your connections with those you love so well.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

By MRS. HARRIET LEWIS.
Author of "The Double Life," "Tressilian Court," &c., &c.

Therefore as they walked side by side, for he had turned back with her, she told him her story, as she had heard it, save and except such portions of it as were derogatory to her mother. She told him of her dreary childhood at the Pig and Thistle under the guardianship of Mrs. Kiggs; of her rescue by Reuben Dennis; of her school life at Clapham; of her father's discovery of her, and of the proofs he had given her in support of his paternal claim upon her.

"My mother and father were separated in my early childhood," she said simply in conclusion, her grey eyes downcast, "and—and there was a divorce. My mother married a titled gentleman, and has other children. It would cause her a great deal of trouble if I were to appear to her, because—because her second husband does not know that she was ever divorced. And of course, my mother would not care for the child of her unhappy first marriage," and Tessa's voice trembled. "I do not know my mother's name, and I shall never see her."

The young Baronet had listened to the narration with breathless interest. Now he said gravely:

"Miss Holm, pardon me if I say I fear that you have acted in this matter with an undue precipitation. I do not regard the proofs advanced by Captain Holm as perfectly conclusive that he is your father. That he knew your history is apparent, but he might know of the scar on your arm and of your early residence at the way-side inn, from Mrs. Kiggs herself. The identity of his name with your own shows that he is your father. Did he show you any certificate of your birth, or of his marriage?"

Tessa shook her head, as the Baronet hesitated.

"Who should claim a poor girl like me without just cause?" she asked. "I know that Captain Holm is my father, Sir Victor. When I first beheld him, I felt instinctively that he was more to me than the stranger he seemed. And when he claimed me, I was obliged to go with him, since Mrs. Gwynne, who is Squire Todhetly's cousin, had ordered me to leave her house, in consequence of the Squire's insult to me."

Sir Victor looked down upon the pure, proud face of Tessa with a tender compassion. His generous heart was touched with her forlorn situation. He profoundly distrusted the father who would take his daughter under the roof of a man who had insulted her, and he wished in his soul that he had the right to protect her always.

your uld find that, in the name of "Re-
takehav e Government had aggrandized
me,' es to this extent: They have seized

"That fact declares itself, Miss Holm," said Sir Victor.

They walked on conversing together, until they reached the gates of the Grange. Tessa, in response to the desire of the young baronet, gave him Dennis' address in Kentish Town, and Sir Victor entered it in his note book. They paused at the gates loth to separate, and talked on various subjects, developing a similarity of tastes and sentiments, and growing every moment more deeply interested in each other.

"I must go," said Sir Victor at last, as the house door opened and Squire Todhetly looked out at the young pair. "I fear that my lingering so long may cause you some annoyance. Good-bye Miss Holm. We shall meet again."

He clasped her hand, and their eyes met. In that long glance, their souls spoke to each other. They had met as friends—they parted as unacknowledged lovers. In that moment Sir Victor Cheswick vowed in his heart to do his best to woo and win this slender grayeyed girl, with the fitful blushes and pale golden hair, and Tessa knew that she regarded him with a tenderness she had never felt before for any human being.

"We shall meet again," repeated Sir Victor, bowing low over her hand. "And till we meet, Miss Tessa, I shall think of you!"

With a passionate pressure of her small hand, he released her, sprang into his saddle and rode away to the eastward. Tessa, leaning on the gate, looked after him with yearning eyes.

She was still standing there when a heavy tread on the gravelled path startled her. She aroused herself from "love's young dream" to encounter the annoyed countenance of her host, who had approached to her side.

"I wonder that Sir Victor Cheswick dared to address you, knowing that you were my guest, Miss Tessa," said Squire Todhetly testily. "I regard his conduct as an impertinence, and shall resent it as such."

Tessa smiled. The Squire had displayed too much cowardice on the previous day to give her much faith in his prowess, or to cause her to tremble for the safety of the gallant young Baronet. Her smile seemed to enrage Todhetly.

"I do believe the fellow's been making love to her," thought the Squire. "He hasn't let the grass grow under his feet, I must say, Holm told me to say nothing for a week or two about love, but I follow the guidance of my own nose, not that of his."

With this resolution he coupled another—that of hurrying forward his lovemaking. It would not do for him at his age to delay in such matters. Besides, it was quite possible that Sir Victor Cheswick loved her and might offer her honorable marriage, and he had not sufficient self-conceit to believe that Tessa would turn from a title, the great wealth of the Cheswicks, and the young and handsome baronet, to accept the fat and not too prepossessing owner of the Grange.

TO BE CONTINUED.

—It is said the Department of Agriculture, Ottawa, will make inquiries into the disease affecting cattle in the vicinity of Ogdensburg and Watertown, N.Y.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestiible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everyhing else has failed. Satisfiy yourself as

COSTELLO'S
SPRING OPENING
Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York
Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

MEDICINE CHEST IN ITSELF
PAIN KILLER
PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL Use

SUBSTITUTES!

The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer**, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer**; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer**, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

THE LEADING
CLOTHING HOUSE

WE beg to notify our numerous patrons and the general public, that we are now in receipt of our

New Spring Stock of Fine Woollens,

Consisting principally of English, Irish, Scotch and Canadian Tweeds, Scotch and Irish Serges, French and English Worsteds, Fine West of England Trouserings, Black and Blue Broadcloths, Black and Blue Venetians, Doeskins, Cassimeres, &c., in all the largest and most complete stock of the kind in Canada.

OUR CLOTHING is, without doubt, quite equal if not superior to the best New York Clothing for style, fit and materials, a proof of which is the large number of First Prizes awarded, as at Toronto, Hamilton and other Exhibitions during the past season.

Gentlemen requiring FINE CLOTHING will find it to their advantage to inspect our Stock before purchasing.

We are this season, in addition to our Large Trade in Fine Ordered Clothing, making a specialty of Low Priced Tweed Suits, which we will make to order at the following prices:—

$12. $13.50, $15, $16.50.

Ayer's
Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

IT is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The VIGOR cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair

The VIGOR is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.

Prepared by Dr. J. C. Ayer & Co.,

CINGALESE
HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity,

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD
HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's **Celebrated Essay** on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of interna medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himsel cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

Daily Intelligencer.

THE EARTHQUAKE AT CHIOS

TERRIBLE FATALITY.

Relief for the Survivors.

The London *Times'* correspondent writes as follows under the date of April 9th regarding the earthquake which has desolated the island of Chcois and killed from 6,000 to 7,000 people, or about one-tenth of the total population :

"The town looks as if it had been terribly bombarded. Hundreds of houses are transformed into shapeless masses of ruins, under which lie unburied an unknown number of victims The majority of the remaining houses are already cracked and roofless, and may fall at any moment. Nearly every building in the town has suffered. The inhabitants wander about anxious to search for missing relatives or lost property, but are afraid to risk their lives in the perilous work of clearing away the rubbish. Many who would willingly expose themselves to danger are prevented by their friends or the police. Fear, grief, and despair are depicted on nearly every face. All have a sad or tragic tale to tell. The first shock was felt on Sunday afternoon at half-past one. Immediately houses began to fall, and wild shrieks were heard on every side. Then followed an awful silence of some minutes. The terrified survivors gradually ventured into the narrow lanes, reached the open spaces, and shortly afterwards another terrific shock completed the devastation. Then it remained quiet until sunset, when the island again began to shake throughout as severely as before. All night the shocks succeeded each other at short intervals, each preceded by dull sounds like subterranean explosions. Since that, frequent shocks have been felt. The old Genoese fortress, containing 400 houses inhabited by Mussulmans and Jews, suffered more than the rest of the town. The ground there sank about half a metre, and nearly all the houses were immediately destroyed. Several hundred persons must have perished. It is known that of about thirty Mussulmen women assembled in one house, not one escaped. The southern part of the island is said to have suffered more than the town. In Chesme many houses are in ruins, and three-fourths in a dangerous condition. The inhabitants are afraid to live even in those uninjured, for every night frequent shocks are felt. Nearly all camp out, and as the weather is fine the hardship in this respect is not great. In Kastro the work of extricating the bodies and attending the wounded is progressing, but the stifling odor in the vicinity of the ruins proves that the former operation is far from complete. On the other hand wonderful escapes occurred. A woman was buried under the ruins for 52 hours, and at last was rescued, having given birth meanwhile to a child."

LONDON, April 10.

The British ship *Thunderer* has arrived at Chios with physicians and a large quantity of provisions.

A correspondent at Chios telegraphs that he has visited the south-estern part of the island and found Menita, a town of 12,000 inhabitants, and the villages of Manastir, Virinos, and Philitia masses of ruins. Not a single house escaped. English and American physicians are assisting the survivors.

A Rough Time.

SUFFERINGS OF SETTLERS IN DAKOTA.

From the Boston Globe.

A story told by Joseph Sterrette, of Big Lake, Dakota, who has just managed to break through the terrible snow blockade in that section of the country, gives only a fair statement of the troubles experienced by the settlers during the severe winter. Mr. Sterrette pre-empted 160 acres of farm land in Big Lake two years ago, and at once moved on it with his family and settled down to work At the end of one year he was in shape for farming, and had a comfortable cabin. He had laid in a quantity of fuel, and prepared for winter, but it proved more severe than he or his neighbors had calculated. In fact Sterrett's better preparation for the rigor of the season turned out to be the only means which prevented himself, family, and several neighbors from starving and freezing to death. In February he found it necessary to rescue the entire families of two neighboring farmers, not so well housed, from perishing by cold, by taking them into his own house. The cold was so bitter and so steady that before the season was half over the fuel which he had gathered to last until spring was all consumed. Then he and the men staying with him went out and took down the fences and out-houses and burned them. The heavy snow fall, which at this time blockaded the railroads, was piled in such drifts about the house where Sterrette and his neighbors were domiciled as to absolutely cut off all communication with the outside world. The mercury fell lower than ever; the winds grew fiercer, and the surrounding snow caked and solidified. At this time the men dug their way—or rather mined it—through the blockade to the railway near by, and dug out ties which they chopped up, took home, and burned to cook their scanty food and save their wives and children from freezing. When the ties and telegraph poles that could be reached were consumed, it was decided to dig through to the cabins of those sheltered in Sterrette's house and break them up for fuel This was done. The bitter cold still continuing, Sterrette's furniture was next sacrificed, even to the bedsteads, trunks, and children's toys. While the cold-imprisoned pioneers were upon this last supply of fuel a consultation was held, and it was decided to make a desperate attempt to drive through the deadly blasts on the crust for relief. John Becker agreed to go. A sleigh was prepared, and with five horses hitched to it, Becker started. It was a terrible undertaking, and when the brave man left there were tears frozen upon his cheeks. Becker persisted in taking a fine shepherd dog. He gave as his reason :—"I don't know what may happen; I would rather bury Carlo in my belly than have him freeze to death." Sterrette and his companions became alarmed when at the end of two days Becker did not return, and they started out for him. They had not gone far when they came across a hole in the drift where Becker had broken through. The man was found curled up in the sleigh frozen dead. His faithful dog was found huddled up against his breast dead. The five horses were standing lifeless on their feet, all frozen stiff. The men carried Becker's body back, made a coffin of the sleigh, nailed the corpse up in it, and then reverently placed it in the corn crib until the weather should permit of its burial. Soon after this, and just as the party was on the point of despair, the weather moderated sufficiently to break the snow blockade, and Sterrette and friends found relief. A neighboring family during this time had no other food than soup made from an ox-pelt which happened to be in the house when the blockade began.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

Mining News.

The following we condense from a late issue of the Montreal *Herald*:—

We have received the following information from Mr. George G. Francis in regard to the progress made at the Canada Consolidated Gold Mines, Marmora :

At the first annual meeting of the company, held at the temporary office 27 Park Place, New York City, in January last, resolutions were passed that the reports and statements of accounts should be printed at the earliest moment for distribution among the shareholders and subscribers to the stock. This, it is expected, will shortly be in the hands of the shareholders. A permanent Board was elected, with Mr. Henry Loveridge, President of the Maryland Coal Company, as President. The company now has offices at No. 5 Cortland Street, and Mr. J. W. Loveridge, has been appointed Secretary and Treasurer.

The company has secured the services of Mr. Henry Ganjot as Superintendent of the mines. Mr. Ganjot is a mining and mechanical engineer, and has had large practical experience An engineer and chemist who has had special training in the treatment arsenical ores, has been appointed Assistant Superintendent to Mr. Gaujot, and sails from England on the 10th ult. for Canada (and has since arrived). He has visited the Great Devon Consol Mines in Devonshire, England, where there are large works for the treatment of arsenical ores. No estimate of profit to be derived from the sale of arsenic, produced as a by-product in the form of arsenious acid, etc., etc., was set forth in the prospectus of the company, although it is expected that it will form no inconsiderable item of profit. Best white powdered arsenic is worth now £10 10s. f. o. b. Falmouth, and nearly if not all the arsenic used on this continent is imported. Mr. Gaujot took charge of the mines and entered upon his duties toward the end of December last. Since then the only shaft which has been worked is the deep shaft. This shaft has been put down since from 145 to 152 feet, and it has been "in good ore" all the time. The first levels in this shaft start at about 70 feet from the surface, and were driven about 45 feet along the lode each way north and south, and about 12 feet each way has been added, making the first level about 114 feet long. The second level starts at 140 feet from the surface, and in December was driven in about 12 feet to 14 feet north and south of the shaft, to which about 10 to 11 feet have been added each way, making the total length of this level from 44 to 50 feet. These levels are driven "all in ore," without signs of either foot or hanging-wall. The mode of working by horse whim and manual labor has of necessity been slow. About 15 men underground and 25 surface hands have been employed. The frames and machinery for the shaft-houses are erecting, and will be finished in the course of two weeks. The sinking of the Tuttle and the other shafts will then be proceeded with, and the Tuttle shaft will be made the main shaft. Air compressors have been contracted for and are expected very shortly. The air-compressors will run 12 of Rands' compressed air drills, 8 of which (there not being room for more as yet) will be put to work. The work of sinking by manual labor is about 10 feet, and drifting about 15 feet a month With the aid of compressors and drills, sinking can be prosecuted at the rate of about 20 feet in the sink and 30 feet in the drift per month. A cross-cut, to intersect the other veins to the west at 140 feet in depth, has been started, and is now in 20 feet. This will also be resumed as soon as the hoisting-machinery and air-drills can be used. On the surface, clearances have been made and the material got ready for the erection of concentrating-works. A great quantity of cord-wood, lumber, and timber has been contracted for, and delivered on the property. A stop-log dam to produce the water-power was made last fall. The old stamp-mill house, with the engines, etc., therein, will be used as a house for the air-compressors, repair-shop, etc., etc., and the new mill house will be at the southern extremity of the Tuttle property. It will be 120x 60 feet, and will contain, when completed, 3 sets of Blake's rock-crushers, 3 sets of Cornish rolls, 5 sets of revolving screens, 14 jigs, drying-furnaces, and 2 calcining-furnaces, and the necessary works for the final extraction of the gold. The whole is calculated to treat from 100 to 125 tons of 2,000 pounds of ore per day.

A Strange Find.

A MAN'S THIGH-BONE IMBEDDED IN A SOLID TREE—A MYSTERY THAT IS UNEXPLAINED.

[*Bellefontaine O.; Despatch Cincinnati Enquirer.*]

"Truth is stranger than fiction." Who can gainsay it ? Of all the strange happenings of this busy world, or of all the fantastic stories emanating from the brain of man, there is nothing that cannot be matched by the accidental discoveries of every-day life. The oddest place of sepulture for the bones of a human being probably ever conceived has just been discovered near Spring Hills, in Champaign County, near the line of this county. The facts are briefly as follows :—A party of men, consisting of Henry Sefler and others, cut down a large ash tree. It made two saw logs, each fourteen feet long. The logs are now in Walker's mill yard here, On the top of these, thirty feet from the ground imbedded in the solid timber, and looking from the rings around it as if it had been there for ages, was found the thigh-bone of an adult human being, presumably a man's. Let it be borne in mind that this bone was in a solid log, thought too short for a saw-log ; that the timber around it was green; no knot-holes or dead wood. How did it get there ? When discovered one of the men struck into it with the bit of an axe. The axe broke, and the piece is still firmly imbedded in the bone. Of course speculation is rife as to this mysterious circumstance, and rumours of a murder committed many years ago, where all the parts of the body were discovesed but the head and one thigh bone, are afloat. Be that as it may, the facts are vouched for on unimpeachable testimony, and the bone speaks for itself. This neighborhood has something of a reputation for occurrences of this kind, several years ago a live frog being liberated from the heart of a large growing tree.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, aroused the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS

Mothers ! Mothers !! Mothers !!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth ? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

TESTIMONIALS TO
MITCHELL'S CANADIAN
HAIR RESTORER.

TO THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.
MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.
MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

Daily Intelligencer.

BELLEVILLE, TUESDAY, APRIL 12.

Representation of Minorities.

Before Mr. Blake assumed office in the Mackenzie Government he made a speech at Aurora, in which he gave expression to his crude ideas of representation of minorities, but when he obtained power he said nothing on the subject. Like most Radicals of his class, he is blatant for reforms and changes, when out of office, but so soon as the goal of ambition is reached he becomes mild and docile and accepts things as he finds them as readily and with as much complacency as the most antiquated Tory. He is now out of power forming a "Reform party with something to reform," hence we have the old song sung to the same old tune. It was resurrected at the Montreal banquet, and the members of the "Young Men's Reform Club" asked to make it a plank in their platform at the coming contest, in addition to the Treaty-Making Power plank, *alias* Independence. Let us see what the leading organ of the party thought of this hobby of the great Chancery lawyer who now leads the Reform party, and what it thinks now will only be known when it gets permission to speak from the leader aforesaid. When Mr. Devlin mooted the question of the representation of minorities in the Commons, the organ-in-chief, then under the control of the late Hon. George Brown, denounced it in the following language :

> Represent minorities in Parliament and you must necessarily have a proportionate number of the parliamentary minority in the Cabinet, and in any Department of the Executive. No doubt Mr. Goldwin Smith would rejoice in this as the very ideal of perfection, but all British experience of the plan has led to the conclusion that it is the fertile parent of all manner of unworthy compromises, and that as it is based on a fallacy so it can only issue in disappointment to those who believe in its virtue, and to palpable and widespread corruption among all who surrender themselves to its influence, and try to carry out its principles to their legitimate result.

What has the *Globe* to say now upon the subject? Before asking that question it might be better to ask why the *Globe* has not published the full text of the great man's speech? Was it afraid of its effect upon the people of Ontario? The wild, crude, anti-British theories propounded were no doubt too much even for its editorial columns. A contemporary is right when it says :—"According to the *Globe*, "then, Mr. Blake is advocating a principle "which is the 'parent of immoral com-"promises'—a principle which can only "issue in 'palpable and widespread cor-"ruption!' Organ and leader are at logger-"heads here."

Those Dismissals and Appointments.

The Ontario Government allege that one of the reasons for Sheriff Taylor's dismissal was that he had not for some years personally discharged the duties of his office. "Too thin," altogether. Mr. Taylor held office for upwards of nine years under Reform Governments in Ontario, and for a long time was unfit, owing to ill health, to perform the duties of his office, yet no intimation was ever given him that his course was objectionable. His Deputy performed the duties admirably—so much so as to have caused Mr. Mowat to compliment him privately at a dinner given here a few years ago; and yet this practice, which the Government condoned for upwards of nine years, they now allege as a reason for turning an official out of office! Had the Sheriff been remonstrated with, or warned against continuing to do as he had done—had the business of the office been in any respect unsatisfactorily conducted—the excuse offered on behalf of the Government would have had some reason in it. As it is, the excuse is in reality worse than none, because it is utterly insufficient and palpably untrue, Were every official under the Ontario Government whose duties are discharged by his deputy to be dismissed, there would be a good many offices made vacant.

A lawyer who had been deprived of his legal standing by the Law Society of Ontario for misuse of his clients' moneys, was recently appointed by Mr. Mowat's Government to the position of Registrar in a south-western county. Sheriff Taylor, because certain immoralities, of which he was not cognizant, occurred in the gaol, has been dismissed from his position. It is sufficient to say in explanation that the lawyer was a Grit and the Sheriff a Conservative, in order to account for the extraordinary views of morality which are taken by the Ontario Government. That in the Grit's but a venial fault, which in the Tory is rank villainy. Such is "Reform" in Ontario in these days.

Farmers and Mechanics.

If you wish to avoid great danger and thible, besides a no small bill of expense, at pronfason of the year, you should take hold. steps to keep disease from your house-purified. system should be cleansed, blood prevent anaach and bowels regulated, and malaria. Wee diseases arising from Spring perfectly and suw of nothing that will so ters, and at the tr.do this as Electric Bittle.—*Exch.*—Sole cost of fifty cents a bottle. ll druggists.

Disgraceful.

The *Globe*, in its issue of Monday, makes a lumbering, awkward and essentially untruthful attempt to palliate its recent venomous attack on Sir Charles Tupper and at the same time seeks to deceive those who had not read the vicious article referred to. It professes to have been merely making an enquiry as to the health of Sir Charles, and expresses surprise that the Conservative press should have regarded such an enquiry as a fit subject for reprehension. This is but to magnify the offence of which the organ was in the first instance guilty, and which has been commented upon in terms of severity by the Montreal organ of the Grit party, as well as by the Conservative press; but the assumption of innocence will deceive no one. If to insinuate that a leading member of the Government has been feigning illness, in order to secure the carrying out of jobs; if to indirectly charge that he is engaged in some scheme in England which necessitates his remaining there incognito or in concealment; if to leave it to be imagined that he is assisting a great corporation in opposition to the interests of the people whom he serves; and finally if to prompt its readers to believe that he has committed some offence which will drive him from his high position, be to inquire innocently, and in a style which calls for no comment, after the health of a political opponent, then the *Globe* did so in the case of Sir Charles Tupper.

The venom which inspired the first attack manifests itself in the *Globe's* apparent palliation, as in referring to the comments of the press upon its "innocent" enquiry, it repeats the offence in as mean and dastardly a manner as it is possible to conceive. It says :

> One would be almost inclined to suppose that the Conservatives believe that something which he wishes to conceal even more than his illness caused the Minister to visit London. But they all say that he is desperately ill.
>
> * * * * *
>
> How and where Sir Charles is are conundrums that we will not attempt to answer at present. Sometimes a very active man is said to be "every where at the same time," and perhaps Sir Charles is so much better that he can now be in two places at once. That explanation is the only one consistent with the despatches of Saturday. They agree, however, that he is recovering, and we may therefore indulge a hope that he will soon resume the duties of his office as prophesied by the *Mail*.

This is disgraceful in the extreme. Sir Charles is in Ireland at the residence of his son-in-law, happily recovering from the illness which was induced by overwork in connection with public affairs, and in due time he will doubtless reply to the tender inquiries of Mr. Gordon Brown, and again apply to him the lash of which he had a taste a few weeks ago, and under which he still writhes, whilst reviling the gentleman who applied it so deservedly and so effectually. We trust that Sir Charles will not forget to kiss the blarney stone, so that when the proper time arrives he will be all the better fitted to dress down the slanderer as he deserves.

Iron Bridge Revenue Frauds.

The Ottawa *Citizen* says in its issue of 11th inst. :—"On Friday last we published an article from the *Monetary Times* on the manner in which our revenue had been defrauded by Clarke, Reeves & Co., an American firm, connected with their importation of material for the construction of the Chaudiere Bridge. Our contemporary expresses the hope that "the Minister of Customs will take steps to recover the sums out of which the country has been defrauded." We are glad to be able to inform our contemporary that such steps have been taken, and up to the present time with the following result :

Extra duty collected at one port (Clifton) on iron bridge material imported by the firm above named—

Invoice No. 1	$3,395 00
" " 2	2,539 75
" " 3	2,960 00
" " 4	2,424 75

Making a total of duty collected on four invoices on amended entries $11,319.50.

"The *Monetary Times* may rest assured that the Minister of Customs will spare no effort in the matter of protecting the revenue against the tricks of those who conspire to defraud it." By and by, those who attempt to defraud the revenue by making use of false invoices in entering their wares, will realize that the Customs Department no longer winks at practices of that kind. Manufacturers in Canada and their workmen will benefit by the efficient administration of the law, and honest importers will thus find dishonest competition stamped out. Every Canadian ought to rejoice at the fact that "slaughtering" is being put down with so firm a hand.

Marine Notes.

Necessary repairs are being made on the vessels here, but canvas will not be bent for several days yet, as it is not expected that the bay will be open before the end of the week.

DESERONTO, April 9. — The schooners *Proctor*, *St. Clair*, *Ontario*, and *Empress*, have been brought from their winter moorlings into the docks. The *Empress* is sunk to the rail, and is now aground in the harbor. The steamers *Armenia*, *Desoronto*, *Pilgrim*, and tug *Sherwood* were to-day inspected and tested by Inspector Taylor, and were quite satisfactory. The several steamers belonging to the Desoronto Navigation Company will be launched on Monday, and placed on the different routes this coming week. The schooner *Peerless* has been thoroughly overhauled, and will be fitted out in a few days. About fifteen hundred dollars have been expended on her this winter, which makes her an A 1 vessel. The bay here will be entirely free from ice in a few more days.

Mrs. Mary Harrington, Kouchibouguoc, N. B., says : "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

"Hail bounteous, beauteous, gladsome Spring" — this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

CITY COUNCIL.

An adjourned meeting of the Council was held last evening.

PRESENT—His Worship the Mayor; Ald. Campion, Clarke, Costello, Dickson, Diamond, Dunnet, Durand, Frost, Henderson, Holden, Jellett, Lingham, McIninch, Ostrom, Petrie, Starling, Smith, Vandusen.

COMMUNICATIONS, &C.

The following were presented and read:—From Flint & Holton, asking that action with respect to the location of the ferry-slip be delayed, as they had a proposition to make regarding that question.

From Shelby, Pullman & Hamilton, asking for a free license and free use of the Agricultural Grounds for their show to be held there on the 30th inst.

A number of accounts were presented.

A lengthy and exhaustive discussion arose on the important point as to whether or not the petition of Shelby, Pullman & Hamilton would be considered at once or if it should be submitted to a committee. It was finally agreed to refer it to the Finance Committee.

The other petition and the accounts were referred to their appropriate committees.

REPORTS.

The special Committee appointed to consider the question of removing the police cells, police court, fire station, &c., reported, stating that they considered such removal desirable, and asking further time to report, in order that they may come to a conclusion with regard to a site for the proposed building.

INQUIRIES.

Ald Jellett asked whether the Clerk had received a statement from the Treasurer of the lands which had been sold for taxes during the years from 1873 to 1878, inclusive, in accordance with a motion to that effect passed in the Council several months ago.

The Clerk answered in the negative, the reason being that the Treasurer had asked for further time to report, in consequence of the difficulty of collecting such statistics.

Ald. Vandusen asked Ald. Jellett if the estimates for the present year would be brought down by the 1st of May, in accordance with the resolution passed to that effect.

Ald. Jellett said he hoped to be able to do so.

A communication was read from H. B. Rathbun & Son, offering one of their lots north of the Campbell elevator, for a ferry slip, in exchange for the present ferry slip.

Ald. Campion inquired whether the G. J. R. Company were liable for running their trains too fast through the city.

The Solicitor not being present, the Mayor said that he had no doubt the Company were liable for violating the conditions under which they were allowed to place their line on Pinnacle Street.

Ald. Costello asked whether any negotiations were going on with reference to the establishment of new industries in the city.

Ald. Dickson, Chairman of the Industrial Committee, said that negotiations were going on, but it was not wise at present to make a public statement regarding them.

Ald. Ostrom asked whether the Chairman of Harbor and City Property knew anything about the intention of Rathbun & Son, to purchase Mill Island.

Ald. Petrie said he had heard of no such intention on the part of those gentlemen.

NOTICES.

Ald. Petrie gave notice of a By-law to amend the Dog By-law.

Ald. Ostrom, gave notice of a motion to the effect that the Solicitor be instructed to notify the G. T. R. authorities to open up Grier and St. Charles streets, in Colman Ward.

Ald. Ostrom gave notice of a motion for the appropriation of $500 towards the construction of a new bridge over the Moira at the end of College St.

MOTIONS

Ald. Jellett moved that the Treasurer be again requested to furnish returns of the sale of lands for taxes during the year already mentioned.—Carried.

Ald. Jellett moved, seconded by Ald. Costello, that, inasmuch as the approach of the ferry is dangerous on account of the G. J. R. sidings on Pinnacle st., the street be put in a safer condision by the removal of the sidings so as to prevent car-shunting on them, and by further improvements on that street such as will facilitate trade between the city and Prince Edward County.

Ald. Holden thought that the only way to facilitate trade with Prince Edward was to remove the ferry slip from its present site. He did not believe in interfering with the business of Messrs. Downey & Preston, who had spent some $400,000 in the purchase of grain last year.

Ald. Dickson did not believe in extending to Downey & Preston privileges which would be disadvantageous to the rest of the community. Besides, the improvements suggested in Pinnacle St. would not interfere with Downey & Preston's business for at least several months. He claimed that the G.J.R. Company had no right to lay down more than one track on any street in Belleville. If they laid down sidings on our streets they were liable to be indicted as a nuisance.

Ald Henderson thought the city was bound to furnish to the lessee of the ferry a proper landing. The question had two aspects—the interest of the lessee of the ferry, and the possibility of accidents. He thought it possible to harmonize both aspects of the question, and suggested that the obnoxious siding be removed until Messrs. Downey & Preston's business would require its use in the fall. He thought it wrong to discourage such a large firm as that of Downey & Preston; but at the same time it was still more dangerous to do anything that would be detrimental to the trade between the City and Prince Edward.

Ald. Dickson pointed out that the siding which had been put down ostensibly for the purpose of facilitating the unloading of wood at Monaghan's wood yard was not being used for that purpose, but as a switch for Grand Junction trains. The same might be said with reference to the siding near Downey & Preston's warehouse.

Ald. Diamond said there was very little grain going to the elevators during the summer. At any rate the amount was so small that it could be brought into the city by teams—and it was more to the interest of the city that it should so be brought in than that it should be brought here by rail.

Ald. Costello pointed out that Capt. Jellett asked the removal of only one track on Pinnacle St. The demand was modest and should be complied with. He claimed that the Grand Junction Railway and the grain-buyers had been detrimental instead of beneficial to the city, and he did not think that the interests of either one or the other should be very carefully looked after by the city.

Ald. Jellett's motion was then put and carried.

Ald. Petrie moved, seconded by Ald. Clarke, that the City Clerk be instructed to furnish the Council with a statement of moneys received for licenses for all shows and entertainments during the year 1876.

The motion was allowed to stand as a notice.

BY-LAWS.

Council went into Committee on By-laws, Ald St. Charles in the chair.

The By-law appointing Pound-Keepers was amended by the appointment of John Grotto as Pound-keeper for Murney ward in place of Lewis Marlowe.

WAYS AND MEANS.

Council went into Committee on Ways and means, Ald. Holden in the chair.

The Finance Committee's report was taken up.

A discussion arose as to the non-advisability of remitting the taxes of Daniel Foster, which was recommended by the Committee.

Ald Diamond moved that the Collector be instructed not to proceed further with execution against Mr. Foster, but that the taxes be charged against the land.—Carried.

The petition of Hugh Walker, asking for the reduction of the assessment on a lot on which a house stood which had been destroyed by fire, and for the rectification of certain errors in his assessment, was considered. The Finance Committee recommended that the petition be not entertained.

Ald. Diamond moved that the petition be referred back to the Committee for reconsideration.

Several aldermen explained that the reason why the Committee had taken the action which it had was that the Solicitor had given his opinion that the assessment roll could not be altered after having been placed in the Collector's hands.

The motion was carried.

With reference to the petition of the Principal of the Deaf and Dumb Institute asking for payment of an account for boots and shoes furnished to inmates of the Institute (which the committee recommended should not be entertained),

Ald. Frost said he thought it would be disgraceful for the city to refuse to pay the account. The inmates of the Institute for which the articles had been procured were those whose parents lived in the city, and the city was responsible for the payment of the account according to agreement.

Ald. Diamond said that articles were mentioned in the account which were furnished for inmates who belonged to the county, not to the city. He objected to any institution incurring whatever amount of expense they may see fit and sending in the bills to the city for payment.

The Mayor urged the payment of the account. He said that Belleville was the only municipality which had ever demurred to the payment of bills for clothing furnished to its own inmates in the Institution.

Ald. Frost moved in amendment to the report, that the account be paid,—Carried.

The remainder of the report was passed.

The Ferry Committee's report was considered.

The clause of the report recommending that the location of the ferry slip be removed from its present site to the slip already constructed at the foot of Dundas St. was referred back to the Committee for further consideration.

Ald. Costello moved that Mr. J. D. Evans be engaged to make an examination of the harbor from the present ferry slip to the ferry slip at the foot of Dundas St., and report as to the probable expense of dredging that locality to a sufficient depth—he to be paid $12 for his services.

Ald. Costello said he had gone over the harbor recently in company with the Harbor Master, and had found that the channel leading to the new ferry slip had a rock bottom, and boulders were also found in the channel. The depth of water in the channel was only four feet.

The Chairman said that instead of costing $1,000 for the dredging of the channel, it would probably cost $50,000, as two feet would have to be blasted in the solid rock.

Ald. Clarke ridiculed this idea. He said it would cost a comparatively small amount to dredge a channel to the depth required.

The motion was carried.

The report of the Public Works Committee was passed.

The Poor and Sanitary Committee's report was taken up. The report recommended that the proposition of the Woman's Christian Association, to take sole charge of the city's poor in consideration of a periodical grant made them by the city for that purpose, be not entertained.

Ald. Ostrom, Chairman of the P. & S. Committee, spoke strongly and at length in favor of adopting the system proposed by the W. C. A.

Ald. Frost said the Council could at least give the proposed system a trial. If it did not work well we could go back to the old system.

Ald. Diamond claimed the Council had no right to grant money to irresponsible parties for purposes of expenditure.

Ald. Dunnet moved in amendment that the Chairman of the Poor and Sanitary Committee be authorized to expend $25 a week for four weeks on the recommendation of the Women's Christian Association, on condition that the Association take sole charge of the poor of the city during that time.

Ald. Durand thought that the names of those who receive charity from the city should be published.

Ald. Diamond moved that the amendment be amended to the effect that the Poor and Sanitary Committee co-operate with the chairman in the disbursement of the amount mentioned.—Carried.

The report of the Special Committee was adopted.

Ald. Lingham moved that the freight on the road scraper recently procured for the city on trial, be paid.—Carried.

The Committee rose and reported.

Ald. Jellett moved that the report be referred back for the purpose of adopting the report of the Finance Committee as originally presented. Ald. Jellett's purpose in moving this resolution was to negative the amendment to the clause in reference to Daniel Foster's petition, which had been carried.

The motion was carried.

Council went back into Committee of Ways and Means, Ald. Costello in the chair.

Ald. Jellett moved that the amendment to the clause in question be struck out.—Carried.

Committee rose and reported.

Ald. Jellett moved that the report be adopted as regards the clause in question.—Carried.

The yeas and nays were called, with the following result :—

YEAS — Ald. Clarke, Costello, Dunnet, Durand, Frost, Holden, Jellett, Ostrom, Smith, Vandusen—10.

NAYS—Ald. Campion, Diamond, McIninch, Petrie—4.

Ald. Diamond moved that the report be referred back for the purpose of reconsidering the clause in reference to the payment of the account from the Deaf and Dumb Institute.—Lost.

YEAS—Campion, Diamond, Dunnet, Durand, McIninch, Ostrom—6.

NAYS—Clarke, Costello, Frost, Holden, Jellett, Petrie, Smith, Vandusen—8.

A motion of Ald. Dunnet's for referring the report back to reconsider the resolution with reference to the relations between the Poor and Sanitary Committee and the W. C. Association was also negatived.

Ald. Petrie having announced that Mr. Jonathan Spry had been waiting all night to address the Council on the subject of his taxes, a number of Aldermen left the Chamber, thus leaving the Council without a quorum. They were, however, recalled, and were severely reprimanded by Ald. Jellett for showing such disrespect to the Mayor as to leave the Chamber without permission while the Council was in session.

Mr. Spry then addressed the Council on the subject of his grievances, answering questions put to him on various subjects. After the whole internal economy of his domestic life had been fully ventilated, Mr. Spry was advised to present a petition to the Council and set forth his requests more accurately.

The Council then adjourned, at 12:15.

Proclamation by the President.

Fault-finding is so seldom indulged in by those who use medicines manufactured by the World's Dispensary Medical Association, that the President of that corporation the Hon. R. V. Pierce, M. D., has issued a special request or proclamation to any and all persons, if there be such, who may have taken or shall hereafter use any of the family medicines made and sold by the said Association, in all countries of the world, and who have not derived full benifit from said medicines, that if they will write the said Association a description of their maladies the Faculty of the Dispensary will advise them with respect to the successful treatment of their diseases. Dr. Pierce's Golden Medical Discovery is gauranteed to cure all humors, from the common blotch, pimple or eruption, to the worst scrofula or king's evil, and those virulent poisons that lurk in the system as a sexuel or secondary affection resulting from badly treated or neglected primary diseases. It also cures bronchial, throat and lung diseases. Favorite Prescription is guaranteed to cure female weaknesses and kindred affections. Extract of Smart-Weed cures bowel affections, colds, and all painful rheumatic and neuralgic affections. Dr. Pierce's Pellets (little sugar-coated pills), are the little giant cathartic. Address, Waild's Dispensary Medical Associatlon, Buffalo, N. Y., or Great Russel Street Buildings, London, England.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4eod&w1y

THE ONTARIO AND QUEBEC.—Mr. Hugh D. Lumsdon, of the Ontario and Quebec Railway staff, was in Peterborough over Sunday. He is again going over the line from Toronto to Ottawa, in order to fully acquaint himself with the proposed route, so as to be able to give a thorough report on the 26th inst.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

'THEY ALL DO IT.' — Every body uses "Teaberry," the now toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

S. E. BURWELL, of Fingal, Ont., writes :—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

Belleville, April 6, 1881. 325d&wtf

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for simliar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

TO LET—The store on the east side of Front Street next the Bank of Commerce, lately occupied by Bartman & Sintzel.

Daily Intelligencer.

BELLEVILLE, TUESDAY, APRIL 12.

5 O'CLOCK EDITION.

City and Vicinity.

WORK was commend in the Eagle saw mill yesterday.

THE Water Works question did not come up last night at the City Council.

ALD. JELLETT has promised that the estimates for 1881 will be brought down in May.

THE fresh batch of children for the Marchmont Home arrive here to-morrow evening.

JOHN GROTTO has been appointed Poundkeeper for Murney Ward, in place of Lewis Marlowe.

THE site of the ferry slip has not yet been determined upon, and is likely to prove a vexed question.

MESSRS. FLINT & HOLTON have a proposition to make with regard to the location of the ferry slip.

A CONSIDERABLE number of pike have been speared on their way up the river to their spawning grounds.

THE *Globe* ought to know better than to speak of the *Atlanta*, now being built here to compete for the *America* cup, as a "steam" yacht.

N. SPRAGUE, Reeve of Sophiasburg, was on Monday elected Warden of Prince Edward, in place of J. H. Knox, unseated on a writ of *quo warranto*.

COOL BURGESS and his "Sleighing Party" appear at the Metropolitan Hall this evening. If press notices can be relied on they are well worth going to see.

ABOUT fifteen men and two hundred spectators have been engaged for three days in moving the old house which formerly stood in rear of the Custom House—and it has not yet reached its destination.

"A large number of seats have been secured for Litta."—*London Advertiser*. Why so many for Litta? The other ladies of her company would require two or three each, but one average-sized seat would do for her.

WE hereby tender our respectful thanks to the cart-horse that fell down in front of this office yesterday afternoon while hauling a cartful of coal. He did not succeed in creating as great a sensation as he expected, but our reporter appreciated his intentions.

A MOST remarkable fact will be revealed by the present census. As yet, not more than a dozen unmarried females have been found in Belleville who are more than 25 years of age. The question arises, where have they all gone to? Has there been an exodus of antiquated maidens?

WEATHER PROBABILITIES. — Toronto, April 12.—Lakes, fresh to brisk winds, mostly between east and north; fair to cloudy cool weather, possibly showers of rain or snow in the southern portion.

THE FIRST OF THE SEASON.—The first charter of a vessel this season, in Belleville, was made yesterday by Mr. Chas. Dixon, who chartered the schooner *J. N. Carter* to carry cut-stone from Ox Point to Toronto.

INQUEST.—The result of the inquest which was held last evening on the death of the old man Weller Johnson on Saturday morning, was, that the jury brought in a verdict of accidental death, and exonerated the G. T. R. authorities from all blame.

THE SYNDICATE.—A London despatch to the *Globe* states that the members of the Syndicate, Donald A. Smith, George Stephen, R. B. Angus, and Mr. Abbott will sail from Liverpool for Canada on Thursday. Mr. Duncan McIntyre will remain in England for the present.

PRESBYTERIANISM. — The *News* says: "The Presbytery of Kingston will meet in the John Street Church, Belleville, on Tuesday, July 5th. The Synod of Toronto and Kingston will meet at Bowmanville on Tuesday, the 3rd of May, while the General Assembly will meet in Kingston on the 7th of June."

POLICE COURT.—The charge of perjury brought by Pat McCambridge against C. A. Tompkins was settled yesterday afternoon, the Magistrate dismissing the case.—This morning James Johnson was fined $2.00 for drunkenness, and two boys named Johnson and Hill were convicted of stealing carpet rags from a Mrs. Brickman. They were remanded till this afternoon for sentence.

THE GOVERNMENT BUILDING.—Mr. R. Windeyer, Government architect, was in the city to-day inspecting the site of the future Government building and learning the requirements of the different Government offices which are to occupy it. Mr. Windeyer informed an INTELLIGENCER reporter this morning that the building would not be set in from Bridge and Pinnacle Sts., but would be erected close up to the sidewalks, ample space being left to the east in order to form a lane for the passage of carts. The building, he said, would be 60 × 80 feet, would front on Bridge St., and would probably be built of red brick with heavy cut stone ornaments. He declined to give any further information, as he had not yet come to any conclusion himself on various points of interest.

SAD NEWS CONFIRMED.—News by the English mail confirms the sad intelligence that three of the famous Kennedy family perished at Nice. They were James, aged 25, who made a tour through Canada five years ago; Kate, aged 16, and Lizzie, aged 18 years. These three, accompanied by their father, had arranged to make a tour of Canada this fall. The family were well known to all Scotchmen, and the sad fate of these three will cause profound regret.

MIKE MALONEY ON THE SITUATION.

Och! Parnell is the frind iv our bould Oirish nation,
And for Oirishmen's rights he foights faithful an' thrue;
But Christopher Fraser—that man iv hoigh station—
Loves the Oirish as well, an he shows his love too!
Oh, counthrymen dear, lave yer sellin'an'buyin';
Come here, and in lovely fat offices see
Grainger, Murphy, an' Lally, an' bould Pat O'Brien:
An' if they are favored, why not you an' me?

JOHN ST. CHURCH.—Yesterday afternoon Rev. Mr. Torrance, of Peterborough, gave an interesting Bible Reading on the Blood of Cleansing in the above church. There was a large gathering in the evening, when Mr. Torrance gave an address upon the Brazen Serpent in the Wilderness. The rev. gentleman is an interesting and earnest speaker. Mr. Torrance, we learn, will give another Bible Reading this afternoon, and at the evening meeting to be held at 7:45 o'clock will describe the work of the Lord which has been going on this winter in Peterborough. A cordial invitation is extended to all to be present.

THE POOR SYSTEM.—As will be seen by our report of the proceedings at the City Council last night, the proposition of the Women's Christian Association was not entertained, but a sort of compromise was effected. It will be remembered that the Association proposed that a certain periodical grant be made to them, to be expended by them as they deemed best. It was resolved last night that a weekly grant of $25 be made for four weeks, to be expended by the Poor and Sanitary Committee under the direction of the W. C. Association. It is yet to be learned whether the Association will accept these conditions.

NEW INDUSTRIES.—At the City Council last evening Ald. Dickson announced that negotiations were being carried on between the Industrial Committee and manufacturers in distant places with a view to having new industries established in Belleville, but that it would not, in his opinion, be wise to make such negotiations public. Though the public would like to be acquainted with the nature of the negotiations, still it is gratifying to know that something is being done in that direction. It is, however, not very creditable to the "solid men" of Belleville that all help must be sought for outside when they are so well able to furnish it themselves, to far better advantage to the city and doubtless with profit to themselves, if they could summon up a spirit of enterprise and energy.

FIRES.—On Monday the 11th, the house and barn of Hiram Ashley, near Foxboro, were completely destroyed by fire. The chimney caught fire, and the sparks falling on the roof set fire to it. The flames spread so rapidly that all hope of saving the building was abandoned, and it was with difficulty that any of the contents were got out. Only a portion of the furniture was saved. —Another fire occurred on Saturday last in the 3rd concession of Huntingdon. Mr. Shaw had just purchased a house in that township from Mr. J. Brown, and was moving into it, when some loose straw in the back part house was ignited by sparks from the chimney. The fire was not observed in time, and very quickly the whole house was in flames, and was almost entirely destroyed. It is not learned whether there was any insurance in either of these cases.

THE PHOTOMETER. — This instrument which is used for testing the strength and quality of gas, arrived at Belleville severa weeks ago, but was allowed to remain at the G. T. R. Station until the arrival of a Government officer to set it up. Last week Mr. Wright, Government Inspector of Gas and Weights and Measures apparatus, arrived in town, and the Photometer has been set up, under his superintendence, in the office of the Inspector of Weights and Measures. Mr. Wright is remaining in town in order to instruct Mr. Johnson, the Inspector, in the working of the complicated apparatus connected with the Photometer. This morning an INTELLIGENCER reporter called at the office for the purpose of examining the apparatus, and was received by Mr. Wright, who cheerfully consented to explain the method of ascertaining the strength and quality of gas by means of the instrument—or rather series of instruments. The instruments are placed in a little recess which is made dark at pleasure by drawing a heavy curtain so as to exclude the light. It is, however, only necessary to darken the recess when the experiments for ascertaining the candle-power of gas are going on. This is ascertained in the following way: A powerful gas-jet—an Argent burner—is placed at one end of a beam marked with a graduated scale, and a pair of sperm candles at the other end. The light from these strikes on each side of a sort of box-shaped instrument which moves along the beam. The interior of this is so arranged that when it moves towards the gas-jet and from the candles the shadow of a star-shaped figure appears on a disc on the opposite side; when moved in the other direction the star appears on a disc on the other side. When the figure appears on both discs with equal plainness the power of the jet and the candles is equal, and the position of the instrument on the beam, being indicated by the graduated scale, shows the amount of candle-power contained in the jet. It is impossible, however, to give, in to-day's issue, a full account of the working of the instrument. We will probably describe it with more detail to-morrow.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

News Condensed.

—The steamer *Parisian* arrived out on Sunday.

—Mr. Lyman Perkins, one of the pioneers of the Ottawa section, is dead. He was 81 years of age.

—Rev. Dr. Vincent of New York, the great Sabbath School worker, preached in Toronto on Sunday.

—Petitions in favor of the Canada Temperance Act are now in circulation in Carleton and Russell counties.

—Eight men were on the ice at Montreal when it broke up on the 11th. They escaped to shore with some difficulty.

—The Wesleyan Thanksgiving Fund has now reached a total of £296,637, of which amount £194,740 has actually been paid.

—The agricultural works of Abraham Eyres, near Richmond Hill, were destroyed by fire on the 11th. Loss $11,000. No insurance.

—Mr. James Slater, of London, is in correspondence with the Wingham authorities in reference to starting a cotton factory there.

—Sir Wilfred Lawson, M. P., speaking at Bath, said that one hundred and twenty-two millions sterling was spent in drink last year

—A new railway bridge, 1,100 feet long, has been constructed at Woodstock, N. B., although only commenced three months ago.

—A St. Petersburgh despatch says that the Princess of Wales has left for home. The Duchess of Edinburg will remain a few days longer.

—Mr. Forbes, the artist, will leave shortly for Europe, where he will reproduce "The Wreck of the Hibernia," recently destroyed at Ottawa by fire.

—Taxes are to be paid in Toronto on the instalment plain; the first instalment on the 25th of June, the second on the 25th of August, and the third on the 4th of October.

—A private cablegram states that Sir A. T. Galt left for Paris on Saturday to watch the interests of Canada in the new commercial negotiations between France and England.

—Twelve car loads of fat cattle were shipped from Toronto to Montreal on Saturday last. It is expected that at least sixty car loads of cattle will be sent from that section to Montreal this week.

—A memorial to William Tyndale the martyr and translator of the New Testament, is to be erected on the Thames Embankment in London. It is to take the form of a statue which is to cost $20,000.

—It is stated on receipt of the report from New York that the Fenian skirmishers were about making arrangements for the murder of Mr. Gladstone, the police took precautions in the district where Mr. Gladstone is staying.

—The work of changing the gauge on the New Brunswick Railway is to be commenced this month, and will be hurried to completion with all possible speed. Five new locomotives have been purchased from the Intercolonial.

—A scheme is afloat to reclaim the immense swamps known as the Florida everglades, which comprise some thirteen thousand square miles. The projectors claim that the work is quite possible, and can be made to pay handsomely, which is the one thing necessary.

—On Sunday morning, about half-past nine o'clock, as a freight train was pulling out, at Springfield, Ont., Albert, son of J. Hoover, aged 8 years, was endeavoring so get on the cars whilst in motion. He slipped and both legs were cut off below the knees. He died about 2 o'clock in the afternoon.

Trenton Correspondence.

TRENTON, April 11.

The river is almost entirely clear of ice, except a few large pieces, and the bay is open to a point about half a mile below the mill.

Mr. Randall Cronk, of Sidney, who was so seriously injured a few days since by a fall in his barn, is rapidly recovering from his injuries.

The Bell Telephone Co. have recently taken out all the telephones which they had in operation here, and replaced them with a new kind, which give much more satisfaction than the old ones.

Mr. G. A. White, hardware merchant, of this place, has retired from business, having sold out his interest to a party from Kingston.

It has been ascertained that the pier of the new iron bridge is as yet perfectly level, so that the sinking of one end of the bridge cannot be accounted for.

Canterbury Hall is fast aproaching completion, the finishing of the interior being now about half done.

The lots where the old Presbyterian church stood have been advertised for sale. The new church will soon be finished inside, and the frame-work of the spire is now being completed.

Quite an improvement has been made in the appearance of Toronto Street by the repainting of the front of Austin & Hilton's block, and several other stores.

The sugar social in the basement of the M. E. Church on Friday last was largely attended, and the receipts netted above the average.

Messrs. Gilmour & Co. intend starting their mill about the first of next month. A large amount of new machinery is arriving constantly for the new addition to the large mill.

FROM KINGSTON.

Navigation Prospects.

KINGSTON, April 12.—The last few warm days have made havoc with the ice. The channel is all open and the river is reported clear as far as Prescott. Up the lake as far as can be seen, is clear. The ice in the harbor is still pretty strong, but the ferry steamer will endeavor to reach the open water today, and if successful will proceed to Cape Vincent. In three or four days navigation will probably be fully open here.

Earl Beaconsfield's Condition.

GRAVE APPREHENSIONS CONCERNING THE EX-PREMIER—PREPARING FOR THE END—THE PATIENT'S DISPOSAL OF HIS PAPERS.

LONDON, April 11.

Public apprehension concerning Lord Beaconsfilds's condition is renewed this afternoon by a decided change for the worse. He has had another violent attack of spasms, and his physicians are surrounding his bedside, exhibiting most profound anxiety. It is believed that his death is imminent, and cannot be delayed many hours. In an interview between Lord Beaconsfield and Lord Rowton (otherwise Mr. Montague Corry), his former private secretary, his lordship gave somewhat elaborate directions as to the publication of his biography and the disposal of his private papers and voluminous correspondence. All these, both materials for a biography and a great mass of letters covering the political, official, and private correspondence of his Lordship's public career, passed through Mr Corry's hands, and most of them were written by him. During intervals between his transient attacks of pain Lord Beaconsfield's mind was perfectly clear, and he seemed to take great interest in the instructions he was giving Mr. Corry. He desired his old secretary to take charge of all his letters and weed out those which should never be published from the rest, and was particular in saying that he did not wish any of his letters which contained unfriendly allusions to certain persons printed until after they had passed away or until events had robbed them of any sting which they now might have. As to his illness and approaching end Lord Beaconsfield spoke without the slightest despondency or regret. He said he had lived beyond the usual limit of human life, and had no sorrow at being obliged to leave it.

LONDON, April 12, 1 a.m.

The condition of Lord Beaconsfield is unchanged.

THE LATEST—A SLIGHT IMPROVEMENT.

LONDON, April 12.—Beaconsfield is slightly improved.

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

MORNING DESPATCHES

EUROPEAN.

EMIGRANT SWISS RETURNED.

LAUSANNE, Switzerland, April 12.—The prompt return of two women shipped to the United States by the Commune of Battstein, creates considerable comment in the papers. The *Journal de Geneve*, one of the most influential in Switzerland, treats the United States as Europe's Reformatory, and justifies the sending of the whole of the Battstein women. It compares the United States to the penal colonies of Great Britain.

LORD DUFFERIN TRANSFERRED.

A Petersburg correspondent says:—It has been known for some time that Lord Dufferin will be appointed Ambassador to Constantinople, and Sir Augustus Paget will succeed him as British Ambassador here. Lord Dufferin will probably leave on Friday.

A CONSERVATIVE VICTORY.

The Parliamentary election at St. Ives today to fill the seat made vacant by the death of Sir Charles Reed (Liberal) resulted as follows:—Ross (Conservative), 517 votes; Pendurves (Liberal), 395.

AMERICAN.

A FATAL FAST.

IOWA CITY, April 12.—Hattie L. Duell died yesterday after fasting 47 days.

PROSPECTIVE ROW IN ARKANSAS.

LITTLE ROCK, April 12.—The Governor of the Chickasaw nation has organized Indian militia to drive white stock raisers from the Indian territory, because the latter refuse to pay a sum demanded for the privilege of keeping cattle there. 100 armed whites are preparing to resist the removal.

RELIEF FOR THE CHIO SUFFERERS.

NEW YORK, April 12.—The subscriptions in response to the appeal of the Greek Consul in behalf of the Chio sufferers already amount to $3,000.

GLADSTONE AND THE FENIANS.

Prominent Fenian leaders here report no design of the Fenians on Gladstone's life.

WASHINGTON SPECIALS.

The *Times* says that it is not probable that the Senate deadlock will be broken by the gradual disappearance of the Senators.

The *Tribune* says that the Postmaster-Gen. contemplates a tour of inspection to the southwest. He is exercising personal supervision over branches of his department, which have not in many years had the benefit of personal acquaintance with the Postmaster-General.

The *Herald* says it is said that the Secretary-Treasurer has such assurances from the largest holders of registered sixes and fives as will enable him by their co-operation to refund the entire amount of redeemable bonds before the 1st of December at 3½ per cent., the Government retaining the option of redemption, and in no way committing the Treasury to such rate when Congress shall consider the funding bill next session. It is stated that during the late flurry caused by the debate of the funding bill, only 11 per cent. of the total amount of the National banks secured by the bonds was withdrawn.

MARYLANDS POLITICAL BOSSES.

BALTIMORE, April 12.—The Governor in a letter to leading citizens, reviews the extravagance and waste practiced under the system of political bosses in this State.

NEW YORK, April 12.—Arrived, *Otranto*, from Hull.

LOSSES BY FLOODS AT OMAHA.

OMAHA, April 12.—The inundated property is emerging into sight again. The damage to the corporations here is fully $50,000, besides other private losses. The Union Pacific shops will resume operations to-day.

DARING ROBBERY AT SANTA FE.

SANTA FE, April 12.—On Saturday at a railroad camp 40 miles west of Chama, a desperado from Texas named Baker with two companions rode up to each store and saloon and robbed each proprietor of all their money valuables. At the last store, kept by a Frenchman, the roughs collected every man in the place, numbering 40, marshalled them into a line under six shooters, and compelled them all to take a drink at the Frenchman's expense. Baker then made them all sit on the floor, and started away, threatening to shoot any who moved. As he turned the Frenchman sprang upon him, took away his revolver, and shot him dead. The other men then arose, and fired a volley at the other roughs, wounding one; but they both escaped.

The Governor of Chihuahua has stationed 500 Mexican troops at El Paso, anticipating trouble between the natives and Americans when the railroads get further into the interior of Mexico.

AFTERNOON DISPATCHES.

AN IMPORTANT CAPTURE.

ST. PETERSBURG, April 11.—Nicholas Sudzclafsky, an important Nihilist recently arrested at Jossy, by the Roumanian authorities, was implicated in the peasant disorders at Schegren, but escaped to England, and then to America. He afterwards returned to Roumania; was formerly in Kieff university, and a companion of the notorious Nihilists Deutsch and Stephanavetch. Russia has taken steps for his extradition by Roumania.

SOCIALIST MEETING FORBIDDEN.

BERLIN, April 12.—The police have forbidden the under socialist law meeting which Bebel was to address at Munich.

PRINCE PIERRE BONAPARTE'S FUNERAL.

VERSAILLES, April 12.—Four hundred persons attended the funeral of Prince Pierre Napoleon Bonaparte, including the Duke of Padua, Paul de Cassagnac, and a few Bonapartist Senators and Deputies. Prince Roland Bonaparte, deceased's son, was chief mourner. A detachment on foot rendered military honors. No speeches. The funeral was unpretending.

FLOODS IN AUSTRIA.

VIENNA, April 12.—In consequence of the continuance of the rains for several weeks the flood is steadily increasing, especially in the districts between the Lower Theiss, Koras and Moras rivers. The waters have everywhere soaked and undermined the dykes, which are giving way. Thousands of acres are already flooded, and a number of large and prosperous places clustered together in the above district for weeks have been in danger of being swept away.

The latest news from Szegedin, is that the outer dyke is in danger, and two thousand men are strengthening it. If the outer dyke fail the whole country to the dyke will be immediately be submerged. If the town be flooded, the high wind would probably drive the waves over the dykes and cause great catastrophy.

LIVERPOOL, April, 12th.—Arrived *Marathon*.

WASHINGTON, April 10.—Indications:—Lower lakes, rain and snow, followed by partly cloudy; slight change in temperature.

NEW YORK, April 10.—Arrived, the *Celtic* and *Monarch*, from London; the *Westphalia*, from Hamburg.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

A country doctor writes: " am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrice, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

After trying many medicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist——— ———and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Bosches's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

DIED,

On the 11th inst., SAMUEL GRILLS, formerly f Devonshire, England, aged 86 years.

[The funeral will take place from the residence of Wm. Brenton, Charles Street, on Thursday afternoon, at 2 o'clock. Friends and acquaintances are requested to attend without further notice.]

Commercial.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

NOTICE.

THERE being a vacancy in the Medical Council of Ontario, caused by the resignation of Dr. Irvine, of Wolfe Island, I hereby announce myself as a candidate for election to the Medical Council for Quinte and Cataraqui Division, and respectfully ask the support of members of the profession.

HENRY W. DAY, M.D.
Trenton, April 7, 1881. 326dtf.

NOTICE.

SEALED TENDERS addressed to the Superintendent General of Indian Affairs, and endorsed "Tender for Indian Supplies," will be received at this office up to noon of THURSDAY, 14TH APRIL, 1881, for the delivery of the usual Indian Supplies, duty paid, at Fort Walsh and Fort Macleod for the year 1881-82, consisting of Flour, Bacon, Groceries, Ammunition, Twine, Oxen, Cows, Bulls, Agricultural Implements, Tools, &c.

Forms of Tender and full particulars relative to the supplies required, can be had by applying to the undersigned or to the Indian Superintendent, Winnipeg.

Each tender must be accompanied by an accepted cheque of a Canadian Bank for the sum of five thousand dollars, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The lowest or any tender not necessarily accepted.

[No Newspaper to insert without special authority from this Department through the Queen's Printer.]

SPECIAL NOTICE TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhaltion we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

LADY THORNHURST'S DAUGHTER.

By MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

"Miss Tessa," he said, clearing his throat with a loud "ahem," and bestowing upon her a glance of entreaty, "it is said that a bad beginning makes a good ending. I hope that will be the fact with us. I have seen a great many pretty girls, but not one to compare with you. Our acquaintance has been short, but to some natures, time is of no account in matters, of this description. When I met the gaze of your beautiful eyes yesterday morning, I was smitten with an incurable wound," and he put his hand to his heart. "I love you, sweet Tessa, and I desire to make you my wife. Will you marry me?"

"Your proposal takes me by surprise, Squire Todhetly," answered Tessa, with girlish dignity. "I thank you for the honor you do me—but I must decline it."

"What! You won't marry me?"

"No, sir; I cannot marry you."

Todhetly's face became inflamed with rage.

"Perhaps you think you can catch that Baronet," he said coarsely, "and write your name Lady Cheswick? I can tell you, in that case you aim too high. The Cheswicks are a proud family, and they don't take penniless girls to preside over their big castle and their grand town house. Sir Victor may talk compliments to you, but he would not marry you—"

"Sir," interrupted Tessa haughtily. "You forget to whom you are speaking.

"No, I do not," answered Todhetly, growing heated. "I am talking to my future wife. Your destiny is fixed, Miss Holm. Your father has control of your future, and he has promised that that you shall marry me whether you will or no."

"My father would not say that," said Tessa, paling.

'Would he not? You don't know Digby Holm. He is fiercer when thwarted than any wild beast of the jungle. I advise you not to thwart him.'

'I must repeat my refusal, Squire Todhetly,' said Tessa sternly. 'An honorable man would not press his suit with threats. Let me go to the house.'

'One word first,' and Todhetly's face glowed with a sinister triumph. 'You had better say Yes, for your own sake. I have not a very good reputation for morality, Miss Tessa, and even your father's presence in my house may not save you from being compromised—'

Tessa broke from him, face and eyes aglow.

'I will leave your house in the first train,' she cried, with indignant sternness. 'I will not remain another night under your roof. Coward! to insult your guest.'

She swept away from him haughtily, and hurried up the walk and into the drawing-room, where Capt. Holm was standing at one of the windows overlooking the late scene between his daughter and his host.

Tessa approached her father impetuously, Todhetly following close behind her.

"Sir," said Tessa, addressing Capt. Holm, with her gray eyes burning, "Squire Todhetly tells me that I am being compromised by my stay under his roof, and that my only resource from scandal is to marry him. I have refused him, and I beg you to take me from the Grange immediately."

Holm frowned,

"You are in so great a hurry, Todhetly," he said complainingly.

"The girl's been flirting these three hours with Sir Victor Cheswick," returned Todhetly sulkily. "I am not in too great a hurry. Young people are naturally impatient, and if I wait long, who knows what may happen?

Tessa again appealed to her father, with a face growing resolute in every feature.

"Sir," she said, carefully avoiding calling him father—it will be remembered she had not yet directly called him by that name—"you will see, after Squire Todhetly's repeated insults, and the menace he has employed, that I cannot continue here as his guest. I demand that you take me away."

"It is impossible, Tessa," said Captain Holm coolly. "I am the best judge of what is proper for you, and I insist that you remain here"

Tessa trembled for an instant, and then her resoluteness grew even sterner than before.

"Squire Todhetly imitates that you will force me to become his wife," she said calmly. "Is this true?"

"I hope that force will not be required in a matter so manifestly for your benefit," said Capt. Holm suavely. "I hope that the simple expression of my wishes will suffice to command your obedience!"

"Not in this matter," said Tessa firmly. "I cannot sacrifice myself on any consideration, sir. No amount of force could compel me to marry a man I abhor!"

A tiger-like gleam shot from Capt. Holm's quiet eyes.

"You offer a premium for the exercise of my will." he said quietly. "I have passed my word to Todhetly—my oldest and best friend—that you shall marry him. And you will marry him! Resistance is useless. You will not leave the Grange until you go as his wife?"

"Will no persuasion affect your decision, sir?" asked Tessa. "Have you no love for me, no regard for my happiness?"

Holm surveyed her with an amused smile.

"Love!" he said, and his lips curled until his mustache bristled. "Why should I love you! Don't let us make any pretence of loving each other when we are yet strangers. I don't want your love, girl, but I do exact your obedience. You might have married Todhetly peaceably, and it isn't too late to take that course. If you take the other course, you won't go far before you find yourself on dangerous ground!"

Tessa made a further appeal, but found her father as cold and insensible to her prayers as if he had been a block of ice.

"You force me to defend myself sir," she said in utter desperation at last, addressing Capt. Holm, "since you take toward me the attitude of an enemy. I would have been a loving daughter to you, but your conduct repels me. More than that, it throws doubt upon your statements concerning my mother. I believe that she was not the one to blame in her trouble with you. I believe sir, that she was a noble and true-hearted woman, whom you have foully traduced!"

With these words, Tessa swept from the room, and went up stairs.

"That girl is in a dangerous mood, Todhetly," said Captain Holm placidly. "I saw the devil in her eye. She means to run away. I may as well take some precaution."

He left the room and softly crept up the stairs.

Tessa, at the same moment, was gathering a few of her choicest effects into a small parcel. Her resolve was taken to fly to London and Reuben Dennis. She packed up a few trinkets, and with her bundle in her hand and a world of indgnant grief in in her heart hurried to her door.

It was shut. She tried to open it, but it resisted her efforts. It was locked upon the outside, and she was a prisoner.

TO BE CONTINUED.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr t headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve s guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestiible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing quali ies. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everyhing else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & CO, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & CO

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264 y

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Beaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

COSTELLO'S

SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

$66 a week in your own town. Terms and $5 outfit free. Address H. HALLETT & Co., Portland, Maine.

MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL Use.
THE OLDEST BEST & MOST WIDELY KNOWN FAMILY MEDICINE

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

CLOTHING HOUSE

—:O:—

WE beg to notify our numerous patrons and the general public, that we are now in receipt of our

New Spring Stock of Fine Woollens,

Consisting principally of English, Irish, Scotch and Canadian Tweeds, Scotch and Irish Serges, French and English Worsteds, Fine West of England Trouserings, Black and Blue Broadcloths, Black and Blue Venetians, Doeskins, Cassimeres, &c, in all the largest and most complete stock of the kind in Canada.

OUR CLOTHING is, without doubt, quite equal if not superior to the best New York Clothing for style, fit and materials, a proof of which is the large number of First Prizes awarded, as at Toronto, Hamilton and other Exhibitions during the past season.

Gentlemen requiring FINE CLOTHING will find it to their advantage to inspect our Stock before purchasing.

We are this season, in addition to our Large Trade in Fine Ordered Clothing, making a specialty of Low Priced Tweed Suits, which we will make to order at the following prices:—

$12, $13.50, $15, $16.50.

Ayer's

Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

IT is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The VIGOR cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair

The VIGOR is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.

Prepared by Dr. J. C. Ayer & Co.,
Practical and Analytical Chemists,
Lowell, Mass.
SOLD BY ALL DRUGGISTS EVERYWHERE.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of interna medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himsel cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

VALUABLE FARM FOR SALE

CLOSE TO THE

VILLAGE OF ROSLIN

THE farm lately occupied by William Gibson, being the west ½ of lot 3 in 1st Con. Hungerford, 150 acres, more or less, of which 100 acres are cleared and under cultivation. Soil,

Clay Loam and Well Watered,

good farm house, barn and drive house and outbuildings. Farm vacant. Possession given at once. A bargain offered. Apply to

BELL & PONTON,
Vendors' Solicitors.

FOR SALE

THE following valuable freehold property, being the East half of Lot No. 16, in the 1st concession of the Township of Marmora, in the County of Hastings, containing 100 acres of land, more or less, and the east half of Lot No. 17, in the 1st concession of the said Township of Marmora, containing 100 acres of land, more or less.

The above property is situate six miles back of the village of Marmora. About 150 acres of the above premises are cleared. The soil is of a sandy loam.

Apply to
MESSRS. BELL & PONTON,
Vendor's Solicitors.

FOR SALE.

THE following valuable farm lands, parcel 1 being composed of the west half of the south half of lot number 13 in the 6th concession of the Township of Tyendinaga, and County of Hastings. Parcel 2 being the east half of the north half of lot number 15, in the 5th concession of the Township of Tyendinaga aforesaid, each lot containing 50 acres.

Parcel I. has about 5 acres under cultivation, the remainder being wood land, all cedar. Parcel II. is entirely under cultivation, and on it there is a good frame house, 24x36, with a kitchen attached. The land is clay loam, near a church, post office and school house. It is situated 9 miles from Shannonville and 18 miles from Belleville and will be sold at a bargain. Title indisputable.

Apply to
MESSRS, BELL & PONTON,
Vendor's Solicitors.

FOR SALE.

THE following valuable Farm Property: The north half of lot number twelve, in the sixth concession of the Township of Murray, in the County of Northumberland, containing one hundred acres more or less. The land is rich clay loam. Good large concrete house with kitchen and woodshed recently built; good barn, sheds and carriage house, nearly new; on the premises is a large orchard of young apple trees of the best varieties. The farm is well fenced and well watered, convenient to a school, market and railroad. It is about two miles from Smith's Corners, on the gravel road, and situate in a good neighborhood about four miles from Frankford. The farm is a choice one. As this farm must be sold at once a bargain is offered. Apply to

BELL & PONTON
Vendor's Solicitors.

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville.

Daily Intelligencer.

A New Grain Route.

From Georgian Bay to Belleville by Rail—A Scheme to Revolutionize the Grain Shipping Trade.

(*From the Montreal Star.*)

The St. Lawrence route is about to profit by the opening up of another grain route from the far West which will effect a saving between Montreal and Chicago of two or three hundred miles. We refer to the advantages offered by the Midland and Grand Junction railways, the facilities offered by which for transporting grain from the Georgian Bay to the Bay of Quinte were clearly perceived by the deputation of Montreal shippers and merchants which visited the Trent Valley navigation waters last year. It is proposed that vessels of great capacity, say 60,000 to 80,000 bushels, shall leave Chicago on Lake Michigan or Duluth on Lake Superior, and instead of making the long circuit around Lakes Huron, Erie, and Ontario, breaking bulk at Kingston, they shall proceed direct to Midland City, at the foot of Georgian Bay, a town with a splendid landlocked harbor, and water in many places forty feet deep close to the shore. At this point an immense elevator is now building, which will transfer the grain into cars on the Midland Railway. From Midland the cars can either proceed direct to the terminus at Port Hope, on Lake Ontario, or make connection with the Grand Junction Railway at Peterboro for Belleville. The latter plan is most favorably commented upon, as although the large barges which at present trade between Canada and Oswego might to appearances make the journey between Port Hope and Montreal in safety, still delays caused by storms would be frequent, and Belleville, so cosily situated at the foot of the lakes, is naturally the place where barge navigation should commence on the St. Lawrence. The following is the Midland and Grand Junction

TABLE OF DISTANCES.

	Miles.
Midland to Peterboro'	93
Peterboro' to Port Hope	27
Total	120

	Miles.
Midland to Peterboro'	93
Peterboro' to Belleville per Grand Junction R'y	66
Total	159

* Besides furnishing a link between lake and barge navigation, the Midland and Grand Junction Railways can give the shortest possible route of any line existing between Chicago and Montreal. Here is how the new route compares with the Northern and North Western Railway line :—

	Miles.
Collingwood to Toronto	94
Toronto to Port Hope	63
Total	157

	Miles.
Collingwood to Toronto	94
Toronto to Belleville	113
Total	207

Thus the new route brings Port Hope nearer to Lake Huron (for Georgian Bay is merely an arm to that lake) by 37 miles, and it brings Belleville 48 miles nearer. The importance of these new lines to Montreal cannot be estimated, and it is to be hoped that all differences, which may exist between the directors, will soon be settled, so that a new schedule of grain freights may be established this summer. We propose to refer to this subject before long.

England.

The English tax on wedding rings produces an income of one hundred thousand dollars a year.

There is in use in some of the London stores an admirable swinging seat for girls who attend behind counters.

A man was lately whipped at Bristol by order of the Mayor for stripping a three-year-old child, leaving it naked, and selling its clothes.

An Indian millionaire has put his stables on the top of his house in Belgrave square, London. The horses are carried up by an elevator.

The superstition more than lingers in many parts of England that no one can die on a pillow of game feathers, and that it is unlucky to keep peacock's feathers in one's house.

Lloyd's newspaper, a very well edited journal, announces this week that its circulation is 600,000. This is really "the largest circulation in the world." For each issue it uses 640 miles of paper.

Sir Henry Bessemer has completed the construction at his house at Denmark Hill, of a telescope, by means of which he expects to be able to read a newspaper placed against the side of the Chrystal Palace, three miles and a half distant.

There are at present no less than six different breeds of ponies in Britain, varying in height from seven and a half to fourteen and a half hands. There are the Shetland, the Welsh, the New Forest, the Exmoor, the Dartmoor, and the Yorkshiremoor.

The London *Times* says : "It can scarcely be doubted that all London, along its main thoroughfares, will discard gas for the electric light within the present century. The really cautious and hesitating progress of the invention must remind not a few of the equally cautious and hesitating progress of gas."

The manner in which Mr. Froude has issued the "Reminiscences" has not given unqualified satisfaction to the friends of the late Mr. Carlyle ; and Mr. Carlyle's niece, who long acted as housekeeper and secretary for her uncle, will probably publish an indendent biography, containing a selection from the family letters which have not fallen into Mr. Froude's hands.

The *Athenæum* states that considerable progress is being made with the alterations at the British Museum. The great bulk of the Etruscan sculptures and terra-cotta have been placed in the north-west corner-room of the upper floor. The old Egyptain rooms are being relieved of their contents, most of the mummies and some of the cases containing small objects having been removed to new positions in the rooms destined to receive the Egyptian antiquities.

Dr. Downes of London, prosecuted his nurse recently for stealing his child. The defence was that the child was really the daughter of the nurse, and had been surreptitiously palmed off upon Dr. Downes as his own by his wife. As Mrs. Downes happened to faint when she came into court, and as it appeared probable that she would faint upon each occasion that her presence was required, the charge against the nurse was withdrawn, and for the present the case is at an end.

Many of the city companies of London have responded generously to the appeal of the Dean and Chapter for a bell for St. Paul's and with the aid of bankers and others a large sum has been collected ; but the treasurer invites additional subscriptions, amounting to £600, in order that success may be absolutely complete. The treasurer makes the rather unexpected statement that requests to have the bells rung more frequently are constantly received, and that no complaints of annoyance are made.

In the disagreement of the jury in the case of Lawson against Labouchere, the defendant obtained a distinct triumph. The cost to the plaintiff has been :—Fee to Sir John Holker and Sir Hardinge Giffard, Attorney and Solicitor-General under Lord Beaconsfield's Government, per day, $500 each ; to Sergeant Ballantine and the other two Q. C.'s per day, $550 each ; total counsel fee for five days, $8,750 ; solicitors cost at least $3,250 ; in all, $12,000, which Lawson has virtually been fined The cost to Mr. Labouchere, who was his own counsel and solicitor, has been nothing, and there will probably be a large increase in the sale of the *Daily News* and *Truth*.

Scotland.

Two rods on the Beauly river killed 185 sea trout one day last week, nearly all of them being in perfect condition.

A correspondent asserts that some of the Skye tenantry appear to be emulating the Land Leaguers of "Ould Ireland."

A "Carlyle Lectureship" is to be founded at Edinburgh University—on some such subject as history or German literature—as a memerial of the late writer.

An excellent imitation of a sovereign was taken to Lochee by a gentleman who stated that he had purchased it and several others for a penny each in Perth,

On the 17th of March Sheriff Balfour, of Glasgow, fined James Stone, farmer, East Kilbride, £3 for having exposed in the Cattle Market 33 sheep affected with contagious disease.

Mr. John H. Halliburton, of Australia, is to present Jedburgh, his native town, with a new public clock and Westminster chimes. They will probably be erected in May, when Mr. Halliburton is expected to be present.

London *Truth* says : "A fisherman on the Tay experienced a curious adventure last week. He was endeavoring to land a salmon at Dunkald, when a large otter seized it and held on so obstinately that, on being dragged ashore, it had to be beaten off."

Blackmount Forest is in the market to let for the coming shooting season. It is the most extensive forest in Scotland, including over 80,000 acres. It is to be let at £4,050 for the season ; but the yearly rent paid by Lord Dudley to Lord Breadalbane is understood to be £5,000.

The plans for the construction of the new Tay bridge are now completed. The foundation piers, which are to be in pairs, are of immense size, and will be built of brick up to a height of 8½ feet above high water, and on the top of these the supporting columns are to be placed.

News Condensed.

—Burglars are operating at Bowmanville.

—Chio has been visited by another destructive earthquake, which lasted four seconds, and was followed by the fall of houses.

—The British Ambassador at Constantinople has given the Porte to understand that it must procure the release of Mr. Suter, who was captured by brigands near Salonica

—The mystery which attended the disappearance last fall of a Brantford citizen, J. B. Sage, has been cleared up by the discovery of his body floating down the Grand River.

—The Porte has been notified that it will be held responsible for the safety of the Englishman captured by brigands near Salonica, and also for the amount of the ransom demanded for him.

—The sentence of death passed upon the Czar's assassins was read in their presence, and twenty-four hours givrn then in which to appeal. The impression prevails that the female prisoners will not be hanged.

—An order has been issued for the evacuation of Candahar, to commence on the 13th and be completed by the 22nd. It is now said that the story of Ayoob Khan's reverse at Herat was invented by himself to hasten the British departure, and that he will move on Candahar as soon as it is evacuated.

—The Moncton, N. B., *Times* says that sixty men returned from the Eastern States to Truro the other day, two of them penniless. Our contemporary thinks a grave responsibility rests upon those writers and speakers who for the sake of political effect, make statements which result in such experience as this.

—Hostilities have commenced between the French outposts on the borders of Tunis and the marauding tribes. Troops are being moved up by both parties to the front, and fighting is likely to go on with earnestness. The French Government express their determinatied to have a satisfactory settlement of the difficulties.

—The Whigs and Tories are reported as intending to form an alliance against the Land Bill, and to oppose its passage as a unit. The land interest will take an active part in the Easter campaign against the Bill. While Parnell's views are not unfavorable to the Bill if slightly amended, Dillon has expressed himself as opposep to it.

—Some of the pupils of the Brantford Blind Institute celebrated Mr. Hunter's retirement from the principalship by an offensive demonstration in the shape of a bonfire. Six pupils were expelled by the Principal, but they refused to leave the city until informed of the reason for their expulsion, some of them stating that they had nothing to do with the bonfire.

—A provisional goverment has been established in Peru. The terms of peace dictated to Peru by Chili are said to include the cession of Antofagasta, Laropacha, and Tacna, a large money indemnity for the expenses of the war, and indemnification for the Chilians expelled from Peru and Bolivia. Peru must undertake not to fortify her ports during fifty years, nor to acquire a navy during forty years.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

To THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, APRIL 13.

The Globe's Anxiety for the Cabinet.

The *Globe*, finding that its brutal and venomous attack upon Sir Charles Tupper—an attack which would disgrace the Thugs of India—has brought down upon it the execration of every honest man in Canada, now attempts to trail a herring across its path in order to lead its readers off the scent, and hypocritically pretends to feel a deep interest in the *personnel* of the Dominion Cabinet, and alleges that necessity exists for a change, in order that "Conservatives of talent and independent position" may be obtained to prevent "Quebec from managing matters as she pleases in the councils of the Dominion." What the *Globe* means by men of "independent positions" we know not, unless it be gentlemen who roll in wealth, with long lines of ancestors with aristocratic prefixes to their names, or a string of letters following them. Such, we suppose, must have been its meaning, for when we reflect upon the "independent positions" and aristocratic associations of the twenty-three gentlemen who composed the late Government, such as the Mackenzies, Millses, Lairds, Coffins, Rosses, Laflammes, Burpees, Smiths, *et id genus omne*, we marvel that Sir John should ever have taken into his Cabinet such plebeian nonentities as compose his Ontario contingent—Campbell, Aikins, O'Connor, Bowell and Macpherson. Truly Canadian democracy, when led by such autocrats as write for the *Globe*, will not long remain unappreciated by the intelligent people of Ontario. Yet, after all, it is but the outcropping of the inner Grit, who, ever prating of equality, is the true type of all that constitutes the snob, the autocrat, and the tyrant,

Knowing that the wise and patriotic policy of the Government, in fostering the industries of the country, and in opening up the great Nor'-West by the means of railway communication, is likely to result in great good, and thereby satisfy the people, the *Globe* now finds it necessary to resort to its tactics of years gone by and again raise the cry of "French domination" and Quebec influence. Hence we have the senseless whine "that the whole control of affairs is in the hands of Mr. Hector Langevin." Even if this were the case, the "affairs" of the Dominion would be in safer hands than in those of the men whose wild and undigested vagaries even the *Globe* dare not defend.

The *Globe's* special aversion seems to be against the whole Ontario section of the Cabinet, except Sir John, whom it now pats on the back and tells its readers "is set "aside from business for a large portion of "his time by a serious disease." This we have reason to know is but another of the many *canards* for which the Grit organ has rendered itself notorious, as in fact the hon. gentleman is constantly at work at his own house. Upon this pretence and the absence of Sir Charles Tupper at the present moment, an attack is based upon the gentlemen from Ontario who compose the Cabinet, as wanting "talent" and "independent positions." "Sir Alexander Campbell," says the censor, "represents nobody but himself." Who, we should like to know, did Mr. Richard W. Scott represent, when leader of the Grit party in the Senate? These gentlemen occupy precisely the same positions as to their representative character. Then why decry the one in that respect, more than the other? As to their relative "talents" and "independent positions," we leave that problem with those who know them to solve.

Continuing its criticism, the organ says: "Mr. Bowell is—Mr. Bowell." We thank the *Globe* on behalf of the electors of North Hastings for this laconic description and estimate of his character. He has long been known to be a man who had opinions based upon principle, and who was never afraid or ashamed to avow them. His opponents have learned this in the House of Commons in the past, and it is this reputation which has made him strong in his constituency. As to his administrative abilities, we leave that to his opponents. There was not a member of the Opposition in the Commons during the late session of Parliament, who referred to the management of his Department, who did not compliment him upon the manner in which he conducted it under the law. We shall therefore leave the sneer of the *Globe* as to want of "influential position" to be judged by those who know him best, and certainly we shall not insult the in- 'ligence of our readers by defending him Glob such attacks as are made by the Camp Having disposed of Sir Alexander foul of t and Mr. Bowell, the *Globe* falls bers, after ainder of the Ontario mem- "public men ahion: "If the ranks of "end few more searched from end to "be selected for vacant beings could "Mr. Aikins and Mr. Ministers than lately tried to ruin the or." Having hn O'Connor, by vile and slanderous insinuations, and having failed in that congenial vocation, it now seeks to make its readers believe him to be an "insignificant being," which effort will fail as signally as did its attempt to blast his professional reputation. That Mr. Aikins should have hurled at him the vituperations of the Grit organ, we are not surprised. He years ago cut himself loose from the thraldom of the *Globe's* yoke, and no man did more, during the five years of Grit rule, to expose the maladministration of that party than the honorable Senator, hence the charge of being an "insignificant being." Contrast his administration of the Inland Revenue Department with that of the gifted and polished Laflamme, Fournier or Laurier, men who cut the sorry figure in the House of exhibiting upon every occasion when the affairs of their Departments were under consideration, an ignorance and want of knowledge, which to the general observer must have been sickening. And yet these men are beau ideals of Grit statesmanship; and a man of Mr. Aikins' capacity spoken of as an "insignificant being."

"We regret exceedingly the illness of these gentlemen," Sir John and Sir Charles, says the man who has been gloating over their prostration, and charging Sir Charles with having shammed sickness in order to leave for England to take part in the Syndicate negotiations. Why? In order that "the dummies who represent this Province in the Ministry" may "be replaced." No doubt it does. "Dummies" forsooth! This from a party which had to follow for years Messrs. Coffin, Ross, Laflamme, Burpee, and others of like calibre, is truly enough, to use the *Globe's* old choice expression, to "sicken a horse." We fancy when the *personnel* of the Cabinet is changed, neither Sir John, Sir Charles nor Sir Leonard, will seek the advice of the champion newspaper Thug in Canada.

The Canada Pacific.

The following sensible letter, which appears in the *Globe* of the 11th inst., will do much to correct the misrepresentations of the leading members of the Grit party and their organs with regard to alleged possible extortionate rates of freight on the Pacific Railway:—

(*To the Editor of the Globe.*)

SIR,—Journalists and politicians differ as to the cause and extent of the settlement of so many of our best and most enterprising young farmers in Dakota and other North Western States. But no one denies that their preference of a foreign country to their own is largely due to exaggerated representations of the power of the Canadian Pacific Syndicate to demand rates for the transportation of produce limited only by their own consciences, and to a belief that by settling in Dakota they will avoid what may be termed a nineteenth century form of vassalage to a great railway monopoly. Few, if any, of those intending to settle in Dakota are aware that the Directors of the St. Paul and Pacific Railway and the members of the Canadian Syndicate are the same persons, that in the former capacity they and the directors of the Northern Pacific control a far larger proportion of the cultivable area of Dakota than as members of the Syndicate they will acquire in the Canadian North-West, and that by settling under the Stars and Stripes British subjects will lose, along with many other valuable privileges, the right to parliamentary and Government protection against exorbitant freights. The charter of the Canadian Pacific provides that the schedule of rates to be demanded by the company shall be approved of by the Governor-General in Council, and shall be subject to Government revision whenever the dividend received by the shareholders amounts to or exceeds ten per cent. on the capital expended on the railway. The political influence of this vast enterprise will no doubt be very great, but no Government, however desirous of the Company's support, would dare to openly defy and disregard the public opinion and interests of the whole Dominion by failing to put in force this provision of the charter. The charters of the St. Paul and Pacific and the Northern Pacific roads contain no clauses equivalent to this, and provide no effective machinery for preventing extortion, so that it cannot be too often or too widely repeated that, by settling in Dakota instead of the Canadian North-West, farmers are subjecting themselves to the very tyranny they wish to avoid.

Yours, &c.,
A. SPENCER JONES,
Toronto, April 9, 1881.

That the predictions of Mr. Blake, his followers, and the Grit press were purely imaginary and without foundation in reason, because the Company would seriously impair their own interests by building an inferior line of railway and imposing high rates on freights and passengers, has been already convincingly argued; but as fact is preferable to theory, the action of the Company has belied the theories of the Opposition. The first act of the Company in regard to freight rates was to reduce the tariff on wheat from Manitoba to Duluth from 21 cents per bushel to 15 cents per bushel. Recognizing the fact that, to make a profit out of their lands, they must sell them cheaply, they offer them at from $3 to $3.50 per acre, with the further condition that at the expiration of three years, 50 per cent. of the purchase money shall be remitted on such lots as have forty acres under crop. Thus the North-west lands are offered at from $1 to $1.25 per acre less than are the railway lands in the United States. Fact thus once more disposes of Grit predictions. And, as Mr. Jones points out, the Government protects the interests of the people of Canada in regard to freight rates, whilst the rulers of the United States make no such provision on behalf of the residents of their territories.

The Company having completed their arrangements in England, have issued the following circular, in which their first official declaration is made:—

"The Canadian Pacific Railway Company, subsidized by the Dominion Government for the purpose of completing a continuous line of railway through British territory from the present Canadian system of Railways to the Pacific Ocean, have a grant of twenty-five million acres of the best farming lands, situated between the Red River of the North and the Rocky Mountains, in what is known as the Fertile Belt of North America, and contiguous to the main line of the projected railway and its branches.

"The Company purposes to complete and have in operation 250 miles of the railway west of Winnipeg by the close of the present year, and to carry it to the foot of the Rocky Mountains, 650 miles further, by the end of 1884. The work of construction will, during the next ten years, afford employment to a large force of men and boys.

"To encourage the rapid settlement of the country, the Canadian Pacific Railway Company will be prepared, until further notice, to sell its lands at the low price of $2.50, or ten shillings sterling, an acre, payable in instalments, and will further make an allowance by way of rebate from this price, of $1.25, or five shillings sterling for every acre of said lands brought under cultivation within three to five years following the date of purchase, according to the nature and extent of the other improvements made thereon.

"Contracts at special rates will be made for lands required for cattle raising and other purposes not involving immediate cultivation.

"Intending settlers and their effects, on reaching the Company's railway, will be forwarded thereon to their place of destination on very liberal terms."

These are business like arrangements, and they have been implemented by the forwarding to the Government of a table of rates, which is a large reduction upon those which have been charged up to this time, and which we have assurance will be proved eminently satisfactory to the country.

Editorial Notes.

A NEW GRAIN ROUTE.

An article headed as above, which we extract from the Montreal *Star*, and which appears in other columns, is deserving of an attentive reading. There can be no doubt that, as the *Star* shows, the best and shortest route for grain from the west for Montreal, is *via* the Midland and Grand Junction Railways to Belleville. No doubt the Midland Company are largely interested in Port Hope, but as barges cannot well trade to and from that port, especially during the season for grain shipment, and as the route to Montreal by way of Belleville is even shorter, as compared with that *via* Port Hope, than the *Star's* figures show, the trade must naturally gravitate towards the shortest, safest, and—above all—cheapest route. We have no doubt that the Grand Junction Railway Company will use every effort to secure this trade, and doubtless the Montreal merchants will assist them in doing so.

BLAKE AS A LEADER.

The *Canadian Spectator* says: "The uncomfortable feeling is spreading that Mr. Blake would fail as head of the Government. This recent determination to go through the country making speeches is a mistake, for Mr. Blake is unlikely to increase his reputation by coming face to face with the people. His influence is repellant rather than attractive. Sir John creates enthusiasm, but Mr. Blake is an iceberg, cooling the surrounding atmosphere. Sir John gains by personal contact, but Mr. Blake loses. If Sir John can keep his health and maintain his position in the party, I think Mr. Blake will have another term at the left hand of the Speaker, although he will probably have a larger following than now."

IMPORTANCE OF GOOD MARKSMANSHIP.

The Ottawa *Free Press* says:—"We have seen how the Boers, untrained in military tactics, have been able to resist the best troops England could send against them. This was as much owing to their ability as marksmen as to their bravery and stubbornness. The lesson is very important, but if we Canadians desire to make the most of it, we should take care that rifle shooting does not degenerate into mere annual gatherings of pot-hunters. Skill in rifle shooting in volunteer corps can only be retained by the same means which created it, namely, the stimulation of the desire to excel. Badges for marksmanship, and competitive shooting of all descriptions, designed to excite the pride of regiments and companies, and the personal ambition of individuals, have been found the best means for this purpose."

A Practical Suggestion.

To the Editor of the Intelligencer,

SIR,—From time to time you have through the columns of your paper endeavored to arouse the property holders of the city to the necessity of adopting some plan whereby manufacturing industries might be profitably and successfully established here,—and with what result? It appears that for some reason or other the people of the *City* of Belleville are not the enterprising citizens of the old Town of Belleville, or your energetic appeals for active and energetic action in this much desired subject would not be permitted to remain in abeyance for such a long time. What are the people of your city to do about it? In conversation with several shrewd and keen business men during a recent visit to the centres of manufactures in the adjoining states the invariable answer to any question as to why some of their capitalists would not assist in the much desired establishment of industries here, was to the effect that so long as the citizens of Belleville and adjoining territory had not sufficient enterprise and pluck to even suggest some practicable scheme—notice, *even to suggest a practicable scheme*, it would be labor lost on the part of any one to spend his time endeavoring to induce capitalists to invest money in *what?* but show them a tangible proof of something of a solid and permanent character with a determination to surmount obstacles, now apparently in their path to progress—then, if necessary, men of character, of means, will not be slow to avail themselves of opportunities.

What are the Industrial Committee about? Why do they not propound a practical scheme for the erection of smelting furnaces? There need surely be no hesitation in some one of our City Fathers making himself and our city famous by interesting the property owners in something which will at least arrest their earnest attention and show them a way whereby instead of the depreciation of their properties, they can be made of a most remunerative character without any great outlay individually. I do not suggest the idea of a bonus, but rather the opposite. Let a joint stock company be formed, all property owners to take stock according to his or her means, thereafter by others who may, and I am certain there are many such both in the City as well as throughout the Dominion, who are only waiting such an opportunity and who have great faith in the success of such a scheme.

I have simply thrown these crude ideas together as an incentive for some one who may approve of the scheme to endeavor to get the citizens of Belleville awakened from their lethargy and once more go ahead.

On my return I may offer for the consideration of the people of Belleville a further communication more in detail regarding iron and its manufacture.

Yours, &c.,
PROGRESS.

Mrs. Mary Harrington, Kouchibouguac, N. B., says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

"Hail bounteous, beauteous, gladsome Spring" — this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

Board of Education.

The Board met last night at the usual hour.

PRESENT.—W. A. Shepard, Chairman; Messrs. Johnson, Wills, W. J. Diamond, Hayto, McGinnis, Macoun, Richards, Woods, Newbery, Wensley and Burke.

The minutes of the last regular meeting, and of the special meetings were read and confirmed.

A communication was read from Mrs. Dixon offering the Board a lot on North Front St. for $300 for a school site.

A communication was read from Alex. Marling, of Toronto, to the effect that he had not received an answer to his former communication, and was laid on the table.

Mr. Wills gave notice that at the next meeting he would move for the appointment of a committee to act jointly with a committee from the City Council, to take into consideration the sanitary condition of the schools of the city.

REPORTS.

The report of the Finance Commmittee was read, recommending that a number of accounts be paid.

The report of the Committee on Sites, Buildings and Repairs was presented recommending that the tender of Mr. Geo. Reeves, for the erection of a wood shed at the Central School, be accepted.

Mr. Macoun said that when he had spoken to Mr. Coleman with regard to receiving a release from his property he was willing to give them a release, but when others would speak to him he would not give them a definite answer, and so the matter had not been settled yet.

Mr. Johnston, Inspector, presented a report regarding the the condition of the schools for the past three years.

The Board went into Committee on Reports, Mr. Wills in the chair.

The Finance Committee's report recommending the payment of accounts amounting to $52.64 was passed.

The report of the Committee on Sites, Buildings and Repairs, recommending that the tender of $124 of Geo. Reeves for the woodshed on the Central School grounds be accepted, was adopted.

Moved by Mr. Wensley, seconded by Mr. Moore, that the owners of the two lots in the rear of Pinnacle Street School be requested to pay half of the cost of a new fence to be built between the lots and the school yard.—Referred to the Committee on Buildings and Repairs.

Mr. Wensley spoke of a resolution that had been passed regarding the sending of scholars from one school to another, which he had been told by teachers was a common occurrence, and he wanted to know if this was to be allowed. The question, he said, was brought up some three years ago, and he thought it should be seen to at once.

Moved by Mr. Newbery, seconded by Mr. Diamond, that Mr. Inspector Johnston be requested to make a summary of the number of pupils in attendance at the Schools, and present it to the next meeting of the Board.—Carried.

Moved by Mr. Diamond, seconded by Mr. Newbery, that the Secretary be requested to send a copy of Mr. Marling's letter to Mr. Dawson, and ask that gentleman for an explanation why he did not furnish the information which Mr. Marling required; also that the Secretary write Mr. Marling, informing him of the action of this Board.—Carried.

Mr. Wills said that a few days ago he had had the pleasure of visiting the Schools of Cobourg, and he would take this opportunity of thanking the Trustees of that place for their kindness in showing him through the Schools and their system of teaching; and he hoped that if any members of the Cobourg Board of Education visited Belleville, they would receive similar courtesies from the Trustees of Belleville.

The Board adjourned.

The Cattle Trade.

In consequence of diseases of a contagious character having been found among cattle which have been landed in Emgland, four vessels which sailed from Portland and Halifax, the following regulation have been issued by the Canada Privy Council:—

1. All vessels which have carried cattle from any port in the United States shall be prohibited from loading cattle in Canada for a period of thirty days thereafter, and further until such vessels shall have been thoroughly cleansed and disinfected under the supervision of an inspector appointed by the Minister of Agriculture.
2. All vessels which have carried cattle from any United States port among any of which "foot and mouth disease" shall have been found shall be prohibited for a period of sixty days thereafter from loading cattle in any Canadian port, and further until such vessels shall have been thoroughly cleansed and disinfected under the supervision of an inspector appointed by the Minister of Agriculture.
3. All vessels which have carried cattle from any United States port among any of which shall have been found the disease known as "pleuro-pneumonia" shall be prohibited for a period of ninety days thereafter from loading cattle in any Canadian port, and further until such vessels shall have been thoroughly cleansed and disinfected under the supervision of an inspector appointed by the Minister of Agriculture.

(Signed) J. O. COTE,
Clerk Privy Council.

Cheese.

The season for cheese manufacture can be said to have fully opened, as nearly all the factories in this district have commenced operations, and those that have not already commenced operations can be expected to commence operations at an early date. The prospect is that, stimulated by the high prices last year, the make this year will be very large. As to the prospect for prices a New York correspondent under date of April 5th says:—"The cheese trade in this city is in a stagnant condition. The present is unsatisfactory and the future uncertain. It was hoped that by this time the market would be cleaned up as thorougly as it was last year. But a close account of stock held in this market on the first of this month showed that there were 35,013 boxes of what were classed as "cheddars," and 15,814 boxes of "flats," making a total of 50,827 boxes on hand. A year ago the stock footed up about 26,000 boxes, so that there is an excess this year of 25,000 boxes more than last spring at the same date. Of course the proportion of fine stock is comparately small—probably not more than 10,000; and it is believed that the price of this can be fully maintained. The receipts, however, are unusually large for this season of the year; almost double in fact. Last year the receipts in April were about 26,000 boxes; this year they will be 40,000, if we judge from the receipts of the month already past. This stock is composed chiefly of creamery skims, and it is arriving so freely that the price is correspondingly low. As soon as full milk fodder cheese comes into market it will probably bring about 12½c. Prices on the other side of the water do not warrant shippers in paying more than 12½c. for the best fall stock now in the market, but it is hoped that, if new cheese starts at that, the old will be worth enough more to enable holders to get out without much loss." In New York the receipts for the week were 10,065 boxes; exports, 14,966 boxes. There was 13½c bid for fancy cheese, state or western; 13⅝c was bid for fine October New York state factory and offered at 14c. Medium and lower grades dull; flat skims unsalable.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

'THEY ALL DO IT.'—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for simliar diseases to great advantage until the list of those eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

DYES.

5cts PER PACKAGE.

Sufficient to dye 4 dozen eggs. Sold by

L. W. YEOMANS & Co,
Front, opposite Hotel St.

THE CHEAPEST

BLACK SILKS

IN THE CITY.

—:o:—

WE have just received 6 pieces Black Silk which we are able to offer at $1.22 per yard. It is the same quality of silk that we have been selling at $1.29 per yard though having a different border. Although the silk is worth so much more we wish to give our customers the benefit of the slight fall in the market. We consider the Silk equal in quality to any $2.00 silk that is sold in the city.

CARPETS!

We have also received several bales of UNION CARPETS in first-class patterns at medium prices.

Our assortment of carpetings is one of the largest in the city, and our prices moderate.

GLASGOW WAREHOUSE.

Local Notices.

Notices under this head 10cts. a line each insertion. After six insertions 5 cts. a line.

THE Literary Association of John St. Presbyterian Church will hold a social in the School room on Friday at 7:30. Admission 15 cents.

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, APRIL 13.

6 O'CLOCK EDITION.

City and Vicinity.

ONE prisoner occupied the cells last night.

THE Cricket Club will meet to-night for organization. Let there be a good attendance.

MR. JOHN BELL, Q. C., has been re-elected as one of the Benchers of the Law Society.

THE water-carts began their rounds yesterday, to the great satisfaction of Front St. merchants.

THE yacht *Sylvia* has been taken out of winter quarters and anchored on the east side of the island.

Two gentlemen laughed so consumedly at Cool Burgess last night that those who witnessed their mirth feared that they would go into hysterics.

CHIEF MCKINNON has received a circular from the Chatham Chief of Police to the effect that a man named Henry Miller, a merchant of that town, is missing.

WE regret to learn that Alex. Robertson, Esq., M.P.P. who has been ailing for several weeks, was taken with a sudden relapse on Sunday night, having caught cold, and was during Monday and Tuesday quite low. He was, however, much better this morning, and is making satisfactory progress under the care of Dr. Abbott.

THE new teams behaved remarkably well at the fire yesterday afternoon. The horses that drew No. 1 engine were even better than the old ones. They drew the engine along with perfect ease, and did not appear to be frightened in the least. The hose-cart horses did not behave so well, but they will improve in time.

HANGS OUT HIS SHINGLE.—It will be seen by a card that Dr. W. J. Gibson, late House Surgeon of Kingston Hospital, has hung out his shingle in the Dafoe House Block.

WEATHER PROBABILITIES. — Toronto, April 13.—Lakes, moderate to fresh winds, shifting towards the west gradually clearing weather, stationary, or slightly higher temperature.

JOURNALISTIC CHANGE.—Mr. Jas. A. Dawson, of the *Ontario*, has been offered, and we believe, has accepted a position in the advertising department of the Toronto *Mail*. The position is a highly desirable one, and one for which Mr. Dawson is well qualified. There is no doubt that he will fill it satisfactorily. He will probably leave for Toronto in about two weeks.

DIED IN THE HOTEL DIEU.—The Kingston *Whig* of the 12th inst. says yesterday morning an old trapper named Schemmerhorn, from near Madoc, was found dead in his bed. He had been in the hospital for about a week, suffering from a complication of diseases. In his case medical skill was of no avail. His remains were taken to his former home this morning by a brother.

POLICE COURT.—The two boys Johnson and Hill who were charged yesterday with stealing carpet rags from Mrs. Brickman were kept in the police cells for three hours yesterday afternoon and then allowed to go. The boy Hill was subsequently arrested on another charge of larceny.—Jas. Meagher, from Sidney, was charged this morning with drunkenness. He was fined $1.00 without costs.

THE ROAD-SCRAPER.—The patent road-scraper which has been procured for the city, and which arrived on Monday, will be set to work on the streets as soon as they are settled and the ice thawed out of them by heavy rains. The machine is not only intended for streets; its principal use is for the opening up of new streets. It is claimed that a mile of new road per day can be opened up by its use. There is little doubt that the machine will be purchased by the city, if it can be proved to accomplish what is claimed for it.

SUDDEN DEATH.—We record with much regret the sudden death of Mr. Stephen H. Smith of this city, which occurred yesterday evening from heart disease, after a few hours' illness. Mr. Smith had carried on business as a boat builder in Belleville for 24 years and was much respected. He was born on Long Island, New York, and in 1807 at the age of 12 years he came to Canada with his parents, who settled on Big Island, Prince Edward. In 1857 he removed to Belleville and has since lived here. Mr. Smith leaves a widow and a family of five.

"OUR SLEIGHING PARTY."—The entertainment given by Cool Burgess and party was successful in the sense that it fulfilled the securing design of the management, namely to make people laugh. There was a large attendance, and the audience enjoyed the fun which was presented for their amusement. We should, however, advise the management to excise two very questionable gags, and that very vulgar and purposeless song of Mr. Douglas', "My mother in-law," which disgusted many of the auditors. Mr. Kelly's musical performances were very clever and novel, and Miss Dearing's singing was passable.

FIRE.—Shortly before 5 o'clock last evening the roof of a frame house on the Canifton Road, near the railway bridge, was discovered to be on fire. The alarm having been given, the engines were got out with the usual celerity, and were soon at the scene of the fire. The flames had obtained considerable headway, but the three heavy streams which were soon playing on the building checked them almost instantly, and the fire was extinguished with comparatively little difficulty. The house, however, was badly damaged. The roof was almost entirely destroyed, and the interior suffered much damage both from the fire and water. It was occupied by the family of a man named Kavanagh, who was killed on the Grand Trunk last year. Mrs. Kavanagh, her daughter, and two sons lived in it together and owned it. Much sympathy is felt for the family, as they had just incurred a considerable expense in repairing and renovating the house, the work having been completed only last week. The origin of the fire is unknown. It is supposed that a spark from a passing locomotive lodged in the roof and set fire to it. The inmates of the house were not aware of the fire until informed of it by the neighbors, and not until the flames had burned through the roof. Mrs. Kavanagh, (who has but one leg and is an invalid) was carried out of the house into the garden, and the neighbors set themselves to saving the furniture. Everything downstairs was saved, but the contents of the second story were mostly destroyed. There was, we believe, an insurance of $400 on the house, but this sum will not much more than half cover the actual loss sustained.

SERVICES IN JOHN ST. PRESBYTERIAN CHURCH.—This church was well filled last night. On the platform were Revs. Turnbull, Lambly, Schuster and Mitchell, besides Rev. Mr. Torrance, of Peterborough. The pastor of the church presided. After devotional exercises Mr. Torrance gave an interesting account of the religious movement which had for some months been going on in Peterborough and neighborhood. For a number of weeks one or other of the churches was crowded. There was from the outset very marked attention given to the preaching of God's word. There was the greatest harmony among those of the Ministers and other Christian workers who went into the movement. The speaker narrated some striking examples of good being done amongst infidels, profane swearers, drunkards, and such like. He said a number of these were now members of churches. He referred to two men in particular noted for their offensive opposition to religion, who were now sitting at the feet of Jesus, clothed and in their right minds, and who last Sabbath sat down at the table of the Lord in St. Paul's Church. He could not describe the change which had come over Peterborough. His own congregation was like a new people. There was the greatest possible contrast between the present and the past in every direction. The prayer meeting presented quite a different appearance from what it had, being very largely attended and characterized by lively and instructive services. The membership of his church had an increase of 148 persons; his Bible class was now largely attended by married and aged persons. It had increased from an average of 50 to 120. $150 had been given as a thank offering by the Women's Missionary Society, and this in addition to their increased contributions to the objects of their Association. Every department of the congregational work had experienced a wonderful change. The other congregations too were equal sharers in the great blessing. Mr. Torrance then delivered a short and telling address upon the subject of Spiritual Thirst, after which the pastor, the Rev. D. Mitchell, spoke a few words on the duty of patiently waiting and prayerfully longing for an outpouring of God's spirit, that would endue the membership of the church with power, reclaim the backsliding, and rescue from the world the fallen and depraved.

PURE AND STRONG GAS.—Yesterday we began a description of the Photometer which has just been set up in the Weights and Measures Office here, but were not able to conclude it on account of lack of space. We described part of the process used to ascertain the brilliancy of gas; but an adequate idea of the whole process cannot be conveyed in words; it must be seen to be understood. The Act provides that the gas shall be tested by an Argand burner burning 5 cubic feet of gas per hour, and compared with a sperm candle consuming 120 grains of sperm per hour. The testing experiments occupy about ten minutes. Ten observations are taken—one every minute—in the way described yesterday; and the result of these ten observations being averaged, an exact statement of the comparative brilliancy of the gas is obtained. It will be perceived that it is of the utmost importance to have the gas jet and the candles used in the test in exact accordance with the conditions mentioned, and the apparatus which are used for regulating them are of the most delicate nature. The gas jet is regulated by means of a combined clock (the single hand of which rotates once a minute) and metre. When the jet is burning at the rate of exactly five cubic feet per hour, the hands of the clock and metre rotate together, and the slightest increase or decrease in the amount of gas being consumed is indicated by the hands of the instrument. The candles are regulated by a tiny scale of exquisitely delicate workmanship. The bits of candle are placed in sockets at one end of the beam, which is then evenly balanced. A 20-grain weight is placed at the same end of the beam as the candles, which are then lit. When 20 grains of the sperm are consumed the beam tilts; and as the minute clock is closely consulted, the time occupied in consuming the required quantity of sperm can be ascertained to a second—thus showing the exact strength of the candles, which is so necessary in order to obtain a correct result. In the recess described yesterday there is also an instrument for testing the quality of gas. This instrument consists of several small tubes, the mouths of which are placed near each other, and which are covered with a glass shade to exclude atmospheric air. In front of the mouths of these tubes, slips of pure white paper are hung, and gas is forced through the tubes against these bits of paper. If the gas contains sulphuretted hydrogen, the paper will be clouded in a longer or shorter time, according to the quantity of this hydrogen contained in the gas. If the gas is pure, the paper retains its color. Several other instruments are to be seen here which are equally as interesting as those we have described; and it would be well worth anyone's time to inspect them. The introduction of these instruments here means that the citizens of Belleville will hereafter be enabled to know at any time the exact degree of purity and strength of the gas with which they are being supplied. When the electric light is introduced, the instruments will, of course, have lost their usefulness; but it may be taken for granted that gas will not be dispensed with so soon as to justify people in being indifferent as to its quality.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

Marine Notes.

The canvas has been bent on the schooner *John Pugsley*, which wintered across the bay.

A Quebec despatch says: The ice in the north channel and the river St. Charles is fast disappearing. The battues are also breaking up. The light ships are being launched and prepared to take their respective positions during the shipping season.

Operations towards the stripping of the wrecked SS *Ottawa* were to have been commenced on the 11th, all hopes having seemingly been abandoned of being able to save the hull.

Navigation is open at Brockville.

The ice has broken up in Lake St. Louis above Lachine.

The lake ice is still firm at Three Rivers.

The River Trent is clear of ice and the open water in the harbor is gradually widening. It is not thought however that the Bay there will be free from ice for a week.

At Napanee the boats can't run for a few days. The ice is not all out of the mouth of the river.

At Deseronto the ice bridge is still strong. The bay, however, as far as can be seen is clear. The steamers are ready and being launched, but will not begin their regular trips until next Monday. Several vessels are being fitted out.

The schooner *Baltic* has arrived at Toronto from Oswego.

The steamer *Pierrepont* made her first trip from Kingston to Cape Vincent on the 12th inst.

News Condensed.

—A large grain elevator is to be built at Hochelaga.

—The revenue of Nova Scotia for the present year is estimated at $505,987, and the expenditure, $503,953.

—The Turcomans have captured Naru Kissar, the most advanced post on the road to Merv, and slaughtered the entire Russian garrison.

—Two hundred emigrants, who arrived at Halifax on Sunday, passed west yesterday. They were mostly English, Irish and Scotch farmers.

—Captain A. D. Aird, who commanded the Allan steamer *Sarmatian*, has retired from the service. It is rumored that he is to be knighted.

—England's importations of meats, cereals, butter, cheese, eggs and other food supplies in 1880 reached the enormous aggregate of £112,986,000.

—Lord Beaconsfield passed a good night and rested well on Monday night, but yesterday evening suffered another relapse, which left him still weaker.

—Contracts for $600,000 of buildings are already given out. It is expected that nearly two millions of dollars will be expended on buildings in Winnipeg this season.

—Three hundred French Canadians went west yesterday. They are engaged to work on the Canada Pacific at $1.00 to $1.50 per day, besides a free ticket to their destination.

—The Louden colony of immigrants from Millbrook, Ontario, with nineteen cars of freight and stock, arrived at Winnipeg on the 12th. They will proceed at once to locate in the Souris district.

—A Militia List similar to the British Army and Navy list will shortly be published by the Militia Department. It will show the names of the officers attached to each corps, with period of service.

—Reports from the Upper Gatineau state that there is several feet of snow in the bush yet. The water is very low, and unless there are heavy rains within two weeks a great deal of fine timber will be stuck.

—The destruction effected by the earthquakes in Chios may be summed up as follows:—Forty-five villages totally destroyed, barely twenty habitable houses standing in the whole island, and almost total disappearance of the population in many localities.

KINGSTON COTTON MILLS.—The promoters of the Kingston Cotton Mill have been endeavoring to obtain from the City Council a bonus of $25,000 and exemption from taxes, but the members of the City Council don't see their way clear to recommend it. Although some $107,000 has been subscribed towards this project, there is no certainty that it will go on. The *News* says: "The present time is a crisis in the affairs of the Cotton Mill Company and in the industrial history of the city. A large amount has been subscribed towards this industry, but not enough to start it. Unless the little which is still required is in some way made up, the project will fall to the ground, and such an event would prove a blow to any future hopes of progress for Kingston."

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

HAGYARD'S PECTORAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

Hagyard's Pectoral Balsam; a few doses will relieve the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

After trying many medicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

MORNING DESPATCHES

AMERICAN.

OUTLAW CAPTURED.

GREENSVILLE, S.C., April 13.—Lewis Redmond, a notorious marauder and outlaw, has been captured.

CORNER IN PORK.

CHICAGO, April 13.—The corner in the pork market is reported ended, by the cornered parties paying $100,000.

OFFER OF TUNIS REJECTED.

PARIS, April 13.—A Philippeville correspondent states that the Tunisian General offered General Ritter 300,000 francs, on condition that the forward movement of the French be stopped. Ritter declined.

INJUNCTION GRANTED.

A temporary injunction was granted yesterday in the suit of Charles Woerishoffer against the Northern Pacific Ry, demanding that all issues of common stock be declared void and that the Directors be restrained from issuing any more and be compelled to account for stocks.

WASHINGTON SPECIALS.

The *Times* says as day follows day the debate becomes more tedious and stale. It is possible that a new aspect may be given to the contest after the return of the Senators who accompanied Carpenter's body to Wisconsin, but at present there are no indications of a change.

Preparations are being made in the Departments of the Interior and Justice to institute at an early day proceedings against the Central Pacific Railway for the purpose of having vacated the lease of the Southern Pacific and western division of the Texas Pacific Railway to the Central Pacific. Under the Thurman Act, 22 per cent. of the net earnings of the Central Pacific must be paid into the United States Treasury from the Company's sinking fund. Huntington always resisted the payment, but finding that he could not escape it, he has, it is alleged, deliberately planned to reduce or wipe out the net earnings of the Central Pacific by diverting the business legitimately belonging to that road to the leased southern lines. The Government will also institute suits against the Central Pacific in connection with the payment of dividends in 1880 and 1881.

NEW YORK April 13.—Arrived, the *Canada* from London; *Labrador*, from Havre; *Zealand* from Antwerp.

RAILWAY ACCIDENT—SEVERAL PERSONS INJURED.

JERSEY CITY, April 13.—While a passenger train and freight train were passing each other in a deep cut last evening, a freight car fell over in front of the passenger locomotive, which crashed through the fallen car and several others which had left the track. The engine wrecked several cars and was demolished. A number of persons were injured.

THE WESTERN FLOODS—GREAT DESTRUCTION OF PROPERTY

YANKTON, April 13. — The Missouri is gradually subsiding. Ice is piled to the height of ten to thirty feet along its banks, and on the bars and bottoms. Yankton is filling up with refugees from the lowlands. Outside help is needed, as the resources of the citizens are not adequate. Thousands of people are homeless and all they possessed swept away. Nearly all the stock on the lowlands, hundreds of thousands head are drowned; farm houses and villages are submerged or floating about in the water. At Green Island out of twenty houses but one remains, and the ice is from ten to twenty feet deep. The bottoms from here to Big Sioux, 60 miles long and 5 to 20 miles wide are still under water. Yankton parties are still out in yawls bringing in people. The Chicago, Milwaukee and St. Paul Railroad, which runs over this bottom, is still under water. It is the only means of communication with the outside. Yankton is almost destitute of fuel and short of provisions. Winter still holds on, increasing the suffering of the homeless families. Yankton can furnish shelter for about one thousand, and is making a great effort to supply clothing, fuel and provisions from a limited store. As soon as the gorges break boats can be sent below for supplies. All the railroads north and west are snowed in. The damage to steamboat property is $60,000, including two boats sunk. Eight steamers are lying high upon the ice and far inland. The losses to property in general are very great. The season of floods has only begun. The entire Missouri slope is buried in snow.

MURDERED AND LYNCHED,

DENVER, April 13.—At Durango, Charles Norman entered a theatre and shot an unoffending stranger dead and wounded another. At night Norman was taken from jail by vigilants and hanged in the presence of several hundred people.

AFTERNOON DISPATCHES.

LONDON, April 13.—Arrived out, the *Suevia*, *Lessing* and *Arizona*.

PEACEFUL PROSPECTS.

It is stated that news received from the east justifies the report of a peaceful settlement.

THE TUNIS DIFFICULTY.

LONDON, April 13.—A correspondent says the latest despatches from Tunis represent that a great change has taken place in the Bey's disposition towards France.

THE ITALIAN CRISIS.

ROME, April 13.—The King in entrusting Depretis with the formation of a Ministry, requested him to summons all the leaders of all parties. Depretis has obtained the support of Crespi, Nicotera, and Sezardell. Cairoli declines to join the new ministry combination.

TURKEY EXPRESSES ITSELF.

CONSTANTINOPLE, April 13.—The Porte has addressed a circular to the powers expressing the hope that France's measures will be confined to the defence of her own frontier, and declaring that the Bey will reestablish order and prevent the renewal of any disturbance with the tribes.

SMALL POX RAVAGES.

GLOVER GAP, W. Va., April 13.—This place is panic stricken on account of the small pox. Trains pass through without stopping. The doctors are all sick. There is nobody to bury the dead. Those who can are leaving the town. The disease is spreading to Burton village. The Governor was telegraphed to send somebody to bury the dead. He replied that the county authorities should attend to it.

Beaconsfield's Condition.

LONDON, April 13th.—Beaconsfield is restless and not inclined to take any nourishment.

Sudden Death.

NAPANEE, April 12.—A sad occurrence took place this forenoon at the Court House while the court was going on. Mr. Thos. Falon, a farmer from Lime Lake, dropped dead as he was entering the door of the court room. He was an extraordinarily large, stout and healthy man about 65 years of age. He leaves a large family. Dr. Ruttan, who was present, pronounced the cause of his death appoplexy.

A country doctor writes: "I am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrices, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistent use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there."
Dr. C. Clay

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benefit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

DIED,

At Belleville on Tuesday, the 12th inst., STEPHEN SMITH, boat builder, aged 74 years.

[Funeral to-morrow at 3 o'clock p. m., from the family residence, foot of Church Street, to the cemetery. Friends and acquaintances will please attend without further notice.]

On Sabbath morning, 10th inst., at her residence, Northport, SARAH WERDEN, beloved wife of T. C. Demill, of consumption, in her 35th year. She had a long, tedious illness, but died with a blissful hope of a glorious resurrection.

Commercial.

BELLEVILLE MARKETS.

INTELLIGENCER OFFICE,
Belleville, April 13, 1881.

The only kind of grain offered in any quantities is rye—about 1,500 bushels of which is offered weekly. The market remains firm in Oswego and commands in the street here from 83c to 85c per bush. Considerable wheat is handled in car lots, ordinary commanding $1.21 f.o.b. here, one lot of 3 cars pure fine wheat was sold during the week f.o.b. at point of shipment at $1.21—equal to $1.27 here.

Barley is weak and oats firm. The street price for oats is 35c to 36c. Car lots command 38c.

Peas are firm at 65c to 68c. Car lots are worth 70c.

Dressed hogs are scarce and wanted at $8.50 per 100 lbs.

Farmers hides command $5.00 to $6.00 per 100 lbs Inspected $7.00 to $7.50 per 100 lbs.

Sheepskins from $1.00 to $1.40. Calfskins 10c. per lb. Deakins are lower, 50c is the highest price paid for the best.

Butter and eggs command our quotations.

There is comparatively nothing doing in seeds. Clover brings $3.50 per bushel, but is not wanted. Timothy $2.75.

Shipments of potatoes have been brisk during the past few days, amounting to 3,000 bush. 55c per bag is paid for the best.

Hay is lower at $10 to $11 per ton.

WHEAT, FALL—$1.00 to $1.20.
BARLEY—60c. to 70c.
RYE—83c to 85c.
OATS—35c. to 36c
PEAS—65c. to 68c.
LAMB—6c to 7c per pound.
HOGS—Dressed, $8.50.
BEEF—Dressed, $4.00 to $6.50.
HAMS—9c. to 12c.
BUTTER—Tub, 16c to 20c.
BUTTER—Roll 20c to 25c.
EGGS—11c. to 13c. per dozen.
HIDES—Rough $5 00 to $6.00, inspected $7.50.
SHEEPSKINS $1.00 to $1.40
CALF SKINS—10c per lb.
DEAKENS—50c.
WOOL—25c. per lb.
CLOVER SEED—$3.50
TIMOTHY SEED—$2.75.
LARD—9c to 11c.
TALLOW—Rough, 4½c.
TALLOW—Rendered, 6½c.
CABBAGE—50c per doz.
POTATOES—40c. to 55c per bag.
FLOUR—Wholesale, $5.25 to $6 per bbl.
FLOUR—Retail, $5.50 to $6.50 per bbl
HAY—$10.00 to $11.00 per ton.
CHICKENS—40c to 60c per pair
DUCKS—50 to 60c per pair.
GEESE—50 to 60c.
TURKEYS—75c to $1.50
STRAW—$4 to $5 per. ton.

TORONTO MARKET.

TORONTO, April 13. — Fall wheat No. 1 $1.15; No. 2, $1.12; No. 3, $1.10. Spring—No. 1, $1.20; No. 2, $1.18; No. 3, $1.12. Barley—No. 1 95; No. 2, 85 to 90; No. 3 extra, 80; No. 3, 70. Peas—No. 1, 77; No. 2, 75. Oats—No. 1, 39; No. 2, 38c. Corn—59. Flour—superior, $4.95; extra, $4.85; fancy, $4.75; strong bakers $5.30; spring extra, $4.85, superfine, $4.45; fine, $4.00. Bran—$15.00. Clover seed—$4.30 to $4.60. Timothy $2.50 to $2.65. Hogs—$7.50 to $8.00. Butter 15 to 18. Barley (street) 70c. to 85. Rye, 92 to 95c. Spring wheat, $1.15 to $1.20. Fall wheat $1.08 to $1.13. Oatmeal $4.10 to $4.30. Cornmeal $3.00. Pork $18.50.

Wheat and flour tending lower. Barley dull and neglected. Oats, peas and rye in demand. Seeds nom. English markets 6d to 1s 6d per quarter lower on wheat.

MONTREAL MARKET.

MONTREAL, April 13.—Flour, receipts 1,800 bls.; sales 400 bls. Market quiet, without decided change, but tending in buyers' favor. WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

NOTICE.

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

BY MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

CHAPTER XXXVII.

A FLASH OF FORTUNE.

Tessa could scarcely believe the evidence of her senses, in thus finding herself a prisoner in the house of Squire Todhetly. She tried the door again in a sort of amazement, but the fact was beyond all doubt that it was securely fastened upon the outside.

"This is the kind of a father I have!" she said aloud, her lip curling. "He is leagured with his cowardly host to force upon me a loathsome marriage. He means to keep me a prisoner until I yield to his demands. If he thinks any weak fears will persuade me to marry Squire Todhetly and thus prejuice my own soul, he does not know Tessa Holm!"

She sat down in the nearest chair, her cheeks flushing with a righteous indignation, and her gray eyes glowing. And then she proceeded, as camly as he could, to review her situation.

She was a prisoner at the Grange—in the house of a man whose personal reputation was so bad that no lady could remain long under his roof without suffering a blighted name. And her father was willing to let that blight fall upon her, nay, he seemed eager that it should. It was, Tessa said to herself, as if her father were her enemy. She could not rid herself of the impression that he was working against her, and with a purpose.

"My father does not love me," she thought, with a terrible pang at her heart, "and I cannot love him. There is a barrier between us, and sometimes I feel a deadly terror of him, as if he meant me evil. Why should he desire to force me into any unwelcome marriage with Squire Todhetly? Is it that he is poor, and expects to get money bartering me? Or is it, as I cannot help fancying, that he would be delighted to make me miserable for life? The idea seems preposterous, but I cannot rid myself of the impression that he is working to some evil end. Why did he tell me that my mother was dead, when she lives? Why did his eyes glare so when he spoke of her? Why did he mutter that he would be revenged upon her through me?"

She drew from her pocket the little sketch of Ignatia Redruth, and studied it with a longing intentness. Every feature of the lovely, girlish face underwent her scrutiny. There was not a weak line in the rarely beautiful countenance, nothing but innocence, brightness and goodness. Tessa's soul yearned toward her mother, as she looked upon the smiling picture.

"Not even an angel could persuade me that she was bad?" she murmured in her passionate young voice, kissing the picture rapturously. "She was—she is—as pure as a star."

She recalled her father's face, comparing it with this picture of her mother. The satyr-like countenance of Captain Holm, with its evilly gleaming eyes and sardonic smile, made her shudder, as she contrasted it with the likeness of her mother. Like a flash of light, a portion of the truth dawned upon her soul. Her mother was the innocent and injured one. It was her father who was base and unworthy.

She remembered her father's sinister regards, his inexplicable smiles, his inscrutable expression of countenance, and her pure instincts interpreted them aright, in the sudden dawn of her comprehension of him. It seemed to her, as she now reviewed the situation, that she was regarded by Holm simply as an instrument in his hands, and that he meant to employ her in working out some hideous scheme of revenge.

"It is well that I have fathomed his designs," she murmured softly. "It shall never be my hand that wounds my mother. She is rich and titled, and my father thinks perhaps it would wound her pride cruelly to unite her daughter to a dissolute scoundrel. Perhaps she loves me, despite the fact that I am the daughter of her first husband," and a tender flush transfigured the pale face, and lighted up the glorious eyes, "and my father desires to show me to her some day when I am unhappy, and dragged down by a miserable marriage? He shall not succeed in his vile attempt!"

If her resolution to fly from the Grange and return to her friends in London had lacked energy and force, it now lacked them no longer. The resolution became a fixed purpose, and Tessa revolved in her mind various plans for effecting it.

As the morning wore on she removed her hat and outer wrapppings and sat down by her fire. At one o'clock the luncheon bell rang, and before its clangor had died out a key grated in her lock, the door opened, and Captain Holm, with a mocking smile, stood upon her threshold.

"Is your rebelliousness subdued, Tessa?" he inquired, with a sneer.

The girl flashed up at him a mutinous face, at sight of which Holm, looked a little graver, although in his eyes gleamed an expression of conscious power.

"Ah, not yet!" he said. "Very well, Tessa. Indulge in your little pettish tempers as long as you choose, only I may as well remind you that you might as well hurl yourself against a wall of solid rock as attempt to combat my will. You don't know me yet, and you will do well to pray Heaven that you may never know me at my worst!"

His cold, impassive voice gave a dread significance to his words. Tessa shuddered with a thrill of foreboding.

"Have you no love for me?" she asked.

"Bah! I hate that word!" cried Capt. Holm. "I told you I did not love you. I know no such thing as natural affection, and the very thought of it sickens me. I do not want useless sentiments between you and me, and I will not feign for you an affection I do not feel. You seem to me to belong to your mother. I have neither lot nor partnership in you. You have not my features, nor my character. But I am your father, and consequently your guardian and the disposer of your future. Think of me as your master!"

"And you still insist that I shall marry Squire Todhetly?" asked Tessa, with glittering eyes.

"I do. You will do well to yield gracefully, for yield you will! You are only a weak girl in the hands of a powerful man. Remember that little fact. But we must not keep our host waiting. Take my arm and come with me to the breakfast room."

"I prefer to follow you," said Tessa undauntedly.

Capt. Holm approached her, drew her reluctant arm within his, and led her from the room and down the stairs to the breakfast room. Todhetly awaited them there, and came forward with expressions of regret at Tessa's contumacy, which had rendered a violent procedure necessary on the part of her father necessary for her benefit; but the young girl checked him haughtily, and with a flushed face took his place at the table.

The meal, it is scarcely necessary to remark, was eaten by Tessa in an almost total silence. Capt. Holm noticed, however, that there was not a trace of sullenness on the grave, sweet brow, but he was somewhat puzzled at the resoluteness in Tessa's gray dark eyes. He did not believe that this slight, frail girl, who was so ignorant of the world and its ways, would have the audacity to attempt a flight from him in the face of his threatenings, and yet he did not quite like her self-possessed and quietly determined manner.

TO BE CONTINUED.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING'S NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & CO, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & CO

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful." "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Beaconsfield, P. Q, has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

COSTELLO'S
SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL USE

SUBSTITUTES!

☞The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

THE LEADING
CLOTHING HOUSE

WE beg to notify our numerous patrons and the general public, that we are now in receipt of our

New Spring Stock of Fine Woollens,

Consisting principally of English, Irish, Scotch and Canadian Tweeds, Scotch and Irish Serges, French and English Worsteds, Fine West of England Trouserings, Black and Blue Broadcloths, Black and Blue Venetians, Doeskins, Cassimeres, &c, in all the largest and most complete stock of the kind in Canada.

OUR CLOTHING is, without doubt, quite equal if not superior to the best New York Clothing for style, fit and materials, a proof of which is the large number of First Prizes awarded, as at Toronto, Hamilton and other Exhibitions during the past season.

Gentlemen requiring FINE CLOTHING will find it to their advantage to inspect our Stock before purchasing.

We are this season, in addition to our Large Trade in Fine Ordered Clothing, making a specialty of Low Priced Tweed Suits, which we will make to order at the following prices:—

$12, $13.50, $15, $16.50.

Will cure Jaundice, Dyspepsia, Liver Complaints, Indigestion, and all Diseases arising from Biliousness. Price 25 cents per bottle.
For Sale Everywhere.

HENRY & JOHNSON'S
ARNICA AND OIL
LINIMENT
For Man and Beast.

The most perfect liniment ever compounded. Price 25 cts. and 50 cts.
For Sale Everywhere.

Ayer's
Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

IT is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The VIGOR cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair

The VIGOR is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.

Prepared by Dr. J. C. Ayer & Co.,
Practical and Analytical Chemists,
Lowell, Mass.
SOLD BY ALL DRUGGISTS EVERYWHERE.

MANHOOD RESTORED.

Prescription Free. For the speedy Cure of Seminal Weakness, Loss of Manhood, and all disorders brought on by indiscretion or excess. Any Druggist has the ingredients. Address

CINGALESE
HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of interna medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himsel cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville.

Daily Intelligencer.

Death of the Kennedy Family.

VICTIMS IN THE NICE CATASTROPHE—A BROTHER'S MESSAGE.

When the first reports of the catastrophe in the Nice Opera House were despatched it was said that "a family of three had perished" Mr. David Kennedy, of Edinburgh, the famous Scottish vocalist, read the news with thrills of horor, for his son Mr. James Kennedy, 23 years of age, and his daughters Kate and Lizzie, aged 19 and 17 respectively after brilliant season's engagements, had gone to Nice, where James resumed his studies for the third year under Signor Lamperti, a renowed Italian teacher of music. Only a few days before, a letter from James informed the father that he and his sisters would avail themselves of hearing the opera on the 23rd —the fatal night. The worst fears were confirmed, for Mr. Robert Kennedy, who had been studying at Milan, hastened to Nice on learning of the disaster, and his first message home was, "It must be told—they are all dead. The theatre blew up and fell in suddenly; death was instantaneous" A later telegram said, "Thank God, they are recognizable beyond possibility of doubt. Cut off in the earnest pursuit of a pure art, they now sing a higher and holier song in Heaven." The Mayor of Nice had given orders that all bodies recovered from the ruins should be interred at once, owing to the decomposing influence of the heat. Mr. Robert Kennedy stated that he would have the bodies of his brother and sisters conveyed to a vault in the English cemetery, six miles distand. A service would be held that day by special permission. Another message from the heartbroken brother said, "At four o'clock to-day I kissed them all for you and mother, then nailed them dawn, and now they lie in the cemetery vault till Monday." Letters, which have been received, were posted by Mr. James Kennedy on his way to the Opera House.

On Sunday the Rev. Mr. Gloag, of Nicolson Street United Presbyterian Church, preached a memorial sermon, in the course of which he spoke of the deceased as follows: "I speak of our young friends not as sweet singers of sweet song, but as youthful followers of Christ. They were trained at a Christian fireside; were taught to wear the white flower of a spotless life, and to love the house of God and all the ordinances of the holy Gospel. In all their travelling arrangements provision was made as far as possible for their being at home on the Sabbath day, and so you and I have been accustomed to see them in their places in the sanctuary. They were members of my Bible class, were members of the church—indeed it was only at our last communion that these young sisters sat at the Lord's table for the first time—their first and last communion on earth, as it has proved."

Mr. James Kennedy was an excellent baritone, Miss Kate a contralto of equal merit, and Miss Lizzie a soprano of remarkable talent. The name of the family is known the world over.

Sugar-Making.

Sugar-making now and sugar-making as it was are very different things, and what it has gained in facility it has lost in picturesqueness The old camp with its primitive appliances is no more; the "kettle" has been superseded by the "pan", and the trough has become a mass of crumbling decay. The women and children are kept at home, and no longer know the old time delights of "sugaring off," though in the Arcadia of the past their services were not despised, and the whole household set up its abode in the woods.

The sap was collected then in troughs, each about three feet long, hollowed out of sections of poplars, and was conveyed to the kettles in barrels, from which it was transferred by scoops. There were five or more kettles, from ten to thirty gallons in capacity, and each was filled with sap, which was kept boiling, the larger kettles being refilled from the smaller ones as evaporation reduced the quantity. When the contents were reduced to a desired consistency, the hot syrup was dipped out and passed through a flannel strainer into covered tubs, from which again it was poured into a large, thick bottomed kettle for the process of "stirring off," some milk and the whites of several eggs being added to it. Thus prepared it was placed over a slow fire, and kept just below boiling point until the sediment and all foreign matters in it floated to the top and were removed, when it became deliciously translucent. It was now exposed to a greater heat and gently boiled, the evaporation continuing, and bringing it nearer to the point of granulation. Now the sugar-maker was all watchfulness, and it fared ill with those who distracted him, for if the golden liquid seething in the kettle boiled the least bit too much, it would become dry in quality, while if it boiled too little, it would become "soggy." He tested it constantly, plucking threads of it from his stirring stick, and trailing them round in cups of cold water. While the threads yielded waxily to the touch, the sugar was not yet done, but as soon as one broke crisp between his fingers, the moment had come to take the kettle off the fire. As the sugar began to cool, it crystallized round the sides, and gradually the whole mass, under a vigorous stirring, became granular.

In that way sugar was made years ago, and when the sap flowed profusely the operations were continued through the night, and the fires cast strange shadows in the woods. But instead of a hut of logs a permanent sugar-house is now built, and furnished with many elaborate devices to prevent waste and deterioration. Formerly, when the maples were tapped with an auger, an "elder quill" was inserted in the incision to conduct the sap into the trough below; that is, a small piece of elder wood about three inches long with the pith bored out of it, which formed a tube: but in most orchards to-day a galvanized iron spout is used, which has the advantage of not souring the sap nor choking many pores. Everything is "improved," The collections are made with the unvarying order of collections from letter-boxes, and if a grove is on a hill, and the sugar-house is in a hollow, the sap, as it is gathered, is emptied into a "flume," which quickly conducts it to a large reservoir within the building, wherein it is strained through cloth. A scoop or a ladle is as anachronistic as a javelin. From the reservoir the sap is conducted, as required, through tin pipes into a "heater," whence it passes through a series of iron tubes, to be delivered after straining, in a condition for "sugaring off."

Maple sugar as it reaches the market is of a clearer color for all these improvements; but there are some who actually say that the flavor has fallen off, and that the now patent evaporators are a snare. One change has certainly not been for the better, and that is the abandonment of the social life of the old camps, which made sugar-time in the Green Mountains enduring memories with those who are now ebbing away,—W. H. RIDEING, in *Harper's Magazine for April.*

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

Fences Must Go.

Under the practical operation of the law now in force in the State of New York, forbidding the pasturing of cattle in the streets and roads, fences are gradually disappearing. "Othello's occupation gone" With such a law in force, fences are a superfluity and an impertinence. That dull scholar, Republic, is learning that fences are to keep cattle in, and not out. This is a very important lesson. When once mastered, it reasonableness is apparent. If you have a sow with a litter of pigs, fence off a yard for them to wander in to their heart's content, and don't compel your neighbors to build several miles of fence to protect themselves from their incursions and depredations. As it is at present, most people live in pens, for the convenience of stock, whose liberty is of more moment than that of the noble creature man. What are small town and village lots but so many human pens? Our towns and villages might be beautiful parks, but for the necessity of fencing out the animals that unwise municipal regulations permit to turn loose. Fences are unsightly. Even those on which money has been expended to make them ornamental, are disfigurements to the landscape and eyesores to all sensible beholders. The rapid consumption of timber and consequent cost of fences will ere long lead to their disuse. It will soon be cheaper to cut food for stock and carry it to them than to fence pastures in which more than half of the green growth is destroyed by the tramping of animals while grazing. When this fence incubus comes to be shaken off, people will wonder at the folly of their ancestors in submitting to it so long.

Dairy News and Notes.

The association of north-western dairymen at its late meeting in Janesville, Wis, made strong protest against all methods of adulterating cheese and butter.

As the success of dairying depends almost wholly upon the skill with which milk is handled before and during its manufacture, and as some of the processes require considerable manual skill to attain the best results, it is being urged that it would be a good thing to establish co-operative dairy schools of some sort in the dairy districts of the country. Such schools are maintained by Government in Germany, Sweden, France, England and Russia.

The sheriff of Otsego county has for two years had remarkable success in feeding fodder and hay cut by a one-horse power machine and steamed, to a dairy of 42 cows, of which he has had charge for a couple of years. He has a boiler near his barn but in a separate building, and conducts the steam by an underground pipe to large vats, into which the cut hay is put and steamed with meal. The yield from his cows has been very great, and he estimates the saving in hay is at least 20 tons for the winter. The farm is two miles from Cooperstown.

Cheese making depends upon the existence in milk of caseine, a substance which when pure is found to be an acid, and only slightly soluble in water. It can be obtained nearly pure by coagulating skimmed milk with vinegar or dilute acid, and forming a jelly-like substance made by an intimate mixture of curd and whey. These soon separate, and the whey being drained off and the residue repeatedly washed and kneaded with pure water, almost pure caseine will be obtained. It can be further purified by dissolving in a weak solution of soda, and being left to stand for 12 hours and then repeatedly washed and boiled, which will get rid of all the cream and the milk salts.

The first co-operative creamery was started in southeastern Pennsylvania, the Philadelphia district, in August, 1879, at Quakertown, as an experiment in imitation of Central New York efforts. There are now 26 such establishments in the districts and should prices keep good many more will be built this season. They last season made 650 tons of butter and 2,000 tons of cheese. The region has been a dairy district since long before the time when dairying was thought of in Central New York or the west, but until lately the product has only been such as could find a ready home market in Philadelphia. It is now anticipated that a different and more extensive business is to be done, which the importation of the co-operative creamery and cheese factory from New York has rendered possible.

Dairying during the season of 1881 promises well from the outlook at present, especially in the northwest. In Wisconsin cheese will be the main product of the dairy, although not a few factories will adopt the plan of making butter, if not through the entire season, they will as soon as the cheese season closes. A number of new factories will be erected in various portions of the state. In Iowa butter will be the product, and from reports the make for 1881 will greatly exceed that of 1880, when the product reached fully 50,000,000 pounds. In Illinois a few new creameries will be erected, and butter and cheese will both be produced as formerly. In none of the foregoing states can much cheese be found at present, and the opening of spring will give a good market especially for the better class of goods.

The centrifugal method in butter making is not yet adopted to dairies of smaller capacity than 200 cows. Its methods are not complex. The milk at a temperature of 80° is poured into a tube which by an engine is revolved at a rapid rate. By the simple law that the heaviest particles will under such treatment seek the outsike the skim milk goes to the outer rim, the best cream arranges itself nearest the centre and is drawn off. Butter from the church is placed in a wire basket and the buttermilk separated by whirling. It is thought sweet cream is better than sour. This method which the slate board of agriculture of Massachusetts has lately been examining, saves from two to five pounds of milk in the amount it takes to make a pound of butter, the separation of cream being so much more complete. There are about 200 sets of the centrifugals at work in French daries and a few in England.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

—Various threatening notices concerning the Queen led to extraordinary precautions being taken on her journey to the Isle of Wight. Foreign Socialists are believed to be at the bottom of these threats.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

TESTIMONIALS TO

MITCHELL'S CANADIAN

HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

Daily Intelligencer.

BELLEVILLE, THURSDAY, APRIL 14.

The Shrievalty Question.

The *Globe* publishes in its issue of the 13th inst. a leading article which is intended to be a reply to our strictures on the course of the Ontario Government in dismissing the Sheriff and Deputy Sheriff of this County. As a matter of fact, however, the organ's reply is no reply at all, being a a mere half-hearted denial of our charge that Mr. Fraser has appointed Roman Catholics to office in this County regardless of their qualifications, in no less than five instances within two years past, with the easily apparent object of purchasing the votes of Roman Catholics not in this district only, but throughout the Province. This charge it characterizes as absurd ; but could the editor of the organ counsel with leading Reformers—we might truly say with the great bulk of the party—here, he would learn that our strictures have struck home, and that there is a mutiny amongst them in consequence of the appointments which we have condemned as having been made on grounds of religion and nationality.

The organ asks : "Does the *Intelligencer* "mean to say that no Catholic should have "an office, however well he may be fitted "to fill and adorn it ? And if it is proper "to appoint a Catholic sometimes to office, "will it be said either that the particular "appointees in Belleville are unsuitable or "the offices to which they have been ap-"pointed are such as no Catholic should be "allowed to fill ? Is Dr. Murphy unfit to "act as physician to the Deaf and Dumb "Institute, or Mr. O'Brien to fill efficiently "the post of Deputy Sheriff?" To this series of interrogatories we answer : No man's religion should be a bar to his appointment to a public office, neither should it be made a stepping stone to his advancement, the more especially when, as in the above instances, the appointment is made in order to influence those who profess the same religious belief as does the appointee. This has been our position in the past, therefore the organ's charge of "bigotry" falls to the ground. As to the qualifications of Dr. Murphy, we have not spoken, but the grounds of objection to him strongly held by his party seem reasonable, namely the short period of his residence in Belleville, and the superior claims of other medical men who have long served the party, but who, unfortunately for them, would not suit Mr. Fraser's purposes. So far as regards Mr. O'Brien, those of his own party who know him object to him as having been a Tory but a few years ago, and as being unfitted to fill efficiently the post of Deputy Sheriff. The local organ of the party has not ventured to commend his appointment in any respect, otherwise than in the most timid manner, because it has learned how distasteful it is to the great body of Reformers in this part of the country. We trust these answers are explicit enough.

The *Globe* refuses to accept our statements with reference to the intimations made by the Premier, Mr. Wood, and Inspector Langmuir, on our "unsupported testimony." These statements were deliberately made, and if the *Globe* will refer to Messrs. Mowat and Wood, and give their replies to questions based on what has appeared in our columns on the subject, our authority will be produced, if necessary. The Deputy Sheriff has already been given as authority for Mr. Langmuir's statement to him.

The Deputy Sheriff, our contemporary says, "was appointed not by the Govern-"ment, but by the Sheriff, and his vocation "ceased when the latter was dismissed, as "a matter of course." How is it, then, that Mr. Patrick O'Brien has been appointed to the position by the Government ? Why was not the new Sheriff given the opportunity of retaining, if he should so desire, the services of so thoroughly efficient a Deputy as Mr, John Taylor had proved himself to be during eighteen years of service ? The answer is obvious. The Government which now rules Ontario really makes these appointments, and does so in an underhanded manner, just as it does in the cases of Gaolers and Turnkeys.

"The INTELLIGENCER is unkind enough "to say that both the late Sheriff and his "Deputy were active Conservative sym-"pathizers. If so they are the less entitled "to sympathy themselves, for a Sheriff is "supposed to keep out of politics." So says the *Globe*. The INTELLIGENCER did not make any such assertion as that the Messrs. Taylor were *active* Conservative sympathizers. Neither of them ever, whilst holding office, so far as we are aware, interfered in any manner in politics, and the best proof that they did not the the *Globe's* own statement that Conse[illegible] not generally supposed to have they [illegible] sympathies. Nevertheless ions ; for because of their political opin- of finding [illegible] can assert with any hope Grits—active G[illegible] that, had they been here are—they wo[illegible]hat, as some officials These are the only [illegible] been dismissed. [illegible] of the *Globe's* article to which reference is here necessary, the greater portion of it being devoted to the dragging in of extraneous matters which have already been discussed. We are ready and willing to discuss these questions again in their proper relations, but the *Globe* cannot succeed in inducing that discussion on side issues which it aims at, in order to distract attention from the contemptible conduct of the Government in regard to the dismissals and appointments of which we complain.

Editorial Notes.

THE MEEK TO THE FRONT.

The Guelph *Herald* says:—"The *Globe* says Mr. A. H. Dymond was not an office seeker. Well, now, that is good." Dr. Hope states that he did not seek the posisition of Sheriff of Hastings, and yet he got it. And who dare accuse Mr. O'Brien, Mr. Grainger, Mr. Lally, Dr. Murphy, or Mr. McCann, of Tweed, of being office-seekers ? but still they all got good offices. Verily the meek are inheriting the good things under the Fraser-Mowat dispensation.

ANOTHER CHANCE.

By the removal of Mr. Dawson, one of the issuers of marriage licenses, to Toronto, another piece of patronage will be placed at the disposal of the Ontario Government. Who will Mr. Fraser appoint from amongst his fortunate friends who do not seek office ?

A "WILD GOOSE CHASE."

Mr. Blake's scheme of Imperial Federation does not meet with hearty approval from all the organs of his party. The Port Hope *Guide* is unkind enough to scout his high-flown ideas as follows :

> The *Guide* claims to belong to the advanced Liberal wing of the Reform party ; but we don't choose to ignore our own individuality, and support radical changes that would in our humble opinion, be most detrimental to the best interests of this, our common country, merely because those measures emanated from our recognized leader. We are not willing to see our leaders going off upon a wild goose chase and not sound a note of warning for mere party expediency.

Does it not strike the *Guide* that Mr. Blake has been indulging in other wild-goose chases, notably in regard to representation of minorities, the Pacific Railway contract, and the tariff ?

Trenton Notes.

TRENTON, April 13.

The nomination for Reeve will take place on Tuesday the 19th. D. Gilmour, who was unseated on account of his new mill being exempt from taxation for a number of years, has succeeded in having the by-law granting such exemption repealed, and will likely be the only candidate in the field.

The sugar social in the new Presbyterian church last night was a grand success. The church was crowded and a very pleasant time was spent by those present. Sincere regret was expressed by the speakers that Mr. Stewart, the resident minister, had been compelled to go abroad on account of ill health.

The roof of the M. E Church has been undergoing repairs during the past week.

Mr. Mowat, son of Prof. Mowat of Queens College, Kingston, is the party who has purchased Mr. White's hardware stock.

Election of Benchers.

FIVE JUNIORS ELECTED.

The counting of votes, which has been going on at Osgoode Hall since Thursday last, was concluded on the 12th inst. Special interest has attached to this election, owing to the controversy which has arisen with regard to the question of introducing junior barristers to act as benchers. From the following list it will be seen that Messrs. J. J. Foy, J. F. Smith, J. H. Ferguson, H. W. Murray, of Toronto, and D. Glass, Q. C., London, are the five newly elected. The figures give the number of votes polled by each :—

W. R. Meredith, Q. C., London	541
D. McCarthy, Q. C., Toronto	518
J. Bethune, Q. C., Toronto	510
D. B. Read, Q. C., Toronto	508
T. Ferguson, Q. C., Toronto	490
Dr. McMichael, Q. C., Toronto	465
F. Mackelcan, Q. C., Hamilton	447
J. Maclennan, Q. C., Toronto	433
John Hoskin, Q. C., Toronto	423
C. Moss, Toronto	404
T. M. Benson, Port Hope	403
T. Robertson, Q. C., Hamilton	370
J. K. Kerr, Q. C., Toronto	352
H. Cameron, Q. C., Toronto	341
Æ, Irving, Hamilton	337
B. M. Britton, Q.C., Kingston	357
John Bell, Q.C., Belleville	321
Hon. A. S. Hardy, Q.C., Brantford	319
J. J. Foy, Toronto	307
H. W. M. Murray, Toronto	300
S. Richards, Q.C., Toronto	298
Hon. T. B. Pardee, Sarnia	289
E. Martin, Q.C., Hamilton	283
J. F. Smith, Toronto	277
W. H. Scott, Q.C., Peterboro'	268
J. Crickmore, Toronto	263
J. H. Ferguson, Toronto	255
D. Glass, Q.C., London	248
A. Lemon, Guelph	229
W. L. Smith, Toronto	227

CANADA PACIFIC.—The Winnipeg *Times* of the 3rd April says: General Rosser, chief engineer of the Canadian Pacific Railway, intends sending out a survey party under the direction of Mr. Force on Monday next, to locate the line of the C. P. R. west of Portage la Prairie, in the direction of Grand Valley. He will proceed westerly until Mr. Barclay's party, now working east from Grand Valley, is met. Mr. Quinn in charge of another survey party will shortly follow in the wake of Mr. Force. Mr. Secretan, who has been entrusted with the survey of the route beyond Grand Valley, will not start until the opening of navigation.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

After trying many midicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

Mrs. Mary Harrington, Kouchibouguoc, N. B., says : "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

News Condensed.

—Two more arrests have been made under the Irish Protection Act.

—A storage and malting company has been organized at Peterborough.

—The Irish bishops have separated without pronouncing on the Land Bill.

—A boy only seven years old, was arrested in Montreal on the 11th, for stealing $35 in bills.

—The *Mail* and *Globe* have advanced their subscription price for their daily issues to $7 a year.

—In several of the large cities the wholesale houses will close from Thursday night until Monday.

—There are now good prospects of peace being concluded between the Cape Colonists and the Basutos.

—Lord Beaconsfield's condition is not materially changed. The latest despatch states that he is slightly stronger.

—The latest returns from Chio report the number of the killed at 3,000, and the injured 10,000. Many of the survivors are emigrating.

—Mrs. and Miss Phair, Toronto, have been held for trial on the charge of concealing the birth of the illigitimate child of the younger woman.

—Gen. Skobeloff telegraphs to St. Petersburg that the chief leader of the Tekke Turcomans has surrendered, and that the war is at an end.

—A prominent contractor from Lachine has mysteriously dissappeared and considerable anxiety is felt about him as he had a large sum of money in his possession.

—Mr. McLaren, Q.C., of Montreal, has been instructed by the Department of Indian affairs to submit a test case of the title of the Oka Indians to the lands they occupy to the Courts for adjudication.

—Lord Dufferin will probably leave St. Petersburg on Friday for Constantinople, where he succeeds Mr. Goschen as British Ambassador. Sir Augustus Paget succeeds him at St. Petersburg.

—The Bishops of Ontario and Toronto, accompanied by Mr. J. Cartwright, of Toronto, will shortly go to England on behalf of Trinty College to take means to secure a fit and proper successor to Provost Whitaker.

—Interviews with farmers from all parts of the Ottawa valley show that the fall wheat crop has not been injured to any great extent by the recent severe weather. The area sown in the Ottawa valley this season is unusually large.

—In consequence of the fierce weather which prevails on the North Atlantic during the winter months, a writer to the London *Daily Telegraph* suggests that the transport of cattle should be prohibited between the months of October and April.

—A party of forty Canadians from along the line of the Canada Central railway left Brockville yesterday by special train for Manitoba and the North-West. They took with them twenty car-loads of freight, consisting of live stock and farm implements.

—The voting on the new measurement rule proposed by the council of the English Yacht Racing Association resulted as follows :—In favor of the proposed alterations, 45 ; opposed 34. As a majority of two thirds had to be in favor of the proposal for it to become law it was not carried, and the yacht measurement rule of England remains as it was.

The Scott Act in Hamilton.

Defeat of the Measure.

The Canada Temperance Act was voted upon in Hamilton on the 13th inst., and after a brisk contest the large majority of 1,156 votes was recorded against the adoption of the measure. The returns of the voting are as under :

LOCOMOTIVE WORKS.—The *Whig* says:—"At the first meeting of the new Canadian Engine and Locomotive Company, held in Montreal on the 12th, the following directors were elected : Hon. Thos. McGreevy, Quebec ; Messrs. Peterson and Beattie, Montreal ; Messrs. G. A. Kirkpatrick, M. P., A. Gunn, M. P., and W. Harty, Kingston ; Mr. Hugh Ryan, Perth. At a subsequent meeting of the board Mr. G. A. Kirkpatrick, M. P., was elected President ; Hon. Thos. McGreevy, Quebec, Vice-President ; and Mr. J. W. Pyke, Secretary-Treasurer. The latter, who filled the same position for the old company, will remove to this city immediately. The head office will be here. The company have work sufficient to keep their shops busy until next September. The working staff is being increased gradually. There are several applicants for the position of Superintendent."

THE NEW COLLECTOR OF CUSTOMS AT TORONTO.—As has for some time been expected, the Hon. James Patton, Q. C., has been appointed Collector of Customs at the Port of Toronto. Mr. Patton who was a brother of the late Archdeacon Patton, for some years Rector of Belleville, was born at Prescott on June 10th, 1824. Entering public life many years ago, in the old Canadian Parliament, Mr. Patton's abilities soon placed him in the front rank. He sat in the Cabinet as Solicitor-General in 1862. Afterwards, retiring from public life, he settled down in Barrie, and entered the editorial field, from whence he removed to Kingston, where he practised law with the Right Hon. Sir John A. Macdonald, removing to Toronto some years later. When the English and Scottish Investment Company was established some four years ago, the position of Managing Director was offered to and accepted by Mr. Patton. The Minister of Customs and the Premier are to be congratulated upon the choice they have made, as a more competent gentleman could not be found to discharge the duties of Collector of the first Port in Ontario. Throughout his life Mr. Patton has been a most prominent Conservative, and has rendered very great service to his party.

'Hail bounteous, beauteous, gladsome Spring" —this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas ! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters ; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

Marine Notes.

The *D. W. Folger* has been chartered to carry iron ore from Port Hope and Belleville to Fairhaven on private terms.

The *Pierrepont* reached Cape Vincent on the 12th, says the *Whig*, without any trouble. Capt. Miller reports seeing vast fields of ice on the lake. Should a stiff south wind set in both the Canadian and American channels would be filled up with floes.

Several vessels are loading at Toronto and other lake ports, and navigation on Lake Ontario may now be regarded as open, about one week later than Vennor predicted.

Capt Paul, who superintended the Government work in the western channel at Toronto last season, will do so again this season. He has been out now for some days taking soundings, and going over the ground where the dredging operations will be carried on. Work will not commence until the ice has disappeared, or until there is no danger to be apprehended from floating ice.

Gull light-house, Port Hope, has been illuminated since Monday evening.

Navigation is about one month later than it was last year.

Water is reported low in Whitby Harbor. It is so in other harbors along the lakes.

Lake Michigan harbours are said to be tolerably free from ice.

TURKEY AND GREECE

Acceptance of the Porte's Proposal by the Latter.

BERLIN, April 13.—The Greek Minister here has formally announced that his Government has notified the representatives of the Powers at Athens of its acceptance of the Turkish proposals touching the frontier conditionally upon the Powers guaranteeing the loyal surrender of the ceded territory.

VIENNA, April 13.—It is reported that the whole of Northern Albania is in insurrection, and 15,000 men are marching against Dervisch Pasha at Scutari. The news must be accepted with reserve.

PARIS, April 13.—A telegram received here from Athens confirms the report from Berlin that Greece has accepted the Turkish proposals, and state that Greece at the same time commends the Greek population remaining under Turkish rule to the equitable consideration of the Powers.

New York Weekly Hop Report.

Published by the New York Daily Commercial Bulletin.

HOPS.—The market has been exceedingly quiet throughout the week and without feature of interest. Strictly prime and choice stock remains very firm, however, owing to the limited quantities available, but some inferior qualities recently bought at low prices in the country markets may possibly be had at a shade under the figures generally asked for that class of stock until within the last few days. The English brewers, for whom considerable quantities have been bought of late, are now fairly supplied, and it is probable that no further orders will be sent this way until there is again a pressing need of supplies. The stock of American hops now on the London market is, according to our latest mail reports, nothing more or less than the rejections from the receipts early in the season, and those goods are offering at exceptionally low prices. We fail to learn of any material change in the London market announced by cable. The demand from home brewers has been a little more satisfactory during the past few days, but in nearly all instances purchases have been confined to small lots that might be needed for passing wants. It is very probable that with the advent of warmer weather the home trade will be more satisfactory ; so probable indeed that dealers are not inclined to force business by naming lower prices except on the common st run of stock. Some very fine samples of a few lots of 1879's have been shown and are held at 18c. Nearly that price was bid and refused for the whole amount,

HOPS.—Emmett Well's circular says: The market keeps firm under the hope and expectation that as soon as there is an agreeable change in the weather brewers will come in and buy more freely. Exporters continue taking just enough hops to prevent stocks from accumulating ; and if holders will have the good sense not to force sales for the next few weeks to come, there is every reason to believe that present prices will be sustained and that we shall have a good and satisfactory brewer's trade during the remainder of the season. Our London letter gives no encouragement for a lively export trade, and unless the English roots show up bad next month we had best not look for many more orders from that source this season.

Proclamation by the President.

Fault-finding is so seldom indulged in by those who use medicines manufactured by the World's Dispensary Medical Association, that the President of that corporation the Hon. R. V. Pierce, M. D., has issued a special request or proclamation to any and all persons, if there be such, who may have taken or shall hereafter use any of the family medicines made and sold by the said Association, in all countries of the world, and who have not derived full benifit from said medicines, that if they will write the said Association a description of their maladies the Faculty of the Dispensary will advise them with respect to the successful treatment of their diseases. Dr. Pierce's Golden Medical Discovery is gauranteed to cure all humors, from the common blotch, pimple or eruption, to the worst scrofula or king's evil, and those virulent poisons that lurk in the system as a sexuel or secondary affection resulting from badly treated or neglected primary diseases. It also cures bronchial, throat and lung diseases. Favorite Prescription is guaranteed to cure female weaknesses and kindred affections. Extract of Smart-Weed cures bowel affections, colds, and all painful rheumatic and neuralgic affections. Dr. Pierce's Pellets (little sugar-coated pills), are the little giant cathartic. Address, World's Dispensary Medical Association, Buffalo, N. Y., or Great Russel Street Buildings, London, England.

☞Expect oysters by express to-night.

Jas. Wallace.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

SPRING.

GRAND ORGAN RECITAL !

—AND—

SACRED CONCERT,

—BY—

Mr. F. H. Torrington,

(Organist Metropolitan Church, Toronto,)

AT CHRIST CHURCH.

—ON—

Wednesday evening, April 20th.

TICKETS 25 CENTS.

Particulars in a few days.

THE CHEAPEST

BLACK SILKS

IN THE CITY.

—:o:—

WE have just received 6 pieces more of our celebrated Black Silk at $1.29 per yard.

It is decidedly the best value of Silk in the Dominion of Canada—soft in make, so that it will not easily crease or cut. We consider it fully as good as any $2.00 silk that is sold in the city. We have also

A CHEAPER SILK!

6 pieces, which we offer at $1.03 per yard. This is what is usually sold at $1.50 per yard. These classes of Silks cannot be purchased elsewhere as cheap as we offer them.

CARPETS!

We have also received several bales of UNION CARPETS in first-class patterns at medium prices.

Our assortment of carpetings is one of the largest in the city, We have some specially low lines in Tapestries.

GLASGOW WAREHOUSE.

Local Notices.

Notices under this head 10cts. a line each insertion. After six insertions 5 cts. a line.

SOCIAL AND LECTURE in the City Hall on Monday evening, 18th inst., in aid of Bleecker St. Church. Refreshments (sandwiches, cakes, tea and coffee) served from 7 to 8 p.m., when the Rev. Dr. Jeffers will take the chair and Rev. Dr. Hunter, of Toronto, will deliver his celebrated lecture on "The Marriage Question." Admission to both only 25 cts. Let the Hall be filled.

THE Literary Association of John St. Presbyterian Church will hold a social in the School room on Friday at 7:30. Admission 15 cents.

Daily Intelligencer.

BELLEVILLE, THURSDAY, APRIL 14.

6 O'CLOCK EDITION.

City and Vicinity.

TO-DAY is "Holy" or "Maundy Thursday."

THE close season for pickerel will commence to-morrow.

THE ferry steamer *Mary Ethel* commenced her regular trips to-day.

TO-MORROW being Good Friday, no paper will be issued from this office.

THE public and high schools close to-day and do not open till Tuesday next.

THE bay is now clear of ice as far as Big Bay, the ice in which is also rapidly disappearing.

THE market to-day was larger than the average Thursday market, and prices ranged high.

FOUR prisoners and a tramp shared the accommodation of the police cells among them last night.

THE Finance Committee should properly meet to-morrow evening, but it is not likely that a meeting will be held.

THE Peterborough Cricket Club propose to have a home and home match with the Belleville Club during the coming season.

THE full Court will deliver judgment in the important case of Jellett *vs.* Anderson, in which the rival ferries are concerned, on Tuesday next.

SOME roughs, divided into two hostile gangs, made night hideous on Church Street between 9 and 10 o'clock last night. The police did not put in an appearance.

THE old house which has been in course of removal from Pinnacle St. for four days has at last reached its destination on Mrs. Ross Thompson's property on Church St.

THE rowing season may be said to have already commenced. A number of our oarsmen have been on the water. It is just a nice little spin from the docks, around the new lighthouse, and back.

REV. MR. PIRRITTE, formerly M. E. minister in Belleville, has been elected Assistant editor of the *Christian Advocate*, the organ of the M. E. Church in Canada, and which is published in Hamilton.

A MAN, apparently "under the influence," drove a horse on to the sidewalk, corner of Front and Bridge streets last night. The animal was backed off by parties who stood on the sidewalk, and the driver drove off at a sharp trot across the bridge.

ATTENTION is directed to Messrs. Brignall & Thompson's new advertisement, which appears in other columns. They announce the receipt of a large direct importation of house furnishing goods, of which department they will make a speciality.

THE city will be inundated by Peterboro' people to-morrow, as at least 500 are expected to come down by the excursion train which will arrive about noon. It is to be hoped that they will be courteously received during their short stay here.

A LARGE number of tickets are being sold in town for the Oddfellows' Excursion to Peterborough, over the G. J. Railway, on Tuesday, the 16th. If the day proves fine there will certainly be a great many of our citizens who will take advantage of it.

LAST evening a couple of business men on Front St. were amusing themselves by tossing a ball to each other across the street, when one of them missed his catch and the ball went through a large pane of glass in a shop window. That game of catch will cost the two players a couple of dollars apiece.

THE City Clerk received yesterday a postal card from the Clerk of Kingston, inquiring how many By-laws had been passed by the Council of Belleville during the past ten years which had for their object the encouragement of manufactures in Belleville. The City Clerk, after a careful search, was obliged to reply that not a single by-law of this nature had been passed within the period stated.

REV. J. W. BURKE informs us that he has had intelligence from Ottawa to-day, that Rev. T. A. Parnell has resigned the Rectory of Kemptville to which he was appointed last year, and Rev. Canon Jones of St. Albans has been appointed to succeed him in the Rectory and Archdeaconry.

WEATHER PROBABILITIES. — Toronto, April 14.—Lakes, moderate to fresh westerly to southerly winds, fine, warmer weather.

MARCHMONT CHILDREN.—Sixty-six boys for the Marchmont Home arrived yesterday by the evening train from the east. They are a remarkably healthy looking lot of fellows, their ages varying from 10 to 15.

PENSION DAY.—Major Milligan, Staff Officer of Pensions, arrived in town yesterday on his quarterly visit, and to-day distributed their pensions to Her Majesty's pensioners in this district.

SACRED CONCERT.—A very fine programme has been prepared for the concert which is to be given in the M. E. Tabernacle on Friday evening, the 22nd inst., and some of the best talent which Belleville can afford is to take part in it. It will be well worth attending.

CHEESE MAKING.—The West Huntingdon cheese factory began operations for the season on the 31st ult., and had 42 cheese in hand yesterday as the result of the work thus far done. An extra vat is being put in this factory, making a total of four now in use in this establishment, which the directors consider one of the best in the country.

CHRIST CHURCH ORGAN RECITAL.—The programme for this organ recital and sacred concert which is to take place next Wednesday evening, will appear in our Saturday's issue. In addition to the great attraction of Mr. Torrington, Mrs. Caldecott of Toronto (late of Montreal, and one of its most popular amateur singers) will assist. Several of our leading local talent will also take part on the occasion.

GLOOMY PROGNOSTICATIONS.—This is the dismal view of the weather during the spring months which is taken by an Iowa Vennor:—April, from 5th to 15th intensely cold, with moon-dogs in the distance; 15th to 20th, snow: 20th to 30th, more snow. May, 7th to 10th variables, with occasional snow; 10th to 25th, heavy frosts in the south; 15th, piercing north-west winds, with a driving snow-storm.

"THE WEEKLY INTELLIGENCER."—To-day's issue of THE WEEKLY INTELLIGENCER comes out in the new and improved form in which it will hereafter appear—a mammoth sheet of eight pages 25 x 17½ inches each. We are sure that the readers of the WEEKLY will appreciate the change, which will make the paper more easily read, as well as being less difficult to preserve by binding, and the amount of reading matter is besides largely increased.

"BELLEVILLE has a shipyard by reason of Capt. Cuthbert building a yacht." So says the Kingston *News*. Our contemporary's sneer is rather out of character, so for its benefit we will state that Capt. Cuthbert is not only building a yacht, but has also built a steamer 70 ft. by 14 ft. beam, which is fast approaching completion, and has other work ready to go on with. He has given employment to ten men in his shipyard since commencing operations here.

TAKING THE ROAD.—The Ottawa *Free Press* of the 12th says: "'The Old Man,' Mr. Alex. Jaques, sr., leaves the city to-night for Montreal, and will bring up at Buffalo. He is to act as Press and advance Agent of the Shelby, Pullman & Hamilton Show for the season. The combination opens at Belleville on the last day of the present month, and will go westward, doing Ontario thoroughly, after which they will come east. 'The Old Man,' as pilot, will take the show through successfully—if he cannot, no other man can. His many friends wish him a pleasant time of it. The Ottawa artists will join the show at Belleville a few days before it starts on the road."

THE B. C. C.—A meeting of the Belleville Cricket Club was held at "The Hub" saloon last evening for the purpose of organizing for the season. The only business transacted was the election of officers, which resulted as follows:—Patron, Alex. Robertson, M. P. P.; President, C. J. Starling; 1st Vice President, H. Hodgson; 2nd Vice President, N. B. Falkiner; 3rd Vice President, J. P. Reeves; Secretary, W. H. Biggar; Treasurer, Jas Jenkins. Committee—Geo. Dean (Chairman), O. Jones, E. Corby, W. Thomas, Geo. Maybee, A. M. Kemp, W. B. Robb. Honorary Members—W. Peden, Jas. Clarke and E. R. Benjamin. It was decided not to elect a permanent Captain, but to appoint a Field Captain for each match. The membership fee was fixed at $2.

JUNK SHOPS.—The appearance of three boys before the Magistrate this morning. charged with larceny, was a forcible argument in favor of taking some measures for the regulation of the second-hand stores of the city. These places are a great source of evil to the youth of the city. They will receive almost any kind, quality and quantity of material, and their principal customers are boys under fifteen years of age. When they first begin to gather material to sell to the keepers of these shops, the boys will generally confine themselves to the streets and public places—picking up bones, scraps of old iron, rags, &c., but by and by this process of gathering becomes too slow, and then they invade yards, and after awhile even enter kitchens, and steal everything they can lay their hands on and carry away easily. The junk-shop keepers never ask any questions; they buy everything that is brought to them, and though the price they pay is often ridiculously low, it amply repays the boys for their trouble in stealing the articles. A great many boys are being corrupted through the instrumentality of these unprincipled dealers. A measure should be passed prohibiting them from buying anything from any person under a certain age—say eighteen.

HENNESSEY'S specialty for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

The Peterborough Visitors.

On the arrival of the Peterborough Fire Brigade band to-morrow, they will be met by the band of the 15th Battalion, whose guests they will be, and escorted to the band room. In the afternoon they will perform the following programme on the market square:

1. Quickstep—Joye.
2. Fantasia—Around the world in 20 minutes.
3. Valse—True Love.
4. Selection—Lucia.
5. Polka—Imperial.
6. Fantasia—Relief of Ekowe.

God Save the Queen.

During the intervals the band of the 15th will render a number of selections.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

THE OLD HAND ENGINE.

IT IS DECIDED TO SELL IT.

A meeting of the Fire Committee was held last night. There were present:—The Chairman, Ald. Smith, and Aldermen Clarke, McIninch and Frost.

The following

ACCOUNTS

were passed:—

H. B. Rathbun & Son, coal	$67 00
Edward Paleu, repairing	12 91

The account of the Canada Rubber Co., for rubber hose ($1,228.90), was laid over in order to obtain the proper vouchers.

The question as to the disposal of the old Hand Engine came up for consideration.

Ald. Frost moved that the Chairman write to the various municipalities in the vicinity offering the sale of the engine as it now stands.—Carried.

The Committee then adjourned.

Police Court.

(Before T. HOLDEN, Esq., P. M.)

TUESDAY, April 14, 1881.

DRUNK.

Marilius Easton was charged with drunkenness. His face bearing strong testimony that he had already fallen among rough companions and had received a considerable amount of punishment, the Magistrate allowed him to go.

LARCENY.

Charles Westlake, James Hill and Robt. Stillman, three boys, were charged with stealing lead pipe and various other articles from a vacant house under the care of Mr. Jas. Glass. Stillman was discharged, Westlake (who plead guilty and turned Queen's evidence (was allowed to go, to appear for sentence when called for, and Hill was sent up for trial.

ILL-TREATMENT OF A CHILD.

Mrs. Brown, wife of Rev. Jos. Brown, was accused of having cruelly and unnecessarily beaten a little girl named Annie Vanalstine, who was in her employ. The case was adjourned till next Wednesday, at the request of Mr. Dickson, counsel for the defence.

Marmora Correspondence.

A gravel road is to be laid shortly between the Gatling mine and the village, which will prove a great convenience.

A mammoth boarding house, capable of accommodating 300 boarders will also be erected there before long.

Canada's mottoes, it seems, will also be those of Messrs. Rothwell, namely "Religio, Scentia, Libertas," as a school house, and a church are to be built.

The telegraph line will also soon be laid between there and the village. Also the enormous steam quartz crushing mill, with it's 100 ponderous, cleaning stamps on the banks of the Moira.

Messrs. M. Powell and G. J. Cameron have sold 50 acres of land near Malone, which contains large quantities of iron ore, to Messrs G &. W. Cole, who intend running shafts on it for obtaining the ore.

Although many persons have suffered from the long and severe winter, still it is an ill wind that blows nobody good, whether it may be the the fierce Kabibonaika or the keen, cutting Waubuno, as the lumbermen here, T. P. Pearce, Esq., amongst the rest, have had a profitable winter's work.

Mr. George Cook has been engaged as cheesemaker in Marlbank cheese factory for the ensuing season, so its patrons can be assured of a competent manufacturer.

Messrs. J. Wolfe and M. O'Conner are putting up a cheese factory near Brighton, Northumberland Co.

Mr. J. Gillen has taken a contract to make cheese in the Irish settlement, Madoc, so the inhabitants of that renowned part of the township may know they have a man who understands his business.

Campbellford Correspondence.

CAMPBELLFORD, April 11th, 1881.

Our band made its first appearance in public on Saturday night last, and played some very lively airs. They have certainly made great improvement under the winter training of Mr. James Dickson. We hope these rehearsals will be continued throughout the summer evenings.

The Messrs. Dinwoodie have had in a car load of salt for agricultural purposes the past week.

Mr. M. Hawley is building a new oven on the west side of the Hawley Block.

Robins and other migrating birds are making their appearance here to-day.

Your correspondent has been for a drive this afternoon, and took particular notice of different fields of wheat, and I am happy to say that although we have had severe frost lately there is but a very little damage done in this locality, and I am informed by farmers generally that the present prospects are very encouraging.

An accident likely to be attended with very serious consequences happened to Mr. F. Caddy, son of Mr. C. Caddy, Provincial Land Surveyor of this village, whilst looking on yesterday at the laborers blasting out stones on the raceway of the new factory, a fragment of the rock falling on his head causing a dangerous wound, but we understand it is not so alarming as at first expected.

NEW STEAMSHIP LINE.—Mr. W. C. Munderloh, Greman Consul at Montreal, had an interview with the Minister of Agriculture on the 13th, in relation to the encouragement of direct steamship communication between the European Continent and Canada. He has succeeded in a measure in establishing a direct trade, and the first steamer to leave Antwerp for Montreal sails on the 20th of the present month, startng on the return trip from Montreal on the 20th of May. Mr. Munderloh believes that with the abolition of tolls on Canadian canals the carrying trade from the Western States to the Continent can easily be secured.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes. which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

FOR FROST BITES AND CHILBLAINS.—Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

A country doctor writes: " am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

A beautiful head of hair is appreciated by everbody, and how to secure it, interests everbody. The hair and scalp must be keep free from scurf and dandruff, and not be alowed to get dry and harsh. The roots must be stimulated to healty action. Flexibility and a handsome gloss are essential. All these requisities are easily secured by the use of Ayer's Hair Vigor.

MORNING DESPATCHES

EUROPEAN.

A LEAGUER'S SPEECH.

DUBLIN, April 14.—Gordon, who was arrested at Claremorris under the Coercion Act, addressed the people at the station, saying, "Keep up your courage, I'll be back again to fight the landlords." He referred to the eviction of 5 persons at Curraghea by 300 policemen, many of whom shed tears and subscribed money for the evicted families.

RUMORED FLIGHT OF AYOOB.

BOMBAY, April 13.—It is rumored that Ayoob Khan has fled from Herat to Meshed.

BRITISH GARRISON REMAINING.

Although the evacuation of Candahar begins to-day the British still garrison Chaman Chauki, Galistan, and Karez as protection for the Piskeen Valley, which is not to be abandoned at present.

The evacuation of Candahar has been postponed until Saturday owing to rains.

AMERICAN.

WILL TO BE CONTESTED.

BOSTON, April 14.—It is said the will of Eben Wright, who left $2,000,000 to Mrs. Whittier, will be contested by relatives.

DAMAGE BY A HAILSTORM.

FAYETTEVILLE, Ark., April 14.—A hailstorm here damaged property to the amount of $15,000, and injured a number of persons.

VISITING A CAVE.

CITY OF MEXICO, April 14.—An expedition to the cave of Cacupuamilpa, in honor of General Ord, nearly resulted fatally to the Governor of Morelas and several others, who were overcame by foul air. The party numbered 500, including women and children, and were sleeping in tents erected under ground, three miles from the mouth of the cave.

KELLY AND TAMMANY.

NEW YORK, April 14.—The opposition to John Kelly in Tammany Hall, claim to have a majority of the members pledged to their ticket at the coming election.

SHERMAN ON REFUNDING.

Senator Sherman is reported as saying:—"I heartily approve of the plan for refunding announced by Windom, believing it to be the very best thing to be done under the circumstances."

STABBED IN A ROW.

In a bar-room quarrel last night, Henry Johnson stabbed John Maher, aged 24. Johnson was arrested.

DEATH OF GEORGE PARISH.

George Parish, who owned extensive estates in Bohemia, died at Venice yesterday, aged 71. Mr. Parish resided many years at Ogdensburg.

NO TRICHINA IN CHICAGO.

CHICAGO, April 14.—A chemist of the Health Department yesterday examined 400 hogs at random in the packing houses. Not a single trace of trichina was discovered.

DAMAGES REPAIRED AT OMAHA.

OMAHA, April 14.—The trains are running regularly. All damages by the flood are being repaired.

PROFANATION OF THE SABBATH.

BALTIMORE, April 14.—The Pope's Encyclical, prepared at the suggestion of Archbishop Gibbon, of this city, deplores the profanation of the Sabbath by keeping open stores and shops and performing manual labor.

NEW RAILWAY.

CLEVELAND, O., April 14.—The contract has been let for the immediate construction of a section of the New York, Chicago and St. Louis Railway between Cleveland and Buffalo.

RAILWAY ACCIDENT.

ATCHISON, Kansas, April 14.—Yesterday the engine of a passenger train left the track and plunged into the Missouri river five miles from here. The engineer, fireman and pilot swam ashore. The baggage car tumbled on top of the locomotive. Two passengers were slightly injured.

AMERICAN HAM AND PORK.

WASHINGTON, April 14.—The Consular reports show that the efforts now being made in Europe to create a prejudice against American pork and ham is due to fears of business men that the protracted heavy drain of gold from the old world to the United States may eventually result in a serious disturbance of the monetary balance between the two hemispheres.

SALE OF A TROTTER.

LEXINGTON, Ky., April 14.—Isaac Smith sold his four year old trotter "Jewel" to Peter Schulz for $15,000.

AFTERNOON DISPATCHES.

A TREASONABLE PUBLICATION.

LIVERPOOL, April 14.—The *Post* says that the Irish authorities have made arrangements to seize copies of the New York Irish *World* in transit between New York and Queenstown as a treasonable publication.

FAILURE AT GLASGOW.

GLASGOW, April 14.—Wm. Jamieson, of the old established firm of Patterson & Jamieson, manufacturers, has suspended; liabilities stated to be heavy.

ANTI-JEWISH PETITION.

BERLIN, April 14.—The famous anti-Jewish petition sent to Bismarck yesterday, consists of 26 volumes, comprising 14,000 sheets with 255,000 signatures, including those of noblemen, retired Generals and Officials.

A BISHOP MADE TO APOLOGIZE.

LONDON, Auril 14th.—The *Post* states that Archbishop Croke, of Cashel, has had to apologize for writing to Archbishop McCabe, Dublin, by superior order, for attacking McCabe's Lenten pastoral. McCabe has accepted the apology.

ANOTHER ARREST UNDER THE COERCION ACT.

LONDON, April 14.—James Daley, proprietor of the Connaught Telegraph, was arrested this morning under the Coercion Act. The arrest causes considerable excitement.

A DEFAULTER.

FITCHBURG, Mass., April 14.—Wm. Carleton, teller of the Ralston National Bank, has been discharged on the alleged defaulcation of about $1,200.

MILL BURNED.

WANSON, Ohio, April 14.—The flouring mill of Lyon, Clement and Greenleaf, has been burned. The loss is $30,000.

BEQUESTS TO RELIGIOUS INSTITUTIONS.

BOSTON April 14.—The late Stephen Stockwell, made bequests amounting to $13,000, to be divided among nine religious and benevolent Institutions.

A PERJURER CONVICTED.

NEW YORK, April 14.—James O'Brien, *alias* Robert Lindsay, who during the last campaign deposed that he knew H. L. Morey, to whom it was alleged that Garfield wrote the Chinese letter, to-day pleaded guilty of perjury and was sentenced to prison for 8 years.

WASHINGTON, April 14. — Indications: Lakes, warmer.

Beaconsfield's Condition.

SOMEWHAT BETTER.

LONDON, April 14.—At noon Beaconsfield was somewhat better.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4eod&wly

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrices, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist——————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

'THEY ALL DO IT.' — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered. and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Commercial.

TORONTO MARKET.

TORONTO, April 14. — Fall wheat No. 1 $1.15; No. 2, $1.12; No. 3, $1.12. Spring—No. 1, $1.20; No. 2, $1.18; No. 3, $1.12. Barley—No. 1 95; No. 2, 85 to 90; No. 3 extra, 80; No. 3, 70. WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly, The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels. and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

To Cure Consumption,

Bronchial affections, weakness of the lungs, take a small teaspoonful of Dr. Wilson's Pulmonary Cherry Balsam every two hours.

To Cure Coughs Take

Dr. Wilson's Pulmonary Cherry Balsam in small quantities as often as the coughing fit comes on.

To Cure Whooping Cough Take

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After gargling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

SPECIAL NOTICE TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying everyday with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the later stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhaltion we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

By MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

Tessa sipped her chocolate and ate her portion of cold pasty and other delicacies with what appetite she could summon. But Holm and Squire Todhetly, dismissing the one servant, engaged in an animated discussion of the changes to be made in the Grange after the Squire's prospective marriage, and Tessa was forced to listen to arguments about windows and doors, a new wing, and furniture to be ordered from town.

"I shan't grudge any expense," said the Squire, tossing off his wine. "I shall have the prettiest bride in the shire, and I mean to do honor to her. We'll see if people will decline to associate with Mrs. Tom Todhetly."

Tessa's lips curled in a haughty disdain, but she made no response. The luncheon was presently over, and Tessa arose, but Captain Holm was at her side in an instant, and drew her arm within his and conducted her to the drawing-room.

At the usual hour of dressing for dinner, Holm conducted Tessa to her room with an exaggregated courtesy and a close grasp upon her arm, and ushering her into her chamber, turned the key upon her.

Tessa quietly resumed her seat by the fire. She had on her gray travelling suit, and her impulse was not to change it. She was truthful, honest and straightforward, and could not feign a submission she did not feel. She saw plainly that she stood upon the brink of a deadly peril, and it was her father's hand that was stretched out to push her over. Her determination to escape from him strengthened with every instant.

When the dinner bell rang, and Capt. Holm again appeared in Tessa's door-way and looked upon the little soberly clad figure in the red glow of the firelight, his face darkened and a savage expression distorted his sensual lips.

"Not subdued yet ?" he muttered. "We'll see how long you will hold out, my little lady."

He took Tessa's arm again in his and led her below to the dining-room. The meal passed much as the luncheon had done, the two confederates argumentative, and Tessa mostly silent. It was the custom of Capt. Holm and his host to linger over their wine, but on this occasion their stay was cut short, and they returned to the drawing-room with Tessa.

There was a piano, with a hoarse, cracked tone, in the drawing room, and at Holm's request, Tessa played and sang for her two persecutors. Under cover of the music, the two men talked in low tones.

"A fine voice," said Holm, as Tessa's pure, liquid notes caught his hearing in a pause of the conversation. "I should like to make a public singer of that girl. By George I wonder I didn't think of that before. It would be a fine thing to humble the girl's mother; but after all, the disposition I propose to make of her is considerably worse, considered from her mother's point of view;" and his face lighted up evilly.

"That girl seems obstinate," muttered Todhetly uneasily. "You won't let her tire you out, or win you over ?"

The look on Holm's face sufficiently reassured the Squire.

"She looks as if she were meditating an escape," said Todhetly, thoughtfully.

"She means mischief," said Holm lightly. "I have seen mutiny in her eyes and mischief in her heart ever since that wretched Mrs. Gwynne was here this morning. But I understand women, and I'll undertake to subdue the veriest Katherine of them all. Petruchio might have taken lessons of me. The first thing to teach the girl is her own powerlessness. That lesson she will will learn during the next few hours. By to-morrow night she will be as humble and submissive as any spaniel."

Todhetly was not quite convinced that Holm understood Tessa's nature, but he interposed no suggestions of his own. He was half in awe of the young girl, and wholly in love with her, and was not at all scrupulous by what means he won her, provided that she became his wife.

At ten o'clock Tessa arose, and Capt. Holm was on his feet at the same instant.

"Bring a hammer and nails, Todhetly," he said, "and come up to my daughter's room. Nay, you had better go first and nail down her windows securely. I do not intend that Tessa shall give you the slip in the night, even if she had the physicial and mental strength necessary for the feat. A good general never neglects precautions."

Todhetly assented, and hurried away on his errand.

Tessa, flushing, resumed her seat.

The sound of hammering in the room above them was soon heard. It was some minutes before the sound ceased, and the Squire, heated and perspiring, returned, announcing that Tessa's chambers were ready.

Capt. Holm conducted Tessa up stairs. At the door of the young girl's sitting-room the two encountered Mrs. Podd, the housekeeper, who had been drawn to the spot by the unusual sound of hammering, and who had taken advantage of the Squire's departure from the scene to make an investigation of his proceedings. There was a look of surprise on her round, good-natured face, as she turned from a contemplation of Tessa's windows, and she stared guiltily as she was met by Capt. Holm and his daughter.

A glance at the pair told that Tessa was a prisoner.

"Stand aside, woman," said the Captain, in a domineering voice that aroused her enmity on the instant. "What are you prowling about here for at this hour? Be off, or I will report you to the Squire !"

The woman muttered that she had been in to replenish Miss Holm's fire, and to put a pair of lighted candles on her shelf. She moved away sullenly as she spoke but her glance met Tessa's, and the young girl in one wild look telegraphed to her an appeal for help.

No answering looked gleamed in Mrs. Podd's dull eyes; no flash of intelligence brightened her red face. Tessa's heart fell before the housekeeper's unmeaning stare.

"No help there !" thought Tessa bitterly.

Mrs. Podd retreated down the long hall, and disappeared in a side corridor that led to her own chamber. They heard her close her door with a sullen crash.

Captain Holm smiled. The incident rendered him almost good-humored. He led Tessa into her room, and made an examination of the rooms, of the sitting-room and bed-room, finding them well secured. The wooden shutters inside the windows were also made fast, beyond the strength of a girl like Tessa to unloose.

"You see that you are helpless," said the Captain. "Let the discovery teach you wisdom. When I come to you in the morning, I shall expect to find you submissive, as a daughter should."

He examined the door opening from the bed-room into the hall. It was locked and the key was in his pocket. He went out by the sitting-room door, and locked that also.

TO BE CONTINUED.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestiible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everyhing else has failed. Satistiy yourself as thousands have already done by getting of your druggist, JAS. CLARK & CO., a trial bottle for 10 cents, or a regular size bottle $1. For sele by JAS. CLARKE & CO

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264'y

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Peaconsfield, P. Q, has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

TO LET—The store on the east side of Front Street next the Bank of Commerce, lately occupied by Bartman & Sintzel.

JOHN BELL.
Dated 4th August, 1880. 80dt

MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL Use

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED,
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

Ayer's
Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

IT is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The VIGOR cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair

The VIGOR is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.

Prepared by Dr. J. C. Ayer & Co.,
Practical and Analytical Chemists,
Lowell, Mass.
SOLD BY ALL DRUGGISTS EVERYWHERE.

MANHOOD RESTORED.

Prescription Free. For the speedy Cure of Seminal Weakness, Loss of Manhood, and all disorders brought on by indiscretion or excess. Any Druggist has the ingredients. Address

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

THE ULTIMATE FAITH.

BY PAUL HAMILTON HAYNE.

"Though he slay me, yet will I trust in him."
—Job, iii, 15.

Though in the wine-press of thy wrath divine,
My crushed hopes bleed, like crude and worthless must—
That truth and mercy, Father! still are Thine,
With reverent soul, I trust.

Though all my life be shattered by thine ire,—
The mystic tempest of thy will august—
Yet from the din, the darkness, and the fire,
I lift my song of trust!

Though foes assail me—yea! within, without,
Harass my heart, and hurl my joys indust,—
No forceful fear, nor fraud of treacherous doubt,
Disarms my bucklered trust!

Though my lost years be wrapped in arctic cloud,
And grief on me hath wreaked her ruthless lust,
Still, like an angel's face above a shroud,
Smiles my celestial trust!

Though, Lord, thou wear'st the mark of hate, (twould seem),
And for a time I shrink, as mortals must—
That mark shall melt, as melts a nightmare dream,
Before my fearless trust!

Yea! though thou slay me, and supine, I cower,
Heart pierced and bleeding from the fiery thrust,—
I know there bides in heaven a glorious hour
To crown my sacred trust!

DOUBT AND CERTAINTY.

One said: 'I think I know that God is God,
And yet my soul is filled with unbelief;
For He is spread so utterly abroad,
I cannot tell where He is sole and chief;
But, as I find his footprints everywhere,
I can but say that God has once been there.

"I think I know that God is God; but yet
I do not find him in my worldly ways;
Amid the constant fever and the fret
That trouble and perplex my earthly days,
And through the struggle and the bitter pain,
I look for him but often look in vain.

"I wish I might draw nigher; but my heart
Still calls for something it can see and feel.
What can I, then, but do my little part,
Hoping that He will mercifully deal
With one who fain would live his life aright,
And begs a blessing on his blinded sight?"

Another said: "I know, and see, and feel,
That God is God, and I have justly weighed,
By what Himself has chosen to reveal,
His dealings with the creatures He has made,
Thus seeing and believing, with no doubt,
My peace is made, my passport written out.

"As for the rest, in all my worldly ways,
What matters it if God has not a part?
Fit reasons I may use for prayer and praise,
And He shall have a portion of my heart;
But I was rightly guided from my birth,
And know that heaven is heaven, and earth is earth.

"Belief is all, and that is quite enough;
God rules the worl, and what can mortals do?
For some, I know, the paths of life are rough;
But they must do their best to worry through;
For me, I know my sins have been forgiven,
Whoever else may fail to enter heaven."

EDWARD WILLETT.

AN OLD HAND.

Blue-veined and wrinkled, knuckly and brown,
This good old hand is clasping mine;
I bend above it, and looking down,
I study its aspect line by line.

This hand has clasped a thousand hands
That long have known no answering thrill:
Some have mouldered in foreign lands—
Some in the graveyard on the hill.

Clasped a mother's hand, in the day
When it was little, and soft, and white—
Mother, who kissed it, and went away,
To rest till the waking in God's good light.

Clasped a lover's hand, years agone,
Who sailed away and left her in tears;
Under Sahara's torrid sun
Its bones have whitened years and years.

Clasped the hand of a good man true,
We held it softly and fell asleep,
And woke no more and never knew
How long that impress this would keep.

Clasped so many, so many:—so few
That still respond to the living will,
Or can answer this pressure so kind and true:
So many, that lie unmoved and still!

Clasped, at last, this hand my own;
And mine will moulder, too, in turn:
Will any clasp it when I am gone?
In vain I study this hand to learn!

TABERNACLE SERMONS.

Discourse by Rev. T. De Witt Talmage.

Question of Questions.

"Sirs, what must I do to be saved?"—The Acts, xvi. 30.

In a cell of the Philippian dungeon, dark, damp, chill, unillumined save by the torch of some official who comes to see whether they are yet alive, are two ministers of Jesus Christ—their feet fast in instruments of torture, their shoulders dripping from the strokes of leathern thongs, their mouths hot with inflammation of thirst, their heads faint because they may not lie down. In another room of the same building is a man asleep on a comfortable couch. He is a supervisor, a paid officer of the government, to look after that prison. I take him to have been a moral and an honorable man, from the trust reposed in him. It is 12 o'clock at night. No sound in all the corridors and wards of that prison, save as some culprit turns over in his chains, or there is a cough of a slow consumption, or some wanderer, far away from her father's house, cries out in her dream, "Mother, mother!" At midnight, crash! go the prison walls, and the two ministers of religion, Paul and Silas, are free. The supervisor of the jail, although he had been accustomed to the shadows hovering around the dungeon, is startled beyond all bounds, and, flambeau in hand, he rushes through between the falling walls and throws himself down at the feet of the apostolic prisoners, crying out in the memorable words of my text, "Sirs, what must I do to be saved?"

There may be hundreds and thousands in this house this morning with more or less earnestness asking the same question, and in this tremendous crisis of your soul I meet you with a message from the throne of God. There may be some here who could surpass me in skillfulness of argument, there may be many here who could drink from deeper fountains of knowledge and science, there may be many here before whom, in some respects, I would be willing to bow as the inferior to the superior; but I yield to none in this presence in a wish to have all the people saved, and with an all-conquering desire that sometimes well-nigh overcomes my utterances, I beg you to-day to accept the eternal life of the gospel. Lord, help us. Lord, help us now.

I proceed to characterize this question of the jail supervisor, and I characterize that question, in the first place, as a courteous question. He did not come up to these men and say: "You outragers of the law, you miscreants, you vagabonds against society, you have upturned the whole city with excitement, and now you are trying to break down the walls of our prison, destroying Government property; let me put on these handcuffs and hopples, or else get out beyond the confines of the city." He said no such thing. He addresses them with that word "sirs," a synonym for lords, as much as to say: "I acknowledge the dignity of your mission, I acknowledge the honor of your manhood, and I am here to see what you can do for my soul." It was a courteous question. But it is often the case when people begin to enquire about religion they become impertinent and they denounce all Christians as hypocrites, and the Church of God as a cheat, and they criticise this, and they denounce that, and they complain of something else. Is that fair? Is that right? Is that just? Is that courteous? Suppose I should come into an audience of lawyers and denounce them all as pettifoggers, or an audience of physicians and denounce them all as quacks? "Oh!" you say, "that wouldn't be fair." It would be just as fair as for you to denounce all Christians as hypocrites. There are pettifoggers among lawyers, and there are quacks among physicians, and there are hypocrites among Christians; but that is not the character of all lawyers, or all physicians, or all Christians. It was a courteous question, it was a gentlemanly question, it was a polite question, it was a deferential question. "'Sirs!" "Sirs!"

I go further, and I characterize the question of the jail supervisor as a practical question. He did not ask why God let sin come into the world; he did not ask how the Christ, about whom they were preaching, could be God and man at the same time; he did not ask who Cain married; he did not ask who was Melchisedec; he did not ask the proportionate number of the finally saved and the finally lost. No! His question involved his present and his everlasting welfare. And was not that a practical question? Yet a great many people when they begin to seek after religion begin to find fault with the Bible, and they say, "If this be so, how can that be so?" and they complain of this, and they complain of that, and they go fishing after snapping-turtles instead of fishing after the truth. They do not seem to be satisfied with the plain gospel of the Son of God. Now, my brother, the question for you is not whether John Calvin or Armenius was right, not what will be the proportion of the finally saved and the finally lost, not who was Melchisedec, not who Cain married; the question for you is: "Will I spend eternity in heaven or hell?" It is a practical question.

I go further and I characterize this question of the jail supervisor as a question personal to himself. He may have had hundreds of friends, he is not asking about them. In that catastrophe of the falling prison some of those friends may have perished. He is not asking about them. He throws all the emphasis of his question upon the pronoun of the first person, "What shall I do to be saved?" When a man becomes a Christian, of course he is anxious to have everybody else saved. You are not a Christian if you are not anxious to have all the world saved; but until your own heart is pardoned, my brother, you must look at home. The difficulty is, we are so anxious about the lack of culture in our neighbor's yard that we let our own garden go to weeds; we are so anxious to get the people into the life boat of the gospel that we ourselves drown in the waves. We cry "Fire, fire" because our neighbor's house is consuming, while ours is in a blaze. Now, this morning, let us blot out everything; let it be as though you were the only person present, the rest of the audience all gone. Your sin—is it pardoned? Your heaven—is it secure? Eglon in the palace, when Ehud came to him, waved out all the attendants, and stood alone to receive the message, and I come up to the door of your soul to-day with a message from the throne of God—your pardon, your repentance, your enthronement, your exile, your eternal residence. This man of the text knew that there was coming an earthquake mightier than that which struck down the Philippian dungeon. The foundation of the earth shall give way. At one tremor of the world all the modern cities will fall into the dust. Temples and towers that have stood a thousand years will fall as quickly as a child's blockhouse. The waves of the sea will roll over the land, and the Atlantic and Pacific Oceans join hands above the Alps and the Pyrenees and Himalayas. This man of the text was guarding not more against the falling of the prison than he was against the falling of a world.

I go farther and characterize this question of the jail supervisor as a question of incomparable importance. Perhaps he was anxious to have his salary raised as a supervisior, perhaps he would like to have had better apartments, perhaps he was discussing some questions of prior reform, something about warmth, light, ventilation, medical treatment, discipline. Men are wonderfully alike, and I suppose he may have had a hundred questions to discuss; but all earthly questions are submerged, are hushed up, are annihilated by the one question, "Sirs, what must I do to be saved?" And what question have you, my brother, comparable with that in importance? Is it a business question? Do you not realize that you will be soon have go out of that store, that you will soon have to resign that partnership, that soon among all the millons of dollars' worth of goods that are sold in New York you will not have the handling of a yard of cloth, or a pound of sugar, or a pennyworth of anything; that soon, if a conflagration should start at Central Park, and sweep everything to the Battery, it would not disturb you; that soon, if every cashier should abscond, and every bank should suspend payment, and every insurance company should fail, it would not affect you? What are all the questions that stop this side the grave, compared with the questions that reach beyond it? Are you making losses that are to be everlasting? Are you making purchases for eternity? Are you jobbing for time when you might be wholesaling for eternity? What question of the store is so broad at the base, and so altudinous, and so overwhelming as the question, "What must I do to be saved?" Or is it a domestic question? Is it something about father, or mother, or companion, or son, or daughter that you think is comparable with this question in importance? Do you not realize that by universal and inexorable law all these relations will be broken up? Your father will be gone, your mother will be gone, your companion will be gone, your child will be gone, and then this supernal question to harvest its chief gains or deplore its worst losses, roll up into its mightiest magnitudes or sweep its vastest circles. A question deciding whether you will live unending ages with God the the blessed or with demons lost—whether you will take wing and fly or chain and drop—whether for all the future you will be praising or blaspheming, chanting or groaning, living the life that always lives, or dying the death that always dies. Is there any question comparable with that? What difference now does it make to Napoleon III. whether he triumphed or surrendered at Sedan? whether he lived at the Tuileries or at Chiselhurst? whether he was Emperor or exile? They laid him out in his coffin in the dress of a field marshal. Did that give him any better chance for the next world than if he had been laid out in a shroud? And soon to us what will be the difference whether in this world we rode or walked, were bowed to or maltreated, were applauded or hissed at, were welcomed or kicked out, while laying hold of every moment of the great future and burning in all the splendor or grief, and overarching and undergoing all time and eternity, is the plain, simple, practical, thrilling, agonizing, overwhelming question, "What must I do to be saved?"

I go further, and I characterize this question of the jail supervisor as one pressed out by crushing misfortune. The penitentiary fallen, his business was gone. It was a financial loss. Beside that, the flight of a prisoner ordinarily in those times meant the death of a jailor. If the prison walls had stood solidly all that night, and the incarcerated had been quiet in the stocks, and the sunlight on the following morning had dropped on the calm pillow of the supervisor, would he have hurled the agitating words of my text into the ears of the apostles? You know as well as I know it was the earthquake that roused his anxieties. And is it not the shaking of misfortune and trouble and the crushing down of earthly hopes that has driven many of you to the gospel? Your dress is not so bright as once. Why have you come to more subdued garb? You like the saffron and the crimson and the bright colors as well as ever, but you say, "Things that were in harmony with my feeling when I was young, and bright, and prosperous, and gay would be a discord now." And so you have gathered up and plaited the darkness into your apparel. There have been dark days in your house. It does not seem any more like home. You once wished the house might be quiet. It is too quiet now. Others say they would not bring their loved ones back to this troublesome world if they could; but if you had the power how soon those hushed voices would be back in the home circle, and they would be as it was in the Christmas or the Thanksgiving holiday so long by never to come back with its hilarities. Oh! it is the earthquake of domestic trouble that has started one-half of you toward God. The grave is so cruel, so relentless, so devouring, that when our loved ones are swallowed up of it we must have some one to whom we can take our torn and bleeding hearts. It needs a balsam better than ever exuded from any earthly tree to stop the sharpness of the pang. It is pleasant at such times to have friends come in and try to break up the loneliness; but Jesus only can take the frenzied spirit on His bosom and hush it with the lullaby of heaven. Ah! the heavy gravestone will never be lifted from your heart until Jesus lifts it. Has it not been the loss of your friends, has it not been the crushing down of your estate, has it not been the earthquake of your misfortunes, that have led you to ask the question spelled in tears and heartbreaks, the impassioned outcry, "Sirs, what must I do to be saved!"

I take one step further, and I characterize this question of the jail supervisor as an urgent, hasty, immediate question that demanded an immediate answer. It was a question put on the run. You can see by the torch the jailor holds in his hands the startled and anxious look. He had no time to prepare himself in especial apparel, no time to comb his hair, no time to fix himself up. He must have that question answered before the earthquake has stopped rocking, or never perhaps have it answered at all. Is that the way you propound the question of your salvation? Or do you drawl it out as much as to say, "Any time within fifteen years I would like to have it answered?" Do you know that thousands of souls have been ruined because they they did not ask the question in time? If the door of the lost world could be opened, and one word of warning could come forth, and they could utter only one word of warning, that word would come sending up like the howl of the everlasting storm: "Now!" I open the gates of those there incarcerated. I find some of the young are there. What is their history? How did they lose their soul? By procrastinating to old age, or to middle life; but the rail-train shot from the track, and in an instant they were gone; or they slipped on the icy pavement, and the skull was fractured; or the typhoid fever came down, and in delirium drove them out of life. There are some of the middle aged who have lost their souls. What was their history? They adjourned religion until they got more time, adjourned religion until they got their worldly affairs arranged, adjourned religion until they made a competency. In the attempt to win the world they lost their soul. All their Government securities, all their certificaties of stock, all their warehouses, all their bonds, all their daybooks and ledgers, all their worldly accumulations are of no service to them now. There are some of the aged who lost their soul—of what history? Adjourning religion until their hearts were so hard when they tried to repent they could not repent, and when they tried to pray they could not pray, and went tottering on, leaning heavier and heavier on their staff until it broke and they fell headlong into outer darkness. Are you proposing the question of the text with an urgency such as this man of the text employed, or are you adjourning it to the last hour? Now, I am coming to the experience of many in this audience. Adjourning it to the last hour, are you? I suppose that out of the one hundred deathbed repentances ninety-nine amount to nothing. Of the large number of people in this Bible who are represented as dying, how many of that large number are represented as repenting successfully in the hour? Fifty? No. Thirty? No. Twenty? No. Ten? No. Five? No. Two? No. one, barely one. Only one. As much as to say: "It is possible that a man may repent in the last hour of his life but it is improbable, it is very improbable, it is vastly improbable, it is a hundred chances to one against him." Have you ever seen a man after living a life of sin and worldliness trying to repent in the last hour! I have seen that spectacle. If you had ever seen it you would not try to repeat it. Why, it is most inopportune. There is the physician standing with the medicine, and here is the lawyer standing with the half-written will, and the bells of eternity are tolling at the passage of the soul from the body, and all the past is serging upon us, and all the future, and angels are flying through the room, and devils are plotting for the overthrow, and that man is an infinite fool who adjourns repentance until the death hour.

My text asks the question, but does not answer it. That comes on in the next verse, and strict rules for sermonizing would say that must come at some other serman; but what are rules of sermonizing to me when I am efter souls immortal? Wait until another time! I might be dead before that time, and many of you I confront only once. Some of you will not come again, perhaps because you do not like the way of the preacher, others of you because you live in distant lands or distant cities, others because in the headache that hovers around your temples or in the cold that oppresses your lungs, you have the premonition of your last sickness; so if I ever say this I must say it now. Have you not heard of Jesus Christ? How he is mighty to save, and how he is gracious to heal? Have you not heard how all the sorrows of earth and all the agonies of hell pressed upon his heart when he cried "Father, forgive them, they know not what they do!" Perfect atonement for you and for me if by faith he will accept it. By the feet that were blistered on the mountain way, by His back whipped until the skin come off, by His death couch of four long spikes—two for the hands and two for the feet—by His sepulchre in which for the first time in thirthy-three years the world let Him alone, by the heavens from which this morning He bends in pity and sympathy for a suffering world, I beig you kneel at His feet.

Gems of Thought.

Faith, like light, should ever be simple and unbending; while love, like warmth, should beam forth on every side and bend to every necessity.

For want of a nail the shoe was lost, for want of a shoe the horse was lost, for want of a horse the rider was lost, being overtaken by the enemy.

Bought wit is best, if not bought too dear—that is, if we do not obtain it at the expense of health or reputation, or at too great a sacrifice, so as to prevent the enjoyment of the acquired good.

We celebrate nobler obsequies to those we love by drying the tears of others than by shedding our own; and the fairest funeral wreath we can hang on their tomb is not so fair as a fruit-offering of good-deeds.

He who endeavors to escape from life's drudgery may also cease to compete for life's prizes. Even if, by manœuvre or trick, he seize some of them, they will become but empty baubles that have lost their significance.

Though a man without money is poor, a man with nothing but money is still poorer. Worldly gifts cannot bear up the spirits from fainting and sinking when trials and troubles come, any more than headache can be cured by a golden crown, or toothache by a chain of pearls.

Persevere in whatever calling you adopt. Your progress may be slow and results seemingly meagre; but that is no reason for growing fainthearted. Remember how the little brook persistently winds its way to the river, and the river to the ocean—both reach their destination.

A woman from her sex and character, has a claim to many things besides shelter, food and clothing. She is not less a woman for being wedded; and the man who is fit to be trusted with a good wife recollects all which this implies, and shows himself perpetually chivalrous, sweet spoken, considerate, and deferential.

It is beautifully remarked that a man's mother is the representative of his Maker. Misfortune and mere crime set no barriers between her and her son. While his mother lives a man has one friend on earth who will not desert him when he is needy. Her affection flows from a pure fountain and ceases only at the bottom of eternity.

Courtesy is due to others. It is helpful to others. Treat even a base man with respect, and he will make at least one desperate effort to be respectable. Courtesy is an appeal to the nobler and better nature of others to which that nature responds. It is due to ourselves. It is the crowning grace of culture, the stamp of perfection upon character, the badge of the perfect gentleman, the fragrance of the flower of womanhood when full blown.

Feelings are a most important and necessary part of human nature. Out of them spring the joy and beauty of life. But they never can reveal their best results unless they are under the control of reason. Pope says, "The ruling passion, be it what it will, the ruling passion conquers reason still." He who succumbs to this rule within his breast must part with his reason, manliness, independence, and must forfeit the happiness and the power of conferring the happiness which come from well-regulated social intercourse.

A beautiful person is the natural form of a beautiful soul. The mind builds its own house. The soul takes precedence of the body, and shapes the body to its own likeness. A vacant mind takes all the meaning out of the fairest face. A sensual disposition deforms the handsomest features. A cold selfish heart shrivels and distorts the best looks. A grovelling spirit takes all the dignity out of the figure and all the character out of the countenance. A cherished hatred transforms the most beautiful linerments into an image of ugliness.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heartburn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

After trying many midicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

Mrs. Mary Harrington, Kouchibouguoc, N. B., says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

MERCHANT TAILORING

Establishment.

We beg to announce to the Gentlemen of Belleville and surrounding country that we have opened a First-class

TAILORING ESTABLISHMENT

in the spacious premises

Next the Bank of Commerce,

ASHLEY BLOCK.

Our Stock is all new comprising all the latest designs and coloring, and specially chosen for a first-class trade.

We purpose employing the best class of mechanics and have no doubt of being able to execute orders to the entire satisfaction of those who may favor us.

We would direct special attention to our selections for

Spring Suitings

—AND—

OVERCOATINGS

and solicit the favor of a call from all who wish to secure a really stylish article at a moderate figure.

SANDERS BROTHERS.

Belleville, April 7. 327d1m

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly, JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

PREPARED ONLY BY W. H. MITCHELL, HAIR DRESSER

BELLEVILLE, ONT.,

And Sold by all Druggists.

GRAND JUNCTION RAILWAY.

On and after Monday, December 20th, trains will run as follows:

MAIN LINE.

Leave Belleville	7:30 a. m. and 3 p. m.
Arrive at Peterborough	11:30 a. m. and 7:30 p. m.
Leave Peterborough	7:30 a. m. and 3 p. m.
Arrive at Belleville	11:30 a. m. and 7:30 p. m.

MADOC BRANCH.

Leave Madoc	8.00 a. m.
Arrive in Belleville	10.00 a. m.
Leave Belleville	3:30 p. m.
Arrive in Madoc	5:30 p. m.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, SATURDAY, APRIL 16.

Elections and Sugar.

It is a marvel how the Grit press can have the audacity to presume upon the ignorance of the people, to the extent which they do. The last piece of flap doodle we copy from the Ottawa *Free Press* of the 11th inst.:—"The fruits of the "East Northumberland and Carleton elec"tions are seen in the fall of one cent per "pound in the price of sugar. The Gov"ernment, frightened by the expression of "popular wrath against them in these con"stituencies, let the monopolist refiners "know that they were driving the people "too hard; hence the fall in sugar. No "better confession of their weakness and "fear could be given, while the fact also "shows plainly that they are aware of the "unpopular nature of the tariff in taxing "the necessities of life in a way to make a "few men wealthy at the expense of the "masses." Any intelligent man reading this paragraph would fancy it was written on the 1st of April. The result of the elections in East Northumberland and Carleton had as much to do with the fall of sugar one cent per pound as they had with the earth quake at Chios; and no one knows that better than the writer in the *Free Press*; but presuming upon the stupidity of its Grit readers it made the statement. The assertion that the Government let the "monopolist refiners know that they were driving the people too hard," is, we venture to assert, as absurd as the whole statement is untrue. The fact is, since the new tariff came into operation, people have had cheaper and better sugar than they would have had had the old tariff remained in force. The reason sugar has fallen one cent per pound is owing to the fall in price in raw sugars, and the competition which exists in the market, there being at the present moment three large refineries at work at Montreal, Moncton and Halifax whose sugars we are glad to know are being sent all over the Dominion, of a quality, too, never before surpassed. Why could not the *Free Press* at least for once indulge in the luxury of truth?

While upon this subject let us consider the effect the tariff has had upon the sugar trade, and other industries of the Dominion, as we glean the facts from the Trade and Navigation returns. In 1878 we sent out of the country and paid to foreigners no less a sum than $6,186,226 for sugars, while in 1880, only $3,904,287 were so expended, the difference as a contemporary justly says, "amounting to over TWO MIL"LIONS of dollars, being divided between "our workmen, our vessel owners, our "railroads, our coal miners, etc., instead of "being sent abroad, besides which we have "cheaper sugar and a better article."

The following table showing the change in the course of trade in this article is fully of interest to those who desire to see the shipping industries of the Dominion grow and prosper:

FOR THE YEAR ENDING JUNE 30TH, 1880

From what country.	Weight	Cost	Duty.	Rate per cent of duty	Proportion of value
Great Britain	31,187,301	$2,763,022	$1,189,889.75	43.07	44.67
United States	50,394,946	3,026,425	1,236,737.72	40.86	48.92
West Indies	7,534,468	379,413	160,870.55	42.40	6.13
Brazil	Nil				
All other Countries	347,200	17,366	7,576.40	43.62	.28
Totals	109,463,915	$6,186,226	$2,595,074.48	41.95	100

FOR THE YEAR ENDING JUNE 30TH, 1878.

From what country.	Weight	Cost	Duty.	Rate per cent of duty	Proportion of value
Great Britain	15,420,581	$ 637,108	$ 360,281.28	56.19	16.83
United States	15,659,483	601,031	288,529.65	48.00	15.39
West Indies	72,790,700	2,236,412	1,164,600.64	52.07	57.28
Brazil	4,312,851	134,747	65,273.07	48.44	3.45
All other Countries	8,163,434	294,999	139,007.40	50.85	7.05
Totals	$111,847,050	$3,904,287	$2,026,692.04	51.93	100

A glance at these figures will show that while our trade has fallen from 50,394,946 lbs. from the United States in 1878 under the old tariff to 15,659,483 lbs., under the new tariff, our trade with the West Indies has increased from 7,534,468 lbs. in 1878, to 72,790,700 lbs. in 1880; and from other countries with whom we trade direct, in a like proportion.

In 1878 it will be seen that our total imports of sugars amounted to 106,463,915 lbs., and in 1880 to 116,847,050 lbs., costing us in 1878 $6,186,226, and in 1880 very little more than one-half that sum, or $3,904,287; paying customs duty upon the smaller quantity imported in 1878 $2,595,074.48, and upon the larger quantity imported in 1880, $2,026,692.04, being $568,382.44 less than was paid in 1878, though there were 6,383,135 lbs. more imported in 1880 than in 1878. Though the revenue of the country lost upon the change in the sugar duties, it was more than made up by the business it gave to our shipowners who trade directly with the producers in the West Indies—by the three sugar refineries now in operation, which employ hundreds of heads of families who consume every kind of dutiable articles, thereby giving employment to our artizans and creating wealth in the country, while the consumer is supplied with a purer and cheaper article than formerly. In short with the pure sucrose instead of glucose and other adulterations.

We make no apology for reproducing a portion of a "Catechism on the Sugar Question," written by Mr. Dustan, of Halifax, and published in 1878:

Q. Who in Canada benefits by the extinction of the Sugar Manufactury?

A. Nobody in reality—but it satisfies the jealousy of some of the wholesale grocers who want the business for themselves.

Q. Who out of Canada benefits by it?

A. The sugar refineries of New York—Boston and Greenock—the trade of these ports—and the laborers and artisans, who live there, and get work and bread by it.

Q. What is lost to Canada by it?

A. Canadian workingmen lose their employment and are driven out of the Dominion—the ships of Nova Scotia and New Brunswick lose employment—and the coal of Nova Scotia is deprived of an important outlet.

Q. What classes of working men are injured?

A. Not only those who are trained to the business of sugar refining, but also masons, engineers, and all classes of workmen.

Q. Is it true, as alleged, that as many men are employed in handling and distributing the imported refined, as in refining the sugar ourselves?

A. Manifestly and absurdly untrue. There is less work for Canadians in every way, and the profits of the work done in Greenock, Boston and New York, are entirely lost in this country.

Q. How do the ships suffer? Is it not the case that as much shipping is required to bring the ready refined article here as to bring the raw material?

A. Not all; to begin with, there is a much greater bulk and weight of raw sugar to be carried than of refined, and besides the American refined is carried over American railways to our frontier, leaving nothing for ships, and very little for our railroads.

Q. Comparing the sea carrying trade itself how do our ships suffer?

A. To bring a ton of refined from Greenock gives employment to steamers at a freight of eight or ten shillings a ton. To bring raw sugar from the West Indies gives employment to sailing vessels at a freight of twenty or thirty shillings a ton, and to bring the sugar of Java, Manilla and China, gives also employment to sailing vessels at freights varying from sixty to ninety shillings per ton.

Q. How much does the coal interest suffer?

A. In round figures, every ton of sugar refined in the country consumes a ton of coal. The quantity is very large—and not one pound of Nova Scotia coal is now used for the purpose.

Q. What is the most advantageous form in which a country can import its sugar?

A. Certainly in the crudest and lowest form, as giving most employment to all concerned—ships, coal owners and workingmen—it would be well to import the canes even, if that were possible, but as it is not, let us have concentrated cane juice, Manillas and China sugars just as they come from the native growers and not as refined or half refined in factories which we pay to run and get no benefit from.

Q. Finally—is sugar any cheaper to the workingman?

A. Not at all—but on the contrary—all the sugar he uses is made dearer.

Q. What is then the only interest which appears to benefit by the destruction of the sugar refining business?

A. A few importers, who are really the representatives, agents, and paid advocates of the foreign refiners.

Q. What do these gentlemen do for the country as compared with the sugar refiners?

A. Not much. One warehouse and a dozen of clerks could import and distribute all the refined sugar used in the Dominion, to refine in this country would require three or four establishments like Redpath's with a thousand of workingmen.

Q. Why do even these gentlemen make no good out of it?

A. Because as Canadians our prosperity or the contrary must be shared by all, and no one can be permanently benefitted by the ruin of his neighbor.

Q. What should Canadian workingmen insist on?

A. That the sugar refining interests be put on the same footing as other trades, neither better or worse, and get fair play.

The "Canadian workingmen" and Canadian farmers, did "insist" upon "the sugar refining interests being put on the same footing as the other trades," and the result has been to foster our foreign trade, stimulate our home industries, and give a purer and cheaper article of sugar to the consumer of that article in Canada.

Invalid Excuses.

The Ottawa *Citizen* discusses in a vigorous manner the excuses put forth by the *Globe* in justification of the dismissal of the Sheriff of this county. It says:—"Here then, we have two excuses put forward for the dismissal of Sheriff Taylor. Let us examine them separately. 1. 'The truth is that the Sheriff has not for years actively discharged the duties of his office.' We should like to be informed by Mr. Mowat's organ how many officials are in the employment of the Ontario Government who have 'not for years actively discharged the duties of their office?' We could name several who since the date of their appointment have not done an hour's official work in an office, it being performed by deputies. Further, we could mention the names of persons appointed to positions by the precious 'Reform' Government of Mowat, Fraser, & Co. who are incapable of satisfactorily doing the work of the positions of which they hold, and who are in office not because of fitness, either special or ordinary, but as the reward of undeviating political support. So far, therefore, as the *Globe's* first apology is concerned, it carries no weight whatever, and it was worse than stupidity on the part of the organ to put it forward. 2. 'A most scandalous state of affairs had grown up in and about the gaol.' If the *Globe* could show that the Sheriff was directly responsible for the growing up of 'a most scandalous state of affairs in and about the gaol,' then it would be in a position to justify Mowat, Fraser & Co. for dismissing them in a summary manner. But we think the *Globe* will find it up-hill work to make good the charge. But suppose 'a most scandalous state of affairs' did grow up in and about the gaol with the personal knowledge of Sheriff Taylor, *according to the ethics of the 'Reform' Government of Ontario*, we question if that should be made a justifiable excuse for his dismissal. If Mowat, Fraser & Co. consider it right and proper to appoint men to the position of Registrar of a County who have been removed from the list of practising lawyers because they robbed their clients, for the life of us we cannot see why a Sheriff should be removed for allowing 'a most scandalous state of affairs' to exist in a gaol under his personal cognizance. Which is the greater scandal? We have no hesitation in saying that, even, admitting Sheriff Taylor's responsibility for the 'most scandalous state of affairs' of which the *Globe* complains, the conduct of the Government in the case of the appointment of the Registrar of Lincoln is a scandal not to be compared with the gravest misconduct which has been reported against any of their own officials since the great 'speak now' conspiracy resulted in the handing over of the management of the affairs of the Province to Blake, Mackenzie & Co., and their present successors."

In its issue of the following day our contemporary adds:—"In an exhaustive article the Belleville *Intelligencer* exposes the trickery of the Mowat-Fraser combination connected with the dismissal of the Sheriff of Hastings. The causes alleged by the *Globe*, to which we referred yesterday, are disposed of in a way which leaves the organ without a leg to stand on. The manner in which the Mowat Government have secured patronage to themselves is without a parallel in the history of the country. And they know how to use it to serve the interests of what is miscalled the Reform party."

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

Globular Ratiocinations.

The *Globe*, in discussing the Shrievalty outrage, furiously attacks the Dominion Government on account of the changes which were made in the *personnel* of the staff which the work of administering the Weights and Measures Act caused, but admits the irrevelancy of its statements by saying:—"Of course such conduct on the part of the Government at Ottawa would not be any justification of similar conduct on the part of the Executive here." Of course; but when our contemporary is driven into a corner it endeavors to escape by retorting "You're another." It is the old dodge: "No case, abuse the plaintiff's attorney."

"The scandalous scenes enacted for a length of time in and about Belleville gaol were too disgusting to be more than alluded to, for the facts are unfit to be published in detail as they were elicited at the official investigation by Mr. Langmuir. * * * It is inconceivable that such a state of affairs as prevailed for a long time in the Belleville gaol could have gone on under Sheriff Taylor's nose without his being cognizant of them if he had been as active and vigilant as every Sheriff should be. On this point the less his friends say the better." So says the *Globe*. Yet the evidence shows that, so soon as the facts were made known to the Deputy Sheriff, he at once communicated them to the Sheriff, and the person who was responsible for the scandal was dismissed without delay.

The Ontario Government's organ charges that "the INTELLIGENCER endorsed the *dismissal* of the late Toronto Postmaster." Mr. Lesslie was not dismissed, as the *Globe* very well knows, but was superannuated with his own consent. So the organ casts truth aside, in order to attempt, not to justify its friends, for it cannot do so, but to vent its spleen at the INTELLIGENCER because of our exposure of the wrong which has been done.

The organ continues: "And it (the INTELLIGENCER) defended and applauded the dismissal of the whole staff of weights and measures inspectors, whose only fault was that they had been appointed by the Mackenzie Government." This is another gross misrepresentation. The officials in question were not dismissed because they had been appointed by the Mackenzie Government. The present Government devised a new and very much more efficient method of administering the law, and at the same time secured a reduction in the number of officers and in the expense attendant upon the administration of the Act. In Ontario the number of officers was reduced from 42 to 27, and those who were efficient and against whom there was no valid ground of complaint, were re-appointed. The saving in this Province alone, in office rents and salaries, amounted during the first year under this new state of affairs to $9,417, whilst for the whole country the receipts increased from $13,685.97 in 1878-9 (the Mackenzie Government's last year) to $17,080.04 in 1879-80, and the expenditure declined from $66,487.67 in 1878 9 to $37,332.86, or a total saving to the Dominion of $32,548.88 during one year. The revenue from the 1st of July 1880 to the 31st of December in the same year amounted to $15,682.89, thus showing a healthy increase. Then it must be remarked that Inspectors of Weights and Measures now also perform the work of inspecting gas and gas metres, thereby saving the salaries and expenses of other officers. So that the action which the *Globe* condemns cannot be successfully assailed.

The *Globe* also charges that Mr. Kennedy was elected as the Conservative candidate in East Northumberland "for the purpose of winning the Roman Catholic vote of the constituency, and the *Intelligencer* applauded the choice and worked hard to elect him." This misrepresents us grossly. The INTELLIGENCER did not seek in any way to influence the choice of the Convention, except by advising the selection of the strongest Conservative, regardless of his religious faith, and we accepted Mr. Kennedy as such. Perhaps the fact that the *Irish Canadian* accused us of attempting to bull-doze the Convention into nominating a Protestant, is the best reply to the *Globe's* misrepresentation, which we cannot believe is otherwise than deliberate and intentional.

Death of Rev. Dr. Punshon.

A telegram from London, England, announces the death, of the Rev. W. M. Punshon, D. D., at Brixton on the 14th, at the age of 57 years. This intelligence will be received with very great regret in Canada, as the Rev. gentleman passed several years in this country, and the people of Belleville, to whom he was well known, will share in that regret, as they admired and loved the brilliant orator and distinguished Christian Minister.

The Rev. William Morley Punshon was born at Doncaster, England, in 1824, where his father did business as a draper. In 1838 he entered the office of his grandfather, a timber merchant in Hull, where he obtained a position beyond his years, and soon became possessed with a strong desire to study for the ministry. He accordingly zealously strove to qualify himself to fulfil his self-imposed task and commenced his career at Sutherland in 1840 by undertaking the duties of a "local preacher." Four years later, after passing a short term as a probationer at the Wesleyan College, Richmond, he accepted his first pastoral charge in the ministry, at Mardon in Kent. The report of his success here was not long in reaching the leaders of the Wesleyan connection. At the "Conference" of 1845 he was appointed to the ministry of White Haven in Cumberland, and although only twenty-one years of age his reputation was such that people flocked to hear him from all parts. He ministered in various parts of the country, besides visiting the metropolis, where his addresses, both from the pulpit and the platform, attracted considerable attention. In 1868 he left England for Canada, and married his deceased wife's sister, a proceeding which led to his being struck off the "Legal Hundred" by the Wesleyan Conference. The lady with whom Mr. Punshon formed the connection died in October, 1871. During his residence in Canada he was five times president of the Canadian Conference. He returned to England in 1873 and in July, 1874, he was elected President of the Wesleyan Conference for the ensuing year. Many of his sermons and lectures, published since his removal to London in 1873, are very popular, especially the lectures on "John Bunyan" and the "Huguenots." Mr. Punshon has also published a small volume of poems.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

Editorial Notes.

PRESCOTT.

Three Conservatives having opposed one Grit in the contest in Prescott for the Ontario Legislature, the natural result is that the Grit has been elected. The supporters of the Ontario Government will, however, jubilate over the victory, and talk of "reaction" in favor of Gritism.

HOW IS IT?

The local Grit Organ professes to have heard no complaints against the appointment of Mr. O'Brien as Deputy Sheriff. Probably not; for the organ is not very deeply in the confidence of its party. If the *Ontario's* statement were correct, how is it that a deputation visited Toronto a few days ago to urge the Government to cancel the appointment?

VASTLY MISTAKEN.

The London *Advertiser* is about as correct as sundry Grit organs usually care to be when the assertion of an untruth will best effect their purpose, when it says that "Quebec is the Province from which is drawn the majority that supports the present Government through thick and thin." The object of the London Grit paper is to arouse sectional prejudice by raising its old party cry of "French domination." The truth is that Quebec returns 48 supporters of the Government, whilst Ontario sends 63 Ministerialists to Ottawa, so the organ's untruthful statement is so easily refuted that its author has not even the satisfaction of affording his opponents any trouble to disprove it.

THAT SPECULATIVE REFORM.

The Montreal *Journal of Commerce* devotes a lengthy article to the discussion of Mr. Blake's scheme of Imperial Federation, and concludes as follows:—"We believe that a scheme was never propounded more calculated to crush the liberties of the Canadian people than that to which Mr. Blake has committed the party of which he is the recognized leader."

A JUST REBUKE.

The *Mail* credits the following to our local contemporary:—"It would be more to the credit of the *Globe* to accept the statement that Sir Charles Tupper is ill, and allow him to pursue what course he pleases, at home or abroad, until restored to health and able again to assume the public duties of his office. Party feeling should not follow a political opponent into an invalid retreat." This foregoing is certainly creditable to our contemporary, whose rebuke is timely; but neither it nor that of the Montreal *Herald* will influence the *Globe* in the slightest degree. Sir Charles Tupper flogged the Managing Director so soundly that no consideration will induce him to cease venting his malice on the masterful Minister.

CHANGING FRONT.

The Ottawa *Free Press* is a free-trader in principle, but it excepts three industries from the application of that theory, and advocates protection to the manufacture of sugar from beets, of iron from native ores, and of wooden ships. By and by, perhaps, our contemporary will discover some other industries which ought to be protected, and come to the front as an open advocate of protection.

MARINE AND FISHERIES.

We learn that, in the absence of the Minister of Marine and Fisheries, who is suffering from illness, the Hon. Mr. Bowell is administering the office, the duties of which will doubtless receive careful attention at his hands.

CIVIC AFFAIRS.

The Harbor and City Property, Poor and Sanitary, and Public Works Committees met on Thursday evening.

HARBOR AND CITY PROPERTY.

PRESENT.—Ald. Petrie, (Chairman), Starling, Jellett, Lingham, Holden and Ostrom.

The account of R. Walters, 75 cents for cutting ice in the harbor, was passed.

The question of the purchase of a dredge for use in the harbor was brought up—the chairman being of the opinion that such a purchase would be to the interests of the city. The majority of the Committee did not approve of the project. The Chairman was, however, authorized to ascertain the price at which a dredge could be purchased.

The Chairman proposed to request the Mayor to communicate with the Government, asking for the appropriation of $5,000 which has been made towards improvements in the harbor, and allow the city to expend that sum in dredging as it may deem best—or else to ask the Government to send a dredge here as early in the season as possible.

Ald. Jellett moved that the matter be allowed to lay over until after the report of the joint committee—the Ferry and Public Works Committees—with regard to the ferry site, had been received.—Carried.

The committee then adjourned.

POOR AND SANITARY.

PRESENT.—Ald. Ostrom (Chairman), Costello, McIninch and Petrie.

The following accounts were passed:—

Chas. Cook, coffin	$ 1 00
Clarke & Vermilyea, groceries	26 50
Hugh Walker, groceries	37 75
Geo. E. J. Hanwell, wood	15 82½
Adam Henry, groceries	32 00
S. Wood, groceries	11 00
Miss B. McCormack, groceries	28 50
A. Knox, groceries	34 50
Wm. Monahan, wood	60 60

The Chairman introduced the question of the agreement between the city and the W. C. Association which was decided upon at the last meeting of the Council; but the Committee evidently did not want to discuss it, and subsequently adjourned.

PUBLIC WORKS.

PRESENT. — Ald. Lingham (Chairman), Starling, Diamond, Costello, Clarke, Dunnet, Ostrom.

The following accounts were passed:—

Wm. Carson, stone	$ 20 00
Michael McDonnell, stone	29 00
John Carson, stone	14 00
Geo. Bowler, stone	30 00
Wm. Sutherland, lumber	477 19
Patrick Callery, keeping drain open	6 00
Street Pay list No. 9	147 19

Ald. Diamond moved that the Committee recommend that tenders be asked for 100,000 feet of lumber—2 and 3 inch plank, not less than 10 inches wide, and 4 x 4 inch scantling—and 80 kegs of cut nails.—Carried.

Ald. Dunnet moved that the Street Surveyor open a stock book for lumber, for the purpose of showing at any time the amount of lumber on hand and where lumber is being used.—Carried.

The Committee then adjourned.

Proclamation by the President.

Fault-finding is so seldom indulged in by those who use medicines manufactured by the World's Dispensary Medical Association, that the President of that corporation the Hon. R. V. Pierce, M. D., has issued a special request or proclamation to any and all persons, if there be such, who may have taken or shall hereafter use any of the family medicines made and sold by the said Association, in all countries of the world, and who have not derived full benefit from said medicines, that if they will write the said Association a description of their maladies the Faculty of the Dispensary will advise them with respect to the successful treatment of their diseases. Dr. Pierce's Golden Medical Discovery is gauranteed to cure all humors, from the common blotch, pimple or eruption, to the worst scrofula or king's evil, and those virulent poisons that lurk in the system as a sexual or secondary affection resulting from badly treated or neglected primary diseases. It also cures bronchial, throat and lung diseases. Favorite Prescription is guaranteed to cure female weaknesses and kindred affections. Extract of Smart-Weed cures bowel affections, colds, and all painful rheumatic and neuralgic affections. Dr. Pierce's Pellets (little sugar-coated pills), are the little giant cathartic. Address, World's Dispensary Medical Association, Buffalo, N. Y., or Great Russel Street Buildings, London, England.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

Disastrous Fire in Trenton.

Five Stores and One Hotel Burned.

(*From Our Own Correspondent.*)

TRENTON, April 15th.

The most disastrous conflagration that has visited our town for years occurred this morning. About three o'clock fire was discovered bursting out of James' steam cabinet factory, which is situated on the wharf at the back of his store on Front Street. Although the alarm was sounded promptly, the fire had spread to Crampton's hotel on the east and Shea's tin shop on the west before the engine arrived. In spite of the efforts of the firemen and the effect of two powerful streams of water, the fire spread rapidly and soon had entire control of Crampton's hotel, Brooks' butcher shop, G. H. Gordon's vacant store, James' furniture store, a vacant store owned by the Young estate of Montreal, and Wm. Shea's stove and tin shop. At this time the heat was so great on Front street that the firemen had to take the hose around by a back street and down Elgin street to Front in order to play on Crampton's hotel. Kinsella's harness shop on the opposite side took fire about this time and was speedily consumed, together with O'Neil's butcher shop and Morrison & Kenney's livery office. The Ireland block, which is situated directly opposite James' furniture store, was now in great danger, but was saved by the determined efforts of the firemen and citizens.

The cinders were carried by the wind to the Post Office and Molson's Bank on Ferry street, both of which were on fire, but were easily extinguished. The firemen now began to get control of the fire, and by six o'clock it was almost entirely out, nothing being left of the entire block but a portion of the brick walls of Gordon's store and James' furniture store; the other buildings, being built of wood, were almost entirely consumed. The following is a list of the sufferers and the amount of their losses as nearly as could be ascertained:—

T. C. Crampton, of the Commercial Hotel, lost most of his furniture, which was insured for $1,300; the hotel was owned by the Cooley estate, and was insured for $1,500.

J. B. Brooks' losses can not be ascertained as yet, but they are believed to be heavy.

G. H. Gordon's loss on building is $2,000; insured for $1,500. G. S. Barton, who lived over the store, lost all his household furniture, worth about $1,000; no insurance.

T. James' machinery is almost a total loss; but a part of the furniture in the store was saved. The building was insured for $1,200, and the total loss is supposed to be about $7,000.

The Young estate, which owned Wm. Shea's stove store and the adjoining vacant store, had no insurance on their buildings. Mr. Shea's loss must have been very heavy, as his stock, which amounted to about $5,000, was only partly saved, and was only insured for $1,300.

S. Gooding, who owned a small building west of Mr. Shea's store, sustained a loss of about $200; no insurance.

The damage to the Ireland block will probably be about $150.

To-day being Good Friday, all the stores are closed, and numbers of the citizens are gathered at the scene of the fire.

HELP SOUGHT FROM BELLEVILLE.

At about 3 a. m. on Friday, a telegram from Trenton was received here, asking for assistance. The Chief Engineer, the Mayor, and the Chairman of the Fire Committee, were at once communicated with, and it having been decided that No. 1 steamer should be sent, men and horses were got ready to start by 3:40, but another telegram arrived at that time, stating that the fire was then under control.

School Finances.

The following is the report of the Finance Committee of the Board of Education, which was submitted to that body on Tuesday evening last:

To the Chairman and Members of the Board of Education:

GENTLEMEN,—Your Committee on Finance and Assessment beg to submit the following report:

1st. We have made further enquiries regarding the non-payment of School taxes during one year from the Township of Thurlow, and find that it had been the practice of the Board—from the time (1875) School Section No. 13 was annexed to the City, to 1878, when the part comprising lots 1, 2, 3, 4, 5 and 6 was united—to appoint the collector of taxes, and that in the year 1877 no collector was appointed.

That since the union of that part comprising lots 1, 2, 3, 4, 5 and 6 the taxes have been collected by the Collector appointed by the Municipal Council of the Township of Thurlow, and by their Treasurer handed to your Secretary-Treasurer.

2nd. We recommend the payment of the following accounts:

No. 1, Conger Bros., brooms, &c.	$ 1.50
No. 2, G. Ashbury, ink	1.00
No. 3, S. Bushaw, repairs	2.95
No. 4, J. C. Overell, stationery	49.19
No. 5, Jas. Harold, tubs	8.00
No. 6, W. H. Woodward, repairing clock	1.00
No. 7, Wm. Hale, cleaning	2.00

All of which is respectfully submitted.

Signed on behalf of the Committee,

WM. JOHNSON,
Chairman.

Belleville, 12th April, 1881.

THE PETERBOROUGH EXCURSION.

Six Carloads of Visitors.

Fraternity of Musicians.

At 11:20 a. m. yesterday the excursion train from Peterborough, which had been chartered by the Fire Brigade Band of that town, stopped at the G. J. R. station here. The train consisted of five passenger cars and a flat car for the band.

The passenger cars were comfortably filled, and the total number of excursionists, including the Band (which numbered 22) was about 300. Of this number about 100 besides the Band came from Peterborough; the remainder were picked up at Keene, Hastings, Campbellford and Stirling. On arriving at the station the excursionists alighted and dispersed in different directions throughout the city. The 15th Batt. Band, whose guests the visiting Band were throughout the day, assembled on the platform of the station, with a large crowd of spectators, awaiting the arrival of the train. As the members of the Peterborough Band alighted from the car they were warmly welcomed by the members of the 15t Band. Both bands then formed and marched to the band room of the 15th, the 15th Band playing a lively air on the way. A few moments were spent at the bandroom, in order to allow the members of the two bands to become acquainted with each other, after which an adjournment was made to the Commercial House, where dinner was served.

Between one and two p.m. the two bands assembled on the market-square for the purpose of carrying out the musical programme which had been arranged. Here an open air concert took place which lasted fully an hour and a half and was listened to by a very large audience. The two bands played alternately, and it can truthfully be said that the selections were all fine ones and were every one well performed. As was natural, comparisons were made by the listeners between the bands. The Peterborough band certainly had the advantage in power. It numbered 22 performers, while the 15th had only 16. Its six cornets also gave it a great advantage over the Belleville band, which had only two. But it may be doubted whether the visiting band played together any better, or even as well, as the 15th, and their selections were perhaps not so well chosen. On the whole, however, it must be admitted that the Peterborough band is the better band of the two.

On the conclusion of the concert the two bands intermixed and marched up street playing together; then marching back to the band-room, they dispersed.

The excursionists scattered themselves through the city and enjoyed themselves as best they could by seeing the sights which Belleville affords to the eye of the stranger. The train left the station a few minutes past ... while the playing of both bands and the cheers of the crowd assembled at the station.

The excursion will not soon be forgotten either by the excursionists or by many Belleville people, as a large number of friendships were made during the short visit of our friends from Peterborough and the northern villages.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

"Hail bounteous, beauteous, gladsome Spring" —this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Ayer's Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistent use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

Pressed Hay

FOR Sale, in small or large quantities. Store house, Pinnacle St., nearly opposite gas house.

334dtf B. E. CAMPION.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similiar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

FRONT STREET, BELLEVILLE.

NOTICE.

THERE being a vacancy in the Medical Council of Ontario, caused by the resignation of Dr. Irvine, of Wolfe Island, I hereby announce myself as a candidate for election to the Medical Council for Quinte and Cataraqui Division, and respectfully ask the support of members of the profession.

HENRY W. DAY, M.D.

Trenton, April 7, 1881. 326dtf.

$66 a week in your own town. Terms and $5 outfit free. Address H. HALLETT & Co., Portland, Maine.

THE CHEAPEST

BLACK SILKS

IN THE CITY.

WE have just received 6 pieces more of our celebrated Black Silk at $1.29 per yard.

It is decidedly the best value of Silk in the Dominion of Canada—soft in make, so that it will not easily crease or cut. We consider it fully as good as any $2.00 silk that is sold in the city. We have also

A CHEAPER SILK!

6 pieces, which we offer at $1.03 per yard. This is what is usually sold at $1.50 per yard. These classes of Silks cannot be purchased elsewhere as cheap as we offer them.

CARPETS!

We have also received several bales of UNION CARPETS in first-class patterns at medium prices.

Our assortment of carpetings is one of the largest in the city. We have some specially low lines in Tapestries.

GLASGOW WAREHOUSE.

Local Notices.

Notices under this head 10cts. a line each insertion. After six insertions 5 cts. a line.

SOCIAL AND LECTURE in the City Hall on Monday evening, 18th inst., in aid of Bleecker St. Church. Refreshments (sandwiches, cakes, tea and coffee) served from 7 to 8 p.m., when the Rev. Dr. Jeffers will take the chair and Rev. Dr. Hunter, of Toronto, will deliver his celebrated lecture on "The Marriage Question." Admission to both only 25 cts. Let the Hall be filled.

THE Literary Association of John St. Presbyterian Church will hold a social in the School room on Friday at 7:30. Admission 15 cents.

Daily Intelligencer.

BELLEVILLE, SATURDAY, APRIL 16.

6 O'CLOCK EDITION.

City and Vicinity.

THE Finance Committee did not meet last night.

THE City Council will meet on Monday evening—perhaps.

A CRICKET CLUB is being organized at the village of Deseronto.

SOME of the Census Enumerators in the city have almost completed their labors.

THE steamer *Deseronto* is to be placed on the route between Picton and Trenton.

THERE was a full meeting of the Public Works Committee on Thursday evening—a rare occurrence.

MR. STEWART, C. E., is here for the purpose of locating the site for the Grand Junction Railway elevator.

SEVERAL of Capt Cuthbert's workmen have been in Trenton since Wednesday, making necessary repairs to the *Annie Gilbert*.

A LARGE quantity of Belleville whiskey was consumed yesterday. The bars of the city have not done such a business for many a day.

WHAT was the matter with the street lamps last night? The city was in total darkness throughout the greater part of the night.

SOME of our local scullers have already been practising. One of them rowed from the boat house around the light-house and return in nine minutes.

TO-MORROW will be a great day in the churches. The new organ in Christ Church is to be opened, and a magnificent programme of music has been prepared for St. Thomas' Church.

A PARLOR CONCERT and sale of useful and fancy articles is to be held at the residence of N. B. Falkiner Esq., on Tuesday evening next, the 19th inst. Proceeds in aid of St. John's Church.

MR. FRED GETMAN, of Picton, when in Oswego a few days ago arranged for a rifle match between a team from the Prince Edward Association and one from that city, to take place in the latter place on the 4th of July.

THE Chairman of the Public Works Committee has been visiting the different wards for the purpose of learning their requirements in the matter of street improvements. It is likely that not less than $10,000 will be needed for streets this year.

THE ferry steamers were on Thursday greatly bothered by the heavy ice from the upper part of the bay, which passed down on that day. The *Mary Ethel* got stuck in the ice and remained fast for a length of time, but the *Prince Edward* succeeded in breaking through it.

THE Picton *Times* says: "The Public School Board met on Tuesday. C. D. Morden resigned his seat for Brock Ward on account of change in the law by which being the paid Secretary he is intelligible." Are members of the Picton Public School Board usually unintelligible?

MINING operations in Madoc are being pushed on with vigor. We learn that about 10,000 tons of iron ore from the hematite mine is awaiting shipment. The lessees of this mine and of the Dufferin mine are constructing sidings at these mines, whereby the shipment of ore will be greatly facilitated.

A YOUNG man considerably the worse of liquor, whilst driving a buggy on Pinnacle Street yesterday morning as the Peterborough train was drawing up to the station, allowed his vehicle to collide with a cart. The cart was uninjured, but the front axle and the whipple-tree of the buggy were broken, and the horse was secured.

THE lighting apparatus for the light house has arrived and will at once be placed in position. The lantern was not to have been sent until the middle of June, but Messrs. Northcott & Alford, the contractors, made such good time in the erection of the pier and building that it was necessary to anticipate by two months the forwarding of the illuminating apparatus.

MR. HARRISON'S buck had a holiday yesterday as well as the other citizens of Belleville. Escaping through the gate, which had been opened by mischievous boys, he headed for the river, jumped in and swam nearly to the harbor. Landing [illegible]wn over the two dams. When he arrived home he was a pretty well exhausted [illegible]

[illegible]THER PROBABILITIES. — Toronto, April 16.—Lakes, moderate winds, mostly westerly to southerly, fine warm weather. Continued warm weather to-morrow.

BAND ASSEMBLY.—On Monday evening next the 15th Batt. Band will hold an assembly in Ontario Hall to which the admission for a couple will be 50 cents. The band deserves to be well patronized.

PERSONAL.—Among those who came down with the excursion from Peterborough yesterday were Messrs. Thos. Rutherford, Chief Engineer of the Peterborough Fire Department, and Jas. Macdonald, local editor of the *Review*. Mr. Rutherford, in company with Assistant-Engineer Cummins, visited the different fire-stations.

ENCOURAGE THE CITY MISSION WORK. —Remember the religious service at Bethel Hall this evening at 8 o'clock. This meeting is in connection with the City Mission Work, and is led by Rev. A. Schuster, City Missionary. All classes are invited.

EASTER MARKET.—This morning's market was the largest of the year. The butter market was crowded to suffocation with buyers and sellers, and the market-square was hardly less crowded. At 10 oclck there were, by actual count, 196 market-waggons on the square and crowded off into the street.

SACRED CONCERTS.—The concerts which are to be given in Christ Church and the M. E. Tabernacle next week will richly deserve the patronage of those who love good music. The principal attractions of the Christ Church concert will be the organ playing of Mr. F. H. Torrington, organist of the Metropolitan Church, Toronto, and the vocalism of Mrs. Caldecott, the well-known soprano, of Toronto. At the concert in the M. E. Tabernacle on Friday evening, an array of the best talent which Belleville can furnish will be heard.

SEVERE ACCIDENT. — Yesterday, about noon, Mrs. Mackenzie, aunt by marriage of Dr. Stewart, of this city, slipped and fell on the floor, breaking the left *femora* or thigh bone near the socket. In attempting to save herself from the fall, she placed her left arm with considerable force on the floor, and fractured the bones of the forearm. Dr. Eakins was sent for, and on his arrival did what he could for the old lady; but, seeing that she is 84 years of age, and her injuries are of a very serious nature, it is hardly possible that she will recover. She is at present suffering great pain.

THE STREET RAILWAY.— The Winnipeg *Times* of the 9th says:—"Mr. Marsh, who owns and operates a somewhat unsuccessful street railway in Belleville, Ont., arrived here last night. Although not here altogether on that business, yet he proposes opening negotiations towards obtaining a transfer of the enterprise to Winnipeg. It is said that he will put his plant in at a valuation as stock in the joint stock corporation here, provided the company will furnish the balance of the capital necessary to put the undertaking into running order. This is a good opportunity for the street railway company to place within the reach of our citizens a much needed enterprise."

SERIOUS ACCIDENT.—At a "raising" on the farm of John Donaldson, in the 2nd con. Thurlow, on Monday the 11th, a chain broke, letting a bent fall, which caught a young man named Seymour Sutton in its fall. The bent in falling struck him in the side of the head, from which it glanced to the shoulder, felling him to the ground and crushing his shoulder badly. There being no conveyance at hand, the young man was compelled to walk a mile and a quarter to his father's residence, when Dr. McLaren was called in, and dressed his wounds and found them serious. Many others narrowly escaped instantaneous death in the falling of the bent. We are informed that the young man is so far recovered to-day as to be able to sit up.

PROOF POSITIVE.—Few better examples of the benefit which the N. P. has been to this country could be furnished than a visit to the boot and shoe store of Messrs. Roblin & Bayeur, corner of Bridge and Front Sts. In this establishment is to be seen one of the finest stocks of ladies' and gents' boots and shoes ever displayed in Belleville. The new lines of ladies' shoes are remarkable for beauty of design and finish—being equal in every respect to the best New York workmanship. A splendid lot of trunks and satchels is also shown. Now, Messrs. Roblin & Bayeur assure us that there is not a dollar's worth of foreign goods in their establishment. Everything they sell is of Canadian manufacture, and the greater part of the stock is from factories which owe their existence to the N. P. What better proof could be asked for.

GRAND CONCERT.—On Wednesday the 27th inst, a concert is to be given in the City Hall by the celebrated "Rival Grand Concert Company," under the auspices and in aid of No. 1 Company 15th Battalion. The company consists of five solo artists:—Miss Minnie Emerson, *prima donna*; M'me Emilie Schiller, flutist; Mr. H. N. Hutchins, cornetist; Mr. Henry Singerhoff, violinist; and Mr. Will E. Louis, pianist and director. It is a strong company, and has received very high eulogiums from the press. The management have decided to fix the price of admission at 50 and 75 cents. The sale of tickets will commence at once and it is to be hoped that the members of the company will meet with a hearty encouragement from the public in consideration of the heavy loss they recently sustained through the destruction of their armory and club-room by fire.

SOCIAL.—The social of the Literary Association of John St. Presbyterian Church held last night was very largely attended. The Rev. D. Mitchell, Hon. President, was in the chair. After suitable opening exercises the pastor expressed the pleasure he felt at seeing such a large attendance at the first entertainment of the Literary Association. He pointed out the advantages of such a society, and said he cherished the hope that the ladies would in another year come to the front, and that, overcoming their natural modesty, they would give the Association the benefit of their valuable intellectual gifts. In the course of the evening refreshments were served, and a number of excellent readings given, while several ladies and gentlemen rendered some excellent vocal and instrumental music—a piano being brought into use for the latter. A social on Good Friday is not a bad idea for those who have a holiday and who, because of their religious proclivities, do not observe Saints' or other such days.

MARCHMONT HOME. — On Thursday afternoon an INTELLIGENCER reporter visited the Marchmont Home with the intention of seeing and talking with some of the sixty-four boys who arrived from Glasgow on the previous evening. When he arrived the whole sixty-four were ranged in a semi-circle, in two ranks, singing hymns lustily under the direction of Miss A. Bilbrough, under whose superintendence the boys were brought out. The young emigrants vary in age all the way from six to eighteen; but the great majority of them are under twelve. With a few exceptions, they were sturdy, healthy looking little men, and were all as merry as kittens, especially the smallest ones. Among these "Tuppence" was conspicuous for his activity and mischief. "Tuppence" is a tiny creature aged six, with a head much too big for his body, and a large red merry-looking face which it is utterly impossible to keep clean for ten minutes together. A world of mischief looks out at you from his light blue eyes, and nothing could be slyer and more comical than his voice and mode of speech, flavored with the broadest of all broad Scotch accents. "Tuppence" was a great favorite on board ship. During the first few days of the passage he appeared regularly at his meals, but at length he followed the example of the majority of the boys and kept his berth. He was very sick for a day or two, during which time he received the best of attention. The steward of the vessel asked him one morning if there was anything which he thought he could eat. "Tuppence" said he thought he could relish a beefsteak. The steak was at once cooked and served up hot and juicy to the little man, who ate it, and immediately got well, and showed no signs of sickness during the remainder of the passage. But "Tuppence" is only one out of the sixty-four. There are many other faces to be seen among this boyish band which are even more intelligent (though perhaps not so mischievous) than his. All the boys [illegible] ones can read and write with ease, and they are remarkably well behaved. The boys are well provided for on leaving the old country. Each one is presented with a stout box containing a suit of working and a suit of Sunday clothes, two or three pairs of socks, two pairs of stout shoes, shirts, handkerchiefs, and other articles of clothing; also a writing-desk, a Bible, a hymn-book, a story-book, a jack-knife, and almost everything which is necessary for use by a boy and which can please his fancy. The boys all seem to be contented with their lot, and look foward with hope to their future life in Canada.—The reporter was shown through the Home by one of the lady superintendents. Everything from the dormitories to the kitchen was in perfect order and as neat as the most fastidious housekeeper could make it. Copies of pamphlets containing information respecting the Training Homes in Scotland, were also presented to the reporter, the contents of which we will probably make use of at some future time.

THOSE SIDINGS.—The Street Surveyor gave orders to day for the removal of the sidings running to Downey & Preston's elevator. As soon as the first train left this afternoon one rail was to be removed in order to break the road, and the track was to be filled in with gravel. Mr. Taylor has, however, consented to defer action till Monday, when six or eight lengths of rail will be taken up, their use being required in the main line.

POLICE COURT.—There was quite a circus at the Police Court. Mrs. Moore charged Mrs. Cronkwright with having last February said that she (Mrs. Moore) kept a "Rip shop." Mrs. Moore purposes to leave town shortly, and wished to clear her character by having some light thrown on the meaning of "Rip shop." The question was one of too great depth and comprehensiveness to be decided at once, and it was adjourned till Wednesday for further evidence. Two drunks were discharged. Patrick Archie was charged by Root. Emerson with the larceny of a horse. He was convicted and sent to gaol for thirty days. Both parties are from Tyendinaga.

EASTER MEAT.—The butchers of the city, as usual, made a grand display of Easter and other meats to-day. Thomas & Thompson (Lingham's old stand,) had a pair of Guelph heifers, weighing 2,130 lbs; a pair of 5-year-old steers fattened by Jacob Sills, of Thurlow, and weighing 2,000 lbs.; 8 sheep fed by Mr. Hough, of Prince Edward; 4 calves; 3 spring lambs—one fattened by T. Gay, of Sidney, and the others by W. Severn—probably the finest lambs ever killed in Belleville. This firm also displayed a large quantity of good sausages, &c. Mr. Chas. Green had a pair of 3 year-old steers, weighing 3,000 lbs., fattened by Mr. Alexander, of Hillier; two calves and a heifer reared by Ivy Roblin, of Hungerford, weighing 3,801 lbs.; also ten spring lambs from the same man; five spring lambs from Mr. Spencer, of Thurlow; one fat sheep from Wm. Elliott, of Hungerford, weight 300 lbs., and another weighing 340 lbs. from A. Denyes, of Sidney; a mammoth calf reared by Jose Bros. of Holloway, six months old and weighing 840 lbs.; and six other calves obtained from various parties, besides the usual quantity of pork, &c. Mr. James A. Clarke had a pair of oxen weighing 3,500 lbs, fed by Mr. Farnsworth, of Tyendinaga; some choice cattle raised by Mr. Mumby, Sidney; a number of fine veals fed by Moses Boardman, Sidney; a pair of spring lambs; veals from W. Hamilton, Thurlow; and a good variety of pork, mutton, &c. E. Britton shows two magnificent specimens of calves—one raised by Robt. R. Ross, Ameliasburgh, two months old, and weighing 290 lbs.; and the other being seven weeks old, weighing 250 lbs., and raised by Thomas Walker, of Rawdon. These two carcases are claimed to be the finest veals ever displayed in the Belleville market. Mr. J. D. Haight has four carcasses of veal, three steers, one lamb, one sheep, and a fine pig.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

News Condensed.

—Cattle disease is carrying off many animals at Fair Haven, N. J.

—There was a heavy snow fall at Quebec on Friday the 15th inst.

—The King of Abyssinia has fallen in battle. His son Michael succeeds him.

—Rev. Mr. Hammond is to be invited to conduct revival meetings at Whitby.

—Lord Dufferin has taken his departure from St. Petersburg for Constantinople.

—Daly, of the Connaught *Telegraph*, was arrested on the 13th on a charge of inciting to violence.

—Some $15,000 worth of silks have lately been stolen from Morgan's establishment, Montreal.

—The Berahardt has gained twenty-seven ounces in weight since her first appearance in this country.

—The Halifax City Council has agreed to exempt the proposed cotton mill from civic taxation for thirty years.

—The final returns show that the Scott Act carried in Lisgar by a majority of 128. The total vote polled was 372.

—A company with a capital of $240,000 has been formed in France to work the phosphate mines of the Du Lievre.

—There is a great scarcity of shanty men in the Ottawa district, although as high as $40 per month is paid to some now.

—The erection of a cotton mill at Kingston is assurred, the necessary hundred and fifty thousand dollars having been subscribed.

—Several prominent merchants at Montreal have proceeded to Winnipeg, Manitoba, to establish branches of their business there.

—There has been a great robbery of dynamite at Luganon in Switzerland, and it is supposed to have some relation with a Nihilist plot.

—Five hundred additional men have been started at work on the western extension of the Canada Central Railway during the present week.

—The receipts of the Grand Trunk Railway for the week ending April 9th were $218,912, being $12,115 increase over the corresponding week of 1880.

—The assassins of the late Czar, with the exception of the woman Hessy Helfmann, were hanged at St. Petersburg on the 15th inst. There was no disturbance.

—A collision took place on the 15th between the steamers *Andalusian* and *James Harris* on the Northumberland coast, and fourteen persons were drowned.

—A severe storm prevailed on the 15th throughout Central and Southern Vermont. At Rosebury, the snow is a foot deep on the level, and in an adjoining town two feet deep.

—Nancy Boyle, aged eighteen, missing six weeks from Westport, N. Y., was found on the 15th in a school house six miles from her home, evidently outraged, killed, and thrown through a window.

—A Madrid despatch says:—A large petard was exploded at the door of the church of Santa Maria yesterday while the edifice was full of worshippers. The door was damaged, but nobody was hurt.

—A large Manitoba party passed through Stratford on the 14th in charge of Mr. T. Ford, of the Grand Trunk railway. They number about four hundred souls, and thirty-two cars of freight go with them.

—The petard-throwers have recommenced operations in Madrid. The other day three large petards were hurled into as many private houses, causing considerable damage to property, but fortunately no injury to life or limbs.

—Mr. Gladstone says the Government will not adopt an apologetic tone in the coming debate on the transvaal question. It was, he says, a question of saving England from sheer bloodguiltiness.

—The plague in Mesopotamia it seems is caused by the Theoites, a Mahometan sect, bringing the dead bodies of their friends to the shrine of Ali Meshed to be interred in the belief that it secures for their souls a favored place in heaven.

—As evidence of the strides the cattle export trade is making in Canada, it is stated that freight room on the steamers sailing from Montreal has at this early date been secured for more than twice the total number of cattle shiped in 1880, and thrice that in 1879.

—John Danford, an Oneida Indian, living near London, exhibits a remarkable peculiarity. The skin on his chest is peeling off, leaving the body as white as any Caucasian. He is rather proud of his singularity, and exhibits himself freely. The phenomenon began to show itself some years ago.

—The Kingston *News* says:—"Part of the machinery for the knitting mill has been shipped from Cohoes. It is expected that the mill will be in running order by the 15th of May, when some 60 hands will be employed, one half of whom will be [illegible] Hymest settlement, N.B., recently gave birth to a *lusus naturæ* about the size of an ordinary calf, but which resembled a bear in many respects. The mouth is furnished with tusks, the ears are short, and the body covered with long black hair. It has a short tail, and on one hind leg is a formidable claw. The cow was chased out of the woods last fall by a bear.

—It is understood that his Excellency the Governor General and suite will leave for Quebec the first week in May, remaining there at "The Citadel" for about a month, during which time a couple of afternoon "at homes" will be given. On the arrival of the Princess Louise and party from the old country, a couple of weeks' salmon fishing will be enjoyed on the St. Lawrence, after which the viceregal party will proceed to Halifax to be present at the general military review to be held there on Dominion day. About the middle of July they will start on their North-West trip, which is expected to last a couple of months.

MORNING DESPATCHES

EUROPEAN.

SUDDEN DEATH.

DUBLIN, April 17.—Sergeant Heron, Q. C., one of the counsel for the Crown in the recent Irish State trials, died yesterday of apoplexy while fishing in Galway.

AMERICAN.

DIVIDEND POSTPONED.

NEW YORK, April 16.—Owing to the present litigation of the Western Union Telegraph Co., the dividend declared payable on April 15th has been postponed.

SUFFOCATED BY GAS.

BROOKLYN, April 16.—Mrs. Wiens was found dead in bed yesterday, suffocated by escaping gas.

ROBBER ESCAPED.

NEW YORK, April 16.—John Jourdan, implicated in the robbery of a Savings Bank at Middleton, Conn., was taken on Thursday from the jail to the hospital, suffering with malarial fever. Not being properly guarded, he escaped during the night.

WASHINGTON SPECIALS.

The *Herald* says that in addition to the responses of the holders of sixes, numbers of owners of registered fives have announced their readiness to renew bonds at 3½ per cent. Nothing can be done until they are out of the way.

There is great urgency that the Indian supplies for the year are being delayed beyond the time for shipping them to the extreme North-West. Unless the Indian Commissioner can be confirmed at an early day there are several other branches that will suffer materially if there is a much longer delay.

The *World* says it is learned on good authority that Whitolaw Reid is an applicant for the Berlin mission.

The *Sun* says the delegation of Republicans who called on the President yesterday, protested against the recognition of Mahone. The delegation said that a straight ticket should be nominated soon, and no alliances be made with Mahone's party.

Senator David Davis, who is not in good health, is reported about to go to California to recuperate, and will not probably return before the Senate adjourns.

MEXICAN NEWS

CITY OF MEXICO, April 16.—Gen. Grant's movements are regarded here with apprehension.

The riots which imperilled the lives of Protestants here, in Michaanoan and other points recently, are believed to have been promoted by persons hostile to the investment here of American capital. The Government has shown great energy in suppressing the outbreaks. All Protestants are now perfectly safe throughout the Republic.

MURDERS BY A NEGRO.

NEW ORLEANS, April 16.—A number of drunken negroes quarrelled 18 miles from Flaquimina the other day. One named Wall procured a shot gun, went to the bank of the Bayou and fired at a man in a boat containing eight colored men, killing two and wounding four, but missing the man he intended to shoot. Wall fled.

EX-PRESIDENT DIAZ.

BROWNSVILLE, Texas, April 16.—Ex-President Diaz, of Mexico, visiting Matamoras, was cordially received by the army officers and salutes were fired.

SUICIDE.

WASHINGTON VALLEY, N. J., April 16.—Edwin Grover, a well-to-do farmer, aged 59, who was sick a long time with dyspepsia, committed suicide by shooting. He wrote a long letter giving minute directions as to the style and how the undertaking shall be arranged, the place of burial, and the preacher and text of the funeral sermon.

FRIGHTENED TO DEATH.

BALTIMORE, April 16.—Mrs. James Boyd was frightened to death last night by the attempt of a drunken man to forcibly enter the house.

STRIKE OF RAILROAD MEN.

LOUISVILLE, April 16.—500 railroad men belonging to the platform Union struck here yesterday for higher wages.

LYNCHING THREATENED.

RICHMOND, Va., April 16.—William Peters was arrested on a charge of murdering Simon Papaw in Baletourt Co. The men were suitors for a handsome lady. Lynching is threatened.

DAMAGE BY FLOOD.

DAVENPORT, April 16.—A raft containing 600,000 feet of lumber was broken up and carried away by the moving ice here. Much other damage was done here by the flood. The water here and at Rock Island is falling rapidly.

MURDERS AT EL PASO.

EL PASO, Texas, April 16.—Two young Mexicans were shot and killed by Americans in a difficulty about land 8 miles from here. The Mexican consul with armed Mexicans having obtained permission from the Mayor, took possession of the bodies, when a dispute arose about the presence of armed Mexicans between Campbell, Hale and a policeman named Kermpkan. Hale shot Kermpkan dead, when the City Marshal shot Hale and a Mexican accidentally, and also shot Campbell. Hale died in a few minutes. Campbell died next day.

NEW YORK, April 16.—Arrived the *State of Nevada*, from Glasgow; *Erin* and *Baltic* from Liverpool.

AFTERNOON DISPATCHES.

THE EXECUTED NIHILISTS.

ST. PETERSBURG, April 19.—The executed Nihilists passed their last day as follows: Russakoff prayed incessantly and offered his services to the government as a spy. The offer declined. Jeliboff spent his time in writing page after page about the trial, committing to paper what he was forbidden to speak to Sophia Pieoffsky. He wrote to her mother to waste no time in assuming the wrath of her father. Kcaltschetch drew up a memorandum about his specific discoveries which he addressed to the high Court of Justice, avowing a desire that his name be immortalized and making a gift of his inventions to the State, on condition that all profit from them should go to the amelioration of a lot of children of political criminals.

WASHINGTON, April 16. — Indications: Lower Lakes warmer, fair.

Beaconsfield's Condition.

CONFIDENT OF RECOVERY.

LONDON, April 16.—Beaconsfield passed a restless night. His condition is improved. The doctors are confident of his recovery.

KINGSTON MANUFACTURES.—At a meeting of the shareholders of the Cotton Mill in Kingston on the 13th inst., the business men took hold of the enterprise in dead earnest, and soon ran up the subscription list to $151,250, being more than the amount required to start the concern. So the Cotton Mill for Kingston is a fixed fact. What is being done in Belleville to establish manufactures?

—On the 15th inst. Peter McLaren, the wealthy lumberman of Ottawa, took a heavy dose of iodine in mistake for some medicine, but fortunately the mistake was discovered in time to save his life. His physicians have hope of his recovery.

—A despatch from D'Urban says the state of affairs in the Transvaal is reported as being fearful, and a civil war is expected. Mr. Gladstone, in a communication says when he next discurses the Transvaal policy in the House of Commons he will adopt no apologetic tone.

—The Canadian Pacific telegraph line between Winnipeg and Thunder Bay is to be thoroughly repaired. The line is to be straightened and brought close to the railway, so that when breakages occur the defect can be discovered quickly.

The London *Free Press*, has followed the example of the Toronto dailies and advanced its subscription rate to $7 per annum. The Daily *Advertiser* of the same city has already advanced its subscription price by $1 [illegible]

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4eod&wly

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrices, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—— ——and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

'THEY ALL DO IT.'—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

FOR FROST BITES AND CHILBLAINS. Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

A country doctor writes: "am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

A beautiful head of hair is appreciated by everbody, and how to secure it, interests everbody. The hair and scalp must be keep free from scurf and dandruff, and not be allowed to get dry and harsh. The roots must be stimulated to healty action. Flexibility and a handsome gloss are essential. All these requisities are easily secured by the use of Ayer's Hair Vigor.

Hollaway's Ointment and Pills.—For bad legs, bad breasts, scorbutic and scrofulous sores this is a genuine specific. The grateful earnest gratitude of thousands who have experienced its unrivalled power over these complaints, and who have been raised from prostrate helplessness and a condition loathsome to themselves and others, renders it quite unnecessary to enlarge in this place upon its extraordinary virtues. The parts affected should be bathed in lukewarm water, and when the pores are thereby opened the Ointment should be well rubbed in, at least twice a day. It is always advisable to take Hollaway's Pills in these disorders, as this much assists the Ointment's action. The Pills check the fever, purify the blood and eject all morbid matter engendered by these diseases.

—The newly elected president of the Buffalo Board of Trade, in his inaugural address yesterday, expressed himself strongly in favor of reciprocity with Canada, and stated his belief that the citizens of Buffalo, with very few exceptions, favored such a treaty. Very likely—now.

—An attempt was made by the Nihilists at St Petersburg on the 14th to rescue their condemned brethren now in prison. Twenty of the attacking party were captured with bombs in their possession.

—Hon. Mr. Langevin was reported somewhat better yesterday, He will shortly leave for Quebec.

—Sir John Macdonald is still confined to his room and unable to attend to departmental business.

—Cobourg is to have a life-boat stationed there. A volunteer crew will be organized.

DIED.

At the family residence, Kingston Road, on the 11th inst., ANN H. EMPEY, relict of the late John Carscallen, sr., aged 86 years and 2 months.

Commercial.

BELLEVILLE MARKETS.

INTELLIGENCER OFFICE,
Belleville, April 16, 1881.

The grain market is quiet but firm. Very little barley is being offered. Seed barley is sold at from 75c to 80c per bush.

Rye is firm at our quotations, for quantities higher could be obtained. In Oswego to-day Rye reached $1.02 in bond.

Oats are firm with very little offering, a load to-day sold at 38c.

Pease are firm at 65c to 68c.

Dressed hogs are lower, $8.00 per 100 lbs being the best price obtainable to-day.

There is no change in roll butter, and no tub offering.

Eggs sold readily at 11c to 12c per dozen.

Hides and pelts are steady, and deakins a trifle higher at 55c.

The seed business has been particularly dull this season with a downward tendency during the whole season. Clover seed is dull of sale at $3.50 to $4 00 per bush. Retailers ask $4.50 per bush.

Belleville.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take *such* medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

To Cure Consumption,

Bronchial affections, weakness of the lungs, take a small teaspoonful of Dr. Wilson's Pulmonary Cherry Balsam every two hours.

To Cure Coughs Take

Dr. Wilson's Pulmonary Cherry Balsam in small quantities as often as the coughing fit comes on.

To Cure Whooping Cough Take

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After garvling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

J. W. BRAYLEY,
Montreal.

NOTICE.

To Whom it may Concern.

WE, the undersigned, Health Officers of the City of Belleville under an Act respecting the Public Health, R. S. O., Cap 190, do hereby give NOTICE that all persons resident within the City of Belleville are hereby called on to cleanse their premises and to remove what is so found there, on or before the

Daily Intelligencer.

A Russian Soldier's Funeral—An Incident.

(*From the Spectator.*)

Unarmed and unattended walks the Czar,
Through Moscow's busy streets one winter's day.
The crowd uncover as his face they see,—
"God greet the Czar!" they say.

Along his path there moved a funeral,
Gray spectacle of poverty and woe,
A wretched sledge, dragged by one weary man,
Slowly across the snow.

And on the sledge, blown by the winter wind,
Lay a poor coffin, very rude and bare,
And he who drew it bent before his load,
With dull and sullen air.

The Emperor stopped and beckoned to the man:
"Who is't thou bearest to the grave?" he said.
"Only a soldier, sire!" the short reply,
"Only a soldier, dead."

"Only a soldier!" musing, said the Czar;
"Only a Russian, who was poor and brave.
Move on. I follow. Such an one goes not
Unhonored to his grave."

He bent his head, and silent raised his cap;
The Czar of all the Russias, pacing slow,
Following the coffin, as again it went,
Slowly across the snow.

The passers of the street all wondering,
Looked on that sight, then followed silently:
Peasant and prince, artisan and clerk,
All in one company.

Still, as they went, the crowd grew ever more,
Till thousands stood around the friendless grave,
Let by that princely heart, who, royal, true,
Honored the poor and brave.

AFTERGLOW.

Grandmother paces with stately tread
Forward and back through the quaint old room,
Out of the firelight, dancing and red,
Into the gathering dusk and gloom;
Forward and back, in her silken dress
With its falling ruffles of frost-like lace;
A look of the deepest tenderness
In the faded lines of her fine old face.

Warm on her breast in his red night-gown
Like a scarlet lily the baby lies,
While softly the tired lids droop down
Over the little sleepy eyes.
Grandmother sings to him sweet and low,
And memories come with the cradle-song
Of the days when she sang it long ago,
When her life was young and her heart was strong.

Grandmother's children have left her now;
The large old house is a shadowed place.
But shining out in the sunset glow
Of life, like a star, comes the baby's face
He lies where of old his father lay;
Softly she sings him the same sweet strain;
Till the tears intervening are swept away,
And the joy of life's morning is hers again.

Grandmother's gray head is bending low,
The steps of her pathway are few to go;
The baby's journey is just begun.
Yet the rosy dawn of his childish love
Brightens the evening that else were dim;
And in after years, from the home above,
The light of her blessing will rest on him.

Spoopendyke Falls and Kills himself.

"What's the matter, my dear?" cried Mrs. Spoopendyke, as Mr. Spoopendyke limped into the room and dropped into a chair. "What on earth has happened to you?"

"I fell down and killed myself," moaned Mr. Spoopendyke.

"How, where?" asked Mrs. Spoopendyke, bustling around him all nervousness. "How did you do it?"

"Slipped on the ice and broke my arm from head to foot," sighed Mr. Spoopendyke, faintly.

"Great gracious!" ejaculated Mrs. Spoopendyke, "whereabouts? Where did it happen?"

"Out doors, dod gast it! Where d'ye s'pose I did it? Think I brought the ice in the house and the laid down on it? Oh, dear! I'll never get my clothes off again. I've got to set here and die," and Mr. Spoopendyke leaned back in his chair and cloaked his eyes with resignation.

"I'll help you off with your hat and overcoat," said Mrs. Spoopendyke tenderly, "Let me help you."

"Be very careful about taking off my hat," said Mr. Spoopendyke. "Take it off easy or you'll hurt my elbow. Pull the left arm of my overcoat down so it will slip off—what ye doing? Trying to skin me? That sleeve's full of broken bones, I tell ye. Now help me into a chair. I know I must go home some time, but I never expected to die so suddenly as this," and Mr. Spoopendyke lifted his sprained arm and dropped it again to see if there was any animation left in his system.

"Can't I do something for you, dear?" asked Mrs. Spoopendyke tearfully.

"If you could sing a hymn without starting up the cats, it might make my last minutes more peaceful," replied Mr. Spoopendyke, putting his feet on a chair and preparing for dissolution.

"You'd better let me attend to your arm," recommended Mrs. Spoopendyke. "If it is badly sprained you ought to have something on it."

"Didn't I tell ye it was broken? Just got curiosity to see it haven't ye? Can't wait for the *post mortem*, can ye? Go ahead. Do what you please. In a little while I'll be beyond pain. Just take it and do what you like with it," and Mr. Spoopendyke stuck the maimed arm out straight, and waved it round like a ham.

"If you let me rotate it a little, and then bind it up with arnica, you'll be all right in an hour," cooed Mrs. Spoopendyke, affectionately.

"Rotate it then," murmured Mr. Spoopendyke. "I don't suppose it will make much difference to my estate. Take it down in the kitchen and roast it. You might—hold on, dod gast it! What d'ye think I am, a pump? Got an idea I'm a clock? Let go that arm, will ye?" and Mr. Spoopendyke pranced around the room. "Oh, you're a surgeon, you are. All you want is a buck-saw and a broken balustrade to be a medical college. Going to pull it out by the roots? S'pose it's a tooth? It isn't, it's an arm, and it's busted like a torpedo!" and Mr. Spoopendyke, who had been brandishing the injured member, began to stroke his shoulder and sympathize with himself.

"Let me bathe it in arnica," said Mrs. Spoopendyke. "That's the best thing in the world. Just let me turn up your shirt sleeve and I'll fix it in a minute."

"Very good," said Mr. Spoopendyke. "I don't suppose it will do any harm to hurry matters. Is my dress suit all brushed? Have I got a shirt with a button on the back to be buried in? Have I got a pair of socks that my immortal soul won't shine through the toes of? 'Cause if I haven't ye'd better use some of your measly arnica on my clothes. If you think I'm going to the tomb all covered with grease and my shirt flapping around on me like I was a clothes-line you're mistaken, that's all." and Mr. Spoopendyke eyed his wife gloomily, while she prepared to lave his sprained shoulder.

"Will you put me in the casket?" he moaned as she began operations.

"Yes, dear," said Mrs. Spoopendyke.

Mr. Spoopendyke regarded her with one eye, and grunted feebly.

"And you'll put on a silver plate with my name and age, and get a few flowers? You won't want a great many, I shan't miss 'em if there ain't more than six. Will you attend to it?"

"Yes," answered Mrs. Spoopendyke.

"I'll see that you have lots of flowers and a big fun—"

"I don't want any funeral; s'pose I'm being cut off in the midst of my usefulness just because funerals are cheap! Have you [illegible]"

"Certainly, dear," [illegible] Mrs. Spoopendyke, and having thoroughly bathed the arm, she bandaged it carefully.—"Don't you feel better?"

"Perhaps if it were amputated in time I might get well," rejoined Mr. Spoopendyke, hitching his arm around to see if he could find a pain anywhere.—"What kind of a cravat have I got to wear in the case of—in the event of—the worst?" And Mr. Spoopendyke approached the climax of his question as become a man who shrinks from the inevitable.

"The one you've got on will do, won't it?" enquired Mrs. Spoopendyke.

"No, it won't either. Is that all I've got? Expect I'm going to be buried among strangers in a dod-gasted neetie that won't hold together four days longer? Calculate that I'm going to the promised Land as though I was hunting for a job? Want me to prowl around among the other late lamented as though I'd busted up in business? Think I'm a measly tramp?" and Mr. Spoopendyke tore off the tie and stamped on it, and then dived into bed.

"Can't you bring up my breakfast?" demanded Mr. Spoopendyke the next morning. "My arm's so lame I can't go down stairs. Now my necktie."

"Here it is, dear," said Mrs. Spoopendyke, handing it to him. "You tore it off last night with your sprained arm," and she left for down stairs without waiting to hear his remark.—*Brooklyn Eagle.*

She Saw Him a Few Better.

The public has long conceded that the power of the hotel clerk is superior to that of President. A new rival has sprung up in the railroad ticket agent, as was demonstrated at an Iowa station a few weeks ago.

'I want a ticket to B——,' said a well known lady of the town, just before train.

'Twenty-four cents,' responded the agent, working his sausage machine. She laid down a silver quarter. Being well acquainted and a practical joker, the agent drew from his pocket a glittering pants button, passed it over with the ticket and scooped up the quarter.

'Is this a legal tender?' asked the lady quietly.

'Oh yes,' he answered with mock gravity 'They are the mainstay of the Republic.'

She pocketed it and got aboard, leaving the agent's face coruscating with smiles.

A few days after he told it to a brigade of runners buying tickets for B——, and while he was enjoying the *encore*, the lady appeared with—

'Ticket for B——, please.'

'Twenty-four cents,' with a sly wink at the runners. He laid down the ticket. She scooped it and laid down twenty-four dazzling pants buttons, exactly like the first.

'You said they were legal tender. They go a long ways in supporting the family," she chirped sweetly, as she bowed from the presence of more than presidential prerogative.

Then he set 'em up to the brigade of enlightened runners.

Humorous.

The noise of a hand-organ is a wayside din.

Lager is a regal drink. Spell it backwards, and see.

A snake for the exchange fiend—The bore constrictor.

A sporting man has named his horse 'blood,' because he is a great goer.

Sunday may be a very solemn sort of a day, but there is a sadder day comes just before it.

Politeness costs nothing, and that is one reason why so many people bestow nothing else on their chance acquaintances.

Jones says that the clouds of his early childhood were no bigger than a woman's hand, but a squall always followed them.

The United States has $58,000,000 in finger rings. Uncle Sam will never be bankrupt while he keeps that much money on hand.

Culture and slang:—'Acquires the confection' is the Boston girl's translation of 'Takes the cake.' Similarly, 'The proper caper' becomes 'The correct contortion.'

'Look here, boy,' said a stern parent. 'you are telling me a falsehood. I can read it in your face.' 'Why, pa, you know you can't road worth a cent without your spectacles.

Mother reading:—'And every morning and evening Elijah was fed by the ravens, who brought him bread to eat.' Lucky, aged four:—'And was the bread buttered, mother?'

The young lady who married Mr. Shilling, when brought before the justice on a charge of assault and battery, excused herself by saying she only bit him to see if he was good.

'I'm sick of all this fuss about Victor Hugo,' said a worthy and eminent practical man after the recent demonstration. 'Who is he, anyway? What has he done outside of his verses?'

First member (feeling a twinge of conscience):—'I say, Tom, what a long time a man does waste during the term playing poker.' Second ditto (not catching the point):—'Yes, especially while shuffling.'

Two bloods were talking about a third party. Said one of them:—'Bill McSpillkins is a plum coward. I defied him to his teeth.' 'What did you say?' 'Oh, I didn't see him, but I threw a brick at his dog.'

'I declare, John, I never saw such a man! You are always getting some new wrinkle.' And the brute calmly replied:—'Matilda, you are not, thank fortune. If you had a new wrinkle, you would have no place to put it, dear."

A little 3-year old, while her mother was trying to get her to sleep, became interested in some outside noise. She was told that it was caused by a cricket, when she sagely observed:—'Mamma, I think he ought to be oiled.'

Very innocent man, old Mildboy is. A friend found him at his desk the other day, absorbed in perplexing study. 'I am writing my will,' the old man said, 'and I want to fix it somehow so that the lawyers can get some of the property.'

They were discussing a very selfish man, and someone, undertaking his defence, remarked, 'Oh, but you know he has so many enemies.' 'He an enemy?' was the reply; 'how could he have one? He never rendered a service to anyone but himself.'

Little 3-year old busied himself on Sunday in looking at the pictures in the Bible, and the one representing the drowning of Pharaoh, his horses and chariots captivated him to such an extent that he at once began to play horse with his sister. 'Why,' said his mother, 'Johnny shouldn't play horse on Sunday!' 'Well, there's a horse in the Bible,' was the reply and that seemed to settle it.

'Yes, young man,' said the venerable druggist to his new clerk, whom he was about to initiate into the mysteries of the profession, 'after a life-time's experience I can confidently assure you that seven jars containing the seven specific drugs of our trade would suffice to set up any drug store.' 'But, sir, what do you have these other eight hundred for?' 'What for? Why, to sell!'

'Dearest Harold, I love you with all the deep devotion of my sex. Your image is ineffaceably engraven on the tablets of my memory, and in my heart the love I bear for you can never, never die. But I am extravagant, wildly ambitious to shine in society, to sit beside the jewelled queens of fashion, to dazzle all eyes with priceless gems, and so, dear, dear Harold, I must marry the plumber."

A would-be mother-in-law meets a friend, lately in the same predicament, who cries out:—'Oh, my dear, I have such a piece of news for you. My daughter was married yesterday!' 'How nice! But how did you manage it? Was your son-in-law indifferent to your lack of money, or did you make him believe you were rich?' 'Oh, no (with a gleeful chuckle). I got our family doctor to tell him I couldn't live six months.'

At a royal wedding in Germany it is customary for the mistress of ceremonies to cut up one of the bride's garters into small pieces, which are distributed to those who have taken part in the festivities of the day. As a large number are entitled to these fragments of the Order of the Garter, it is not quite clear how one garter, or even a pair of garters, could supply the demand. At Prince William's recent marriage the difficulty was met by using many yards of ribbon instead of the bride's garter.

Did you ever notice how things get in your way when you're in a hurry? A woman in a hurry [illegible] his shins, stepped on the dog, upset the table with books and a drop light on it, ran against his wife and hurt her, and got to the window just as they were stopping the horse two blocks away, round the corner.

'O, smile as thou wert wont to smile,' sang the idol of little Toddlekin's soul one evening as he sat on the lounge in the parlor. He had recently at her earnest request sworn off the use of intoxicating fluids. As she repeated the refrain he looked up calmly with a strange far-off look in his thirsty eye and reached for his hat. 'You don't know, Maria; you don't know,' said little Toddlekin, 'what a weight that song has lifted from my heart.' He smiled again that evening as he was wont, but she never again sang so touching a ballad.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents. Large bottles $1.00.

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Beaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

SUBSTITUTES!

MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL Use.

☞The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of Pain-Killer, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the Pain-Killer; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine Pain-Killer, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED,
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest.

SOLD BY ALL MEDICINE DEALERS.

NORMAN'S
ACME ELECTRIC APPLIANCES
FOR ACUTE AND CHRONIC DISEASES.
AND RESTORER OF THE NERVES & GENITAL ORGANS.
A. NORMAN, 4 QUEEN ST. EAST
TORONTO.

NORMAN'S
ACME ELECTRIC APPLIANCE.

THIS Electric Appliance is made of separate galvanic cells, connected with pliable wire, thus making a complete galvanic battery in belt form, which can be readily applied to any part of the body for curative purposes. This appliance may be used so as to direct the full force of the united cells directly through any part of the body, either lengthwise or across; or it can be used along or around any part, so that each cell may impart its amount of power consecutively. In one case it is a constant, intense current, which can be increased to a point almost unbearable; in the other it is a constant, mild current, nearly imperceptible. Medical men and electricians will at once see the immense advantage of this appliance for diseases of the Sexual Organs, Nervous Debility, and all those diseases peculiar to young men, and affections of the womb in women. It is particularly adapted to cases where the nerves are lacerated and the organs sore, contracted, weak or relaxed. A suspensory attachment is made to use with it where it is necessary. This appliance does not soil the underclothing like Pulvermacher's, and is much more powerful and beneficial, combining the best features of other belts without any of their disadvantages. It can be worn on any part of the body, either round the waist or down the back, or leg or arm, so that it can be used with advantage in all diseases where electricity is beneficial. [*See large Circulars.*] This appliance can be repaired at small cost, so that practically it is indestructible.

The price of the Acme Appliance is $10.00 to $15.00, according to power. The Suspensory Attachment $1.00 extra. Short Belts of the same construction are made, and may be had at the following prices: Back Belt $5.00 and $7.50; Body Belt $5.00 and $7.50; Leg Belt, $5.00; Arm Belt, $3.00; Head Belt $2.50; Chest Belt, $5.00 and $7.50.

These can be used in all the cases where the Belts of the same name are mentioned in large circulars.

The buckle end of the belt is a negative pole.

Consultation and large circular free.

A. NORMAN,
4 Queen Street East, Toronto.

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage, Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the later stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity,

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge, Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.
Wholesale by H. HASWELL & CO.,
Montreal, P. Q.

Cathartic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver, and all other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

Daily Intelligencer.

Defrauding the Revenue.

(*From the Ottawa Citizen.*)

There is too much reason to fear that for years past a systematic process of defrauding the revenue of the country has been carried on by means of false invoices, exporters and importers having gone to work in the most deliberate manner for the purpose of deceiving the authorities. We referred yesterday to the case of Clarke, Reeves & Co., of Philadelphia, whose conduct connected with the construction of the Chaudiere Bridge is familiar to the reader. We understand that the Customs Department has been engaged in investigating other frauds on the part of business men in our own country, with results which justify the remark made above that dishonest practices have been carried on for years. While perhaps it is impossible to detect all the frauds that the ingenuity of persons intent upon violating the law and robbing the revenue could devise, it does seem that the practices complained of are in no small degree attributable to a laxity on the part of those whose duty it was in the past to look carefully and assiduously after wrongdoers. Be that as it may, it is satisfactory to know that the Department of Customs under its present management is determined that honest and straightforward importers shall not suffer as the result of the perpetration of frauds on the part of those who do not look upon cheating the Government as an act requiring the exercise of conscientious scruples. In addition to cases already referred to in the *Citizen*, others have since come under our observation. To two of these we now make special reference. It appears that a certain firm in the hat and cap trade, doing business in London, have been in the habit of purchasing in foreign markets, and were furnished with three invoices by the exporter—one containing the true value of the goods and the other two, used for customs purposes, made out at lower prices. The firm being suspected, the Customs Inspector demanded their invoice book. Having obtained it, he took it to the Custom House and compared it with the entries made there, which comparison showed that for two years the firm had systematically entered their importations at an under-valuation of nearly $6,000. That sum the Department imposed as a fine. Now comes rather an amusing story of audacity and fraud combined. Another London firm having read in a local newspaper that the house above referred to had got into trouble with the Customs authorities, sent a representative to the office of the newspaper in question to complain that the name of the offending firm had not been made public, a circumstance which left firm No 2 and other *honest* houses open to suspicion on the part of the public. Will it be believed that at the very time the indignant firm were complaining that the name of the convicted firm had not been published, the Customs inspector had in his possession false entries made by themselves? After the Inspector had satisfied himself regarding the frauds practised, he went to the warehouse of firm No. 2 and asked them to exhibit their invoice book. An investigation proved that undervaluation to the amount of some $3,000 had been made, which sum they will be obliged to pay over to the Customs. And yet this firm was particularly anxious that firm No. 1 should be exposed, in order that honest (?) business men should not rest under an imputation! We learn that on further investigation it was discovered that one of these firms had made no fewer than 404 false entries, *every one of which must have been sworn to as correct*. For each one of these false entries the offending parties made themselves liable, under clause 76 of the Customs Act, "to a penalty not exceeding $200, or to imprisonment for a term not exceeding one year, or both, in the discretion of the court before which the conviction is had." Now, if these penalties were fully enforced, the offending parties would have to pay fines amounting to $80,800; while as to the term of imprisonment, that is a calculation which, if the reader be desirous, he can make for himself. In order that there may be no misunderstanding as to the affidavit taken by the importer we quote it in full:

> I, the undersigned , hereby solemnly declare that the within Bill of Entry contains a true account of the goods imported in the , whereof is master, (*or* by the railway), (*or, as the case may be*) from , and whereof I, (*or, as the case may be*)—am (*or* is or are) the owner (importer *or* consignee) *that the invoice here produced is the true and only invoice* I (*or, as the case may be*) have (or has) received or expect or expects to receive of the said goods, *and that the price of the goods, as mentioned in the invoice, exhibit the actual cost* (*or* the fair market value) *of the said goods at time or place of exportation*, and that no discounts for cash are made in the said invoice prices.

Subsection 2 of section 88 of the Customs Act, declares that "if any wilfully false oath be made in any case where by this Act an oath is required or authorized, the party making the same will be guilty of wilful and corrupt perjury, and liable to the punishment provided for that offence." It is surprising to us that after deliberately conspiring with the exporter to defraud the revenue men can take such an oath and expect to escape the penalty of conduct when discovered. The Customs law is intended to be a living, operative enactment, not a dead letter to be played fast and loose with as it may please business men. If its penal clauses are not to be operative, better have them expunged, for it is the veriest farce to have them in the Act if they can be set at defiance with impunity. It is the duty of the Department to see that the law as it exists is observed: therefore when men who, with a full knowledge of its provisions in their possession, go to work to beat the revenue, they have only themselves to blame if they are made to suffer the consequences of their acts.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

After trying many midicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LA[illegible], Geelong, Victoria.

Mrs. [illegible] Harrington, Kouchibouguoc, N. [illegible] says: "I have sold all Wilson's Pulmonary Cherry Balsam I had from you. Send a few dozen more in the speediest way you can. It is the best medicine we ever heard of, and its cures are wonderful."

John W, Mackay

One of the Richest Men in the World,

(*The Hour.*)

"Here," said the speaker—as he stood with a friend near a windlass by which ore was hauled out of a mine on the Comstock—"here I used to stand and turn for $3 a day. Seth Cook was my partner, and he was paid $3 a day. Seth Cook is now a large owner in the Standard mine and one of the rich men of the Pacific coast." The speaker was John W. Mackay, the bonanza king, one of the richest men in the world. He is a slender, tallish, well-knit man of 47, with a clean, well-marked face showing decision and frankness. His hair and mustache are brown, tinged with gray. His eye is keen and penetrating, his skin is ruddy, wholesome, vascular, tanned with Nevada sunshine and steamed with the Turkish bath temperature of the lower levels of the Comstock Lode.

NOTHING WASTED.

What impresses one about the man is that there is nothing wasted in him; he is all muscle and nerve, and shows temperate and careful habits. When he walks, it is with the sure, agile tread of the leopard or the lynx, like one who might spring at any moment. There is a joyous element in the man, which would be winning were its owner only a cab-driver instead of the master of millions. He speaks with a half stammer, which at first impresses one as being the slowness of a man who deliberates while he speaks. This is the bonanza king as he stands at your side looking out over the brown Nevada hills. The miners come up and speak to him and call him John, and there is between them a sense of command blended with comradeship which appears odd to metropolitan eyes.

THE DAYS OF HIS YOUTH.

Forty-seven years ago or thereabouts John W. Mackay was born in Dublin. He came to New York in his youth, and gamboled around the City Hall park in its pastoral days, and was not unhappy when a *blase* theatregoer gave him a check for the Park theatre. Among other sights he used to look with wonder upon a famous man striding up Nassau street from the old post office, with a bundle of newspapers under his arm. This was James Gordon Bennett, then a curiosity even to boys, and the work which he was doing was building up the New York *Herald*. California came in enticing golden splendor out of the sluices of Swiss Sutter's mill, and along McKay went with all the world to El Dorado. About this time there went two others on the same errand. One was an Irishman named O'Brien—"Billy" O'Brien, as all California came to call him. Billy had a partner, a strong-headed, resolute New York lad, who came from the Broderick section of New York, and had in him all that immense capacity of doing and daring which gave Broderick national fame. Billy's partner is now known as Jas. C. Flood, of the "Flood & O'Brien firm," whose phenomenal success was to make all the world wonder.

WITH THE ARGONAUTS.

Mackay went his way, as everybody did in those feverish days. He lived in mining camps; he slept on the ground; he picked, and scratched, and washed the gravel in running streams; he had his ups and downs; he saw all that was gay, all that was golden in Eldorado life, and then he came with his pick and his blanket to the Nevada mountains. In the meantime Billy O'Brien and his partner had tired of the sage bush. Giving up mining, they went to San Francisco and into business. The young Irishman made their acquaintance. He had found some prospects, and they had some money. A hard-headed, smooth, discreet, engineer became known to them, by name Fair. He was a man to be considered, and that the result was that four men—Mackay, Flood, O'Brien, and Fair—made that business compact known as the Bonanza firm, which is now a ruling power in the Pacific empire. In the firm Mackay owns two-fifths, and as the head of the Bonanza firm, is known as the Bonanza king.

THE DARK HOUR BEFORE DAWN.

His royal honors came to him in the discovery of the big bonanza in the Comstock lode, about ten years ago. Mackay himself—to show the uncertainties of mining—was about to throw up the lode in despair when his workmen struck a vein which was to yield $111,000,000. Other mines helped to swell the firm's revenues, and the bonanza firm, which, ten years ago, would have sold its Comstock lode for a million, became the masters of stupendous wealth. Mackay's income from his mines alone was put down for a length of time at $800,000 a month. But no one can tell how much is fiction and how much is truth in a career so romantic. Certain it is, however, that the bonanza firm became one of the richest in America. O'Brien died in the beginning of the good days, and left several millions. Fair is in the senate.

HIS EXECUTIVE ABILITY.

Flood governs the Nevada bank and the California business with a sure, splendid intellect that would make him a fine secretary of the treasury. Mackay lives among his mines, except when he runs over to his Parisian palace under the Arch of Triumph to see his wife and children; and, if the truth were known, to pine for the lower levels of Yellow Jack and Consolidated Virginia as he strolls about the Champs Elysees, or wanders through the arches of the Palais Royal. The possessor of so many millions, the Bonanza king lives a life of studied simplicity. He is well read, knows all about the outside world, keeps himself abreast of the current thought and literature of the time. There are few men better informed as to what the world knows than John W. Mackay. Of his generosity there are are stories that remind us of Monte Christo. Of his kindness and princely ways all who know him can speak.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause debility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

A beautiful head of hair is appreciated by everbody, and how to secure it, interests everbody. The hair and scalp must be keep free from scurf and dandruff, and not be alowed to get dry and harsh. The roots must be stimulated to healty action. Flexibility and a handsome gloss are essential. All these requisities are easily secured by the use of Ayer's Hair Vigor.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Belleville, April 7. 837d1m

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

Daily Intelligencer.

BELLEVILLE, MONDAY, APRIL 18.

Prospects in Winnipeg.

We have no doubt that not a few young men in Belleville and the surrounding country, attracted by the golden reports which come from the Western States, are seriously thinking of going westward to push their fortunes in that new Promised Land sometime this year. Before they proceed westward, however, they should consider carefully where they shall go. They should compare the reports which are received with respect to the American Western States with the more reliable reports concerning our own Northwestern Territories, and, unless they are convinced that the advantages offered the pioneer in the former territory far outweigh those offered in the latter, they should not expatriate themselves, but should, like true patriots, have an eye to the interests of their country at the same time that they are looking after their own. In these latter days of rigid utilitarianism, when the interests of one's country and one's own interests are at variance, the average man is more than likely to let the former slip and cling to the latter; but he who, being as certain to advance his own interests by a course which would benefit his country as he would by adopting a course by which his country would not be benefitted, refuses to adopt that course, is destitute of all patriotic feeling. That the lands of our own Northwest are at least equal in fertility to the lands of the Northwestern States has been repeatedly proved by the best authorities. We know, also, that the climate of the Canadian territories is in many respects superior to that of the American territories. But the idea prevails that the prospects for young men are much better in the American centres of population than they are in the settlements north of the border. In order to correct this false impression, we publish below a few extracts from a private letter from Winnipeg, received about a week ago by a young man in this city who contemplates removing to Manitoba in a week or two. It is written by a young professional man, well known in Belleville, who lived here for several months prior to his removal to Winnipeg; and, being a private letter, not intended for publication, there can be no reason for doubting the statements contained in it. The writer says:—

"As for Winnipeg, I dare say you know it is a lively and go-ahead place. I never struck any place where there is such a continuous rush of work in every way. Almost every one is intent on making capital and turning money to the best advantage. You must know, we have quite as large a city as Belleville, and the business done here in one day would be as great as that done in Belleville in four or five days. We have shops and other buildings which would do justice to a place fifty times its senior in years and population, and are surrounded by small villages just springing into existence. I have been up here just thirteen months, and during that time have seen marked improvements everywhere. Property then purchased for from $300 to $3,000 now brings $1,500 to $15,000, and still higher bids are made for the same. Hardly a day passes in which auction sales of land do not take place, and almost fabulous prices are paid for property that has not been seen by the purchaser. It is all speculation. * * * There is every prospect of getting a good berth in the capacity of book-keeper, and with a very liberal salary, from $1,000 to $1,300; but such are not always vacant. * * * As to the cost of living: Board and lodging may be obtained in boarding houses at $5 a week, and in private families at from $5 to $7. Furnished rooms with attendance may be had for $5 to $12 a month—size, comfort and situation governing. We are at present [the letter is dated April 4th] enjoying splendid weather, wheels being used entirely in the city, but the country roads still have a good deal of snow and ice. Building is going on actively at present, the prospects being very good for the coming season."

The New Canadian Counting House Accountant.

A fourth edition of the above standard work, which has, through its intrinsic merits, become the standard authority upon the subjects of which it treats, has been issued. It is unnecessary to review the work at length, as we have previously done so, but it may be stated that the new edition has had a large quantity of valuable matter added, including a set of Farm Accounts, originally prepared by Mr. J. W. Johnson (one of the joint authors) at the suggestion of the Provincial Treasurer of Ontario for the Agricultural Commission, and which is recommended by the Commissioners and printed by them, together with the author's evidence, in their report. The work has been thoroughly revised, and is handsomely printed on fine paper and strongly and neatly bound.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

Editorial Notes.

DEFRAUDING THE REVENUE.

An article from the Ottawa *Citizen* which we reproduce in another column, on the subject of defrauding the revenue shows that the heinous practice of deceiving the collectors of the revenue by importers and exporters has been more widespread and more extensive than has generally been supposed. The case is in the hands of the Customs authorities, and that the remedy which the law provides is being applied by the present head of the Department is apparent. Canadian manufacturers have been heavily handicapped by the inefficient administration of the law, but now they will have an opportunity for fair competition, and the result will be, we have no doubt, that some lines of manufacture which, owing to the satisfactory exposure of the fraudulent practices that have been so largely indulged in, could not be carried on profitably in Canada, will ere long be in successful operation. The Montreal *Gazette* in copying the article referred to says: — "The significance of this article is the fact which it brings out that the Customs department are making special and extraordinary efforts to detect fraud and to punish it. This is a fact of great importance. To the really honest importer it is a matter of the greatest importance that the Custom laws should be rigidly enforced and the duties scrupulously exacted in all cases. We congratulate the Minister of Customs upon the attention which he is bestowing upon this subject."

SHELVED AT LAST.

The Newmarket *Era*—a Reform journal says:—"Mr. Hunter, principal of the Institute for the Blind at Brantford, has been transferred from his position to that of Inspector of Insurance Companies for the Province of Ontario; and Mr. A. H. Dymond, whom Dr. Strange defeated in this Riding, has been appointed principal of the Blind Institute in Mr. Hunter's place. We are glad to note this change, as it will save the necessity of creating another commission to find employment for a needy politician. Meanwhile Mr. Dymond has a short leave of absence to travel in the States at the expense of the Province."

UNTRUE.

The *Globe* has only this to say in defence of the Ontario Government:—"The Belle-"ville INTELLIGENCER still complains of the "appointment of two Roman Catholics to "Government positions in the County of "Hastings." This is a positive untruth. What the INTELLIGENCER complains of, and what the Reformers of this County bitterly denounce is the appointment of *five* Roman Catholics to Government positions in this County, regardless of the superior claims of other members of the party, with the apparent object of buying up the Catholic vote. If the *Globe* is anxious to know how the recent appointments are received by its party here, let it send one of its staff to interview leading Reformers here—commencing with, say, Mayor Patterson and Mr. J. J. Farley.

SIR CHARLES TUPPER.

We are glad to learn from reliable sources that Sir Charles Tupper is much better and that his trip across the ocean has been of great benefit to him. This is a good opportunity for the *Globe* to vent a little more of its cold blooded ruffianism.

Ameliasburgh Correspondence.

The wind to-day drove the ice out of the bay between Rednersville and Ferry Point after nearly five months tenure.

The *Mary Ethel* is making regular trips.

Sugar-making is about over with and some of our farmers have began to sow barley where the land is dry enough.

The result of last year's trial of amber cane was such that the cane produced about one gallon of syrup to each square rod of cane, and besides this the seed ripened well, and this season a good many acres will be planted with amber cane seed, and one or two persons are talking of erecting one of Squire's cane mills here, and Broom corn seed will be planted by a number of persons in this neighborhood this spring. Most of our farmers are talking of doubling their corn and roots crops this year.

The Pircheon stallion purchased here by Messrs. Sprague, Brickman and Morden has created quite a *furore* among our horsemen. The question is are we not running too much upon light draft horses. It appears to me that we are getting a little too fast.

Mr. Francis Peck has received an order for all his "Early Ohio" potatoes from a Toronto seedsman at the rate of $2 per barrel.

Peter Dempsey has made over 700 lbs of maple sugar this spring.

Marmora Correspondence.

A lecture was delivered in Wiley's school house on the 8th inst., by Mr. H. B. Adshead, teacher. Subject: "Common things," which was listened to with great attention by a large and interested audience. The lecturer, by means of some chemical experiments, showed the component parts of different familiar substances in an able and entertaining manner.

Although the weather still keeps cool, yet the harbingers of spring keep increasing. The marmot has awoke from his long winter's sleep, butterflies, flies and spiders have also been seen. The humble but pretty little May flower timidly lifts its head, but alas! few are the Puritans who remain nowadays to greet it.

That dire malady, the ague, already stalks through the land like a dread spectre, and many are the approaching summer closes will probably be taught by this "fell tyrant to tremble." But it may be that no terrors hath he if a portion of the much advertised copperas could be got from Madoc.

Mr. J. Loucks left here lately for Cherokee City, Iowa, where two of his sons are, and where he desires to live in future, after the sale of his farm and personal property here.

Dr. Lister is said to be now having a remunerative practice in Grand Rapids, Michigan.

Large quantities of sugar have been made this season. Socials and sugar parties are popular at present, which may lay the foundation of a good business in the future for the dentist.

Mr. Ira Cooke has purchased that fine farm formerly owned by Mr. J. Connors, 1st con., lot 2, which is now in the possession of Mr. J. Cooke.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

'THEY ALL DO IT.' — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

THE CITY AND THE G. J. R.

Slight Difference of Opinion Concerning a Rail,

Which Will Probably Result in a Lawsuit.

On Saturday, as we announced in our issue of that day, Mr. Taylor, Street Surveyor, was about to proceed with the removal of a rail from the siding leading from the main line of the G. J. Railway on Pinnacle St. to Downey & Preston's elevator, but delayed proceedings on learning that Mr. Welch, the section boss, had stated that if the matter was delayed till this (Monday) morning he would himself remove six or eight of the rails, which were required on the main track. Things accordingly remained *in statu quo* till early this morning when a length of rail near the junction of the siding with the main track was surreptitiously removed by some party or parties unknown. Though the Street Surveyor declares that he has no knowledge as to the perpetrators of the act, it had the effect of making his way clear, and this morning he had city employees engaged in filling in the space between the rails with gravel and covering the track for a considerable distance, so as to effectually shut off the siding from the main line. During the prosecution of this work this morning a number of G. J. R. employees were standing about eyeing the workmen with no friendly looks, and it was feared that a collision would take place; but happily no violence of any kind occurred.

The G. J. R. authorities claim the siding as the property of the Road, and aver that the removal of the rail this morning was not only illegal but criminal. The Road Superintendent stated this morning that he had received instructions from his superiors to replace the rail, and that he would do so at all hazards this afternoon. He stated further that the section boss had no right to make the proposal on account of which the Street Surveyor had delayed taking action till this morning.

An eminent lawyer of the city informed an INTELLIGENCER reporter this morning that, in his opinion, the city had no right to grant Messrs. Downey & Preston the privilege of laying down the siding without first obtaining an Act of Parliament to that effect. He also stated that if the Grand Junction Company replaced the rail which had been removed, without obtaining the consent of the Council to do so, the Company would be legally liable.

LATER.

It has been decided not to replace the rail this afternoon. Mr. Bickford will be here to-morrow, when the policy of the Company with regard to the affair will probably be decided upon.

Death of Mr. R. J. Reekie.

The *Witness* gives the following particulars of the death of a distinguished citizen of Montreal:—"The public will learn with regret the death of Mr. Robert J. Reekie, C. E., which, according to a cable telegram, occurred in London yesterday, where the deceased gentleman had been sojourning the last two months. Mr. Reekie was born in Burnt Island, Fife, Scotland, and was in his 70th year at the time of his death. As a contractor for public works, and especially as a railway builder, Mr. Reekie was known in near every part of the world. He had been identified with railways from boyhood. Coming to Montreal thirty years ago, he soon became connected with the Grand Trunk Railway enterprise then in its inception, and when the work of building the road was begun he received a contract to construct the section from Richmond to Point Levis, and subsequently the extension to Riviere du Loup. Mr. Reekie also built the entire Northern Railway from Toronto to Collingwood, besides having partial contracts in connection with roads of lesser note in Canada. But it was in Europe that he was best known as a railway man. Long associated with the eminent railway magnates, Brassey, Peto, Betts & Company, he, in connection with them, built several of the principal railways in England, France and the Argentine Republic. During the reign of Louis Philippe, Mr. Reekie received from the Government of France, the contract to build a portion of the new fortifications around Paris which he carried out. At the time of his death he was in London completing the contract for an extensive railway in the United States. Mr. Reekie was a Governor of the General Hospital, a trustee of St. Andrew's Church and a liberal giver to every charitable institution in the city. His generosity had long become a proverb, and his death will be universally lamented.

Marine Notes.

The steamer *Armenia* was launched at Deseronto on Saturday.

Captain Crawford, of the *Norseman*, expects to make the first trip from Port Hope to Charlotte on Wednesday.

The vessel now building at Redmond's yard, Picton, has been bought by a syndicate composed of Sheriff Gillespie, Capt. Collier, and some others. She will be a propeller of twelve thousand bushels capacity, and will go into the Toledo trade. Her engines are being built in Kingston. She is all oak.

The Allan steamship *Circassian* arrived at 8:15 this morning.

The schr. *Mary Foster* left this morning for Trenton, where she will load firewood.

Capt. Howard left this morning for Collinsby, where his schooner the *Florence* wintered. She is loaded with cider for Messrs. Leavens and Co by.

INSURANCE RETURNS.—A statement prepared by the Dominion Superintendent of Insurances shows that fifty-five life and inland Marine companies have had their licenses, which expired on the 31st of March, renewed. Twelve life companies are allowed to transact business on existing policies and nine will allow the Government deposits to be used in connection with existing policies. One fire Company has reinsured its outstanding policies in another, and gone out of business, and a marine company is winding up its affairs.

CANAL TOLLS.—A Montreal Deputation consisting of Messrs. W. J. Patterson, W. C. Munderloh, W. W. Ogivie, A. Robertson, C. J. Coursol, F. A. Krupp and G. E. Jacques, jun., had an interview with Sir Leonard Tilley, Minister of Finance, and the Hon. Mr. Pope, Minister of Agriculture, on the 14th in regard to the reduction or abolition of harbor dues and tolls on Canadian canals. The matter was gone into at some length by the members of the deputation and ministers, and the representatives of the Government promised to bring the subject up before their colleagues for consideration at the earliest opportunity.

'Ma,' said an urchin with dirt-covered knuckles and a pocket full of marbles, 'is it wicked to play marbles for keeps?' 'Yes, my son, and you must never do it.' 'Is it wicked when you lose all the time?' 'Yes, just the time.' 'Is it wicked if you win all the time and play with a boy who says his mother says if she had your feet she'd never go out except after dark?' 'I—I—go and wash your hands and get ready for supper!' was the sharp reply, and the lad continued to play for keeps.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

News Condensed.

—Archibald Forbes is to lecture in Winnipeg this week.

—The Lachine Canal will be enlarged about the middle of May.

—Sir John A. McDonald was reported somewhat better on Saturday.

—The London *Economist* says the American market was depressed all the week.

—The Kingston School Board want $14,322 for Public School purposes this year.

—Large shipments of potatoes are being made to the United States from Kingston.

—News from Tripoli leaves little hope that Col. Flatters or any of his escort have escaped.

—The water in the Ottawa river is said to be lower now than in the month of July last year.

—The creditors of the Ottawa hotel-keeper who absconded are principally Montreal merchants.

—The Canada Temperance Act has been carried in King's county, N. S., by 1,400 majority.

—A glass factory with $50,000 capital is being started in New Glasgow, N. S., by Ontario capitalists.

—Dr. Wm. Russell the well-known correspondent of the *Times*, sailed for New York on the 17th inst.

—A conference of the Chiefs of Police of Ontario will be held at Toronto about the middle of next month.

—Mr. Hammond is reported to have converted two thousand people during his ten weeks' services in Toronto.

—A Cape Town despatch says the Basutos have been defeated at Leribo with heavy loss, while the colonial loss was light.

—Mr. A. H. Dymond took possession of his new position as Principal of the Brantford Blind Asylum on Wednesday last.

—A Paris despatch says; It is stated positively that Adelina Patti has signed an engagement for America, and that she will sail in October.

—The plague is making terrible ravages in the vicinity of Bagdad, those attacked dying within ten hours of being smitten with the pestilence.

—The Perth *Expositor* states that iron ore of excellent quality has been found on the farm of George Buchanan, township of South Sherbrooke, Lanark County.

—The Duke of Sutherland, the Marquis of Stafford, and a party of London and North-western directors sailed on last Saturday for New York to study the American railway system.

—Earl Beaconsfield's condition is reported as being vastly improved, and his recovery is now regarded as certain by his physicians. His main trouble now seems to be mere physical weakness.

—A special meeting of the shareholders of the Canada Central Railway will be held in Brockville on June 1st to consider the expediency of amalgamating with the Canada Pacific Railway Co.

—At the final formal opening of the Metropolitan M. E. Church in Ottawa on the 8th of May, Bishop Carman, and the Rev. Mr. Lane of Belleville, and the Rev. Mr. Stone of Hamilton will preach special sermons.

—More indications of gold have been found on the Ottawa. A party of explorers will leave the city in the course of a few days in search of minerals. The basis of operations will be the Du Lievre district, which is very rich.

—The Department of the Interior is daily receiving applications for large tracts of land in the North-West territories for colonization purposes. A company of American capitalists is said to be negotiating for the lease of 20,000 acres for grazing purposes.

—The perpetrator of one of the most barefaced will forgeries on record in the history of crime has just been arrested in Montreal. His name is Joel M. Vanarsden, a lawyer, of Philadelphia. Already $40,000 has been paid for detectives' work in this case.

—The *Mail's* Montreal correspondent telegraphs an account of an extraordinary series of embezzlements—amounting so far as known to over seven thousand dollars—by a bookkeeper of the Hudson Bay Co. in that city. The defaulter, Mr. Lewis Auldjo, whose thefts were discovered by the merest accident, has made good his escape to the other side of the line.

—The contract for the manufacture of seven new locomotives for the Intercolonial Railway has been awarded to Messrs. Fleming & Son, of St. John, whose tender was the lowest. Several American firms competed for the work. The contract for 75 coal cars was awarded to the Cobourg, Ont., Car Works, and for 50 flat and box cars to Mr. Harris, of St. John, his tender being also the lowest.

—Sugar cane succeeds in Ontario even at elevations of 1,100 feet above the sea, and there is reason to think it flourishes at even higher altitudes. To say nothing of the large return of sugar and syrup, the cane has other recommendations. The bruised cane, after the extraction of the sugar is one of the most flourishing diets for both horses and cattle, while the seed is in great demand for poultry.

—Mr. Matthew Ryan, Stipendary Magistrate at Swan River, North-West Territories, has arrived at Ottawa from Montreal, where he went to attend the funeral of his son. He reports a visible increase in the number of immigrants arriving in Manitoba this year as compared with previous years. The extension of the boundaries of Manitoba has somewhat interfered with his circuit, and it is more than probable that his headquarters will shortly be transferred to Shoal Lake.

—The St. Henri (a suburb of Montreal) Council have passed a by-law giving a bonus of $10,000 to the Merchants Manufacturing Company. The conditions of the grant are that the Company erect their factory within the limits of the town within a specified time, and employ at least 300 hands for the first three years. The By-law will be voted on by the electors on May 4th. The Company have just completed the purchase of the land on which to erect their factory, for which they paid $34,000.

$10 Reward

WILL be paid for information leading to the arrest of the person who scratched "G. W. G." on our shop window.

JUST RECEIVED.

WALLBRIDGE & CLARKE,
GROCERS AND WINE MERCHANTS.
37 & 39 Bridge Street.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

THE CHEAPEST

BLACK SILKS

IN THE CITY.

WE have just received 6 pieces more of our celebrated Black Silk at $1.29 per yard.

It is decidedly the best value of Silk in the Dominion of Canada—soft in make, so that it will not easily crease or cut. We consider it fully as good as any $2.00 silk that is sold in the city. We have also

A CHEAPER SILK!

6 pieces, which we offer at $1.03 per yard. This is what is usually sold at $1.50 per yard. These classes of Silks cannot be purchased elsewhere as cheap as we offer them.

CARPETS!

We have also received several bales of UNION CARPETS in first-class patterns at medium prices.

Our assortment of carpetings is one of the largest in the city. We have some specially low lines in Tapestries.

GLASGOW WAREHOUSE.

Local Notices.

Notices under this head cts. a line each insertion. After six insertions 5 cts. a line.

SOCIAL AND LECTURE in the City Hall on Monday evening, 18th inst., in aid of Bleecker St. Church. Refreshments (sandwiches, cakes, tea and coffee) served from 7 to 8 p.m., when the Rev. Dr. Jeffers will take the chair and Rev. Dr. Hunter, of Toronto, will deliver his celebrated lecture on "The Marriage Question." Admission to both only 25 cts. Let the Hall be filled.

Daily Intelligencer.

BELLEVILLE, MONDAY, APRIL 18.

6 O'CLOCK EDITION.

City and Vicinity.

THE police have donned their summer uniform.

THE City Council is appointed to meet this evening.

CANVAS has been bent on nearly all the vessels in port.

SPORTSMEN report wild ducks very scarce, and very difficult to get at.

THERE were "howling" gales from the west on Saturday and yesterday.

THERE are eight prisoners in the gaol, namely five men and three women.

A NEW Post office was established at Naphan, Tyendinaga, on the first of April.

THE Easter Vestry meetings will be held in the various Episcopal churches to night.

MR. G. E. CASEY, M.P., is in town on a visit to his brothers-in law, the Messrs. Biggar.

FARMERS report fall wheat as promising fairly. Rain is, however, needed to set the roots.

BASE-BALL seems to find great favor with the school boys, who practice diligently as opportunity offers.

ONE of the Peterborough excursionists said on Friday that Belleville was the dustiest place he was ever in.

BIG BAY is not yet clear of ice, although the heavy gales of the past few days have cleared a large portion of it.

OSWEGO yachtmen are about organizing a Yacht Club. Their fleet is numerous enough to warrant them in doing so.

THREE tramps and two prisoners occupied the police cells on Saturday night and sojourned there until this morning.

MR. JOHN D. EVANS, in company with the Harbor Master, was surveying and sounding the harbor near the ferry slip to-day.

THE sexton of the Bridge St. Methodist Church went to turn on the gas fuller last evening, just before the service began, and turned it out instead.

PICKEREL have commenced to run up the river to the spawning grounds. It is now time for the fishery officer to look after the poachers, who are already at work.

MESSRS. SHELBY PULLMAN & HAMILTON'S bill-posters were hard at work to-day. Already a number of dead walls are flaming with their many colored circus bills.

MR. JAS. ASHTON, of Dickson's law office, was pretty severely bruised by jumping from a G. J. R. train near the Canifton crossing on Saturday. His injuries are not serious.

WILLIAM MALLOCK, fireman on the Grand Junction passenger train, had his finger so badly jammed on Saturday morning at the Ashburnham station that it will probably have to be amputated.

THIS is the way the Toronto *World* has it: "The *Mary Ethel*, of Belleville, began her regular trips to the Thousand Isles yesterday." Where does the *World* locate the Thousand Isles?

A SOCIAL in aid of the Improvement Fund of the Bridge St. Sunday School is to be held to-morrow evening at the residence of Mr. Chas. P. Holton, Charles St. A good programme has been prepared.

MR. GAY has forwarded a poem to the Peterborough *Review*, expressing the sentiments of the people of Belleville towards the citizens of Peterborough as represented by those who came down on the excursion last Friday.

THE wisdom of the recent improvements which have been made in Bridge St. Church Sunday School has been proved by the fact that the attendance at the school during the past three months has been larger than at any time in its history.

THE scene of "A Fearful Responsibility," Mr. Howells's new serial, which will begin in Scribner for June, is laid in Venice. The story is said by the publishers to be in the author's brightest vein. Mr. Howells is working also upon a novel, which will be begun in Scribner some time next fall or winter.

SHIPMENTS.—Messrs. Downey & Preston shipped two cars of barley and five cars of potatoes to-day.

WEATHER PROBABILITIES. — Toronto, April 18.—Lakes, fresh to brisk easterly to northerly winds, fine and slightly cooler weather.

MARRIAGE QUESTION.—Don't fail to attend the social, and hear the Lecture on the above subject by Rev. Dr. Hunter in the City Hall to-night.

THE SHRIEVALTY.—The appointment of the new Sheriff has not been gazetted. Mr. John Taylor, Deputy Sheriff, continues to discharge the duties of the office.

PROVISIONS.—The price of lard and pork is booming in Chicago to-day. Speculators here wanting to be in on the rise purchased fully $100,000 worth of lard in Chicago.

REMEMBER—The lecture and tea in the City Hall this evening; the parlor concert at the residence of N. B. Falkiner, Esq., to-morrow evening; the organ recital and concert in Christ Church on Wednesday evening; the social at the residence of Chas P. Holton, Charles St., to-morrow evening; and the sacred concert in the M. E. Tabernacle on Friday evening.

REMEDY FOR HICCOUGH.—The following remedy for hiccoughs has been given us by a gentleman of this city who discovered it by accident and has repeatedly used it with success:—When a fit of hiccoughing seizes you inhale a long breath and hold it as long as possible, repeating the inhalation until the fit ceases. The gentleman referred to says that he has never had occasion to take more than three long breaths.

POST-OFFICE SAVINGS BANKS.—The recent declaration of Postmaster James in favor of the establishment in this country of Postal Savings-Banks, gives timeliness to a brief paper on "Post-Office Savings-Banks in Great Britain" in the forthcoming SCRIBNER, written at the request of the editor by an official of the English General Office, and presenting some facts and figures not heretofore published.

THE RIVALS.—The following artists compose the "Rival" Concert Company, which has been engaged by No. 1 Company of the 16th Battalion for a concert at the City Hall on Wednesday evening, the 27th inst.: Miss Minnie Emerson, prima donna soprano; Madame Emilie Schiller, flutist; Mr. H. N. Hutchins, cornetist; Mr. Henry Singerhoff, violinist; and Mr. Willie E. Louis, pianist and musical director. The plan is now open at Reynolds'.

ON the 16th inst., about one o'clock as No. 1 passenger train G. T. R. going east was approaching the Fredericksburg crossing, the locomotive struck a man who was walking on the track and killed him instantly. The engineer sounded the whistle a number of times and rang the bell, and a man working in a field a few rods off tried to warn him of his danger, but he paid no attention. The train was stopped, the body put on board and taken to Fredericksburg station. The man has the appearance of a tramp. He is unknown, and is supposed to have been almost void of hearing.

AMERICAN novel-writers seem to be unusually busy just now. Mrs. Burnett is said to be writing two new serial stories; Dr. Holland has also one in contemplation; Mr. Howells has two serials on the stocks; Mr. Boyesen is writing one or two; Mr. Cable has just finished one and is starting on another; the author of "An Earnest Trifler" has recently completed a short watering-place serial; Mrs. Schayer, the author of "Tiger-Lily," is writing her first novel; and the author of "Roxy" is at work on a new serial—though not a fictitious one. All the above-named serials have been engaged for Scribner's Monthly.

ST. THOMAS' CHURCH SERVICES.—The musical portion of the Easter services in St. Thomas' Church yesterday were probably the most impressive and memorable that have been held in Belleville. The evening service was especially fine. The solo anthem "I know that my Redeemer liveth" was worthy of praise. The solo was rendered by Mr. Wensley, who, though suffering from a severe cold, sang with good effect. The organ duet of Mr. Oldham and Mrs. Campbell added greatly to the impressiveness of the service. Mr. Oldham and the efficient choir of the church are to be congratulated on the excellent music furnished yesterday. The church was crowded at both morning and evening services.

DOES SCIENCE KNOW HOW TO BUILD A CITY?—Sometime last summer, while the health of New York was being discussed in the newspapers, the proprietors of *Scribner* raised the question. Whether Science knows how to build a perfectly drained and healthful city! The answer seems to make it appear that science does not yet know, or, if it does, its votaries certainly differ widely in the methods to be adopted. As the result of that inquiry, Col. Geo. E. Waring, Jr., has undertaken to set forth the Disease of Cities in the May *Scribner*, and the June *Scribner*, the Remedies, taking New York City as the chief example. A lively discussion may be looked for among the sanitarian scientists when Col. Waring's very radical views are explained.

OBITUARY.—Mr. Thomas Grills, who died on the 12th inst., was born in the parish of Putford, Devonshire, England, in 1795, and had consequently attained the great age of 86 years. In his early life he was, as a farm laborer, paid but from 7c to 9c a day, that being the rate of pay for farm hands in England at that time. With his wife and family of nine children he emigrated to Canada, and with them made his way to Hungerford, where his brother resided. Afterwards he came to Belleville and worked for several years for Hon. Robert Read and subsequently rented a farm on the front of Sidney. He was blind for nine years, but sight returned to him so that he could distinguish one person from another. His family are all married and settled respectably in life, and they and thirty grandchildren survive. Mr. Grills left an enviable reputation behind him. He was borne to his last resting place by the side of his wife in Belleville cemetery on the 15th inst., six of his grandsons acting as pall-bearers.

A PROSPEROUS LIFE ASSURANCE COMPANY.—The eleventh annnual meeting of the Ontario Mutual Life Assurance Company was held in the Company's office at Waterloo, Ontario, last Wednesday, and as many of our readers are interested in this Company's doings they will be glad to learn of its continued progress. The number of policies issued last year was 938 for assurances amounting to $1,188,750, which was 50 per cent. more business than was done in any former year. The yearly income increased from $62,000 to $82,000 while the assets have increased from $177,000 to $227,000. The death-rate still remaining far below the expectation which is the best proof that the risks are selected with due care. And as an evidence of the continued confidence on the part of the public this Company has since the first of January 1881, more than doubled the business of the corresponding period of last year. Mr. S. Burrows is the general agent of this Company for this District, Mr. F. M. Clarke is the local agent.

STEAMER SUNK.—The steamer *Deseronto*, which had been undergoing a course of alterations and improvements at Deseronto last winter, and which was just launched a few days ago, capsized near Huff's wharf on Saturday morning and sank in twenty feet of water. She had no passengers or freight on board, being on her trial trip.

POLICE COURT.—At the Police Court this morning Robt. Holland and Martin Smith were charged with being drunk and disorderly. Holland was discharged on consideration of his being confined over Sunday, and Smith was fined $2.00. Smith was also fined $20 for having a revolver concealed on his person.

SABBATH SCHOOL SERVICE.—The pastor of St. Andrew's Church, Rev. M. W. McLean, has inaugurated a special service in connection with the Sabbath school, which will tend greatly to increase the interest of parents in the school, and enlarge the usefulness of what has been aptly termed the "nursery of the church." Once a quarter a special sermon is to be delivered to the Sabbath School to which the parents of the children are invited. Yesterday afternoon the first of the series of sermons was delivered from the text, "The Lord is my Shepherd, I shall not want," &c., and a most interesting and instructive sermon it was—plain, and practical, suitable to the comprehension of the youngest, and from which the oldest and wisest could derive instruction and profit. The centre of the Church was occupied by the scholars and their teachers, and the side pews by parents and a number of the congregation. The service was interspersed with singing a number of familiar Sabbath School hymns, and the whole was of very great interest, and calculated to produce a good effect. This Sabbath School, by the way, has made rapid progress within the last year or two, and is in a most flourishing condition.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

EASTER SERVICES.

CHRIST CHURCH.

Opening of the New Organ.

As was anticipated a very large congregation attended Christ Church yesterday at both morning and evening services. Prof. Stanistreet, of St. Andrew's Church, presided at the organ. The instrument is not only an ornament to the church, but is all that was anticipated, and afforded great satisfaction to all who heard it. The choir was also very efficient and rendered the Easter anthems with fine effect.

Before commencing the sermon in the morning Dr. Clarke took occasion to thank the Rev. Mr. McLean for allowing his organist to come to Christ Church, also to thank Mr. Stanistreet for volunteering his services, and Miss Aggie Bell who kindly supplied Mr. Stanistreet's place.

The services were very hearty and at the close of the morning service nearly 100 remained for communion. The amount put on the offertory was $56.49.

To-night the annual vestry meeting will be held in the body of the church at 8 o'clock sharp. Dr. Clarke invited the congregation to attend and hear what report the Wardens would make. He stated that it would be honorable and encouraging to the congregation, but he would not now anticipate it.

The cost of extending the gallery and strengthening it to receive the organ was $190. It makes great improvement in the appearance of the east end of the church, as the whole of the interior is now uniform. This work was done by Mr. J. R. Dafoe.

—According to the *Jewish Chronicle*, as quoted by Mr. Laurence Oliphant in the introduction to his interesting and instructive work, "The Land of Gilead," the total number of the Hebrew race at the present time is between six and seven millions. There are of this number in Europe about 5,000,000; in Asia, over 200,000; in Africa, nearly 100,000; on the American continent, from 1,000,000 to 1,500,000. Of the European Jews more than half reside in Russia, where there are said to be 2,621,000 of them. In Austria there are 1,375,000, of whom 575,000 reside in the Polish province of Galicia. In Germany there are upwards of half a million, in Roumania 275,000 or so, while Turkey gives a refuge to over 100,000. Holland numbers 70,000; England, 50,000; France, 49,000; Italy, 15,000. In the other countries of Europe the numbers are inconsiderable, though there are a good many in Denmark, in proportion to its population. Of the Asiatic Jews, 20,000 are assigned to India, and 25,000 to Palestine.

"Hail bounteous, beauteous, gladsome Spring" - this was Mark Twain's prize poem-but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Ayers Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistent use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

MORNING DESPATCHES

EUROPEAN.

A LONDON FOG.

LONDON, April 18.—During a dense fog yesterday the steamer *Amazonian*, from Brazil, ran ashore near St David's Head. The crew were all saved, excepting one man who died of fright.

THE TUNIS DIFFICULTY.

PARIS, April 18.—22 Keroumier spies have been captured by the French. The Commander-in-Chief of the Tunisian forces has received instructions to propose to the French commanders an inquiry into the reported transgressions of the Keroumiers. After this possibly he will suggest a conference.

WINE PRODUCTION.

Consular reports show a great falling off in the production of wine in France. The deficiency is supplied by millions of gallons of wine made in Italy, Hungary, Turkey, and even in Algiers, brought into France and there mixed, doctored, watered and drugged until it assumes the appearance and taste of the product of the French vineyards.

LONDON, April 18. — Arrived out, the *Frisia*.

THE CHANGE OF CROWNS.

BOMBAY, April 17.—Haskim Kahn, the new Governor of Candahar, entered the city on Saturday. The Afghan cavalry has relieved the British cavalry outside Candahar. The Ameer's country infantry enter the 21 inst. Haseim will then take over the city from the British.

FAILURE OF COERCION.

LONDON, April 17.—The *Pall Mall Gazette*, after referring to events in Ireland during the past week, showing that agrarianism is still unchecked, and that process-servers are attacked, as previous to the enforcement of the Protection Bill, and that sheriffs and bailiffs find no stock and get no rent, says:—"Coercion has hardly done what was promised. On the contrary it is quite failing to do it."

AMERICAN.

SOUTHERN STATES LANDS INCREASING IN VALUE.

WASHINGTON, April 18.—The Agricultural Department reports that farming land in the Southern States, with the exception of Kentucky, although held far below the average in the North and West, is increasing in value much more rapidly than in other section. The average rate of increase in the cotton States is about 15 per cent. In South Carolina, whose increase exceeds that of any other portion of the Union, the value of farm lands is 18 per cent. higher than it was a year ago. This is due in a great part to the exceptionally large cotton crops of the last two years. Virginia shows an increase in value of twelve and six tenths per cent.; West Virginia lands, ten and two-tenths; Tennessee lands, twelve and three-tenths. Kentucky shows an increase of only six and six-tenths. In Delaware the increase is only three and one-eighteenth per cent. Massachusetts improved lands command a higher price than those of any other portion of the Union, the average being $91 an acre. Those in Alabama show the lowest price—$7.47 an acre.

AN ENGINEER DEAD.

ROME, N. Y., April 18.—Edward Huntington, who died yesterday, aged 64, was one of the engineers for building the Utica and Schenectady RR. and enlarging the Erie Canal.

INCREASE IN DEATH RATE.

NEW YORK, April 18.—There were 9,105 deaths in this city in the past three months, an increase of 2,303 over the corresponding period last year.

A SUNDAY OUTING.

Yesterday being the first pleasant Sunday of the season, many thousands of people went on excursions.

TAMMANY ELECTION.

It is claimed that a careful canvass shows that the opposition to John Kelly in Tammany Hall have a majority of 150 votes. The election of officers occurs to-night.

CATTLE DISEASE.

KINGSTON, N. Y., April 18.—A strange cattle disease has appeared at Dinnington County. Many cattle are dying.

WASHINGTON SPECIAL.

The Washington special to the *Herald* says: A good many of the Senators of both sides believe that the public business has been obstructed long enough.

CHILD MURDER.

FROSTBURG, M. D., April 18.—There is great excitement over the arrest of Miss Jane Schell, on a charge of strangling her two infants newly born.

CHILIAN MATTERS.

NEW YORK, April 18.—The new Chilian Minister states no terms of peace have yet been submitted by Chili to Peru. Chili in this war has spent over sixty million dollars, and lost over 7,000 men. The Minister thinks the report of the murder of Chinamen in Peru is greatly exaggerated.

A FATAL AFFRAY.

UTICA, April 18.—A. Stoddard beat his wife on Friday. James Handerpool interfered and was shot. Stoddard was arrested.

AFTERNOON DISPATCHES.

DEMONSTRATIONS IN RUSSIA.

ST. PETERSBURG, April 18.—Of 204 students charged with violating the rules of the university here 18 were sentenced to expulsion, 71 to arrest for several days, 100 reprimanded and 15 acquitted.

ATHENS, April 18.—An important demonstration against the policy of the Government has been made here under the auspices of the National League Meeting, which was quiet and orderly. The excitement is very deep and increasing, but suppressed, and exists most strongly among the better classes. The friends of the Ministry try to allay it by representing the question as not settled; but public opinion accepts the matter as beyond recall.

PRESS REGULATIONS.

PARIS, April 18.—All the journalists who are following the operations against the Keranmiers, are required to promise to submit all telegrams to the General of the corps to which they are attached. A breach of this pledge renders them liable for trial by court martial.

ORDER COUNTERMANDED.

BERLIN, April 17.—The Czar has countermanded the orders for the erection of the additional fortresses on the German frontier.

FEARS FOR SAFETY OF A STEAMER.

WASHINGTON, April 18.—The S.S. *Syantic* is at Lynnhaven bay, awaiting the arrival of the *Constitution*. The latter left League island ten days ago under sail, and nothing has been heard from her since she left the Delaware. There are some apprehensions for her safety. It is said she is imperfectly manned, and that doubts are expressed of her seaworthiness.

WASHINGTON, April 18.—Indications: lakes stationary or lower temperature, partly cloudy, or cloudy with rain.

Beaconsfield's Condition.

LONDON, April 18.—During the last 24 hours Beaconsfield was more restless. No material gain of strength

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—— —— and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

FOR FROST BITES AND CHILBLAINS. Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

A country doctor writes: " am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, where it has been taken in season.

'Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

BIRTHS.

On Monday, April 18, 1881, the wife of the Rev. R. S. Forneri, M. A., of a daughter.

On the 18th April, the wife of T. B. Wragg of a daughter.

Commercial.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

To Cure Consumption,

Bronchial affections, weakness of the lungs, take a small teaspoonful of Dr. Wilson's Pulmonary Cherry Balsam every two hours.

To Cure Coughs Take

Dr. Wilson's Pulmonary Cherry Balsam in small quantities as often as the coughing fit comes on.

To Cure Whooping Cough Take

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After gargling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

J. W. BRAYLEY,
Montreal.

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

BY MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

Tessa waited until the sound of his steps had died out in the hall, and then she sprang up and examined the windows for herself. A brief trial of her strength convinced her that she could not effect her escape in that direction. Undaunted and resolute, she turned her attention to the idea of picking the lock of one of her doors. She had heard or read that the feat was one of easy accomplishment, but she might as well have undertaken to make bricks without straw and without experience. The locks were of the kind known as mortice locks; and were set in a massive oaken door of immense thickness. Tessa had only a slender hair-pin and a pen knife with which to attack this lock, and she was not long in acknowledging her defeat in this direction also.

What was next to be done?

She paced her floor a little while in deep thought, but the enigma was beyond her power to solve.

"Escape is impossible," she said at last, sighing. "I shall have to wait until their vigilance relaxes. I might dart out of the drawing room possibly, but they would pursue me and inevitably overtake me. I cannot pretend to submit to my father's unjust will, I must wait. Surely God has not abandoned me!"

She went into her bedroom, and kneeling in the shadow of her faded bed-curtains, prayed with the simplicity and confiding faith of a little child that God would bring her safely out of her perils, and let her look upon her mother's face.

She was still kneeling there, when a faint tapping sounded on a door at the side of her bedroom. This door had been locked before Tessa came into the house, and, as Tessa had surmised, simply opened into an adjoining chamber. The suit of rooms had been formerly used as family chambers; the third room, from which the faint knocking now emanated, having served as a child's nursery.

Tessa sprang up and ran to the door, with the idea that a portion of her prayer, at least, was about to be answered.

"Who is there?" she whispered, putting her mouth to the key-hole.

"It's I—Mary Podd,' came a response, in a husky, warning whisper. "Hush, Miss, for Heving's sake. The Squire would bellow the roof off, for all the world if he knew what I was up so. I've got a key, as fits this door, and I'm a coming in."

She inserted the key cautiously in the lock, opened the door softly, and entered the dimly lighted bedroom.

Tessa nearly embraced her in her joy.

The housekeeper looked at the young prisoner curiously and demanded:

"What have they shut you up here for, Miss?"

"Because they want to force me into a marriage with Squire Todhetly," cried Tessa, "and I'd rather die than marry him."

Mrs. Podd smiled grim approval. In truth, although she was older than the Squire, and of a station far beneath his, she had dared to aspire to become mistress of the Grange. Todhetly's low tastes, his familiarities with his servants, and the fact, which Mrs. Podd well knew, that the best houses among the neighboring gentry had long since been closed to him, had given her ground upon which to build her hopes. She had therefore seen, in the lovely young guest at the Grange, a rival from the first, and she was accordingly anxious to be rid of her dangerous proximity to the Squire.

"Quite right you are, Miss," she said. "It would be like mating Beauty along of the Best, if I do say so. Why don't you ask your pa to take you away?"

"I have," said Tessa sorrowfully, "but he would not hear me. I threatened to go away alone, and he has imprisoned me here, as you see. I have friends in London who will protect me. If I could only get to Wimborn Minster—and I can walk there—I could easily find my way home. Oh, Mrs. Podd, help me to my freedom! Only assist me to escape from this house, and I will bless you all my life."

She caught the housekeeper's fat hand, and pressed it, as she continued to plead for her liberty.

Mrs. Podd's own heart echoed her prayers, and Mrs. Podd's own interests and schemes added their force to Tessa's persuasions.

"If I only dared," said the housekeeper doubtfully. "It's a dangerous thing to meddle between father and daughter. The law gives the father supreme control of a minor child—"

"I know," interposed Tessa, trembling. "But no one need suspect that you have helped me. I will bear all the blame, if I am caught or overtaken. Could we not leave the key in this side of the lock, as if I had found it in the room?"

Mrs. Podd's face brightened.

"The very idea!" she exclaimed. "And even the Squire won't know that that is not the truth of the matter. Put on your things, Miss, and I will let you out of the house."

Tessa expressed her gratitude warmly, and hastened to put on her sacque, furs, hat and vail, and to throw about her figure a long circular water-proof cloak. Then taking up her small parcel, she was ready for flight.

Mrs. Podd extinguished the light of the two candles, now burning low. The hour was twelve, and Captain Holm and Squire Todhetly, as well as the household, were asleep.

"Follow me," said the housekeeper, in a whisper. "Be as still as a mouse, Miss. Come."

She opened the door and conducted Tessa into the adjoining chamber, which was dark. They crossed the floor, and emerged into the lonely hall. Here no light, save a ghostly glimmer from without, was visible. They halted and listened, and then, hearing nothing, crept softly down the wide staircase to the lower hall. Here again they paused, Tessa's heart beating like a drum. Presently Mrs. Podd, summoning up her courage which had momentarily faltered, took Tessa's trembling hand, and led her along in the gloom past the door of the drawing and breakfast rooms, into a little side corridor, from which a door opened upon a porch that fronted the side lawn.

This door was bolted and chained. The two, working cautiously and slowly, and listening often, undid the bolts and raised the chains, turning pale in the darkness whenever a clanging of the chains was heard. But at last the door was freed, and gently opened.

Tessa was on the threshold of her freedom.

"There are no dogs loose," whispered Mrs. Podd. "You know the road to Wimborn Minster? It's a straight road nearly. Keep to the travelled road, and you're all right. It's a rought night, Miss. You are sure," added the housekeeper, with a sudden thrill of pity, "that you are doing what is best in running away?"

"Quite sure," answered Tessa cheerfully. "God bless you for your kindness to me this night, Mrs. Podd. God-bye!"

She pressed the housekeeper's fat hand fervently in her joy and gratitude, and then moved down the steps, and was lost in the darkness.

Mrs. Podd, simply closing the door, but not fastening it, stole back to her own room. And Captain Holm and Squire Todhetly slept on, unconscious that their prize and intended victim had taken her destiny into her own hand, and was flown.

TO BE CONTINUED.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful." "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING'S NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sele by JAS. CLARKE & Co

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Beaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

CHOICE GOODS

AT

HOLTON, BOTTOMS & CO.

COSTELLO'S
SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York Trimmed Millinery,

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO

MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL use.

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer**, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer**; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer**, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

LINIMENT
For Man and Beast.

The most perfect liniment ever compounded. Price 25 cts. and 50 cts.
For Sale Everywhere.

Catharctic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for **Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver,** and all other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞ Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himsel cheaply, privately and *radically*.

☞ This Lecture should be in the hands of every youth and every man in the land.

ST. LAWRENCE HALL, MONTREAL

THIS Hotel has been recently retaken by Mr. HENRY HOGAN, the former proprietor, who has handsomely and appropriately decorated and renovated the interior, and completely refitted the whole of the apartments with new furniture. The Hotel is admirably situated, being in the very heart of the city, and contiguous to the General Post Office, the principal Banks, public buildings, law courts, commercial exchanges, railway and telegraph offices. 144d1yr

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville. 316d21t-8w1t.

AFTER THE FIRE.

MR. THOMAS gives notice to his customers that he will open out in WHITTON'S old stand, Front Street, opposite the Dominion Hotel, to-morrow morning, with a complete stock of Fresh and Salt Meats,—where he hopes to see all his old friends.

Belleville, March 11, 1881.

T.S. DETLOR,
General Superintendent.
Belleville, Dec. 18th, 1880. 189d

For washing Flannel so they will not shrink, use THE **CHINESE WASHER** or Dry Soap. It possesses all the properties of the Finest Soap in a concentrated form.

It is unequalled for cleaning painted walls and wood work, Plate and Silver ware,—also for Crockery, Glass, Marble and Parian ware.

Daily Intelligencer.

Railways in Canada.

Statistics Respecting Roads in Operation and Under Construction.

A bluebook containing the railway statistics of Canada just published supplies some valuable reports of the progress of railways in the Dominion during last year and preceding years. The total railway mileage of the Dominion on the 30th June, 1880, was:

	Miles.
Railways in operation	6,891 18
Railways under construction and on which a track is laid	338 65
Railways under construction	1,077 66
Total	8,307 49

This mileage does not include 208,50 miles of the Grand Trunk and 21 miles of the South-Eastern railway situated in the United States, and erroneously included in the returns of former years.

The mileage on the 30th June, 1879, was:—In operation, 6,484.51; less erroneously included in former reports, 229.50; under construction, 1,537.83; total, 7,792.84. There was, therefore, an increase of 636.17 miles in operation, and a decrease of 121.52 miles under construction.

The length of the lines of various gauges is:—

	Gauge.	Miles.
Railways completed (track laid)	5ft. 6in.	289 04
Railways completed	4ft 8½ in.	6,254 79
Railways completed	3ft. 6in.	686 00
Total		7,229 83

The nominal capital on the 30th June, 1880, was as follows:

Ordinary share capital		$119,506,036 37
Preference share capital		70,450,140 87
Bonded debt		80,661,315 89
Total		$270,617,493 13
Amount of aid from—		
Dominion Government	$74,245,165.44	
Ontario Government	2,982,037.02	
Quebec Government	11,089,419.58	
New Brunswick Government	2,749,000.00	
Nova Scotia Government	818,750.00	
Municipalities	8,313,944.63	
Other sources	235,382.62	100,432,699.29
Total capital		$371,051,192.42

The nominal capital of the railways at the close of the year was:—

Ordinary share capital	$123,615,565 60
Preference share capital	69,059,187 87
Bonded debt	81,151,627 93
Government and Municipal loans and bonuses	88,210,520 24
Other sources	49,036 77
Total	$362,086,128 41

The capital statement for the past year does not include the sum of $10,653,736 33, the paid up capital of railways in American territory owned and operated by the Grand Trunk, and erroneously included in the returns of former years. There is, therefore, virtually the large increase of 19,618,790 34 in the capital of the railways made up thus:—

Ordinary share capital	$ 2,449,407 10
Preference share capital	1,390,953 00
Bonded debt	3,604,687 96
Government and Municipal	11,987,786 43
Other sources	185,945 85
Total	$19,618,790 35

The large increase in Government aid is chiefly due to the expenditure on the Canadian Pacific Railway and the purchase of the Riviere du Loup section of the Intercolonial as well as to other extensions and improvements on the latter road.

The capital per mile of railways completed and under construction is therefore:—

Ordinary share capital	$14,393
Preference share capital	8,463
Bonded debt	9,715
Government and Municipal aid	12,608
Other sources	28
Total	$45,207

The total train mileage for the year was 22,427,449 miles, against 20,931,689 in 1878 and 1879, an increase of 1,695,760. The number of passengers carried was 10,363,634, against 6,523,816, an increase of 3,839,818, or 61.43 per cent. The tonnage of freight handled was 9,938,858, against 8,328,810, an increase of 1,610,048, or 18.17 per cent.

All the roads show an increase in passenger traffic for the year except the Great Western, which shows 574 decrease, and the Intercolonial a decrease of 58,618. All the railways show an increase in freight traffic, the Grand Trunk having the largest. The total increase in both passenger and freight for the year was $3,611,473 50.

The average earnings per mile of all railways was $3,405, an increase over that of the preceding year of $332. The operating expenses amounted to $16,188,282.46, an increase over the previous year of $650,973.49. Thus while the earnings per mile were greater by $332 in 1879 and 1880, than in 1878 and 1879, the operating expenses were less by $60 per mile.

The net profits compare thus:—

RECEIPTS.	
1879-80	$23,561,447 60
1878-79	19,925,066 27
Increase	$ 3,636,381 33
EXPENSES.	
1879-80	$16,840,705 43
1878-79	16,183 282 46
Increase	$ 652,422 97
NET PROFIT.	
1879-80	$ 6,780,872 17
1878-79	3,736,783 81
Increase	$ 2,984,088 36

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

A stubborn cough that will not yield to ordinary remedies may be thoroughly cured by Wilson's Pulmonary Cherry Balsam, a reliable medicine in all complaints of the throat, chest and lungs.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

Political Notes.

THE BLAKE TEMPERANCE DINNER.

The organized hypocrisy under the name of Reform, are at it again. The Montreal *Witness*, undeterred by a diminishing subscription list and the protests of deluded subscribers, started the lie, in the interests of its party, in this reference to the Blake banquet: "The banquet last night proves conclusively, and we hope for all the future, that a dinner *at which wines are not provided* will be not only as successful, but more successful than one of the old kind." And this is being copied by the Grit press everywhere. *La Tribune*, in a rhapsodical eulogy of the proceedings of the Clear Grits and Rouges, in which these proceedings are described as a revivifying of the paralysed party of the body, thus refers to the dinner; "But it was in the evening, at the Windsor Hotel, AMID ABUNDANCE OF CHAMPAGNE, of light and of harmony, that these operations had their full effect, and that the paralytic was restored to life." *La Tribune's* description of the dinner is a much more accurate one than that of the *Witness*. It is ever so with the party of purity.

GRITS UNPATRIOTIC.

The Hamilton *Times* is a thoroughly representative clear Grit paper, much more so, in fact, than the leading organ of the party in Toronto. It is not surprising, therefore, that it should be taking alarm at the prospect of a rapid settlement of the Canadian Northwest. One day it had an article on "the absurdity of "expecting British financial aid to people the "Northwest," and the next it devoted itself to answering the arguments against settling in Manitoba in preference to Dakota. Happily, however, in spite of the efforts of such newspapers as the *Times*, the Canadian Northwest is rapidly growing in favor with the emigrating classes.

MORE GRIT EXODUS.

The Liberal press never tires of prating about the exodus from Canada, and in providing a text does not hesitate to magnify and distort facts of the most ordinary character. The latest paragraph which has been going the rounds reads as follows:—"It seems that out of the 790 passengers who left Milbrook the other day ostensibly for Manitoba, 500 will make their homes in Dakota. That was a Manitoba party with a vengeance!" The fact is that the whole population of Milbrook does not greatly exceed the number represented as having removed from it. The number who actually left Milbrook and the district surrounding it was just one-tenth of that stated in the Grit newspapers, and how 500 people out of a total exodus of 79 could make Dakota their destination it would puzzle a Philadelphia lawyer to discover. Those who did leave Milbrook were bound for the Souris district, where they had arranged for land for settlement and it is very questionable if a single one has changed his destination to Dakota.

The Chio Earthquake.

Still Another Estimate of the Number Killed.

Sufferings and Destitution of the Survivors.

LONDON, April 16.—The *Times'* Chio correspondent says he has now made from personal observation, and with the help of others a pretty thorough canvass of affairs throughout the Island. The total number of dead is scarcely less than 4,000, although some allowance may be due to the fact that immediately after the disaster many persons crossed to the mainland, and some of those now reported as dead may escape. The villages on the southern side of the Island are completely wrecked; hardly a single house has been left standing. The centre of the volcanic action seems to have been near Nenila, overlooking Magdala Bay on the east coast, where 300 persons perished out of a population of 1,200. At Vounos 26 perished out of a population of 600; at Philatea, 60 out of 250; at Kalamonte, 40 out of 100; at Armilea, 30 out of 300; and at Kiney, 130 out of 480. On the western side of the Island at Mesta, many houses fell but nobody was killed. At Vesha three quarters of the buildings were wrecked, but only one person killed. At Lethi 25 persons were killed out of 400. At Anabatos 12 were killed. This is the most northerly town on the west side, which suffered severely. Other towns were severely shaken, but are not in ruins. The district of Chio and the towns south-east of it suffered most of all. Kallimassia is simply a mass of ruins, and it is difficult to distinguish one house from another, yet only 448 perished out of 1,800. Neighboring villages suffered similarly. Seven of the principal ones, containing 8,570 people, are believed to have lost 1,327 dead. At least nine-tenths of the houses in the southern and south-eastern portions of the Island must be rebuilt or repaired. The population are now camping out, and there is great need of food and shelter. The northern part requires help, but to less extent. Those severely wounded are nearly all being brought to Chio by men from the ships. The work of clearing away the ruins has begun here, but the village people are still panic-stricken. Little can be done as long as the shocks continue. Of 200 persons who perished in Thelopotamos only 65 bodies have been recovered, and a similar proportion in other villages. About 50,000 people are camped in the southern half of the Island, with nothing but what they have on their backs. Progress has been made towards systematizing the relief organization. The people are further demoralized by the preaching of a foolish Greek priest, who warns them all to flee, as the Island is about to become completely swallowed up. The Archbishop and Governor are seeking to allay the excitement, but many are still migrating to the main land and adjacent islands. At Kallimassia a German doctor, who was in one of the houses at the time of the disaster, relates that the first warning that he had was seeing the dishes on the table jump up and fall on the floor. A few seconds later the walls fell outwards. From this and similar testimony it seems that in this district the first shock was nearly vertical, followed immediately by horizontal oscillations.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

After trying many medicines without benefit, your BRISTOLS' SARSAPARILLA AND PILLS have cured me of three most painful Ulcers, which I ever had suffered for about four years.—THOMAS LAYTON, Geelong, Victoria.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a laboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede those, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

Daily Intelligencer.

BELLEVILLE, TUESDAY, APRIL 19.

Those Dismissals.

The Ottawa *Citizen*, in reply to an article defending the Fraser Government of Ontario, asks the *Free Press* this pertinent question:

> "Which was the greater crime, allowing 'a most scandalous state of affairs to grow up in and about the gaol,' assuming, for the sake of argument, the connivance of Sheriff Taylor, or the action of the Government in appointing to a responsible position in the public service a man who, for robbing his clients, was removed from the list of practising lawyers by the authorities of Osgoode Hall?"

To which the *Free Press* replies:

> "The morning organ, as a logician, is not a success. Because the Ontario Government, it says, appointed Mr. Currie to the office of Registrar, scandalous abuses should be permitted in the office of a Sheriff. 'Which was the greater crime?' shrieks the *Citizen*. We do not profess to be good at conundrums, but even admitting that it was wrong to appoint Mr. Currie Registrar, what in the world has that to do with the unfitness of Mr. Taylor for Sheriff? Will the organ find an answer to this conundrum?"

We never supposed the *Free Press* man to be a "conundrumist," except when the conundrum led to the solution of how to defend its friends, but in this it has signally failed.

In the first place, there was not a tittle of evidence to show that the Sheriff had any cognizance of the existence of any irregularity among his officials. On the contrary it was shown, that so soon as he found that an irregularity did exist, he dismissed the parties who were privy to it, or had anything to do with it, thereby doing all in his power to correct the evil.

Secondly, he is as capable to-day of transacting the business of his office as he has been for a dozen years past. The best evidence of this is that his Deputy, who has done the work, has been repeatedly complimented by the Judges and Inspectors for the manner in which the affairs of the office have been managed.

These being facts, what becomes of the *Free Press* answer? Why does it not reply to the question put fairly and squarely, or acknowledge that the keeping of a client's money by a Grit lawyer is a virtue, and deserves reward from a Grit Government by an appointment to one of the most important offices in the gift of a Cabinet—that of a Registrar—where the fortunes of thousands of people are at stake? Though the Judges of the Superior Courts considered the crime of such magnitude as to justify them in striking him from the roll of Barristers and to strip him of his gown, the lawyer in question was rewarded with a lucrative office by the Ontario Government, who likewise dismissed from office a Sheriff and his Deputy because of an impropriety existing in a gaol, of which it was proved they had no knowledge whatever. The fact that the Sheriff and Deputy Sheriff were Conservatives makes the difference between their treatment and that of the disrobed Grit lawyer quite understandable.

Come now, Messrs. *Free Press* and *Globe*, tell the world frankly that you believe the cheating of a client by a Grit lawyer out of his money deserves recognition by appointment to office; and that an irregularity by a matron of a gaol, of which the Sheriff is a Conservative, should be condoned only by the dismissal of the said Sheriff, though he knew nothing of it. If this be not your political faith, why have you defended the Curry appointment and the Taylor dismissal? If a guilty man should be rewarded, why should an innocent man be punished? The answer is plain—the guilty party was a Grit, and the innocent one a Conservative. Truly the "Christian" politican has not adopted a very high standard of moral ethics by which to guide him in his political career, but then we should not condemn too harshly when we reflect that he is but the mesmerized creature of the Hon. Christopher Fraser, who now controls the destinies of Ontario, the balance of the Cabinet being but tools in his hands, and those behind him.

Let us congratulate the honest Reformers of Hastings upon the high moral standard assumed by their leaders in Ontario; and particularly do we extend our congratulations to those who have fought for "the cause" for the past thirty years, on the recognition they have received in the appointments lately made. Truly this is an age of gratitude, and the ———, well we shall not mention names, have received their reward. One thing at least they have learned, and that is, that it is not those who fight the hardest and longest in the cause of their party that receive the prizes. The new comer, with a Bishop at his back, and a Christy Fraser as his guiding star, has more chance of revelling in Grit Government sunshine and luxuriating on Grit official favors than old residents, whose sons have grown up amongst us and fought the Reform battles of yore. Is an illustration wanted? If so, we refer them to the appointment of Dr. Murphy on the one hand and to the gaoler on the other, who to this day repudiates the charge of being anything but a Conservative of a good old Tory stock. In this respect, however, it is "none of our funeral," and we therefore say "among them be it."

There is yet another feature in all this, which cannot but be gall and wormwood to those who for years have been caballing and scheming to get the Sheriff out of office—not one of them has been considered in the new appointments. They have been too confiding for recognition—they can now hang their harps upon the willow, while the faithful solemnly sing their political requiem—and we join in the prayer "*Requiescat in pace!*"

The Shrievalty Outrage.

THE OFFICIAL CORRESPONDENCE AS TO THE SHERIFF'S DISMISSAL.

The following is the correspondence which took place between ex-Sheriff Taylor and the Government with respect to his removal from office:

THE MANDATE OF THE GOVERNMENT.

TORONTO, April, 6th 1881.

SIR,—The Government have had under further consideration the evidence taken at the late inquiry into matters connected with the Gaol in your County, and have come to the conclusion that it is impossible in the public interest to confine to the subordinate officials the changes which the grave irregularities and scandals proved on such inquiry rendered it necessary to make. In view of the fact that the duties of your shrievalty for many years have not been performed by yourself, but have been almost entirely delegated by you to others, and that this state of things will necessarily continue as long as you hold the office, His Honor the Lieutenant-Governor has been advised to declare the Shrievalty vacant on and from Monday the 11th inst., of which you will please take notice and govern yourself accordingly.

It will be open to you to send in your resignation before that date, should you prefer to adopt that course.

I have the honor to be, sir,
Your obedient servant,
ARTHUR H. S. HARDY,
Secretary.

MR. TAYLOR'S REPLY.

SHERIFF'S OFFICE, BELLEVILLE, April 9th, 1881.

Hon. A. S. HARDY,
Provincial Secretary,

SIR,—I acknowledge the receipt of your letter of the 7th instant, and in answer say: I decline to send in my resignation of the Shrievalty of Hastings, and leave it to you to dismiss me from the office. I have held the office from the 21st of March, 1868, and since that time no complaint has ever been made of my conduct or management of the office. The investigation lately held under Mr. Langmuir, the Inspector, did not disclose or so much as suggest any dereliction of duty on my part. No charge was ever made, and never could be made; but Mr. Langmuir was directed to enquire into the management of the Gaol. And I greatly complain that no charge or complaint was ever made against me to which I could have made answer or directed proof.

I can thus only look upon my dismissal as arbitrary and tyrannical, entirely at variance with the understood terms upon which positions such as those from which I am dismissed are held.

I have the honor to be, Sir,
Your obedient servant,
GEO. TAYLOR,
Sheriff.

THE OUTRAGE CONSUMMATED.

PROVINCIAL SECRETARY'S OFFICE,
TORONTO, April 12th, 1881.

SIR.—Referring to a letter from this Department, dated the 7th inst., and your reply thereto, I am directed to inform you that His Honor the Lieutenant Governor has been pleased to act upon the advice mentioned in the former communication and to remove you from the Shrievalty of the County of Hastings, on and from Monday, the 11th instant.

You will therefore be good enough to give Dr. Hope, your successor, immediate possession of the office occupied by you as Sheriff, together with all the books and papers connected therewith, in order that he may at once enter upon the discharge of his duties.

I have the honor to be, Sir,
Your obedient servant,
GEO. E. LUMSDEN,
Asst. Secy.

Geo. Taylor, Esq.
Belleville.

The manly and honest tone of Mr. Taylor's reply to the unjust and tyrannical mandate of the Government will meet with the approval of every straightforward man who can appreciate that quality in another. No complaint having been made against Mr. Taylor—no intimation having been made to him that the discharge of the greater part of his duties by deputy was no longer to be permitted, he is right, beyond a shadow of doubt, in regarding his dismissal under such circumstances as arbitrary and tyrannical. Mr. Taylor was beyond doubt sacrificed to the demands of a number of office-seekers whose demands Mr. Mowat and some of his colleagues would fain have resisted. Mr. Fraser, however, who it seems is all-powerful, seconded the efforts of the hungry ones, and Mr. Taylor was ousted; but the Minister of Public Works has looked after the interests of his own particular friends so closely that those who were most active in seeking Mr. Taylor's downfall have not realized their glowing anticipations, and are now the most bitter in denouncing the appointments which have been made consequent upon the dismissal of the License Inspector, Sheriff, Deputy Sheriff, Gaoler and Turnkey, and the transference of Dr. Hope and Mr. L. A. Appleby to other offices. This is poetic justice so far as the office-seekers are concerned. It will be for the people to mete out justice to the Government of Ontario for their scandalous conduct in this connection.

The Syndicate.

The following from the Montreal *Gazette* neatly exposes the ignorance of the Grit press in its spasmodic efforts to denounce the Syndicate:—"The London *World*, referring to the fact that the rates of freight between Manitoba and Duluth have been materially reduced, and to the suggestion that this is an early indication that the business public have gained, not lost, by the transference of the Canadian Pacific Railway to the Syndicate, answers by saying that "our Canadian Pacific Syndicate "has nothing whatever to do with the "road to Duluth." If that is true, then what becomes of all the cry about monopoly, of which we heard so much last session? Clearly, if grain can be brought from Manitoba to Duluth without coming under the control of the Syndicate, the cry of monopoly is gone. As a matter of fact, however, grain from Manitoba to Duluth passes over the Syndicate's line as far south as Glyndon, and we are assured that the reduction in rates upon which the business public are congratulating themselves, has been largely on that section of the route.

FOR FROST BITES AND CHILBLAINS Bathe the parts affected freely in Perry Davis' Pain-Killer several times a day.

Death of the Earl of Beaconsfield.

A SKETCH OF HIS CAREER.

The great Earl, as to whose state of health the world has been anxiously inquiring since he was stricken down a fortnight ago by a combined attack of asthma and gout, has, whilst the bulletins gave strong hopes of his recovery, been gathered to his fathers. The announcement that Benjamin Disraeli, Earl of Beaconsfield, is no more, will create a sensation the world over, as his latest achievements, those at the Berlin Congress, had placed him amongst the very foremost of European statesmen. But it is throughout the British Empire that his loss will be the most deeply lamented, as the long-time leader of a great party and a statesman who loved his country dearly and never was untrue to or neglectful of her interests.

The career of the late Earl was of the most romantic description, as from a comparatively obscure position in life he, the descendant of a people not very well loved, rose to the highest position which a subject could occupy, distancing in the race for fame those who held very seeming advantage. Benjamin Disraeli, the eldest son of Isaac Disraeli, a well-known English author, who was descended from a Jewish family which flourished first in Spain and afterwards in Italy, was born in London in 1805. Having received a private education, which was carefully superintended by his father, he was at the age when most other young men who have risen to political distinction, are sent to a university, articled to a solicitor, with the view of qualifying him for a situation in a Government office, which had been obtained for him by his father. The drudgery of a lawyer's office being distasteful to him, he commenced his literary career by contributing to the *Representative*, a Tory newspaper, and in 1827 he published his first novel Vivian Grey, which was succeeded at intervals by other brilliant works of fiction, including The Young Duke, Contarini Fleming, The Wondrous Tale of Alroy, and Henrietta Temple. He also wrote the Rise of Iskander, A Vindication of the British Constitution, and the Revolutionary Epoch. After visiting Italy, Greece, Turkey and Syria, he returned to England to find the country involved in the Reform Bill agitation. He now sought admission to Parliament, and in 1832, under Radical auspices, contested the borough of Wycombe, but was defeated. At the general election in 1835 he met with no better success. In April of the same year he contested Taunton on Conservative principles, but was for the third time defeated. In 1837, however, he contested Maidstone in the Conservative interest with Mr. Wyndham Lewis, and was elected, taking his seat in the Commons at the age of 32. At this time Mr. Disraeli was remarkable for his dress and the foppish adornment of his person, and his maiden speech in the House, which was delivered in a high-flown style and with extravagant gestures, was laughed at. He was greatly disconcerted and stopped abruptly, with the remarkable prophesy: "I shall sit down now, but the time will come when you will hear me." In the following year Mr. Lewis died, and Mr. Disraeli married his widow. He then carefully studied the style of successful Parliamentary orators, making but few speeches. After entering Parliament he wrote several novels, namely, Coningsby, Sybil and Tancred. In 1841 he was elected for Shrewsbury, and became the organ of the dissatisfaction with which the landed aristocracy regarded Sir Robert Peel's relaxations of the system of protection to native industry. His brilliant invective and polished sarcasm won for him a foremost place amongst the Parliamentary debaters of the time. On the death of Lord George Bentinck in 1848 he succeeded to the leadership of the Protectionist party in the Commons. In 1852 he was offered and accepted the position of Chancellor of the Exchequer in the Earl of Derby's Cabinet, and although he was the first novelist who had filled the position of Finance Minister in a great commercial state, Mr. Disraeli emerged with honor and credit from the ordeal. The Government were, however, defeated on his second budget in 1853, and resigned. He resumed the leadership of the Opposition, and in 1858 he was again called upon to fill the position of Chancellor of the Exchequer in Lord Derby's second administration. In 1859 he introduced a Reform Bill, which being thrown out, the Government resigned and was succeeded by a Liberal administration, which lasted for seven years. During this period Mr. Disraeli, as leader of the Opposition, displayed talents as a debater, and a spirit and persistency under defeat, which won for him the admiration of his opponents and greatly advanced his reputation. In February, 1868, he succeeded Lord Derby as Prime Minister, but in the face of a hostile majority he resigned in the following December. On this occasion Mrs. Disraeli, in acknowledgement of her husband's services, was raised to the peerage as Viscountess Beaconsfield. This talented lady died in 1872, leaving no issue. In 1870 Mr. Disraeli published his famous novel Lothair. The battle which the Conservative leader had so long fought was now approaching a successful issue. The result of the by-elections showed that the country was with him, and when the general election of 1874 took place a large majority was recorded against Mr. Gladstone's Government, upon whose resignation Mr. Disraeli retured to power as Prime Minister. In 1877 he was created Earl of Beaconsfield and took his seat in the House of Lords, but still he remained the leading spirit in the Cabinet and successfully maintained the interests of his country during the dangerous and exciting times of the Russo-Turkish war of 1877-8. By the exercise of a bold and decided policy he restored the influence of Great Britain in the councils of the nations, and crowned his fame by securing peace with honor at the Berlin Congress. The general election of 1880 resulting adversely to the Conservative party, Earl Beaconsfield's Government resigned. Since his retirement from office the Earl had not been so active in politics as formerly, although still taking the lead on great occasions, and pursuing a highly patriotic course and one generous to his opponents. He still retained his love for literature in his old age, as his last novel, Endymion, was published a few months ago. Full of years and of honors, the departed statesman and author goes to his grave lamented by the whole population of the empire, and by many residents of foreign lands.

To the Editor of the Intelligencer.

The Globe's Sneer at Mr. Kennedy.

SIR,—I have just read in the *Globe* of the 13th April, an editorial article in which that paper takes upon itself the task of sneering at Mr. Kennedy, who was the Conservative candidate for East Northumberland at the election made necessary by the death of Mr. Keeler. That paper says:

> Only a few weeks ago they brought forward as their candidate in East Northumberland a gentleman who is a Catholic and for no other reason than that he is one. Mr. Kennedy had no personal or political claim to any such distinction as that thrust upon him when he was made the nominee of the Conservative convention. He was chosen deliberately for the purpose of winning the Roman Catholic vote of the constituency, and the INTELLIGENCER applauded the choice and worked hard to elect him. There were other Conservatives in the riding with better claims than his, and they would have been pressed had it not become apparent that in the face of the felt reaction the only hope for the party lay in choosing Mr. Kennedy or some other person of the same persuasion.

These remarks are not true, and consequently the attempt to belittle Mr. Kennedy is not deserved. What does this attack upon that gentleman mean? Simply that being a Catholic the Conservatives ought not to have chosen him as their candidate. Had the *Globe* known that gentleman, and his long political career, and been desirous of keeping truth upon its side, it would not have insulted him in the manner it has done by saying "he had no personal or political claims" upon his party. Mr. Kennedy has been a life-long Conservative, never having cast a vote except for a supporter of Sir John A. Macdonald; he has lived in this place for a long time, and by industry and honest dealing gained the good-will and respect of every one who knows him. The best evidence I can give you of this, Mr. Editor, is the large majority he received where best known. No man, except he was well known, would receive the large vote which Mr. Kennedy did in Warkworth unless he had both "personal and political claims upon his party." Another evidence of his personal worth is shown in the fact that a voter, now living 40 miles from here, but who formerly lived in Warkworth and did business there, came all the way from that city in which he now lives, to this place to vote for Mr. Kennedy, for the reason, as I heard him express it, that "he had known Mr. Kennedy for many years, and had had much dealing with him, and always found him an honest straightforward man, both in politics and in business." This is the verdict of all who knew him, and it is for these qualities and the fact that he had always been a staunch Conservative that he was relected.

Sir, I congratulate you on the stand you have taken in this matter in using your influence to elect Mr. Kennedy as a Conservative and consistent supporter of your party without allowing the question of where he goes to church to influence you in the matter. It is for the *Globe* tribe to insinuate that because a man is a Roman Catholic "he has no personal or political" claims upon the party to which he by choice belongs. I would advise Mr. Fraser, who rules and controls Mr. Mowat, to take Mr. Gordon Brown by the "scruff of the neck" and shake him into decency when commenting upon the respectability of his co-religionists. A gentle hint from the ruler of Ontario (Fraser) will soon bring the *Globe* to its senses, but while the *Globe* has got such informers and inspirers as the local member for East Northumberland, we must not expect much from it. It may do for Mr. Ferris to cajole, flatter and court the Catholic vote at the time of his elections, and then go round and traduce a better man than himself because he is a Catholic, but when he again asks for our vote it will take more than the influence of the Hon. Christopher Fraser to dragoon us into line, or I am much mistaken.

Excuse me, Mr. Editor, for occupying so much of your space, but in justice to a respectable man, I hope you will give this a place in your columns.

Yours, etc.,
A CATHOLIC.

Warkworth, April 15th, '81.

Ameliasburgh Correspondence.

AMELIASBURG, April 19th.

Times are so busy just now that there is little chance for anything new to happen. Farmers are busy now putting in the spring crop, the principal grain sown being peas and oats, some thinking there is too much frost in the ground yet to sow much wheat or barley. Fall grain has been injured much by the late frosts, many fields will have to be ploughed up. We might add here that Mr. D. Pulver of this place has the finest piece of fall wheat yet seen. This is something that Mr. Pulver should feel proud of. Being brought up in the city and choosing farming as his profession, of which he has had only a couple of years experience, should encourage him much.

Mr. W. Bristol of the firm of Bristol & Bros., Madoc, carriage builders, talks favorably of starting a shop in Rednerville. Our friends of that village will only be too glad to welcome such an energetic man in their midst.

R. W. Hermon P. L. S. is likely to go to Manitoba the coming summer on surveys.

Mr. H. Welbanks takes the lead on eggs. He shows an egg measuring around the ends 12½ inches and 8¾ inches in circumference; of course its a goose egg. The goose laid seven about the same size.

It very often pays people to name the little folks after some one. A gentlemen offered to give $100 to a parent not many miles from here if he would name his little boy after him. The boy we are informed was christened a short time ago and received the desired name, of course the gentleman will not go back on his promise now.

An amateur brass band has been organized at Roblin's Mills; we wish them success, as bands generally are short lived affairs.

Mr. John Potter made over 1,500 lbs. of maple sugar, beside molasses, this spring.

Now that both ferries have commenced running, the travel might be compared to an election, there are a number of loose fish that can be bought for a few cents and the boat that offers the lowest rates get them.

The new form of the WEEKLY INTELLIGENCER is much admired by all who have seen it about here.

Service was held in most of the churches on Friday.

The next Sabbath School Quarterly Review is to be held at Rednerville.

James McKim, a man in the employ of Mr. E. A. Brickman, smashed his thumb on Saturday night last, which caused him a good deal of pain.

Great preparations are being made in getting cheese factories in running order for the first of May. Pasture promises to be good, which will result in a good flow of milk.

SCHOOL EXAMINATIONS.

The examinations of Rednerville school was held on Wednesday of last week and was very well attended for this locality, about 12 residents of the section being present to manifest their interest in the progress made by their children during the quarter. The examination was principally conducted by W. J. Osborne, teacher of S. S. No. 6, and W. T. Kinney, teacher Union No. 11, the result being very gratifying to parents, teachers, and other visitors present, and reflecting much credit on the teacher in charge, Cyrus R. Howell, who has already become very popular with scholars and employers. Short addresses were given by R. W. Hermon, W. K. Burr and the trustees and teachers present, all speaking highly of the state of the school.

The examination of Huff's Island school passed off very satisfactorily. Miss Fox, the teacher, is deservedly popular among us.

Miss P. Way, the assistant teacher in the Union School, has just completed her term with her employers. Her services were highly appreciated.

Farming is rapidly progressing. Several farmers had from 10 to 25 bushels sowed last week, and many of them expect to get nearly through with the sowing this week.

Other odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY AND LANMAN'S FLORIDA WATER passes through no such graduations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

"THEY ALL DO IT."—Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

Wanted,

A GOOD active boy, for general work in a small family. Apply at this office.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similiar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

SPRING.

THE CHEAPEST

BLACK SILKS

IN THE CITY.

—:o:—

WE have just received 6 pieces more of our celebrated Black Silk at $1.29 per yard.

It is decidedly the best value of Silk in the Dominion of Canada—soft in make, so that it will not easily crease or cut. We consider it fully as good as any $2.00 silk that is sold in the city. We have also

A CHEAPER SILK!

6 pieces, which we offer at $1.03 per yard. This is what is usually sold at $1.50 per yard. These classes of Silks cannot be purchased elsewhere as cheap as we offer them.

CARPETS!

We have also received several bales of UNION CARPETS in first-class patterns at medium prices.

Our assortment of carpetings is one of the largest in the city. We have some specially low lines in Tapestries.

GLASGOW WAREHOUSE.

Daily Intelligencer.

BELLEVILLE, TUESDAY, APRIL 19.

5 O'CLOCK EDITION.

City and Vicinity.

THE market this morning was an unusually meagre one.

MESSRS. Shelby, Pullman & Hamilton's first advance brigade left to-day for Picton.

IN an obituary note yesterday, the name of Mr. Samuel Grills was given as Thomas Grills.

CHRIST CHURCH is the only church in Belleville which can boast of being entirely free from debt.

E. O. BICKFORD, Esq., and Hector Cameron, Q. C., arrived in town this morning from Peterborough.

THE cells were empty last night. The weather is getting warm enough for tramps to seek the shelter of barns and sheds.

MR. WM. SUTHERLAND'S drive of saw logs, consisting of 30,000 pieces on Loon Lake, commenced to move on the 16th.

MR. MOTTASHED, the popular clerk of the Dafoe House, was taken suddenly ill yesterday, but is now recovering rapidly.

As was expected, there was no meeting of the City Council last night, there being only six alderman present at the appointed hour.

THE first new potatoes of the season were brought to town to-day by Mr. George Shetler, of Shannonville, in whose cellar they grew.

THE Peterborough *Review* says: "The first view of Belleville is not at all inviting." Perhaps not; but we improve upon acquaintance.

THE Peterborough *Review* is truly unkind. It declares that the crowd who listened to the music of the two bands on the market square on Good Friday afternoon, "did not appear to be the best judges of *good* music in the world."

WILL the oldest inhabitant please rise and state whether he remembers any past April without a drop of rain up to the 19th day of the month? The poet's image "The weeping April skies," is without meaning in this year of grace.

WEATHER PROBABILITIES. — Toronto, April 19.—Lakes, moderate to fresh winds, fair weather, not much change in temperature.

POLICE COURT.—John Gulliver brought a charge of assault against Wm. Alford, Jr., this morning. The evidence was extremely contradictory and the Magistrate dismissed the case.

REMINDERS.—The parlor concert at the residence of N. B. Falkiner, Esq., this evening; the social at the residence of Chas. F. Holton, Esq., Charles St., this evening; and the organ recital in Christ Church to-morrow evening.

BAND ASSEMBLY.—The attendance at the assembly given by the band of the 15th Battalion in the Ontario Hall last evening was fairly well attended. The assembly was as enjoyable as the public assemblies given by this organization usually are, the music being excellent in quality.

PARLOR CONCERT.—At the residence of N. B. Falkner, Esq., a grand parlor concert will be held this evening in aid of the lot fund of St. John's Church. Dr. Crozier has kindly undertaken to conduct the musical performances. See programme. An assortment of useful articles of needle work will be displayed for sale. Entrance fee *ad lib*.

TEA AND LECTURE.—Last evening was a rather unfortunate evening for a lecture, on account of the many other events which were taking place. The lecture which was delivered in the City Hall by Rev. Dr. Hunter, of Toronto, in aid of Bleecker St. Church, was consequently not so well attended as it would otherwise have been. Previous to the lecture refreshments were served. The subject of the lecture was "The marriage question," upon which Dr. Hunter spoke for about an hour and a half, treating it humorously, seriously and always eloquently. The lecture was at once entertaining and profitable.

RESIGNATION AND APPOINTMENT.—We believe that Mr. T. S. Detlor, General Superintendent of the Grand Junction Railway, has resigned his position, and that Mr. N. Weatherston has been appointed in his place. Mr. Detlor has, by his uniform courtesy since he assumed the position, made himself generally popular, and the business public will regret to learn of his resignation. He is, however, to be succeeded by a capable man. Mr. Weatherston has had a long railway experience, and has filled the position of General Superintendent of the Toronto, Grey & Bruce Railway. The change takes place in the beginning of May.

JELLETT *vs* ANDERSON.—The above case, in which the privilege of the latter, Jas. Anderson, and Capt Porte, to run a steam ferry between Sidney and Ameliasburgh, has received its final settlement. The case was tried before the Chancellor here, who gave judgment in favor of the plaintiff. An appeal was, however, made against the Chancellor's decision; but the decision was to-day confirmed in full court, with costs.

A BIG SHOW COMING.—We have received a communication from Messrs. Shelby, Pullman & Hamilton, informing us that their United Mastodon Shows will visit us at an early date. Since last season, Pullman & Hamilton have associated themselves with Mr. Dan Shelby, of Buffalo, a wealthy and experienced manager, and the exhibition has been largely increased by the addition of a large Menagerie, a Museum containing many curiosities, a large and talented Circus Company, a Marine Aquarium, and many other attractions, making it the equal of the large stand best shows on the continent. It will travel entirely by rail. The Pullmans have established an excellent reputation, and their Association with Mr. Shelby insures an entertainment for the present season which will be in every way worthy of patronage. So, as the circus bills say, "Wait for the Big Show." This show will be in Belleville on Saturday the 30th of April.

THAT RAILWAY SIDING. — About 5 o'clock last evening the rail which was removed from the G. J. R. siding on South Front St. early yesterday morning was laid down again by the Road Master of the G. J. Railway, after he had held a telegraphic consultation with Mr. Fouquier, who was in Peterborough at the time. The rail having been re-laid, the track was again covered with the gravel which had been removed for that purpose—so that the Company will only have to clear away the gravel and dirt with which the track has been covered, when it is required to run a train on to the siding. Messrs. Downey & Preston, however, do not wish to become mixed up in the difficulty which now threatens between the City and Company, and they declare that they will not allow any cars to be backed on to the siding. Messrs. Bickford and Cameron are in the City and have been possessing themselves of all the facts connected with the affair. It is probable that they will not take long to arrive at a determination with regard to the course they will pursue.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

Easter Vestry Meetings.

CHRIST CHURCH.

The annual meeting was held last night at which there was a large attendance. After the reading and adoption of previous minutes the Wardens presented their annual report, which showed that since last Easter the congregation had raised the sum of $6,137.74, and that all liabilities on Christ Church and St. George's Church had been paid and that the Ladies' Aid Society had to their credit in the bank the sum of $1,225.50 towards the new organ just put in Christ Church. The report also showed that there was a balance to the credit of the Wardens, also the Treasurers of Christ Church and St. George's Sunday Schools. The election of Wardens was then proceeded with, Mr. Dunnet being the unanimous choice of the Vestry; the rector re-appointed Mr. Newbery; J. W. London being re-elected Vestry Clerk; Mr. J. Boyce and Mr. C. L. Coleman were appointed Auditors. Votes of thanks were then passed to the Wardens, organist and choir for their services during the past year, also to the Rev. Mr. McLean, Miss Aggie Bell and Prof. Stanistreet for their christian courtesy in allowing their organist to assist at the Easter services. The Vestry meeting then adjourned until Friday, the 29th inst. A meeting of the congregation held immediately after for the election of a delegate to the Synod, when Mr. Dunnet was re-elected. A vote of thanks was then tendered to Rev. Dr. Clarke, and in response he stated that Christ Church was the first church in his experience that had come down at Easter vestry with a full and clear statement showing that there was no debt resting on the church in any way.

ST. JOHN'S.

The annual meeting of the Vestry of St. Johns' Church was held last evening and was fairly attended. The Churchwardens' report was very satisfactory, a considerable balance being in hand after paying the Incumbent's salary in full to date, and all the other current expenses. They mentioned the fact of the collection on Easter Sunday being above one hundred dollars. Messrs. Brown and Geen were elected Churchwardens, Messrs. Backus, Irwin, Wallis, Black, Sharpe and Adams were appointed sidesmen, and Mr. Ford Vestry Clerk. The lay delegates to the Synod are Messrs. Irwin, Geen and Brown. Complimentary resolutions were passed to Miss Large, organist, the Sewing Society and other helpers and friends of the Church. The meeting then adjourned.

ST. THOMAS'

The Vestry meeting was held last night, there being a large attendance, Rev. J. W. Barke, Rector, in the chair.

The Rector appointed Mr. R. Croft Hulme as his Churchwarden, and the people appointed Mr. Morgan Jellett.

Mr. Stephen Gillum was reappointed Vestry Clerk.

Messrs. J. P. C. Phillips and J. S. Hough were appointed auditors.

The Churchwardens made a financial statement, which, on motion, was referred to the Auditors.

A resolution was carried adopting the envelope system of offertory.

A vote of thanks was passed to the ladies of the choir for their services.

Marine Notes.

The schooner *John Wesley*, Capt. M. Mullin, took a trip down Big Bay yesterday, and found the ice still unbroken from the vicinity of Northport eastward. How far the ice extended those on board could not see.

The schooner *John Pugsley* has gone down the bay and will make her way through as soon as the ice breaks up.

The steamer *Deseronto* has been righted, pumped out, and will be ready to go on her route as soon as the ice permits.

"Persons suffering from impure blood or whose health is giving way, either as ministers or those who study closely, will find in Fellows' Syrup of Hypophosphites the material to build them up and the tonic to keep them there." Dr. C. Clay

Hagyard's Pectoral Balsam; a few doses will relieve the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

A beautiful head of hair is appreciated by everbody, and how to secure it, interests everbody. The hair and scalp must be keep free from scurf and dandruff, and not be alowed to get dry and harsh. The roots must be stimulated to healty action. Flexibility and a handsome gloss are essential. All these requisities are easily secured by the use of Ayer's Hair Vigor.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

—The Intercolonial receipts for March, 1881 were $170,492 as against $137,111 in March, 1880.

—The Ontario Government has offered a reward of a thousand dollars for the apprehension and conviction of the murderers of J. B. Sage, of Brantford, and the County Council and the father of the deceased will increase the amount to four thousand.

—A cable telegram says: The Grand Trunk Railway Company's report has been issued. The available balance for the half-year ending December 31 was £197,895, which pays the first and second perference dividends in full, and admits of the payment of one per cent. on the third preference.

—The Greek difficulty is likely now to take a new phase, as the populace are by no means satisfied with the action of their Government and are making formidable demonstrations. The Greek Minister to Constantinople has been recalled because he did not conform to the instructions sent to him by the Government.

—The Prince and Princess of Wales opened the first national fisheries exhibition at Norwich on the 18th inst. There was a large attendance, and much interest is felt in the display, both on account of its novelty and of the effect it is believed it will have on fish culture in Great Britain. Samples of all edible and all ornamental fish were shown.

—A black list has been printed by the Department of Customs, and sent to every Collector in the Dominion. It contains the names of all United States exporters who have at any time given invoices of goods under value. Collectors are directed to pay particular attention to all entries of goods, machinery or merchandise, made by the suspected parties.

—It is now stated that the much talked of steamship line from French ports to Canada is to be subsidized by the Local Government to the extent of fifty thousand dollars, the French Government on its part having promised to pay a like sum. The precise details of the arrangements are not yet decided upon, nor is it yet stated from what port in France the vessel will sail.

—The evacuation of Candahar has commenced. From Calcutta comes the statement that the English are retaining the Pishin Valley and several posts between it and the Indian frontier. Instead of Ayoob Khan attacking Candahar, it is now stated that the Ameer will attack Herat in May, and that Ayoob has also to guard against a threatened attack from Turkestan.

—Arrangements have been made by the Scotch Lumber Company with the Canada Central and Occidental railways for the freightage of their entire cut of square timber on the Temiscaming from McKey's Station to Quebec. The distance is some 475 miles. It is estimated that there will be 1,200 carloads. The shipment of the timber will be begun the first of June. The through rate to be paid is said to be five cents per foot.

Alexander the Great

wept because there were no more worlds to conquer, but the proprietors of Dr. Pierce's Family Medicines who have found it necessary to establish a branch of the World's Dispensary at London, England, in order to supply from that great commercial emporium these remedial blessings to foreign countries, where they are largely in demand, do not share the great conqueror's sentiments, as their conquests are of disease and have made happy not only the conqueror but the people who employ them. Dr. Pierce's Golden Medical Discovery cures all blood and skin diseases, scrofulous affections, swellings and internal soreness. Dr. Pierce's Pellets are the little giant cathartic; Dr. Pierce's Favorite Prescription—woman's tonic and nervine—Dr. Pierce's Extract of Smart-Weed, the great remedy for colds and bowel affections as diarrhœa, dysentery and flux. World's Dispensary Medical association, proprietors, Buffalo and London

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist———and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

CROUP.—This disease is caused by the formation of a false membrane lining the windpipe, and obstructing the passage of the air, and is known by the formation of a shrill, croup, sounding cough and rattling in the throat. This membrane must be removed by expectoration. Take a double dose of ALLEN'S LUNG BALSAM every ten or fifteen minutes, which will reduce it, after taking a few doses. THE BALSAM WILL AND HAS SAVED THE LIVES OF THOUSANDS OF CHILDREN ATTACKED WITH CROUP, when it has been taken in season.

S. E. BURWELL, of Fingal, Ont., writes:—Last autumn I was suffering from a severe cold which settled on my lungs and produced a distressing cough, for which I gave trial to a number of Cough Medicines, but without any benifit. I at last tried one bottle of Allen's Lung Balsam, which I am happy to be able to state gave almost immediate relief, and performed a perfect cure in a short time.

MORNING DESPATCHES

EUROPEAN.

Death of Lord Beaconsfield.

The Great Statesman's Last Hours.

HE PASSES AWAY CALMLY.

LONDON, April 19, 5.20 a.m.

Lord Beaconsfield is dead. His death was much more sudden than his physicians expected. At 5 a.m. the newspapers announced that his symptoms had given ground for more grave anxieties than at any period during his illness. The bulletins of yesterday morning had stated that he had been more restless during the last twenty-four hours, and that there was no material gain in his strength. The news at ten p. m. was that he was restless during the day, and that his strength had diminished. His death took place at half-past four a. m.

LONDON, April 19, 6 a. m.

Lord Beaconsfield died very calmly. Three physicians were in attendance as well as Lord Rowton. Lord Beaconsfield was perfectly conscious to the last.

THE LATEST.

LONDON, April 19.—Beaconsfield's renewed debility began on Sunday night, when the east wind commenced to blow.

Throughout Monday the unfavorable wind continued, and constantly increasing in keenness. He died at half past four this morning, as calmly as if he was asleep. The intelligence of his death was immediately despatched to the Queen, the Prince of Wales, and other members of the royal family, and to Gladstone, who is now at Hawarden.

The news became generally known throughout the city towards 9 o'clock, when specials from the morning papers were issued.

Though not unexpected from his physicians' statement last night that the symptoms gave grounds for more anxiety than at any period during his illness. His death creates a deep sensation. It was observed at 3:15 this morning that Beaconsfield's end was near. His physicians think that only his strength of will enabled him to struggle as he did. His courage never failed him to the last.

The executors of Beaconsfield's will are Nathaniel Rothschild and Sir Philip Rose. The latter will go to Hughenden Manor with Lord Barrington to-day. No arrangements are yet made for the funeral. It is probable, unless the Queen otherwise orders, that Beaconsfield's remains will be buried at Hughenden with those of his wife.

Accounts gathered from physicians show that he retained cheerfulness. He several times during his illness stated the belief that he would die. One doctor says that drowsiness was apparent in the early part of the night and deepened towards midnight into a stupor, from which he was with difficulty roused. He then took nourishment up to half past one. About 2 he became comatose, breathing with much difficulty. Doctors Kidd and Bruce at once applied the usual restoratives, but for the first time since his illness they failed to produce an effect, and it became evident that death was imminent.

Lord Barrington, Dr. Quain, and Sir Philip Rose, were hastily summoned. Rose and Quain only arrived a few minutes before the end. Five minutes before he expired his breathing became slow and gentle, face placid. The heart's action and pulse continued a few minutes after breathing ceased to be apparent.

Friends and nurses continued round the bed a few minutes after the pulse ceased, as the end was so quiet it was difficult to realize that he was dead. All were deeply affected.

The evening edition of the *Standard* and *Globe* appeared in mourning.

The *Times* says, when he died he was quite calm and quiet, he had no pain, and was conscious to the last.

The *Pall Mall Gazette* says that his death will be an irreparable loss to his followers, it is very clear the loss may prove only less serious to the Liberals than to the Conservatives. The profound transformation which Beaconsfield wrought in the temper and spirit of English Conservatism as it was in the days of Peel, seems to us to have been among most of the serious political disasters of our era, but in such a system of government, as ours, we shall long miss the coolness, self-controlled, experienced, good sense and on some occasions magnanimity of the great party leader who has gone.

AMERICAN.

RELIEF FOR DAKOTA.

NEW YORK, April 18th.—Gov. Ordway of Dakota is here seeking relief for 7,000 sufferers by the recent floods. He says $50,000 to $100,000 is needed.

WASHINGTON SPECIALS.

Owing to the fears of trouble between the white settlers and the Indians, it is understood that 15,000 soldiers have been assigned to do duty on the Ute reservation, and every precaution will be taken by Sheridan to avoid a conflict.

ACCIDENTALLY POISONED.

EASTON, Pa., April 19.—Mrs. Beidleman's daughter drank a potion used for curing corns, and died in great agony.

SUICIDE.

DARVILLE, Va., April 19.—Benjamin Bahme, the son of a wealthy farmer, living ten miles from here and who was to have been married yesterday, but owing to his evident mental aberation his affianced insisted on the postponement of the ceremony. Bahme went in a barn and shot himself dead. It is feared the young lady will become insane.

EX-PRESIDENT HAYES.

COLUMBUS, O., April 19.—It is rumored that ex-President Hayes already begins to tire of private life and is willing again to enter politics if there should seem to be any general demand for his services. There is much dissatisfaction felt among the temperance Republicans at the failure of the Legislature to pass the temperance laws. It is stated that Hayes' recent views in regard to that question at the White House has given him an immense standing among the temperance people and would make him acceptable as a candidate for Governor, to ultra-temperance men.

NEW YORK, April 19.—Arrived, the *City of New York*, from Liverpool; the *Alsatia*, from London.

A FATAL AFFRAY.

EL PASO, Texas, April 19.—Ex-City Marshal Johnson demanded some keys from City Marshall Studemyer, firing commenced and Studemyer was wounded, and Johnson was killed.

IDENTIFIED.

LITTLE ROCK, Ark., April 19.—The identity of Jas. Currie, who was recently shot in New Mexico has been fully established. An endeavor to fasten the stigma of the murder of Actor Porter, on him, arose from the fact that the real assassins and friends were trying to create the impression that he is dead to the Hoodwink officers who are searching for him.

NEW YORK, April 12.—Arrived, the *England* from Liverpool.

WASHINGTON, April 19.—Indications: lakes stationary or higher temperature, fair weather.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

Harvell's Condition Powders.

Live stock of every description, whether hogs, poultry, sheep, horses are improved in weight, quality and health by these celebrated powders. No stable or barn yard can pay fully where they are not used. Just give them a trial. Sold everywhere.

The Sea of Oblivion

would long since have swallowed up SOZODONT in common with so many forgotten tooth pastes and dentifrics, did not the experience of a whole nation prove, that it possesses signal advantages. It thoroughly cleans the teeth, dissolving and removing their impurities it revives their fading whiteness and strengthens their relaxing hold upon their sockets; it renders colorless, ulcerated gums hard and healthy; and besides neutralizing an unsavory breath, invests it with its own fragrance.

Good health is impossible when the blood is impure, or when it is thin and cold. Under such conditions one disease after another is developed. Boils, pimples, headache, neuralgia, rheumatism, etc., are the result of impure blood, and the wisest course is to make the blood pure, rich and warm by the use of Ayer's Sarsaparilla.

A country doctor writes: " am engaged in an extensive practice of medicine, and from hearing all my patients speak so highly of Dow's Sturgeon Oil Liniment, I was led to try it, and am pleased to say I find an extremely efficient remedy in all cases requiring the use of liniment.

There is no happiness without health. If your liver is engorged, your stomach weak, your bowels disordered, your capacity for all employment is destroyed. Dr. Wilson's Anti-bilious and Preserving Pills add to the sum of happiness, curing these disorders, and what is better, by their aid, they will stay cured.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1.00.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

Commercial.

TORONTO MARKET.

NOTICE.

THERE being a vacancy in the Medical Council of Ontario, caused by the resignation of Dr. Irvine, of Wolfe Island, I hereby announce myself as a candidate for election to the Medical Council for Quinte and Cataraqui Division, and respectfully ask the support of members of the profession.

HENRY W. DAY, M.D.

Trenton, April 7, 1881. 296dtf.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health. Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wtf

To Cure Consumption,

Bronchial affections, weakness of the lungs, take a small teaspoonful of Dr. Wilson's Pulmonary Cherry Balsam every two hours.

To Cure Coughs Take

Dr. Wilson's Pulmonary Cherry Balsam in small quantities as often as the coughing fit comes on.

To Cure Whooping Cough Take

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After gargling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

J. W. BRAYLEY,

Montreal.

Notice.

AS a vacancy has occurred in the Medical Council of Ontario, in consequence of the resignation of Dr. Irvine, of Wolf Island, I beg herewith to announce myself as a candidate to fill said vacancy, and respectfully solicit the support of the profession.

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the later stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible, call personally for an examination, otherwise write for a List of Questions. Address

CHAPTER XXXVIII.

TOWARDS THE LIGHT.

The night on which ocurred Tessa's flight from the Grange was one of the coldest and wildest that even January can produce. The sky was dark almost to blackness; the wind was strong and keen and fierce, and there was frost and snow in the air. The trees bowed before the wild gale, and as Tessa flitted across the lawn toward the gates and highways, she could hear the wild shrieks and moans of the winds through the intergrown pines of the Squire's Coppice and wailing along the Ghost's Walk.

The girl had a brave heart, and she did not hesitate in the task she had undertaken. Better the cold, the storm and the darkness than the fate from which she was fleeing. Better the keen wind cutting its way to her very bones—better the frost and the snow, than the merciless persecution that was dealt to her by the man who called himself her father. Better death even, than a life as the wife of Squire Todhetly—better a grave in the snows on the wide Dorset heath, than to hers to be the hand which would stab to the heart her beautiful unknown mother.

Letting herself out at the gates, she compressed her scarlet lips, bowed her head, gathered closely about the long folds of her heavy cloak, and gallantly breasted the fierce winds with which she must fight her way step by step, inch by inch, over the many miles that lay between her and Wimborn Minister.

Walk swiftly, as if she felt herself pursued, Tessa soon left behind her the ghostly outlines of the Grange; and the estate, with its orchards and plantations and fields, were also passed, and the girl was out upon the level heaths, with only the black sky above her. The winds had full sweep now there being no trees to break their force, and Tessa was baffled at every step. More than once she was swept from her feet, and it seemed to her as if fierce hands were tugging at her garments to tear them from her.

Yet she did not falter, nor think of turning back. One mile, two miles, three miles were thus fought for and placed behind her, and ten weary miles further remained to be conquered.

A noble heart beat in the girl's bosom; a gallant and brave soul dwelt within her slender and frail figure. Not yet did she think of a return to the Grange—not yet though the wild gloom that dwelt upon the Dorset heaths seemed peopled by demons fighting for her as their prey—not yet, although the cruel sleet began to beat upon her head and face, and to pelt her as with sharp stones.

"It's a terrible night," said Tessa, winding her vail about her head in a manner to protect her face without obscuring her strained and eager vision. "An awful night! But God will protect and guide me over this almost trackless waste, and why should I fear?"

Yet if her high courage held out, her physical strength did not. Her steps began to falter, her breath to come in quick, panting gasps, and her figure to sway heavily backward and forward.

At last she stumbled against a way-side stone, and nearly fell upon it. Struggling to regain her footing, she sat down to rest. Her head sank to her knees, and a delicious restfulness crept over her. The winds assailed her with a spiteful fury; their moans sounded in her ears like the wail of lost and wondering soul; the sleet beat upon her, and the wild gloom grew yet wilder and darker. Her senses were deafened in the Pandemonium that raged around her.

"I must be moving," said Tessa, as the minutes passed. "They may discover my absence and pursue me."

She arose slowly and pressed forward wearily. Her feet seemed strangely heavy. Her breath came thickly. Her gray and star-like eyes looked up at the black sky in piteous appeal, but the little feet staggered on, scarcely heeding which way they went.

The girl sat down to rest repeatedly in the next hour, but no rest came to her in those brief periods of inaction. Her body seemed to throb at every point. Her head and heart alike ached. The sleet ceased to fall, but the sky did not lighten. And the girl, rising with a start after each brief wayside pause, wandered on and on. With the wind pressing her back, and her feet clinging as if clogged to the earth and her strength ebbing at every moment, she scarcely made two miles of progress in that hour's terrible struggle, and their remained still eight miles to go.

"I am so tired, and thirsty!" she murmured pitifully, as she went on. "I shall sink down soon. I can go but little further."

Yet she staggered on bravely. Presently the soft flakes of snow began falling swiftly and thickly, and the slight, bending figure bore a white burden upon its shoulders. Thicker and thicker fell the blinding snow and Tessa could not trace her pathway. She feared that she had strayed from the road, but she was so unutterably weary that the fear was vague and pangless. A cloud like the fall of snow seemed to settle on her senses. She was unconscious now of cold or wind or flight. She was wandering she knew not where, and kept to her feet only by a blind instinct rather than any impulse of reason.

This could not endure long, and it was ended at last by a misstep. As Tessa's foot sank into a little hollow in the road, her body fell forward on the ground. She had not strength to rise again, but lay there moaning pitifully, until a strange sense of sleepiness crept over her, and her eyes closed and her senses were benumbed. The soft snow fell upon her like a winding-sheet; the winds sweeping over the heaths seemed wailing her requiem.

Tessa, in all her young life, had never been so near to death as in that hour. She was falling into a sleep that was the vestibule of death, and already the dread angel was hovering above her when that Providence that had watched over her all her days reached out an arm to protect her still.

Suddenly, even as she was drifting into a total unconsciousness, a sound came through the storm and the night that roused her from her trance. It was near at hand—startingly near—the sound of wheels on the frozen road.

Tessa's first thought was that her father was come in pursuit of her. But greatly as she feared him and loathed the lot he had apportioned her, the love of life was strong within her. Gathering up all her waning strength that had so nearly fled from her, she struggled to her knees, and putting back her golden hair that the wind had loosened and was blowing about her small pale face like a golden mist, she stretched out her arms and called feebly for help.

TO BE CONTINUED.

Ayers Cherry Pectoral is mild and soothing in its immediate and apparent effects, and possesses far-reaching and powerful healing qualities which its persistant use will demonstrate in any case of coughs, colds, throat or lung troubles of any kind.

'Hail bounteous, beauteous, gladsome Spring" — this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the B'ood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents. Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-ly

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness, Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & CO, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & CO

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Peacousfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines. It is the only diploma ever issued for grapes and grape vines in this province."

COSTELLO'S
SPRING OPENING
Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York
Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

SUBSTITUTES!

MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL USE

☞The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED,
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

SOLD BY ALL MEDICINE DEALERS.

SPRING, 1881.
GOLDEN GRIFFIN!

128, 130, and 132 King-Street East, Toronto.
Globe, Saturday, March 12th, 1881.

We beg to notify our numerous patrons and the general public that we are now in receipt of our new Spring Stock of Fine Woollens, consisting principally of English, Irish, Scotch, and Canadian Tweeds; English, Irish and Scotch Serges; French and English Worsteds; Fine West of England Black and Blue Broadcloths; Black and Blue Venetians, Doeskins, Cassimeres, etc., making in all the largest and most Complete Stock of the kind in Canada.

Our Clothing is without doubt quite equal, if not superior, to the best New York Clothing, for Style, Fit and Material; a proof of which is the large number of First Prizes awarded us at Toronto, Hamilton, and other Exhibitions during the past season.

Gentlemen requiring Fine Clothing will find it to their advantage to inspect our Stock before purchasing. Thanking our numerous friends for their patronage in the past, and soliciting a continuance of the same in the future,

We remain, respectfully yours,
PETLEY & COMPANY,

For Sale Everywhere.

HENRY & JOHNSON'S
ARNICA AND OIL
LINIMENT
For Man and Beast.

The most perfect liniment ever compounded. Price 25 cts. and 50 cts.
For Sale Everywhere.

Ayer's

Cathartic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for **Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver,** and all other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞ Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himsel cheaply, privately and *radically*.

☞ This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO

MITCHELL'S CANADIAN

HAIR RESTORER.

TO THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all,

Yours truly,
JOHN COLEMAN,
Artist.

PRICE 50 CENTS PER BOTTLE.

JOHN BELL.
Dated 4th August, 1880. 80dt

Daily Intelligencer.

From the Northwest.

(From Our Own Correspondent.)

RAPID CITY, N. W. T.,
April 6th, 1881.

From present indications there will be a grand rush of immigration into this country this year. So far the number that have already arrived are principally those who had been out here last year and chose their homesteads and pre-emptions, and after doing some improvements upon their land returned home last fall, and now are on the way with their families to their new homes in the "great Northwest," the wonder-land of the continent. Those who have arrived this spring are certainly a superior class of settlers. They are men who have occupied high positions in their respective localities in Ontario, and who are possessed of sufficient wealth to start farming at once upon a large. A very desirous class indeed to see coming in among us with the full determination to make of themselves part and parcel of what will be in time an important British nation on this the greater half of the North American continent. This country will always be ahead of the older provinces in energy, ingenuity and business thrift. There is always a better chance for an agriculturalist or merchant to amass wealth in a prairie country than in broken districts where farms are so small and with every occupation in life filled to overflowing, as in the eastern part of Canada and the United States. With a desire of becoming independent men and holding good positions in life, the pushing, go-ahead young men of Ontario and other parts of the Dominion chose this new country as their future home, and if their expectations are not realized I shall fall very short of my guess ; if they who have voluntarily decided to adopt this new country as their field of labor do not succeed there is little use of others trying. We no not want to boast any, but we are firm in the belief that we have the choicest part of the populace of Canada here among us, and the choicest part of the Dominion to live in ; and with the free and liberal laws of moral Canada, the enjoyment of the privileges of her institutions, religious, educational, political and social, the impenetrable armor of protection thrown around the settler by the Homestead Act, this part of the Dominion shall surely flourish, blossom, bloom, and develop into the mightiest provinces of a mighty nation.

The Government of our country cannot pay too much attention to this new country. For it is here that in time the great political parties of Canada shall count upon their divisions, and it is here where the voice and ballot shall declare whether or not Conservative or Reform shall lay hold of the wheel of the ship of state to guide her o'er the stormy sea of political rivalry and party spleen. The Government of the day is acting very wisely in endeavoring to meet the wishes and administer to the wants of this young territory. Nothing have they left undone that could be performed. Even the suggestions that were thrown out by your correspondent last year while travelling over a great part of these great plains, upon the subject of bridging the creeks, canyons, and ravines, upon the prairie and hilly ranges, so as to lessen the risk of the immigrant and facilitate travelling, have been taken up by the Government and acted upon ; and since then, only last summer, expensive and substantial bridges have in many places been erected for the convenience of settlers and to the credit of the Macdonald Government. The Conservative party, by their careful and unremitting attention to this country, are sowing here the seed of what will ere long germinate and grow into a strong political plant that shall prove a power to the party and make an unassailable fortress of Tory defence Conservatives here are proud of their party and government over the manner in which they have been treated, and Reformers do not grumble a great deal. The only question upon which the people here are divided is the Syndicate bargain, and both political stripes are anxiously awaiting the result, but before another year rolls around this very question that excited so much interest, and upon which the public mind is so divided, will yet be favorably viewed and nearest the heart of every settler in the Great North-West. What we want is railroads to open up this region, and without these developing influences we can never hope to enjoy the immunities of older settled districts, and those privileges which this country is actually in need of; and in my opinion no better or stronger company than they who have the building of this great national highway at present in their hands could be found, and time will unfold to the public the usefulness of such a combination of capitalists in a country like Canada, where capital is so much needed. The actions of the Syndicate so far have been very promising. Their every movement betokens business, and ere this summer season closes, we shall see great activity on the Canada Pacific Railway in Manitoba and the West.

Newspapers are starting all over the country; wherever there is a town of promise budding forth, the fruit of its first blossom is sure to take the form of a printing office. Some time ago there was newspaper started in Rapid City, known as the Rapid City *Enterprise*, and after the publisher had received subscriptions to the extent of eight hundred, he suddenly suspended operations and left for other parts, but now we have what appears to be a thorough going fellow from the Ottawa *Citizen* starting a paper to be called the Rapid City *Standard*. The proprietor, W. Gibbons, was in the employ of the *Citizen* for over six years and now makes his *debut* as a publisher in the Great North-West, issuing a double sheet weekly, independent in politics, and devoted to agricultural and political news, and if properly conducted it will without a doubt receive a liberal patronage from the people in the Saskatchewan valley who should come to the front and assist so valuable an institution.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS

How the Desoronto Sunk.

PICTON, April 18.—The steamer *Desoronto*, owned by H. B. Rathbun & Son, of Desoronto, which ran last season between this place and Trenton, has been undergoing alterations at Desoronto during the winter. She has had 15 feet added to her length and one foot to the depth of her hold, with the intention of putting her on the same route this season. She started on her trial trip Saturday afternoon, when a very high wind was blowing. She got as far as Roblin's wharf in safety, and turned around with the intention of returning to Desoronto, but she was rolling greatly and people from the shore could see the red paint on her bottom. She finally made a lurch to one side, but righted again, and then turned completely on her side and remained so, and as the engine was not stopped she ran for about half a mile and struck a shoal near Bongard's wharf, where she righted and sank, the top of her smoke-stack just being visible above water. The life-boat on the side that struck the water filled and sank with the steamer, but the other boat, which was hanging on the davits, struck the water and floated As there were only seven persons aboard they all got in this boat and reached shore in safety. They worked at her all Saturday night and had her afloat Sunday buoyed up between two schooners, in which manner she was towed to Desoronto. The high wind Saturday and Sunday has nearly cleared the bay of ice, and steamers are expected to be running in a few days.

The New York Dairy Market.

NEW YORK, April 16.—Butter—Receipts for the week were 19,830 pks , exports were less than 1,000 pks. The state creamery make is increasing in quantity, and the heavier receipts modify the price. Quite a proportion of the first run from the creameries does not rate as "extra" in quality, and it takes a week or two in some cases to get the creameries running regularly and turning out the finest product. Private dairy new make is also irregular and sells at various prices. Fresh imitation creamery or fine factory western is a favorite with buyers at a range from 20 to 25c. Prime old dairy butter is about out of stock, and ranges from 20 to 25c. Common to fair, old dairy, is worth from 10 to 12c. A line of really prime old western factory brought 12c. ; seconds and thirds old western factory 10@11c, Sales today of 100 thirds at 10½c. We quote :

Old butter, poor to fine	12@22
New butter, finest creamery make	30@35
New butter, farm dairy, choice selections	27@30
New butter, farm dairy, good to choice	25@28
New butter, farm dairy, common	12@15

Cheese.—Receipts for the week were 6,490 boxes ; exports, 11,000. The stock of old cheese is well cleared out, and prime white September and October make are scarce. State new cheese begin to arrive and sell quick at 11@13, the latter price for well cured stock. We quote :

Factory, regular made, fine	13@13½
Factory, good to prime	–@11
Factory, fair to good	9@11
Factory, off flavor, faulty	6@ 8
Factory, half skimmed	5@ 8
Factory, full skimmed	3@ 5

Hops.

Emmet Wells' circular says : We have to report a very dull week's business in hops. Exporters have taken less than 200 bales, while brewers have held back their orders by reason of the continued bad weather, which causes small demand for beer, slow collection from their customers, the retailers, and dull trade generally. The freight engagements here for London account, and the continued purchases in the interior by one of our prominent merchants, indicates further shipments ; but it is not expected that this business will assume large enough proportions in any one week to add strength or new life to the market, or to cause any apprehension of better prices The policy of both exporters and brewers will be to avoid everything tending to lead to the least excitement, which can and will be done by buying and shipping as few hops as possible at a time, and by supplying only the present wants of brewers.

RECEIPTS, EXPORTS AND IMPORTS.

Receipts for the week, (officially reported on 'change)	760 bales.
Total receipts since September 1, 1880	82,254 bales.
Total receipts for same period in 1879	75,069 bales.
Export clearances for the week to Europe	173 bales.
Total export since September 1, 1880	38,832 bales.
Total export for same period in 1879	41,3[illegible] bales.

ENGLAND.

LONDON, April 2.—Another week's quiet trade brings us nothing fresh to report. The demand continues very retail in character ; and, if any alteration in value may be quoted, we should say slightly more favorable to buyers. If shipping goes on from your side we shall certainly look for lower rates. It is surmised that some of our would-be buyers are waiting to see this before operating—*Private letter.*

RAILROAD ENTERPRISE.—Railroad enterprise is booming in the state of New York. Last year, according to the report of the state engineer, sixty-six new corporations were organized, being the largest for any twelve months in the history of the state. The capital stock of the steam roads was, in 1880, $516,934,587 ; their total debt, $388,572,630 ; their earnings, $113,578,531, and their dividends paid $18,658,835 The capital stock of horse roads was $24,702,857 ; their debt, $18,287,346 ; their earnings, $13,449,121, and the dividends paid $2,400,623. The earnings for the year showed a large increase on the previous one, being on steam roads nearly $20,000,000.

—The reports of the seal catch are unsatisfactory. The steamer *Thetis* has arrived at St. John's with 8,000 seals, and the *Wolf* with 9,000 old seals, but the *Neptune, Proteus, Bear* and *Arctic* are all clean.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause sebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Mothers ! Mothers !! Mothers !!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth ? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

MERCHANT TAILORING

Establishment.

We beg to announce to the Gentlemen of Belleville and surrounding country that we have opened a First-class

TAILORING ESTABLISHMENT

in the spacious premises

Next the Bank of Commerce,

ASHLEY BLOCK.

Our Stock is all new comprising all the latest designs and coloring, and specially chosen for a first-class trade.

We purpose employing the best class of mechanics and have no doubt of being able to execute orders to the entire satisfaction of those who may favor us.

We would direct special attention to our selections for

Spring Suitings

—AND—

OVERCOATINGS

and solicit the favor of a call from all who wish to secure a really stylish article at a moderate figure.

SANDERS BROTHERS.

Belleville, April 7. 327d1m

NOTICE.

To Whom it may Concern.

WE, the undersigned, Health Officers of the City of Belleville, under an Act respecting the Public Health, R. S. O., Cap 190, do hereby give NOTICE that all persons resident within the City of Belleville are hereby called on to cleanse their premises and to remove what is so found there, on or before the

First Day of May, 1881.

The undersigned have secured grounds for the deposit of all night soil, and other accumulations injurious to health.

The person appointed by the Board of Health as Scavenger is William Hale, who, with the undersigned will give all information.

Any person who wilfully disobeys or resists any lawful order of the Health Officers, or wilfully obstructs any person acting under the authority or employed in the execution of this Act, will be dealt with as the law directs.

Arrive in Belleville	10.00 a. m.
Leave Belleville	3:30 p. m.
Arrive in Madoc	5:30 p. m.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, APRIL 20.

The Globe's Misrepresentation.

The Toronto *Globe* "still complains" of our remarks upon the conduct of the Fraser Government in dismissing the Sheriff and his deputy in this county, to make a place for some of the party who have been longing for Government positions for years; and as usual misstates our position in every particular. It does seem strange that a journal of the pretensions of the Toronto organ of one wing of the Grit party, cannot even by chance write the truth or quote correctly when commenting upon the writings of any of its contemporaries. It is not true that the INTELLIGENCER "complained of the appointment of "two Roman Catholics to Government "positions in the County of Hastings." What we complain of is that a Government should so prostitute its powers, by allowing one of its members to make appointments from any particular class of people, simply and solely because they claim a particular nationality and profess a particular religion. The *Globe* is not so stupid as not to be able to draw the distinction, but hoping to divert the attention of its readers from the merits of the point under discussion, it falsified facts, and, as is its wont, tries to make a little cheap capital out of its of own fabrications. We repeat that the dismissals were unjust, unnecessary in the public interest, and in short infamous, having been done for no other purpose than to provide places for a few hungry hangers on—that the appointment of Dr. Murphy was for no other reason than the fact of his religion and nationality, not having any other claims; while on the other hand there were those in our midst whose whole lives and those of their fathers before them have been devoted to the service of the Grit party, whose claims were paramount, if merit or party fidelity had been considered in the selection of a medical adviser to the Deaf and Dumb. As to the Deputy Sheriff, Mr. Patrick O'Brien, we shall say nothing further than to express the opinion that not a man in the County of Hastings who has any regard for the truth will say he is fit for the position, or possesses qualifications for it, other than those which induced Mr. Fraser to appoint Dr. Murphy as Physician to the Institution for the Deaf and Dumb. So far as regards Dr. Hope, we make no objection. He was entitled to any position in the gift of his party, having for the past forty years never failed when the party required his aid. True, he has been at loggerheads with the less honest of those by whom he was surrounded; for when they would trim, he would hold fast to the skirts of the late Grit Senator, Hon. George Brown. But what has that consistent journal to say about the appointment of a man to the Shrievalty of a large county like Hastings who has passed his three score years! A few days ago, the *Globe* denounced the Dominion Government for appointing the Hon. James Patton to the position of Collector of Customs at Toronto, not on account of his want of ability, but principally on account of his age, though he has some years to live yet before he is as old as the new Sheriff of the County of Hastings now is. No doubt we shall have another exhibition of consistency, by the declaration that it is a crime in the Dominion Government to appoint a gentleman to office who is between fifty and sixty, and a virtue in Mr. Fraser to appoint a man to a position that requires more physical exercise, who is over sixty.

In the same issue of the *Globe* which contains the defence of the dismissal of the Sheriff and his Deputy, we find an article condemning Mr. Langevin for having dispensed with the services of an engineer who was not wanted in his department, declaring that this officer was dismissed for political reasons, though but a short time since the Grit press declared he was, and we think they were correct in this respect, a Conservative.

The *Globe* says we have not answered its *tu quoque* as to the choice of Mr. Kennedy as the Conservative candidate for East Northumberland. Any one who has read our remarks knows that we have repudiated the charge brought by the *Globe* over and over again, by declaring that Mr. Kennedy was selected because he was and had been all his life a Conservative, and because he had strong claims upon the party. That question is opportunely dealt with by our correspondent "Warkworth," whose letter was published yesterday.

The *Globe* has no further defence than the old stale charge that the Dominion Government did not "act fairly by the Reform members of the civil service since 1878." Well, suppose it did not, and was wrong, does that justify the Fraser-Mowat combination in dismissing Conservatives from office, simply because they are Conservatives! We challenge the *Globe* to point out a single man who has been dismissed by the Dominion Government for any other than good cause, and that cause some malfeasance of office, or for not being required in the public service. The Inspectors of Weights and Measures were, by a change in the law and a redistribution of the districts, not required, therefore a large number could not be retained, as we have already shown, unless, indeed, the Government continued to pay them for doing nothing, as the Mackenzie Government had done; thereby creating a wasteful expenditure of money which could not be justified. What did the Grit Government of Ontario do, in relation to the Issuers of Marriage Licences? It passed a law taking to itself these appointments, and at once dropped almost every Conservative who had been appointed by previous Governments. It is now pursuing a similar course as to Clerks and Bailiffs of Division Courts. And yet this Government and its organs have the consummate impudence to talk about dismissals from the public service. Not satisfied with this, it has now usurped the power of appointing License Inspectors, License Commissioners, Deputy Sheriffs, Gaolers and Turnkeys, and directing how County money shall be paid for advertising, and in what journals litigants shall spend their own means in advertising sales of lands. We shall not be surprised to hear, ere long, of their so changing the municipal law as to give them the power of appointing street surveyors and chimney sweeps in the various towns and cities of the Province, and the *Globe* defending such action as right and proper. Were a Conservative Government to attempt to concentrate so much power in its hands, we should have some of these Reform journals *par excellence* threatening rebellion.

More Grit Flapdoodle.

The wonderful power of invention displayed by the Grit press surpasses all ordinary comprehension. Scarcely a day passes but the world, that is the small portion of it into which Opposition journals are sent, is startled with some new discovery of maladministration of public affairs by members of the present Government: but which alleged discoveries, unfortunately for the inventors, when analyzed, are shown to be utterly useless for the purpose for which they were intended, namely, creating discontent among merchants and business men generally. The last display of either gross ignorance or wilful perversion of the truth, we have in the Ottawa *Free Press* of the 19th inst. It is as follows:

> "The Government has, we learn, imposed a tax of $40 on every bonded warehouse in the Dominion. This gives great offence to merchants, as no such imposition was ever mooted in Parliament, and was *never known* till the late order was issued."

What could be the object of such a paragraph it is difficult to conceive, unless to try and make people believe that the present Government is doing all in its power to harass business men, and put them to expense and trouble. What will the reader say when we inform him that the system of bonded warehouses has been allowed for thirty-one years, having been in operation since 1850? On reference to the Customs Act of 1877, consolidated and crystallized into an Act of Parliament by Mr. Burpee, the late Minister of Customs, it will be seen that there are a number of clauses which relate to the establishment of bonded warehouses, and that sub-section 7, of sec. 127, gives power as follows:

> "For authorizing the appointment of warehouses, and regulating the security which shall be taken from warehouse keepers, the forms and conditions subject to which goods are to be warehoused, the mode of keeping the goods in warehouse, the allowance for accidental deficiency, *and the amount of warehouse fees.*"

This, however, was not a new clause; for we find, on reference to the Orders in Council which have been published, that of the 14th of June, 1875, has the following, among other provisions, relating to Bonded Warehouses:—

> The proprietor of every warehouse of class 2 and class 4 *shall pay* for the *privileges* granted him in the *use* of *such* warehouse *the sum of forty dollars per annum* in half yearly payments *in advance* to the Collector of Customs. The proprietor of every warehouse of class 3 and class 5 shall pay in like manner not less than *forty dollars* nor more than *one hundred dollars* per annum, according to the capacity of the building and the nature and amount of business, the exact sum to be determined by the Minister of Customs at the time of accepting the proprietor's application.

Yet, in the face of the fact that bonded warehouses have been in existence since 1850, for we find in the same Order in Council from which the above is taken that "sections 12, 13, 14, and 15 of Regulations "dated 30th March, 1850, and the Order "in Council dated 25th June, 1869, relat-"ing to *payments* for the privilege of using "stores as bonding warehouses in certain "ports," are repealed and a fee of $40 to $100 established, for the privilege of having such a warehouse fixed by Mr. Burpee in 1875, the former Government organ and now mouthpiece of the Opposition gravely telling its readers that the Government "has imposed a tax of $40 on every bonded warehouse," and that such tax is "giving great offence to merchants, as no such imposition was ever mooted in Parliament."

Let us add, we are not surprised at even this display of party tactics, for it is by such perversion of facts, (and were it not impolite we should say political lying) that the Grits expect to carry the country at the next general election.

East Northumberland.

In a communication which appears in another column, Mr. W. H. Upton, of Campbellford, confirms in a manner beyond dispute, our charge against Mr. Crouter, the member elect for East Northumberland, that he ignored politics in the contest, and made the issue on religious grounds. These were Mr. Crouter's tactics in Protestant neighborhoods, at least, and his party pursued a similar despicable course.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

The Proposed International Yacht Race.

A NEW YORK SHODDYITE EXPRESSES HIMSELF.

The New York *Spirit of the Times* publishes a list of the officers and fleet of the Bay of Quinte Yacht Club, which were beyond doubt obtained from the Steward of the New York Yacht Club, to whom these particulars were, upon application, forwarded by the Secretary of the B. Q. Y. C., for publication in a book containing such particulars with regard to various clubs, which he publish s annually.

On this list the *Spirit* bases the following remarks:—

> "The particulars in relation to this club are thus given in detail because a question is likely to arise, as to whether the New York Yacht Club is bound to accept a challenge from an organization such as this; whether such an association as this would be considered "a recognized yacht club" among the great clubs of the world. It will be seen by the above list of the fleet that only two of its vessels, and one of them not yet complete, are of sufficient size to be enrolled in the New York Yacht Club, and that it has not a schooner in its fleet. In these waters, it would rank in importance below the Jersey City and about on a par with the Empire or Long Island clubs; respectable organizations enough in their sphere, but no yachtsmen in this neighborhood will contend that their spheres are the same as that of the New York, Brooklyn, Atlantic or Seawanhaka clubs. Now the question has arisen, very naturally, among the members of the New York Yacht Club, whether—if the members of one insignificant little organization on Lake Ontario chose to 'pool their issues' as the respected Mr. Kearney would say, and hire Captain Cuthbert to build them a sloop, making him the nominal owner, and challenge for this trophy—the club is under any obligation to accept the challenge. 'It is well known,' said a prominent club member, 'that the *Countess of Dufferin* was a joint-stock concern, and is is believed that this new venture is of the same nature. It is difficult to put our objections in a form which shall not be considered disrespectful to the small clubs of this country, for which we entertain the most cordial respect, but if we should invite entries to our regattas from recognized yacht clubs, the invitation would be considered as including only such organizations as by the size of their yachts, and the social standing of their members, made them our equals; and it would not be understood to include organizations like the Empire and Long Island clubs. It is not that we fear the *Atlanta* or any other yacht, and we should hail with the greatest pleasure the presence of the *Vanduara*, *Samœna*, or any of the crack English yachts; but we do not think that we ought to be called upon to meet this craft, constructed, not as a yacht for any one gentleman's pleasure, but as a joint-stock racing machine for the sole purpose of winning this trophy, and glorifying Captain Cuthbert and this little Canadian organization.' That there is great force in this, no one will deny, and so there is every prospect of a lively controversy upon the receipt of this challenge."

This is a new and, to say the least, curious view of a subject as to which there ought to be, and it is to be hoped will be, no difficulty. The matter is one which ought to be approached in a sportsmanlike and gentlemanly manner, but the comments of the *Spirit of the Times'* yachting editor and the "prominent Club member" who inspire him are simply insolent. However, as they contain a misrepresentation and a serious error and will be widely read, they call for a reply. First as to "recognized" Yacht Clubs. A letter sent to the New York Yacht Club in 1857 by the original owners of the *America*, contained the terms upon which those gentlemen consigned the cup which their yacht had won at Cowes in 1851, to the custody of the New York Yacht Club, as a perpetual challenge cup for friendly competition between foreign countries. A copy of that letter, under the terms of which the cup has been thrice been competed for and the terms of which we lately published, is now before us. It may surprise the *Spirit* and the shoddy individual whom it quotes approvingly to learn that the word "recognized" does not appear in the document. The true sportsmen who drew up these rules prescribed that "any *organized* Yacht Club of any *foreign* country shall always be entitled, through any one or more of its members, to claim the *right* of sailing a match for this cup with any yacht *or vessel* of not less than 30 or more than 300 tons, measured by the custom house rule of the country to which the vessel belongs." So that, as the Bay of Quinte Yacht Club—small as it may appear to the eyes of metropolitans—is, beyond denial, an organized Yacht Club and has been so for six years, and as its challenge will be issued as a matter of right under the rules laid down by the donors of the cup, on behalf of a yacht of more than 30 tons, the *Spirit* and its snobbish friend are altogether lacking in matter for their supercilious sneers. The holders of the cup are bound to meet any challenger who complies with the simple rules which govern, or in equity to return it to the only one of the surviving donors, whose conditions as to its retention, as made known in the letter above referred to as drawn up by them, are of the most sportsmanlike character. This disposes, for once and for all, of this part of the subject.

What the social standing of the members of a challenging Club would have to with a challenge for the coveted trophy, we leave it to the combined intellect of the *Spirit* and the spiritless individual who broaches the subject to explain, as the donors of the cup do not mention that which seems a great essential to them. However, the high-toned Club member may make himself easy on that point. Should he ever find himself in the company of the members of the Bay of Quite Yacht Club he would not find it necessary to guard his pockets very closely for fear of their being picked, nor, should he entertain them, would they pocket the silver spoons, which doubtless adorn his table. Perhaps inquiry on the point would remove his doubts.

The other grounds of objection taken, namely that only two of the yachts belonging to the B. Q. Y. C. are of sufficient size to be enrolled in the New York Club, and that the members of our local Club are having a "joint-stock racing machine," built by Capt. Cuthbert to compete for the cup, are equally nonsensical and devoid of foundation with those already disposed of. As a matter of fact there are three—not two—of the fleet of the B. Q. Y. C. which measure more than 15 tons, and are therefore large enough to be enrolled in the New York Club, namely the *Atlanta*, *Nora* and *Dauntless*. The *Spirit* so mangles the tabulated list by crediting the *Gracie's* measurement to the *Dauntless*, leaving out that of the latter and thereby transposing the whole list that we give it on a correct form below. It is, in reality, nobody's business as to whether the *Atlanta* is a "joint-stock racing machine," or not, as the rules do not provide that the challenging vessel shall be the property of one or more individuals—in fact, they speak of "owners," and do not specify what their number shall be. Neither do they provide that that the competing vessel shall be "a yacht for any one gentleman's pleasure." The language used is explicit: "yacht or other vessel," so that a trader, a pilot boat, or a canal boat might be sailed in a contest for the cup, so long as the challenge was issued in behalf of a member or members of any organized Yacht Club. It is not even provided that the vessel on whose behalf the challenge is issued shall be the property of a member or members of the challengeing Club, the rule on that point having been—and evidently purposely—left so wide as to include anybody's vessel, authenticated in the proper manner. Otherwise the cup would not be what it is, namely the championship emblem of the world for sailing yachts or other vessels within prescribed dimensions.

Although the insinuation as to the ownership of the *Atlanta* is a piece of impertinence, we may state, in order to dispose of the matter, that Capt. Cuthbert is her sole owner. The Captain says that he had enough of joint stock affairs in the unfortunate *Countess of Dufferin*. He will race his craft as he chooses, but not to such an extent as do the owners of the *Vanduara* and *Smœna*, which were built for racing machines and nothing else, as their time is occupied during the season in going from port to port where regattas are held and sailing in races wherever money prizes sufficient in amount are offered. Yet those are the sort of craft which "a prominent Club member" would welcome in preference to a Canadian sloop, which would sail her maiden race for the world's championship.

We hope and believe that the great majority of the members of the New York Yacht Club utterly repudiate such nonsensical and offensive views as those above commented upon—in fact we feel assured that such must be the case, as no body of gentlemen could be aminated by snobbery so thoroughly mean, contemptible and offensive to a body of gentlemen in this city who have done nothing and will do nothing to warrant such aspersions, unless it be an offence to contemplate issuing a challenge for a contest to which the whole world is invited in a sport hitherto regarded as belonging exclusively to gentlemen, and to engage in which the representative of their organization must travel nearly or quite 1,200 miles, thus showing a determination and a reliance on his skill which certainly ought not to be met with open insult and impertinent comment and unfounded innuendo.

The current list of the Bay of Quinte Yacht Club's fleet is as follows:

Name.	Owner.	Cabin Sloops.	Length.	Beam.	Tons.
Atlanta (building)	A. Cuthbert	C. B.	63ft. 0in.	19ft. 0in.	84
Nora	R. J. Bell	"	37ft. 6in.	16ft. 10in.	55
Dauntless	D. Pitceathly *et al*	"	37ft. 0in.	14ft. 0in.	24
Gracie	R. M. Roy	"	27ft. 4in.	11ft. 4½in.	11
Katie Gray	W. H. Campbell	"	26ft. 5in.	11ft. ½in.	10
Kathleen	A. Cuthbert	"	27ft. 6in.	10ft. 6in.	10
Surprise	J. R. Cumming	"	....	....	11
Emma	G. Offord, jr.	"	29ft. 3in.	10ft. 5in.	11
Enid	D. R. Leavens	"	26ft. 10in.	10ft. 10in.	10
Sylvia	W. Pike	Keel	31ft. 0in.	9ft. 4in.	10
Zephyr	S. T. Greene	C. B.	....	....	[illegible]
Iris	G. P. Reid	"	....	....	[illegible]
Pinafore	W. Clarke	"	....	....	[illegible]
Mabel	Thos. Cook	"	....	....	[illegible]
Minnie A	John Addison	"	....	....	[illegible]
Amorette	A. R. Lee	Open	....	....	[illegible]
I X L	W. H. Carter	"	....	....	[illegible]
Whisper	Ralph Purdy	"	....	....	[illegible]
Catamaran	J. J. B. Flint	"	....	....	[illegible]

The above list includes, it may be said, the fastest yachts on the lower lakes, and is excelled in number and tonnage by that of but one Club in Ontario.

Mr. Crouter, M.P., and Protestant vs Catholic.

To the Editor of the Intelligencer.

SIR,—Not until to-day did I see the letter in the Belleville *Ontario*, signed by X, under the heading "Another Lie nailed."

I am the man who rose at the meeting held in Mr. Kennedy's interest at Campbellford, and backed up the statement of Thos White, M.P., that Mr. Crouter had said that the election between himself and Mr. Kennedy was one between Protestants and Catholics. The facts are as follows: I met Mr, Crouter at a Social held in the Township of Seymour, and he said to me in the course of conversation, "The Catholics always brag that they "can win every election, and this is a contest "between Protestants and Catholics to show "them they cannot do so." I had only just been introduced to Mr. Crouter, had never met him before, and he was in Seymour canvassing.

If necessary I am prepared to prove by others the truth of the above statement, and also that Mr. Crouter M. P. said in substance the same to other electors. I know not who X is, he is evidently ashamed of his letter, as he is not man enough to put his name to it. I deny that the gentleman in whose house Mr. Crouter made the statement, ever met me in Campbellford or anywhere else, and I had to admit what I said at the meeting was not the truth. X's letter is a fabrication from beginning to end and I challenge him to try and prove the veracity of it, so that the public may know who uttered the lie he has nailed.

I hope and trust that you, Sir, will in common justice publish this denial.

I am, Sir,

Your truly,

W. H. UPTON.

Seymour, 19th April 1881.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist——————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

THE SECRET OF HEALTH.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of HERRICK'S SUGAR COATED VEGETABLE PILLS, and you are safe They never fail in any case of sickness or inward pain. Try them.

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

FOR SALE OR TO RENT.

WALLBRIDGE & CLARKE,

GROCERS AND WINE MERCHANTS.

37 & 39 Bridge Street.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similiar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

THE CHEAPEST

BLACK SILKS

IN THE CITY.

WE have just received 6 pieces more of our celebrated Black Silk at $1.29 per yard.

It is decidedly the best value of Silk in the Dominion of Canada—soft in make, so that it will not easily crease or cut. We consider it fully as good as any $2.00 silk that is sold in the city. We have also

A CHEAPER SILK!

6 pieces, which we offer at $1.03 per yard. This is what is usually sold at $1.50 per yard. These classes of Silks cannot be purchased elsewhere as cheap as we offer them.

CARPETS!

We have also received several bales of UNION CARPETS in first-class patterns at medium prices.

Our assortment of carpetings is one of the largest in the city. We have some specially low lines in Tapestries.

GLASGOW WAREHOUSE.

Local Notices.

Notices under this head 10cts. a line each insertion. After six insertions 5 cts. a line.

There is no use talking, public opinion has settled it, and public opinion is a Parliament that knows no House of Lords, Phœnix Hall is the only place to get ready made clothing that is at once cheap, stylish, serviceable.

The old fashion, hundred per cent. and two price fellows potter away, selling an odd garment now and then.

But the hand writing is on the wall, and it says Phœnix Hall has the largest, handsomest and most select stock ever offered for inspection, 330 Front St.

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, APRIL 20.

6 O'CLOCK EDITION.

City and Vicinity

THE cell were occupied by one prisoner and three tramps last night.

THE notorious Charley Wilson is in limbo once more. He is charged with wife-beating again.

MR. PURDY, auctioneer, announces a great sale of a bankrupt stock of watches, jewellery and fancy goods. Sale each day and evening in the store opposite the Anglo-American Hotel.

THE Oddfellows' excursion to Peterborough on Tuesday next, the 26th, being the first of the season, should be well patronized by our citizens, many of whom have never visited Peterborough.

THE church social at the residence of C. E. Holton, Esq., last night was probably the last one of the series. It was hardly as well attended as its predecessors, but those who were present spent a very pleasant evening.

FIRST ARRIVAL.—The steamer *Armenia*—the first arrival of the season—steamed into the harbor to-day about noon, from Desoronto.

WEATHER PROBABILITIES. — Toronto, April 20.—All Canada, moderate winds, fine weather, not much change in temperature.

ACCIDENT.—While No. 1 engine was being hauled up the river bank last night Fred. Lockerty, a son of Mr. Thomas Lockerty, had his right hand caught in a set of cogs and the ends of the third and fourth fingers smashed.

PRESENTATION.—A very pleasant evening was spent at the residence of Mrs. C. H. Elliott last night by her Bible Class on the occasion of the sixth anniversary of Mrs. Elliott as teacher in the Holloway St. Church Sabbath School. The scholars wishing to show their deep esteem for their teacher and appreciation of her valuable services, presented her with an address and a handsome silver water pitcher. The teacher was taken completely by surprise, and made a suitable reply to the address. The evening will long be remembered by both scholars and teacher, and will no doubt result in bringing them still nearer to each other and thereby result in much good.

FIRE STAND NEEDED.—The great need of a fire stand along the west bank of the river between Burrell's dam and the upper bridge was illustrated very strongly at the fire last night. No. 1 engine was driven down the bank of the river a short distance above the burning buildings, for the purpose of obtaining suction; but it was found impossible to work her in a sloping position, and she was therefore useless. The bank here is rather steep and high, and great difficulty was found in getting the engine back to level ground. It was only done with the aid of ropes, blocks, and a large gang of men, and took upwards of an hour and a half to accomplish. A fire stand should be erected in this vicinity immediately, as there are many inflammable buildings along the river at this point, which, in case of fire, would admit of but little delay on the part of the firemen.

PARLOR CONCERT.—A very pleasing, and in every way successful, concert was held at the residence of N. B. Falkiner, Esq., last evening, in aid of the funds of St. John's Church. The attendance was quite large, the majority of the audience being composed of ladies. The programme, which was of more than average excellence, was well carried out under the superintendence of Dr. Crozier. The music was furnished chiefly by the Choral Club. The Rev. Mr. Forneri made a few closing remarks explaining that the object of the entertainment was to aid the lot fund of the church, towards which a member had offered $100 if the balance of $300 were raised before Whitsunday. He congratulated the audience on the musical treat they had enjoyed and heartily thanked the conductor, Dr. Crozier, and those who had contributed their valuable services. He expressed the great obligations the church was under to Mr. and Mrs Falkiner for their kindness, and thanked all who had assisted in the entertainment. The proceeds amounted to $65.00.

DESTRUCTIVE FIRE.—A few minutes before 12 o'clock last night a drunken man on his way home from a night's dissipation saw flames bursting from the roof of Ostrom's saw-mill, opposite Burrell's axe factory. The sight almost sobered him, and he lost no time in waking the neighbors by loud alarms. The whole neighborhood was soon aroused, and the alarm was shortly afterward sounded from the City Clock. The building being old, and there being a great deal of oil used about the machinery, the fire spread with great rapidity, and in a very few minutes both the saw-mill and the carding mill were a mass of flames. No. 2 engine arrived first, and soon began to play on the flames; but it was useless to waste water in attempting to save the carding and saw mills, so the exertions of the firemen were chiefly employed in saving the tall furniture factory of Mr. J. G. Frost from the same fate. This big building being in such close proximity to the flames, was in imminent danger throughout, and if there had been much wind stirring nothing could have saved it. As it was, more than once it was on fire in several places at the same time, and nothing but hard work and steady determination on the part of the firemen saved it. No. 1 engine arrived but did not work, owing to a misfortune which is described elsewhere; but if it had been able to get to work as soon as No. 2 the Ostrom mills could not possibly have been saved. Both the carding and saw mills were soon a heap of charred timbers, and all the machinery which they contained was totally destroyed. Ald. Ostrom estimates the total loss at not less than $8,000. There was an insurance upon the building and machinery of $1,500. There was in the carding mill a large quantity of wool which had been left there by farmers to be carded. This was, of course, destroyed. About $1,000 worth of leather belting was also lost. It is not known how the fire originated. If it originated in the saw mill (as is probable, since the fire was first noticed there), Ald. Ostrom says it must have been the work of an incendiary, since no fires were kept up in that building. The fires in the carding mill have always been well guarded and carefully looked after, and it is hardly possible that the accident could have resulted from carelessness.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

Police Court.

(Before T. HOLDEN, Esq., P. M.)

WEDNESDAY, April 20 1881.

MARKET BY-LAW.

Simon Sheehan was charged with buying potatoes on the market before 10 o'clock, contrary to by-law. He was fined $1 00 and costs.

ABUSIVE LANGUAGE.

The case of Mrs. Moore against Mrs. Cronkrite was settled by a fine of $1.00 being inflicted on the defendant.

WIFE-BEATING.

Chas. Willson, for beating his wife, was sent to Central Prison for 9 months.

ILL-TREATMENT OF A CHILD.

Mrs. Brown, wife of Rev. Jos. Brown, John St., was charged with cruelly beating a little girl in her employ, named Annie Vanalstine.

The child, who has a very bright, intelligent, and pleasing face, was placed in the witness box, and gave her evidence in a simple and straightforward manner. She said that she was eleven years old. She came with Mr. Brown from Barrie to Belleville last New Year's, and had lived with the Brown family on John St. ever since, until she left on account of the ill-treatment she received. The last beating she received, she said, was on Monday, the 11th inst. The next beating before this was on a Sunday. The cause of this beating was as follows: Mrs. Brown told her on Saturday night to get some boards to chop up for Sunday. She got the boards. The next morning Mrs. Brown told her that she had got the wrong boards. She (the girl) said she thought they were the right boards. Mrs. Brown said "that she was beginning to lie already on the Sabbath day." She then took the child and tied her arms to her body with a skipping rope, then taking hold of the other end of the rope she jerked her about the room with it. She then struck the child about the shoulders, back and arms, and in the face, then jerked her about again. She was then locked up in a closet and was some time afterward let out, and the rope was taken off and given to Mrs. Brown's little girl. During this beating Mrs. Brown gave her a black eye.

The County Attorney was going on to elicit evidence from the child concerning subsequent beatings; but Mr. Dickson, counsel for the defence, objected, on the ground that the prosecution must be confined to a specific charge. The County Attorney protested against being obliged to base his case on the ill-treatment inflicted on this particular day, as the child had suffered far grosser ill-treatment than that of which she had given evidence.

The child then continued her evidence. She said that the result of this beating which she had received was that there were lumps on her head and that her arms and body were black and blue. She was beat with sticks of stove wood and a poker before and after this beating, but they were not used on this occasion. The poker was an iron poker, and was about as large as her little finger. She was struck with it on the arms, about the body, and on the head. Shortly before this, the child said, she met three boys who said, "that is the girl that works so hard for Mrs. Brown. She told Pearl, Mrs. Brown's little girl, of this, and Pearl told her mother. Mrs. Brown, when she heard of it, said, "Oh, you are the girl that carries tales out of the house." She then beat the child with the poker on the head. After the beating the child ran away and hid herself in a vacant house in the neighborhood, but was brought back. After the last beating the child also ran away and hid in a vacant house, where Miss Robinson saw her and took her away to her own house.

Mrs. Williams, to whom the child was taken by the police, testified as to the appearance of the child's body when she was brought to her. She had heavy, greenish looking bruises on her left arm, bruises on her legs and on her back. She also had a bad black eye and the side of her head was discolored. The witness would consider that such marks were the results of blows. She would consider the treatment which would cause such bruises as cruel in the extreme.

The case was then adjourned till this afternoon.

Belleville Cheese Market.

WEDNESDAY, April 20.

As yet the cheese buyers in this section have not commenced buying, and will not begin operations until the first week in May. The outlook is at present fair, as although stocks in England are rather larger than usual, cable continues steady at 60s. A few days may, however, make a great change, so it is not altogether safe to speculate as to prospects yet. A large number of factories have commenced work, but the make is reported as being but small in extent up to the present.

'THEY ALL DO IT.' — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

INDUSTRIAL COMMITTEE.

Several Projects Considered.

Something Practical Likely to Result.

A meeting of the Industrial Committee was held last evening.

There were present: Ald. Dickson (Chairman), Smith, Frost, The Mayor, and Mr. C. F. Smith.

The absent Aldermanic members of the Committee were: Ald. Starling, Henderson, Holden and Niles.

The Chairman said there was a deepening feeling in the community that something should be done toward establishing some industry here. The people seemed not willing to help themselves, but waited for others to help them. He had been through the Cobourg Car Works, and they had 200 employees and were overrun with work. This enterprise needed very little capital, employed a large number of hands, and used a large amount of raw material, and was therefore a desirable enterprise. All that was wanted in Belleville was someone in whom the people had confidence to take the lead. He still favored the car works. Mr. Starling would be a good man to lead in this enterprise.

Mr. C. F. Smith said that certainly all that wanted was someone to lead and the thing would go

The Mayor spoke of a stove foundry, and said that a car wheel manufactory, he thought would pay well.

The Chairman suggested that a committee be appointed to consult Mr. Alex. Brown and see if he would take an active leading part in establishing either a charcoal iron or malleable iron manufactory, and to see Mr. Starling as to whether he would take a lead in establishing a stove foundry.

Mr. C. F. Smith said undoubtedly a stove foundry would pay if rightly managed. His idea was for the city to give the old market lot and exempt from taxes.

The Chairman said that, to his knowledge, negotiations were still going on with reference to car works.

Mr. C. F. Smith said it would require about $50,000 capital for a stove foundry. He was willing to take a lead in establishing this industry by a joint stock company.

Ald. Frost said that if a manufactory was once established, and the building and plant bought, there is no doubt it would be carried on by someone.

The Mayor said there was a growing demand for malleable iron, and with the present duty upon that article, there is a great advantage in favor of it being manufactured in Canada.

The Chairman said there were some smaller industries that could be established for a commencement, in which mechanics would take stock. As to the stove foundry, to get at details, the first thing would be, say, for the Council to give the old market lot and exemption for twenty years.

Mr. C. H. Smith said the stove foundry would require about $75,000 capital.

Ald. Frost said he would favor granting a bonus equal to $5,000 to the stove foundry.

The Mayor said the details is what the people wants to know—the cost of the plant, building, &c.

The ground required for a malleable iron manufactory would be an acre.

Mr. C. F. Smith said he had been informed by a practical moulder that stoves could be manufactured at an expense of three cents a pound. He had about concluded to start a small stove foundry himself, but was willing to take stock in a joint stock foundry.

Ald. Smith moved that a committee be appointed to take into consideration the charcoal iron, malleable iron, stove, and car industries, to consist of the Mayor, the Chairman, Mr. Starling and the mover.—Carried.

Committee adjourned.

News Condensed.

—Nearly all the mechanics and laborers at Newport, R. I., are on strike.

—The Navin murder trial at Napanee has been postponed until to-morrow.

—A severe storm visited Nova Scotia on Good Friday, doing much damage.

—Sir. John Macdonald is convalescent, and will take a trip at an early day for the benefit of his heath.

—It is reported that a railway official in Montreal is short in his accounts to the extent of $20,000.

—The remains of the late Rev. Dr. Punshon were interred in Lower Norwood cemetery, London, on the 19th inst.

—The Grits of North Ontario have chosen Mr. Bigelow, of Port Perry, as their candidate for the Local Legislature.

—The Canada Temperance Act was carried on the 19th in Halton county by a majority of 87, and in Annapolis, N.S., by a majority of 1,200.

—It is rumored that Mr. Shanly's estimate of the cost of the Hochelaga tunnel is a certain amount between $3,000,000 and $3,500,000. The estimate will be for a double tunnel.

—The Ambassadors have signed a collective note in reply to the last Greek note. They have also presented to the Porte an identical message relative to Greece's acceptance of the terms.

—The alarm in regard to the exhaustion of English coal fields has led to the adoption of economical expedients which in making pig iron alone are estimated to have reduced the consumption by nearly five million tons since 1871.

—A project is begun in Chicago by leading western shippers to establish an American line of propellers and barges between Chicago and Montreal and to make special arrangements with a line of steamers from Montreal to all English, French and German ports.

—The presence and spread of typhus fever in New York city is viewed with much alarm by prominent physicians, especially as the streets are in so filthy a condition. Even ordinary disease is now aggravated and malignant, and fears of an epidemic are expressed.

—The Montreal North-Western Colonization Association has been organized with the object of establishing a colony in the North-West. Delegates have been appointed to proceed to the North-West and make a selection of land, &c. The colony is expected to leave Montreal about the 10th of May.

—A short time ago a young man employed as ticket agent at the Hamilton office of the North Western Railway disappeared, having, it is alleged, embezzled about $500 of the company's funds. The solicitor of the Company swore out information against him, and visited Toronto for the purpose of effecting a capture, but they arrived too late, as the young man got wind of their movements and fled to the States.

DROWNED IN A WELL.—The Kingston *News* says yesterday afternoon a little daughter, 11 years of age, of Mr. Robert Bryant, Queen street, came to a sad end. It appears she was sitting on the box of the well in the yard, when the lid gave way and she fell backwards into the well. In falling she struck her head against a projecting stone inflicting a wound on her temple. If it had not been that she was stunned she would not have been drowned, as there was only a few feet of water in the well.

FOR ASTHMA AND PHTHISIC.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

DR. LLOYD, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of ALLAN'S LUNG BALSAM, I have no hesitancy in stating that it was by the use of your LUNG BALSAM that I am now alive and enjoying good health.

"Hail bounteous, beauteous, gladsome Spring" this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

MORNING DESPATCHES

EUROPEAN.

THE LATE LORD BEACONSFIELD

LONDON, April 19.

The *Court Circular* publishes the following: The Queen has received with feelings of the deepest sorrow the news of the death of Lord Beaconsfield, in whom Her Majesty loses a most valued and devoted friend and counsellor, and the nation one of its most distinguished statesmen.

The *Times* understands that Lord Rowton is the sole trustee of all the private papers of Lord Beaconsfield, with full power to do what he thinks right with them.

BERLIN, April 19.—All the evening journals express sorrow at the death of Lord Beaconsfield. Bismarck was greatly moved on receiving the news.

AMERICAN.

A HANDSOME SURPLUS.

WASHINGTON, April 20.—The Treasury surplus for the current fiscal year is estimated at $100,000,000.

THE CHICAGO PORK CORNER.

CHICAGO, April 20.—The McGeach pork corner is still solid. McGeach's friends claim that he has already made $800,000, and is rapidly unloading.

VIRGINIA POLITICS.

RICHMOND, Va., April 20.—A movement has been started by several anti-alliance Republicans for calling a convention at an early day for the purpose of nominating a straight out Republican State ticket. A circular has been issued declaring opposition to a Republican in any shape. The Readjusters are working energetically. The election for officers in every county next month will be made the opening of the fight. Mahon's party is organizing in every section of the State.

A DESTRUCTIVE FIRE.

BOUND BROOK, N. J., April 20.—17 buildings were burned here yesterday, and 40 families are homeless. Loss $75,000. A colored man was badly injured by the falling of walls.

DAMAGE BY WATER.

ELGIN, Ill., Apr l 20th.—A dam ten miles north of here broke yesterday, precipitating the swollen waters of Fox river on the city. Two bridges and the dam were swept away. Damage $100,000. The bridges and dams at Carpenterville, Dundee, South Elgin, St. Charles and Geneva, Theo County, were also swept away.

EARTHQUAKE SHOCKS.

GOSHEN, Ind., April 20.—Earthquake shocks have occurred in this vicinity, shaking houses severely, and causing considerable alarm. No serious results.

A TOWN DESTROYED BY FIRE.

SAN MARCIAL, N. M., April 20.—Thirty buildings were burned here last night, including every business building, and many residences. The loss on the buildings is $10,000. One man was seriously injured. The only building left in the business portion contained nine tons of powder. The fire is supposed to incendiary.

A FATAL ALTERCATION.

ST. PAUL, April 20.—In an altercation between an Indian at White Oak Point Agency, and a white man, the Indian shot and wounded the white man, the latter shot the Indian dead, and wounded another white man badly.

A TEXAN FEUD.

UVALYS, Tex, April 20.—One Gilchrist and his two sons began firing at Gen. Baylor and son at Pippon's Camp. The fire was returned and Gilchrist was killed and one son fatally shot. The other son was wounded but he escaped. Young Baylor was slightly hurt. The affair was the result of an old feud.

A FLOOD IN IOWA.

CHICAGO, April 20.—Desplaine river is greatly swollen and has been pouring into the canal. The canal yesterday burst the barriers and apprehension of future damage is widespread, but the actual loss is yet confined to flooding basements, &c.

AFTERNOON DISPATCHES.

IRISH EMIGRANTS FOR MANITOBA.

LONDON, April 20.—The Duchess of Marlborough has arranged for the entire outfit of fifteen Irish families, who will be provided with free passages to Manitoba, and located there in neatly furnished homes.

LAND LEAGUE CONVENTION.

A thousand delegates from the local branches of the land league are expected to attend the convention which opens at Dublin on Thursday.

THE MONETARY CONFERENCE

PARIS, April 20.—The *Official Journal* says: England has not yet accepted the invitation to participate at the Monetary Conference.

FIRE IN AUSTRIA.

VIENNA, April 20.—A destructive fire has broken out among the petroleum wells at Stababa, in Galicia.

SZEGEDIN SAFE.

SZEGEDIN, April 20.—After a fortnight of almost superhuman exertions, the danger of an inundation is passing away.

PROGRAMME PREPARING.

PARIS, April 20.—A committee, composed of one commissioner from each state represented at the Monetary Conference, meets on Saturday to frame the programme to be pursued at the next sitting of the Conference, the date of which is uncertain.

LORD BEACONSFIELD'S FUNERAL.

LONDON, April 20.—It is understood that the friends and relatives of Lord Beaconsfield are willing to assent to a public funeral and the burial of his remains in Westminster Abbey, unless directions to the contrary are found among the papers of the deceased. Many persons acquainted with his will say that the wealth which Lord Beaconsfield leaves is inconsiderable.

THE NEWMARKET HANDICAP.

LONDON, April 20.—The Newmarket handicap race was won by Ferzcueze; Lorillard's Mistake, second.

WASHINGTON, April 16. — Indications; Lower Lakes stationary or higher temperature, fair.

Montreal Cheese Market.

The *Gazette* of the 19th says:—The first lot of new factory cheese this season has been received, and its quality is pronounced very good for the early make. Some of the factories in the Ingersoll district commenced operations on April 4th, and we may soon expect receipts in round quantities. The general opinion of the trade is that prices will open for the season at from 12c to 13c per lb., the latter being the opening figure last year. It is expected there will be a large make of fodder cheese, induced by the present good prices in England, and from the number of new factories that are being erected for immediate work, all over the country, we should judge that the total production during the coming season will be the largest on record.

ACTIVITY IN THE POTATO MARKET.—The Montreal *Gazette* says:—"There can now be little doubt that our farmers will be able to dispose of their surplus potato crop, as the American demand appears to be steadily increasing. Last week the shipment of potatoes from this city to Southern and Western points in the United States amounted to 36 carloads, containing about 16,000 bushels, against 9,000 bushels for the week previous. The enquiry yesterday was brisk and prices were decidedly firmer, sales being reported of two carloads of early Rose at 60c per bag and one carload of Chili at the same figure. It was also reported that a lot of 1,000 bags of Early Rose changed hands in the country at 60c per bag to be delivered at the cars at Point St. Charles. We notice that a good enquiry exists in the principal American markets, choice early rose being worth $1 00 per bushel in New York." There is also a good demand in this market, and considerable shipments have been made to Cleveland.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

The Lips We Love to Press

inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints that have been stiff for years.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

Commercial.

TORONTO MARKET.

TORONTO, April 20. — Fall wheat No. 1 $1.15; No. 2, $1.12; No. 3. $1.09. Spring—No. 1, $1.20; No. 2, $1.17; No. 3, $1.10. Barley—No. 1 95; No. 2, 85 to 90; No. 3 extra, 80; No. 3, 70. NOTICE.

THERE being a vacancy in the Medical Council of Ontario, caused by the resignation of Dr. Irvine, of Wolfe Island, I hereby announce myself as a candidate for election to the Medical Council for Quinte and Cataraqui Division, and respectfully ask the support of the members of the profession.

HENRY W. DAY, M.D.
Trenton, April 7, 1881. 326dtf.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

To Cure Consumption,

Bronchial affections, weakness of the lungs, take a small teaspoonful of Dr. Wilson's Pulmonary Cherry Balsam every two hours.

To Cure Coughs Take

Dr. Wilson's Pulmonary Cherry Balsam in small quantities as often as the coughing fit comes on.

To Cure Whooping Cough Take

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After gargling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

SPECIAL NOTICE TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation,

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

BY MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

The wind bore her words in an opposite direction, and the vehicle, dimly seen, was now within ten feet of her. Another minute and it would have passed, leaving her there to die.

With sudden strength, Tessa arose to her feet, and stretched out her arms. Her cloak, her vail, and her long golden hair streamed out like banners covered with snow, she looked like some sheeted ghost, as she called out piteously:

"Help! Help! or I die!"

A cry of amazement came from the interior of the little hooded chaise, and the big, powerful horse was drawn up abruptly on his haunches close beside the storm-worn fugitive. Then a man, lithe and active as any chamois, leaped from the vehicle and advanced upon Tessa, who fell forward into his arms, exhausted and unconscious.

The stranger, with a pitying and wondering exclamation, lifted Tessa into the chaise, and deposited her upon the warm cushions. Then he sprang in after her touched up his horse, and continued his course toward Wimborn Minster. The horse was left to his instinct for guidance, the safest plan in that snow storm, while his driver heaped blankets and lap-robes about Tessa, and chafed her hands and felt her pulse with a keen anxiety.

"She has only fainted!" he said aloud "Yet her face feels cold and rigid!"

He took from his pocket a small travelling match-safe and struck a light, which he protected from the wind with his hat.

The fitful flicker of the tiny waxen taper fell upon Tessa's face, and he recognized her on the instant. The brief small glare was blown back towards his own face, revealing it as the noble and handsome countenance of Tessa's defender—Sir Victor Cheswick!

"Miss Holm!—and here!" he ejaculated as the light went out. "Gracious heaven! What can have happened to make her a wanderer in this wild storm?"

He produced a small wicker flask filled with brandy, and provided against a chill on his night drive, and gently forced its mouth between Tessa's lips. He gave her a liberal draught of his warming liquid, and, as she began to stir in his arms, he restored the flask to his pocket, and again chafed her hands and softly wiped her wet, uncovered face.

A few minutes more, as they drove swiftly onward, and the warm tide of life pulsed anew in Tessa's veins, and reason and memory asserted themselves. She struggled to free herself from Sir Victor's clasp, and said, in a weary, hopeless voice:

"I wish you had let me die in the snow, sir."

"Tessa! Miss Holm!" cried a voice that thrilled her with sudden joy and ecstasy.

"What? It is not my father?" she ejaculated. "It is Sir Victor Cheswick?"

"You know my voice?" exclaimed the young Baronet joyfully. "Yes, it is I, Miss Holm. Thank Heaven I came along as I did. I am on my way to London, whither I have been called on sudden business. I have to start by the early train from Wimborn Minster, and chose to drive over at this hour, rather than to wait a few hours and then be blockaded by the snow. But what brought you out on foot and in the storm, if I may ask?" he asked in a tone of gentle deference and respect.

Tessa withdrew herself into the further corner of the seat as she answered:

"I am on my way to London also, Sir Victor."

"But where is your father, Miss Holm?" asked the young Baronet. "And how happens it that Squire Todhetly does not send you to the station in a carriage?"

"I have run away from the Grange," said Tessa mournfully.

"I—I don't understand—"

"I will explain," said Tessa wearily, nestling among the warm blankets and drooping her face from the cutting wind. "After you left me at the Grange gates yesterday, Sir Victor, Squire Todhetly made me a proposal of marriage. I refused him. As we went into the house and into my father's presence, his manner was insulting. I entreated my father to take me away from the Grange, but he refused. He said I should be forced to marry his friend. Then I avowed my intention of going back to my friends in London, and my father locked me up in my own rooms."

"Made you a prisoner?"

"Yes. I escaped about midnight only with the friendly aid of the housekeeper. The morning train leaves Wimborn Minster at an hour earlier than my father rises. I shall not be missed until the breakfast hour—nine o'clock—and I shall be safe in London before my father can reach Wimborn Minster and telegraph to have me stopped."

"You have done the best thing possible to you, perhaps," said Sir Victor. "I do not see that any other course was open to you. When your own father conspires against your happiness with his boon companion, and assigns you to that companion as if you were some senseless object, it is time that you took your affairs in your own hands. Pardon me, Miss Holm, but I distrust your father."

"And I also," said Tessa, shuddering. "I am afraid of him, Sir Victor. He does not love me, but instead, I think he hates me. I have seen a look in his eyes that could have sprung from nothing but hatred."

"You must be mistaken Miss Holm," said the young Baronet, in surprise. "It is against nature for a man to hate his daughter."

"But my father is a stranger to me," said Tessa. "He has a strangely perverted nature, which I can scarcely comprehend. He hated my mother, and I remind him of her. Therefore he hates me. I cannot tell you the details of my parents' unhappy marriage, but their misery falls upon me."

"You must not go back to such a father," cried Sir Victor warmly. "He is certainly unfitted to have the guardianship of his daughter. I will see you safely to your friends, and urge upon them to place you in some secure refuge, where he will not be able to find you. Then your guardian and I will proceed to investigate his claims and his history. If he is not worthy to be your guardian, and we can prove his unfitness for the post, the courts will appoint any one whom you may choose in his stead."

"I should choose Rueben Dennis."

"I will interest my friends, so that if influence be needed to effect your rescue it shall be forthcoming. Lord and Lady Thornhurst have generous hearts, and they could not fail to love you. They have been stopping in their town house since a day or after Christmas, and I shall visit them during my stay in town. My business is to visit an old college friend who is ill in lodgings in London."

"And you have hurried through all this storm at his summons!" said Tessa. "You have a good heart Sir Victor."

The young Baronet was tempted to offer her that heart, and his hand with it, on the spot, but a timely remembrance that she was helpless and dependent upon him restrained the words as they came to his lips. He could not take advantage of her gratitude, and helplessness to urge upon her his suit. But it required all the chivalry of his grand nature to prevent him from gathering her to his heart and shielding her thus from the storm. He contented himself with packing the blankets about her, and arranging a pillow for her head.

TO BE CONTINUED.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING'S NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities, Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & CO, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & CO

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Peaconsfield, P. Q, has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

CHOICE GOODS

AT

HOLTON, BOTTOMS & CO.

COSTELLO'S SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris London and New York Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust that this notice will suffice.

RICHARD COSTELLO.

A MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL USE
THE OLDEST BEST & MOST WIDELY KNOWN FAMILY MEDICINE

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer**, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer**; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer**, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

Cathartic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for **Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver,** and all other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

MANHOOD
HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO
MITCHELL'S CANADIAN
HAIR RESTORER.

TO THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher

Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

THIS Hotel has been recently retaken by Mr. HENRY HOGAN, the former proprietor, who has handsomely and appropriately decorated and renovated the interior, and completely refitted the whole of the apartments with new furniture. The Hotel is admirably situated, being in the very heart of the city, and contiguous to the General Post Office, the principal Banks, public buildings, law courts, commercial exchanges, railway and telegraph offices. 144d1yr

Daily Intelligencer.

The Shrievalty Question.

To the Editor of the Daily Intelligencer:

SIR,—During the present discussion on the most prominent public question now before the people of this district—namely, the question of the recent official appointments in this county by the Ontario Government—the *Ontario* newspaper has several times declared that there is no feeling, antagonistic to the course which the Government has taken, in the minds of the Reformers of this riding. I beg leave to contradict that misstatement. I assure you, sir, that in the minds of the majority of Reformers, not only the Reformers of Belleville, but Reformers throughout the county, a very bitter feeling exists on account of the course which the Government has seen fit to pursue. In some minds the feeling is one of sorrow, or shame ; in others, it is a feeling of indignation. For myself, I confess to feelings both of shame and indignation, and I am convinced that there are many Reformers who feel just like me. In what I am going to write, I know that I will express the views of a large section of the party.

The real cause of the prevailing discontent among the party is—not the mere fact of one or more unlucky appointments, but—the systematic ignoring of the party by the Government. All these appointments, so far as I have been able to learn, have been made without any previous consultation with the prominent members of the party in this riding—or, indeed, any members of the party except the gentlemen directly interested. When Mr. Grainger was so suddenly elevated into office last year it took the Reform party as much by surprise as it did the Conservatives. I have not heard that any strenuous exertions were made by the Reformers of East Hastings to secure the License Inspectorship of that riding for Mr. Lally ; I am rather inclined to think that his greatness was "thrust upon him"—like that of *Malvolio.* I am sure that the heads of the party here were not consulted with respect to the appointment of a new Deputy Sheriff and Physician to the Deaf and Dumb Institute. If there had been a representation meeting of the leading Reformers of the riding, I am equally certain that very few hands would have been raised in favor of the appointment of Mr. Patrick O'Brien and Dr. Murphy to these positions—and it is not at all probable that those hands would have been clean. Personally, I have nothing, and I do not believe that those who think and feel with me have anything, against either of these gentlemen ; but I know that they are not the gentlemen who would have been chosen by the party to fill these positions ; I know that their appointment is not only not popular with the party, but is extremely distasteful to it ; I know that there are others who, by long and eminent services in the Reform cause, are much more entitled to these positions than is either of these gentlemen ; I know that they have been appointed, not because of any special personal merit which they possess, or of any signal services which they have rendered, but because they are fortunate enough to be friends of a powerful member of the Government ; I believe that, in the eyes of that powerful Minister, a man is much less deserving of reward because he is a good Reformer than because he is a good Catholic ; I know that in this series of appointments the Reform party has been treated with contempt, as though its members were not yet out of their swaddling clothes ; and it is for these reasons that I, and many more Reformers with me, protest against the appointment of these gentlemen. It seems to me, sir, that the Government is doing not only a wrong thing but an inexpedient thing. Talleyrand used to say that a blunder was worse than a crime—and the Government has, I am afraid, blundered. It is always foolish to attempt to gain the allegiance of the few at the risk of alienating the many—and I believe that is what the Government has been doing, having consented to the recent appointments with the hope that they will influence the Catholic vote. It will probably be seen, in the future, that the action of the Government has had very little effect in that direction, while it will discourage and disgust the majority of Reformers, infuse fresh vigor into their opponents because it furnishes fresh cause for opposition, and thus renders still weaker the chances of redeeming West Hastings. Another reason why the Government is open to the charge of having blundered is that such appointments as those in question have the effect of impressing on people's minds the idea that the influence of Mr. Fraser is paramount in the Government, and such an idea is apt to lower one's opinion of the remaining members of the Government, as being unduly influenced by a more powerful mind. Unfortunately it is not an uncommon thing to hear even Reformers speak contemptuously of Mr. Mowat and his colleagues because of their subservience to Mr. Fraser. Such a sentiment if it becomes general, is dangerous to the strongest government.

I am, sir, a strong party man; and it is because I am a strong party man that I am writing thus strongly. I believe that the recent action of the Government is calculated to be of great injury to my party, and it is for that reason that I consider it to be the duty of some Reformer to enter his protest against it, with the hope that such a protest may serve as a wholesome warning to the Government and prevent it from adopting such an unjust and high-handed course in the future.

With the sincere hope that what I have written may have some little effect in that direction,

I remain, sir,
Your obedient servant,
REFORMER.

Thurlow, April 19, 1881.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS

THE PACIFIC RAILWAY.

An Interview with Mr. Duncan McIntyre.

Construction of the Sault St. Marie and Souris Branch Lines.

THE PROSPECTS OF IMMIGRATION.

(From the Mail.)

MONTREAL, April 19.—Mr. Duncan McIntyre, the resident local director of the Canada Pacific Railway Company, arrived here to-day *via* New York from London, England, where he left his co-directors, who intended leaving for Canada a week or ten days subsequent to his departure. Mr. McIntyre was tired and weary after his long journey, but received your correspondent most kindly at his private residence in the west end, where he was resting preparatory to the heavy labors that are before him in connection with the gigantic work in which he and others are engaged. Our interview in reference to what was done in London by the syndicate was brief, entirely unreserved, and quite interesting. In general terms he remarked that the directors' visit to England had been most satisfactory. They were well received in all circles, and met with no obstruction or unfair treatment from any quarter. There was no apparent jealousy manifested towards them by the representatives in England of the great American through lines, with the exception perhaps of the publication in the English journals of short extracts from speeches of Canadian members of Parliament, or from newspapers like the *Globe*, hostile to the Dominion Government, and depreciatory of the Pacific railway undertaking. Up to the period of Mr. McIntyre's departure from London, the directors were steadily engaged in concerting measures for the vigorous prosecution of the work on all the sections of the railway.

It was determined to build the Sault Ste. Marie line in connection with the Canada Central, so as to complete a direct railway and steamboat route from Montreal *via* Sault Ste. Marie and Thunder Bay to Winnipeg. The paramount object in doing this great work was to reduce the rates to the lowest point for immigrants to the North-West, and to avoid taking them through American territory. This work, which will be carried through by the time immigration sets in next year, will be pushed to completion from both ends of the line. It will not, however, be allowed to interfere or retard in the least the work upon the railway to the north of Lake Superior.

The construction of that portion of the undertaking will be carried on simultaneously with all the other sections, and with as strong a desire to get it completed as any other part of the line. The branch to the southern coal fields at the Souris, and which will pass through and open up that valuable portion of the territory partially occupied by the Mennonites, was also determined on as a work of immediate importance and it will also be placed under construction forthwith. No time will be lost in initiating and carrying on these projects. The great point upon which Mr. McIntyre dwelt was in reference to the direct route from Montreal *via* Sault Ste. Marie, enabling the company to lessen the expense of immigrants going to our great North-West. He estimates that the time from Montreal to Winnipeg *via* the Sault, when the route is opened, will be under four days for immigrant trains, and he looks to that portion which will be connected by steamer on Lake Huron as greatly alleviating the hardship and fatigue which immigrants now have to undergo in the long roundabout railway journey through the States. He is evidently much impressed with the vast importance of seeing this connection with Winnipeg a *fait accompli* before another season's influx of immigrants takes place.

The directors purchased twenty thousand tons of steel rails after their arrival in England, some of which are already shipped, and all of which are under contract to arrive here during the coming summer. This heavy order for supplies was the only one given in Great Britain, the directors being desirous of obtaining all the other necessaries in connection with the railway lines in Canada. Mr. McIntyre has every confidence that they will be able to get everything connected with the works but the rails within the bounds of the Dominion.

With respect to a large immigration during the present year he does not speak confidently or sanguinely. He says the delay in passing the railway bill through Parliament seriously retarded the company in regard to making timely arrangements for promoting immigration on the gigantic scale they would otherwise have done from the very outset. However, they have accomplished everything that time permitted for the present, and he has no doubt of the success of the immigration scheme in future years. He considers it only requires truthful and honest statements to be published regarding the glorious country that is now being opened up to settlement, and which will be shortly intersected by railways, to draw the stream of a mighty and grand immigration to the territory. Mr. Angus had proceeded to Scotland in connection with immigration matters, and there were sanguine hopes expressed before Mr. McIntyre left that he would meet with success in his mission. Mr. McIntyre does not pretend, however, to give much information on immigration matters, as it is not in his department or under his control, and he is not minutely cognizant of all the means that have been taken to stimulate emigrants to come in this direction.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Mothers ! Mothers !! Mothers !!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth ? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

To Whom it may Concern.

WE, the undersigned, Health Officers of the City of Belleville, under an Act respecting the Public Health, R. S. O., Cap 190, do hereby give NOTICE that all persons resident within the City of Belleville are hereby called on to cleanse their premises and to remove what is so found there, on or before the

First Day of May, 1881.

The undersigned have secured grounds for the deposit of all night soil, and other accumulations injurious to health.

The person appointed by the Board of Health as Scavenger is William Hale, who, with the undersigned will give all information.

Any person who wilfully disobeys or resists any lawful order of the Health Officers, or wilfully obstructs any person acting under the authority or employed in the execution of this Act, will be dealt with as the law directs.

JAMES SMITH.
JAMES F. CURLETT.
JAMES ROSS.

Belleville, April 2, 1881. 322d3tawt

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville.

Daily Intelligencer.

BELLEVILLE, THURSDAY, APRIL 21.

Changing Front.

It is not yet four years ago since Mr. A. H. Dymond, then representing North York in the House of Commons, declared in the course of a debate on the subject of free trade *versus* protection to native industries, that he hoisted the flag of free trade on behalf of the Reform party. This declaration he made amidst the cheers of his party, which then had a very large majority in the popular branch of the Dominion Parliament. Mr. Dymond's proclamation on behalf of his party was emphasized by the Grit leaders and by the Grit press, until it came to be accepted as the leading plank in the party platform. Who can forget the Cassandra-like predictions of woe and ill, put forth by Sir Richard Cartwright, the financial genius of the party, when the N. P. was first brought before Parliament, and the never ceasing denunciations by Sir Richard and his leading associates of the system of protection! Yet the logic of facts has been too much for them, and if the leaders who have led so blindly are not prepared, owing to false pride, to acknowledge that they were bad prophets and to weaken, some of the lesser lights of the party and some of their organs have commenced to do so for them. These trimmers see that the tariff is redeeming, to the satisfaction of the people, the promises which were made on its behalf by its framers. They note—doubtless not without many a pang of regret—that their ill-omened prophesies have come to naught: that new manufactories and new lines of industry are being established; that establishments which struggled to maintain a precarious existence under the Cartwright tariff are now prosperous and thriving, and in very many instances being enlarged; that in short prosperity has been restored, to the benefit of the whole people, and especially to the manufacturers and workingmen, who, under a vigorous administration of the Customs laws, are protected from the unfair competition of the United States, which has for years paralyzed legitimate trade in Canada, without benefitting any one except the slaughterers themselves and their agents.

Seeing these things, and noting that the people are not prepared to support a party which would revert to the old tariff and cause the return of so disastrous a state of affairs as has happily been dispelled by the helpful measures of the present Government, the Grit free-traders have evidently resolved upon a change of front, and are already trimming their sails to catch the prevailing breeze. The first indication of this change of front was afforded at the Montreal banquet to Mr. Blake, whereat Mr. Huntington hauled down the free trade flag, under which his party had fought and fallen in 1878. This hon. gentleman took occasion to assure his hearers that the Grits were not so strongly inclined, after all, to reverse the present commercial policy of the country. Revenue had to be raised, and this could only be done by continuing the present tariff (which the free traders had prophesied would result in a decrease in the revenue), and so manufacturers and others need not be afraid that his party would abolish or even seriously modify the N. P. Mr. Charlton has also made a declaration that vested interests—meaning the various industries—would not be interfered with, which is another cunning attempt to woo the favor of the electors. Now the Ottawa *Free Press* follows suit, and says in its issue of the 68th inst.:

> "The Toronto *Telegram* apparently thinks it has a mission to perform in lecturing the Liberal party. Among other things it says the Liberals must haul down the free trade flag. If our sprightly contemporary would base its observations on facts, it would avoid absurdities like this. *The Liberal party in Canada cannot haul down the free trade flag, for the simple reason that it never hoisted it.* Papers like the *Telegram* have imposed a false idea on the party led by Mr. Blake, and have gone on deprecating it as if the figment of their imagination were a real thing. It has frequently been pointed out both in the press and in Parliament that the obligations resting upon the Dominion are of such an onerous nature that a large revenue must be raised annually to meet them. The least burdensome way this can be done is by taxing imports. Therefore, when the Liberal party returns to power, the first duty will be to provide for discharging these obligations; the next to remove those partial discriminating, unjust impositions which have made the local policy of this Government so unpopular with the masses of our people. In carrying out this policy it is only natural to suppose that care will be taken to give Canadian industries the fullest benefit possible in the manner of distributing the duties. *The attempt to identify the Liberal party with free trade is sinister as well as absurd, for* FREE TRADE IN CANADA IS AN IMPOSSIBILITY, and to accuse the Liberals of an intention to force such a policy on the country is simply to endeavor to raise a false issue."

This is a very nice, very comforting, and no doubt highly reassuring pronunciamento on the part of the Ottawa organ of the Opposition. That is, it is so intended to be; but, as we have above shown, the first portion of it is untrue and in the next place it comes from so well-known a free trader that its intended purpose of catching votes is so easily seen through as to cause it to fall flat upon the minds of those who read it. No doubt the Grit party are ready and willing to profess anything, in order to be returned to power; but the people have had too serious an experience of the wide contrast which exists between their professions and their practice, to be gulled into trusting them again. The declaration that "free trade is an impossibility in Canada" is a sensible one, and involves a very strong compliment, from an unwilling source, to the present Government, whose policy has demonstrated that much at least to the Ottawa *Free Press*, as well as to Messrs. Huntington and Charlton. It is well that the fact should be recognized; but the people, animated by sound common sense, know that to entrust the Grit party with the carrying out of that doctrine, to which they are in reality hostile, would be a foolish and a dangerous move. They will reason, and correctly, that the existing administration having inaugurated a policy which even their opponents have been driven to acknowledge is the right one, are the only men who can be safely trusted to continue, and if need be, modify or enlarge it. Therefore the Macdonald Government will be sustained in 1883, and the party now in Opposition returned to the same position for another five years' schooling in the science of governing the country in the interests of its own people, rather than those of the United States.

How it was done in Prince Edward.

The *Mail* has the following with regard to the recent choice of a Warden for the county of Prince Edward:—"A singular instance of the lengths to which Reformers will go in the interests of their party, or rather of themselves, is reported from Prince Edward county. When the reeves and deputy reeves met in due course to elect a warden, the clerk, on counting the ballots, found nine for Mr. Knox, one of the candidates, seven for Mr. Sprague, and two scattering. The result was announced and Mr. Knox declared elected. This did not suit Mr. Sprague, and he, without permission, went to the clerk's desk, took out the ballots, and carried them home. The next day he declared the clerk had made a mistake, having counted one vote for Mr. Knox which would have been given to Mr. Ketchum. This would still leave Mr. Knox in one of a majority over Mr. Sprague, but the law was applied to, and a new election ordered. Then there was a rallying of the faithful. Reeves, ex-reeves, deputy reeves, ex-members of Parliament, justices of the peace, all became suddenly interested, and brought pressure to bear on the unfortunate members of the County Council. Instead of by ballot, the vote was made open, and Mr. Knox was beaten by one, the vote standing, Sprague nine, Knox eight. Mr. Sprague thus secured his heart's wish. In his method of obtaining it he was true to the instincts of his party, who not only never go unbidden to desks to secure useful documents, but never allow politics to interfere in municipal matters! Another time our friends in Prince Edward county will be alive to their little tricks."

Editorial Notes.

HOW THEY REGARD IT.

A communication from a prominent Reformer in Thurlow, which appears in another column, shows how the respectable members of that party regard the appointments recently made by the Ontario Government in this County. The feeling thus expressed is, to our knowledge, entertained by a very large portion of the Reform party in this part of the country, and will doubtless be practically exemplified at the next election.

AN INDEPENDENT OPINION.

The Madoc *Review* (independent) strongly condemns the manner in which recent Belleville appointments by the Ontario Government have been brought about;—

> "We are most decidedly opposed to the system pursued by the Ontario Government in these matters. It is almost a farce the way these appointments have been made—deputations gravely waiting on the Government to influence the appointment of matron, or to settle the vexed question as to whether Grit Brown or Grit Jones is to be turnkey."

Similar sentiments are entertained by many of Mr. Mowat's supporters, but party loyalty prevents their expression, save in private.

THE SYNDICATE'S INTENTIONS.

On our first page will be found a very interesting report of an interview held by the Montreal correspondent of the *Mail* with Mr. Duncan McIntyre, of the Pacific Railway Syndicate. The statements made by Mr. McIntyre are highly satisfactory, particularly as to the determination of himself and his associates to have as many as possible of the articles which they require manufactured in Canada.

A SORRY SPECTACLE.

The following, from the London *Free Press*, hits the mark exactly:—"It is a somewhat pitiable spectacle to see what has been called a great party reduced to the sad necessity of basing its future success upon the death or removal of those whom it has failed to depreciate either as regards their public policy or private character. A greater come-down for a so-called party has never been more apparent."

Alexander the Great

wept because there were no more worlds to conquer, but the proprietors of Dr. Pierce's Family Medicines who have found it necessary to establish a branch of the World's Dispensary at London, England, in order to supply from that great commercial emporium these remedial blessings to foreign countries, where they are largely in demand, do not share the great conqueror's sentiments, as their conquests are of disease and have made happy not only the conqueror but the people who employ them. Dr. Pierce's Golden Medical Discovery cures all blood and skin diseases, scrofulous affections, swellings and internal soreness. Dr. Pierce's Pellets are the little giant cathartic; Dr. Pierce's Favorite Prescription—woman's tonic and nervine—Dr. Pierce's Extract of Smart-Weed, the great remedy for colds and bowel affections as diarrhœa, dysentery and flux. World's Dispensary Medical Association, proprietors, Buffalo and London

The Lips We Love to Press

inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

News Condensed.

—Fall wheat in the Kingston district looks remarkably well.

—Disastrous floods are reported in Illinois and Wisconsin.

—Recruiting is going on to fill one hundred vacancies in the North-West Mounted Police.

—Sir John Macdonald will leave on a trip South in a few days as soon as his health will permit.

—Further murders of captains of trading vessels by the natives of the Solomon Islands are reported.

—It is reported at Constantinople that the assassins of the late Sultan Abdul Aziz have been discovered.

—The Line of the Toronto & Ottawa Railway will probably be surveyed from end to end by the first of July.

—A collision has occurred in the China seas between a British gunboat and a Chinese steamer, in which the latter was sunk.

—A large number of additional men are wanted at the Mississippi Iron Mine, on the line of the Kingston and Pembroke Railway.

—The Napanee glass works are being pushed forward, and will be in a position to manufacture window glass by the 1st of September.

—On the 20th inst., Thos. Skates, a section man on the Grand Trunk Railway, Montreal, was accidentally killed by a shot from his gun.

—The Basuto Chief Lerothodi has signified his willingness to surrender himself to the Cape authorities, and to order his people to lay down their arms.

—Mr. T. A. Brown, of Collingwood, has been awarded a contract by the Department of the Interior for supplying one hundred cows for the Indian industrial farm in the North-West.

—The British ambassador at Constantinople urges the sending of assistance to the sufferers at Chio. Another shock of earthquake has occurred in the island, and the panic has been renewed.

—Constantinople advices state that military preparations are unabated. It is believed they are connected with the fact that Ali Pasha is organizing a general movement against the Porte in Albania.

—A party of English tenant farmers for the North-West, between sixty and seventy persons, arrived at Montreal on the 19th. They were in charge of Mr. L. O. Armstrong, of Emerson, Manitoba, and possess a considerable amount of capital.

—Confirmatory reports respecting the surrender of Sitting Bull's Indians have reached the Department of the Interior. The chief himself still holds out with a small following, but is expected to surrender shortly, as a result of Col. Irvine's recent visit to his camp.

—A large eel was taken from the water pipes at Mason & Risch's piano factory, Toronto, on the 19th. The engine and machinery were brought to a standstill for several hours, and considerable force had to be used before his eelship could be dislodged from his position.

—A new industry fast attaining popularity in Winnipeg is the evaporating of vegetables. A factory has just been established in Morris. It is advertising for 70,000 bushels of vegetables for manufacture. The growth of amber sugar-cane is also being advocated with a view to the manufacture of syrup and sugar

—Mr. E. B. Eddy, the enterprising manufacturer of Hull, has entered into a contract with the Brush Electric Light Company, of Cleveland, Ohio, for the lighting of his saw mills, factories and premises by electricity. Forty electric lights are to be placed in position. The expense will be about $10,000.

—The Hon. J. C. Pope's Mission as Minister of Marine and Fisheries to Washington a week ago was to enquire into the culture and propagation of oysters at Baltimore, with a view to improve the crop in Canadian waters, for which purpose a sum was set aside at the late session of Parliament. Mr. J. W. Whitcher the Minister in his enquiries.

—A New York despatch says: Henry Elmore, produce merchant, appeared yesterday as defendent in a suit for abandonment instituted by his reputed wife, Louise C. Elmore, *nee* Lartham. Mrs. Elmore declared that she was a native of Blackheath, England, and came to Belleville, Canada, with her brother eight years ago, where she resided two years in the family of Mr. Stewart. Elmore denies that he ever married her.

Monthly Report of the Woman's Christian Association.

The most important item to be recorded in the monthly report of February and March is the grant of $300 given by the City Council to the Woman's Christian Association on the 26th March. Although the applications for assistance have been very numerous during these cold and inclement months, yet little aid has been given, the funds of the Association being so low; yet still the Ward visitors have been faithful to their work, and much has been done by them, even though they have so often been obliged to go to their Wards empty handed. However, in February $24.45 was expended by the ladies for their Wards—no money or orders ever being given, but the money expended by the lady visitors themselves for the destitute of their Wards—and in March $22.50

At the Home all is going on without change. Two of the inmates are still very ill, and have been all winter. No new inmates have been received since last report, except one, who remained only for a few weeks as assistant to the matron. The amount expended on the Home for February was as follows:—Supply $24; Fuel $17.45; Home Reg. Com. $3.90; Matron's salary $8; rent $7; printing reports &c. $23.50; total for February, $83.85. For the month of March—Supply $32 79; Home reg. com. $1.55; fuel $4.95; matron's salary $8; rent $7: stationery $1; total for March, $77.

In March the finances of the Association being very low, it was thought that something should be done whereby to raise some money. So 10c readings were organized to be held every fortnight. Two of those entertainments have already taken place which resulted in about $30.00 each. After the grant from Council was received, it was thought better that the proceeds of these evenings should go to the Building Fund of the new Home and Hospital. So all who are interested in our future welfare, should give us a helping hand while they can do so easily. The Building Committee deeply regret there is nothing yet decided to report of the new building, but still hope to make at least a good beginning towards the Home and Hospital this summer. Could the public generally realize only half how necessary a hospital is to the city, they would hardly fail to put their shoulder to the wheel and help those who are so anxious to help themselves. We have the following gifts and contributions to thank our kind friends for:—

Miss Holden, clothing; Mrs Lake, a quilt; Mrs. Harrison, Bridgewater, a comforter; Mr. Graham, a basket of meat; J. McCreary, half doz. bread tickets; Mr. Edwards, 3½ lbs. butter; Mrs. Badgeley, apples; Mrs. Philpott, flour and meat; Mrs. Carman, apples; a friend, curtains for the "Home"; Mr. Starling, barrel of oatmeal; Dr. Burdett, 30 lbs. beef; Miss Starling, clothing; Mrs. Geo. Hanwell, clothing; Mrs. P. Hambly, wine; Mrs. Rous, clothing; Mrs. J. Flint, clothing; Miss Usborne, clothing; Mrs. Clarke, clothing; Mrs. Denmark, clothing; Mrs. R. Davy, Clothing; Miss Bell, clothing; Miss Nulty, clothing; Miss Pike, clothing; Dr. Tracy, for free attendance at the "Home"; Mrs. W. Docter, clothing; Mrs. Crothers, buns and cakes; Rev. Mrs. McLean, clothing; Rev. Mrs. Clarke, clothing; Miss Ross, clothing; Mrs. M. Jelltet. clothing; Mrs. W. Hamilton, clothing; Mrs. Herchimer, clothing; Mrs. Reid, milk; Mrs. Brenton, 2 jars fruit; Miss Holden, clothing; Mrs. Tannahill, clothing; a friend $1; Miss Michell, $2; Mrs. Murphy, 25c, Mrs. Taugher, 10c; a friend, 25c; Mrs. J. G. Robinson, 50c; Dr. Jacques, $3; Mrs. McLean $1; Mrs. F. Lingham, 50c; Mrs. Cummings, 50c; Mrs. Johnson, 25c; Mrs. G. French, 25c; Mrs. Sills, 35c; Mrs McInnis, 25c; Mrs. Logate, 25c; Mrs. Vanalien, 50c; Mrs. McIntosh, 50c; a friend, 25c; Miss Knight, 10c; Mrs. Albert Lee, 50c; Mrs. N. Mann, 50c.

The Association now numbers 216, and is ever on the increase.

G. G. USBORNE,
Sec. W. C. A.

April 1st, 1881.

The Canadian Pacific.

Mr. Duncan McIntyre, of the Pacific Railway Syndicate, in conversation with a *Witness* reporter remarked that the business of the Syndicate had been highly successful. The work of organizing for emigration would not be felt quite so much this year as it will be next year, the season having been so far advanced before the completion of the contract that arrangements with steamship companies could not be made on time.

"But you do not mean to say that there will be no emigration to your lands this season?"

"By no means. There will be a very heavy emigration, but the great stream will commence next year. We have sold, for instance, in the Red River districts some 300,000 acres at the uniform price, $2.50."

"Then you make that the average price of the lands?"

"Yes. That is the price for all, without reservation."

"What about the emigration from Great Britain this year?"

"It is very heavy. The vessel that I came out in was compelled to leave 100 emigrants behind in London and 200 in Queenstown, for want of room."

"The English farmers are commencing to feel the competition of our farm produce?"

"Yes. The cattle trade especially is making an impression, and if we can show farmers in the old country the capacity which we believe our lands have for that branch of farm industry there will be no lack of emigration to our lands."

"Have you any supplies coming this winter?"

"Yes; some are on the way at present, such as we cannot get here. We have, however, ordered a large quantity of rolling stock in Canada."

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist——— ———and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

THE SECRET OF HEALTH.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of HERRICK'S SUGAR COATED VEGETABLE PILLS, and you are safe. They never fail in any case of sickness or inward pain. Try them.

—Mr. Vennor predicts cold rains, possibly with sleet or snow, at the latter portion of the week, followed by warm and sultry weather during the early part of the last week of the month. The month will end cool and wet, with probably a snow-fall.

BOARD.

BOARD, and two eligible rooms, to be had in a private family. Address M I. H., Box 225, Belleville. 338d5t

GEO. RITCHIE & CO.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health. Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

Wanted,

A GOOD active boy, for general work in a small family. Apply at this office.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallible cure, it was used for similar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

GLASS JUGS!

WE have a larger and better stock of Glass Pitchers now on hand than ever before. Prices are very low, such as we know will meet the views of any reasonable person.

R. TRACY, M. D.

Belleville, April 6, 1881. 325d&wtf

THE CHEAPEST

BLACK SILKS

IN THE CITY.

—:o:—

WE have just received 6 pieces more of our celebrated Black Silk at $1.29 per yard.

It is decidedly the best value of Silk in the Dominion of Canada—soft in make, so that it will not easily crease or cut. We consider it fully as good as any $2.00 silk that is sold in the city. We have also

A CHEAPER SILK!

6 pieces, which we offer at $1.03 per yard. This is what is usually sold at $1.50 per yard. These classes of Silks cannot be purchased elsewhere as cheap as we offer them.

CARPETS!

We have also received several bales of UNION CARPETS in first-class patterns at medium prices.

Our assortment of carpetings is one of the largest in the city. We have some specially low lines in Tapestries.

GLASGOW WAREHOUSE.

Local Notices.

Notices under this head [illegible]cts. a line each insertion. After six insertions 5 cts. a line.

GREAT AUCTION SALE OF JEWELRY, &c.—A very large consignment of Bankrupt Stock is now being sold off at auction at the store formerly occupied by Bartman & Sintzel, opposite the Anglo-American Hotel. The stock is a valuable one, consisting of Gold and Silver watches, Clocks, Plated Ware, Cutlery and Spoons, Gold and Roll-plated Jewelry, Fancy Goods, Writing Desks, and many other lines of goods, all of which are being sold at remarkably low prices. While the sale lasts it will be a rare opportunity for making bargains in the classes of goods mentioned.

Daily Intelligencer.

BELLEVILLE, THURSDAY, APRIL 21.

5 O'CLOCK EDITION.

City and Vicinity.

THE new road-scraper was being tested this afternoon.

A TRAMP and a drunk shared the cells between them last night.

MR. H. HODGSON has arrived in town for the summer. He has been in England all winter.

GAY'S last poem:

If we don't get rain
We can't get any grain.

COL. PRINCE, U. S. Consul, left town last night for Albany, N. Y., on business connected with his department.

SEVERAL people seem to think that the best place to locate the new fire station would be opposite the residence of Hon. L. Wallbridge.

AMMONIA water applied to flower pots once a week will drive out the worms. An ounce of ammonia in a gallon of warm water is the proper proportion.

A TYPOGRAPHICAL error occurred in the list of the Bay of Quinte Yacht Club, published yesterday, the length of the *Nora* being given as 37 feet 6 in. instead of 57 feet 6 in.

HON. L. WALLBRIDGE, Q.C., has been attending the assizes at Napanee, where he had several cases. Mr. Wallbridge has not missed a single assizes at Napanee for the past ten years.

THE carpenter work of the lighthouse is now finished. The lantern has been placed in position, but has not yet been glazed or properly adjusted. The top of the lantern is just 44 feet from the water.

THE County Attorney took offence at a ruling of the Police Magistrate yesterday afternoon, in the child-beating case, and incontinently left the Court room—in a state of high displeasure, to say the least of it.

THE sacred concert in the M. E. Tabernacle is the only thing in the way of entertainment before the public for the remainders of the week. Judging from the programme it will be well worthy of liberal patronage.

OUR friend across the way suggests that we tell the story of the Shrievalty in so sad a tone that angels start from glory and give a groan. We have made people who are not angels in glory groan also. The *Ontario* man is not an angel.

THE nomination for the vacant reeveship of Trenton took place at noon on Tuesday. There a number of parties nominated, but many of them resigned leaving Messrs. Gilmour and L. U. C. Titus, to contest the election, which takes place next Tuesday.

The Cricket Club will meet for practice on the old ground, opposite the residence of John Bell, Esq., to-morrow afternoon at 1:30 sharp. As the club expect to play a match with the Peterborough Club within a few weeks, there should be a good attendance.

THIS week is Passover Week, and our Jewish friends are trying hard to make their "Matzoth," or passover bread, palatable. We were yesterday shown a cake of this unleavened bread—as thin as cardboard, and not less dry, hard and tasteless. One might as well try to make a meal from bread made of sawdust.

AN old man named Reddick, who is paralyzed in one of his legs, fell down the back stairs of Gibson's saloon yesterday afternoon, and lay for some time at the bottom completely stunned. He was carried into the house and revived shortly after, but his system received a shock from which it will take some time to fully recover.

POLICE COURT.—John Dorsey, a drunk, was the only individual before the Police Magistrate this morning. He was discharged.

A COUPLE of Belleville sportsmen went duck shooting on Good Friday. They opened up navigation for about half a mile, shoved their skiff along the ice and one broke through up to his shoulders in doing so, and after various other dangerous exploits they succeeded in shooting one musk-rat—which they could not secure.

WEATHER PROBABILITIES. — Toronto, April 21.—Lakes and St. Lawrence, light to moderate winds, fine warm weather.

PETERBOROUGH HOSPITALITY.—The Oddfellow's Band have been invited by the Fire Brigade Band of Peterborough to be their guests during the visit of the Oddfellows to Peterborough on the 26th inst. The invitation has, we believe, been accepted.

UTICA HOP MARKET.—The transactions in this market for the week have been very slender. They comprise purchases of 72 bales at 18@23c. the latter being choice goods. Sales amount to 100 bales ranging from 21½ to 24c.

A DOUBTFUL COMPLIMENT.—A Chicago gentleman and a Bellevillian were out walking yesterday afternoon. Said the Chicago gentleman: "I notice a great resemblance in one respect, between Belleville and some of the larger American cities." "Indeed!" said the Bellevillian, highly gratified; "in what respect?" "The dust," said the Chicagoan, laconically.

ST. GEORGE'S DAY.—As the anniversary of St. George's Day falls on Saturday this year, the celebration will be deferred. On Sunday afternoon the members of the St. George's Society and their friends will proceed to Christ Church, where an appropriate sermon will be preached by the Rev. Dr. Clarke, Chaplain of the Society. The annual dinner will take place on the following evening at the Dafoe House. The advertisement contains particulars.

AN INVITATION.—The Peterborough *Review* says:—"We understand that the members of the Fire Brigade Band are to invite the members of the Oddfellow's Band, of Belleville, to partake of their hospitality on the day of their excursion to Peterborough, on the 26th inst. We have no doubt 'our boys' will do the best they can to entertain their visitors in a proper manner, and send them away with golden opinions of Peterborough and its band."

THE BISHOP STRACHAN SCHOOL.—We have received the prospectus of this well-known and excellent institution for the higher education of young ladies which is established at Wykeham Hall, College Avenue, Toronto. Under the direction of the Lady Principal, Miss Grier, the institution is evidently progressing, and easily maintains its position in the foremost rank of similar institutions in the Dominion. Judging from the prospectus, young ladies may here obtain a thorough grounding in the English branches, and acquire "all the accomplishments" as well. We notice among the list of medallists of past years the name of a young Belleville lady, Miss Grace Ponton.

COMPLIMENTARY SUPPER.—Messrs. I. B. Graham and W. R. Barber being about to leave Belleville for Montreal, where they intend establishing a large millinery business, a supper was given them in the St. George's restaurant last night by a few of their friends. About sixteen were present altogether. The capital supper furnished by Mr. Sterling having been partaken of, the remainder of the evening was spent in speech-making. Every one present expressed his high opinion of the two guests of the evening and the regret felt at their departure, and wished them unlimited success in the new field in which they were about to exercise their business talents. The company broke up about midnight.

LITTELL'S LIVING AGE.—The number of *The Living Age* for the weeks ending 9th and 16th April respectively, contain the following articles: The Unity of Nature, by the Duke of Argyll, and Guizot in Private Life, *Contemporary*; Folgore da San Gemignana, *Fortnightly*; Autumn Wanderings *Cornhill*; Portia, *Blackwood*; Byron, *Macmillan*; Quakerism in Ireland, *Temple Bar*; Spider Showers, *Chambers' Journal*; A Turkish Madhouse, *Globe*; With Parnell at Victor Hugo's, *Pall Mall*; Movements of Plants, *Nature*; with instalments of "The Freres," "Visited on the Children," the conclusion of "Don John," and the usual amount of poetry. A new volume begins with the month. For fifty-two numbers of sixty-four large pages each (or more than 3,300 pages a year), the subscription price ($8) is low; while for $10.50 the publishers offer to send any one of the American $4 monthlies or weeklies with *The Living Age* for a year both postpaid. Littell & Co., Boston, are the publishers.

THE RIVALS.—This company, who are to give a concert in the City Hall on the evening of the 27th inst., for the benefit of No. 1 Company of the 15th Battalion, have given some performances in Toronto, where they were received with much favor. The *Globe* says of them:—"Mr. Henry Singerhoff was the violinist of the party. He has considerably facility of execution, but his style is exaggerated, and his tone, while fine, lacks in body. Madame Schiller fairly captivated the audience by her magnificent performance on the flute. She has a beautiful tone, and her execution is brilliant and refined. Mr. Hutchins, the cornetist, also brought down the house by his rendering of Arban's 'Caprice' and Hartmann's 'Lizzie Polka.' His tone is not all that could be desired, and his execution is not of the most refined character, but it certainly is brilliant, clean, and neat. Miss Emerson, the vocal soloist, fairly shared the honors of the evening with the instrumental members. She has a rich, sympathetic soprano voice, of great fullness, but somewhat lacking in power. Mr. W. E. Louis was the accompanist, and in addition to his duties as such he contributed very acceptably a piano solo. Plan at Reynolds', where seats can be secured.

THE ORGAN RECITAL.—A large audience gathered in Christ Church last night, on the occasion of the organ recital and sacred concert by Mr. Torrington, organist of the Metropolitan Church, Toronto. Under the skilful touch of Mr. Torrington, the beauties of the fine instrument were brought out in a manner entirely satisfactory to the auditors. The various numbers were interpreted in a masterly manner by the organist, and the solos which were rendered by the ladies were very ably given. The first of these, a soprano solo from "Lauda Sion," was sung by Miss Sisson, whose tasteful rendition of the beautiful theme was very pleasing. Miss Ida Clarke, who sang "Consider the Lilies," acquitted herself with much credit, as also did Miss Maud Bull, who sang "Rest in the Lord." Mrs. Caldecott, of Toronto, who rendered a difficult soprano solo from "Judith," sang with much grace and effect, her sweet voice being under perfect control, and in a second selection, by request, she was also highly satisfactory. Mr. Stanistreet played the accompaniment for Miss Clarke, and Mr. Wolever accompanied Miss Bull. The concert was on the whole a notable success and its financial result will add a considerable sum to the organ fund of the church.

HENNESSEY'S speciality for the coming week will be a good, useful all wool Halifax Tweed Suit (coat pants and vest) complete, well lined and trimmed for $6.50. The best bargains in the city.—JAMES HENNESSY.

ONE of the large elm trees on Bridge St., near the residence of Morgan Jellett, Esq., was cut down this afternoon under the superintendence of the Street Surveyor. It has been threatening to fall for some months past, the side towards Mr. Jellett's house having become rotten. A good deal of difficulty was experienced in getting it down safely, but, by means of ropes and tackle, it was made to fall directly in the street, and did not hurt anything nor anybody.

Police Court.

(Before T. HOLDEN, Esq., P. M.)

WEDNESDAY, April 20 1881.

CHILD-BEATING.

The case of Mrs. Brown, charged with maltreating the girl Annie Vanalstine, in her employ, was resumed in the afternoon.

Chief McKinnon and Mr. Geo. Robertson were examined. The latter witness testified that the child had come to his house on two occasions. On one occasion he had examined her head and found lumps on it, as if caused by blows.

After a long dispute between the counsel as to the question whether Mrs. Brown's evidence should be admissable, the Magistrate decided that she should be heard, and she was accordingly called. She testified, in substance, as follows: Annie Vanalstine has been with me as a servant for about three months. On the evening of Saturday, the 2nd of April, I told the girl to get enough kindling wood to last over Sunday. She told me that night that she had done so. On Sunday morning she told me that it was all gone, and I boxed her ears. Before doing so I looked out of the window and saw that there were boards which she might have taken. I then put her in the closet, kept her there for about three minutes, and then sent her down for some kindling. After she was gone a short time I heard her scream. When she returned with the kindling her eye was swelled. I asked her if she had hurt her eye in splitting the kindling, and she said she had. I never struck her with the poker. When I punished her I always slapped her with my open hand. I punished her chiefly for telling falsehoods. On one occasion she fell down stairs with an armful of wood. This was a few days before she was at Mr. Robertson's. The bruises which have been mentioned she got in falling down stairs. She was at Robertson's on the Saturday previous to the Sunday on which I whipped her.

Rev. Jos. Brown testified that when he brought the child away from her home her mother told him to punish her if she did wrong.

The prisoner was convicted of assault and battery, and was fined $5.00 and costs.

Marine Notes.

The steamer *Varuna* which is at Trenton, will probably be down on Saturday. The *Alexandria*, which wintered at Picton, will not be out before another week.

THE HERO.—The steamer *Hero* is to take the place of the *Hastings* on the route between Belleville and Kingston this season. She has been refitted at Kingston at an expense of over $4,000. It is probable that she will be at Belleville on Saturday night. The *Hastings* has been repaired and refitted at an expense of $2,000 and will be used during the coming season almost entirely for excursions. The *Hero* is a much faster boat than the *Hastings*, making the trip from Belleville to Kingston in an hour and a half less than the *Hastings'* average time.

All the bay steamers will stop this season at Messrs. H. B. Rathbun & Sons' wharf, which is under the management of Mr. W. H. Campbell, whose experience and ability in the forwarding business are too well known to need commendation. The new storehouse is rapidly approaching completion, and will be found ample for the requirements of the trade.

The steamer *Armenia* made her first trip to Trenton to-day.

The schooner *Belle Case* is loading lumber at Rathbun's dock for Picton.

The *Mail* says:—Not satisfied with forcing the opening grain rate down to two cents from this port, shippers are holding off in hopes of another decline, but there is just a chance that they may overstep the mark, and find themselves the losers in the end. Last year they drove the vessels to the upper lakes, and in some cases paid heavily for it in the fall. This year they are pursuing the same policy.

A despatch from Part Dalhousie says that Mr. Ellis, superintendent, announces his intention of letting water in the canal on Saturday next, unless special orders to the contrary are received from Ottawa.

The *Utica* is where she has been lying all winter. An attempt will shortly be made to take her out of West Lake, but it will be attended with considerable difficulty, as the water is lower than when she went in.

SUMMER STEAM TRAVEL.—The Napanee *Standard* says:—"The Desoronto Navigation Company (limited) have issued their time table for the season of 1881 and the *Pilgrim* made the first entry to the harbor last Thursday. She will run between Napanee and Desoronto as follows: Leave Napanee at 6 a. m., 9 a. m., and 1:15 p. m. or after the arrival of the midday express, and at 4:45. Leave Desoronto at 7:30 a. m., 11 a. m., 3:30 p.m. and 5:45 p. m. The *Deseronto* will be the steamer for the Picton, Desoronto and Belleville line. She will leave Picton at 6 a. m., calling at all intermediate ports and arrive in Trenton at 11 a. m.; leaving Trenton at 1 p. m. she will reach Picton at 7:30 p. m., calling at all way ports as on her up trip. The company have shown their appreciation of an urgent public want arising out of the increasing popularity of the Thousand Islands region by establishing this season the Thousand Islands Line, the chief objective points being Desoronto, Kingston and Ogdensburgh. The steamer *Armenia* has been placed on this route. On Tuesdays, Thursdays and Saturdays she will leave Desoronto at 7 a. m. and calling at Picton, Bath, Amherst Island, Kingston, Gananoque, Clayton and Alexandria Bay, (U.S.), Brockville and Prescott, and arriving at Ogdensburg the same evening, will leave Ogdensburg on Mondays, Wednesdays and Fridays at 9 a. m., calling at the same places in reversed order, arrive at Desoronto the same evening. This will be an immense convenience to Napaneeans. Parties wishing to spend a day or two amongst the Thousand Islands can leave Napanee by steamer *Pilgrim* on her first trip, take the *Armenia*, and pass through the marvellous and unrivalled scenery of the St. Lawrence by daylight. The steamers of this company are staunch, well equipped and officered with efficient and obliging masters. Never before have bay and river navigation been so efficiently served as by the present disposition of the steamers of this company, and a most liberal patronage of the people should and doubtless will, generously reward the intelligent and enterprising efforts of the Desoronto Navigation Company, to foresee and provide for the wants of the travelling and pleasure seeking public. Further information may be gathered by inspection of the poster containing the time-tables.

DR. LLOYD, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of ALLAN'S LUNG BALSAM, I have no hesitancy in stating that it was by the use of your LUNG BALSAM that I am now alive and enjoying good health.

'Hail bounteous, beauteous, gladsome Spring!' – this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

MORNING DESPATCHES

AMERICAN.

LARGE EMIGRATION.

NEW YORK, April 21.—Kasson, Minister to Austria, and Barca, Spanish Minister, arrived from Europe yesterday.

20,000 immigrants arrived during the past eight days. This beats all previous records.

HEAVY DAMAGES.

Flora Bencke, a child bitten by a monkey, recovered $35,000 damages from the proprietors of the museum.

WASHINGTON SPECIALS.

The *Times* says: Elmer was nominated 2nd Asst. P. M. General in consequence of scandal connected with Brady's administration of the Star route service. A change has been contemplated for some time past by the President and Postmaster General. Upon assuming the charge of the Post Office department, James instituted an investigation of the methods by which the Star service had been extended and cost increased. The investigation has been conducted without the knowledge of Brady and those connected with his office. The facts developed are so damaging that when laid before the President, he directed James to demand of Brady his resignation immediately. James took up the investigation where the House Committee stopped, and obtained evidence that will establish beyond question the fraudulent and corrupt character of the Star route management for the past four years, and which will confirm the suspicions that certain prominent officers had not only guilty knowledge of the methods practiced, but were beneficiaries of a corruption fund freely used to further them. It is believed that at least $290,000 was distributed among the Star route group during the last fiscal year.

AFTERNOON DISPATCHES.

BEACONSFIELD'S WISHES AS TO HIS BURIAL.

LONDON, April 21.—The following extra with regard to Beaconsfield's will made in 1878, has been submitted to the Queen, but which may be disregarded: "I desire and direct that I may be buried in the same vault and church yard at Hughenden in which the remains of my late dear wife, Mary Ann Disraeli, in her own right Viscountess Beaconsfield were placed, and that my funeral may be conducted with the same simplicity as hers." "BEACONSFIELD."

THE LATE EARL'S BODY.

The body lies in the room where he died, and where he usually transacted business. The couch on which he died has been removed, but the table remains. In the centre of the room is a carpeting of black cloth, upon which are trestles draped in black to support the coffin, which is six feet long. The body is shrouded in white satin. The winding-sheet and lesser linings are also of white satin. His head rests on a frilled satin pillow; there is hardly any alteration perceptible in the face, which has not assumed the ordinary pallor of death; the curl on the forehead remains; his hair has only a few streaks of gray; and his hands are crossed above the winding sheet. During the night wax tapers burn in the room. His face has not the slightest expression of pain, but wears the expression of a placid happy sleep. His eyes are closed and mouth. His smiling face looks many years younger than in the later years of his life; opportunity will probably be afforded to private political and literary friends to view the corpse.

THE CABINET.

LONDON, April 21.—It is rumored that the Earl of Spencer will leave the Cabinet, and that Lord Derby will succeed him.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4aod&wly

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints thatahave been stiff for years.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrotula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

FOR ASTHMA AND PHTHISIC.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

Hagyard's Pectoral Balsam; a few doses will relieve the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

'THEY ALL DO IT.' — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

DIED,

At Roslin on the 19th April, JESSIE HELEN GORDON MCRAE, native of Ross shire, Scotland, beloved wife of the Rev. Donald Kelso, aged 30 years.

Commercial.

BELLEVILLE MARKETS

INTELLIGENCER OFFICE,
Belleville, April 21, 1881.

There are but few features of interest to note in the local grain and provision markets this week, prices being generally steady, with a downward tendency in most articles.

Wheat is being received by car from Peterborough and Toronto, at $1.20 per bushel for the best grades for milling purposes.

Barley is steady at 60 to 70c., but Rye has advanced 3c, and is firm at 85c to 88c.

Other grains are in moderate supply and without change in price.

Pork has further declined during the last two days, and now sells at from $8 to $8.50.

Butter is lower. No tub is being received, and the price is nominal at 15c to 18c. Rolls for family use bring from 18c to 25c, the latter for choice from makers whose reputation is established.

Eggs are also lower. Buyers pay 12c for export, whilst small lots range up to 10c.

Lard commands from 11c to 13c.

Potatoes are in demand for export at from 50c. to 58c. per bag. Messrs. Downey & Preston have so far shipped 22 cars, or 9,900 bushels, which go chiefly to Cleveland.

Hay is higher at $10 to $12 per ton.

A fair amount of business is doing, and prices of other articles are without change.

SPECIAL NOTICE TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation,

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired. Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

BY MRS. HARRIET LEWIS.
Author of "The Double Life," "Tressilian Court," &c., &c.

He was thinking of her with all the ardor of a young lover, when she fell asleep. She was utterly exhausted, and slept so profoundly and with such stillness that one might have have thought her dead.

"She is worn out," murmured Sir Victor. "What must she not have suffered, to have attempted flight on a night like this!"

He bent over her, with a rush of tender emotion, as if to kiss her pure brow, but withdrew himself quickly, murmuring:

"She shall be as sacred to me as a sister while she lies so helpless. But on the journey to London, I will ask her to be my wife. And if she will but give the right will defend her from a thousand foes!"

He drove on, with happy musings over the wild, rough road. Their progress was necessarily slow, the horse being well-nigh exhausted, and it was over two hours later before the vehicle entered the streets of Wimborn Minster. Tessa awakened as they jolted over the pavements. Sir Victor drove to the station, which was opened, warmed and lighted, and sending his horse in charge of a porter to an inn, conducted Tessa to a waiting-room.

CHAPTER XXXIX.

SWEEPSNG ON—TO WHAT DESTINY?

In the gray of the cold January dawn, Tessa Holm and Sir Victer Cheswick, seated in a first-class compartment of an express train, steamed out of the station at Wimborn Minster, and were borne swiftly on their way to London. The snow was still falling like a white mist, veiling the landscape, and the air was keen and cold, but the travellers were supplied with hot-water cans and travelling rugs, and were consequently comfortable. Sir Victor had secured the compartment to themselves, and Tessa's spirits began to rise as they sped onward over the serpent-like line through the gray morning shadows and the falling mist of snow.

"I begin to breate freely at last!" she murmured, leaning back against her cushions. "I was haunted by a fear, all the time that we waited in the station, that my father would burst into the waiting-room and seize upon me, compelling me to return to the Grange with him."

"You will reach London in safety, Miss Holm and need be haunted by fear no longer," said Sir Victor, who had settled himself in a seat opposite Tessa upon the same side of the coach, and invested his head in a warm travelling cap. "Whatever might have been the will of Capt. Holm, his power cannot now avail to harm or hinder you. He will discover your flight, let us say, at nine o'clock, the breakfast hour at the Grange. He will be compelled to eat his breakfast before venturing out on this terrible morning. The roads are nearly blockaded with snow, and it will take him three hours or more to traverse the thirteen miles to Wimborn Minster. The hour will then be past twelve, by which time, if no accident happens to us, you will be safely in your guardian's house at Kentish Town."

Tessa smiled brightly. Then her gray eyes darkened with a sudden feeling, and her sensitive mouth quivered with emotion.

"And my safety—my life even—I owe to you, Sir Victor," she said tremulously. "I can never repay the debt I owe you. It seems as if you were a sort of guardian angel to me," and a smile shone through her tears, and a vivid blush stained her clear cheecks. "You have played the part of a special providence to me in all our meetings. At our first meeting, you saved me from insult. At our second meeting, and her blush deepened, "you warned me of a yet worse peril; and at our third meeting you saved me from death! I thank you, Sir Victor, with all my soul!"

As she flashed a grateful look at him from her dewy eyes, she encountered an answeriug glance so tender, so full of love, that her heart gave a great frightened bound, and she became pale, and sat quite still, her pulse fluttering with a vague alarm.

In an instant Sir Tictor had thrown aside his travelling rug, and had sprang to a seat beside Tessa, and had seized her hand in his.

"Tessa," he cried, his passionate voice thrilling her soul. "Perhaps I ought not to speak these words while you are so helpless and alone; yet, if you would look kindly upon me, they might lighten even your desolation and loneliness. You have said that I seemed to you a special providence on each occasion of our meeting. I should like to guard you and shield you through life. I should like to interpose myself between you and every sorrow, every danger. Do I seem to speak too soon? Love is not always a growth of years. I never loved in all my life till I met the glance of your sweet eyes, and in that first moment of our meeting, I loved you as men love for a lifetime. Tessa, will you be mine—life of my life, soul of my soul!"

Tessa trembled. Her face was downcast, and she did not look up.

"You—you have known me so short a time, Sir Victor," she faltered.

"Did I need years to teach me your purity, your truthfulness, your noble soul?" exclaimed the young Baronet, in an impassioned manner.

"Your nature is shown in every feature of your glorious face. Tessa, years of study and companionship may fail to kindle the electric spark which one glance from a stranger's eyes may strike upon the instant. I know that you are my kindred soul, that we were made for each other. You do not love another, Tessa?" and his voice took a quick note of alarm.

"No, no," breathed Tessa lowly.

"And you could love me Tess?"

The girl did not answer. But the young Baronet, gently upraising her bowed head, met a gaze of such sweet confusion, and beheld her face so transfigured with tenderness and love, that he felt himself answered. He knew that he did not sue in vain.

He gathered her to his breast, and pressed upon her lips the solemn kiss of betrothal.

"Mine! mine!" he murmured, in a voice of solemn joy. "And may God deal with me as I deal with you, my own darling!"

Tessa's head sank to his shoulder, and a delicious trance fell upon the betrothed young pair. They forgot that the young girl was a fugitive, that perils and enemies environed her path. They forgot the cold and the snow of the winter morning, and knew only that they loved.

Tessa was the first to remember. She started up from the young Baronet's embrace, crying, in a startled voice;

"My father! I had forgotten him, Sir Victor. He will never allow me to marry you; and if he should consent to our marriage, he is not a man whom you can introduce to your noble relatives."

TO BE CNNTINUED.

MANHOOD RESTORED.

A victim of early imprudence, causing nervous debility, premature decay, etc., having tried in vain every known remedy, has discovered a simple means of self-cure, which he will send free to his fellow sufferers. Address J. H. REEVES, 3 Chatham St. New York. 135eod&w1y

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yie'd to its marvellous powers. It will *positively cure* and that where everyhing else has failed. Satisfiy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co., a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-rowers at Peaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

MEDICINE CHEST IN ITSELF
PAIN-KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL USE.

SUBSTITUTES!

☞The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer**, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer**; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer**, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

FOR ACUTE AND CHRONIC DISEASES.
AND RESTORER OF THE NERVES & GENITAL ORGANS.
A. NORMAN, 4 QUEEN ST. EAST
TORONTO.

NORMAN'S

ACME ELECTRIC APPLIANCE.

—o—

THIS Electric Appliance is made of separate galvanic cells, connected with pliable wire, thus making a complete galvanic battery in belt form, which can be readily applied to any part of the body for curative purposes This appliance may be used so as to direct the full force of the united cells directly through any part of the body, either lengthwise or across; or it can be used along or around any part, so that each cell may impart its amount of power consecutively. In one case it is a constant, intense current, which can be increased to a point almost unbearable; in the other it is a constant, mild current, nearly imperceptible. Medical men and electricians will at once see the immense advantage of this appliance for diseases of the Sexual Organs, Nervous Debility, and all those diseases peculiar to young men, and affections of the womb in women. It is particularly adapted to cases where the nerves are lacerated and the organs sore, contracted, weak or relaxed A suspensory attachment is made to use with it where it is necessary. This appliance does not soil the underclothing like Pulvermacher's, and is much more powerful and beneficial, combining the best features of other belts without any of their disadvantages. It can be worn on any part of the body, either round the waist or down the back, or leg or arm, so that it can be used with advantage in all diseases where electricity is beneficial. [*See large Circulars.*] This appliance can be repaired at small cost, so that practically it is indestructible.

The price of the Acme Appliance is $10.00 to $15.00, according to power. The Suspensory Attachment $1.00 extra. Short Belts of the same construction are made, and may be had at the following prices: Back Belt $5.00 and $7.50; Body Belt $5.00 and $7.50; Leg Belt, $5.00; Arm Belt, $3.00; Head Belt $2.50; Chest Belt, $5.00 and $7.50.

These can be used in all the cases where the Belts of the same name are mentioned in large circulars.

The buckle end of the belt is a negative pole.

Consultation and large circular free.

A. NORMAN,
4 Queen Street East, Toronto.

SPRING, 1881.

GOLDEN GRIFFIN!

128, 130, and 132 King-Street East, Toronto.

Globe, Saturday, March 12th, 1881.

We beg to notify our numerous patrons and the general public that we are now in receipt of our new Spring Stock of Fine Woollens, consisting principally of English, Irish, Scotch, and Canadian Tweeds; English, Irish and Scotch Serges; French and English Worsteds; Fine West of England Black and Blue Broadcloths; Black and Blue Venetians, Doeskins, Cassimeres, etc., making in all the largest and most Complete Stock of the kind in Canada.

Our Clothing is without doubt quite equal, if not superior, to the best New York Clothing, for Style, Fit and Material; a proof of which is the large number of First Prizes awarded us at Toronto, Hamilton, and other Exhibitions during the past season.

Gentlemen requiring Fine Clothing will find it to their advantage to inspect our Stock before purchasing. Thanking our numerous friends for their patronage in the past, and soliciting a continuance of the same in the future,

We remain, respectfully yours,

PETLEY & COMPANY,

LADIES.

FOR HOUSE CLEANING!

Use Johnston's Kalsomine

Easily Applied! Beautiful Tints!

Will not crack or rub off the wall.

HENRY & JOHNSON'S
ARNICA AND OIL

LINIMENT

For Man and Beast.

The most perfect liniment ever compounded. Price 25 cts. and 50 cts.
For Sale Everywhere.

Cathartic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for **Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver,** and all other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Dorrington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NOLTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD
HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO
MITCHELL'S CANADIAN
HAIR RESTORER.

To THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher

Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.
MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.
MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede there, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

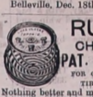
Train will leave Madoc for Belleville City at 8 a. m., arriving at 10 a. m. Returning will leave Belleville City for Madoc at 3:30 p. m., arriving at 5:30 p. m.

NOTE—Trains will be run by Belleville time which is 14 minutes slower than Montreal time.

T.S. DETLOR,
General Superintendent.
Belleville, Dec. 18th, 1880. 189d



RUPTURE!
CHAS. CLUTHE'S
PAT. SPIRAL TRUSS
FOR CURE OF RUPTURE. ENTIRELY NEW PRINCIPLE.

Nothing better and more substantial under the sun! If you are ruptured or deformed send for book on RUPTURE AND HUMAN FRAME, by Chas. Cluthe. Best information of a life-long study. Natural mechanical advantages; 18 years' material experience and best tools money can buy, made him perfect master of his profession. Will visit as follows. Come early Don't wait for the last hour.

Late of Hamilton. CHAS CLUTHE.
118½ King St. West, Toronto; Ont,

BELLEVILLE—At Anglo American Hotel, Thursday and Friday, March 10th and 11th.

PETERBOROUGH—At Huffman House, March 9th, with supply.

CHAS. CLUTHE.

ST. LAWRENCE HALL, MONTREAL

THIS Hotel has been recently retaken by Mr. HENRY HOGAN, the former proprietor, who has handsomely and appropriately decorated and renovated the interior, and completely refitted the whole of the apartments with new furniture. The Hotel is admirably situated, being in the very heart of the city, and contiguous to the General Post Office, the principal Banks, public buildings, law courts, commercial exchanges, railway and telegraph offices. 144d1yr

Advantages of Improved Stock.

The British market is the one on which the farmer has to depend for the disposal of all his surplus stock. A great deal of the stock raised in this country is consumed here, but not all of it. Great Britain, however, can take all that Canadian farmers will be likely to have for some time to come. Our trade with the United States can be but small, and will be principally in thorough bred animals for breeding purposes, because the Americans are also exporters to the British market. Our trade with Great Britain has all grown up within a few years. In 1873 not one animal was shipped from this country to Europe. In 1880 not less than 50,000 head of cattle and more than twice as many sheep were shipped—the most of these animals being raised in Ontario. For these cattle the Canadian farmers received not less than $5,500,000,—and this trade, one may say, has just commenced. What may its proportions not be in a few years? Whether the farmers of this section will take advantage of it or not to the fullest possible extent, they must decide for themselves. As the supply of good cattle increases the demand for inferior cattle must decrease. It is worse than useless to ship poor cattle to England. John Bull is somewhat fastidious about his beef; he wants a really first-class article, for which he is willing to pay, and will not use any other. Large sized, fine boned, well bred, and with meat of first class quality, is what the British beef-eater wants. Some of the above facts have been gleaned from the report of the agricultural commissioners; this report is a valuable one, and cannot fail to be of great benefit to the farmers of Canada; we give more extracts from the report this week. On the subject of "Improved Stock" the commissioners say;—"If a Canadian farmer were raising cattle for his own market alone, it would be only commonly prudent to keep none but improved stock, whether he looked to fattening a steer, or heifer, or now and then had occasion to turn a dairy cow into beef. But if he looks, as he must look, to the British market as his standard, he is with common cattle hopelessly behind, and while his wiser neighbors will be getting their $75 to $80, or even $100, for a good trade beast, he will be left to go a-begging to the local butcher to relieve him of his rubbish at the latter's own terms. It is painful to read the evidence of Mr. Britton and others in which they describe the difficulty of selecting even a few beasts fit for shipment, out of large numbers at fairs and other places, and to reflect upon the terrible loss of opportunities represented by the hundreds rejected."

"Nor is the direct pecuniary gain on a good grade beast, as compared with a 'scrub,' the only advantage the farmer receives by introducing improved stock. Everybody has heard stories written for a moral purpose, of the first reform in an uncleanly household being brought about by one of its youthful members being sent by his teacher to wash his face and hands at the school pump. It is not too much to say that the initial step towards really good, thrifty and profitable farming is to be found in the outlay of the first two or three dollars on the service of a thorough-bred bull. From that moment the farmer has something worth caring for, and which will respond to his care. It is not very satisfactory to read that forty-seven per cent of the farm buildings of Ontario are of an inferior character. But men that breed improved stock will find it unprofitable to keep them in straw yards, or in open sheds in the winter, or in draughty barns and byres, with the wind of heaven whistling about their flanks and converting their coats into imitations of the hedgehog or porcupine. Good stock will pay for good housing. They will pay for good feeding, too."

"The farmer begins to grow roots and coarse grains and feed his stuff to his own cattle when he raises his cattle with an object; and has stock worth caring for. Good feeding is the first necessity of good stock, and good stock means above everything good farming, with all that the phrase implies. It is true that the men of the past generation and some of the present, with a virgin soil to depend upon, have done very well with common stock. But the time has come when farming to be successful, must be carried on upon new methods, and under new conditions. Adventitious advantages must be depended upon no more. Skill, energy, a readiness to avail himself of every new idea worth utilizing, are the only reliance of a sensible man now-a-days; and the first thing a sensible man will do, if he has not done it already, will be to improve his stock."

Farm and Dairy News.

Cheese making is defined as an art, not acquired by the committing of rules or by deduction from a scientific method. It is a personal accomplishment, an individual acquisition, which others may, or may not, successfully imitate.

The prospect seems to be that the relative price of cheese and butter is to remain practically unchanged during the coming season and it is wisdom therefore for persons who have profitably made butter to continue at that rather than change to cheese. Those who have a good cheese maker will wisely continue at that.

The exports of butter and cheese from twelve collection districts of the United States are shown as follows:—Butter, 1881, Feb., 1,784,632 lbs; 1880, Feb., 2,107,027 lbs; 1880-81, May 1 to March 1, 33,549,581; 1879-80, May 1 to March 1, 35,781,552. Cheese—1881, Feb., 6,045,743 lbs, 1880, Feb., 2 273,-358; 1880 81, May 1 to March 1, 137,769,281; 1879-80, May 1 to March 1, 114,540,891.

The total shipments of oleomargarine from New York from March 23 to April 6, and nearly all that has left the country went from that port, were 10,588,362 pounds. Of this Rotterdam received 6,564,349 pounds and Glasgow, Liverpool and Antwerp less amounts.

Prof. I. P. Roberts, of Cornell university, writes: Lard-cheese is a mixture of lard and cheese in the proportion of three pounds of sweet milk to one pound of lard. The lard and milk after being mixed are called cream. Three pounds of this cream are mixed by hand with 100 pounds of sweet skimmed milk: the cheese is then made just as other cheese. The butter is taken out of the milk—four pounds of butter to 100 pounds of milk—and about a pound and a half of lard substituted for it. The butter in cheese hastens decay, while lard may be shipped around the world. This cheese stands the heat better than any other kind, and will therefore be apt to find a ready market in the south. No taste or smell of lard is perceptible; it is a great improvement on skim-milk cheese, and contains nothing deleterious to the health. The cheese is, in fact, first-class, although it does not sell quite as high as milk-cheese. The cheese is branded "lard-cheese," and if so branded I see no reason why it should not find a ready market, and the making of it become a profitable and honorable industry.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

The Percheron or Norman-French Horse.

The active demand and good prices for horses should lead our farmers to give increased attention to the improvement of their stock and stimulate them to get the best breeds. The importance of this matter has been frequently urged in these columns, and we are glad to see these representations have had some effect. We learn that two or three meetings of leading farmers in Mariposa have been held with a view to uniting to secure first-class stallions; and though nothing definite has been yet arrived at the movement is in the right direction and will no doubt succeed. We have long held the opinion that the Percheron or Norman-French horse is better adapted to the requirements of our farmers than the Clyde and other breeds. The Percheron is a heavy, hardy, active, spirited horse, not quite so large as the Clyde but much hardier and more active. The Percheron has been very largely imported into the western states where it has become a general favorite.

The well-known French-Canadian horse or pony, is believed to be an off-shoot of the Percheron breed, before the latter was improved and developed. The Lower-Canadian breed was brought in by the French a great many years ago when they were owners of the country; and its many admirable qualities are well-known to everyone. The Percheron breed has been developed in France within the last thirty years, and has been brought up to a point that renders it unsurpassed by any known breed.

Breeding Sows.

At this season of the year sows require special attention. It has been found that the great majority farrow 112 days from the time of service; some few will go a few days longer and some will farrow a few days sooner, but these are exceptional cases.

A week before a sow is expected to pig put her in a comfortable pen and supply her with a moderate amount of finely cut straw; if she is given long straw, which does not become broken up before she farrows, the probabilities are she will lose more or less of her pigs by laying on them or from their becoming entangled in the straw while very young. We have found it profitable to arrange a pen specially for breeding sows. Arrange so that the bedding would be in a corner of the pen; we then take a two inch plank, 12 inches wide, and from 6 to 8 feet long and nail it on the wall, about 8 inches from the floor, thus making a shelf projecting from the wall 12 inches; one end of this shelf will fit tightly against the wall which runs at right angles with the one on which the plank is nailed; this plank must be securely fastened to the wall, and made firm by nailing blocks under each end. All these preparations should be made before the sow is put in the pen. The object of the shelf is to form protection for the pigs, which will prevent the sow from stepping or laying on them, which so frequently occurs when heavy sows farrow in inclosures. For ten days before farrowing and as long after, a sow should have sloppy food, which should be nutritious but not heating. At this time of the year feed boiled roots, with a little bran or shorts. Ten days after farrowing danger from inflamation is past, and the quality of the feed may be improved; but should never be of a very heating nature. Raw grains or meal should not be fed to a sow while carrying or suckling offspring. Boiled grain and roots should be given in such quantities as to produce rapid growth in her offspring and at the same time, if possible, keep the dam in good condition. Charcoal and wood ashes should be given all pigs which are kept in an enclosure at least once a week.

"Early Amber Sugar-Cane."

The members of the East Whitby farmers' club have been again discussing the profitableness of growing this crop, and twenty-eight farmers have agreed to grow seventy-six acres for this and next year. As the matter is of considerable interest to our farmers we subjoin an extract:—Dr. McBrien said it was to the interest of the farmer that the company should make a profit, and the more the better, because there would be plenty of companies next year, which would make competition for the cane. He said farmers in comparing growing the cane with wheat overlooked the fact that wheat had to be threshed and marketed. The cane promised to pay $20 to $30 to the acre, and $10 besides for seed and leaves., it would then pay nearly double what could be got out of wheat. And that was not all, for the cane would leave the land in good order for a crop of wheat or barley afterwards. The manufacturer ran the greatest risk and the farmer very little, and he thought farmers should take hold of it....Mr. E. A. Bradshaw said the farmers in growing two or three acres ran no risk; it was the company that put in the machinery that took the risk. As a food for cattle it was superior to almost anything else, and if not sold the farmer could feed the cane. He would grow a quantity and agree to deliver it at $2.50 per ton....Mr. S. Washington complimented the club upon the good work it has done, which had extended beyond the membership, for the reports of the meetings had been very interesting and profitable to him and others at a distance. He thought farmers should grow this cane at the price offered. If the manufacturer made a large profit in the outset so much the better for the farmer, for competition would at once spring up and pay the farmer the highest possible price for the cane. Farmers even at a distance should grow some to assist the experiment....Some of the leading farmers of Ameliasburg purpose raising sugar cane this year as an experiment for making syrup and sugar. Should it prove a success the grange will purchase machinery for pressing.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

ROOM PAPER.

THE LARGEST STOCK OF

Room Paper,
Borderings,
and
Dados,

The Greatest Variety of Patterns, all New Designs,

and the cheapest in the City, at

J. C. OVERELL'S
Fancy Emporium.
FRONT STREET, BELLEVILLE.

MERCHANT TAILORING
Establishment.

We beg to announce to the Gentlemen of Belleville and surrounding country that we have opened a First-class

TAILORING ESTABLISHMENT

in the spacious premises

Next the Bank of Commerce,
ASHLEY BLOCK.

Our Stock is all new comprising all the latest designs and coloring, and specially chosen for a first-class trade.

We purpose employing the best class of mechanics and have no doubt of being able to execute orders to the entire satisfaction of those who may favor us.

We would direct special attention to our selections for

Spring Suitings
—AND—
OVERCOATINGS

and solicit the favor of a call from all who wish to secure a really stylish article at a moderate figure.

SANDERS BROTHERS.

Belleville, April 7. 327d1m

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville. 316d21t-Sw1t.

PRIVATE MONEY TO LOAN.

$8000 of Private Money at 8 per cent. Charges low. No Commission.

PETERSON & PETERSON,
Barristers, &c.,
Belleville and Madoc.
April 13, 1880. d&w

MADOC BRANCH.

Leave Madoc	8.00 a. m.
Arrive in Belleville	10.00 a. m.
Leave Belleville	3:30 p. m.
Arrive in Madoc	5:30 p. m.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, FRIDAY, APRIL 22.

Manufactures.

The action taken by the Industrial Committee on Tuesday night, leads to the hope that something practical will result from the efforts now being made to secure the establishment of additional manufacturing concerns in this city. The three industries which engaged the attention of the Committee, namely a stove foundry, a car manufactory and a manufactory of malleable iron, are well suited to this city, which possesses natural advantages for them which cannot be excelled. It is to be hoped that the gentlemen who have put their hands to the plough will prosecute with energy the labor which they have undertaken, and in such case there can be no doubt of their success.

Those Appointments.

The Montreal organ of the Grit party comments, under the head of "Orange Liberality," on the position which the INTELLIGENCER took with regard to the East Northumberland election, and the manipulation by Mr. Fraser of the patronage which his Government recently created for itself in this County. Of course it follows in the wake of the *Globe* and grossly misrepresents us. As, however, our position has been explained over and over again, it is not necessary to reply to the *Herald*. This is more particularly the case because our Montreal contemporary demonstrates that it knows nothing whatever of the subject, as it says:

> One of the subjects exciting the warmest newspaper discussion just now in Ontario, amongst a certain class of writers, is the recent appointments by the Mowat Government of *two* gentlemen who happen to be Roman Catholics. One of them is a doctor, who has been named to a post in an *Insane Asylum*. The other has been made a *Sheriff*. We know nothing about these gentlemen except their names and their recent appointments. But we do not see any allegation that they are either incompetent for the offices they hold, or disqualified by any want of character or past misconduct.

This is enough to shew that the *Herald's* knowledge of the subject upon which, with sublime audacity, it ventures to comment, is sufficient only to make itself ridiculous, and that without any assistance from us.

The Welland Canal.

There was a great outcry amongst the Grits when Mr. Bodwell, the late Superintendent of the Welland Canal, was removed from that position. The St. Catharines *Journal* gives, however, a detailed statement of the condition of the canal, which shows that it would have been highly advantageous had Mr. Bodwell been earlier removed from a position, to which it is now clear he ought never to have been appointed. The *Journal* says:—

> "Every effort is strained to accomplish the herculean task of placing the canal in such a state of repair as will ensure its continued usefulness for the season, but much will remain to be done next winter. The old happy-go-easy policy of permitting the canal to run itself has borne fruit. Had it continued much longer, we would probably have awakened some morning to find the whole structure, which cost millions of dollars, little better than a hole in the ground. We feel satisfied now, however, that the canal is in able hands, and that neither the manufacturing or commercial interests will suffer from the intelligent policy now pursued.
>
> "No doubt in years gone by many a staunch craft received her 'death wound' making the hazardous canal journey, passing out into the lake to founder, entirely unconscious of the fact. We do not desire to reflect specially on the incompetency of the ex-Superintendent, for we believe the policy he pursued was but a continuance of that inaugurated under the Woodruff *regime*, when it was the wont of that official to point to his economy as an evidence of his capacity. The work to-day, nevertheless, stands a monument of engineering incapacity, official supineness and folly, errors and blunders to be seen on every hand, and remnants of gross carelessness, stupidity and false economy so multiplied as to astound even a casual observer, not to say anything of works of construction which are scandalous in the extreme, and so grossly botched as to render the perpetrators if not criminally liable, at least morally responsible for the consequences. Mr. Ellis has a heavy task before him, but is bending all his energies to remedy defects which never should have existed."

The Pacific Railway Lands.

The policy which the Pacific Railway Company have resolved to pursue, and are in fact pursuing with regard to the sale and settlement of their lands in the Northwest, has not only belied the predictions of the Grit party and press, but is so evidently in the interest of the country, that it has met with the warm approbation of the public. The *Monetary Times*, an independent journal which takes a very cautious view of every subject, says on this point:

> "The words 'sell its lands' are general, and it would seem, on the face of the announcement, that the first comers will have the best choice. If we are to take the announcement in this sense, it must be allowed that the price is very low, being no more than the United States sells its western lands for *net*, without any rebate for improvements. The price is, too, far below that charged by the Northern Pacific Railway Company. The rebate for improvements offers the strongest inducements to get the lands under cultivation. The idea originated with the St. Paul and Minneapolis Railway Company, and the Canada Pacific Company is the natural heir to it. A railway company has a greater interest in the lands being made productive than private individuals have; because every bushel of grain exported pays railway rates. It is gratifying to see the Pacific Railway Company preferring to encourage rapid settlement, by selling its lands at low prices, rather than attempting to exact a high price for them, at the risk of retarding cultivation. So far as the price now set for the lands is an indication of the settled policy of the company, it must banish the fears of those who dreaded a policy of high prices and monopoly on the part of the Syndicate."

The Picton *Times*, an out-and-out Grit paper, publishes the circular issued by the Syndicate, with comments which are commendatory, and which conclude as follows:

> On the 25th of the present month the whole of the Pacific Railway property will pass into the hands of the Syndicate. We hope they will continue in the liberal spirit shown in the above land regulations. If they do, the handing over of our great national highway, with all the privileges and monopolies granted, may not be an unmixed evil.

This is very satisfactory, but even more so is the declaration of the Hamilton *Times*, the Opposition organ in that city, which is extremely jaundiced in its political views, but feels compelled to say:

> No fault can be found with the price set upon the lands which the Syndicate desires to sell. There is every likelihood that the work of railway construction will be pushed as rapidly as promised, and that employment will be furnished to a large number of men and boys.

It is true that the *Times* follows up this candid declaration by a long argument in favor of emigrants going to Canada instead of to the United States; but that is the policy of its party, as shown by Mr. Blake's high-flown recommendation of Kansas and Mr. Mackenzie's eulogies of Texas as fields for emigration. It must be quite evident, however, even to those who lent an ear to Mr. Blake's denunciations of the possibly restrictive land policy of the Company, that it was a mere creation of his too vivid imagination.

The Shrievalty Question.

WHAT OUR EXCHANGES SAY.

We have already quoted from several of our exchanges articles condemnatory of the arbitrary and unjustifiable action of the Ontario Government in dismissing the Sheriff of this County without reasonable cause, and in face of declarations by Ministers and the Inspector of Prisons and Asylums that there was no cause for such action. The subject is still attracting a good deal of attention, as the following further extracts from our contemporaries show:

A GENTLE REMINDER.

The Ottawa *Citizen* says: "—If Mr. Hardy were to make inquiry he would find out that there are many employees of the Government, whose duties for years have not been performed by themselves. But doubtless he knows all about it. And think of this 'Reform' Government dismissing a man for not performing the duties of his office himself, while they appoint others to positions the duties of which they are incapable of performing! And again we remind their defenders and apologists that this same 'Reform' Government not long ago appointed a man to office who a few months previously had been removed from the list of practising lawyers for misappropriation of his client's funds. Truly, 'Reform' and 'Hypocrisy' are synonymous terms."

RIGHT TO A HEARING.

The *Mail* says: "The *Mail* is not anxious to manufacture political capital out of misunderstandings that may arise between Ministers and their subordinates, but we must say that Mr. Taylor appears to have been treated with scant justice and less courtesy by the Ontario Government. Every public servant has a right to a hearing before being decapitated, and this hearing the ex-Sheriff of Hastings was denied." —Jeddart Justice—hang them first and try them afterwards—is the style of justice administered by the Ontario Government to their officials who are Tories and whose places are wanted for supporters of the combination.

REFORM VIRTUE.

Says the Kingston *News*: "The Reform Government of Ontario is about as good an exponent of Reform hypocrisy as could be desired. When they wish to replace a Conservative officer by a Reformer, they throw upon him the burden of offences which he never committed, as in the case of Sheriff Taylor of Belleville. This gives them an opportunity of assuming a highly moral attitude. On the other hand, when a Grit lawyer, like Mr. Currie of St. Catharines, is drummed out of the profession for dishonesty, he is covered with honor and rewarded with a County Registrarship. Such is Reform virtue."

Editorial Notes.

DEFRAUDING THE REVENUE.

The Ottawa *Citizen* says:—"The Minister of Customs is receiving praise in various quarters for the action taken connected with the punishment of those who deliberately conspire with foreign exporters to defraud the revenue. Some firms had been practising their little game so long they think it a great hardship that they should be caught and punished.

BONDED WAREHOUSES.

Having looked further in the question of Bonded Warehouses, we find that such were in existence in Canada before the responsibility of collecting customs dues was assumed by the people of Canada, having been established by the Imperial Authorities, when they collected the Customs revenue of old Canada, and a fee charged therefor; yet we find such a journal as the Ottawa *Free Press* telling its readers that the present Government is creating trouble and discontent among the merchants by compelling them to pay for the privilege of a bonded warehouse.

The Lips We Love to Press

inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bott's 75 cents. Don't neglect a cough to save 75 cents.

Campbellford Correspondence.

CAMPBELLFORD, April 20th, 1881.

Our village is still going ahead. The foundations of two more cottages are in preparation on the east side of the river, just above the railway bridge. We understand that Mr. H. Archer and Mr. H. Marsh will be the owners, having purchased the lots from Mr. R. Cockburn.

We also learn that another house is to be erected on Front St, adjoining the bank, and a store is in progress in the same street on a lot owned by Mr. D. Kennedy, of this village.

Obituary.

Mr. Edward Marrow, of Trenton, Secretary-Treasurer of the Prince Edward Railway Company, died on the 20th of April, aged 54 years. His remains were interred in St. George's Cemetery on the 21st, and were followed to the grave by a large number of friends and mourners. Mr. Marrow, who had been in the service of the Northern Railway Company of Canada at Toronto, for a number of years, was selected by Mr. Manning, owner of the Prince Edward Railway, to manage its affairs, in connection with Mr. Haney, and since the opening of the road has been the efficient Secretary-Treasurer of the Company. He was most indefatigable in the discharge of his duties, faithful and industrious, and to him the prosperity of the road was largely due. In his private life he was highly respected, and a large number of friends will mourn his departure. He leaves a wife and family who have the sympathy of the community in which he lived in their sad bereavement.

News Condensed.

—Mr. Vennor has resigned his position on the Geological survey.

—The Lachine canal at section 6 is said to be very much damaged.

—A large quantity of hidden explosives have been discovered at Nice.

—H. R. H. the Princess Louise arrived in London from the continent on April 8.

—Thirty-nine arrests have so far been made in Ireland under the terms of the Coercion Act.

—His Excellency the Governor-General and suite visited Buckingham on Wednesday afternoon.

—The British steamer *Mizpah* has gone ashore on the Skaw, and eleven persons have been drowned.

—The Saskatchewan is at present three feet higher than was ever known at this season of the year.

—Sir John Macdonald intends to take a trip to the southward at an early date for the benefit of his health.

—It is rumored that the Duke of Richmond will temporarily take the leadership of the English Conservatives.

—Earl Grey has written a letter to the London *Times* in which he condemns Mr. Gladstone's land policy.

—Dervisch Pasha attacked and defeated the Albanians on Tuesday. Measures are to be taken for the arrest of Ali Pasha.

—One thousand Irish emigrants left Queenstown for the United States yesterday and another thousand are ready to embark to-day.

—The earthquakes at Chio have been followed by severe gales and heavy rain, which greatly increases the sufferings of the houseless inhabitants.

—The receipts of the Great Western Railway for the week ending April 15, were $114,150, being $23,490 more than the corresponding week of 1880.

—An unknown man committed suicide at Windsor, Ont., on Tuesday night, by deliberately jumping off the ferry boat when in the middle of the river.

—The shipment of timber from the Chaudiere docks will commence on Monday next. The season gives promise of being brisker than any previous one since 187[illegible].

—The Toronto, Grey and Bruce Railway Company will proceed during the coming summer to widen the road to the standard gauge, and lay it with steel rails throughout.

—The Earl of Abingdon has a farm on which the pigeons, peacocks, turkeys, doves, geese, rabbits, cats, goats, horses, and cattle—all the animals, in fact—are perfectly white.

—Lord Beaconsfield just before his last illness strolled in the park in a very thin overcoat and basked jauntily in the iced sunshine. He dined out at least five nights in the week.

—Extensive frauds and corruption have been discovered in the Post-office Department at Washington, in consequence of which the second Assistant Postmaster-General has been compelled to resign.

—Russia has issued a circular to the powers proposing an international conference, for the purpose of adopting measures against the machinations of the Nihilists, Socialists, and others of the same kidney.

—On the 21st a fire broke out near Brockville on the farm of Mr. William Wilson. His barn, house, three horses, and thirteen cows were consumed. Loss, $2,000; insured in the Royal of London.

—The trial of Mrs. Navin at the Napanee Assizes yesterday, on a charge of having murdered her husband during a drunken spree at Ernestown, resulted in an acquittal, the jury remaining out only fifteen minutes.

—The Grand Trunk receipts for the week ending April 6th were $221,116, as against $194,418 during the corresponding period last year, an increase in 1881 of $26,698. The aggregate increase for 16 weeks has been $177,714.

—E. A. McDowell's company is creating a furore in the West Indies. In Barbadoes the theatre was crowded every evening to its utmost capacity. In Kingston, Jamaica, the engagement lasted three weeks, the house being packed at each performance.

—The Ottawa Ship Canal scheme is again coming to the front, and it is understood that a survey of the proposed work will shortly be made. It is stated that a company is willing to undertake the work of perfecting through navigation between Montreal and Georgian Bay by the Ottawa and French rivers and Lake Nipissing.

—It is now definitely settled that the remains of Lord Beaconsfield will be interred in Hughenden churchyard by the side of those of his wife. A clause expressing a desire to that effect has been found in the late Earl's will, and even in the highest quarter an indisposition is manifest to run counter to the dead man's wishes in the matter.

—The Hamilton *Spectator* says Mrs Mottashed, of 18 Cathcart street, that city, and who has been bedridden for eight months, claims to have been miraculously cured in response to earnest prayer, last Thursday evening. The lady is thoroughly earnest about the matter, and there is no doubt whatever that she thoroughly believes in this modern miracle.

—A St. John's special says a contract has been signed by the Newfoundland Government and New York capitalists for the construction and maintenance of the railway from St. John's to the great mining regions at Notre Dame Bay, the proposed line to be four hundred miles long; and the first railway ever constructed in Newfoundland. The estimated cost is $6,000,000.

BANQUET TO MR. BLAKE.—The *Mail* of to-day has the following reference to the banquet given to Mr. Blake last evening in Toronto: "The banquet tendered to Hon. Mr. Blake last night at the Queen's hotel, in this city, resolved itself into a political gathering of Ontario Reformers. The company, accordingly, comprised representatives of the party in the various provincial towns, and the speeches delivered were of the true Grit type. Mr. Blake spoke for about two hours, dealing mainly with the Pacific railway contract, the tariff, and the settlement of the North-west. On none of these points did he adduce much new matter, but contented himself mainly with summarising the arguments of the Opposition during the last parliamentary session."

To the Editor of the Intelligencer.

MR. EDITOR,—As the future of North Hastings in regard to the iron trade is always the subject of much comment in your valuable paper and as other places are putting forward their claims to be recognized as valuable mineral districts, I feel it my duty to say a few words for Bancroft. The iron ore in this section is of the best quality, according to mineralogical tests; the hills east of the village abounding with an almost inexhaustible supply, and although most favorably situated for the working and developing of these mines, still this giant industry has so far remained dormant, only for the lack of push and enterprise exhibited by our Canadian capitalists. I cannot too strongly urge upon the people of Belleville and vicinity the necessity there is of extending the Belleville and North Hastings Railway to this place, or of some other through line. The benefits that would accrue from such a step are incalculable, and the time is not far distant when we will have a railroad through to Bancroft, if not from Belleville, at least from the west, and Belleville will then see other places reaping the benefits which she herself might have enjoyed. It is now a generally conceded fact that there is a bright future for this back country. The sound of the hammer reechoes daily throughout the whole length of the village, new buildings going up at short intervals, some of them of splendid proportions and workmanship. Mr. Jenkins, the iron speculator, has been here lately negotiating for the mines now in possession of several individuals, and it is rumored that he has succeeded in arranging for a part of the lesser ore beds. His idea is to bring the railroad in from the west should the company he represents get control of the principal iron beds.

Truly yours,

PEDAGOGUE.

Bancroft, April 5th, 1881.

The Apple Trade.

(From the Montreal Gazette.)

From present appearances the apple trade is destined to experience a bad wind up of the season. Advices from England are of such a discouraging nature that it is difficult to see how shippers can avoid big losses. On this side the situation is not much better, as Western dealers who could have realized $2.25 per brl about five or six weeks ago, and who were advised to accept it, now find it difficult to get $1.25@1.50. One of our Western shippers who refused $2.25 on this market some time ago is now peddling them out to the retail trade at just what he can realize, as they have began to rot, and to-day some of them were sold as low as 25c per brl, which just about covers the price of the barrel. The shipments from New York and Boston are still to large for the time of year, and are causing a continuance of the depression in the English market. The following is a report of the Liverpool apple market by last mail:—

> "We regret to have to report a continuation of arrivals of apples out of condition, and the quantity of this class of fruit in the port makes it very unsaleable, and our market is just as depressed as it is possible to be. The stock has to be rushed into consumption, and very few buyers can be found. Boston apples have nearly all landed almost worthless, and results are ruinous. New York shipments show an improvement in condition, but the market is thoroughly depressed, and even good stock excites but little competition. Canadian fruit has varied very much. Some prime, others very wasty, and prices are low all round. Arrivals from March 26th to April 2nd are:—Parthia, from New York, 1,875 brls.; Baltic, do, 4,026 do; City of Berlin, do, 5,016 do; Palestine, from Boston, 820 do; Bulgarian, do; 1,086 do; Circassian, do, 2,171 do; Illinois, from Philadelphia, 1,283 do,—total for week, 16,277 brls. The following are the quotations for tight barrels for the week:—Baldwins (New York), 10s to 14s; do (Boston), 8s to 13s; do (Canadian), 12s to 20s; Queen's, 11s to 14s; Seeks, 14s to 18s; Canada Reds, 15s to 17s 6d; Newtown Pippins, ordinary, 14s to 16s; do, prime 18s to 30s; Rox Russets, 9s to 14s; Golden Russets, 10s to 17s; Spy, 13s to 16s; Phœnix, 15s to 21s; slack packed, 7s to 8s 6d; slightly wet, 6s to 9s; wet, 3s to 5s."

—A railway company is being arranged to build a railway from Sorel to Longueuil, a distance of forty-five miles, along the shore of river St. Lawrence. The capital is $750,000. Among the promoters are Chief-Justice Armstrong and Messrs. Cyrille Labelle, A. A. Taillon and other prominent persons of Sorel. If the charter is obtained in time it is proposed to complete the railway before next winter.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

THE SECRET OF HEALTH.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of HERRICK'S SUGAR COATED VEGETABLE PILLS, and you are safe. They never fail in any case of sickness or inward pain. Try them.

First Class Stores

AND building lots to rent or sell or lease on ground rent, in the centre and choicest position in the rapidly rising manufacturing Village of Campbellford, near the Grand Junction Railway. Address,

Sold by W. Gilroy, Thomasburg, and all druggists, or sent free by mail (plain wrapper), by

THE STARR KIDNEY PAD Co.
d&wtf 31 King St. West, Toronto.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for simliar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

GLASS JUGS!

WE have a larger and better stock of Glass Pitchers now on hand than ever before. Prices are very low, such as we know will meet the views of any reasonable person.

THE CHEAPEST

BLACK SILKS

IN THE CITY.

—:o:—

WE have just received 6 pieces more of our celebrated Black Silk at $1.29 per yard.

It is decidedly the best value of Silk in the Dominion of Canada—soft in make, so that it will not easily crease or cut. We consider it fully as good as any $2.00 silk that is sold in the city. We have also

A CHEAPER SILK!

6 pieces, which we offer at $1.03 per yard. This is what is usually sold at $1.50 per yard. These classes of Silks cannot be purchased elsewhere as cheap as we offer them.

CARPETS!

We have also received several bales of UNION CARPETS in first-class patterns at medium prices.

Our assortment of carpetings is one of the largest in the city. We have some specially low lines in Tapestries.

GLASGOW WAREHOUSE.

Local Notices.

Notices under this head 10cts. a line each insertion. After six insertions 5 cts. a line.

The great sale of jewellery and fancy goods will commence to-morrow, in the store formerly occupied by Bartman & Sintzel, opposite the Anglo American Hotel, and will continue every evening, until the whole is disposed of. The stock is a bankrupt one, and great bargains may be expected. Mr. Purdy is the auctioneer. d1t

Daily Intelligencer.

BELLEVILLE, FRIDAY, APRIL 22.

5 O'CLOCK EDITION.

City and Vicinity.

MR. EVANS has completed his survey of the harbor.

THE ice on the northern lakes has not as yet broken up.

"TACK-LIFTING BEES" are being held by many housewives.

ONE solitary prisoner, a drunk, occupied the cells last night.

REMEMBER the sacred concert in the M. E. Tabernacle this evening. Those who miss it will miss a musical treat.

THE Lord Bishop of Algoma will preach (D. V.) in St. John's Church this evening. The service will commence at half past seven o'clock.

THE annual meeting of the Bay of Quinte Rowing Club will be held on Tuesday evening next, when the election of officers will take place. See the advertisement.

MISS QUARRIER, of Glasgow, Scotland, arrived in Peterborough yesterday from Belleville on her way to Warsaw with three children (two boys and one girl) for adoption.

THE big elephant which arrived for Shelby, Pullman & Hamilton's show yesterday, was a great attraction to the boys. The ponderous brute, after being induced to leave the car in the evening, was brought down street, and taken across the lower bridge, and thence by way of Bridge Street to the Agricultural Show Grounds. A large concourse of boys followed up Murney's hill, singing—it must be confessed rather inappropriately—"One More River to Cross."

WEATHER PROBABILITIES. — Toronto, April 22.—Lakes: Moderate winds, fine warm weather.

PUTTING DOWN A SIDING.—Mr. Wm. Ferguson went out to Madoc to-day for the purpose of beginning work on the new siding which is to be laid down at the Hematite Mine. The siding is to be about a mile in length, and will keep a gang of fifty men employed for fully a month or six weeks.

SPECIAL SERVICES IN BETHEL HALL.—The Rev. A. Schuster, City Missionary is conducting special services in Bethel Hall over Haines & Lockett's Boot & Shoe Store. Service this evening, to-morrow evening and every evening next week (D.V.), commencing at 7½ o'clock. "Come and bring others with you. *Encourage the City Mission Work.*"

PRESENTATION.—A number of personal friends of Mrs. Locke, wife of Rev. J. R. Locke, pastor of Holloway St. Methodist Church, called at the parsonage last evening and presented that lady with a purse of $20, together with an address. After the conclusion of this interesting ceremony the table was spread with good things which the company had brought with them, and a very agreeable evening was spent.

PLANETS IN CONJUNCTION.—The planets Jupiter and Saturn came in conjunction with each other and with the sun between five o'clock last evening and seven o'clock this morning. Both of these planets are near their perihelia, or the point in their orbit when they are nearest to the sun, Jupiter having passed it a short time, while Saturn is rapidly approaching it. An astronomical event like this is of rare occurrence, and is popularly supposed to be attended with earthquakes and violent storms.

OFF FOR THE NORTHWEST AGAIN.—On the 1st of May Prof. Macoun starts once more for the Northwest, having been commissioned by the Government to lead another exploring party into that vast and untravelled region. Prof. Macoun's explorations will be directed farther north this year than they were during his last expedition. He will start from Fort Pelly and strike north until until he reaches the arctic circle; then, turning southward he will proceed to Battleford. At Battleford he will in all probably meet the Governor-General, (who intends leading a hunting expedition to the Northwest next summer,) and will accompany him back to civilization.

POLICE COURT. — Moses Burnett, a drunk, was the only case brought before the Magistrate this morning. He was discharged.

PRINCE EDWARD RAILWAY.—The Picton *Gazette* says:—"We have been led to understand that work on the removal of the station of the P.E.C. Railway on the new site near the corner of the Little Lake Road, will be commenced on or about the 2nd of May. As soon as this work is completed a commencement will be made on the northern extension at Trenton, which will be pushed forward with as great rapidity as is consistent with the proper performance of the work."

ARRIVAL OF SHOW MATERIAL.—A large quantity of the new properties for Shelby, Pullman & Hamilton's show arrived by special train from the west yesterday afternoon. Some fifteen or twenty cages of wild beasts, tableau cars, a band waggon, &c., were among the properties, besides three elephants, a couple of camels, a moose, and a considerable number of fine horses and ponies. A large gang of men accompanied the property. A great crowd of boys and men witnessed the unloading of the cars. The two little elephants, the camels, and horses were got off without any difficulty; but the great elephant "Emperor"—a monstrous brute—obstinately refused to step on the gangway which led from the car to the platform, notwithstanding the alternate coaxing and prodding of the keeper. All the employees are afraid of this brute—and with good reason, for he is notorious in the business as one of the most vicious elephants travelling, and has already killed two men. All attempts to get him out of the car had to be abandoned for the time being, and he was shut up again, much to the disappointment of the crowd, who were anxious to see some fun, though they were evidently not willing to be participants in it, as they kept at a respectful distance. The efforts to get "Emperor" out were resumed after dark, and, after many unsuccessful attempts, he was finally got out on firm ground. The waggon, animals, &c., were taken from the station to the agricultural grounds.

PRESENTATION AND ADDRESS. — The Young People's Literary Association in connection with St. Andrew's Church, held their final meeting for the season last evening, which was well attended, and a varied programme gone through, consisting of songs and readings, which were well rendered and equally well appreciated. The most interesting portion of the proceedings was the presentation of an address and a handsome dressing case suitably inscribed to Mr. Harry Neilson, the Secretary of the Association, who is about taking his departure for the Western States. The address, which was very tastefully written and framed, was read by Miss Urquhart, and the Rev. Mr. McLean presented the dressing case, and in doing so feelingly alluded to Mr. Neilson's devoted labors in the interest of the church, and attributed the success which had attended the Association in a great measure to the same untiring and disinterested efforts, and in conclusion said that the loss sustained by St. Andrew's would be gained by the church which he would connect himself with in his new home. Mr. Neilson, who seemed rather surprised (and expressed himself as such) at this evidence of kindness from his young friends, gave expression to his thankfulness in a brief manner. Refreshments were then served, and the meeting shortly afterwards broke up.

THE ROAD GRADER AND SCRAPER.—This machine, which is likely to prove exceedingly useful on our streets, was tested yesterday afternoon on the small bit of John St. south of Bridge St., between the residences of Mrs. D. D. Bogart and Mr. Job Lingham, which is about two hundred feet in length. The grader, which was worked by Mr. White, the agent for the machine, began work about 4 o'clock. It was drawn by the two fire teams, the work being rather too heavy for one team. It worked for about two hours last evening and half an hour this morning, and in that time completely graded the bit of street, shaping it almost as well as could have been done by hand. The machine is of simple construction, consisting merely of a plank about eight feet long, heavily plated with iron and with a steel end shaped like a plough. This is set in a diagonal position in a stout frame, and can be raised or lowered at pleasure by two levers, and fixed in any position. The end of the grade enters into the soil like a plough and tears it up with as much ease as though it were loose sand. As the soil is torn up it is scraped away, and piled in a line along the centre of the street, which gradually rounds off the street to the required shape. The Street Surveyor says that, though the machine did not do all that was claimed for it, he believed it would be a very valuable acquisition to the City, saving as it would save an immense amount of labor, and doing work much more quickly than it is now done. There is little doubt but that the city will purchase the machine.

RAILWAY INSPECTION.—A special car containing a number of gentlemen interested in the projected Quebec & Ontario Railway took a trip over the Grand Junction Railway to-day, a special car having been placed at their disposal by the Company. The party consisted of Hon. R. B. Church, a director of the Q. & O. R.; Hugh Lumsden, Chief Engineer; L. A. Senecal, Managing Director Q. M. O. and Occidental R., and A. B. Chaffey, Managing Director of the South Eastern Railway. These gentlemen were accompanied by Mr. E. O. Bickford, Mr. Kelso, Mr. H. Cameron, Q. C., and Mr. Faquier, of the G. J. Railway. The special left at 9 o'clock, for Madoc and the mines, they were to have returned as far as the junction and proceed to Peterborough, and will return in time to catch the midnight train, when they will proceed to Montreal. The result of their observations during the present trip will be set forth in a report which will be read at a meeting of the directors of the Q. & O. Railway to be held at Montreal next Tuesday, when the question of amalgamation of the Grand Junction will be considered. It is stated, however, on good authority, that this is not the real object of the visit of these gentlemen. Hon. Mr. Church and Mr. Senical are, it is well known, prominent and influential members of the C. P. Syndicate; and it is said that they are making a personal inspection of the G. J. Railway with a view to coming to an arrangement with Mr. Bickford for its purchase—the ultimate object of the Syndicate being to connect the Grand Junction and Midland Railways with the Sault Line by means of a line from Midland City to Nipissing, thus obtaining a direct outlet for the Northwest trade. If this statement is true, Belleville is deeply interested in the project. If the project is carried into operation Belleville will become the lake terminus of the whole vast trade that will come over the Sault Line—which means the greater portion of the Northwestern trade for years to come. The result would be that the bay shore in the vicinity of this city would be a line of docks, and Belleville would become one of the most important shipping centres in the country. Clearly, the interests of the city and the interests of the Grand Junction Railway are identical just at present.

JUST RECEIVED—one hundred and ten setts Lace Curtains (bought job) and will be sold at a sacrifice. Beautiful patterns. JAS. HENNESSY.

Yachting Notes.

The *Dauntless*, upon thorough examination, proves to be in a very bad condition. Her frames are badly rotted, but the planking generally seems to be sound. She will be rebuilt at once.

The *Gracie* is now almost ready for launching, and will be put in the water on some day next week. It is expected that she will, owing to the extensive alterations and improvements made upon her hull during the winter show a considerable increase of speed.

No work has been done on the *Atlanta* for some days, owing to the absence of a number of the ship carpenters in Trenton. The job on the *Annie Gilbert* will be completed tomorrow, and the work of planking the *Atlanta* will be resumed on Monday and carried forward rapidly and steadily.

The work of calking the hull of the new steamer is going on, and the cabin is nearly finished.

Marine Notes.

The schrs. *John Wesley* and *Belle Case* have cleared hence for Picton with lumber the former from Flint & Holton's and the latter from Rathbun's.

Rates on lumber from this port to Oswego are as yet unsettled, there being a wide divergence of views between shippers and carriers, the former offering 90c hence to Oswego, whilst the latter ask $1.25. Were rates agreed upon, numbers of vessels would be secured, as there is no lack of offerings for charter.

Picton bay is now clear of ice. The steamer *Armenia* went to Picton last night, and started thence this morning.

Canvas was bent on the schr. *D. Freeman* this morning, and she will sail for Oswego tomorrow with 9,000 bushels of barley, which was wintered in her here.

The water in the bay is unusually low for this season of the year.

The first vessel to arrive at Kingston with grain this year was the schooner *Greenwood*, from Cobourg with peas, which reached there on the 20th.

The *News* says that negotiations are pending with Messrs. Macdonald & Hayes, of Seaforth, for the purchase of the schooner *Florence*, Captain Howard asks $1,800 for her.

The *Nellie P. Downey* has been overhauled and repainted, and is now in tip-top ship shape.

The *Marry Merritt* has arrived at Port Dalhousie from Kingston, being the first arrival

The *Whig* of yesterday says:—The steamer *Pierrepont* came up the river this morning. Capt. Millar reports plenty of ice from Wolfe Island nearly to Gananoque. The steamer broke her way through some of it. Schooners cannot get through it yet.

The schr. *Eliza Quinlan* has been purchased by Collier and Van Black, of South Bay, for $2,000.

Capt. S. Tyo will take charge of the schr. *Nellie Sherwood*, now on the beach at Weller's Bay.

The schr. *T. C. Street* has been sold for $1,700, and an attempt will soon be made to get her off.

Fatal Railway Accident

An Express Train precipitated into a River—Eight Lives Lost.

ALBANY, April 21.—This morning the trestle work over the Meredosia River near here gave way, and an express train was precipitated into the river. The train consisted of engine, tender, baggage car, passenger, and sleeping car. All went down except the sleeper, which hangs over the end of the bridge. Two cars floated down the stream. The passenger coach lodged against an island four rods away. The baggage car stuck in the middle of the stream about the same distance. Engineer West and the firemen, residing in Freeport, went down in the cab. Nothing has been seen since of the locomotive or men. The baggageman, brakesman, messenger, and conductor all escaped—all injured except the latter. Eleven passengers in the forward car, including a man and a boy residing at Pine River, Wis., *en route* to Omaha; a woman and two children, who got on at Savannah; Dr. Lundy, of Albany, and five others. Of these two men jumped ashore; another man leaped, but fell back and was drowned; a woman and child and boy were taken off the roof of the car. The other six passengers were drowned. Eight lives were lost in all.

Licenses Granted.

The following is a list of the parties in the License District of North Hastings, to whom Tavern and Shop licenses have been granted for the ensuing year:—

VILLAGE OF MADOC.

Tavern—Mrs. Moon, Robt. Simmons, Cooley & McNeill. *Shop*—D. W. Wright, Grey & McGregor.

MADOC TOWNSHIP.

Tavern—A. Diamond, F. Collins.

TUDOR.

Tavern—I. Golding, D. Potter, Geo. Morrill.

LIMERICK.

Tavern—John Bain.

BANGOR.

Tavern—P. G. Green.

MONTEAGLE.

Tavern—Simon Rouse.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4eod&w1y

Holloway's Pills and Ointment.—Dyspepsia, Jaundice.—These complaints are the results of a disordered liver, which secretes bile in quality and quality incapable of digesting food. Digestion requires a flow or healthy bile, to insure which Holloway's Pills and Ointment have long been famous, far eclipsing every other medicine. Food, irregularity of living, climates, other causes are constantly throwing the liver into disorder, but that important organ can, under all circumstances, soon be regulated and healthily adjusted by Holloway's Pills and Ointment, which act directly upon its vital secretion. The Ointment rubbed on the skin penetrates immediately to the liver, whose blood and nerves it rectifies. One trial is all that is needed; a cure will follow.

DR. LLOYD, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of ALLAN'S LUNG BALSAM, I have no hesitancy in stating that it was by the use of your LUNG BALSAM that I am now alive and enjoying good health.

'Hail bounteous, beauteous, gladsome Spring" – this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

MORNING DESPATCHES

AMERICAN.

WASHINGTON SPECIALS.

NEW YORK, April 22.—The *Times'* Washington special says that Brady's forced resignation caused a painful flutter among the Star route group, and brought prominent members of it to Washington for consultation. It also created a great consternation in the Post Office Department among known beneficiaries of the Star system. It is believed that fraudulent practices in connection with the Star routes could not have been successfully carried out without the knowledge and connivance of the Sixth Auditor's office, and it is likely that the Secretary of the Treasury will direct an investigation in that office. A number of removals are expected in the Post Office Department.

The *Herald* says the Brady scandal will involve ex members of Congress in aiding and abetting a wilful waste of Government funds, and a system of favoritism for sections and among contractors, that will exceed all that was hitherto denounced as extravagant inventions. Witnesses will show how it took $500 to transmit a single letter less than 150 miles.

AFTERNOON DISPATCHES.

FACTORY OPERATIVES EMIGRATING.

QUEENSTOWN, April 22 —Owing to depression in trade, factory operatives are emigrating chiefly to the United States, at the rate of fifty per week Some manufacturers contemplate removing their business to America. Hundreds here are unemployed.

IMPORTATION OF PORK PROHIBITED.

CONSTANTINOPLE, April 22.—The Porte has prohibited the importation of American pork. A Committee of Americans will ascertain the value of the stock already arrived, after which it will be destroyed.

WASHINGTON, April 22. — Indications: Lower Lakes, fair, stationary or higher temperature.

QUEENSTOWN, April 22.—Arrived the *Wisconsin* from Bradford, England.

LONDON, April 22.—Lorillard's "Mistake" won the race for the Newmarket International handicap. Paulet 2nd.

Alexander the Great

wept because there were no more worlds to conquer, but the proprietors of Dr. Pierce's Family Medicines who have found it necessary to establish a branch of the World's Dispensary at London, England, in order to supply from that great commercial emporium these remedial blessings to foreign countries, where they are largely in demand, do not share the great conqueror's sentiments, as their conquests are of disease and have made happy not only the conqueror but the people who employ them. Dr. Pierce's Golden Medical Discovery cures all blood and skin diseases, scrofulous affections, swellings and internal soreness. Dr. Pierce's Pellets are the little giant cathartic; Dr. Pierce's Favorite Prescription—woman's tonic and nervine—Dr. Pierce's Extract of Smart-Weed, the great remedy for colds and bowel affections as diarrhœa, dysentery and flux. World's Dispensary Medical Association, proprietors, Buffalo and London

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

—Rev. T. W. Handford is lying dangerously ill at Toronto.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

'THEY ALL DO IT.' — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints that have been stiff for years.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopseas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

FOR ASTHMA AND PHTHISIC.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

$100,000.00 to Loan

ON first-class mortgage (real estate) security. Interest 6 per cent. Straight loan. Interest payable half yearly or yearly.

To Cure Consumption,

Bronchial affections, weakness of the lungs, take a small teaspoonful of Dr. Wilson's Pulmonary Cherry Balsam every two hours.

To Cure Coughs Take

Dr. Wilson's Pulmonary Cherry Balsam in small quantities as often as the coughing fit comes on.

To Cure Whooping Cough Take

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After gargling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

J. W. BRAYLEY,
Montreal.

NOTICE.

THERE being a vacancy in the Medical Council of Ontario, caused by the resignation of Dr. Irvine, of Wolfe Island, I hereby announce myself as a candidate for election to the Medical Council for Quinte and Cataraqui Division, and respectfully ask the support of members of the profession.

HENRY W. DAY, M.D.

SPECIAL NOTICE TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the later stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

COSTELLO'S

SPRING OPENING

Wednesday, April 6th.

WE will be pleased to show to our patrons on the above mentioned date, a splendid selection in all the leading shapes in

Paris, London and New York Trimmed Millinery.

We are pleased to announce to the Ladies that our

Selections this Spring

are chaste and attractive, and well worthy of their inspection.

It being customary with us to issue Circulars to our friends, Spring and Fall, we find they never reach them in time, consequently we will not do so for the future, and trust this notice will suffice.

RICHARD COSTELLO.

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

By Mrs. Harriet Lewis.

Author of "The Double Life," "Tressilian Court," &c., &c.

"Were your father a beggar, Tessa," said the young Baronet, with tender fervor, "I should esteem it none the less an honor to have you for my wife. My peerless girl! Not all the bad fathers in the world made into one could overshadow your goodness and purity. You stand by yourself, unique, alone. You are my plighted wife, Tessa, and my home and my relatives shall be yours."

"Will your relatives receive me?" asked Tessa.

"If they will not, they are no relatives of mine," said Sir Victor, smiling. "I have no near relatives, and my distant cousin, Lord Thornhurst, has frequently advised me to marry. He is very happy with his beautiful wife and noble boys. I apprehend no opposition from any one excepting Captain Holm, and I think that a proper representation of the facts may win his consent."

"If not—"

"If not," said the young Baronet gravely, "and if he insists upon taking you back to the Grange, or urging on your marriage with Squire Todhetly, he is not a proper guardian for you, and another must be appointed in his place. I would not urge you to enter into a hurried, stolen marriage. I want to take my bride openly and without fear. But it would be quite proper for you to conceal yourself from your father until you know what course he intends to take toward you. Ordinarily a daughter owes her father her full allegiance, but your case is peculiar. You never saw your father till the other day, and he has, since claiming you, conducted himself in a manner more becoming an enemy than a father. Under the circumstances, it is your duty to conduct yourself with an extreme caution toward him, and to understand his plans and character more fully before placing yourself again his hands."

"I would not be safe from him at Kentish Town, as he knows Uncle Reuben's address," said Tessa doubtfully. "I might go to the Lacy Institute at Clapham, but he knows that I was educated there, and would go there if he failed to find me at Kentish Town. I am afraid," added Tessa desolately, "that I have nowhere to go."

"You had better go direct to Kentish Town," said the young Baronet, with quiet decision. "I will take you there. Captain Holm cannot arrive in town before evening. I will go from Mrs. Dennis' house, after seeing you there safely, to Belgrave Square and tell my story to Lady Thornhurst. Captain Holm cannot know of her, and she will befriend you, I know. So your future is provided for, my darling Tessa."

"But I do not know Lady Thornhurst," faintly objected Tessa, "and—I'm afraid of her!"

Sir Victor laughed joyously, as he bent and kissed the lovely, blushing face.

"Afraid of her?" he repeated. "She is the noblest, the most beautiful woman in England—except yourself, my own darling. She has a heart large enough and generous enough to take in the world of sorrowing and homeless people. Her charities are boundless, but better than all her munificent gifts of money, are the kindly smiles, the gracious words, and the tender glances she gives to the sorrowing and the erring. You remind me strangely of her, Tessa, yet she is not fair and slight like you. Imagine a woman of commanding presence, slender still, yet with a queenly air, graceful, and with a face of splendid beauty, dark yet bright, with glowing eyes and scarlet lips, —a beautiful, imperious face, with a tender sweetness that reminds you of the perfume of flowers."

Tessa's heart thrilled, yet no instinct warned her that the enthusiastic young Baronet was describing to her her own mother. But, oddly enough, she thought of the little sketch of her mother which she carried in her pocket, and she said softly:

"I have seen a picture of a young girl that very nearly answers your description Sir Victor."

"Call me Victor, Tessa," he said lovingly. "There must be no formality of names between us henceforth. But about the picture. It might have been that of Lady Thornhurst. She is young still, only four-and-thirty, and is in the golden prime of her beauty. She has figured in annuals, books of beauty, and even in illustrated papers. She is a great belle, and as I said before, she is as good as she is beautiful. I wish I could define in what respect you resemble her, Tessa. It is not in your eyes, for they are gray like the deepening twilight, while hers are blacker than the midnight. It is not in your hair, for yours is like spun gold, and hers is black with a purplish bloom upon it. It is not in your complextion, for yours is fair as a calla-lily, and hers is clear and dark. Yet there is an undefinable resemblance which grows upon me. Perhaps it is that your souls are alike, and they give a similar expression to your faces."

"I should like to see this beautiful Lady Thornhurst," said Tessa thoughtfully.

"You shall see her. She will come to you to-day."

"She must be splendidly beautiful," murmured Tessa, "but I think my picture —the one I spoke of—will surpass her in loveliness. I have it in my pocket. Would you like to see it?"

The young Baronet assented, and flushing slightly, Tessa drew the little tightly rolled pencil sketch of her mother from her pocket. It was her intention to tell her young lover her entire history, to explain to him that this beautiful mother of hers was a great and titled lady, who was so unhappily situated that she could never recognize Tessa as her child. But the words yet hesitated on her lips, and she silently gave the roll into Sir Victor's hands, anxious to hear his opinion of her mother's beauty before she unfolded her story.

The young Baronet unrolled the paper and straightened it on his knee. The darkly beautiful face of Tessa's unknown mother, spirited and cleverly executed, smiled up at him from the yellowed paper. He uttered an exclamation of amazement.

"Ah!" said Tessa, blushing with delight, "She is more beautiful than your Marchioness Thornhurst, is she not?"

"How strange!" ejaculated Sir Victor. "And you did not know it? What a singular coincidence! Why, Tessa, this is her picture!"

"Whose picture?" said Tessa, growing white to the very lips.

"Lady Thornhurst's. It must have been taken a few years ago, but it is very like. She has scarcely changed. You thought it a fancy sketch perhaps. Where did you get it?"

For a full minute Tessa could not answer, and Sir Victor was too absorbed in the contemplation of the picture to see that a cold sweat had started to her brow, and that her small lovely face was drawn and set in lines of anguish.

The Marchioness of Thornhurst her unknown mother! The revelation made her faint and ill. She drooped her head, and a swift shudder convulsed her frame. Her father's divorced wife—her own mother—was this grand lady, whom all the world admired, and whom Sir Victor Cheswick loved!

"Where did you get the picture?" again asket the young Baronet.

Tessa's head drooped still lower—to his shoulder. Her face was hidden on his arm.

"I—I found it in an old portfolio of drawings at the Grange," she said, in a stifled voice. "Squire Todhetly drew it years ago. He said he was quartered somewhere with his regiment and saw her. I—I admired it and begged to keep it."

TO BE CNNTINUED.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Peaconsfield, P. Q, has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL &c.
PAIN KILLER

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

Cathartic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for **Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver,** and all other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

MANHOOD
HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO
MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.
MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.
MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

ST. LAWRENCE HALL, MONTREAL

THIS Hotel has been recently retaken by Mr. HENRY HOGAN, the former proprietor, who has handsomely and appropriately decorated and renovated the interior, and completely refitted the whole of the apartments with new furniture. The Hotel is admirably situated, being in the very heart of the city, and contiguous to the General Post Office, the principal Banks, public buildings, law courts, commercial exchanges, railway and telegraph offices. 144d1yr

Daily Intelligencer.

30,000,000 Boars (Boers) on the March.

WAR TO THE KNIFE.

Massacre of the Innocents.

COL. SELLERS SENT TO THE FRONT.

From our own Correspondent.

INDIANAPOLIS, April 13th.

It is estimated that there are 30,000,000 hogs in this great Republic (lawyers not included) who, although not allowed to vote, are exercising a powerful monetary influence on the country, as well as taking advantage of the free school system, by a thorough mastery of the American roots.

In this enlightened age, it is very gratifying to know that the works of Bacon, and Chaucer, are as familiar with every household as Lamb or Deacon. Hogs are no more responsible for their hereditary traits of character than men. They can't help it because their mammas and papas were pigs, and therefore it is not fair for us, because our specialties are not in the same line (if they are not) to find fault. I have no sympathy for those people who are always insinuating that because the male is a boar, he is like the Life Insurance agent. I have known of a great many, whom it would be unfair and unkind to put under that head, simply because of no desire to hurt any widow's feelings.

Like the Mohammedans, who annually go to Mecca, to the tomb of the prophet, these can be seen collecting in herds from the million farms of the great west, and securing tickets by the "Kankakee line" (Hunter cars on all trains) bound for the great hog mill in this city, where 530,000 of them were last year under-ground in delicious hams, shoulders, middlings, lard, and more than 600 miles of cured sausages—and we presume at a profit also. The similarity between the two is remarkable, only the one is a dead prophet who will never come back, and the other "small profit and quick returns" (awful flat joke). Last week I visited the immense tomb of Kingan & Co., where these pilgrimages are made to. Forgetting myself, I omitted taking off my shoes on entering, until I saw the notice "no admittance." Quickly then I thought how becoming it would be, seeing that the ground whereon I stood was wholly. At this enormous place everything is done in a corresponding ratio. You can't fully know how an ungraceful hog could jab a sharp knife into his throat, (unless you tried it), then roll into a sea of boiling water, from which there was no exit but through a tunnel fitted with automatic knives that remove his fur and leave him in his clean bear (bare) skin, and then thoughtlessly rips him into fragments with a countless number of knives, and lastly has a severe tanning in the smoking room. Imagine this amusing operation repeated 3,000 times a day and you have some idea of the work carried on here.

We felt so glad Nathan was'nt there to have to weep over those three thousand individually, and to hear his cruel father say:

"Fie Nathan, said the butcher man,
Why dost thou weep and wail,
Come, bear it like a butcher's boy,
And thou shalt have the tail."

Supposing the dear boy had withheld the flow of his emotions for one day, what in the world could he have done with those 3,000 narratives?

A diurnal tidal wave of pigs is necessary to keep things in active operation.

Annually they require 5,000,000 lbs of salt; 160,000 lbs. salt petre; 100,000 lbs. sugar; as the work is carried on during the summer 17,000 tons of ice are required to keep the atmosphere at a proper temperature. 700 men are employed in the various departments. The offal is constantly being used as fertilizers while the clean, white meat is being cured in three immense two story cellars under the slaughter, packing and store houses, all of which are connected by tunnels, so the workmen never have to come to the daylight, but move about by candle light below. Candles are used because they give out so little heat. The hams and bacon are cured in 17 large smoke houses.

Last season they shipped to Europe 57,200,000 lbs. in 90,000 new cases, and 8,000 tiers of choice lard.

The hog is a noble animal, and should be treated as such. How absurd to put a tax on dogs, which are only used for sausages, and not recognize the claims of the festive h— People should be very careful and not leave fruit cake around loose. They're death on it.

SCIENTIA ET LIBERTAS.

Coming into Line.

The Galt *Reformer* wheels into line on the Canada Pacific Railway question. It is very well satisfied to know that the company, composed of shrewd business men, is commencing its work in earnest, and "will do all it can in an enlightened spirit to promote its own interests," and those of the country through which the road will pass. Our contemporary is "pleased to know" that the tariff that has been adopted is a reduction on the rates that have hitherto been charged, and hopes the low rate will be continued, but "fears" it will not. It thinks the rebate for actual settlement a wise provision, which will conduce to the interests alike of the immigrants and company. Our contemporary should shake off the few fears which remain, and which cannot have very deep root, as to the utility and advantages of the Syndicate scheme. What further guarantees can be possibly required as to the intentions of the company than their first act upon assuming the contract? The lands which Mr. Blake estimated as being worth not less than four dollars an acre to the country, the Company has agreed to sell to settlers at $2.50 an acre, and for each acre put under cultivation it agrees to make a rebate of over one half. Is there anything left to complain of on that head? Then with regard to the charges on freight. The effect of granting large powers to a single Company was magnified at a fearful rate by the *Globe* and the Opposition in Parliament. Everything that could make bitter this sort of oppression was pictured forth in lurid and distressing colors, with the intention doubtless of getting up a scare, and frightening away settlers. But, contrary to these fears and suspicions, instead of putting up the rates of traffic, the company announces a reduction. The public are treated in a spirit of liberality which even supporters of the Syndicate had not been able to foreshadow, and people of all shades of politics are pleased. Reformers, as well as Conservatives, are coming into line in favor of a policy which is to result in the speedy development of the North-West, and the opening up of a region which will prove the largest and the richest wheatfield in the world.—*London Free Press.*

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aobility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

To the Editor of the Intelligencer.

SIR,—You lately gave insertion to two interesting accounts, copied from the New York *Tribune*, of visits paid by their reporter to spiritual mediums, resident in that city. As bearing on the same vitally interesting question—the possibility of the communion of our friends, "not lost but gone before," with ourselves, still living in the flesh—let me draw the attention of your readers to a kind of permanent arrangement in operation in Boston for facilitating intercourse of this kind. At the *Banner of Light* office in that city, a public "seance" is held twice a week, to which all inquirers are freely invited. A lady who has the reputation of being an excellent "medium" as well as a very estimable character, attends regularly, and after a little preliminary music, passes quietly in the state of "trance." Questions are then in order from those present, under the supervision of the chairman—a Mr. Wilson—who acts regularly in that capacity. These questions are "viva voce,"—refer to a great variety of topics—and are answered "impromptu" by the medium, said to be "under control" of a band of very able spirits, of whom Theodore Parker, Wm. E. Channing, and Father H. Fitzjames appear to be among the most prominent. Questions are also received in writing from persons at a distance or unable to attend, and similarly answered at these public gatherings, which, by the way, seem to be well attended, —the audience varying, say, from 30 or 40 to 150. As already intimated, no entrance fee is taken.

As an interesting example of the questions and answers on these occasions, the following excerpt may be given as it appeared in the *Banner of Light* report of one of these seances in 1868, Theodore Parker being supposed to be the "controlling spirit," speaking through the then "medium," Mrs. Fanny Conant, since deceased:

"BANNER OF LIGHT, FREE CIRCLE,
Sept. 2nd, 1868.

"CONTROLLING SPIRIT.—"In answer to a question which has been propounded to us at this place, but which has not been answered, a selection will be read by the author, who has been absent from the body of flesh fourteen years; hoping that it will answer the needs of that sorrowing spirit, and assist her to think in the right direction. The question is this: 'Is it right for me, or for any one, to seek to obtain a permanent home on earth?' She further adds: 'I have all my life sought for it, but in vain; and I have come to think that it is not right for me to seek longer for a home on earth. Still, I am in doubt. O angels, give me light.'

THE BETTER LAND.

"For here have we no continuing city, but we seek one to come."—Heb. xiii. 14.

"No city here, no constant habitation
Wherein to lay our throbbing hearts and fears;
No city here, where sorrow and vexation
Can enter not, and bring their weight of cares;
No home of rest, where change can never enter;
No home which time can crumble not away;
No love-wrought ties that death can fail to sever;
No spot where darkness follows not the day!

"We trust in friendship;—like the tossing ocean
The waves of time can soon deface the spell:
We trust in love;—a word, a look, a motion
Can bear away the dreams we love so well;
We trust in fame, and find it but a bubble,
Whose tints, when grasped, fall silently away;
We trust in wealth;—'tis on a sea of trouble,
It taketh wings and fleeth, in a day!

"We have no home, no region free from sorrow;—
Poor houseless wanderers in a desert drear;—
No place to call our own, no sweet to-morrow,
Where pleasure comes unsullied by a tear.
No home? No home? On drooping pinion weary,
Like the lone dove that wandered from the ark,
Must we roam on, still sad, unblessed and dreary,
Without a hope, a day-beam, in the dark?

"Ah, no! ah, no! From Heaven's own broad expansion
A spirit whispers, through the shadowy blue,
'The Father has full many a spacious mansion;'
There is a home, a happy home, for you;—
A home where death and time can never enter;
It stands uncrumbled by the flight of years;
A stream of bliss is glittering in its centre;
'Tis God's own city, unalloyed by tears.

"There, in that home, no throb of deep dejection
Can check the gladness of the joyful heart;
But, sweetly bound in God's own true affection,
Nothing can rend those clinging ties apart.
We have no home on earth; but, sadly driven
Adown life's stream, where sorrow leaves a trace,
Hope on, sad soul; there is a home in Heaven,—
A constant, firm, and sure abiding place.

"Let us not mourn, though life may bring us sorrow;
Soon shall we cast aside the cumbrous clay.
We have a hope, a glorious hope to-morrow,—
A home in heaven, a home of constant day.
We have no home on earth: then let us sever
Our thoughts from earth and its alluring love,
And list the angel's voice, that whispereth ever,
'There is a home of constancy above.'"

C. P. O.

Belleville, April 19, 1881.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a laboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING'S NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

and solicit the favor of a call from all who wish to secure a really stylish article at a moderate figure.

SANDERS BROTHERS.

Belleville, April 7. 327d1m

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville.

Daily Intelligencer.

BELLEVILLE, MONDAY, APRIL 25.

Some Features of the Blake Banquet.

The freedom from corruption of the Grit party was exemplified at the Blake banquet in Toronto by the presence of Mr. Patrick Hughes, in one of the vice-chairs. Mr. Hughes opposed Mr. Plumb in Niagara in 1878, and was returned as elected by a majority of 2, but on a protest being entered and tried, he was unseated and disqualified for wholesale bribery. Walker of London, and Norris of St. Catharines, were also present as a Reform protest against electoral corruption, and added much *strength* to the malodorous subject.

The presence of Messrs. Jas. Brown, M. P., N. S. Appleby, M. P. P., and Phipps the unappreciated, was suggestive of the homogeniety of the party.

The presence of Messrs. J. D. Edgar, David Glass, Dr. Landerkin, James Metcalfe, Lewis Ross, Wm. McGregor, Wm. McCraney, James Norris, A. H. Dymond, Horace Horton, Col. Higinbotham, John Macdonald, Col. Walker and Robert Smith, all ex-M.P.s, and of a number of ex-M.P.P.'s, must have acted as a wet blanket, as exemplifying the vanity of human desires and the estimation of "Reform" which the people of this Province carried in 1879.

If those present thought of these things, they must have had rather a gloomy time until the wine began to circulate.

Even the *Globe's* long withheld testimonial to Mr. Blake as a party leader, and prophecy as to his probable success if ever he became head of an administration, is not sufficient to banish such shuddering thoughts from the minds of the faithful.

Mr. Blake's speech contained absolutely nothing new. His references to the Pacific Railway bargain, which events have sufficiently disproved, a repetition of his declarations in favor of free trade, a disingenuous reference to the annual expenditure, and an appeal to his party to organize, were the chief topics of the speech. Imperial federation, which was largely dealt with in his Montreal oration, was not touched upon, it having proved far from popular amongst the party in Ontario.

One thing Mr. Blake did say—and only one which was worthy of special remark; it was the following reference to the manner in which the law relating to Dominion lands in the North-west was passed at the late session; we quote from the *Globe's* report:

> It was at the very latest moment, almost, that the land law was brought down—at a period when proper discussion was impossible, when, in fact, it is the executive that legislates, and when too many bad Acts are annually passed. * * * * It is our bounden duty as members of the Liberal party, as men who believe in the Legislature exercising effectively its legislative functions, to protest against the system of carrying, at the very latest hour of the session, important measures of this description, and to insist that due time be given for consideration by the House and by the constituencies before proceeding finally and irrevocably to the determination of momentous questions such as those to which I have referred. (Cheers.)

The gentlemen who cheered this declaration doubtless did so without reflection, as a moment's thought would have convinced them that Mr. Blake, in giving utterance to such high-flown sentiments, was in fact condemning himself, because he had in the past been guilty of the very practices of which he complained. We refer to the legislation of the Ontario Legislature, session 1871-2, with regard to aid to railways. Mr. Blake succeeded in defeating Mr. Sandfield McDonald's Government, on the question as to how the aid of railways was to be granted. Mr. McDonald stood on the platform of adherence to the constitutional practice and Governmental responsiblity, but Mr. Blake proposed an amendment declaring that each grant must be approved by the Legislature, and on the passage of this amendment by the House, the McDonald Government resigned and an administration under the leadership of Mr. Blake took their places. What a mockery Mr. Blake's amendment was in reality, was evidenced by the fact that his railway aid legislation was not introduced until, to quote his own language, "the very latest moment—a period when proper discussion was impossible, when, in fact, it is the executive that legislates, and when too many bad Acts are annually passed." The "due time for consideration," of which Mr. Blake now speaks so glibly, was not given, as the Orders in Council were rushed through at railway speed, and no chance afforded for discussion.

But this was not the worst feature of the present Grit leader's tyrannical and inconsistent action. The design of the Coalition Government, as explained by the Attorney-General had been to give assistance to such lines only as would open up sections of the country which were unprovided with railway facilities, and which would serve the purpose of colonization roads; but the armful of Orders in Council which Mr. Blake's purchased majority rushed through the Legislature contained grants to all sorts of railway enterprises and committed the Province to a reckless expenditure in aiding a haphazard lot of railway lines of which Mr. Sandford Fleming, late Chief Engineer of the Pacific Railway, said in an official report: "If the railways of Ontario had to "be established *de novo*, a careful study of "the requirements of that Province would "enable any intelligent engineer of ordin-"ary experience to project a new system "which at *one half* the cost, would far bet-"ter serve the public." Thus, by refusing to allow time for consideration, Mr. Blake committed the country, according to the official statement of the best authority on the subject, to an absolutely useless expenture of four millions of dollars, that is, taking the whole amount of railway aid granted by the Province at eight millions, which is rather below the correct figure.

From this position and responsibility Mr. Blake cannot escape. He may vapor before his admiring followers as to the alleged improper practice of others, as to ill results from which he adduces no proof; but in doing so he makes apparent his own hypocrisy, and renders it clear that his professions and practices do not accord. Despite the lofty ground which he now takes, Mr. Blake has shown by his conduct that he is an unreliable, unscrupulous and reckless administrator, and a man not to be trusted. This is the net result of the Toronto banquet.

The Secret of Health.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of Herrick's Sugar-Coated Vegetable Pills, and you are safe. They never fail in any case of sickness or inward pain. Try them.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Still Another.

The Ottawa *Free Press* is still at its fabrications. Only a day or two since we found out its utter unreliability, owing to its fabrication of statements in which there was no truth, and now we have another specimen in a short article replying to a statement made by the *Mail* that Auglin was the job printer for the Government while he was Speaker of the Commons. The *Free Press* accuses a number of members of the House of being interested in newspaper establishments in Canada, and asks: "Does "any man suppose that Mr. Thomas White "has no pecuniary interest in the Montreal "*Gazette*, Mr. Bowell no stake in the Belle-"ville Intelligencer, Mr. Rufus Stephen-"son no claim on the *Chatham Planet*, Sir "S. L. Tilley nothing to do with the St. "John *Sun*?" We do not know what "any man supposes," but this we do know: that Mr. Bowell has "no stake in the Belleville Intelligencer," whatever may be the interests which the other gentlemen referred to may have in journals published in Provinces. We tell the *Free Press*, that the Minister of Customs does not own, nor hold for any one else, one dollar's worth of "stake" in this journal. It is owned and published by a Company, of which he is not one, nor does he hold a cent's worth of stock. Is this sufficient for the Ottawa Grit sheet? Will it withdraw the statement? We doubt it.

For the Intelligencer.

Industrial Committee.

Mr. Editor.—I notice from your issue of Wednesday last, that the Industrial Committee have at a meeting held on Tuesday evening, proposed some plans for the bettering of our city by several industries, the first proposed being "Car works." In my opinion the Committee could not have hit upon any one which would yield more profit than car works, nor one that would give employment to a greater number of hands with a small outlay of capital.

I have not time to go into calculations, but would say if it can be made profitable at Cobourg, why not at Belleville? We have as great, if not greater facilities for manufacturing than Cobourg has, so all that is wanting is energy, and the capital could be raised and the works started. If Cobourg has 200 men employed and overrun with work, why could not Belleville at least follow in the wake? And if only 100 men were employed and only one third of that number men of families, it would add about 200 at least to our population, every one of whom would become consumers, and if doubled would bring back to the city an amount of prosperity much needed. So by all means let us have a Car Factory, which would soon bring about the manufacture of car wheels, adding still further population and prosperity to the City.

I fully agree with the remarks made by Mr. C. F. Smith, in reference to establishing a Stove Foundry. Why should we be compelled to bring all our stoves and castings from abroad, when we could make them ourselves, and not only supply the wants of our own county, but become exporters of the article? The amount of capital to start successfully is not so large that it might not easily be obtained.

Mr. Smith's estimate of the cost per pound for manufacturing agrees with my knowledge of what stoves can be made for, and would give a fair profit to any company. The best proof of this is that those engaged in the business continue to manufacture, and some are enlarging the capacity of their factories. By all means let us have a stove foundry and thereby add both wealth and population to the City.

A Malleable Iron Factory would most undoubtedly pay well, as there is a large number of articles made of it, and is an industry that, like the others, would add much to the population and prosperity of the City, and if to this a small charcoal furnace was added, it would no doubt be found both useful and profitable.

No doubt, as the Chairman states, "there were some smaller industries that could be established for a commencement," which would help materially to benefit the place, yet there are many larger ones which should not be overlooked. Why could we not have a large manufactory of boots and shoes, employing many hands, instead of furnishing the City and country from Montreal and elsewhere? also the manufacture of Clothing and Hats, &c.

We might also have a Starch Factory, a Broom Factory, a Brush Factory, as well as others, nor should we forget the actual necessity of having Iron Smelting Works. On this topic I have written so much, as well as others, it is not necessary to enlarge. Then also Cotton and Woollen Factories, which would naturally come in due time. The main thing is to make a beginning and when once we get one or two industries started we will see the need for more.

See how long it has taken for the people of Kingston to wake up, but now they have got fairly started they are bound to go ahead. Look at Napanee, with new industries already started and others in contemplation, to go no further, and then let the inhabitants of Belleville say, is it not high time to awake and go to work to bring back former prosperity; unless we do we must expect our fair city to retrograde, our working population to leave us, our houses and stores to become tenantless, our rents to become merely nominal, and the future of the place materially injured if not wholly destroyed.

Æsop tells us in his fables that a waggoner who had got his horse stuck in the mud "went down on his knees and prayed to Hercules to come down and help him out; Hercules looking down from a cloud told him to put his whip to the horses and his shoulder to the wheel, then if he did not get it out it would be time enough to ask for help."

Shall we not take Hercules' advice and try and help ourselves, and then no doubt we may attract help from outside. Depend on it unless we do something to help bring about prosperity, our City will retrograde into an insignificant Town.

Yours &c., &c.
Billa Flint.

Belleville, 23rd April, 1881.

Marine Notes.

South Bay is now clear of ice.

The water in the bay is rising a little.

The tug *Bonar* has been towing for Messrs. Gilmour at Trenton.

The schr. *Katie Eccles* passed up to Trenton on Saturday afternoon.

The schr. *D. Freeman* cleared for Oswego with barley on Saturday.

The schr. *Blanche* has arrived and is loading poplar bolts for Charlotte.

The *Hero* did not arrive from Kingston on Saturday night, as was expected.

The scow *Glasgow* is having a new centre board box put in at Cuthbert's ship yard.

The steamer *Alexandra* will leave here on her first trip to Montreal on Monday next.

The schr. *Olivia* has been chartered for a cargo of the same description for the same destination.

The schooner *J. N. Carter* has arrived from Kingston and is at Ox Point, loading cut stone for Toronto.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

St. George's Society.

Procession and Sermon.

St. George's Day (which fell on Saturday) was celebrated yesterday. At 2:30 the St. George's Society marched in procession from their rooms, Robertson's Block, to Christ Church. The procession was not as large as it has been in past years. Arrived at the church in which a number of persons had already assembled, the regular evening service was gone through with by the incumbent, Rev. Dr. Clarke, who also offered up a special prayer appropriate for such occasions. The annual sermon was then preached by Dr. Clarke. He chose his text in Psalms, xlviii., 12, 13—"Walk about Zion, and go round about her; tell the towers thereof, mark ye well her bulwarks, consider her palaces, that ye may tell it to the generation following."

This passage he said typified the conditions both civil, political and religious, in which a people may be placed. It typified things eternal as well as temporal. The ancient Jew looked upon Mount Zion as the type of all that was most glorious in the history of his race. It was instinct with reminiscences of the past history of the nation, and was revered with a reverence which is now almost inconceivable. What Zion was to the Jews England is now to Englishmen throughout the world. It was to recall once more the reminiscences of the history of other days, the deeds of great men long dead, that this anniversary was held; and it was an elevating and inspiring custom, to have certain occasions set apart for us to review the history of our race—a history which, more than that of any other people, is the history of human progress.

The Psalmist enjoins the Jewish nation to "mark well the bulwarks of Zion." It would be well for us to follow out this injunction. The two grand bulwarks of England's greatness were her two great institutions, Church and State. He did not believe in the divorce of these two institutions. "What God has joined together let no man put asunder." The history of no nation was complete unless the religious history of that nation was carefully considered. If we knew the religion of a people we could get an insight into the character of that people. Our young people should "mark the bulwarks" of our civilization more by studying the history of England more closely. It was a history the intelligent study of which could not fail to give one a grander idea of human destiny, and a firmer faith in the providence of God.

We are also told to "mark well her palaces." The preacher denounced strongly the spirit of socialism, nihilism, or whatever it may be called, which seemed to abound in the world at present, which had for its aim the destruction of rank and the deprivation of property from those to whom it had come down through centuries and whose inalienable right it was to possess it. Such a spirit was not in accord with the spirit of an Englishman, and there was no danger of its growing to any great proportions in England. The national spirit shunned to "strike below the belt." He eulogized the higher classes of England, dwelling on the great benefits to mankind of which they had been the instruments, and their salutary influence on society. He was certain that, though the masses in England may occasionally grumble, they will never follow the example of continental revolutionists, unless the character of Englishmen underwent a great change.

Though there were things in the history and constitution of Britain which are cause for regret, we must arise from a study of them proud that we are of English blood; proud that we belong to the race which has opened up continents and extended its commerce to every quarter of the globe, and followed it with the establishment of law and order; proud that we can claim an inheritance in the great legacy which the poets and philosophers and orators have left us in what we may claim as the noblest and richest literature which the world has seen; proud that we have in our veins the same blood that flowed in the veins of a long succession of heroes and martyrs—both of the Cavalier and Roundhead type of Englishmen—who willingly and cheerfully yielded their lives for their country, for their faith, or for a principle. We should cherish the history of the noble deeds of our ancestors, should ponder them well, and should strive to become worthy sons of the race from which they spring.

Dr. Clarke then referred to the late Lord Beaconsfield, characterizing him as "the greatest Englishman that ever lived, though without a drop of English blood in his veins." He then he dwelt on the work of the St. George's Society, and closed by an earnest appeal to his hearers to more faithfully carry out the objects for which the Society exists—to give a helping hand to Englishmen who seek our shores in order to obtain a livelihood, and to aid all their countrymen in distress.

A collection was taken up in aid of the charitable funds of the St. George's Society.

Prof. Stanistreet presided at the organ during the service, and played three voluntaries with his usual taste.

Yachting Notes.

The *Gracie* was launched this morning and will be fitted out at once.

The *Pinafore* and *Mabel* have also been launched. The former has been fitted out.

A gentleman who recently visited Kingston, informs us that an addition of upwards of two feet has been made to the keel of the *Emma*, and that the *Laura* has been lengthened and widened.

The Lips We Love to Press

inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints that have been stiff for years.

Dr. Lloyd, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of Allan's Lung Balsam, I have no hesitancy in stating that it was by the use of your Lung Balsam that I am now alive and enjoying good health.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for simliar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

Daily Intelligencer.

BELLEVILLE, MONDAY, APRIL 25.

5 O'CLOCK EDITION.

City and Vicinity

THE annual dinner of the St. George's Society takes place this evening at the Dafoe House.

ALTHOUGH rain has not fallen for several weeks, the milk routes in the city are as well supplied as usual.

AN old drunken woman was placed in the cells on Saturday evening, and has been their occupant since that time.

THE "My Partner" combination, said to be a first class company, will appear in the Metropolitan Hall on May 4th.

LARGE numbers of cattle destined for the European markets passed eastward over the Grand Trunk yesterday afternoon.

THE gentleman who borrowed from this office the January number of *Blackwood* and the *Contemporary Review* will oblige by returning them.

SECURE your seats for the concert to be given in the City Hall on Wednesday evening by "The Rivals" Concert Company. The plan is open at Reynolds'.

AMONG other good things Street Surveyor Taylor might do would be the putting down of the western side of the street crossing near the Commercial House.

THE *Ontario Gazette* of Saturday does not contain the appointment of Dr. Hope as Sheriff. It, however, contains that of Mr. Frank Fletcher, of Bancroft village, as a Notary Public.

A LARGE number of citizens visited the Agricultural Grounds yesterday afternoon for the purpose of seeing what was to be seen of the great show. Very little was to be seen, however.

AN extension of 35 feet is now being made to the western end of the dock at Ox Point. This will afford vessels loading thereat greater accommodation and in addition leave them a greater depth of water

AS Mr. D. R. Leavens was driving to the city this morning, his horse was seized with a fit and fell down in the road. The animal sufficiently recovered to be taken home and is not now considered in a serious condition.

THE drive for Mr. F. Wallbridge's mill at Shannonville was started on Friday last. It numbers 6,000 pieces, will traverse a distance of 45 miles, and is expected to reach the mill in about a month. The cut is for Rathbun & Son.

AT the fire this morning Mr. Landsberg lost a large quantity of clothing belonging to Shelby, Pullman & Hamilton's show, which had been given him to clean, consisting chiefly of costly band uniforms. Fortunately the box which contained the clothing was afterwards recovered.

EARLY GOSLINGS.—A flock of goslings, numbering 13, was observed on the commons on Cedar street this afternoon.

WEATHER PROBABILITIES. — Toronto, April 25.—Lakes: Moderate to fresh winds, fair to cloudy warm weather, with rain areas.

SOLD OUT.—Mr. Monaghan has, we are informed, sold out his wood-yard to Mr. J. G. Robinson and another gentleman, who will carry on the business.

APPOINTED.—The Warden has, we believe, appointed Dr. Farley, to the position of Gaol Physician, recently vacated by the resignation of Dr. Hope. The appointment, however, is temporary and awaits the confirmation of the County Council which meets in June.

IMPORTANT.—All the members of the W. C. Association are urgently invited to attend a meeting on Tuesday, the 26th of April, at three o'clock in the Council chamber, to decide upon the site for our Hospital and Home.—E. J. Flint, Corresponding Secretary, W. C. A.

ACQUITTED.—The lad Charles Hill, who was tried before Judge Lazier on Friday, on a indictment for stealing some lead pipe from the late residence of James Glass, was acquitted, the learned judge holding that the evidence did not show that the boy in taking the pipe had a guilty intent, but he thought and believed he had the right to take the article in consequence of Mrs. Raills having told him he might take it. C. L. Coleman, County Attorney, for the Crown; Geo. D. Dickson for the prisoner.

BETHEL HALL SERVICE.—The service in Bethel Hall over Haines and Lockett's boot and shoe store will be conducted (D. V.) this evening by the Rev. D. Mitchell. All classes are invited.

ACCIDENT.—A horse belonging to Mr. Wm. Alford ran away this morning with a boy named Jackson, who was riding on its back. The rider was thrown and, his head striking against the wheel of a waggon, he was rendered insensible. Dr. Willson, who attended to the injured boy, states that his injuries are not of a dangerous character.

POLICE COURT.—The case of Edwin A. Robbins, who was prosecuted on Saturday under the By-law regulating transient traders, was settled this morning by the Magistrate dismissing the case on the ground that Mr. Purdy, the auctioneer, was the occupant of the premises. The only other cases before the court were two drunks—Mrs. Elizabeth Henderson and James Ketcheson, both of whom were dismissed.

OBTAINED HIS CERTIFICATE.—Capt. A. A. Farley, of No. 3 Company 15th Batt., has succeeded in passing a very creditable examination at the Royal Military School at Kingston, and has been awarded a first-class certificate. He obtained 78 marks out of a possible 100. The captain has not completed his military education yet, however, as he intends returning to Kingston to take a further course in the art of Gunnery.

REKINDLED.—The ruins of the house near Flint & Holton's mill, which was burned on Saturday night, and which had been smouldering throughout yesterday, kindled afresh shortly before 6 o'clock last evening, and No. 1 engine had to go over and extinguish the flames, which had spread to the dry sawdust in the vicinity and even to the sidewalk. It did not take long to quench them, and effectually prevent them from starting up again.

SHIPMENT OF HORSES. — Mr. Walter Fanning shipped to-day, per G. T. R., seven horses to Montreal, from which they will be shipped to Barbadoes, W. I. They are shipped in charge of Mr. McLean, of Stormont, the well-known horse dealer, who intends disposing of them in Barbadoes. We are informed that Mr. Fanning has also received instructions from Mr. W. Jacobs, of Montreal, to purchase a carload of horses for the Montreal market.

THE LOWER BRIDGE ON FIRE.—The coals which dropped from No. 1 engine when she went over the lower bridge last evening set fire to the dry accumulations on the bridge, and from thence to the planking, and considerable difficulty was experienced by the police in effectually quenching the fire. Shortly before 10 o'clock fire was discovered rapidly spreading between the planking of one of the footpaths of the bridge—caused, probably, by a carelessly thrown cigar stump. It had burned about a foot between the boards before it was discovered and extinguished.

FOOTBALL MATCH.—A spirited and well-contested match at football between teams drawn from the pupils of the High School and the Deaf and Dumb Institute was played on the old cricketground, Queen St., on Saturday afternoon. Some very fine play was shown on both sides, and so evenly divided was the strength of the teams that the match resulted in a draw after some three hours of vigorous playing. Two games was won by the mutes, and one by their opponents when the match was declared drawn, at 6 o'clock. The match will be played off on the afternoon of Saturday, May 7th.

SHELBY, PULLMAN & HAMILTON'S GREAT SHOW COMING.—Our amusement seekers will be glad to learn that one of the largest —if not *the* largest—shows now in the country, will visit us at no distant day. It is known by the title above mentioned, Mr. Dan Shelby, of Buffalo, having associated himself with Messrs. Pullman & Hamilton in its organization and management. It will comprise a large Circus company of the very best artists; a full and rare collection of wild animals, including a large herd of Elephants; a Marine Aquarium; a very extensive Museum, and many other attractions. It will travel by rail, and give one of the largest and most georgeous of street processions. The proprietors have the reputation of always dealing fairly by the public, and keeping all their promises, and we do not doubt that their present show is everything that they claim for it. This show will be in Belleville on Saturday, April 30.

FIRE ON SATURDAY NIGHT.—About half-past 11 on Saturday night a wooden building near Flint & Holton's mill was discovered to be on fire, but for some strange reason the alarm was not carried to the police station until some minutes after. When the alarm did sound and the engines turned out it was too late to save the building, which was old and burned like a bit of tinder. Before the engines could get to work the flames had wrapped the building like a red mantle and leaped out through the roof. The two heavy streams which were soon playing on the flames, however, were not long in extinguishing them, but not before the building had been almost entirely destroyed. Nothing but the bare skeleton remained. The promptness with which the engines got to work on this occasion is worthy of notice and commendation. The first tap of the alarm was given at 17 minutes to 12. At 11 minutes to 12—or only six minutes after the first alarm —No. 1 engine had a stream playing on the flames. No. 2 had a stream two minutes later. The house was unoccuppied, having been vacated by Mr. L. Marlow, last Wednesday. It was owned by Mrs. Short. It was of but little value — probably not more than $400—and whatever loss there was from its destruction was covered by insurance. The origin of the fire was probably incendiary.

FIRE LAST NIGHT.—"It never rains but it pours." After an interval of peace to the firemen, when one fire occurs it is almost certain to be followed by another within a day or two. About a quarter to 3 o'clock this morning the alarm was sounded from the clock tower. The fire proved to be in the wooden shed in the rear of the grocery store of Mr. Jas. Wilson and the second-hand clothing store of Mr. J. Landsberg. When first noticed by Mr. Wilson, it was in the angle formed by his back premises and those of Mr. Landsberg. Mrs. Wilson threw a pail of water on the flames, which then covered a small space, while Mr. Wilson gave the alarm. The engine was promptly on hand, and after a lively battle with the flames their progress was arrested and the buildings were saved, but not until after considerable damage had been done. The principal part of Mr. Wilson's stock was carried out of the building, across the road into Mykel's grocery store, and naturally suffered much damage in the removal. A considerable quantity of material was also lost. In his new premises Mr. Wilson had a considerable quantity of pork and other stock, which was all destroyed. His loss will be about $300, but it is covered by insurance. Mr. Landsberg's stock of clothing received a good deal of damage, and he had some of his stock stolen. His loss will foot up to $100, but he also was fully insured to the amount of his loss. The only real loss falls on the owners of the buildings. Mr. Wm. Powell will sustain a loss of $150 on the part that was burned, and $150 more on stock which was near it, consisting of dressed lumber, &c., which was destroyed. He was uninsured. The heaviest loser is Mr. I. B. Graham, who is the owner of the shop occupied by Mr. Wilson. The sheds in rear of the shop were entirely destroyed, and the rear part of the shop itself was also badly damaged. Mr. Graham's total loss will probably reach $350 or $400, on which there is $200 insurance. The origin of the fire is not known, but Mr. Wilson, who first saw it, is positive that it was the work of some incendiary.

SERMON ON BEACONSFIELD.—Last evening a rather remarkable sermon on the late Lord Beaconsfield was preached in Christ Church by the pastor, Rev. Dr. Clarke. He chose for his text. Deut. xxxiv., 5—"So Moses the servant of the Lord died there in the land of Moab according to the word of the Lord." The deceased statesman, said the preacher, was one of the great men of history. He was a man of destiny, to whom a vast work had been committed, and who had carried out that work. He was the direct successor of Moses, Mordecai, and Daniel, in carrying out the greatest work in history—the fulfilling of the purposes of God with reference His chosen people Israel. Like those great Jews of old, he was a chosen instrument in God's hands for the accomplishment of the destiny of Israel; and, like them, he knew his duty and did not shrink from it. He believed in the mysterious identity of the British race with the ten lost tribes of Israel; he believed in the literal fulfilment of the prophecies regarding God's own people—that they should inherit the earth, and that they should be restored to Palestine; and his belief guided his policy while he was at the head of the British Empire directing its course and moulding its destiny. The preacher compared him to Moses. To the ancient leader was entrusted the duty of leading Israel out of Egypt to the bounds of the Promised land; and to the modern statesman it was given to awaken the British people from their sordid dreams of commerce and lead them towards a higher, nobler goal. To Moses was granted the privilege of viewing the Promised Land from the summit of Pisgah, but he was not allowed to enter it; and so Disraeli viewed, with his intellectual eye, the grand destiny on this earth which awaited the people of God—a destiny which he had done so much to hasten, but in which, like Moses, he could not share. In looking back with a careful eye over the history of mankind, said Dr. Clarke, one great truth must strike us—that the work of God will be carried on, even though the most powerful instruments of his will are from time to time removed. No doubt, when Moses and Mordecai and Daniel died, the cry went up that the work of the Lord would be retarded for want of someone to take the place of the great worker who had been removed. When the darkness settled over Calvery and the cry "It is finished!" went up from the lips of the dying Saviour, his disciples who were viewing the scene afar off might well ask themselves in despair how the Lord's work would be carried on. But God's will has never lacked an instrument on earth to carry it out. No sooner has one great man been removed than another is up to take up the work just where it has been left off, and carry it on. And there was no doubt that the great vacancy left by the death of Disraeli would be filled by some instrument whom God would raise up for the carrying out of His plans on earth. The preacher also drew one very valuable lesson from the life of the dead statesman. He had had a certain work marked out for him, and he had done that work faithfully, to the best of his ability, and with a lofty enthusiasm and devotion to duty. It would be well for each of us, if, in our humble sphere we performed the duties alloted to us with as much fidelity and patience as was shown by the great man whom we mourn, in discharging the vast duties which were given him to discharge.

JUST RECEIVED—one hundred and ten setts Lace Curtains (bought job) and will be sold at a sacrifice. Beautiful patterns. JAS. HENNESSY.

News Condensed.

—Sir. Francis Hincks is in Toronto.

—The Red River at Winnipeg is open.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

'THEY ALL DO IT.' — Every body uses "Teaberry," the now toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

FOR ASTHMA AND PHTHISIC.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

MORNING DESPATCHES
AMERICAN.

A SENSATIONAL STORY.

PARIS, April 25.—A sensational Geneva despatch asserts that the Russian police, hoping to wring a confession from Hessy Helfmann, left her without food for 48 hours. Helfmann, who is *enciente*, had seven fainting fits, but obstinately refused to give information against the Nihilists. When food was at last brought she was unable to speak.

FROM TUNIS.

A Tunis despatch announces that Tabarca is quietly occupied by French troops.

WASHINGTON SPECIALS.

NEW YORK, April 25.—The *Times'* Washington despatch says that assuming three years is the average period for which increased pay would run on 93 favored Star routes, the aggregate of Brady's arbitrary awards on these routes would be $6,275,000. Nearly all the contractors on these routes have been special friends of the contract office, assisted by influential persons outside the Post Office department, who it is believed, received a large per centage in rewards. Among prominent parties who it is alleged supported the contractors, are ex-delegate Elkins, New Mexico; ex-Congressman Roats, Arkansas; ex-Senator Dorsey, Senator Marcy, and other members of Congress from Texas; Congressman Morey, Miss.; Congressman Blackburn, J. B. Chaffee, Rich'd McCormick, Congressman Page, Cal.; Congressman Ellis and ex-Congressman Sipper, Louisiana; and ex-Governor Thayer, Wyoming. Price, one of Brady's most favored contractors, it is alleged has support in the Missouri delegation of Congress; ex-Congressman McKebbon, Cal., it is asserted gets $12,000 a year for attending here to the interests of the contractors.

NEW YORK, April 24.—Arrived—*Circassia* from Glasgow.

OFF FOR RECREATION.

Vanderbilt says he goes to Europe for recreation and denies that he has been selling the Central & Hudson R.R. stock.

A PLOT FRUSTRATED.

COLUMBIA, S.C., April 24.—A plot of 80 negro convicts to escape from the penitentiay was frustrated. Wm. Lowery, guard at the penitentiary, has been arrested on a charge of counterfitting silver coin. A band of counterfeiters has also been discovered among the white convicts. Their implements and a large quantity of spurious coin were captured.

AFTERNOON DISPATCHES.

THE MONETARY CONFERENCE.

PARIS, April 25.—Fermaiule, deputy master of the English royal mint, is expected here on Wednesday to represent England in the monetary conference. It is believed he has been instructed simply to take notes, avoiding any expression of opinion.

BERLIN, April 25th.—A correspondent in Paris says: No prospect of success of the monetary conference; decision to postpone or even to close may be effected shortly.

A MONUMENT TO BEACONSFIELD.

LONDON, April 25.—It is understood a proposal will be made in Parliament for the erection of a monument in Westminster Abbey to Beaconsfield.

THE LAND LEAGUERS.

It is understood the Irish members of Parliament who are members of the National Land League Convention, and other members of the Opposition in Parliament, who will likely take a prominent part in the discussion of the Land Bill, meet at the Carlton Club to-day.

THE TUNISIAN TROUBLE.

TUNISIAN, April 25.—The Sultan approves of the Bey's measures. Negotiations have been opened, with powers to protect the rights of the Sultan and Bey.

LONDON, April 25.—It is now believed that the Conservative leadership lies between Sir Stafford Northcote and the Duke of Richmond.

DEATH OF JAMES T. FIELDS.

BOSTON, April 25.—James T. Fields, author and publisher of lectures, died this morning.

THE GRECIAN DIFFICULTY.

ATHENS, April 25.—It is now stated that the Minister of War has resigned because Greece's reply to the Powers did not contain a demand for a certain concession not included in the proposal of the Powers.

WASHINGTON, April 25.—Indications:—Lower Lakes, cloudy, or cloudy with rain.

NEW YORK, April 25.—The *Germanic* from Liverpool brought one million dollars of gold.

Arrived the *Gallia* from Liverpool.

LONDON, April 25.—Arrived out the *Wieland* and *Vandalia*.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

'Hail bounteous, beauteous, gladsome Spring" - this was Mark Twain's prize poem-but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

Dr. Wilson's Pulmonary Cherry Balsam in double doses every two hours.

To Cure Sore Throat

make a gargle by mixing Dr. Wilson's Pulmonary Cherry Balsam with an equal part of water. After gargling the throat, let two or three teaspoonfuls of the mixture run slowly down it.

This invaluable medicine is put up in bottles which are sold at 25 and 40 cents respectively—the latter containing double the quantity of the former.

Sold everywhere at 25 cents and 40 cents per bottle.

THE MASTODON!

—:o:—

COMING! LOOK FOR IT! SEE IT!

—:o:—

THE BEST AND GREATEST, THE MOST RELIABLE AND THE

THE MOST ATTRACTIVE SHOW ON EARTH

WILL EXHIBIT AT

BELLEVILLE
SATURDAY, APRIL 30TH,

AFTERNOON AND EVENING.

SHELBY, PULLMAN & HAMILTON'S

GRAND

UNITED MASTODON SHOWS.

COMPRISING SIX FULL DEPARTMENTS,

The Egyptian Caravan and Oriental Menagerie

The COSMOPOLITAN and TRANS-MARINE CIRCUS

AN IMMENSE MUSEUM OF 20,000 CURIOSITIES!

A Vast Sea Aquarium!

Of SEA LIONS, SEA LEOPARDS and POLAR ELEPHANTS.

A school of mechanical marvels, moving automata and inventions.

All Exhibited Under 120,000 feet Water-proof Canvas,

FOR ONE PRICE OF ADMISSION.

WHEN THE MASTODON COMES

You will see, among our Monopoly of Special Features, The Seven Wonders of the World, seven beautiful sisters, whose silken tresses fall in a massive veil from their heads to their feet, and trail upon the ground, averaging in length no less than seventy-two inches.

When the Mastodon comes you will see the sensation of the age,

"ZAZEL," THE FEARLESS,

in her Terrific Acts, in the course of which she crosses the Pavilion, 100 feet above the heads of the audience, on an INVISIBLE COBWEB WIRE, makes he codforemost dive from the summit of the Pavilion, and is SHOT FROM AN ENORMOUS CANNON, charged with Powder, and projected sixty feet, horizontally. She is the ONLY ZAZEL, and must not be confounded with others who have advertised to accomplish her feats and failed. ☞ ZAZEL NEVER FAILS. When the Mastodon comes you will see

PROF. NEIL SMITH'S GREATEST DOG SHOW ON EARTH

and troupe of canine comedians. The best trained and most accomplished dogs ever seen.

WHEN THE MASTODON COMES

YOU WILL SEE THE

FINEST LADY RIDER

IN THE WORLD

M'LLE AMELIA,

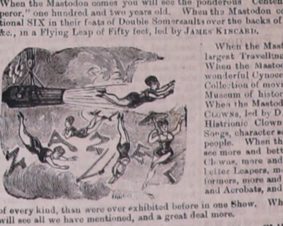
From the principal Circuses of Europe, who has no equal for Beauty, Grace and Skill.

When the Mastodon comes you will see

2,000 POUND SEA LIONS

and a Group of PONDEROUS SEA MONSTERS, in the Immense Arctic Aquarium.

When the Mastodon comes you will see the Sensational Bareback Rider of the day, and Champion Hurdle Rider of the World, **Mr. FRANK BROWN**, in his Principal Act, in which he executes a double backward and forward Somersault while his horse is at full speed. When the Mastodon comes you will see the wonderful CARLOS in their feats of Equilibrium, Posturing, Classic Scenes, and the YOUNG CARLOS in their Great Four Pony Bareback Act. When the Mastodon comes you will see the ponderous Centenarian War Elephant "Emperor," one hundred and two years old. When the Mastodon comes you will see the Sensational SIX in their feats of Double Somersaults over the backs of Elephants, Camels, Horses, &c., in a Flying Leap of Fifty feet, led by JAMES KINCARD.



When the Mastodon comes you will see the largest Travelling Menagerie ever collected. When the Mastodon comes you will see the wonderful Cynocephalus, the Zulu Band, the Collection of moving Musical Automata, and a Museum of historical and natural Curiosities. When the Mastodon comes you will see FIVE CLOWNS, led by DAN SHELBY, the versatile Histrionic Clown and Impersonator, in his Songs, character scenes, and Types of peculiar people. When the Mastodon comes you will see more and better Riders, more and better Clowns, more and finer Animals, more and better Leapers, more and better general performers, more and better Gymnasts, Posturers and Acrobats, and more and better attraction of every kind, than were ever exhibited before in one Show. When the Mastodon comes you will see all we have mentioned, and a great deal more.

One Ticket Admits to All. Admission 50c. Children under 9, 25c.

Reserved Upholstered Arm Chairs at a slight advance. Doors open at 1 and 7 o'clock, p.m. Performances commence at 2 and 8 o'clock p. m.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

LADY THORNHURST'S DAUGHTER.

BY MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

"I do not wonder at your desire to possess the sketch," said Sir Victor. "It is well done. I would not have imagined that the Squire had such talent for drawing. Lady Thornhurst will be pleased when I tell her what a fancy you have taken to her picture. It must have been taken when she lived in Lincolnshire, with her aunt, at Redruth Moor. Lady Thornhurst's first husband was an officer in the army—I forget his name."

Tessa made a stern effort to regain her self-control. Already the terrible anguish of self-renunciation was thrilling her soul. She wanted to hear all that Sir Victor could tell her concerning her beautiful mother, and upon his answers would depend her future course.

"Tell me something about this lovely Lady Thornhurst," she whispered, almost breathlessly. "She has been married twice?"

Sir Victor folded Tessa closer, and still contemplated the picture with a tender and thoughtful gaze.

"Yes," he said, "she was a widow when she married the Marquis. Her first husband died in Canada."

"Had—had she any children by her first marriage?"

How Tessa's heart beat as she asked that question!

She had a daughter, but she rarely speaks of her. The child died before Lady Thornhurst's second marriage. I was visiting at Thornhurst once when Redruth, the heir, was a baby, and I ment into the nursery in search of the Marchioness. She was alone, and bending over her boy with tears in her eyes, and the shadow of a great grief on her face. She looked like one facing some ghost of their past. And as I approached her and she did not see me, I heard her say, in a moaning voice, 'Ah, there is an aching void in my heart which even my boy cannot fill! My first-born, my baby girl—will the sorrow of her loss never lessen?' I stole out of the room as silently as I could, Tessa, and I never let her know that I had heard those words, but sometimes they ring in my ears yet. Ah, a mother's love is a wondrous thing! And proud, and beautiful and evinced as is the Marchioness of Thornhurst, I know that she mourned ceaselessly for her lost baby girl, her first-born child, and that like Rachel she refused to be comforted.

Tessa sobbed aloud. Sir Victor softly pressed his lips to her perfumed golden hair, and there were tears in his dark eyes.

"My tender-hearted, loving little Tessa!" he said. "And you can grieve for her—a stranger! That scene which I have described was sacred to me, and I have never spoken of it to a human being, but you are to be a part of myself, and there is not a thought or hope of remembrance in my soul too sacred for your knowledge. We will have no secrets from each other, Tessa."

The young girl sighed.

"Tell me more of Lady Thornhurst—Victor," she said gently. "How many children has she?"

"Two—both boys. They are little fellows, but both show forth the promise of noble manhood."

"And she has no daughter—save that first one?" breathed Tessa, again sighing. "Does Lord Thornhurst love his wife?"

"He idolizes her!" was Sir Victor's response. "His love for her is a part of his very being. She is to him what you are to me—the diviner part of himself. Not a shadow has ever crossed their love, notwithstanding that he has the nature of an Othello—strong, fierce, passionate and jealous.

Tessa uttered an exclamation.

"Don't misunderstand me, darling," said Sir Victor. "Lady Thornhurst never gave him cause for jealousy. She is pure as the snow, and as discreet and prudent in her 'walk and conversation' as if she dwelt in a glass house where all the world might view her. But Lord Thornhurst, like all of his family, has a fierce Southern nature, with the features and complexion of a far Northerner. He has the fair hair and keen blue eyes of his Saxon progenitors, and virtues enough to more than balance his inherited faults. He is brave to rashness generous to a fault, tender-hearted as a child, clear-head, with a magnificant person. You will think me enthusiastic in his praise, Tessa. Perhaps I am, but to know Lord Thornhurst is to love and respect him. Yet, like all men essentially great, he has his weakness. I have mentioned one—his jealousy. He has another which has caused me some pain, and which I wish he might outgrow. It is—you will smile perhaps, Tessa—it is a hatred of divorces and of divorced people!"

Tessa uttered a sharp little cry, which Sir Victor interpreted as one of surprise.

"Lord Thornhurst has a distant relative, a beautiful woman who was maltreated by her husband, and who instituted a suit for divorce," continued the young Baronet. "To the great disgust of the Marquis, he was brought into the case as witness. The trial was full of unpleasant details, and a great scandal ensued. Lord Thornhurst has refused to recognize his relative since—she is also my relative, and I espouse her cause. He considers the marriage tie indissoluble, I believe, and he would hate his own beautiful wife, whom he adores, if she had been the divorced wife of some other man!"

Tessa was silent, but a great darkness seemed to suddenly envelope her, sealing vision, and settling heavily down upon her heart.

She comprehended now her mother's story.

That mother was pure and noble, but her husband, Capt. Holm had been cruel to her, and she had obtained a decree of divorce from him. Then she had contracted a second marriage, and believing Holm dead, had called herself a widow. Perhaps Holm had persuaded her that her child was dead, the girl thought, though she could not well see how that could be. At any rate, her mother was married to a noble and honorable man, whom she loved but who had certain unfortunate peculiarities and prejudices upon which Capt. Holm might work to the ruin of Lady Thornhurst.

"I see it all now," the girl thought, with a great pang at her heart. "My father thinks of me only as an instrument by which to humble this noble Lady Thornhurst—my mother! He means me to marry Squire Todhetly that my unhappiness and degradation may break her heart. He means to humble her, and to work upon the jealousy of the Squire—but he shall not do it through me! I will never bring a tear to the eyes of my beautiful mother. I will never reveal my existence to her. Better that she should believe me dead in my babyhood than that she should live in terror of my appearance."

This resolution was not lightly made, and poor generous Tessa felt that in making it she was giving up all that made life beautiful or sweet. For it involved the sacrifice of her love for Sir Victor Cheswick. She could not go to him as his wife with a secret in her heart, and she dared not tell him all the truth. Her mother's secret was a sacred trust imposed upon her, which she dared not betray, even to her nearest and dearest. She felt that she should never dare obtrude herself upon Lady Thornhurst, lest the truth might appear. And withal, a deadly terror of Capt. Holm was increasing within her, and her one great longing now was to hide herself from all who had known her.

TO BE CNNTINUED.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfiy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Peaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL USE.

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

SPECIAL NOTICE

TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

HALL'S VEGETABLE SICILIAN HAIR RENEWER

Has been in constant use by the public for over twenty years, and is the best preparation ever invented for RESTORING GRAY HAIR TO ITS YOUTHFUL COLOR AND LIFE.

It supplies the natural food and color to the hair glands without staining the skin. It will increase and thicken the growth of the hair, prevent its blanching and falling off, and thus AVERT BALDNESS.

It cures Itching, Eruptions and Dandruff. As a HAIR DRESSING it is very desirable, giving the hair a silken softness which all admire. It keeps the head clean, sweet and healthy.

The State Assayer and Chemist of Mass. and leading Physicians endorse and recommend it as a great triumph in medicine.

BUCKINGHAM'S DYE FOR THE WHISKERS will change the beard to a BROWN or BLACK at discretion. Being in one preparation it is easily applied, and produces a permanent color that will not wash off.

PREPARED BY
R. P. HALL & CO., NASHUA, N. H.

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity,

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Dorington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge. Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD

HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO

MITCHELL'S CANADIAN

HAIR RESTORER.

TO THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher

Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

ST. LAWRENCE HALL, MONTREAL

THIS Hotel has been recently retaken by Mr. HENRY HOGAN, the former proprietor, who has handsomely and appropriately decorated and renovated the interior, and completely refitted the whole of the apartments with new furniture. The Hotel is admirably situated, being in the very heart of the city, and contiguous to the General Post Office, the principal Banks, public buildings, law courts, commercial exchanges, railway and telegraph offices. 144d1yr

Daily Intelligencer.

Canal Tolls.

The Government are evidently determined to attract a large share of the grain trade of the West to the St. Lawrence route, and in order that the Canadian canals shall compete successfully with the Erie, they have made the following important reductions in canal tolls, which has been adopted in Council and is published in the Canada *Gazette* of Saturday :

1st. That freight westward, bound from Montreal to Lake Erie, shall pay existing rates of toll on the St. Lawrence and pass free through the Welland.

2nd. That freight eastward, bound between Lake Erie and Montreal, shall pay existing rates of toll on the Welland Canal and pass free through the St Lawrence Canal.

3rd. That freight consigned to any port west of the St. Lawrence canals may be re-shipped from said port and pass through the Welland Canal free of charge.

4th. That articles coming under class four shall, if in transit westward, pay twenty cents per ton for passage through the St. Lawrence canals, and be passed free through the Welland. If passing eastward they shall pay twenty cents per ton for passage through the Welland Canal and be passed free through the St. Lawrence. It may be mentioned that this class four is under the former tariff described as "all other articles not enumerated," and the tolls on the Welland Canal were forty cents, so that this is a reduction of the tolls to one-half.

5. That goods not otherwise provided for under class three and four except coal, shall, if using the Welland Canal only in transit westward, pay fifteen cents per ton. Coal is to pay as at present twenty cents passing through the Welland Canal either way.

6. Rye is to be charged the same as other grain.

It is expected that the reductions thus made will be fully compensated for by the increased traffic through the canals resulting from the increased transportation business *via* the St. Lawrence for points west of the Welland Canal, and that, therefore, the revenue will not in any way suffer as the result.

Beaconsfield's Belief.

The religious belief of the late Earl Beaconsfield was summed up in "Lothair;" "Chance, necessity, atomic theories, nebular hypotheses, development, evolution, the origin of worlds, human ancestry—and what then? There must be design. The reasoning and the research of all philosophy could not be valid against that conviction. If there were no design, why, it would be all nonsense; and he could not believe in nonsense. And if there were design, there must be intelligence, pure intelligence; and pure intelligence was inconsistent with any disposition but perfect good. * * * Man requires that there shall be direct relations between the created and the Creator, and that in these relations he should find a solution of the perplexities of existence The brain that teems with illimitable thought will never recognize as his creator any power of nature, however irresistible, that is not gifted with consciousness. Atheism may be consistent with fine taste, and fine taste may for a time under certain conditions regulate a polished society, but ethics and atheism are impossible, and without ethics no human order can be strong or permanent.

The Departing.

In spite of all that may be said by our local papers respecting "the exodus," it can scarcely be denied that large numbers have already left our shores this spring for the neighboring republic. We attach little political significance to the movement : the premiership of Sir John A. McDonald or Alex. McKenzie can but slightly, if at all, affect it. Friends already there attract others ; glowing stories of business prospects prevent our youth from listening to the warning voices which occasionally reach them ; country life, on the farm, becomes monotonous, while distance lends enchantment to the view ; many capitalists in our Provinces prefer to keep their property under lock and key rather than to invest it in such enterprises as give employment at home ; and thus in a steady stream, in the earlier part of each year, our most vigorous and promising young people make use of our railways and steamers only to carry them abroad. A certain per-centage of these will return, but the great majority, or perhaps that part of the whole we can least afford to lose, will never come back, except to visit some of the friends they now leave. In our losses, however, we are not alone, for we have good reason to believe that the tide which is constantly setting towards the larger American cities, or the great prairie lands of the Far-West, draws as heavily upon the smaller Eastern States of the Union as upon the Lower Provinces of the Dominion. We cannot easily be convinced of any necessity for this annual emigration, and can only hope that a state of affairs which seems to have become chronic, may, through the development of the rare wealth of the older Provinces and the settlement of the almost boundless distances of our new territories, be gradually checked.

As a rule, Provincials have no reason to blush at the record of those who have left us to find a permanent home in the United States. It is at least some satisfaction to know that our loss is another's gain. In the Church, in the state, in the various business circles, are men who look back from honorable positions to our cities, or, perhaps: more frequently to our country settlements, as the homes of their childhood.

No branch of the Church in the Maritime Provinces has felt the loss of her children more sensibly than our own. A few years since we worshipped on a Sunday afternoon in a church in East Boston. The faces were all strange, yet seemed to us to be of a provincial type. A brief conversation at the close of the service proved that we were not mistaken, for we learned that the membership of the church in question was almost wholly composed of persons who had removed from time to time from the neighborhood of Barrington and other parts of the county in which that township is situated. These descendants of the Pilgrims had lost their Calvinistic ideas and forgotten the form of Church government held by their fathers, and had gone back to swell the volume of that Methodism which Puritan New England so long and so firmly resisted, though in vain. From the losses which our Church in the Maritime Provinces has sustained, American Methodism must have reaped a large numerical gain. And doubtless many a minister now preparing to give an account of his stewardship thinks with sorrow of the absent, and finds that in spite of additions to his classes through the winter, a decrease in numbers through removals must be reported.—*Halifax Wesleyan.*

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Sufficient Farm Help.

If we start out in the spring to till a farm of a certain number of acres without sufficient help, then a part of the necessary work must be left undone or only partially accomplished. Then is when the farmer has too much to do and gets behind with his work; neglect disturbs method and all things are soon out of balance. Many farmers say they cannot afford to hire much help. It is as necessary to have sufficient help to carry on a farm successfully as it is to have any help. If help cannot be had then let some farmer have a part of the farm to work, for the extra amount of land which cannot be properly tilled is so much land lying idle. Thus writes a correspondent of the *Husbandman*. He goes on to state his own method: "I will give the method I have followed for years, and I cannot say that I have had too much to do, and at no time have been behind with my work. The first thing that I do is to provide the best tool for all kinds of work and sufficient team power to use them. I employ the best help I can get, as I have learned skilled labor is the cheapest. Hiring cheap labor to save a few dollars does not pay; loss in damage to teams and tools more than offsetting any saving so made. It takes but a few hours for an inexperienced or a careless hand to do much damage. It is my method to keep as much help as a farm requires. I am well aware that many farmers will say, as has been said before, that they cannot afford to hire so much; but all I have to say to such is, start next spring with more help and till your land as it should be tilled, and put the farm in proper shape, and when the year comes round figure up the difference, and see if money has been lost."

Beet Fat and Lard Butter.

Manufacturers and dealers in butter are on the war-path, in consequence of shipments of oleomargarine, invoiced as butter, from the United States to Canada and Europe. The Secretary of the Treasury has referred to the Attorney-General the question whether Collectors of Customs have the power to examine packages invoiced as butter and offered for shipment to points outside of the United States. The question is considered of great importance, and the decision of the Attorney-General is awaited with interest.

Olemargarine has a rival in "Lard Butter," a compound which is described as thoroughly abominable. The lard used in this mixture is entirely different from the ordinary article, being almost raw. The process of manufacture is described as follows :—A number of pounds of raw lard, which has not been heated to the degree necessary to make the lard of commerce, are taken, deprived of the natural smell and taste, mixed with a certain amount of the best Creamery Butter, a little milk added, and the whole worked over. The result is a mixture resembling genuine butter in appearance, taste and smell. It is because of such tricks in trade that stringent legislation against the sale of oleomargarine and lard butter as the genuine product of the dairy is being considered in almost every State Legislature. It may be true as claimed by its manufacturers that cleanly-made oleomargarine is as palatable and as wholesome as good dairy butter, but people prefer to know what they are buying and paying for. As for lard butter, nothing can be said in its favor.

—On the 22nd, Mrs. Macdonald, wife of Mr. Hugh Macdonald, died suddenly at the residence of her father-in-law, Sir John Macdonald, Toronto. Heart disease was the cause of death.

—Messrs. Baker & Co., of Fort Benton, have been awarded the contract for Mounted Police supplies for the southern division, and the Hudson Bay Company for the division north of the Saskatchewan.

—A movement is on foot to start a Cotton Factory in Sherbrook, Quebec. Several leading capitalists are at the head of it, and a Committee has been appointed to select a site. The capital is to be $250,000.

—M. Jules Marion, who fell off the train at St. Mary's a few days ago and was killed was on his way to see his two sons in Montreal. On the body was found $100 in cash and an express receipt for $1,000 in gold.

—It is probable that brigade camps will be formed at the following places this season, viz :—No. 1 military district, at London; No. 2 military district, at Niagara: No. 5 district, taking in the Montreal corps, at Laprarie: and No. 6, embracing Quebec. The localities in Nos. 3 and 4 districts have not yet been selected.

—The official announcement that no one has been appointed to succeed Mr. Goschen revives the probability of Lord Dufferin's going out as Viceroy of india. Lord Ripon lately repeated the demand to be relieved of office. If he returns immediately it is expected that Lord Dufferin will go to Calcutta instead of Constantinople. Negotiations are now proceeding between Ripon and the Home Government, which desires to have him remain in India.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Daily Intelligencer.

BELLEVILLE, TUESDAY, APRIL 26.

Senator Macpherson on Financial Affairs.

It is but a few days ago that a Grit journal made a sneering reference to the fact that Hon. D. L. Macpherson had not of late published a pamphlet with reference to the financial affairs of the Dominion, and alleged as the reason for the hon. gentleman's silence that "the man who arranged his figures for him had left the country." The writer of this sneering reference to a gentleman of Mr. Macpherson's proved ability little thought that the President of the Senate had a rod in pickle for his party, otherwise perhaps he would have been silent on the subject, as Mr. Macpherson has again, in a letter published in the *Mail* of the 22nd inst., laid before the public a mass of highly important information on the subject of the administration of the financial affairs of the Dominion. The hon. gentleman has heretofore been known to the public as a successful assailant of reckless expenditure, and now he appears, and with equal ability and success, as the defender of the honest and economical administration of the present Government. The *Mail* gives an excellent summary of Mr. Macpherson's letter, which is hereto appended.

Senator Macpherson very properly calls public attention to the distinction between estimates and expenditures. The Opposition have been of late accustomed to basing their calculations on the estimates of expenditure for the year 1881-2, which does not begin till the 1st of July next, ignoring, of course, the estimates of revenue; suppressing the responsibilities of the country, which must have been great even under so wise a financier as Sir Richard Cartwright, if the Opposition had come into power and had gone on with the Pacific railway; and making unfair and delusive comparisons between expenditures actually incurred and those which are only estimated. Having thus cleared the way for intelligent discussion, Senator Macpherson proceeds to present a table, which shows in the clearest manner the true comparison between the controllable expenditure of the two Governments from 1873-4 to 1879-80. This table divides itself naturally into two parts. The first part of the table makes a comparison between the controllable expenditure of the Governments, deducting from the total expenditure the sums for "charges for debt, sinking fund, &c., and the subsidies for the provinces. The result is shortly as follows:—

Comparison of Controllable Expenditure.

1873-4	$13,060,518
1874-5	12,588,345
1875-6	13,366,012
1876-7	12,029,974
1877-8	11,843,634
1878-9	12,502,730
1879-80	12,198,966

It thus appears that the alleged grossly extravagant expenditure of 1879-80 (putting aside all consideration as to the necessity of an increase in certain directions in consequence of the increase in the demands of the public business) is actually less than in previous years, as the following figures will show. The expenditure in 1879-80 is:—

$ 869,552 less than in 1873-4.
397,379 less than in 1874-5.
1,175,046 less than in 1875-6.

And the figures for the following years show that it is:—

$160,992 more than in 1876-7.
347,335 more than in 1877-8.
311,764 less than in 1878-9.

These figures show plainly that the Mackenzie Government swelled their controllable expenditure enormously in the three first years; and that they were only cut down under the pressure of general distress, and by the abandonment of necessary and long-looked-for expenditures which have since had to be undertaken and which have swelled the accounts of the present Government slightly. If we add the figures together and compare them, we shall see a singular result:

Expenditure in 1873-4, 1874-5, 1875-6, and 1878-9 over and above expenditure of 1879-80	$2,753,741
Expenditure in 1879-80 over and above the expenditure of 1876-7 and 1877-8	508,324
Difference in favor of the year 1879-80 and the present Government	$2,245,417

Next let us take the second part of the table. Senator Macpherson contends that the North-West expenditure is properly part of the controllable expenditure, and there is much force in his contention. If, therefore, the North-West expenditure be deducted as well as the charges for debt, interest, sinking fund, and subsidies, the figures of the controllable expenditure arrange themselves as follows:—

Controllable expenditure in 1879-80	$11,015,797
Decrease as compared with 1873-4	$ 1,112,737
Decrease as compared with 1874-5	577,572
Decrease as compared with 1875-6	1,192,105
Decrease as compared with 1876-7	239,342
Increase as compared with 1877-8	71,157
Decrease as compared with 1878-9	571,019
Total (deducting $71,157) in favor of expenditure of 1879-80 and of the present Government	$ 3,662,775

These figures are put forward by Senator Macpherson at once as a statement and a challenge; perhaps Mr. Blake, who has of late exhibited a desire to indulge in financial calculations, greatly to the amazement of some of his party, may feel disposed to criticise them. They are at his disposal for that purpose. He and his followers have been denouncing the present Government for extravagant expenditure. Here is proof that the highest expenditure of the present Government is yet millions less than the expenditure of his own Government in former years. If he is disposed to boast of the apparent economy of 1877-8, he is informed by Senator Macpherson that the retrenchment was due to a decrease in the expenditure for militia purposes and for public works payable out of revenue, neither of which reductions brought the Government glory or honor.

The Late Appointments.

The *Irish Canadian* has not taken long to prove itself an adept in Grit literature, hence truth is not a component part of its political creed. Following in the wake of its Grit brethren of the press, it repeats the *Globe's* statement that the INTELLIGENCER "protested against the appointment of Dr. Murphy and Mr. Patrick O'Brien, because of their religious convictions." The same statement is echoed by that most stupid of all journals, the Montreal *Herald*. We need not repeat that the statements are utterly incorrect, and we are safe in saying that the journals which repeat them know them to be so.

Let us ask the *Canadian* in all candor what it expects to gain by its constant appeal to its fellow countrymen and co-religionists to stand together upon all occasions, irrespective of political feeling, or considerations other than their nationality and religion? Does it fancy that such appeals, accompanied by blatant abuse of every Protestant who refused to be dragooned into its line of thinking, will accomplish its object? If an appeal be made to support a man purely on the ground that he is a Roman Catholic, why should the *Canadian* object to Protestants taking the same course, and asking the support of Protestants upon that ground alone? Human nature will not tolerate that kind of tactics, as has already been proved in East Northumberland. Honest men will not be abused into supporting a man for either of such reasons as those to which we have referred, and the sooner the *Irish Canadian* ceases its twaddle about being the organ of Roman Catholics, irrespective of politics, the better it will be for those whom it professes to represent. What in the world, we should like to know, has the question of Protection or Free Trade to do with Protestantism or Romanism, or whether a man bows at the altar of the Roman Catholic Church or says his prayers in a Protestant place of worship? If, then, the one is not essential to the other, why should the *Canadian* expect the Free Trader to vote for a Protectionist simply and solely because the Protectionist is a Roman Catholic and an Irishman, and *vice versa*? The proposition is too preposterous and absurd to be entertained for a moment. The fact is, the *Canadian* has in the past, and will in the future, so long as it continues its present course, destroy the prospects of and prevent the success of those whose cause it espouses. If the *Canadian* insists that every contest shall be decided on the principle of a man's faith and nationality, we incline to the belief that the success of its candidates will not be very great. The sooner that fact is known the better. Let us judge a man by his political principles, irrespective of his birth or his creed, and we shall then have a more wholesome state of political society than can possibly exist under the theory and practice of the *Irish Canadian*.

Annual Dinner.

The St. George's Society celebrate the Anniversary of the Patron Saint of "Merrie England,"

A SMALL BUT HEARTY COMPANY.

Owing, no doubt, to the destruction of Christ Church yesterday afternoon, the attendance at the St. George's Dinner, which was held at the Dafoe House last night, was not so large as it has been in past years. Many of the members of the Society are also members of Christ Church, and it was but natural that those gentlemen did not feel like engaging in festivities but a few hours after they had witnessed the destruction of the edifice in which they had been accustomed to meet from Sunday to Sunday, and which was endeared to them by many sacred associations. About twenty in all sat down to the unusually sumptuous repast which had been prepared by Mr. Henderson.

The dining room was tastefully decorated in honor of the occasion. At the head of the table an ensign was hanging, and above it the motto "God Save the Queen." Other mottoes and legends, such as "The Land we left and the Land we live in," "May our Country prosper," "The Day and all who honor it," &c., covered the walls, while a large ensign was draped at the foot of the principal table with the legend "Welcome to our Guests" over it. The pillars were tastefully ornamented with small flags.

The chair was occupied by the President of the St. George's Society, Mr. R. C. Hulme, and the vice chair by Mr. C. L. Coleman. On the right of the chairman Mr. D. B. Robertson, President of the St. Andrew's Society, and on his left Geo. D. Dickson, Esq. The only other guest was Chief McKinnon.

The good things having been disposed of,

The Chairman said he regretted the small attendance. He had been at a good many annual dinners in celebration of this anniversary, but had never seen such a meagre gathering of Englishmen on any similar occasion. It was not for him to say anything which would reflect on any who were conspicuous by their absence; many of them doubtless had reason for their absence; but their reasons must be very strong to justify the Society in excusing them for not being present to celebrate this anniversary.

The usual loyal toasts were then drank with considerable enthusiasm.

"The Army, Navy and Volunteers" was next drank,

Song, Mr. Taylor—"The Red, White and Blue," with flute obligato by Mr. Gay.

Mr. Thos. Wills responded to the toast. He said that the only branch of the service he had ever belonged to was the Canadian militia. Yet he could claim to be a brother-in-arms of the members of the British service, since the Canadian militia and the British regulars had stood side by side and done their duty nobly in the field together. He referred briefly to the great names which the history of the British army and navy could furnish—from the heroes of the earliest times in our history down to our modern Robertses and Colleys, and expressed his conviction that neither the army or navy had suffered any deterioration from the time when they were called upon to accomplish more than they had done in late years.

The next toast was "The Day and all who Honor It"—which was drank with cheers.

Mr. Gay responded. He said he had little to say about this great and glorious day, but if the waiting girls would bring him a lamp, he would read them poetry of a high stamp, and if he did not fall he would surprise them one and all.

The lamp was not forthcoming, so Mr. Gay was mounted on a chair in order to bring him nearer the gas light, and read a beautiful poem which he had written to celebrate a similar anniversary several years ago. As a matter of course, the poem was received with rapturous applause.

Song, "Bygone Days"—Mr Geo. Twining. The song was loudly encored, and Mr. Twining responded with another fine song.

Mr. Wills was called upon to respond to the toast. He said this was the 33rd St. George's banquet which he had attended. He had seen more largely attended banquets, but none at which those who sat down together were more in unity than those he saw before him. When he looked back over the many similar occasions at which he had been present, melancholy feelings arose in his breast, for he could recall many faces which he would never meet around the festive board on earth again. He believed in the annual celebration of these national anniversaries. It preserved green in our breasts that love for our native land which was one of the noblest sentiments of which the human heart is capable. He not only believed in the St. George's Society celebrating the anniversary of their patron saint, but thought it right that the St Patrick's and St Andrew's Societies should also celebrate with equal enthusiasm their national anniversaries. Though the attendance here was small, the attendance at similar banquets now being held throughout the country was no doubt large. The national sentiment was not dying out; the day was still honored wherever an Englishmen breathed, and he asked for three cheers in honor of "the day we celebrate"—which were accordingly given with hearty good will.

"The Land we Left and the Land we Live In," followed.

Song, "The English Emigrant"—Mr. Walter Alford.

Song, comic, Mr. Wm. Alford.

Mr. C. L. Coleman responded in behalf of "The land we live in." He said those who were present seemed to be enjoying themselves, though their number was small. He attributed the small attendance partly to the burning of Christ Church, and said that it would not be long before it would be rebuilt: there were enough Englishmen in the congregation to see to that. Though not an Englishman, he was the son of an Englishman, and was proud of it. He did not see why a greater number of sons of Englishmen did not attend these banquets, and show themselves in St. George's processions. Every one should be glad of having English blood in his veins. He was glad to know that Canada was copying closely the institutions of Great Britain.

Song, "Loved Canada"—Chief McKinnon.

"The Legislature" was then drank amid applause.

Mr. Gay made a peculiarly happy response to the toast. It consisted of a poem which could not be more *apropos* to the occasion entitled "Lord Beaconsfield on his Death." In it he drew a comparison between the deceased statesman and Gay—which was not favorable to the former.

Song, "The Island home of the Englishman—Mr. Taylor.

The next toast drank was "Our Sister Societies."

Mr. Robertson responded on behalf of the St. Andrew's Society. He said that though societies such as St. George's and St. Andrews met with many discouragements, yet they should be cheered by the thought that many of our countrymen from across the sea were continually thanking us for the assistance rendered them when they landed on our shores as strangers. But this was not the only benefit derived from such societies. They cherished national sentiment in our hearts, and while they did not detract in any way from our love for our own dear Canada, they prevented our love for our native land from dying out. He referred to the grand legacy which we, as Canadians, reap from the old country institutions. Our Constitution, which is the grandest the world has seen, we derive from our forefathers, who gained it for us in the old country and in old times—often with their lives; and it was not right that we should forget the great legacies left us by them. He believed that we were the better Canadians from being good members of St. Georges', St. Andrews' or St. Patrick's Societies. He wished the St. George's Society every success in the future.

The Chairman apologized for the absence of the President of the St. Patrick's Society. He had issued invitations to both the present and late Presidents of that Society, but through some unexplained cause their chairs were vacant. He could not explain their absence.

Song, Mr. Robertson—"Maggie's by my side."

"Our Guests" was then drank with cheers.

Mr. Geo. D. Dickson was called upon to respond, which he did in a very pleasing manner. He cordially sympathized with those who, through a great calamity had been prevented from being present this evening, and expressed his pleasure at being present to celebrate such an auspicious occasion as the present.

Chief McKinnon also responded. He said he had the pleasure of being present at four St. George's dinners in Belleville, and this was as pleasant as any one of those he had attended in past years. Still he thought it remarkable that, out of 600 Englishmen in Belleville, such a small representation should be present this evening.

The next toast announced was "The Mayor and Corporation of Belleville."

Mr. Dickson responded on behalf of the Corporation. He said that there was much which should be done for the benefit of the corporation of Belleville. In past years Belleville had been prosperous, chiefly because she was the centre of a large agricultural country, and did not have railways to carry away the trade which should properly flow into the place. Times had now changed. Railways were springing up all round us, and were stopping the commercial vitality of Belleville and the surrounding country. The present prospects were discouraging; and the time has come when something must be done—when some extraordinary measures must be taken to cause our city not only to prosper as she had in past years, but to prevent her from going backwards. What we wanted was the establishment of industries which would bring here more producers, not consumers. He referred to the geographical position of Belleville, which was more important than the majority of our citizens imagined. The probabilities were that, if events took the course towards which they at present seemed to point, Belleville would become one of the most important railway centres not only of this Province, but of this continent. When the great George Stephenson was in this country on business connected with the then projected Grand Trunk Railway, he drew his pencil on the map from Belleville to Sault Ste. Marie, and said. "There, gentlemen, is your route for the transportation of the western trade." He (the speaker) believed that this project would probably be carried out—nay, he believed it was inevitable that Belleville and the Sault Ste. Marie would be connected with lines of railway, and Belleville would become the lake terminus of the western trade. We had the advantage in geographical position over every other place which would put forward its claims for that great desirability. He eulogized Mr. Bickford for the pertinacity and energy which he had displayed in his management of the Grand Junction Railway, which had maintained it in its present condition and made it possible for that railway to become a link in the great chain of railways which would end in Belleville. He spoke strongly in favor of establishing new industries in the city, and thus make of Belleville a great manufacturing centre. He denounced the sluggish spirit displayed by the moneyed men of Belleville, who refused to invest any capital in any scheme, however much it promised success. He believed however, that we had "touched bottom." He had great confidence in the future of the city, and events would, he was confident, very shortly take a turn for the better.

Mr. D. B. Robertson proposed the health of the officers and members of the St. George's Society, which was most enthusiastically drank by the guests present, and was briefly responded to by the Chairman.

"The Ladies," was proposed by Mr. Ross, and was responded to by Miss Alice Deegan, head-waitress, and Mr. D. B. Robertson.

"The Press" and "Our Host" having been duly honored, the company dispersed shortly after midnight.

Ameliasburgh Correspondence.

The municipal Council of Ameliasburg met on Saturday last and a new By-law was submitted and passed fixing and defining the salaries and duties of the Township Officials so as to prevent the usual occurence of grants for "extras" in the future.

The Clerk's salary was fixed at $120; Treasurer's $80; Auditors $2 each; Assessor's $55; Collector $45; Caretaker of the Hall $15.

There are about 1040 names on the Assessment Roll, which will entitle us to the Second Deputy Reeve next year.

The new road leading to the Upper Ferry is now in an excellent condition, since it has received the new coat of gravel—than's for a liberal Council.

"Jenny Anderson," of Massassaga Point, died very suddenly a few days ago. She has been a cripple for a number of years.

It is a common saying among the farmers here, they never saw a finer seed time or land in a better condition. Most of them will finish this week and now the warm refreshing showers have come just at the right time.

Mr. Howell of the Union neighborhood, finished last week having put in 125 bushels with 2 teams in 6 days and no seed drill either, but on the old fashioned plan. So much for early rising.

Walter S. Herrington, of Centre Church neighborhood, spent his Easter holidays among his friends here and has returned to college at Cobourg, to complete his final examination, where we expect "Walt" will give a good account of himself.

Robert Benedict, Mr. R. Pearsall's hired man, disappeared rather suddenly a few days ago, and his employer is quite anxious as to his whereabouts.

The Lips We Love to Press inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

DR. LLOYD, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of ALLAN'S LUNG BALSAM, I have no hesitancy in stating that it was by the use of your LUNG BALSAM that I am now alive and enjoying good health.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1.00.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Pressed Hay

FOR Sale, in small or large quantities. Store house, Pinnacle St., nearly opposite gas house. Orders left at Mr. LaRoche's office, Bridge St., will receive prompt attention.

A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallable cure, it was used for similar diseases to great advantage until the list of these eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

The great bargains offered at the bankrupt sale of jewelly and fancy goods which is held each day and evening in the store opposite the Anglo-American hotel, have been largely taken advantage of, but there are still plenty more to be secured. Go and see if this be not the case, and if you cannot find something of which you are in need and can obtain more cheaply at this sale than any where else. 1t

Daily Intelligencer.

BELLEVILLE, TUESDAY, APRIL 26.

5 O'CLOCK EDITION.

City and Vicinity.

Awnings are going up.

There were two drunks in the cells last night.

The band of the 15th battalion will play in front of the City Hall to-morrow night.

The market this morning was not largely attended, owing to the unfavorable appearance of the weather.

The patter of the rain on the roofs during the night was a highly pleasant sound —especially to those whose cisterns were dry.

Mizpah Lodge and the Quinte Encampment will celebrate the anniversary of Oddfellowship by a supper at Hambly's this evening.

It is stated that Mr. John Marsh, police constable, has received the appointment of Turnkey in the gaol here. He will make a good officer.

The Rowing Club will meet to-morrow night for the election of officers and the transaction of other business. Let there be a full attendance.

The Oddfellows' band performed in public for the first time in several months this morning on their way to the train. Their playing was very much admired.

Messrs. Shelby, Pullman & Hamilton's company have all arrived and will give a rehearsal to-morrow. They would have done so to-day, but the rain prevented.

Dr. Hope, the newly appointed Sheriff, took possession to-day. Mr. O'Brien will not, it is stated, enter upon the his duties as Deputy Sheriff until he concludes necessary business arrangements.

Large Egg.—We were shown a hen's egg this morning by Mr. Abel Finkle, of Sidney. It measured 6¾ inches in circumferance and weighed 3¾ ounces.

Rain Storm.—One of the heaviest rain storms ever experienced here burst over the city between 12 and 1 o'clock to day. For nearly 50 minutes the rain descended in a perfect torrent, and streets were for the time being transformed into small rivers, the drains being unequal to the task of carrying the water away quickly edough.

Time Soon Up.—The time given by the Board of Health for the cleansing of premises will soon be up, and yet there has been comparatively little done towards complying with the orders of that body. We understand the Board intend to strictly enforce the law this season, and all persons who have not attended to this matter will do well to act at once if they wish to avoid prosecution and its consequences.

The Rivals.—The concert to be given in the City Hall to-morrow night by the Rival Concert Company promises to be highly successful, as it is very desirable that it should be. The company is made up of artists of superior merit, and the object—which is to assist No. 1 Company of the 15th battalion in fitting up their rooms, the contents of which were destroyed by fire—is one that ought to meet with public sympathy and support. Seats can be secured at Reynolds'.

The Oddfellows' Excursion.—Despite the rain which fell during the night and early morning and the threatening appearance of the weather this morning, there was a fair attendance at the Oddfellows' excursion this morning, the voyagers numbering about one hundred. The train was made up of six passenger cars and one flat car, in which latter the band took passage. It was expected that the party would be largely increased at the Grand Trunk, at Foxboro, the Madoc Junction, and other stations along the line, where a large number of tickets had been disposed of.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Weather Probabilities. — Toronto, April 29—Lakes: Moderate to fresh winds, mostly westerly to southerly, fine very warm weather, probably showers in the eastern portion during the day.

Just received—one hundred and ten setts Lace Curtains (bought job) and will be sold at a sacrifice. Beautiful patterns. Jas. Hennessy.

The Grand Junction Elevator.—As will be seen by advertisement, the Grand Junction Railway Company advertise for tenders for the construction of crib work for the foundation work of an elevator, and for the foundation work as well. The structure will be located on the west side of the triangular space between the new wharf and the old one, and abutting the southerly end of Rathbun's wharf. The crib work for the foundation will be 161 ft. by 42 ft., and the elevator 150 ft. by 35 ft., with a capacity of 120,000 bushels. To the east of the elevator will be the engine shed 35 ft. by 30 ft. These works will be gone on with at once, and the elevator will be finished in time for next fall's grain trade. It is thus evident that the Company expect, and are preparing for, a large business in grain, as well as in iron ore and timber.

ANOTHER DESTRUCTIVE FIRE

Christ Church a Prey to the Flames.

LOSSES AND INSURANCE

Three Fires Within Forty-five Hours.

The popular superstitition, that one fire in this city after an immunity for some time from the ravages of the devouring element, in alwyys followed by two more, has had another and disastrous verification, three fires having occurred within forty-five hours of midnight on Saturday. First was the destruction of Mrs. Short's house on Saturday night; next the fire in Landsberg's and Wilson's stores early on Monday morning, and finally the total destruction of Christ Church, with nearly all its contents, fourteen hours later.

It was about 10 minutes after 5 yesterday afternoon when Mr. S. A. Moore, marble cutter, on looking from the windows of his shop, on the opposite side of the river, saw that flames were bursting through the roof of Christ Church, and rising to a height of fifteen feet. The alarm was at once given and Mr. Moore and Mr. Wm. Davis ran to the church, and, there being no one within, burst open the front door and proceeded to the rear portion of the building. There was then no fire in the lower part of the edifice, but cinders were falling from the roof upon the floor. Messrs. Moore and Davis, in company with three or four others who had joined them, carried out two small organs which stood near the pulpit, the Sunday School library, and everything movable upon which they could lay their hands, working until the heat drove them out. Meantime a crowd of people had gathered on Coleman Street, in front of the church, but were very backward in giving assistance. Mr. Moore states that a number of these persons were looking on at the fire before he and Mr. Davis got to the church, but they never tried to enter the building.

The building being of wood, framed and plastered, and therefore highly inflammable, the fire spread with great rapidity, and although the engines were on hand very promptly, the whole roof was soon in a blaze and the fire beyond control. The flames rose to a great height, and the sparks ascended in a shower, being borne off to the northward by a light wind from the south. Each of the engines soon had two streams playing, but they were powerless to save the church, and for some time the efforts of the firemen had to be directed to preventing the destruction of the stone house closely adjoining, which is the residence of Mr. Reuben Cooper, miller. The heat was so intense that the roof of this house, as well as the window frames and sashes, were set on fire several times and some of the window glass was melted. This building was, however, preserved from serious damage. The walls of the church fell in about half an hour after the alarm was given, and its destruction was then completed. The engines continued to pour heavy streams on the burning mass until about 7:30, and even then the ruins were still burning quite fiercely in places.

The origin of the fire is a mystery, as there had been no fires lighted in the heating apparatus for three days previously. The flames certainly originated in the lofty space between the ceiling and the roof, and it is thought just above the organ, as it was in the east end of the roof that the fire was first seen bursting through. A few weeks ago a second roof was built above the organ, between the ceiling and the roof, in order to protect the instrument from any possible damage through leakage in the main roof. The last time that any one was known to be in this loft was on Saturday. The Rev. Dr. Clarke (Rector) and Mr. Phillips, the builder of the organ, were in the church together during part of the afternoon. The Rector left at about 2 o'clock, and Mr. Phillips, remained behind a short time. He was the last person who was in the church before the fire broke out.

When the alarm was given, the Organ Committee of the Church were holding a meeting at Mr. Dunnet's.

The building was insured in the Queen for $3,000 and the organ for $2,000 in the same Company. The building was valued at $6,000 with its contents, exclusive of the organ, which was, it will be remembered, a new, handsome and powerful instrument built by Mr. J. H. Phillips, of Napanee, and was played upon for the first time on Easter Sunday, the 17th inst.

The congregation are heartily sympathized with by all in the city, as after a long struggle they had freed their church from debt, had greatly improved the building, and had wiped out all outstanding claims. Now that they had obtained this comfortable position they are compelled to meet a very serious loss, to the extent at least of $3,000 beyond the amount covered by the insurance.

The building was erected in 1863, and the first incumbent was the Rev. Septimus Jones, now of Yorkville. On Mr. Jones' departure from Belleville he was succeeded by the Rev. Hans Caulfield. This gentleman removed to the west and the Rev. R. S. Forneri (now of St. John's), was the next pastor, Mr. Forneri resigned after holding the position but a few years, and Rev. J. R. Jones was the next pastor. Mr. Jones resigned in 1878, and the present incumbent, the Rev. W. C. Clarke, succeded as Rector of Christ Church and St. George's.

It is to be hoped that the congregation will be able to see their way clear to erect a more substantial edifice than that which was destroyed, and we have little doubt that such will be their determination.

A meeting of the congregation has been called for to-morrow evening (Wednesday) at the Workingman's Hall for 7.30 sharp.

The Secret of Health.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of Herrick's Sugar-Coated Vegetable Pills, and you are safe. They never fail in any case of sickness or inward pain. Try them.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. Boschee's German Syrup has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

News Condensed

—Farmers are busy sowing grain in Manitoba.

—The first steamship, *Polino*, of the season arrived at Montreal on the 23rd inst.

—A caretaker near Clifton, Galway, was shot dead yesterday, and his son badly wounded.

—On the 25th inst., a fire in Eddy's match factory, Ottawa, destroyed property to the amount of $25,000.

—The Dublin Corporation yesterday rejected a vote of condolence for the death of Lord Beaconsfield.

—Mr. Geo. A. Cox, of Peterboro', has been re-elected President of the Midland Railway Company.

—Jas. T. Fields, the noted author and litterateur of Boston, died on the 25th inst. aged 64 years.

—Sarah Barnhardt's sister Jeanne eloped last Saturday with a member of the French Legislation at Washington.

—The printers employed in the parliamentary printing office at Ottawa have entered a protest against the payment of income tax.

—Owing to the lowness of the water in the smaller streams, hundreds of thousands of logs will not be brought out this season.

—A boy named Seaton was stolen by gypsies from his parents in Clinton. His mother found him with them in Chatham.

—The conference of the Methodist Episcopal church, which has been in session at London for the past fortnight, adjourned yesterday.

—A shower of meteoric dust fell at Catania, Sicily, on the 27th ult., lasting the whole day. Leaves of trees presented yellowish red spots, the color of terra cotta.

—A despatch from Montreal says that recently a Toronto woman arrived in that city, and has spent $20,000 in fitting up a gambling house. Who can she be?

—On the 25th inst., Thos. Bulmer, one of the oldest citizens of Montreal, while ascending a ladder, fell to the ground, and was killed. He was 90 years of age.

—On the 25th inst. Aird's livery stable in Brantford, with six horses and a number of carriages &c., were burned. A tramp named McDonald was burned to death.

Serious Fire.

Portsmouth, Ont., April 26.—This morning, shortly after 3 o'clock, the large steam sole leather tannery in this village belonging to A. Gunn & Co., of Kingston, took fire near the smoke-stack, and in a very short time extended through the whole of the buildings, which, with their contents, were totally destroyed, together with a dwelling house on the premises, which had been unoccupied for a short time. One shed with some of the finest leather in it was saved. The adjoining brewery, belonging to J. & W. Fisher, was in great danger from the fire, in fact one part of it had taken fire before a steam fire engine from Kingston arrived and saved the brewery. Another stone house belonging to Jas. Kelly caught fire, but by the aid of friends it was put out before much damage was done. The tannery and contents were insured, but to what amount is not yet known. The people of this village will feel the loss of the tannery very much, as it gave steady employment to 25 or 30 hands.

MORNING DESPATCHES

AMERICAN.

FOR HOMES IN THE WEST

New York, April 26.—65 destitute persons was sent yesterday to homes in the west by Whitelow Reid. This makes the eleventh party sent by Reid.

VISIT OF RAILWAY MAGNATES.

The directors of the London & Northwestern Rail Road headed by the Duke of Sutherland and his son Marquis Stafford arrived yesterday to inspect our railroads with a view of adoption on English roads and improvements used here.

DR. RUSSELL IN NEW YORK.

Dr. W. H. Russell, the celebrated English war correspondent, arrived yesterday.

GRANT IN MEXICO.

City of Mexico despatches announce that members of the Mexican Congress gave a banquet to Gen. Grant on Friday. Great enthusiasm was manifested. Grant spoke in warm terms of the advantages to Mexico of the Railway developments of the country, and of close commercial relations between it and the United States, which would be the consequence. Referring to the subject of the annexation of Mexico to the United States he said; "I think I can answer for nine-tenths of the people of my own country, when I say we have no sinister motives whatever. We have no designs or desires inimical to the honor and credit of this great Republic."

CONKLING'S PARTY GAINING STRENGTH.

The *World* states: It is said that Conkling informed a friend that he had now assured to him enough support to reject Robertson's nomination. If Conkling has has gained the strength during the past week as claimed, it is because the Democrats begun to distrust the administration.

AFTERNOON DISPATCHES.

Washington, April 26.—Indications for lower lakes: clearing preceded by occasional rains. Stationary or lower temperature.

GREEK AFFAIRS.

Athens, April 26.—Public opinion here favors the acceptance of the position without needless delay.

EX-EMPRESS EUGENIE.

Paris, April 26.—The ex-Empress Eugenie passed through this city on her way to Milan, to attend the unveiling of the statue of Napoleon 3rd.

LARGE EMIGRATION.

Hull, April 26.—Contracts have been made to carry 60,000 emigrants from Norway and Sweden to America.

Southampton, April 26.—Arrived, *Oder*.

THE NIHILISTS AGAIN.

Berlin, April 26.—Another audacious address to the Czar has been issued by the Nihilists, pointing out that the indiscriminate execution of the assassins of Alexander II. only served to strengthen the Nihilists by driving many luke warm malcontents into the extreme faction of the party.

ALGERIAN DISTURBANCES.

London, April 26.—The Algerian authorities are apprehensive of a disturbance among the native population. An officer on a surveying expedition has been murdered in Geryville. It is announced in order to repress any attempt of the Algerian Arabs to take advantage of the Tunisian difficult for revolt, France has decided to send 50,000 additional troops there. The column in the Province are to be strengthened to preserve tranquility on the south-western frontier, where fanatical agitators are endeavoring to excite the people.

FLOODS AND DROWNING.

St. Paul, April 26.—A farmer trying to cross the river near Le Seur was drowned.

A wealthy Irishman named Stafford visiting this country was drowned near Red Wood Falls.

Reports of high water and considerable damage to property continue to come from various towns on the Mississippi. The river is now open its entire length.

EPSOM RACE.

London, April 25.—At the race for the great metropolitan stakes at Epson to-day, for 2¼ miles, Brown Bess won, Apollo second and Lorillard's Mistake third.

"They all do it."—Everybody uses "Teaberry," the now toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

For Asthma and Phthisic.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

The Canada Pacific.—It is said that some 500 flat cars, 200 box cars and first and second class cars have been ordered by the Syndicate since the signing of the contract. Most of these are being built in London, Ont., and the remainder in other parts of Canada.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints thatahave been stiff for years.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

Hagyard's Pectoral Balsam is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

"Hail bounteous, beauteous, gladsome Spring" this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

Dyspepsia.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extolling *Zopseas* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. Yeomans.

Reminders.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

Commercial.

TORONTO MARKET.

Toronto, April 26 — Fall wheat No. 1 $1.16; No. 2, $1.13; No. 3, $1.10. Spring—No. 1, $1.20; No. 2, $1.17; No. 3, $1.12. WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels. and of cleansing the blood, and in this lies the grand secret of the enjoyment of health. Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

LADY THORNHURST'S DAUGHTER.

By MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

"You are very still, Tessa," said the young Baronet tenderly.

"I do not feel quite well," said Tessa truthfully, putting her hand to her throat, where was occuring a terrible constriction. "I think that I was not benefitted by last night's exposure," and she tried to smile. "I fear I am going to be ill. Do not bring Lady Thornhurst to Kentish Town to-day, Victor, and indeed I would rather she would not come at all. Uncle Reuben's house is too humble for so great a lady, and Uncle Reuben will find me a secure refuge."

"You fancy the Marchioness would patronize you, Tesa?" inquired the young Baronet in some wonder. "You do not know her. But you do look strangely weary and pale, and your eyes have a feverish brilliancy. You had better rest for the present. and your friends can of course keep Capt. Holm out of their house. while I am making efforts to have another guardian appointed for you."

The matter was thus settled.

In due time the long train whirled into the London Station, and Sir Victor assisted Tessa into a cab, and gave the order for Kentish Town. It was a long, weary drive over rough pavements, and Tessa was strangely weary from the combined effects of physical and mental excitement when finally the cab stopped before the high wall inclosing the tiny strip of garden belonging to Laburnam Villa. The cabman rang the gate bell, and when a small trim maid appeared, the young Baronet lifted Tessa, and half led, half carried her into the house. The young girl's unexpected return produced a flutter of excitement at Laburnam Villa, such as that small abode had never before witnessed. Agnes Dennis was all alarm and excitement and Sir Victor was obliged to repeat his explanations again before the clerk's wife recovered her self-possession. An hour later, the young Baronet departed in the waiting cab, and Tessa was left to her needed repose.

CHAPTER XL.

THE SEARCH THAT FOLLOWED.

Tessa's flight from the Grange was discovered at about the time she had expected, or a little later. The breakfast bell rang at nine o'clock as usual, but the morning being stormy with the fall of snow, it was half an hour later before Capt. Holm and Squire Todhetly emerged from their bedrooms. The former, yawning lazily, proceeded to his daughter's sitting-room, giving himself admittance into it. It was dark, the shutters being closed, and very cold and damp, there being no fire on the hearth. No servant had been able to enter the chamber that morning, the door being locked, and the room was therefore as cheerless as a stable.

Capt. Holm, shivering with a sudden chill, crossed the floor and unfastened the wooden shutters. There were frost pictures on the window panes, and a whirl of snow outside the window ledge that completely obscured any view of the outer world. Turning from the window, Capt. Holm called loudly:

"Tessa! Tessa!"

Of course there was no answer.

"It is so dark here that the girl thinks it is still night," muttered the Captain. "I wonder I didn't foresee that. And it is as cold as a sepulchre. She will freeze to death."

He moved toward the bedroom and knocked at the door of communication. The dead silence during which he listened was unbroken by a sound. He knocked yet more loudly. He called his daughter's name. And still no sound of reply came from the inner room.

Captain Holm abruptly opened the door and entered the room. The room was dark and cold, but as his eyes became accustomed to the gloom, he marked the fact that the door into the chamber beyond was open, and that Tessa was nowhere to be seen.

The alarm was given on the instant. Squire Todhetly hastened to the scene. Servants were summoned, and the fact was elicited beyond danger of dispute that Tessa had fled the house at some time time during the night. The butler testified that he had found the door of the eastern porch unfastened when he opened the house that morning. Mrs. Podd was summoned, and declared in the most innocent manner that the key of the door into the former nursery might have been left somewhere in the young lady's bed-room, and expressed astonishment that the young lady has been locked up in her rooms for the night. The housekeeper was genuinely frightened and anxious concerning Tessa, but no one remarked that her emotion was extraordinary under the circumstances.

"She went on foot, of course," said Captain Holm, knitting his forehead into a scowl. "It is probable that she lies buried in a snowdrift between here and Wimborn Minster. A delicate girl like Tessa could not walk thirteen miles on a night like this one. She's dead—frozen stiff! Order a horse, Todhetly, and let us have breakfast and be off."

The Squire obeyed the command, and with the guest descended to the breakfast room. The pair ate their meal almost in silence. A heavy gloom overhung the brow of Captain Holm, but it was not the gloom of a great grief, but rather that of a terrible disappointment. It was as if he had been balked in his schemes, and that was indeed his first and only thought. He had no sorrow for the young life which he supped was cut short. He only thought that Tessa would have been a fortune to him, and now she was probably dead.

"Curse the girl!" he muttered savagely, as he arose from the table. "Curse all women! All the troubles of my life seem to have sprung from women. What should the girl want to kill herself for just at this time? She might have known that it was deliberate suicide to go out in last night's storm. Put a bottle of brandy in your pocket, Todhetly. We may need it. The snow is turning to rain; and here comes the dog-cart.

Holm hastened to put on great coat and mufflers, and Todhetly was equall expeditious.

The two entered the dog-cart, and went down the drive at a rattling pace, Most of the last night's snow had melted almost as it had fallen, or soon after, and on driving out of the Grange gates the road was found to be muddy and difficult to travel.

The drive to Wimborn Minster was necessarily slow, but the two men kept a sharp look-out on either side of the vehicle, in expectation of beholding the prostrate figure of the fugitive Tessa. As they neared the town, however, and no trace of the girl was found, hope began to revive in the men's hearts, and Holm said:

"The girl has either wandered off on the heaths and died of cold and exhaustion, or she has fought her way to Winborn Minster and is safe. If she's like her mother, she wouldn't have given up till the last gasp. Perhaps some farmer came along and carried her to her destination, although that is hardly probable."

The pursuers entered the town, still without finding any trace of her whom they sought, and drove directly to the railway station. Leaving the horse in charge of a small boy, they entered the waiting room together. Captain Holm hastened to make inquiries.

The station master was found, and in response to the Captain's interrogatories, backed by a small fee, declared that a young lady of the age mentioned by the Captain, and having golden hair and gray eyes, as he described, had arrived at the station before daybreak that morning and had, he believed, taken the early express train. The young lady was in a state of great fatigue, and the young gentleman with her seemed greatly alarmed about her, and brought her hot coffee and sandwiches, and a hot beefsteak, which it was very difficult to obtain at that hour, but for which the which the young man poured out his money like water."

TO BE CNNTINUED.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestiible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everyhing else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sele by JAS. CLARKE & Co

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

A MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL use
THE OLDEST BEST & MOST WIDELY KNOWN FAMILY MEDICINE

SUBSTITUTES!

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

GOLDEN GRIFFIN!

128, 130, and 132 King-Street East, Toronto.

Globe, Saturday, March 12th, 1881.

We beg to notify our numerous patrons and the general public that we are now in receipt of our new Spring Stock of Fine Woollens, consisting principally of English, Irish, Scotch, and Canadian Tweeds; English, Irish and Scotch Serges; French and English Worsteds; Fine West of England Black and Blue Broadcloths; Black and Blue Venetians, Doeskins, Cassimeres, etc., making in all the largest and most Complete Stock of the kind in Canada.

Our Clothing is without doubt quite equal, if not superior, to the best New York Clothing, for Style, Fit and Material; a proof of which is the large number of First Prizes awarded us at Toronto, Hamilton, and other Exhibitions during the past season.

Gentlemen requiring Fine Clothing will find it to their advantage to inspect our Stock before purchasing. Thanking our numerous friends for their patronage in the past, and soliciting a continuance of the same in the future,

We remain, respectfully yours,

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhaltion we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

HALL'S
VEGETABLE SICILIAN
HAIR RENEWER

Has been in constant use by the public for over twenty years, and is the best preparation ever invented for RESTORING GRAY HAIR TO ITS YOUTHFUL COLOR AND LIFE.

It supplies the natural food and color to the hair glands without staining the skin. It will increase and thicken the growth of the hair, prevent its blanching and falling off, and thus AVERT BALDNESS.

It cures Itching, Eruptions and Dandruff. As a HAIR DRESSING it is very desirable, giving the hair a silken softness which all admire. It keeps the head clean, sweet and healthy.

The State Assayer and Chemist of Mass. and leading Physicians endorse and recommend it as a great triumph in medicine.

BUCKINGHAM'S DYE
FOR THE
WHISKERS

will change the beard to a BROWN or BLACK at discretion. Being in one preparation it is easily applied, and produces a permanent color that will not wash off.

PREPARED BY
R. P. HALL & CO., NASHUA, N. H,
Sold by all Dealers in Medicine.

MANHOOD

GRAY'S Specific Medicine.

Before Taking
After Taking

The Great *English Remedy*—an unfailing cure for Seminal Weakness, Spermatorrhea, Impotency, and all diseases that follow as a sequence of Self Abuse, as Loss of Memory, Universal Lassitude, Pain in the Back, Dimness of Vision, Premature old Age, and many other diseases that lead to Insanity or Consumption and a Premature grave.

☞Full particulars in our pamphlet, which we desire to send free by mail to every one. The Specific Medicine is sold by all druggists at $1 per package, or six packages for $5, or will be sent by mail on receipt of the money, by addressing
THE GRAY MEDICINE Co,
Toronto, Ont. Canada.
April 8 1880. d&wly

TO NERVOUS SUFFERERS—THE GREAT EUROPEAN REMEDY—DR. J. B. SIMPSON'S SPECIFIC MEDICINE.

DR. J. B. SIMPSON'S SPECIFIC MEDICINE is a positive cure for Spermatorrhea, Impotency, Weakness, and all diseases resulting from Abuse, as Nervous Debility, Irritability, Mental Anxiety, Languor, Lassitude, Depression of Spirits and Functional Derangements of the Nervous system generally, Pains in back or side, Loss of memory, Premature Old Age and diseases that lead to Consumption, Insanity, and an early grave, or both. No matter how shattered the system may be from excesses of any kind, a short course of this Medicine will restore the lost functions and procure Health and Happiness, where before was despondency and gloom. The Specific Medicine is being used with wonderful success. Pamphlets sent free to all. Write for them and get full particulars.

CINGALESE
HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge. Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD

HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of interna medicine or the application of the knife ; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himsel cheaply, privately and *radically*.

☞This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO

MITCHELL'S CANADIAN

HAIR RESTORER.

TO THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

Prohibition.

To the Editor of the Intelligencer.

SIR,—Previous to the election which placed the late Mackenzie Government in office, a great many of the temperance people of the Dominion, particularly in Ontario, were led to believe that they might expect laws more favorable to their views from the Reformers than had been passed by the Conservatives, because Mr. G. W. Ross, who was looked upon as the leader ot the Prohibitionists, and others who announced themselves as opposed to the licensing system and in favor of prohibitory laws, were members of that party. Those expectations were not realized. Now, however, that that party finds itself again in a minority, its organs once more talk of the evil influences of the liquor traffic and of the benefits which the prohibitory laws of Maine and Massachusetts have conferred upon these States, no doubt thinking that by this means they will gain the support of all in Canada who advocate similar enactments for this Dominion. But there are among the electors of the Dominion a large number who are decidedly favorable to Prohibition, to whom it will have to be shown that the Reform party, should they return to power, would seriously take the matter up and pass a law prohibiting the manufacture and sale of intoxicating liquors in the Dominion, before they will support that party on that ground. The organs have given no reason for the belief that this would be done ; they have merely been throwing out small baits, but the Prohibitionists and temperance people will not be caught by these, unless something more substantial is offered.

The Reform party had every opportunity to bring forward a prohibitory measure during their five years of office, had they desired to do so, but the only Act bearing on the question passed by them was the Scott Act, which is in reality an amendment to the Temperance Act of 1864, introduced by the Hon. Mr. Dunkin and passed by a Conservative House, and Mr. Schultz moved a resolution declaring in favor of the immediate enactment of a prohibitory law, Mr. G. W. Ross came to the relief of the Mackenzie Government, and moved an amendment evading the question, and practically giving it "the hoist." Thus not only did the Reform Government oppose the prohibitionists' views, but the man whom they had considered their champion, was the one who took the lead against them. In Ontario, also, the temperance party have not been more fortunate at the hands of the Reform party It is now evident that the Crooks Act was only intended as a blind to the temperance people, while it secured for the Government all patronage connected with the granting of the licenses. And in the act passed by the Ontario Government last session there was a clause entirely antagonistic to the views of the temperance people. I refer to the clause empowering the commissioners to grant licenses for the sale of wines and beer at a smaller fee, thus providing for the establishment of resorts for the young men and nurseries for the taverns. To make intoxicating liquors more easily obtainable is not the way to promote sobriety, and when the Reform press are holding up the Maine law for admiration, the people will not forget that their party took this step twenty years backwards.

It is clearly evident that all this talk about the prohibitory laws of Maine and Massachusetts is merely intended to catch the temperance vote. If the Reform party favored the enactment of a prohibitory liquor law, why did they burke the question when in power ?

If the Reform party were returned to power, would their Government introduce a law to prohibit the manufacture and sale of intoxicating liquors ? Until that question is authoritatively answered the Reform party cannot claim and will not receive the support of the temperance people of the Dominion.

Yours truly,
A PROHIBITIONIST.

BELLEVILLE, April 23, 1881.

Marmora Correspondence.

Services were held in the Anglican and Methodist churches on Good Friday, also on Easter Sunday.

Miss Bleecker having given such general satisfaction in her capacity as organist of St. Paul's Church, the members, &c., on the 16th inst. presented her with an address and an elegant silver card case. The following is a copy of the address :—

To Miss Bleecker, Organist of St. Paul's Church, Marmora:

DEAR FRIEND,—We the undersigned Incumbent, members and adherents of this church, humbly beg that you will accept this slight token of your esteem and gratitude for officiating so ably and cheerfully during the past year as our organist. We assure you that your skilled efforts have cheered and revived us, while Sabbath after Sabbath we have listened to the choir and yourself.

We also trust that when you, with us, have done chanting the hymns here below of the church militant, we may meet in "Our Father's House on High," there to sing the song of "Moses and the Lamb."

(Signed) C. M. HARRIS,
Incumbent.
CATHARINE BENTLEY,
ANGELINE BENTLEY,
DR. H. JONES,
RICHARD CAMPION,
DAVID FITCHETT,
And others.

Miss Bleecker replied as follows :—

DEAR PASTOR AND FRIENDS :

I assure you it gives me great pleasure to know that my humble efforts in assisting with the service of "Sacred song" are appreciated by you. In accepting of this beautiful token of your esteem, I beg to state that I had not the slightest expectation or desire of receiving from you any remuneration or reward for my services when one short year ago you requested me to officiate as your organist.

I never considered that I was doing anything more than my duty required me to do. You may rest assured that this elegant memento will ever through life be to me a pleasant reminder of your gratitude, kindness and friendship. (Signed)

MINNIE BLEECKER.

"Sounds from the ringing rocks" with anvil accompaniment are still heard in Malone and at the Gatling mine. On or shortly after the first of May, a large number of more men will be hired to swell the already large number who are digging and delving in the latter mine.

Messrs. J. A. Campion, T. P. Pearce and Hon. Robt. Read, with their usual forethought and enterprise, have, it seems, purchased part of the M. Powell property on account of the gold supposed to be on it, for the sum of $6,000.

Many of the men now in the Gatling mine have come from the Lake Superior mines.

Farmers are now hard at work endeavoring "The stubborn glebe to break." The grass "is springing fresh and green." Another spring or summer visitor, the blackbird, has arrived from the azure skies and verdant clime of "Shawandasee."

—Two new lighthouses are to be built on Lake Superior, one on Passage Island, near the upper end of Isle Royale, the other on Sand Island, one of the Apostle group.

Ameliasburgh Correspondence.

In last week's *Intelligencer* I noticed that the final decision had been given in the ferry suit between Jellett and Anderson. Being desirous of learning a few points concerning it, I interviewed Mr. Anderson, who informed me that the final decision had not been given and was not likely to be for some time yet. I was further informed that an appeal had been already been made to the Supreme Court for a hearing and it was their intention to carry it further if necessary.

The Quinte Grange lately purchased 10 tons salt for sowing, together with a quantity of dairy pails and cans.

A good many will finish sowing this week. Considerable barley has been sown.

The Ameliasburg cemetery which is situated upon the farm of I. G. Peck Esq., has been tastefully arrayed into plots and walks. We know of no burial place that can equal this either in soil or locality, it being situated only a short distance from the Dempsey Church, on a rise of ground, gives it a very pleasant appearance from the road.

Some time during the past winter Mr. Peter Alyea had stolen from his barn 30 bushels of timothy seed and some forks. Since that time he has been engaged in working up a clue, and succeeded a few days ago in getting hold of one of the thieves who was interested in the job, who is giving the names of those who were associated with him.

The pound keepers, fence viewers and path masters were appointed by the Council at its last meeting.

Mr. J. R. Cunningham, who is engaged in taking the census of this place, says Mrs. Delong, mother of D. H. Delong Esq., gave in her age as 105 years. She is able to work without spectacles, and is busy now patching a quilt for the Rev. Mr. McDonald.

It was feared the *Armenia* was not going to make Rednerville a calling place this season, as she passed a couple of times when passengers wished to get on and was signalled.

A Monster of the Lakes.

LAUNCH OF A MAMMOTH SCHOONER—140,000 BUSHELS OF GRAIN FOR A CARGO ON A DRAFT OF FIFTEEN FEET.

TOLEDO, O., April 22.—The new five-masted schooner *David Dows*, built by M. D. Carrington, of this city, was successfully launched yesterday, in the presence of a gathering of five thousand people. Her keel is 265 feet, her length over all 278 feet, and her total carrying capacity 140,000 bushels of grain. Her beam is 38 feet 7 inches, average depth of hold 21 feet. She carries two large centre boards, one 25 the other 27 feet in length, and her five masts, with all sail spread, will carry 70,000 yards of canvas. When fully loaded she will draw fifteen feet of water. The total cost of this magnificent vessel ready for sailing will be $100,000. The launch was what is known as the "side launch," and the immense vessel went smoothly into the water, carrying some three hundred people. The *Dow* is the largest vessel on the chain of western lakes.

Death by Hydrophobia.

About nine weeks ago a young girl named Vetter, taking compassion on a strange cur that had followed her, carried the beast into the carpet factory of Thos. Rowbotham, at Hancock Street and Kensington Avenue. A short time later Henry Vetter, her brother, a youth of 18 years, residing at No. 2217 North Fifth Street, and Peter Kircher, of No. 2225 North Fifth Street, attempted to drive the dog from the building, when Vetter was bitten slightly in the thumb and Kircher more severely in the arm. On Saturday night last, without previous symptoms, young Vetter was seized with a paroxysm when about to drink a glass of water, and immediately afterward began to froth at the mouth and howl like a dog. The convulsions not abating, three physicians were summoned, who pronounced him suffering with hydrophobia in its worst form. The young man continued in convulsions except at brief intervals all day on Sunday, and on Monday became so violent as to require the united efforts of three strong men to hold him. He appeared perfectly conscious of his condition at times. Toward evening the paroxysms became much worse, and his howlings and moaning are described by the neighbors as something never to be forgotten. Shortly before six o'clock on Monday night he died in great agony. His companion, Kircher, has shown no symptoms of the malady. His fear of the disease is intense, but the Doctors have taken him in charge, and are employing remedies to forestall the distemper.—Philadelphia *Record*.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Mothers ! Mothers !! Mothers !!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth ? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it ; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, APRIL 27.

Sir Charles Tupper.

We are pleased to be able to state on reliable authority, that Sir Charles Tupper has sufficiently recovered from his recent illness to enable him to return to Canada at an early day, and resume the duties of his office.

Customs Collection.

In his able letter on the financial affairs of the Dominion, the Hon. Mr. Macpherson says:—"In 1875-76 the receipts from customs revenue were $12,823,837, and the cost of collection was $721,008, being $5.62 on each $100. In 1879-80 the receipts from customs were $14,071,343, and the cost of collection was $716,126, being $5.08 on each $100. It will thus be seen that the cost of collecting the revenue by this department for 1879-80 was 54c. on each $100 less than in 1875-6, being a comparative saving in favor of 1879-80, the first complete year of the present Administration, of $75,983. Not only was there this important proportionate economy achieved, but the actual expenditure of the department was less in 1879-80 than in 1875-76. The average cost of collecting the customs revenue for five years to 30th June, 1879, was $5.36 on each $100 of revenue."

Unexpected Praise.

Anything commendatory in the Ottawa *Free Press* of any action of the Dominion Government is as rare and refreshing as an oasis in the desert, as the journal in question devotes its attention chiefly to misrepresentation and abuse of the Government as a body and of its members individually. This being the case, it was with astonishment we read and with all the greater satisfaction that we record the following from the *Free Press* of the 18th:

> The Government deserves to be congratulated for reducing the canal tolls. There is a strong effort being made just now to preserve the supremacy of New York as the entrepot of the grain trade of the West. Many devices for improving the Erie Canal have been proposed and our neighbors are not the men to stick at half measures. The St. Lawrence, however, is the natural outlet, and by removing restrictions on trade the Government can do a great deal to make Montreal the rival of New York. It is reported that in order to take the fullest advantage of our improved canal system Jay Gould has projected a line of sea-going vessels to carry grain and provisions direct from the upper lakes to Liverpool. Buffalo is named as the probable western port of departure. It is thus quite possible that a great portion of the trade which now goes to New York will pass down the St. Lawrence.

The Murray Canal.

The *Globe*, by silence on the point, virtually acknowledges the stupid blunder which it made a few days ago with reference to the course of the Government with regard to the construction of the Murray Canal, but repeats one of its unjustifiable assertions, which we showed to be without foundation, in a very offensive form. It says:

> The Belleville INTELLIGENCER announces that "the Conservatives at least are contented to 'wait patiently' for the beginning of work on the Murray Canal. Our contemporary evidently perceives that there is no intention to proceed with the work or even to make a pretense of proceeding till just before the general elections.

The above is but a "weak invention of the enemy," namely by separating certain words of an opponent from the context, to make them apparently convey a meaning which, if fairly quoted, they would not bear out. This is the mode in which his satanic majesty is said to quote scripture in his own behalf. The INTELLIGENCER does not "perceive" what the *Globe* professes to see on our behalf. On the contrary, we look for the commencement of work about the 1st of July in the present year, in accordance with the declaration of the acting Minister of Railways and Canals, and the vigorous prosecution of the labor until the canal is completed.

The Irish Land Bill.

It is evident that Mr. Gladstone's Government will have a very strong opposition to encounter upon their Irish land bill. The resignation of the Duke of Argyle on this question and the unfavorable sentiments expressed by Earl Grey in a recent letter to the *Times*, show that the Scotch and English landed aristocracy, as well as that of Ireland, will be arrayed against the measure. The Conservatives are hostile, and as a portion at least of the Irish contingent will oppose the measure, it seems not at all improbable that the Government may be defeated. Should the measure pass the Commons by a large majority it is not likely that the Lords will reject it; but if the majority be small, the chances of its rejection by the Upper House are very strong.

The debate on the first reading of the measure commenced on the 25th, when the Right Hon. E. Gibson, a Conservative, attacked the Bill as being confused, obscure, involved and often unintelligible. He admitted, the cable informs us, the desirability of encouraging the growth of a peasant proprietary in Ireland, the reclamation of waste lands, emigration with proper safeguards, but the Land bill confiscated the property of the landlords without proper compensation for what was taken or security for what was left. It gave only a guarantee for perpetual and universal litigation. The question of fair rents was dealt with by permanently removing the law of supply and demand.

The debate was continued with spirit, Sir Stafford Northcote, the Conservative leader in the Commons, taking an attitude adverse to the Government, whilst the situation was complicated by Mr. Stewart, a Liberal, moving that no measure of land reform for Ireland is complete which does not deal with the condition of the farm laborers.

Mr. Forster, on behalf of the Government, showed every disposition to accommodate, by declaring that they would give favorable consideration to any clauses for the amelioration of the condition of the laborers.

The debate was adjourned until Thursday. Meantime the opponents of the measure will be busy concerting plans to secure its defeat.

More Railways.

THE RIVAL PROJECTS TO CONNECT TORONTO AND OTTAWA.

The promoters of the Toronto and Ottawa and the Quebec and Ontario railway lines are actively prosecuting preliminary work, and both appear determined to go ahead. A World man had a talk with Mr. H. D. Howland, of the Quebec and Ontario company, this morning. Howland says that the engineer has gone over the route and will report to a meeting of the provisional directors to be held in Montreal next Tuesday. The necessary capital will be obtained without difficulty, and Mr. Howland is sanguine that the line will be surveyed, located and grading begun this season. He says they made a fair proposition to the Toronto and Ottawa company, agreeing to recoup them for all reasonable expenses, and give them an interest in the new concern. This was rejected, and now the Quebec and Ontario road will be built whether the proposed rival one is or not. At its western terminus in this city it will make favorable connections with the Credit Valley and the Great Western, and at its eastern terminus in Ottawa with the Quebec, Montreal and Occidental. Among the Montreal capitalists who take an active interest in the road is Mr. Duncan McIntyre, of the Pacific railway syndicate.

Mr. John Leys, solicitor of the Toronto and Ottawa company, says that their road is staked and finally located from a point ten miles west of Peterborough to the village of Arden, in Lanark, a distance of 120 miles. They do not intend to put any portion of the road under contract until the line is finally located between Toronto and Ottawa, but Mr. Leys expects that grading will be fairly under way in the course of the summer. Financially, the Toronto and Ottawa is well fixed.

Both roads are bound by the terms of the charter to pass through the town of Peterborough *World* 25th inst.

Trenton Correspondence.

TRENTON, April, 26th 1881.

At 5 o'clock this afternoon the electors gathered in the Town Hall to hear the result of the election, when the Town Clerk announced the following:—

East Ward, Gilmour 104, Titus 6; Centre Ward, Gilmour 78, Titus 42; West Ward, Gilmour 63, Titus 56. Total majority for Mr. Gilmour 141.

Mr. Gilmour was called upon to speak, and in response said that he would do everything in his power to further the interest of Trenton and tendered his sincere thanks to the electors for placing him in his present position.

INTERCOLONIAL FREIGHT TRAFFIC.—The freight boom on the Intercolonial continues to swell in volume. Last week the shipments amounted to 590 cars, as follows:—Number cars inward 278, cars outwards 312. Of shipments inward there were 24 cars flour, 11 cars hogs, 12 cars hay and 138 cars coal; the outward shipments 126 cars English goods, 110 cars sugar, 2 cars fish and 4 cars oil.

COST OF SNOW BLOCKADES.—It is estimated that the snow blockades during the winter and spring have cost the Western railroads not less than $2,000,000. At one time the Chicago & North-Western had 4,000 men at work shovelling snow, and the St. Paul 5,000 men, at $1.50 a day and board. The Illinois Central has also employed several thousand men during the last two months removing obstructions by snow on its lines.

THE CANADA PACIFIC.—An official circular has been issued by General Superintendent Stickney, announcing the transfer of the Pacific Railway to the Syndicate. The road will be operated in two divisions:—Eastern, Superintendent Lynskey, Winnipeg *via* Selkirk to Telford; Western, Supt. May, Emerson *via* Winnipeg to Portage La Prairie. The following appointments have been made:—W. R. Baker, local treasurer and assistant to the General Superintendent; Wm. Harder, traffic manager; J. G. Ogden, jr., auditor; G. P. Nelson, general storekeeper; John Egan, train despatcher; T. C. Butterfield, mechanical superintendent.

THE CANADIAN PACIFIC.—Mr. George Stephen and Mr. R. B. Angus, of the Pacific Syndicate, arrived in Montreal about ten o'clock last night by the train from Halifax. Mr. Stephen, in speaking of immigration in connection with the railway, stated in Halifax that the immigration would be large, but not nearly so large as it would have been had Parliament passed the Syndicate measure at an earlier date, as no time was given for perfecting arrangements on a large scale. Next season, however, they looked forward to a great influx to the North-West from all parts of Europe. No large purchases of steel rails had yet been made, and everything that could be had in the Dominion would be purchased or manufactured here. The steel works at Londonderry would undoubtedly supply large quantities of wheels and other materials for rolling stock, but they had not yet facilities for supplying steel rails in any large quantity.

The Lips We Love to Press inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

DR. LLOYD, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of ALLAN'S LUNG BALSAM, I have no hesitancy in stating that it was by the use of your LUNG BALSAM that I am now alive and enjoying good health.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

ODDFELLOWS' EXCURSION.

The Brethren are Ridden on the Rail Together,

AND VISIT THE THRIVING TOWN OF PETERBOROUGH.

A DAY OF PLEASURE.

At 2 o'clock yesterday morning the prospects for the excursion to Peterborough under the auspices of Belleville Lodge No. 81, I.O.O.F, were dismal indeed. The rain was pouring in torrents, and was coming down in that business like perpendicular manner which betokens that the chances of a "let up" are very slender. No doubt many who had intended to seize the opportunity of visiting Peterborough, when they rose in the morning, looked out of the window and beheld the steady downpour, concluded that the pleasures of the excursion would probably be dampened by it, as well as the excursionists themselves, and so concluded not to go. About half past seven, however, the rain ceased and the weather cleared considerably, and as it grew on towards the time fixed for the departure of the train—8 o'clock—it began to look as if the day was going to be fine after all. No doubt the rain kept a great many people at home who would have taken advantage of the excursion if the weather had not been so threatening. As it was, there were between 150 and 200 left the Belleville station. The Oddfellows' Band accompanied the excursionists, a flat car decorated with evergreens having been prepared for them. The band was in full force—numbering 23, including the drum major. A few passengers were picked up at the way stations between Belleville and Peterborough, and when the train arrived at the Ashburnham station there were a little over 200 passengers on board. Nothing of interest occurred during the trip. The run was made in a little less than four hours—the train leaving Belleville at 8:10 and arriving at Ashburnham about 12.

A large number of people were at the station to welcome the excursionists. The members of Peterborough Lodge I. O. O. F. had assembled in full regalia to greet their brethren from Belleville and Madoc (the latter, who numbered 11, having boarded the train at the Junction.) The Peterborough Fire Brigade Band were also there in their handsome uniform to receive the Oddfellows' Band, it having been arranged that the members of the visiting band should be the guests of the Peterborough band.

Though the rain had poured in torrents during the trip to Peterborough, the clouds had almost entirely disappeared by the time the train had arrived, and the sun shone out resplendently. The beautiful new regalia of Belleville Lodge could therefore be worn without any danger of having it injured by the wet, and exceedingly rich and striking it looked, and right well the brethren became it. A procession having been formed, consisting of the Belleville, Madoc and Peterborough lodges and headed by the two bands, playing alternately, the principal streets of the town were traversed till the Oddfellows' Hall was reached. The principal business street was thronged with people assembled to witness the procession, and the fashionably dressed and handsome ladies who were to be seen scattered among the crowd impressed the visitors with the fact that, however celebrated Belleville is for the beauty of its daughters, Peterborough is not far behind in that respect. When the Oddfellows' Hall—a very tasty and nicely furnished little hall—was reached, the brethren entered, filling it almost to its utmost capacity. Here the best part of an hour was spent very agreeably in mutual congratulations and friendly intercourse. Several happy speeches were given by members of all three lodges, and a couple of excellent songs and trios were rendered by Peterboro' brethren. By this time the dinner hour of most of the brethren had arrived, and their stomachs gave unmistakeable warning of the fact. An adjournment was accordingly made to the Caisse House, where dinner had been prepared. When the Caisse House was reached, however, it was found that another half-hour would have to be whiled away before dinner would be ready. That was a long half-hour. Those who wore belts took a double reef in them, and walked about with an air of superiority, regarding with condescending pity their less fortunate companions who did not wear belts and thus had no means of warding off the pangs of hunger by compressing their "aching voids." Mr. Chote, the proprietor of the Caisse House, made but very little on the dinners furnished these famished excursionists—even though he did charge them 50 cents for what they stowed away. Meanwhile the members of the Oddfellows' Band were faring sumptuously at the Huffman House, where they were entertained at dinner by the Peterborough Band.

All things must come to an end, and after a long time the appetite of even the most ravenous excursionist was appeased. The remainder of the afternoon was spent by the majority of the excursionists in walking or driving about the town viewing the many fine buildings and scenes which it presents to the eye of a stranger. It is indeed a remarkably attractive town, and must be even more so in summer, when the lawns are fresh and green and the trees are covered with foliage. The business part of the town is perhaps superior to Belleville in the number, the arrangement and the general appearance of the business blocks. There is an air of substantiality about these buildings which cannot fail to impress one. The shop fronts of the tradesmen are also superior to those in Belleville, plate-glass windows being more plentiful than here, and the shop-keepers appearing to take more pains to dress their windows tastefully and attractively. The town also possesses a few private residences which are fully as fine as any private residences in Belleville; but there are not nearly as many handsome and comfortable residences as there are here. Neither is there a street which is at all comparable to Bridge St.; but there is nothing discreditable in this, for very few towns in the Dominion can boast of such a beautiful thoroughfare as Bridge St. is in summer. Peterborough is behind Belleville in another important point—its streets and sidewalks. Perhaps it was owing to the recent heavy rain-storm, but certain it is that much muddier streets have never been seen in Belleville in the muddiest season of the year than were seen in Peterborough yesterday. The sidewalks, also, cannot compare with ours in their general condition. Several who have hitherto been apt to growl about the condition of our streets and sidewalks, imagining that the Street Surveyor and Chairman of Streets should be omnipresent, came home last night with a higher opinion of the efficiency and faithfulness of these officials. Notwithstanding these little drawbacks, however, Peterborough gives every evidence of being a thriving and a rising town. There are not half a dozen vacant shops in the whole town, and the number of vacant houses altogether could be counted on the fingers of both hands. There is no reason why it should not have a great future before it. It is surrounded by a rich agricultural country, its geographical position is favorable, and its manufacturing facilities are almost unrivalled. It is doubtful whether better water-power can be obtained anywhere in the Province than Peterborough possesses in the River Otonabee. For nine miles above the town the river is a succession of rapids, there being a decline in the bed of the river, in that distance, of 600 feet, or an average of over 66½ feet to the mile. The townspeople are just awaking to a sense of the advantages of their situation, and new industries are being established and others projected, while the system of water supply is being improved by means of dams in the vicinity of the town. The wealthy men of Peterborough are a live set of men, and offer a striking contrast to the moneyed men of our own city.

But while the majority of the excursionists were surveying the town either alone or in company with new-made acquaintances, the members of the Oddfellows' Band were being most royally entertained by the Peterborough band. First of all they were taken to the Band Room, which is situated directly over the Firemen's Hall, which is in its turn over the fire station. The band room was made a general rendezvous during the afternoon. The room is admirably adapted for the purpose for which it is intended. It is quite large and airy, and is centrally situated. The walls are hung with tasteful pictures—oil-paintings, chromos and photographs. At the head of the room is conspicuously displayed the diploma won by the band in the fall of 1879 at the Toronto Exhibition. It will be remembered that on that occasion the Band carried away, from a large number of competitors, the first prize in the amateur band competition, the prize consisting of $120 in cash and the diploma referred to—a very handsome piece of work. Just beneath it hangs the fine silver cornet, with gold ornaments, which was presented to Mr. Miller, the bandmaster, two or three weeks ago, by the citizens of Peterborough, who take great pride in the band and are never weary of aiding and encouraging it.

After dinner the Peterborough Band, having already had carriages in readiness, took their guests to visit the celebrated Auburn Woollen Mills, situated about one mile out of the town. The visit was enjoyed exceedingly by the Oddfellows' Band. They describe the works as being vast in extent, surpassing anything of the kind in this part of the country. The mill itself is a massive stone structure four stories high, and all the available space inside appears to be occupied by machinery and appliances. Between 150 and 200 hands are kept constantly employed, the majority of them being young girls. These works turn out all sorts of goods—from the finest classes of Canadian tweeds to the cheapest "shoddy." Since the framing of the new tariff the works have received a great impetus, and now find it difficult to meet all the orders which flow in from every direction. This fact is at least suggestive.

As the afternoon drew on towards 5 o'clock the excursionists began to wend their way towards the station, and not only the excursionists, but a very large number of the Peterborough people as well. At 5 o'clock the platform was crowded with those who had come to see the excursionists safely off on their way homeward. The train left the station a few minutes after 5, amid the waving of handkerchiefs and hats, the heartily expressed wishes of the kind Peterborough folk, and the strains of "Auld Lang Syne," from the Peterborough band. The only thing that relieved the monotony of the homeward trip was the detachment of the hind car from the main train, which took place a few miles from Peterborough. The car became uncoupled, and the main train went on for fully half a mile before the accident was discovered, when it was backed up and the vagrant car was once more taken in tow. The occupants of the car were not in the least put out by the little affair, judging from the fact that as the train, in backing up to it, drew near to the car, the well-known strains of "We won't go home till morning" came floating on the evening air. The remainder of the trip was accomplished without any accident, and the Belleville station was safely reached at about 9:15.

During the stay of the excursionists in Peterborough, they were treated with courtesy and kindness on every hand. The members of the Oddfellows' Band are very enthusiastic over the manner of their treatment at the hands of the Fire Brigade Band, which could not have been more thoughtful and hospitable. From the time the train arrived until it left, the Peterborough men stayed with their guests, entertained them at dinner at the best hotel in the town, drove them, as already stated, to the Auburn woollen mills, and spared no pains to make their visit agreeable. One would imagine that after the Oddfellows' Band had got on the train on their way home, the responsibility of their entertainers would have ended; but such was not the case. Even then the generous Peterboroughites boarded the train with a box of choice cigars, and supplied their guests with "weeds" enough to last them during the return trip. The visiting band appreciated the generous hospitality with which they were received, and if they ever have an opportunity of substantially showing their gratitude by entertaining their entertainers, they will not, it is probable, be slow in taking advantage of it.

A word should be said about the courteous and gentlemanly treatment received by the excursionists, during the entire trip, from Mr. Stanton, the conductor of the train, whose suave manners and unfailing good nature smoothed over a number of difficulties, and rendered the trip even more agreeable than it would otherwise have been.

Anniversary of Oddfellowship in America.

The members of Quinte Encampment No. 19 and Mizpah Lodge No. 127 I.O.O.F. celebrated the 62nd Anniversary of the institution of Oddfellowship in their beautiful Hall last evening and the impressive anniversary ceremony as laid down for the observance of Oddfellows by the Sovereign Grand Lodge was gone through by Bro. John Henderson Chief Patriarch of Quinte Encampment assisted by Brothers T. Runciman, N.G. and G. S. Tickell, P. S. of Mizpah Lodge, supported by all the members present and after a very pleasant meeting the brethren adjourned to Mr. P. H. Hambly's where a sumptuous repast was provided by Mine Host.

After ample justice had been done to the viands, the Chairman, Bro. Henderson, in a few well timed remarks explained the nature and mission of the Order, and proposed the toast of "The Queen," which was replied to by the company singing the National Anthem. The next toast being "Our Guests," was happily and forcibly responded to by Bro. Bradshaw, of Gore Lodge, and Past Grands Hugh Walker, W. J. Diamond and Wm. Davis. The "Grand Lodge" and "Grand Encampment" was responded to by Brothers S. Robinson, D. D. G. P., J. H. Post, Past D. D. G. M., and F. M. Clarke, Grand Representative, whose remarks showed that the Order was in a very prosperous condition in this jurisdiction.

"Our Sister Lodges" brought to the fore Brother Bradshaw of Gore Lodge. Bros. Post, Davis and Robinson of Belleville Lodge, and Bro. S. A. Spangenberg, of Mount Ararat Encampment, and elicited a couple of beautiful and well rendered songs from Bros. Davis and Burrows.

The Vice Chairman, Bro. Runciman, then gave the toasts of "Our Order throughout the Globe," which was responded to by P. G's Bros. Tickell, Mills and Garratt, and each of the brethren was at home with the subject and treated the company to well prepared historical and constitutional information.

"Our Junior Members," elicited encouraging remarks from Bros. H. Blair, S. Symons and others.

"The Ladies" were not forgotten by Bros P. G. Sutherland, S. Thompson, W. B. McCarthy and S. Spangenberg. The host and hostess was enthusiastically drunken. Mine host, Mr. Hambly responded, and the evening's entertainment, which will be long pleasantly remembered by those present, was brought to a close by singing "Auld Lang Sine."

Bro. Spangenberg favored the assembly during the course of the evening with a couple of his very entertaining songs, and several side splitting witticisms, and altogether the celebration was worthy of the grand object for which the brethren were assembled.

Belleville Cheese Market.

WEDNESDAY Apl. 27

Nothing is as yet doing in the local cheese market, no sale having been reported as yet. Cable advanced to 69s 6d on Monday, which was an advance of 6d on the quotations for the previous week. The prospect therefore continues favorable.

Cheese Market.

LITTLE FALLS, N. Y., April 25.—Cheese active; sales 3,500 boxes factory at 9c @ 12½c; 200 farm dairy at 6c @ 11c; 200 packages Butter at 20c @ 23c.

—The Kingston Cotton Mill will be in operation on the 1st of January next.

'THEY ALL DO IT.' — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

News Condensed.

—The Montreal Court has decided to extradite Vanarsden, the great will forger.

—On the 26th, four large tenement houses, Quebec, were burned. Loss, $15,000.

—W. A. Dack, of Carleton Place, committed suicide on the 25th inst., by drowning himself.

—On the 26th inst, a box factory at Green Point, N. Y. was burned and several lives lost.

—Mr. Dillon threatens armed resistance unless eviction processes are suspended for a year.

—A surveying party under J. P. Shanly, will leave Ottawa for the North-West next week.

—On the 25th 100,000 feet of lumber was burned near the Canada Central station, Ottawa.

—The Kingston Commissioners have licensed 62 taverns, 20 shops, and 2 wholesale liquor stores

—On the 25th, a farmer named Wm. Allen, living near Sharbott Lake, dropped dead while at work.

—United States vessels are reported to be almost entirely disappearing from South American ports.

—On the 26th, Mary Lynch, aged 18, living with her mother at Windsor, committed suicide by hanging herself.

—Chief Factor Clarke, of the Hudson Bay Company, Carleton, has been elected to represent Low district in the North-West Council.

—There seems to be no good reason why able-bodied men should be 'on the tramp' now-a-days. Work is plenty and wages fair.

—Thos. F. O'Brien, the wealthy landowner of Montreal, who was found guilty of forgery, has been sentenced to five years in the Penitentiary.

—The Great Western Railway shareholders at their meeting in London yesterday unanimously pronounced against fusion with the Grand Trunk.

—The St. John (N.B) *Globe* says Hon. Edward Blake is expected there late in July or early in August, for his tour of the maritime provinces.

—The brakesmen on the Brockville and Stratford sections of the Grand Trunk Railway, want an increase in their wages from $1.25 to $1.40 per day.

—The weather is intensely warm in Manitoba, and the snow has entirely gone, and farmers are busy sowing wheat in general throughout the province.

—Mr. Edward Hanlan is making negotiations to buy out the Toronto Zoo and remove the concern to the Island, to be established in connection with his hotel,

—The Bank of Montreal has declared a half-yearly dividend of 4 per cent., besides giving a bonus of 2 per cent, and placing a surplus of $200,000 to the reserve fund.

—The Mormon missionaries are expected in London, Ont., in a few days. There has been for years a flourishing Mormon colony in the city having their own edifice for public worship.

—The floods are working destruction in the North-west. Part of the St. Paul and Manitoba Railway has been washed away, and consequently travel Manitobawards will be for a time interrupted.

—On the night of the 25th, the post office at Fredericton, N.B., was broken open and all the letters except those in the safe were stolen, also $40 worth of stamps. It is feared the loss is considerable.

—The town of Buenaventura, on the Pacific coast of the Republic of Colombia, was all but destroyed by a disastrous fire on the 12th inst. Fifteen hundred families are homeless, and the loss will amount to a million dollars.

—It is said the Grain-carrying trade from Toronto does not promise to be very large the coming season. The stock in store is only about 520,000 bushels, and dealers do not anticipate large receipts during the summer.

—On the 1st of May it is expected that the Welland Canal will be thirteen feet deep to Lake Erie level. This will be the depth for the whole of the twenty-six miles from Port Colborne to Port Dalhousie.

—The Russian Empress is reported as suffering from severe hysteria, brought on principally by her fears of Nihilist outrages. The cowardly threats of the Revolutionary Committee have had most to do with the consequences.

—The debate on the second reading of the Irish Land Bill commenced yesterday in the House of Commons. The most notable features of the debate were the speeches of Mr. Gibson and Mr. Forster. The Conservative caucus agreed to oppose the Bill unless modifications are made in favor of the landlords.

—Mr. J. G. Moylan, inspector of prisons and asylums, has returned to Ottawa from making an investigation in regard to the affairs of the Manitoba penitentiary. It is stated that there were no grounds for the reported irregularities in connection with the management of that institution.

—Advices from the Cape state that an alarming outbreak between the Boers and English at Potchefstroom has occurred, and many street fights are taking place. The antagonism is very great. 400 loyalists have left Pretoria for fear of assassination. New castle, an interior town, is threatened by the Boers.

—Lord Beaconsfield's funeral takes place to-day at Hughenden. On the coffin will be placed a wreath sent from Osborne by the Queen. Notice has been given in the House of Commons that Mr. Gladstone will move that a monument be erected to the memory of the late Earl in Westminster Abbey. The announcement was received with cheers. In nearly all the churches in England on Sunday allusions were made to the loss the country has sustained by the death of the great statesman.

—While digging the foundation of a new college in Montreal, on the site of an old hotel, the workingmen came upon a hole three feet deep, in which they found the skeletons of two men in good preservation, the hair being still partly on the sculls. The skeletons were not laid horizontally as though the bodies had been buried there, but were in a space occupying but a couple of feet in diameter, as though the bodies had been thrust into the cavity one on top of the other. Some of the workmen from St. Laurent said that it was in their recollection that two shantymen after returning from Ottawa with their earnings had disappeared in a mysterious manner and nothing more was heard of them.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. A GRADUAL DEVELOPMEMNT.

Like most substantial reputations, that of Dr. Dow's Sturgeon Oil Liniment was formed slowly. Invented by a physician of Fredericton, New Brunswick, who subsequently was sent to the Local Legislature to represent his constituents there, and being used in his wide practice under the name of the Sturgeon Oil Liniment, it gradually grew into public knowledge and favor in the neighborhood. As it became known, and was carried from one part of the country to another by those who used it and recommended it, the demand for it became so large that Dr. Dow handed his rights over to a practical chemist who had the ability and experience to compound and dispose of it. At first, being recommended particularly for neuralgia and rheumatism, for which it is an infallible cure, it was used for similiar diseases to great advantage until the list of those eradicated by it grew to large proportions. Of these the most common are lumbago, sciatica, contracted joints, cramp in muscles, sprains, bruises, frost bites, chilblains, burns, scalds, erysipelas, ringworms, boils, felons, &c., &.

Put up in large bottles, retail 25 cts. each, and sold by all Druggists and Country Merchants.

J. W. BRAYLEY, Montreal.

The Bishop Strachan School,

For the Higher Education of Young Ladies,

WYKEHAM HALL,
COLLEGE AVENUE, TORONTO.

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, APRIL 27.

5 O'CLOCK EDITION.

City and Vicinity.

THE plague of dust has been got rid of.

DON'T fail to attend the concert to-night.

SHIPMENT of iron ore by water will soon commence.

THE railways have adopted their summer rates for travel.

GARDENERS have commenced operations in favored localities.

THE yacht *Gracie* has been fitted out, and is now ready for pleasure sailing.

Now is a good time to remove the dead limbs and trim your shade trees.

THE fill at the southern end of the Grand Junction wharf is being completed with gravel.

EVERYONE is looking around for summer quarters; even the fly has begun to put on his specks.

THE annual meeting of the Bay of Quinte Yacht Club will be held on Wednesday evening, May 4th.

ANGLERS have had but little sport as yet, but the pickerel are making their way up the river in thousands.

DR. G. S. RYERSON, the celebrated oculist and aurist, will make his next professional visit to this city on Tuesday, May 10.

THE Committee appointed by the Curling Club to arrange for the erection of a new rink are working on a scheme which promises to be successful.

LETTERS from our Marmora and Ameliasburg correspondents, also a communication from "A Prohibitionist," will be found on the first page of to-day's issue.

THE grass has taken a sudden start in growth; the buds on the trees are opening; the frost has left the ground; the cisterns are full, and all because of the rain.

A COLLISION between a democrat waggon and a street-car occurred on Front St. this morning, which resulted disastrously to the waggon, one of the cross-bars of which was broken.

MR. DICKSON denies that he eulogized Mr. Bickford in his speech at the St. George's dinner on Monday night, as appeared in our report. Instead of Mr. Bickford, Mr. Dickson says he meant Mr. Kelso.

THE planting of elm, maple and other forest trees at proper distances along the highways increases the value of adjoining property, and adds to the beauty and comfort of the section. In Germany fruit trees adorn the waysides.

THE city doctors say catarrhal maladies have become, to a certain extent, epidemic this spring, and persons so afflicted can only obtain relief by exercising the greatest possible caution. A nasal douche of warm water tinctured with carbolic acid and fine salt is recommended.

THE sudden advent of warm weather has played hob with costumes. Here you meet a man with a white tie, while the next one has a fur cap. One lady swelters in sealskin and the next flaunts a new straw bonnet. Extremes meet. Winter's flannels linger in the lap of spring.

YESTERDAY afternoon a number of the excursionists from Belleville who are interested in printing and newspaper work visited the *Review* office at Peterborough. The office is the most complete and best appointed in that part of the country—and one of the best things in the office is Mr. Jas. Macdonald, the big-bodied and big hearted local editor of the *Review*.

A PARTY of Grand Trunk engineers are at Deseronto locating the line of the Bay of Quinte Railroad, and operations will be commenced at once. The Road will be about three and a half miles in length, and will make close connections with the Grand Trunk Railroad east and west. It is expected to be in operation about the first of July.

WEATHER PROBABILITIES. — Toronto, April 27—Lakes: Moderate to fresh winds, mostly westerly to southerly, fine warm weather, possible showers in some localities.

FOR EUROPE.—On Saturday last Mr. W. R. Barber and Mr. Briggs left New York for Europe by the steamship *City of Berlin* of the Inman Line. A large number had taken passage by the steamship and many indications were manifest of a pleasant passage. Some friends of Messrs. Barber and Briggs from Belleville were present to bid them *bon voyage*.

POLICE COURT.—The only cases before the Police Magistrate this morning were two drunks. Benjamin Ridley was fined $1. and Alex. Robertson was discharged.

MARCHMONT HOME.—The ladies of the working-party will meet for the final gathering, at the Home, on Thursday at 3 p. m. Tea at 6. Bible Reading by Fred Lockett Esq., of Kingston. "From the Cross to the Crown." All friends cordially invited.

THE RIVAL CONCERT CO.—The following telegram from Cobourg was received by Capt. Biggar this morning:—Cobourg, April 27, 1881. Capt. Biggar, No. 1 Company: The Cobourg people were highly delighted with the Rival Concert last evening, every member being a star, as represented. Large house and numerous encores. J. VANCE GRAVELY, Mayor.

PETERBOROUGH possesses one luxury which Belleville should have possessed long ago; that is, a telephonic system. They have in the former town some thirty-five Bell telephones in use, with a central office, and all the appliances necessary to an efficient system of telephonic communication. They would almost as soon think of dispensing with their telephones now as of cutting off their telegraphic communication with the outside world.

AMERICAN TRADE DOLLARS.—A dangerous counterfeit of the American silver dollar has made its appearance. It has the ring of the genuine metal, the milling is perfect, and there is an absence of that greasy substance which is formed by running the thumb over the general run of base coins. It is, however, too light and a trifle thicker than the genuine. Canadians should be careful in handling the coin should they happen to cross the border.

BLACKWOOD'S MAGAZINE.—The Leonard Scott Publishing Co., 41 Barclay St. N. Y., have just issued their reprint of *Blackwood's Magazine* for April. Like all preceding numbers of the present year, it is full of good reading. "The Private Secretary" is continued. "Shadwell's Life of Lord Clyde" briefly sketches the career of that gallant soldier. "Vallambrosa," is an interesting account of the former and present condition of the famed monastery. "Old Scottish Society" gives a lively description of town and country life of Scotland seventy five or a hundred years ago. "Greece and her Claims" discusses the present situation in the East. There is an amusing article entitled "Freaks of the Telegraph," enumerating many provoking blunders caused by carelessness either in writing or transmission, being truly annoying to the recipients.

THE ROAD SCRAPER.—To-day the new road grader and scraper was used for the purpose of cleaning the streets. Its use was not so satisfactory in this respect as it is when used in grading streets. It may be that the bit of Front St. on which it was used to-day is peculiarly rough and uneven; but it is certain that the scraper did not accomplish on it as much as was expected. It did not scrape clean enough to render the street perfectly fit for traffic, but it was necessary to have a man go over with a shovel the ground which the machine had gone over. The scraper probably requires a smooth surface in order to have it work satisfactorily—as a scraper. However, the Chairman of the Public Works Committee and the Street Surveyor say that a great saving will be effected by the use of the machine—as much as $60 in the cleaning of Front Street.

THE NEW SUPERINTENDENT.—Mr. N. Weatherston, the newly appointed General Superintendent of the Grand Junction Railway, is a gentleman in the prime of life, an indefatigable worker and thoroughly trained railway officer of long experience in the operating of Railways and the development of traffic; eighteen years in the service of the Great Western Railway, several years assistant to the Superintendent, and seven years their general freight and passenger agent in Toronto, and subsequently for three years General Superintendent of the Toronto, Grey and Bruce Railway, with all the departments under his control. Mr. Weatherston is a prominent member of the Toronto Corn Exchange, and his knowledge of the requirements of the grain trade, in which he is at present engaged, will be of service in his new position. We understand that Mr. Weatherston will assume the duties of his office on the 1st of May. Mr. T. S. Detlor, whom Mr. Weatherston succeeds, took the position merely as a temporary arrangement, but fully sustained his reputation as one of the most efficient railway managers in the country. He has made many friends in Belleville, who will regret his retirement.

JUST RECEIVED—one hundred and ten setts Lace Curtains (bought job) and will be sold at a sacrifice. Beautiful patterns. JAS. HENNESSY.

Marine Notes.

The barge *Good Hit* arrived yesterday from Henderson, N. Y., took a load of lumber at the Eagle mill, and cleared for Henderson.

The schooner *J. N. Carter* cleared yesterday for Toronto with a load of cut stone.

The schr. *Bullock* has cleared for Charlotte with poplar bolts.

The schr. *M. O'Gorman* passed up to Trenton this morning.

Capt. Howard has sold the schr. *Florence*.

The schr. *Minnie Blakely* is expected with a quantity of cider for Messrs. Leavens and Corby and some ties for Rathbun & Son.

The steamer *Hero* will make her first trip from Kingston to-morrow.

The tug *Bonar* has arrived from Napanee.

The schr. *Olivia* has arrived from Picton at Ox Point, where she will load stone.

The schr. *Mary Foster* arrived yesterday with a load of wood from Trenton, for Capt. Walters.

The str. *Alexandra* will take a cargo of cattle from Picton to Ogdensburgh, and will reach here on Saturday night, passing down on Monday on her first trip of the season.

Capt. Porte is at West Lake, engaged in the attempt to get the *Utica* into Lake Ontario. The difficulties are great, but Capt. Porte will probably encounter them successfully.

The schr. *D. Freeman* is loading rye at Downey & Paeston's elevator for Oswego, she will probably clear this evening. The vessel's last trip was a remarkably rapid one. Leaving here on Saturday night at 9 o'clock, she arrived at Oswego on Sunday at 2 p. m., delivered her cargo on Monday, left Oswego on the same evening at 9 o'clock, and arrived in Belleville again at 1:30 p. m., yesterday afternoon. Allowing for the time lost on Sunday, Capt. Allan says that this is about as quick a trip as he ever made.

A PLAGUE EXPECTED.—The N.Y. *Herald* says: We have it on the authority of the most eminent physicians of the city, and their opinion is sustained by the whole profession, that New York is now on a verge of a pestilence—that, in fact, premonitory symptoms of a plague have already appeared. The alarming increase in the death rate shows that this is not a sensational or exaggerated view of the situation. A pestilence in New York this summer would mean the loss of tens of thousands of lives, and of hundreds if not thousands of millions of dollars.

—Mr. Bradlaugh yesterday attempted to take the oath in the House of Commons, but was prevented on a motion proposed by Sir Stafford Northcote, and passed by a majority of 208 to 175. The debate was an excited one. Mr. Bradlaugh refused to leave the House when ordered to by the Speaker, and was removed by the Sergeant-at-Arms. He will make another attempt to-day.

MORNING DESPATCHES

AMERICAN.

WASHINGTON SPECIALS.

NEW YORK, April 27.—The *Herald* states that the President says he is determined that the whole mass of corruption in the Post Office department will be probed to the bottom, he does not care who will be hurt in the process, and has given most positive instructions to James that nobody is to be saved.

The *World* says Conkling stated last night that he was now prepared to deal with the Robertson nomination, and the sooner the contest came the better. He claims to have assurances of sufficient support to reject Robertson.

AFTERNOON DISPATCHES.

GLADSTONE AND THE FUNERAL.

LONDON, April 27.—There is much comment on Gladstone's absence from Beaconsfield's funeral, and his failure to move an adjournment of the Commons out of respect to the deceased statesman.

LAND LEAGUE SENSATION.

DUBLIN, April 27.—An extraordinary sensation was caused at a land league meeting yesterday, by Dillon's speech on eviction. The Irish Catholic bishops yesterday heard the report of the committee appointed on the land bill. It is understood the bishops differ widely in their views.

THE BRADLAUGH CASE.

LONDON, April 27.—The Commons adjourned last night on motion of Cowen, Radical, to give time for a cool reflection on the course to be pursued in Bradlaugh's case. Gladstone persistently refused to intervene to give effect to Northcote's motion, which was adopted, that Bradlaugh be not permitted to take the oath. Gladstone would, he declared, take no step until he thought it could be taken with advantage.

DILLON'S SENSATIONAL SPEECH.

DUBLIN, April 27.—Dillon, in his speech yesterday, mentioned a circumstance where a priest warned 40 police that if they attempted eviction half a dozen would be shot by men inside the house with loaded rifles, and the police withdrew. Dillon stated that if evictions were carried out on a large scale in Tipperary the police must be prepared for fighting.

WASHINGTON, April 26 — Indications: Lower Lakes, fair, slightly colder.

THE ONTARIO AND QUEBEC RAILWAY.—A Montreal despatch says:—"At a meeting of delegates from Toronto, Hamilton, Montreal and Quebec, the Ontario and Quebec Railway Company was formally organized here to-day. It was resolved to apportion stock to the railways interested, and to open subscription for the capital stock, Mr. Adam Brown, of Hamilton, presided at the meeting, which was not concluded until near midnight."

ARRIVAL OF IMMIGRANTS.—A Winnipeg despatch of the 26th says: "Three immigrant trains, bringing in all about 600 persons, arrived in the Province on Sunday. The first was a party of English immigrants, under the guidance of L. C. Armstrong, and numbered about 200. The second was a Great Western party under Mr. Knox, which numbered nearly 300, and the third was Mr. Prittie's party, numbering about 200. They were all detained near Crookston, owing to the washouts on the St. Paul road from the freshet."

DISTINGUISHED VISITORS.—The Cunard steamship *Russia*, which arrived in New York on Monday, brought among her passengers the Duke of Sutherland, the Marquis of Stafford, and a number of brother directors of the London & Northwestern Railway Company, who have come to America to study the railway system. They will proceed as far as San Francisco. Mr. Thos. Bowles, M. P., is also of the party. The Pennsylvania Railway have already placed a train at their disposal. The party will remain in New York for several days. The Duke of Sutherland, who takes a great interest in the fire department, will visit Firemen's Hall while in New York, and carefully examine the American fire system. Dr. Russell, the celebrated journalist, accompanies the directors.

Cheese Market.

BROCKVILLE, April 36.—The Willow Grove Cheese Factory sold to-day 90 boxes spring cheese at 12c. to D. Derbyshire, agent for Messrs. Ayr, of Montreal. This is the first sale of the season.

—A Mr. Perkins, of England, has designed an ocean steamship which he says on a consumption of fifty tons of coal a day of twenty-four hours will cross from Queenston to New York in four days, and on occasion can make forty miles an hour. The suggested steamer has twin screws forward and aft, the bow screws pulling and the stern ones going ahead.

FOR ASTHMA AND PHTHISIC.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

—The Chiefs of Police of Ontario and Quebec meet in consultation at Toronto on the 10th and 11th May. Invitations to attend have been extended to the police officials of some of the prominent cities in the United States

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

THE SECRET OF HEALTH.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of HERRICK'S SUGAR COATED VEGETABLE PILLS, and you are safe. They never fail in any case of sickness or inward pain. Try them.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints that have been stiff for years.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

"Hail bounteous, beauteous, gladsome Spring"—this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

MARRIED.

In Belleville, on the 26th April, by the Rev. Dr. Clarke, THOMAS SHAW, Esq., of Fredericksburg, to MISS ADELAIDE VICTORIA, fourth daughter of the late Augustus Spencer, Esq., of Brighton.

Commercial.

BELLEVILLE MARKETS

INTELLIGENCER OFFICE,
Belleville, April 27, 1881.

The provision market has been steady during the week, with a light supply on most days, farmers being busy with their spring work, which detains them at home.

Grain is almost without change, a slight rise in rye and peas, which are the only grains offered in quantity, having been caused by the opening of navigation, thus reducing rates of freight.

The heavy demand for potatoes for export has caused the price to advance to 55c to 65c per bag, at which rates all of good quality that offer are taken readily. Many persons are also purchasing for seeding purposes which keeps up the price.

Quotations to-day are as under.

WHEAT, FALL—$1.00 to $1.20.
BARLEY—60c. to 70c.
RYE—85c to 90c.
OATS—36c. to 38c
PEAS—65c. to 70c.
HOGS—Dressed, $8.00 to $8.50.
BEEF—Dressed, $4.00 to $6.50.
HAMS—9c. to 12c.
BUTTER—Tub, 15c to 18c.
BUTTER—Roll 18c to 25c.
EGGS—10c. to 12c. per dozen.
HIDES—Rough $5.00 to $6.00, inspected $7.50.
SHEEPSKINS $1.00 to $1.25.
CALF SKINS—10c per lb.
DEAKENS—55c.
WOOL—25c. per lb.
CLOVER SEED—$3.50
TIMOTHY SEED—$2.75.
LARD—11c to 13c.
TALLOW—Rough, 4½c.
TALLOW—Rendered, 6½c.
CABBAGE—50c per doz.
POTATOES—55c. to 65c per bag.
FLOUR—Wholesale, $5.25 to $6 per bbl.
FLOUR—Retail, $5.50 to $6.50 per bbl.
HAY—$10.00 to $12.00 per ton.
CHICKENS—40c to 60c per pair
DUCKS—50 to 60c per pair.
GEESE—50 to 60c.
TURKEYS—75c to $1.50
STRAW—$4 to $5 per. ton.

TORONTO MARKET.

TORONTO, April 27. — Fall wheat No. 1 $1.16; No. 2, $1.14; No. 3, $1.10. Spring—No. 1, $1.20; No. 2, $1.18; No. 3, $1.12. Barley—No. 1 95; No. 2, 85 to 90; No. 3 extra, 80; No. 3, 70. Peas—No. 1, 76; No. 2, 75. Oats—No. 1, 40; No. 2, 39c. Corn—59. Flour—superior, $5.00; extra, $4.90; fancy, $4.80; strong bakers $5.30; spring extra, $4.90, superfine, $4.50; fine, $4.00. Bran—$14.50. Clover seed—$4.00 to $4.20. Timothy $2.25 to $2.50. Hogs—$7.50 to $8.00. Butter 15 to 20. Barley (street) 70c. to 85. Rye, $1.00 to $1.02. Spring wheat, $1.15 to $1.20. Fall wheat $1.10 to $1.15. Oatmeal $4.30 to $4.50. Cornmeal $3.00. Pork $20.00.

Wheat and flour quiet and steady. Barley nominal and in demand. Peas and rye weaker Oats and corn unchanged.

MONTREAL MARKET.

MONTREAL, April 27.—Flour, receipts 1,900 brls; sales 400 brls. Market quiet, prices noml. unchanged. Quotations: Superiors, $5.35 to $5.40; extra, $5.25 to $5.35; fancy $5.20 to $5.25; spring extra $5.20 to $5.25; superfine, $4.85 to $4.90; strong bakers, $5.50 to $6.00; fine, $4.30 to $4.40; middlings, $3.90 to $4.00; pollards $3.50 to $3.75; Ontario bags $2.50 to $2.65; city do. $3.05 to $3.10.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health. Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

By MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

"A young gentleman!" muttered Holm. "There is some mistake. It can't be my girl."

"A young gentleman!" echoed Todhetly. "It's an elopement, that's what it is! See here, my fine fellow, was the young gentleman tall and dark and handsome?"

"Yes, he was all, though," said the station master with a broad smile. "You know him sir? It was Sir Victor Cheswick, sir, and I suppose the case was an elopement."

Holm and Todhetly breathed a curse in concert.

"I suppose so, sir," said the station-master, who knew the young Baronet well and believed him safe in London with his lovely companion. "He is in town before this!"

"When does the next train leave?"

The station master informed him.

"Of course I shall hurry up after my girl Todhetly," said Holm, as they walked away toward the ticket office. "There's no use in telegraphing, for they are in London before this. They can't get married to-day, if Tessa has really eloped with Sir Victor, and she cannot marry him legally without my consent. The marriage of a minor without his or her parent's consent illegal, you know.

"I shall go up with you," said Todhetly. "I don't mean to give Sir Victor any advantage by staying away from Tessa."

"We can't bring the girl back here, after this escapade, till she comes as your wife," said Captain Holm discontentedly. "If we keep her a prisoner at the Grange, the whole country will know it and spy on us, and possibly interfere. This business must be finished elsewhere."

"You are right, Holm," returned the Squire. "We shall require a plenty of the sinews of war, so let's go to the bank. Fortunate I keep an account here. We can't get away under three hours, and we may as well make ourselves comfortable at an hotel. What do you say?"

Holm assented, and the two went to the bank, where Todhetly replenished his purse, and afterward to a hotel, where they ordered an early dinner, and solaced themselves on brandy and water and cigars.

At five o'clock, in the gray gloaming they entered the train and set out for London.

On arriving at the metropolitan station, Captain Holm sought out a deputy station master and made diligent inquiries, eliciting the fact that a young golden-haired girl had arrived by the morning train, but that whither she had gone was impossible to ascertain.

Beckoning a cab driver who was in the act of departing, Holm and Todhetly hurried to the cab stand, entered the vehicle, and the Captain gave the order to be conveyed to Kentish Town, giving street and number.

Laburnam Villa was closed and dark, as they saw when they paused before it. Not a light gleamed from the crevices of its shuttered windows. Not a sign of life was about the premises. The cabman pulled the bell, but no one answered his summons.

"Pull louder!" demanded Holm; "pound on the gate!"

The cabman obeyed these injunctions with surprising force.

"They haven't got home from the theatre!" suggested Todhetly.

"They are hiding in the back rooms, more likely," snarled Holm. "This silence and darkness is an indication that the girl is here. Sir Victor Cheswick would naturally have brought the girl to her friends, and the girl would have insisted upon coming. She's up stairs, with her devoted friends around her!" he added, sneering.

This was actually the case.

"What are we to do?" demanded Todhetly. "We are rousing the neighborhood, and will have the police upon us!"

Neighboring windows were being raised, and one or two front doors opened, giving egress to a few curious individuals anxious to know what the unwonted noise meant. But no sign of life emanated at Laburnham Villa.

"They have got the best of us for to-night," said Capt. Holm, acknowledging his defeat. "But in the morning I will bring an officer and take away my daughter. We will see if the law gives a father no rights over his children!"

Bidding the cabman mount his box, Holm, in an exceeding ill-humor, gave the order to be conveyed to Chapley's Hotel, Piccadilly, and in pleasant rooms in that hotel the pursuers were in due time comfortably settled.

The next morning, at an early hour, and in a state of sullen wrath that boded ill for poor little Tessa when her father would find her, Capt. Holm, accompanied by his friend Todhetly, went to Kentish Town, and sought out the branch police-station nearest the home of Reuben Dennis.

Finding a proper officer, Capt. Holm presented his card bearing his army title, at which inscription the police official conceived a great respect for the pale, bloated, yet elegantly attired gentleman, with the military air.

"This gentleman," said the Captain, introducing his friend, "is Squire Todhetly, a justice of the peace, and representative of the old Dorset family of Todhetly."

The police officer was duly impressed with the connections and family of the representative of the Todhetlys," and inquired what he could do for his visitors.

Capt. Holm made haste to tell his story, giving a florid account of his return from long service in Canada, of his finding his child, of her flight from his paternal care and his desire to recover her. Todhetly confirmed his story.

"No one can dispute a father's right," said the police official sagely. "You have only to command your daughter to go with you, to be sustained by the laws of England, which will enforce your command."

TO BE CNNTINUED.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopsea* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

—The sales of coal mined in Nova Scotia during the quarter ended March 31st, amounted to ninety-three thousand five hundred and thirty tons, an increase over the sales of the first quarter of 1880 of nearly seventeen thousand tons.

THE ST. LAWRENCE ROUTE.—The Chicago *Tribune* says: "The propeller *California*, which is now being fitted out at Toronto, is going to enter on a new trade. She will carry boxed meats and barreled pork from Cleveland to Montreal. All this trade formerly reached the seacoast by the way of New York. Should the venture be successful the trade will undoubtedly assume large proportions, as the widening and deepening of the Welland Canal will permit the large Chicago boats to convey pork to the seaboard by the same route."

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfiy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Beaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
FOR INTERNAL AND EXTERNAL USE

SUBSTITUTES!

☞The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer**, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer**; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer**, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

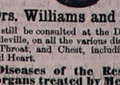
SPECIAL NOTICE
TO THE AFFLICTED.



Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired. Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

HALL'S
VEGETABLE
SICILIAN
HAIR
RENEWER

Has been in constant use by the public for over twenty years, and is the best preparation ever invented for RESTORING GRAY HAIR TO ITS YOUTHFUL COLOR AND LIFE.

It supplies the natural food and color to the hair glands without staining the skin. It will increase and thicken the growth of the hair, prevent its blanching and falling off, and thus AVERT BALDNESS.

It cures Itching, Eruptions and Dandruff. As a HAIR DRESSING it is very desirable, giving the hair a silken softness which all admire. It keeps the head clean, sweet and healthy.

The State Assayer and Chemist of Mass. and leading Physicians endorse and recommend it as a great triumph in medicine.

BUCKINGHAM'S DYE
FOR THE
WHISKERS

will change the beard to a BROWN or BLACK at discretion. Being in one preparation it is easily applied, and produces a permanent color that will not wash off.

MANHOOD

HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞ Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞ This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC :

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.
MR. W. H. MITCHELL,

DEAR SIR :—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.
MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR :—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer" ; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

Daily Intelligencer.

For the Intelligencer.

BEACONSFIELD.

Place the trembling finger
On the silent lip,
Let the drooping eyelids
Veil the tear dimmed eye,
One of England's great ones
Lays him down to die!

His the noble heart, where
Throned was England's weal,
Watch its pulses swaying
Souls on every shore—
A world's council ruling—
Now—it beats no more!

His that tongue of fire, whose
Echoes round us ring
In clarion tones; 'tis silent—
Silent now, and still!
Which did bend the nations
Unto England's will.

His, the hand that seized
The glorious red cross flag—
In the hour of danger
Flung it to the breeze,
Under highest heaven,
Over earth and seas—

Cast its mighty shadow
Over every foe,
And from Stamboul's ramparts
Thundered England's *NO!*
That brave right hand, powerless,
Nerveless is, and low.

Where the greatest nation
Guards the greatest dead—
Where in death are sleeping
Earth's noblest, bravest, best
Bear the Patriot, statesman
To his hallowed rest.

There will we enshrine him—
In the Abbey grand;
His name be there engraven,
Graven there in gold—
Descending through the ages
With great names of old.

And within a temple,
Holier, grander still—
That great name forever
Shall be guarded well—
In the hearts of Britons
His spirit ever dwell;

And when yon sun waneth,
Feeble grows and dim—
Britain's sons perusing
Ancient history's page,
Shall find that name the brightest
Of the Victorian age.

Illumining the story
Of the great and true—
Those undaunted heroes
In the front who stood—
The glory of the era
Of "Victoria the good,"

ANGLO ISRAEL.

Yachting Notes.

The *Nora* will next week go to Deseronto, where she will be placed on the ways and receive all needful attention, besides being newly painted.

RACING MACHINES.

The term "racing machine" having been used frequently of late, we have been asked for a definition of it. Our idea of the matter is this, that a vessel constructed for racing purposes which radically departs from such proportions as experience has shown to be essential to comfort and safety, is a racing machine. There are two kinds of racing machines besides the catamaran, namely the American sloop or cat boat of light draft, immense beam, which has been called into existence by a rule of measurement that takes account of length only, and the English "plank on edge," of very narrow beam, great length and deep draft of water, which has been evolved from a rule that taxes beam heavily, touches length lightly, and takes no account of depth. As an evidence of the ill-effect of the former type we have a builder in the Eastern States constructing a craft whose beam is upwards of half her length, and the absurdity of the English rule as applied to keel craft is shown by the building in England of a yacht appropriately named the *Evolution*, the following particulars as to which are given by *Forest and Stream* :—"The *Evolution* is 50 ft. 9 in. long on deck, same on water line, for she is a double ender with stem and post both plumb. Extreme beam is 6¼ ft.; depth of hold amidships, about 8¼ ft. Extreme draft 10 ft., and draft 5 ft. from forward, 2½ ft.; displacement 20 tons; ballast 10 tons, all of which is on the keel outside. The peculiar feature in the *Evolution* is her deep rocker keel, stopping short some 12 ft. from the stern, something after the style of the *Jullanar*, only a little more so. This keel takes a sudden drop of 3 ft. near amidships, for 15 ft. in length, and to this the lead is bolted, hanging really lower than the vessel proper, as though attached to the lower end of a centreboard when down. The frames are spaced 20 in. and in wake of the lead intermediate ones are introduced, running up to a fore and aft stringer plate. The least freeboard is 3 ft. and the rudder head 13 ft forward of the stern. The mast is 32 feet deck to hounds, and bowsprit 13½ ft. outboard. Hoist of mainsail 28 ft. Total area of sail 1,644 sq. ft., being nearly twice as much as some ten tonners that she will meet." The above specified monstrosities are racing machines, pure and simple. As the rule of measurement of the New York Yacht Club takes the cubical contents of a vessel, there is little room for building aught but honest vessels under it, the only weak point being that, as free board is measured, it encourages low freeboard and consequent unseaworthiness.

Beef Fat and Lard Butter.

Manufacturers and dealers in butter are on the war-path, in consequence of shipments of oleomargarine, invoiced as butter, from the United States to Canada and Europe. The Secretary of the Treasury has referred to the Attorney-General the question whether Collectors of Customs have the power to examine packages invoiced as butter and offered for shipment to points outside of the United States. The question is considered of great importance, and the decision of the Attorney-General is awaited with interest.

Oleomargarine has a rival in "Lard Butter," a compound which is described as thoroughly abominable. The lard used in this mixture is entirely different from the ordinary article, being almost raw. The process of manufacture is described as follows :—A number of pounds of raw lard, which has not been heated to the degree necessary to make the lard of commerce, are taken, deprived of the natural smell and taste, mixed with a certain amount of the best Creamery Butter, a little milk added, and the whole worked over. The result is a mixture resembling genuine butter in appearance, taste and smell. It is because of such tricks in trade that stringent legislation against the sale of oleomargarine and lard butter as the genuine product of the dairy is being considered in almost every State Legislature. It may be true as claimed by its manufacturers that cleanly-made oleomargarine is as palatable and as wholesome as good dairy butter, but people prefer to know what they are buying and paying for. As for lard butter, nothing can be said in its favor.

EARL BEACONSFIELD.

The Funeral Ceremonies at Hughenden.

A Day of Mourning Throughout the Country.

THE VAULT COMPLETELY FILLED WITH FLOWERS.

LONDON, April 26.

The funeral of Lord Beaconsfield took place to-day, and the body was deposited in the family fault at Hughenden, by the side of that of the late Countess of Beaconsfield. The remains of Mrs. Williams, the eccentric lady who left by will £40,000 to Lord Beaconsfield on condition that she should be interred in his family vault, are deposited there. The workmen did not complete the reconstruction of the vault for the reception of the body until noon—when all was ready. At a given signal the bells of Wycombe began to toll, and continued from the time of the departure of the funeral *cortege* from the manor until the remains were placed in the vault. The floral offerings from all parts of the kingdom were very beautiful. Special trains were run from London during the entire morning to Aylesbury and Wycombe, and the roads were crowded with pedestrians and vehicles. The morning was dismal and frequent showers of rain fell, but later in the day the weather cleared.

The Prince of Wales, the Duke of Connaught, Prince Leopold—the latter bearing a large wreath from the Queen—left Paddington at one o'clock, and the same train took the Duke of Richmond, the Marquis of Hamilton, and a number of members of the late Government. The Marquis of Hartington left Paddington somewhat later. Flags are flying at half-mast and other signs of mourning are visible in various towns throughout the country.

The funeral cortege left the manor house at 3.15 o'clock, and the immense assemblages along the route stood with uncovered heads during the passage of the procession, which was met at the southern door of the church by the vicar, who began reading the burial service, the congregation standing with bowed heads. The service in the church was very impressive, and at the conclusion the remains were conveyed to the vault for final interment.

Up to the last moment it had been expected that Mr. Gladstone would accept the invitation extended to him by the executors of Earl Beaconsfield to be present at the funeral of his great rival, but shortly before the last special train left Paddington station for Hughenden the station master received an intimation from Lord Hartington that Mr. Gladstone had found it impossible to attend the funeral. His absence caused great disappointment, and was the cause of some unkind and caustic remarks. But in the best informed quarters it has been ascertained that Mr. Gladstone earnestly wished to pay in person the last tribute of respect to the illustrious dead, and was with great difficulty dissuaded from doing so by his wife, who feared the results of the excitement and exposure necessarily attendant on such an occasion, and by the advice of the physician, who warned him that the consequences would certainly be serious, and might be fatal. His late illness has left its marks upon him, and his friends do all in their power to restrain him from unnecessary agitation or exertion. It is believed, however, that on the occasion of the vote for the erection of a monument in honor of Earl Beaconsfield Mr. Gladstone will deliver a magnificent eulogy upon the illustrious deceased.

When the funeral *cortege* arrived at the churchyard, the vicar, wearing a black gown and stole, and atteneed by a company of choristers attired in black cassocks, met the coffin at the gate. The vicar led the way into the church, the choristers on each side of the coffin chanted the 9th Psalm. They sang with clearness and sweetness, and the words of this sublime poem were heard with ease by the assembled multitude. Some of the verses seemed to be especially appropriate. After the usual funeral service had been read in the church the procession was reformed and proceeded to the Beaconsfield vault, the coffin being drawn thither on a bier covered with a velvet pall. The Prince of Wales, the Duke Connaught, Prince Leopold, and many others placed wreaths of flowers upon the coffin, which was then lowered into the vault, which the workmen immediately proceeded to close up. Before the vault was closed it was literally crammed with flowers.

The crowd at the funeral was less than was expected, many persons who intended to attend having probably been deterred by the sharp showers of hail. The Princess of Wales sent a wreath. The comment and surprise occasioned by Mr. Gladstone's absence increased. The explanation of this given in these despatches to-day is believed in the best quarters to be the true one.

Telegrams from all the principal towns and cities say that as the hour for Earl Beaconsfield's funeral drew near the church bells were tolled, and that everywhere manifestations of mourning were made.

Lord Beaconsfield's will is most interesting, and discloses the possession of many documents from the Queen.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

SANDERS BROTHERS.

Belleville, April 7. 327d1m

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville.

Daily Intelligencer.

BELLEVILLE, THURSDAY, APRIL 28.

The Free Press Again.

As we anticipated, the Ottawa organ of the Grits has not had the courtesy or honesty to withdraw its insinuations against the Minister of Customs. Such a thing is altogether beyond the moral conceptions of the ordinary Grit, hence we had no right to expect anything from the *Free Press* but a snarl and a repetition of its falsehood. Instead of acknowledging its error, as an honest journalist would have done, it adds another to its long list of untruths by adding that "elaborate articles" are "got up in the department at Ottawa" and "supplied" to us "whenever a question concerning the Customs comes up in the columns of the *Free Press.*" No such "gotten up articles" have been furnished. It is true we have exposed the ignorance and mendacity of the *Free Press* a number of times, hence its venom against the Minister. The *Free Press* should not fancy that every journalist is as reckless in his statements, or as unacquainted with the Customs laws as it appears to be. It should remember that there are others who occasionally see that paper besides the few Grits in Ottawa, and that therefore it should not indulge in those vagaries which are peculiarly its own. By the by, how is it that the *Free Press* has not replied to our exposure of its bonding warehouse fee grievance?

East Northumberland.

The Ottawa *Citizen* comments as follows on Mr. Upton's letter:

"It seems we have not heard the last of the late contest in East Northumberland. Evidence continues to accumulate to show that the Grit candidate and many of his friends played the "Good Lord, Good Devil" policy of the old woman when in imminent danger of drowning. To the Protestant electors they appealed to Protestant prejudices for the purpose of damaging the prospects of the Liberal-Conservative candidate, who happened to be a Roman Catholic; while to the Roman Catholic Grits they appealed to ignore the fact that Mr. Kennedy was one of themselves and to stand by their party at all hazards. By these means the election was won; and after the result was made known, there ascended loud huzzas over the alleged condemnation of the National Policy and the bargain with the Pacific Railway Syndicate. When it was charged that the anti-Catholic cry raised by Mr. Crouter and his friends had materially aided in securing that gentleman's return, the organs pooh-poohed the allegation, and strenuously insisted that the result was an emphatic and unequivocal condemnation of the Government. But evidence of an indisputable nature was forthcoming confirming all the representations that had been made." * * *

"Evidently the Grit member-elect although he enjoys the reputation of being a religious person, is all things to all men."

It is altogether probable that the tactics of the Grits will be exposed in Court as a protest against the return of Mr. Crouter is likely to be entered. A meeting of Conservatives was held at Brighton on Friday last to take into consideration the propriety of protesting the late election, when it was almost unanimously agreed upon to enter a protest. A further meeting in connection with this subject will be held in Warkworth on Tuesday, the 3rd of May.

The America Cup.

In view of the controversy which has arisen respecting the right of the Bay of Quinte Yacht Club to challenge for the cup won by the America in 1851, the following circular is of special interest, showing as it does clearly that the New York Yacht Club are compelled to accept a challenge emanating from any regularly organized yacht club:—

NEW YORK YACHT CLUB,
NEW YORK, U. S. A., July 20th, 1857.

To———

SIR,—I am directed to inform the members of your association that the One Hundred Guinea Cup won by the yacht America at Cowes, England, August 22nd, 1851, at the Regatta of the Royal Yacht Squadron, as a prize offered to yachts of all nations, has been presented to the New York Yacht Club, subject to the following conditions, viz.:—

"Any organized yacht club of any foreign country shall always be entitled, through any one or more of its members, to claim the right of sailing a match for this cup, with any yacht or other vessel, of not less than thirty or more than three hundred tons, measured by the Custom house rule of the country to which the vessel belongs.

"The parties desiring to sail for the cup may make any match with the yacht club in possession of the same that may be determined upon by mutual consent; but in case of disagreement as to terms, the match shall be sailed over the usual course for the annual regatta of the yacht club in possession of the cup, and subject to its rules and sailing regulations; the challenging party being bound to give six months' notice in writing, fixing the day they wish to start—the notice to embrace the length, Custom house measurement, rig, and name of the vessel

"It is to be distinctly understood that the cup is to be the property of the club, and not of the members thereof, or owners of the vessels winning it in a match, and that the condition of keeping it open to be sailed for by yacht clubs of all foreign countries, upon the terms above laid down, shall for ever attach to it, thus making it perpetually a challenge cup for friendly competition between foreign countries."

The New York Yacht Club, having accepted the gift, with the conditions above expressed, consider this a fitting occasion to present the subject to the yacht clubs of all nations, and invoke from them a spirited contest for the championship, and trust that it may be the source of continued friendly strife between the institutions of this description throughout the world, and therefore request that this communication may be laid before your members at their earliest meeting, and earnestly invite a friendly competition for the possession of the prize, tendering to any gentlemen who may favor us with a visit, and who may enter into the contest, a liberal, hearty welcome, and the strictest fair play.

Respectfully,
Your obedient servant,
————————,
Secretary New York Yacht Club.

We are, however, advised by a well-informed correspondent in New York, that there will be no trouble with regard to the matter. A Committee of competent gentlemen have been appointed by the New York Yacht Club to frame specific rules on the subject, and their report is expected to be made public in a short time.

A Profitable Company.

Here is the record of a profitable Manufacturing Company, which we take from the commercial columns of the Montreal *Gazette:*

"The first report of the Haggert Brothers Manufacturing Company, of Brampton, Ont., shows a net profit for the five months ending September 30th, 1880, of $11,407.07, out of which a dividend of 12 per cent has been paid, $4,500 carried to "rest," $1,000 applied to plant guarantee fund, and $874.87 carried forward. The assets of the Company amount to $234,335.79, and the liabilities are made up of $114,600 capital paid up, and $108,238.72 bills payable. The authorized capital is $250,000, and the Company is now offering its stock to the public. The business is that of the manufacture of agricultural implements, and is represented to have been very successful during the past year. The increased capital is desired for the purpose of lessening the banking accommodation.

This is a description of industry which we would commend to the attention of our Industrial Committee. The manufacture of Agricultural Implements is one of the most profitable that could be undertaken, and there is always a sure market for those productions. Every year thousands of dollars worth of implements are brought to Belleville from Oshawa, Whitby, Ingersoll, Brampton, Hamilton and other places, which might just as well be produced here. Capitalists who want a sure and good investment for their money could not do better than to promote the establishment of an extensive Agricultural Implement Factory.

Editorial Notes.

A NEAT HIT.

The *Mail* makes the following neat hit at the London organ of the Opposition: "The London *Advertiser* announces, as one of the burdens which the N. P. lays upon Mr. Blake's 'poor man', that the price of beans has gone up. It must be a consolation to our esteemed contemporary to know that thistles will be as plentiful and cheap as usual this season. If the worst comes to the worst he will not starve."

SINGULAR COINCIDENCE.

By a singular coincidence Lord Beaconsfield died on the anniversary day on which twelve months before, he had left Windsor Castle after tendering Her Majesty his resignation as Prime Minister of England.

ANNUAL EXPENDITURE.

The *Globe* has not yet found courage to attempt to deal with the exceedingly able letter of Senator Macpherson, in which he shows that the controllable expenditure under the Mackenzie Government was greater than it has been under the present Government. The organ contents itself with saying that "the public care very little for distinctions between expenditure that is controlled and expenditure that is not," and that they are concerned only as to the total expenditure. This is a serious mistake. Intelligent people know that the total expenditure has been increased for the erection of necessary public works and other objects of a profitable character, the necessity for and utility of which have been vouched for by the great financial genius of the Opposition, Sir Richard Cartwright. But the extent of the controllable expenditure shows beyond question whether the Government of the day is economical or otherwise. The Mackenzie administration shows very badly in such a comparison, as we have previously seen from Mr. Macpherson's figures, otherwise the *Globe* would not dismiss the subject in so cavalier a manner.

Dungannon and Faraday.

The migration of settlers into this municipality continue steadily, and many families have moved in within the last few months.

The Cheese Factory which is about to be started at L'Amable, will be of great benefit to this country, as the lumbering is gradually creeping away to the north. A large quantity of hay is raised in this neighborhood, which will now be utilized by being fed up to cows.

The Scott Act comes in force here on the 1st of May, our Council having passed a By-law last Saturday to prohibit the sale of intoxicating liquor in Dungannon and Faraday.

Mr. Jarman has built an addition, and put up a circular saw, in his mill at L'Amable.

The Town Hall and Court House at Bancroft, (late York River) is now completed with the exception of plastering; it is about 60 feet long, and 26 feet wide and 16 feet high inside. It is a very handsome building and reflects great credit on Mr. J. Siddons the contractor.

Last week Mr. W. Boyd, living near the town line of Faraday and Herschell, attempted to cross a lake on the ice with his team, but broke through and unfortunately lost one of his horses.

We have had no rain for a month and the river is very low for driving saw logs.

SYLVANUS.

Faraday, April 23rd, 1881.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

The Ontario and Quebec Railway.

It will be seen by the following account of a Railway meeting at Montreal on the 26th inst., that the men at the head of the Ontario and Quebec Railway movement mean business, and there is scarcely any doubt that the Road will be built at an early day. We copy from the *Witness* of last evening:

A meeting of railway men interested in the construction of the Ontario & Quebec Railway was held yesterday at the Windsor Hotel for the purpose of considering the best means of carrying into effect the objects of the Company, the obtaining of the capital necessary, and the question of the allotment of the stock among the several companies concerned. A preliminary meeting was held at noon, at which arrangements were made to meet again at 8 o'clock in the evening for business. At the latter meeting the greater number of the leading capitalists and influential railway men interested in the railway were present. Mr. Adam Brown, of Hamilton, representing the Great Western Railway, occupied the chair. The following Railways were represented:—Credit Valley, Mr. Osler, Toronto; Canada Central, Mr. McIntyre; South Eastern, Mr. Chaffee; Grand Junction, Mr. Bickford; Quebec, Montreal & Occidental, Mr. Senecal and the Hon. Mr. Church. The following gentlemen were also in attendance: The Hon. Rossire Thibadeau, Hector Cameron, M.P., Mr. Archambault, Mr. Henry Howland, Toronto; Mr. Campbell, Toronto, and Mr. W. L. Gordon—the latter, Secretary of the Provisional Board of Directors.

The meeting was of a private nature, but is declared to have been a complete success. The amount of the capital stock of the Company was fixed at $1,000,000 which was apportioned among the several interests represented. Ten per cent of this is to be paid in to the Bank of Montreal on or before the 9th of May. On that date a notice will be issued, calling a meeting to elect a permanent Board. The Provisional Directors elected were the Hon. Mr. Chapleau, the Hon. L. R. Church, the Hon. Mr. Thibaudeau, Messrs. Duncan McIntyre, A. B. Chaffee and F. X. Archambault Q. C., of Montreal, Messrs. H. S. Howland, C. J. Campbell, W. H. Lockhart Gorden, E. B. Osler and E. O. Bickford of Toronto; Adam Brown, of Hamilton, and J. Alderic Ouimet and Pierre Garneau, of Quebec.

A meeting of the Provisional Board was held at noon to-day, Mr. C. J. Campbell, in the absence of Mr. Adam Brown, presiding. Considerable discussion took place on questions of detail, and the principal business transacted was the giving of instructions to the Company's Chief Engineer Mr. Lumsden, to complete his preliminary survey so as to be ready to report to the first meeting of the Permanent Board in May.

In discussing the matter with the Board, Mr. Lumsden informed them that no great difficulties were to be overcome in locating the line and that the work had no particular feature more than that it was ordinarily heavy. Some difficulty might be experienced in entering the city of Toronto from the east, but if the Grand Trunk threw no great obstacles in the Company's way, the entrance could be effected advantageously at present.

A few minor points were touched upon, and the meeting adjourned.

News Condensed.

—Sir Chas. Tupper sails for Canada today.

—Sir Hugh Allan will sail for England on the 14th of May.

—More libel suits between Port Hope journalists are reported.

—Reports from the Ottawa country say that the fall wheat is safe.

—The loss by the destruction of Gunner's tannery at Kingston was $50,000.

The paving of Dundas-street, London, with cedar blocks will be proceeded with.

—The Duke of Sutherland and the Marquis of Stafford are expected in Toronto in a few days.

—Nine persons are under arrest at Constantinople for complicity in the murder of the late Sultan Abdul Aziz.

—Mr. Edward Bothwell, sen., aged 88 years, one of the most respected citizens of Ottawa, died on the 27th inst.

—It is asserted that Mr. Joly has resigned the leadership of the Opposition in Quebec and will be succeeded by Mr. Mercier.

—It is said that an additional passenger train will be put on the Grand Trunk between Brockville and Kingston every Monday.

—By the explosion of a shell on a German training-ship yesterday nine men were killed, and seventeen more or less seriously wounded.

—The fourth special train from Ottawa for Manitoba left yesterday, forty persons starting from that point with several car loads of freight.

—The strike mania prevails throughout several portions of the United States. At St. Louis the street railway employees got riotous and destroyed a great deal of property.

—A man named McDermott, of St Catharines, refused to give information to the census-taker. When he had paid his fine to the Police Magistrate he was quite willing to tell all he knew.

—Mr. A. Onderdonk, C. P. R. contractor on the British Columbia division, states that nineteen miles of the road have been graded, and four tunnels completed, and another about finished.

—Mrs. J. Mills, of Montreal, after drawing $3,900 from the vaults, left her husband and three children, one of whom was sick of diphtheria, and eloped with a young man named Jamison, to Plattsburg, N. Y.

—A banquet is to be given to Sir Hugh and Mr. Andrew Allan by the citizens of Montreal to mark the arrival of their new and magnificent steamer the *Parisian* at that port. The banquet is to take place on the 12th of May.

—The aggregate traffic receipts of the Canada Central for the fourteen weeks ending the 14th of April were $125,031, against $71,056 for the corresponding period last year. The miles of railway operated now are 210 against 162½ last year.

—Mr. Wm. Hendrie, of Hamilton, contractor, writes to the *Mail* in reference to the widening of the gauge of the Toronto Grey & Bruce railway. He says that he has succeeded in obtaining for that road an offer 20 per cent. better than that of the Grand Trunk.

—The *Rapid City Standard* is the name of a new weekly journal published in Rapid City, North-West Territory, by Mr. Gibbons, formerly of the *Citizen*, Ottawa. It is a good sized sheet, and is ably conducted. It has an excellent advertising patronage, which speaks well for the business prosperity of the place.

—Mr. R. W. Turner, the manager of the Empire Woollen Mills, Columbia, Ont., being about to take charge of the mills under erection at Campbellford, the employes of the Empire mills yesterday, previous to commencing work, assembled and presented him with an address and a heavy gold Albert chain, as remembrances.

—Judge Boyd of Toronto on the 26th fined a lawyer $2 because he did not sit down when ordered to do so. The reason the gentleman remained standing was a simple one. He could not find a seat, the court room being crowded. Mr. Perdue, the gentleman in question, intends bringing the matter before the Minister of Justice.

—Constantinople advices bring details respecting the the plague in Mesopotamia. The plague is of a terrible character. It has broken out along the western bank of the Euphrates. It is limited to two towns. The one where it originated had 1,200 inhabitants, of whom 350 have died. In the other there were 14,000 inhabitants, of whom 157 died in one week.

—Mr. Bradlaugh's attempt to take his place in the House of Commons yesterday ended like unto the first. A measure will likely be brought in by the Ministry dealing with the oaths question, and until this is passed Mr. Bradlaugh will remain quiet. The trouble is that no time can be spared from the Land Bill, and Mr. Gladstone suggests morning sessions to pass the Oaths Bill.

A Peep into a Show Ground.

Shelby, Pullman & Hamilton's Show "en Dishabille."

What an immense expenditure of capital, thought, time and labor it requires to form that immense combination of little and great things summed up in the brief word "Show!" that is, the modern travelling "show" of the higher class. Very few persons who are in the habit of "going to see the circus" have any idea of the vast amount of foresight, patience, courage, skill and experience,—of the endless variety of material and properties,—of the great number of employees, each trained to perform his or her own particular work with promptitude and exactness,—which are required to efficiently "run" a great travelling show. Probably it would be impossible for any one to obtain an adequate idea of the magnitude of such an undertaking without visiting the show when it is in "undress" as it were, and become thoroughly acquainted with its internal management. Such a visit is not only interesting but very instructive as well. One can see the plans of the master-mind which governs the whole establishment in the progress of development and one cannot fail to be impressed with the unlimited power which is the result of method, practice and skilful combination. Yesterday afternoon an INTELLIGENCER representative visited the Agricultural Grounds, where the great Shelby, Pullman & Hamilton Show is at present established, and where the great army of employees are being trained to perform the duties of their several departments. Rehearsals take place daily—sometimes twice a day, the horses and other animals being put through their parts as well as the men and women. The general public is rigorously excluded from the grounds, and the rehearsals are carried on in strict privacy. The reporter, however, had little difficulty in obtaining admission to the ground, and was received and shown through by Mr. Shelby himself, the senior partner of the concern, and, it would appear, the managing director as well. At first sight, the whole ground appeared to be in confusion—waggons, animals and tents being apparently scattered through the enclosure without any attempt at order; but by and by it was plainly discernible that a regular system was observed in the locating of the different departments: everything had its proper place, and that place was the best place for it. One of the most conspicuous objects on the ground was the mammoth elephant "Warrior," which was being led round an enclosed ring by his keeper, who was on horseback. This huge animal was being put through various evolutions, which he did with no very good grace. It is necessary to train him for several hours every day, chiefly in order to allow him to become friendly with the horse. It would be dangerous to allow a strange horse to remain near "Warrior" very long at a time, for, being peculiarly vicious and unmanageable, he would in an unguarded moment make a rush on the helpless animal and probably kill both it and its rider. Near by were the two performing elephants, chained to a tree. The little fellows had just been working hard, performing their difficult task of "teetering" on a plank—or rather, half-a-dozen planks fastened together. A little distance off stood the camels and elk. The large camel is just shedding his coat, and looks like a disreputable and moth-eaten old buffalo robe, but the skin which shows from beneath the old coat is almost beautiful in color and softness. The number of waggons and cages scattered through the grounds is quite bewildering. Some of them are for ornament wholly, but the majority of them are for use. Four immense waggons are used for the properties alone, the properties consisting of canvas, stakes, seats, &c. When the show leaves a place, all these are gathered together and placed in systematic order in these waggons which are then driven to the trains and placed on board. When the train arrives at a showing place the waggons are driven to the show ground and unloaded there. An immense amount of time and labor is saved by this plan. As the reporter passed along with Mr. Shelby he was attracted by the sound of a chime of bells near by. The sound proceeded from a small ornamental car in which was placed a chime of bells. A young lady was in the car practising at the bells. She contrived to get some very pretty music from them. The car itself is worthy of special notice. It is entirely new, and will be seen in public for the first time next Saturday. It is beautifully decorated, Mr. Shelby having expended $1,700 in gold-leaf and external painting alone. A short distance away stood the great black cannon from which M'me Zazel is shot into the air. M'me Zazel is an Englishwoman by birth. She was brought out to America by Barnum, and travelled with his great show until it broke up last year, when she was immediately engaged by Mr. Shelby. The feat she performs is a singularly daring and startling one. M'me Zazel has been induced to appear in the street parade, so Mr. Shelby says. She will appear seated on the cartridge-box of the cannon, which will be drawn by four horses. The street parade will, indeed, be an unusually fine one. Fifty-six thousand dollars have been expended in purchasing new ornamental objects and tableau-cars alone. There will be 42 objects in the parade, among which the following may be mentioned:—Two bands, one of them being a Zulu band. A magnificent tableau-car, bearing the "Godess of Liberty," and with four ladies, representing England, Ireland Scotland and America, seated on the four corners. The costumes of these ladies cost over $130 each, and were made under the personal supervision of Mr. Shelby. A chariot drawn by six ponies. Mounted men and women in elegant mediæval costumes. A chariot drawn by a zebra and elk. The car containing the chimes (already mentioned), drawn by two elephants. The cage containing two large lions, which are performed by their keeper in full view of the crowd in the line of procession. The number of horses in the procession will be 75—not including ponies, mules, stallions, and Broncho horses.

The show is, without doubt, one of considerable magnitude, and represents enough capital to serve for two or three large fortunes

We would have liked to describe the scene inside the Agricultural Hall, where the wild beasts are kept; but our space will not allow of it.

Rational Treatment, Positive Cures.

Dr. R. V. Pierce, President of the World's Dispensary Medical Association, is as earnest in selling his under positive guarantees, and if anybody who purchases and uses any of these widely celebrated remedies, does not derive benefit therefrom, the Association would like to hear from that person with description of symptoms and history of case. Organized and incorporated, as the Association is, to teach medicine and surgery and for the successful treatment of all chronic diseases and and managing annually thousands of cases through our original method of diagnosis without ever seeing the patients, and having also the largest sanitarium in the world for the accommodation of the more complicated cases, and also for surgical cases, the Faculty feel themselves prepared to undertake even the most discouraging cases. They resort to all the best remedial means known to modern medical science—neglecting nothing. Address, Worlds' Dispensary Medical Association, Buffalo, N. Y., or Great Russell Street Buildings, London, Eng.

The Lips We Love to Press

inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

THE SECRET OF HEALTH.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of HERRICK'S SUGAR COATED VEGETABLE PILLS, and you are safe. They never fail in any case of sickness or inward pain. Try them.

'Hail bounteous, beauteous, gladsome Spring" this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

DYSPEPSIA—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

BUT MANY TIMES.
—BY—

DR. WILSON'S PULMONARY CHERRY BALSAM!

This established fact is a wonderful one to contemplate, and while it remains, there is hope for the the sick and suffering from that terrible disease. This wonderful balsam is composed of various vegetable materials of the purest kind, each performing an important work.

THE WILD CHERRY

acts as a tonic to the stomach, giving a healthy appetite and assisting in converting the food into bright healthy blood, and at the same time exerts a soothing sedative action on the heart and large blood vessels. To the wild cherry as a base is added

AN INGREDIENT

which has a special solvent action on the tough stringy phlegm which clogs the air tubes and cells so that it is easily expectorated. Then there are the gum resins of the

WHITE PINE AND FIR

of Southern climes which assist the ulcerated tissues to heal. To these are added a

BLAND LUBRICATING FLUID

which acts as a healthy secretion of mucous does by coating the mucous membrane and keeping it soft and pliable.

ALL UNITED

assist each other to bring health to those whose throat or lungs are diseased and

HUNDREDS OF TESTIMONIALS

prove their great worth and the good they have already done.

Sold everywhere at 25 cents and 40 cents per bottle.

THE LATEST.—Talk about your little and your big sensations, but the great sensation is at the store opposite the Anglo-American Hotel, where people are obtaining goods of all kinds at half the ordinary prices. This is the greatest chance ever offered the citizens of Belleville to obtain genuine roll plate jewellery of all kinds, gold and silver watches, plated goods that are reliable and as good as are sold in the city. As these goods will soon be cleared out, it is to your interest to call early and secure great bargains. A word to the wise is sufficient. R. PURDY.

Daily Intelligencer.

BELLEVILLE, THURSDAY, APRIL 28.

5 O'CLOCK EDITION.

City and Vicinity.

THE market to-day was smaller than usual.

THE Minister of Customs is in town, having arrived last evening from Ottawa.

THE song of the lazy man: "Oh think of the time when there's no more work to do."

THE work of the road scraper yesterday has greatly improved the appearance of Front St.

THE tents of the Mastodon Show are to be pitched on the Hospital Lot to-morrow morning, and the final reherasl takes place in the afternoon.

TISDALE BROTHERS are engaged in building a skiff for Mr. Goslin, of Campbellford. This is the twelfth skiff they have built this season, and they have three more orders on hand.

THE Zulu Band, which is one of the attractions of Shelby, Pullman & Hamilton's show, arrived yesterday. They are American Zulus, and are much tamer and more easily managed than the Zulus of Africa.

THE first game of quoits this season took place yesterday afternoon between a well-known city player and a pitcher from the country. The game was very closely contested, but the countryman won by 21 shots to 20 made by his opponent.

ON Tuesday last, Mr. Charles Wilkins, Fishery Overseer, seized three barrels of pickerel at Shannonville station, which had been consigned by Thomas McDonald to a dealer in the United States. The fish were sold to pay expenses. A number of parties at Tweed have been detected in the act of catching fish out of season.

WEATHER PROBABILITIES. — Toronto, April 27.—Lakes: Light to moderate variable winds, fine warm weather.

ROWING CLUB.—Because of the concert last night and several other meetings being held, the meeting of the Rowing Club was postponed until Monday evening next, at the same hour and place.

POLICE COURT.—The only case before the Police Magistrate this morning was that of James Cook, charged with beating a woman, known as Emma Cook, who lives with him as his wife. It is only on compulsion that she lives with him, as he will not leave the house where she resides, and has been in the habit of abusing her unmercifully. He was convicted, but sentence was reserved.

PRESENTATION.—A very pleasing occurrence took place at the band-room of the Oddfellow's Band last evening. A highly popular member of the band, Mr. Wm. Alford, intends leaving town this evening for Minneapolis, Ill., and the remaining members of the band presented him with a gold locket, suitably inscribed. The locket, which was procured at the establishment of Mr. Allan McFee, is a very handsome one, and the inscription, which was also done at that establishment also exhibits very fine workmanship. The Oddfellow's Band loses a valuable member in Mr. Alford, who was both a good musician and a good fellow.

ACCIDENT.—Yesterday morning Mr. John Finnigan, carriage maker, Mill St., fell through a trap-door in the side-walk in front of Templetons' drug store. The trap was open for the purpose of bringing barrels into the cellar, and as there was apparently no one near to warn pedestrians of the danger, Mr. Finnigan stumbled into the opening. He was very severely bruised from the right hip to below the knee, but fortunately no bones were broken and it is not probable that Mr. Finnigan was injured internally. He was taken home in a hack and his injuries were at once attended to. He is still suffering great pain from his bruises, and as he is an elderly man it is not likely that he will be entirely recovered from the effects of his sudenfall for several weeks.

THE "RIVALS" CONCERT COMPANY.—The concert given by this organization in the City Hall last evening was fairly attended, the hall being about two-thirds filled. Perhaps the laudatory notices which had appeared in reference to the artists who compose the company had aroused the expectations of the auditory to too high a pitch, and these high expectations were not in all cases realized; but it is but just to say that the majority of those present last evening were very well pleased. The music rendered was in nearly every instance of high merit, and was interpret in a meritoricus manner. Mr. H. Singerhoff is without doubt the most accomplished artist in the company. He is a violinist of rare powers, though his style is slightly disfigured by eccentricity and mannerism. His rendition of "Home Sweet Home," on which every string of his instrument was constantly used, and at the same time, was the finest thing of the kind ever heard here, with the exception of Remenyi's "Liberty Hymn." Mr. Hutchins is a cornetist of rare tongueing power, and with an extraordinary power of lung; but his playing lacks in purity of tone and modulation. M'me. Schiller's flute playing is chiefly remarkable on account of its being the playing of a woman. She plays with considerable skill and taste, her only serious fault being a too abrupt, jirky or accentuated style, which is especially noticeable when she finishes a passage. The remark of the elder Weller involuntarily comes into one's mind when M'me Schiller ceases playing with a jerk: "That's rather a sudden pull-up, ain't it, Sammy?" Miss Emerson, the vocalist of company, possesses a mezzo soprano voice which, though lacking in power, is pure and rich in tone. Her singing denoted both taste and cultivation. Mr. Louis, the pianist is weak in heavy music, but plays light, airy and fanciful passages with much delicacy and skill. He is not, however, a pianist, of first-class powers, though a good accompanist. The most pleasing number on the programme was the last—the duet for cornet and flute by Mme. Schiller and Mr. Hutchins, which was rendered in a manner worthy of high praise. On the whole the concert was one which was deserving of warm commendation and a much larger audience than listened to it last evening.

JUST RECEIVED—one hundred and ten setts Lace Curtains (bought job) and will be sold at a sacrifice. Beautiful patterns. JAS. HENNESSY.

SAD RAILWAY ACCIDENT

A Boy's Legs Cut Off.

A very shocking accident (and one which will very probably result fatally) occurred at the G. T. R. station here last evening a few minutes past six o'clock. The evening express from the east had just arrived and was standing at the station on the main line. A freight train was approaching the station from the west, just about two minutes before the freight train had arrived at the western switch, when William Cummings, a lad about 12 years of age, son of Mr. Wm. Cummings, night baggage master, came out of his father's house, (which is within a stone's throw of the switch,) and stood on the siding with his back towards the approaching freight train. He though that the express had left, and that the freight train was going on to the main line, and consequently took no notice of it. He was standing about a hundred feet to the east of the switch. As the engine passed over the switch the engineer saw that the boy did not take any notice of the train and was apparently unaware of his danger. He signalled loudly and at the same time reversed his engine. But it was too late; the distance was too short. Almost as soon as the lad was made aware of his danger the engine was upon him. He was struck and knocked down by the buffer, and the wheels of the engine passed over him. Both legs were taken off—the right leg was horribly crushed above the knee, half way up the thigh, and the left leg was taken off below the knee. The entire train passed over the poor little fellow before the engine was stopped. He was picked up and carried home and Dr. Burdett was sent for, who also subsequently called in Drs. Murphy and Farley. After a hasty consulation, it was decided to amputate both legs, which was accordingly done. The operation was performed by Dr. Burdett, assisted by the other physicians; it was a very difficult one, but was successfully accomplished, and the patient was even easier than could be expected during the night; but this morning his sufferings began to increase, and towards noon he was undergoing intense agony, his cries being heart-rending to hear.

The Cheese Trade.

(From the Montreal Gazette, April, 26th.)

During the past few days there has been some excitement in the cheese market, but the flutter has taken place on the other side of the Atlantic. It appears that for some time past a prominent operator in Liverpool has endeavored to break the market there, and on Thursday last he seems to have succeeded in his object, but no sooner did prices give way than he at once "scooped" up about 10,000 boxes at 64s 6d@65s. On the next day the market was decidedly better and prices advanced to 70s@71s for fine, owing to the "bullish" proclivities of the great "bear" of the day previous. To-day the market was "booming," sales having been cabled at 72s, and the public cable moved up 6d to 69s 6d. The Liverpool cheese market is getting to be as famous for its speculative manipulations, as is the Chicago market for wheat and pork "corners." The knights of the early curd have already been prospecting in Brockville, where several lots of new cheese have been sold to Montreal buyers at 12c, and one small lot was bought for Ottawa at 12½c. Part have already been shipped, and the rest will, it is said, be forwarded to-day. The make will be general by May 2nd, but the early production, it is thought, will not be as heavy as at the same time lost year. The whole season's make, however, it is expected, will exceed that of 1880. New York there have been several transactions in new cheese, 13½c being paid for London and Rock Springs factories, and 400 boxes of the Elgin and Rushford factories were sold at 13¼@13¾c.

—Mr. Davidson, who has been sheriff of Waterloo for 28 years, died on the 27th inst.

—Chinese officers and crews have arrived in the Tyne to man six swift steel turret vessels built there for China.

—Secretary Blaine is said to intend to make the advocacy of the Monroe doctrine a prominent and aggressive feature in his foreign policy.

—The Grand Duke Nicholas, of Russia, has been found guilty of complicity in the plans of the Nihilists and sentenced by the Czar to imprisonment for life.

—The wreck of the steamship *Ottawa* at Cape Charles is reported to have escaped any injury from the breaking up of the ice, and hopes are expressed that she will yet be saved.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

Christ Church.

A meeting of the congregation was held last night in the Workingman's Temperance Hall, which was fairly attended. The Rector, Dr. Clarke, took the chair, and in stating the object of the meeting said there were two ways of getting out of their present difficulties, viz., to either disband as a congregation (which he did not for a moment think possible), or to rebuild the church. If the meeting should decide on building, he would recommend them to build a much more substantial edifice.

The Hon. L. Wallbridge then moved, seconded by Mr. J. H. Simpson, that this congregation hereby resolve to rebuild Christ Church; which was carried unanimously.

It was then decided to build as near the old site as possible; and $15,000 was adopted as a basis for the entire cost of the new church.

The following gentlemen were then named as a Committee to solicit and receive subscriptions: Messrs. J. W. London, H. Corby, jr., Wm. Doctor, J. W. Campion, S. R. Earle, W. R. Carmichael, and J. Panter. The Committee immediately went to work, and before the meeting adjourned reported that there had been subscribed and donated $3,180, in the room. It is the intention of the Committee to canvass the congregation and friends at once, so that they can report at the adjourned Easter Vestry meeting on Friday night.

The Wardens have, through the kindness of the Trustees of the M. E. Church, secured their old church, corner of Church and Great St. James Sts., where divine service will be held each morning and evening.

A vote of thanks was also passed to the pastors and congregations of Bridge St. Church, the Baptist Church and St. Andrew's Church, for their Christian sympathy and kindness in placing their churches at the disposal of the congregation for a service each Sabbath.

The Rector, Dr. Clarke, has received a large number of letters, sympathizing with him in the loss of the church, and amongst them the following from the Napanee parish:

NAPANEE, April 27, 1881.

To the Rector and Churchwardens Christ Church, Belleville, Ont.:

GENTLEMEN,—I have been requested to send you a copy of the following resolution passed at our vestry last night:—

Moved by Mr. Lockwood, seconded by Mr. Fanshaw, and resolved, That the Vestry of St. Mary Magadelene's Church, Napanee, desire to express their sympathy with the Rector and congregation of Christ Church, Belleville, in the loss they have sustained in the destruction of their church by fire on the 25th inst.

C. FESSENDEN,
Vestry Clerk.

Marine Notes.

The schr. *Ocean Wave* has been chartered to carry cut stone from Ox Point to Toronto at $5.50 per toise.

The schr. *Mary Foster* has gone to Trenton, where she will load with lumber for Brockville or Kingston.

The steam barge *Norman* is expected to-morrow. She will take a cargo of poplar bolts for Messrs Rathbun & Sons for Charlotte.

The sloop *Frank Smith* passed down this morning from Trenton with lumber for Kingston.

The schr. *D. Freeman* left yesterday evening for Oswego with rye.

There is a demand for vessels to carry pressed hay hence to United States ports.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist———————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle; be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints that have been stiff for years.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1,00.

DR. LLOYD, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of ALLAN'S LUNG BALSAM, I have no hesitancy in stating that it was by the use of your LUNG BALSAM that I am now alive and enjoying good health.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

'THEY ALL DO IT.' — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

FOR ASTHMA AND PHTHISIC.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

MORNING DESPATCHES

EUROPEAN.

DILLON'S SPEECH.

LONDON, April 28.—The Pall Mall *Gazette* says if Dillon's speech on evictions is right there is little chance of the Land Bill getting through Parliament in time to prevent painful and disastrous events in Ireland. It would have been better to bear for a time the evils against which the coercion was intended than provide for worse evils than now confront us, and for which coercion is showing itself to be no remedy. A party of officers sent to serve writs on Lord Guillamor estate, were attacked by a mob of men and women. The sub-agents of the property and the bailiff were stripped naked, and the writs torn up. The police threatened to fire on the mob, but the latter cautioned them not to do so or the whole party would be murdered. Subsequently thirteen persons were arrested, and during the investigation of their cases a troop of Hussars were stoned by the mob. The people were charged upon and dispersed by the troops. No new writs have been served.

THE STORMING OF KERAUMEER.

PARIS, April 28.—Additional details of the storming of the Keraumeer fortress on Mounts Dambella and Hadebra show that the Keraumeer loss was enormous. The French loss was a few killed and 26 wounded. The French artillery worked terrible havoc.

AMERICAN.

WASHINGTON SPECIALS.

NEW YORK, April 38.—The *Times* says that at a Republican caucus yesterday, no material opposition was expressed to the consideration of executive business. Early in the day it was unanimously decided that Mahone should be given a full measure of support in the struggle to better the political condition of Virginia. It was agreed that the two Chinese treaties should be disposed of before the final adjournment of the present session. Their terms require that ratification shall be exchanged at Washington by Nov. 17. When the treaties were negotiated China was threatened with a war with Russia. It is believed therefore that more liberal concessions were obtained than could be secured at any other convention.

The *World* says, the question whether certificates of American naturalization are to be taken as infallible by an international tribunal as appears to have been heretofore, was distinctly decided in several instances adversely to the contention set up by Blaine.

A PREMATURE REPORT.

NEW YORK, April 28.—The officers of the Panama Railway state that the report of the sale of the road to the Panama Canal Company is premature.

A FORMIDABLE PETITION.

The Board of Trade Transportation forwarded to all the State Senators a printed copy of a petition signed by over 2,000 merchants and bankers, favoring the Bill creating a railway commission which passed the Assembly. The original petition is 57 feet in length. The subscribers represent an annual business of over $2,000,000,000.

RAILWAY PRESIDENT'S OPINION.

The President of the Manhattan Elevated Railway Co. in a letter to the Mayor, claims that the amount originally paid for the bonds represented the actual cost of the roads, and the latter could not, in the opinion of competent engineers, be duplicated for the amount for which they were built.

A DENIAL.

Ex-Senator Dorsey writes to the *Herald* that there is "not a grain of truth in any one of the allegations that I have been corrupting and unlawfully connected with any contract or other business with the Government."

NEW TRIAL DENIED.

An application for a new trial has been denied in the case of Prof. Sawyer, the well known electrician, convicted of assaulting Dr. Steele.

LAND JOBS.

CHICAGO, April 28.—A Santa Fe special says there is much exitement over the rumor that ex-Senator Dorsey and others are attempting the removal of Chief Justice L. Bradford Prince. The cause is said to be the fear that Prince will expose certain extensive land jobs which will come before him at the next term of Court.

THE FLOODED DISTRICTS.

OMAHA, April 28.—A steamer from Nebraska City rescued from the flooded points on the river north of that place 200 men, women and children, some of whom had been without food two or three days and suffering extremely. Thousands of people along the river bottoms on the Nebraska and Missouri Rivers are homeless and destitute on account of the inundations.

COL. FRED. GRANT'S MOVEMENTS.

CHICAGO, April 28.—Col. Fred. Grant leaves to-day for New York. He will spend much time in Texas as President of the Texas Western Narrow Gauge Railway.

AFTERNOON DISPATCHES.

THE TUNIS QUESTION.

CONSTANTINOPLE, April 28.—There is great anxiety concerning the Tunis question. The Porte considers Tunis as part of the Ottoman empire, and the action of France an infraction of international law; but as it cannot afford to quarrel with one power when it has no reasonable hope of support from others, it refrains from decided action.

LORD HARTINGTON ON IRISH AFFAIRS.

LONDON, April 28.—At a banquet last night Lord Hartington defended the policy of the Cabinet. He believed the evils in Ireland were too deeply seated to be removed by changes in the relations of landlord and tenant. The evils will never be effectually removed until the number of owners of property is increased. It is therefore to the certain part of the Land Bill which points in that direction that we look for the ultimate main improvements in the condition of Ireland. Bright said the object of the land bill is to give as much security to the tenant as to the landlord, and give him the greatest possible stimulus for his industry.

AN ELEVATOR BURNED.

PHILADELPHIA, April 28.—The Girard Point elevator was burned this morning with 70,000 bushels of grain.

ON TO TUNIS.

BONA, April 28.—It is expected here that General Forgimal, after garrisoning Beyo, will march upon Tunis.

THE CONSERVATIVE LEADERSHIP.

LONDON, April 28.—The *Post* believes that Sir Stafford Northcotte will succeed Beaconsfield as leader of the Conservatives. The Duke of Richmond will probably lead the Conservatives in the House of Lords.

NEW YORK, April 28.—Arrived, the *Herder* from Hamburg, and the *Assyrian Monarch* from London.

WASHINGTON, April 28.—Indications for lower lakes:—Fair, stationary, or higher temperature.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

MARRIAGES.

In the M. E. Church, Macedon Centre, New York, April 27th, by Rev. Bidwell Lane, M.A. assisted by Rev. T. W. Chandler, Rev. J. R. JAQUES, D.D., Ph.D., to Mrs. HELEN M. WILSON, widow of the late Rev. R. C. Wilson, Pastor of the Cornhill M. E. Church, Rochester, N.Y., and sister-in-law of the first officiating minister.

In Belleville, on the 27th instant, by the Rev. Dr. Jeffers, Mr. JOHN SHAW, of Hungerford, to Miss ADELINE PARKS, of the same place.

In Belleville, on the 26th April, by the Rev. Dr. Clarke, THOMAS SLAY, Esq., of Fredericksburg, to Miss ADELAIDE VICTORIA, fourth daughter of the late Augustus Spencer, Esq., of Brighton.

Commercial.

A TRIAL.

A trial of Dr. Dow's Sturgeon Oil Liniment costs 25 cents. If found of value in the cure of the diseases for which it is intended, it will save many dollars a year and much suffering. Is it not then worth a trial? the more especially as

The Universal Testimony

of those who have used it is, that it cannot be too highly recommended for the cure of neuralgia, rheumatism, contracted joints, lumbago, sciatica, strains, bruises, erysipelas, burns, scalds, frost-bites, boils, felons, chilblains. A remedy for one or another of these ills is likely to be called upon at any time and at all times in the household, and it can be secured in no more handy form than that of Dr. Dow's Sturgeon Oil Liniment. The liniment also never fails in time of need. It can always be relied on.

It is put up in large bottles, and sold in every town in Canada at 25 cents a bottle.

J. W. BRAYLEY,
Montreal.

NORMAN'S

ACME ELECTRIC APPLIANCE.

THIS Electric Appliance is made of separate galvanic cells, connected with pliable wire, thus making a complete galvanic battery in belt form, which can be readily applied to any part of the body for curative purposes. This appliance may be used so as to direct the full force of the united cells directly through any part of the body, either lengthwise or across; or it can be used along or around any part, so that each cell may impart its amount of power consecutively. In one case it is a constant, intense current, which can be increased to a point almost unbearable; in the other it is a constant, mild current, nearly imperceptible. Medical men and electricians will at once see the immense advantage of this appliance for diseases of the Sexual Organs, Nervous Debility, and all those diseases peculiar to young men, and affections of the womb in women. It is particularly adapted to cases where the nerves are lacerated and the organs sore, contracted, weak or relaxed. A suspensory attachment is made to use with it where it is necessary. This appliance does not soil the underclothing like Pulvermacher's, and is much more powerful and beneficial, combining the best features of other belts without any of their disadvantages. It can be worn on any part of the body, either round the waist or down the back, or leg or arm, so that it can be used with advantage in all diseases where electricity is beneficial. [*See large Circulars.*] This appliance can be repaired at small cost, so that practically it is indestructible.

The price of the Acme Appliance is $10.00 to $15.00, according to power. The Suspensory Attachment $1.00 extra. Short Belts of the same construction are made, and may be had at the following prices: Back Belt $5.00 and $7.50; Body Belt $5.00 and $7.50; Leg Belt, $5.00; Arm Belt, $3.00; Head Belt $2.50; Chest Belt, $5.00 and $7.50.

These can be used in all the cases where the Belts of the same name are mentioned in large circulars.

The buckle end of the belt is a negative pole.

Consultation and large circular free.

LADY THORNHURST'S DAUGHTER.

BY MRS. HARRIET LEWIS.

Author of "The Double Life," "Tressilian Court," &c., &c.

"But her friends won't let me enter their house," said Holm. "They have retired to the rear of it, and pay no attention to knocking, however loud."

"They won't try that on with me!" said the police officer, swelling. "I will accompany you to the house, gentlemen. We will see if in free and enlightened England such deeds as these shall be done with impunity."

Accompanied by the official, Holm and Todhetly returned to Laburnam Villa.

The police officer knocked as loudly as if he were trying to awaken the dead.

To his great astonishment, as well as to that of his two companions, the garden gate was opened to them almost immediately, and by the trim small maid who served as the only domestic of the tiny establishment.

She regarded the visitors with round eyes, and they looked at her in equal surprise. Possibly they had expected to see in her stead the worthy Reuben Dennis in a belligerent mood.

"Show us into the house, and into Miss Holm's presence, girl," said Captain Holm brusquely.

The girl stared.

"There is no one at home, sir," she said, "and Miss Holm is not stopping at the Willer."

"Not here?" exclaimed Capt. Holm. "You can't deceive us, girl. Where is the young lady who arrived here yesterday?"

"How do I know?" demanded the girl, with an injured expression of countenance. "Yesterday Missus says I could go home and stay till this morning, and, home I goes, grateful for the privilege, which it wasn't in the bargain, sir. And after I gets back to the Willer Missus goes out in a cab and says as she won't be home all day. And dat's all I knows, if I was to be killed, sir."

Captain Holm reiterated his inquiries, but could gain no further information from the girl, whose countenance waxed vacant, and whose replies grew unintelligible. The police official seeing in her eyes a gleam of shrewd intelligence at variance with her vacant stare, offered her a half-crown, which she accepted and offered to show them through the house.

They accepted the offer, and made a tour of the six small rooms in the box of a house but Tessa was not to be fonnd. The police officer renewed his intterrogatories, but could not discover from the servant if a guest had been at the Villa, but he was long since persuaded of that fact, and was now only anxious to learn to what place Mrs. Dennis had gone.

"The bird has flown, Captain," he said, as the three men paused in the lower hall of the little house, loath to depart unsatisfied. "But I saw a blue bow, such as young ladies wear, up on the t'ilet-table, and it's clear the young lady has been here. But where could she have flowed to with the pernicious old party as keeps this house?"

"To Clapham—to the institute in which she was educated," suggested Captain Holm. "We must go there next. She is there, unless she is somewhere with Sir Victor Cheswick and making preparations to get married."

"There is just where she is, depend upon it," growled Todhetly.

"I believe it's necessary for one of the parties to reside in the parish fourteen or twenty-one days before marriage even with a special license," said Captain Holm. "I don't know as the girl's stay in Dorset would invalidate her residence over in Surrey. We'll go to the New Kent Road, Todhetly, and then to Clapham."

The little servant whom the police officer eyed malignly, believing her stupidity and vacancy all assumed—as they were—held open the door significantly, and the three men returned to the little front garden.

They had hardly set foot again upon the narrow, bordered path when, a violent ring was heard at the garden gate. The servant flew to open it. As the high gate swung wide on its hinges, the tall, lithe, manly figure of Sir Victor Cheswick stepped into the garden. Holm and Todhetly uttered ejaculations of astonishment and rage and moved forward, confronting the young Baronet with malevolent and menacing gaze.

CHAPTER XLI.

ANOTHER VISIT TO LADY THORNHURST.

Sir Victor Cheswick, pausing just within the garden gate of Laburnam Villa, recognized Squire Todhetly in the moment that he was himself recognized. He glanced at Todhetly's companion, and decided in his own mind that the tall, bloated, well-dressed gentleman was no other than Captain Holm. That the two had come to the villa in search of Tessa was apparent, and the young Baronet experienced an instant thrill of alarm.

"How is Miss Holm this morning?" he asked, in an undertone, of the trim small maid, averting his face from the scrutiny of Holm, Todhetly and the police official.

The maid's stolid, vacant face brightened, and she replied in a whisper too low to be heard by other ears however anxious, as she fixed her gaze upon a stack of chimneys over the way:

"She have gone, sir. Missus took her away this morning. And a note have been left—"

TO BE CONTINUED.

Sufficient Farm Help

If we start out in the spring to till a farm of a certain number of acres without sufficient help, then a part of the necessary work must be left undone or only partially accomplished. Then is when the farmer has too much to do and gets behind with his work; neglect disturbs method and all things are soon out of balance. Many farmers say they cannot afford to hire much help. It is as necessary to have sufficient help to carry on a farm successfully as it is to have any help. If help cannot be had then let some farmer have a part of the farm to work, for the extra amount of land which cannot be properly tilled is so much land lying idle Thus writes a correspondent of the *Husbandman*. He goes on to state his own method: "I will give the method I have followed for years, and I cannot say that I have had too much to do, and at no time have been behind with my work. The first thing that I do is to provide the best tool for all kinds of work and sufficient team power to use them. I employ the best help I can get, as I have learned skilled labor is the cheapest. Hiring cheap labor to save a few dollars does not pay; loss in damage to teams and tools more than offsetting any saving so made. It takes but a few hours for an inexperienced or a careless hand to do much damage. It is my method to keep as much help as a farm requires. I am well aware that many farmers will say, as has been said before, that they cannot afford to hire so much; but all I have to say to such is, start next spring with more help and till your land as it should be tilled, and put the farm in proper shape, and when the year comes round figure up the difference, and see if money has been lost."

—A number of applications have been received by the Government for colonization lands by private capitalists and companies.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4eod&wly

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Peaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

—Two new lighthouses are to be built on Lake Superior, one on Passage Island, near the upper end of Isle Royale, the other on Sand Island, one of the Apostle group.

A MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL USE
THE OLDEST BEST & MOST WIDELY KNOWN FAMILY MEDICINE

☞ The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,

JAMES CLARKE & Co.

SPECIAL NOTICE TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone but which must be removed. in order that those organs may perform their functions thoroughly, The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

HALL'S VEGETABLE SICILIAN HAIR RENEWER

Has been in constant use by the public for over twenty years, and is the best preparation ever invented for RESTORING GRAY HAIR TO ITS YOUTHFUL COLOR AND LIFE.

It supplies the natural food and color to the hair glands without staining the skin. It will increase and thicken the growth of the hair, prevent its blanching and falling off, and thus AVERT BALDNESS.

It cures Itching, Eruptions and Dandruff. As a HAIR DRESSING it is very desirable, giving the hair a silken softness which all admire. It keeps the head clean, sweet and healthy.

The State Assayer and Chemist of Mass. and leading Physicians endorse and recommend it as a great triumph in medicine.

BUCKINGHAM'S DYE FOR THE WHISKERS

will change the beard to a BROWN or BLACK at discretion. Being in one preparation it is easily applied, and produces a permanent color that will not wash off.

PREPARED BY
R. P. HALL & CO., NASHUA, N. H.
Sold by all Dealers in Medicine.

MANHOOD RESTORED.

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity,

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge. Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD

HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞ Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically*.

☞ This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO

MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher.
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.

MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.

MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

Agricultural and Arts Association.

The adjourned meeting of the Council of the Ontario Agricultural and Arts Association was held on April 27th, at Toronto,—the President, J. B. Aylesworth, in the chair. Amongst those present were Mr. K. Graham, Prof. Bell, and Mr. P. C. Dempsey.

Mr. Saunders read the second report of the Special Committee of Enquiry. Among the recommendations therein contained were the following:—The salary of the Superintendent of the Exhibition Grounds to be $150, instead of $200 as formerly; that he be allowed fourteen assistants at $3 per day, and fourteen caretakers at $1 50 a day. The salary of the Secretary to be fixed at $1,200; that of the Assistant-Secretary $750, to take effect on the first May next. The Superintendent of the Arts Department to receive $4 per day during the time engaged, and the Assistant Superintendent $3 per day. That there be but one Superintendent in the Fine Arts Department, who shall receive $5 per day. That the Association offer two prizes for the best essays on forestry; first prize of $30, second, $20. That two prizes of $30 and $20 be offered for the best essay on the best methods of restoring the fertility of partially worn out lands; essays not to exceed twenty pages of foolscap, and to be sent to the Secretary not later than the 15th August, the prizes to be awarded by a special committee. That the evenings of the 21st and 25th of September during the Exhibition be set apart for the holding of public meetings for the discussion of stock raising, and as to how best advance the interests of stock raising, and for the discussion of the cultivation of grain respectively. The prize-taking essays to be read at these meetings. That at the annual meeting on the 23d, in London, the desirability of holding examinations on agriculture, live stock, and kindred subjects at convenient centres, and the granting of certificates on the results. Prof. Mills to read a paper at this meeting. The report was adopted.

It was decided, on the suggestion of Prof. Bell, that the competition for essays on the best methods of restoring the fertility of partially worn out soils be limited to practical farmers engaged in farming in the province of Ontario.

Applications from the following named persons for the vacant position of Secretary to the Association were read;—Henry Wade, Port Hope; H. H. Swinford, Guelph; James Campbell, Longborough; H. Colwell, Toronto; E. H. Hilborne, Uxbridge; R. L. Denison, Toronto; W. Elliot, Toronto; W. D. Hunter, Meadowvale; William Johnston, Toronto; D. S. McLean, Orangeville; Abraham Devitt, Waterloo; George Sneath, Midhurst; Alexander S. Macrea, Toronto; J. Gordon Mowat, Galt; Arthur L. Willson, M. A., Eglington.

Mr. Wade was elected after fourteen ballots had been taken. On motion of Prof. Bell, the election was made unanimous.

At the evening session,

Mr. Hopkins stated that the Western Dairymen's Association was willing to contribute as heretofore to the Exhibition.

Mr. Graham, President of the Eastern Dairymen's Association, said that last year when the Eastern Association contributed $500 to the Ottawa Exhibition, the Western Association refrained from giving a cent. He was not now authorized to say what action his Association would take. There was no denying that a certain rivalry existed between the two Associations.

Mr. Hopkins advocated the pooling of the contributions of the two Associations in order to make a good central show at the Provincial Exhibition. It was easy to see, he thought, that the Eastern Association would not contribute to the Exhibition in the West.

Mr. Graham said that the association would be spending money to great advantage by employing Mrs. McClung, a celebrated butter maker, to go around among the farmers' wives, and instruct them in the art. He referred to a Mrs. Seebright, of Billngis' Bridge, near Ottawa, who has made arrangements with the Windsor House of Montreal for all the butter she could manufacture at twenty-five cents per lb.

Mr. Rykert moved that the first prize list in this department of Dairy Products remain the same as last year, viz. $1,000, provided the two Dairymen's Associations contribute $250 each as usual.—Carried.

Mr. Young presented the special report of the Committee appointed to arrange the prizes in the Art Department, showing very little change from last year's list. The report was adopted.

It was resolved to offer prizes for painting on porcelain and for non-fading photographs

The Treasurer was directed to audit the books of the Secretary monthly and to receive all moneys on hand.

Mr. Leslie was re-appointed Superintendent of the Horticultural Department.

The time for making entries of farms competing for prizes was extended to the 20th of June. The time for commencement to be not earlier than the 24th of the same month.

Prof. Brown gave notice of motion to the effect that the Legislature be requested to alter the constitution of the Association, so that Mechanics' Institutes be represented by one person only, in place of three. Also that no professor of agriculture, as such, be *ex officio* member of the Council, and that two of the leading breeders of the Province be appointed by the Council to represent that important interest.

The memorial resolution previously passed by the Council, expressing their sorrow at the demise of the late Senator Christie, was exhibited. It has been handsomely illuminated, and is signed by the President, and sealed with the official seal of the Association. It was ordered to be framed, and will then be forwarded to the family of deceased.

The Council adjourned at 10:50 to meet again on the first day of the Exhibition, in London.

Testing Seeds.

We have noticed on former occasions the very useful experiments of Prof. Beal of the Michigan Agricultural College, in testing various garden and farm seeds, and thus determining beforehand their germinating quality. The disappointment and positive loss in planting bad seeds and losing a crop for a whole season, greatly exceeds the labor of testing. A counted number may be placed in pots properly filled with fine mellow earth; or they may be put between several folds of spongy brown paper. In either case put them in a warm place and keep damp by daily sprinkling. Good seeds will not be many days in showing their true quality. A writer in the Practical Farmer says he tests his seeds with little trouble in large pots in a small greenhouse, and has thus tested in the past two months upwards of 800 samples of vegetable seeds, and he wonders why farmers omit so easy an experiment on their farm seeds.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aobility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa*, so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

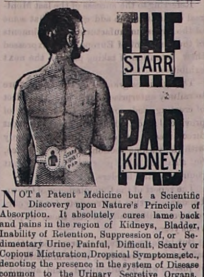
Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents Large bottles $1.00.

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.



NOT a Patent Medicine but a Scientific Discovery upon Nature's Principle of Absorption. It absolutely cures lame back and pains in the region of Kidneys, Bladder, Inability of Retention, Suppression of, or Sedimentary Urine, Painful, Difficult, Scanty or Copious Micturation, Dropsical Symptoms, etc., denoting the presence in the system of Disease common to the Urinary Secretive Organs, known as Inflammation of the Kidneys, Bladder, and passages, Catarrh of the Bladder, Gravel, Bright's Disease, Diabetes, Dropsy, Nervous Debility, Piles, etc., etc. Many hundreds of testimonials have been received, furnishing indisputable evidence of its efficacy for the the cure of Kidney Diseases and attendant complaints.

Obtain pamphlet on Kidney diseases, and printed list of testimonials from your druggist (or write) free to all.

Parents, our Child's Pad effectually prevents bed-wetting (Incontinence of Urine).

Price—Child's Pad $1.50; Regular Pad $2.00; Special Pad for Chronic Diseases $3.00.

Sold by W. Gilroy, Thomasburg, B. B. Ostrom, Frankford, and all druggists, or sent free by mail (plain wrapper), by

THE STARR KIDNEY PAD Co.

and solicit the favor of a call from all who wish to secure a really stylish article at a moderate figure.

SANDERS BROTHERS.

Belleville, April 7. 327d1m

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, FRIDAY, APRIL 29.

We Never Doubted It.

The Ottawa *Free Press* in commenting upon the character of contractors generally says:—"*Our knowledge* of contractors and the *way* they *distribute their benevolence*, precludes the idea of open simplicity in affairs of this kind. There are more ways than one for settling these things." We never doubted it. Your "knowledge" of Grit contractors for five long years, beyond question justifies the shameless declaration made above.

Blake's Speech.

The Montreal *Post* of the 23rd inst. says: "The Conservative papers commented rather jubilantly on the non-insertion of "the Hon. Mr. Blake's Montreal speech "in the columns of the Toronto *Globe*. "They cannot, however, take the same "amount of comfort to themselves as regards his late speech in Toronto, which "takes up two whole pages (twelve columns) "of the leading reform organ." Why not, dear *Post*, tell the whole story? Mr. Blake, in his Montreal speech, propounded his "Imperial confederation" and "minority representation" nostrums, which have been condemned as ridiculous by the *Globe*, which, to show its contempt for them, refused to publish a speech advocating them. Fearing a like result would follow if he indulged in the same flights of fancy at the Toronto banquet, he studiously omitted any reference to them; hence the *Globe* published his speech. Score one for the *Globe*, Mr. *Post*, and tell your readers the reason the second speech was published in "the leading reform organ."

The Globe's Madness.

Undeterred by the remonstrances of the more reputable of its Reform contemporaries, as uninfluenced by the vigorous retorts of the Conservative press, the *Globe* continues its shameless attacks upon Sir Charles Tupper. The announcement that the Minister of Railways and Canals has sufficiently recovered to return to Canada and resume the duties of his office has had the same effect upon Mr. Gordon Brown as the red flag of the Spanish matador has upon the bull which he is fighting in the arena. Like the infuriated taurine Mr. Brown rushes madly at the hated object, but with similar non-success, his efforts, misdirected by blind fury, end only in his own discomfiture.

What adds to the rage of the *Globe* is the fact that Sir Charles has not only recovered his health, but is returning to resume his portfolio, in face of his assertion that he would never dare to do so, because of some alleged offence, which existed only in the malignant imagination of the man who made the allegation. Now, however, after repeating its series of mean and contemptible insinuations, the *Globe* confutes itself and practically acknowledges the unfounded nature of its allegation as to Sir Charles' disgrace, by stating that he is returning in hot haste to "seize the shoes of his chief," whose public career, the organ avers, is nearly ended. It is as plain as that two and two make four that, were the Minister of Railways the corrupt, intriguing, unblushing jobber—the perfect embodiment of all sorts of political vice and corruption that the *Globe* in its madness represents him to be—he would not venture to seek the leadership of his party. But the assertion that he is doing so, is just as false as are all the others which the same "authority" has made in connection with Sir Charles' illness and conduct and that of other members of the Cabinet. It is quite within the bounds of possibility that Sir John A. Macdonald's public career may be near an end; but fortunately for the country the probabilities are otherwise, as there is good reason for the belief that by means of a trip to the south of France, his health will be fully restored. So far, at least, there has been no talk, except in the columns of the Grit press, of the Premier's retirement, and there is no likelihood of so undesirable an event taking place. The hope of his party is that he will long survive to witness the beneficial effects of the wise measures of the administration of which he is the head, and to lead the party to victory in 1883. Should these hopes unfortunately fail of realization, the Conservative party will not need advice as to the selection of a leader when the occasion arises. In such case the claims of Sir Charles Tupper would be greatly strengthened, rather than weakened, by the fusilade of filth which the *Globe* has directed against him. "Envy loveth a shining mark," is an aphorism the truth of which is known to every one, and the fact that Sir Charles has been so abused will make it more clear than it would otherwise have been, that his eloquence and masterly ability have caused him to be feared and hated by his opponents, which certainly is the strongest possible recommendation to his friends.

The ruffianism of the journal in question has been so undisguised that we cannot help thinking that the writer who has so savagely and persistently attacked Sir Charles would gladly write his obituary.

Another New Industry.

Kingston people have got fairly wide awake, not only to the advantages of the protective policy of the Government, but to the benefits of establishing new industries in their city. For some time correspondence has been going on with Mr. Legru, of Montreal, who is extensively engaged in the manufactuse of beet root sugar, with the view of starting a factory in the city. Mr. Legru has agreed to supply a quantity of seed at reduced rates, and the Directors of the Midland Central Fair are to have a meeting to-morrow to consider the advisability of purchasing a quantity of seed for distribution amongst the principal farmers in the County. If the soil is of the right quality, the probability is a factory will be established in the County. The parties engaged in the enterprise mean business. What progress is being made towards establishing industries in Belleville?

Quebec Legislature.

The Quebec Legislature was opened on the 28th inst. The Address from the Throne notices the renewed activity in all branches of industry; commerce is becoming more and more flourishing, manufactories are increasing in numbers, agriculture, owing chiefly to the generous encouragement given to it, is now taking that place which it should occupy in developing the resources of the country. The Province has not only maintained the position which it held before Confederation but it has also considerably improved. The sphere of its operations has been largely extended and the Government have every reason to hope for a future as brilliant as could be desired by the sincerest of patriots.

Reference is made to the lowering of the rate of interest through the operations of the Credit Foncier.

The establishment of the beet sugar industry is referred to as being an accomplished fact, and by means of this industry so rich in itself and susceptible of so large an increase, an important change will be effected in the system of agriculture.

The question of utilizing the rich deposits of phosphates in the Ottawa Valley has been solved with a success which bids fair to surpass the results which were at first expected from it. The working of phosphates, on a large scale inaugurated the idea of exporting it to foreign countries. This exportation, with that of live stock and agricultural products, has given rise to the establishment of a line of trans-Atlantic steamers. More unassuming but of no less importance in its beneficial results, is the manufacture of cheese and butter, which has been so largely increased in the Province as to perceptibly alter the figures of the agricultural exports.

Colonization has continued to prosper during the year.

Referring to the success of the last Montreal exhibition, the address says that some of the largest manufacturing establishments of the continent of Europe have expressed their intention of taking part in the next exhibition.

The subsidies granted by the Legislature to railway enterprises have had the effect of creating and completing a network of provincial roads, which now gives the most direct means of communication not only with the various sections of the province, but also with other provinces and the great country on the borders.

The report of the Commissioner of Crown Lands shows that the receipts for the current year will greatly exceed those of previous years.

But little legislation is promised. Certain measures respecting the administration of justice will be introduced, and amendments will be made to the laws on public instruction and agriculture, as well as a measure for the better protection of workmen in the payment of their labor and wages, and amongst other measures a bill will be introduced to extend the duration of the Parliament of the province and thus to decrease the frequency of elections and the expenditure occasioned thereby.

There are a large number of private bills, which is alluded to as a proof of business prosperity and of the spirit of enterprise which reigns in the province.

Licenses in Prince Edward.

The License Commissioners for the County of Prince Edward met on Monday last and granted the following licenses for the ensuing year, commencing 1st May:—

AMELIASBURGH.—John Baird, Consecon; W. S. Weese Ferry Point; Rose and Babcock, Rednerville; Elizabeth Russell, Rednerville; F. Hobert, Ferry Point; Geo. Pretty, Massassaga Point for 6 months.

HILLIER.—R. Porter, Consecon; W. G. Curry, Pleasant Valley; Geo. H. F. Youngs, Allisonville.

SOPHIASBURGH.—W. F. Bishop, Crofton; Alex. Leslie, Northport; D. Demill, Demorestville.

SOUTH MARYSBURG.—W. W. Empey, Milford; Walter Ruttan, Millford; Susan Bond, Millford.

WELLINGTON.—Z. Harrington, Townsend Garratt, Mary Ann Bryce, Shop license.

There were no applications from Athol or North Marysburg. There were three applications from Hallowell, all of which were refused, as the Commissioners consider the Dunkin Act still in force in that township.

The applications from Picton were not decided upon. The Comissioners will meet again on Saturday to settle who is to have them.

A vessel license has been issued for the steamer *Alexandra*.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle.
264ly

The Lips We Love to Press

inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

Licenses Granted.

The License Commissioners for West Hastings met at Trenton on Wednesday for the purpose of considering applications for tavern and shop licenses for Trenton and Frankford, for 1881-2. Yesterday the Commissioners met in this city and considered the applications for Belleville licenses.

Unfortunately the INTELLIGENCER is not in the good books of the License Inspector, and, though we endeavored to lay before our readers yesterday the results of the deliberations of the Commissioners, we found it impossible to extract any information from them. We are informed, on the very best authority, that no sooner had the meeting of the Commissioners adjourned—about 3 o'clock—than the License Inspector carried the result directly to the *Ontario* office, and it appeared in yesterday's issue of that paper. It is notoriously the fact that the Ontario Government has, by statute, compelled its officials throughout the Province to get their printing done only at the offices of those papers which support the Government; but we were not aware that officials had been instructed to furnish those papers with exclusive information on subjects in which the whole general public are concerned and interested.

The following licenses were granted:—

TRENTON.

SHOPS.—G. S. Bonter & Co. and Lee & Smith. Wesley Bullen was granted an extension for three months.

TAVERN.—E. Holbrook, A. Parent, Heagle & McLaren, Joseph LaPoint, Thos. Ventress, John W. Turner and Robert Hamilton. The applications of A. Filion, M. McKeown and Thos. Scranton were laid over for further consideration.

FRANKFORD.

TAVERN.—Macaulay & McDonald, Geo. W. Clarke, Dennis Brennan and Geo. Ketchio. The latter was for Chisohlm's Rapids. No shop licenses granted.

BELLEVILLE.

TAVERN.—S. C. Edwards, Wm. Hunter, Morgan & Jenkins, A Dulmage, James Mackie, James E. Ketcheson, George Hoggard, D. Coyle, George S. Sterling, Robert Arkles, P. O'Brien, James McGuire, Annie Griffin, Patrick Fitzpatrick, P. H Hambly, Samuel Kyle, E. E. Woods, John Henderson, John Soby.

SHOPS.—Retail.—Wallbridge & Clarke, Samuel Ross, Wesley Bullen, Stuart Hooey, W. Y. Mikel.

SHOPS.—Wholesale.—Pitceathly & Kelso, E. F. Potts, Henry Corby.

The Commissioners adjourned to meet on Saturday, 30th, to consider the balance of applications for this riding.

News Condensed.

—A general rising is feared in the Transvaal.

—Capt. Scott, M. P., of Winnipeg, is in Ottawa.

—The Minister of Militia is to visit Toronto next week.

—It is reported that the Empress of Russia is seriously ill.

—A number of mines have been discovered in St. Petersburg.

—The British evacuation of southern Afghanistan has been completed.

—Further arrests have taken place in the County of Cork under the Coercion Act.

—The Hon Mr. Langevin leaves for Quebec on Saturday, and will be absent ten days.

—The German Government has discovered a plot of the revolutionists to assassinate Bismarck.

—It is understood that Sir John Macdonald will visit England shortly for the benefit of his health.

—Capt. Chater, A.D.C. to the Governor-General, has been ordered to join his regiment in England.

—Four water-spouts, about fifty feet high, appeared off the Island at Toronto during the storm on Monday.

—The banquet to Sir Hugh and Mr. Andrew Allan, Montreal, is to be conducted on temperance principles.

—McHolm, the Liverpool defaulter, left Toronto for England yesterday in charge of Detective McConachie.

—The export of cattle from Montreal will begin in earnest next week, when three steamers will be loaded.

—A. H. Patterson, of the Halifax Banking Company in Truro, has left for parts unknown under suspicious circumstances.

—Raftsmen on Garden Island struck for higher wages on the 27th inst. Mr. Calvin refused to accede to their demand.

—The English team of cricketers, which visits Australia in September next, is negotiating for Hanlan to accompany them.

—Foot-and-mouth disease has been discovered among the cattle just landed at Liverpool by steamship *Lake Manitoba*, from Portland.

—Sir Hugh Allan offers to start a cotton factory in Sorel if the municipality will give a bonus of $20,000 and exemption from taxation for twenty years.

—All the Ottawa saw mills will be in operation next week. The stock of lumber in the yards there is about 95,000,000 feet, most of which has been sold at fair prices.

—A child six years old, son of Capt. Innes, 60th Rifles, now in India, and grandson of Hon. Henry Starnes, Montreal, was drowned in a cistern in Montreal on the 28th inst.

—Although there are some very promising fields of fall wheat throughout London North, there are also many fields that give but little promise of an average crop at harvest time.

—The Grand Trunk Railway Company, at its meeting yesterday, decided that so long as the Great Western adheres to its western allies, it will be better not to bring about a fusion.

—Twelve recruits for the North-West Police have passed examinations in Montreal, and have been sent to Toronto, where, in company with others, they will be drilled for three months.

—During the past 12 months 592,395 letters, post cards and parcels were received at the Dead Letter Office, Ottawa. There were 13,000 registered letters amongst the lot, containing $138,000.

—The Pacific Railway Commission yesterday adjourned *sine die*, owing to one of its members, Mr. Miall, having been suddenly called to England on account of the serious illness of his father.

—It is understood that the French-Canadian Steamship Company will receive the $50,000 subsidy from the Canadian Government, the French Government having voted double that amount.

—The Queen is expected to reside for about a month in the Isle of Wight, and on leaving Osborne will probably return to Windsor for a short stay before quitting the south for her spring trip to Balmoral.

—Owing to the prevalence of typhus fever at Bermuda, Sir Leopold McClintock has decided to leave there for Halifax on May the 10th. The Northampton may therefore be expected to arrive there about the 13th.

—On the 28th inst. a son of G. W. Cole, at Beebe Plain, Quebec, aged six years, while playing with a revolver fatally shot a daughter of Wm. Stratton in the neck. The girl, who was four years of age, died almost instantly.

—On the 27th inst. the barns of F. Whetham, R. Dagg, and M. Tyfare, in Dagg's settlement near Ottawa, were burned. The dwelling house of Mr. Dagg was also burned. All the produce, implements, and considerable live stock were destroyed.

—A big cotton and print mill is projected in Toronto, with a capital of $1,000,000, supplied by English and Canadian capitalists. It is proposed to run one thousand looms and employ 1,200 hands. The factory will be located in the west end.

—On the 28th inst. Mr. Hugh McLean, of the Customs House, Ottawa, while passing under a car at the Occidental Station, Hull, was run over, his left leg being severely mangled. It was amputated at the ankle, but the unfortunate man died shortly after reaching his residence.

THE SECRET OF HEALTH.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of HERRICK'S SUGAR COATED VEGETABLE PILLS, and you are safe. They never fail in any case of sickness or inward pain. Try them.

Wanted,

A GOOD active boy, for general work in a small family. Apply at the office of Messrs. Bell & Ponton.

—BY—

DR. WILSON'S
PULMONARY CHERRY BALSAM!

This established fact is a wonderful one to contemplate, and while it remains, there is hope for the the sick and suffering from that terrible disease. This wonderful balsam is composed of various vegetable materials of the purest kind, each performing an important work.

THE WILD CHERRY

acts as a tonic to the stomach, giving a healthy appetite and assisting in converting the food into bright healthy blood, and at the same time exerts a soothing sedative action on the heart and large blood vessels. To the wild cherry as a base is added

AN INGREDIENT

which has a special solvent action on the tough stringy phlegm which clogs the air tubes and cells so that it is easily expectorated. Then there are the gum resins of the

WHITE PINE AND FIR

of Southern climes which assist the ulcerated tissues to heal. To these are added a

BLAND LUBRICATING FLUID

which acts as a healthy secretion of mucous does by coating the mucous membrane and keeping it soft and pliable.

ALL UNITED

assist each other to bring health to those whose throat or lungs are diseased and

HUNDREDS OF TESTIMONIALS

prove their great worth and the good they have already done.

Sold everywhere at 25 cents and 40 cents per bottle.

J. W. BRAYLEY,
Montreal.

EYE, EAR AND THROAT

DR. G. S. RYERSON, L.R.C.P. and S. E. Lecturer on Eye, Ear and Throat, Trinity College, Toronto, and Surgeon to Mercer Eye and Ear Infirmary, late Clinical Assistant Moorfield's Eye Hospital, London, England, and Central London Throat and Ear Hospital 317 Church Street Toronto.

Will visit Belleville on

Tuesday, May the 10th,

and can be consulted at the

DAFOE HOUSE.

THE LATEST.—Talk about your little and your big sensations, but the great sensation is at the store opposite the Anglo-American Hotel, where people are obtaining goods of all kinds at half the ordinary prices. This is the greatest chance ever offered the citizens of Belleville to obtain genuine roll plate jewellery of all kinds, gold and silver watches, plated goods that are reliable and as good as are sold in the city. As these goods will soon be cleared out, it is to your interest to call early and secure great bargains. A word to the wise is sufficient. R. PURDY.

Daily Intelligencer.

BELLEVILLE, FRIDAY, APRIL 29.

5 O'CLOCK EDITION.

City and Vicinity.

As usual, gales have succeeded the rain.

THE Finance Committee meet this evening.

ONLY one tramp occupied the cells last night.

THERE was a blank sheet at the Police Court this morning.

A LIGHT shower of rain fell between 5 and 6 o'clock this morning.

SEVEN cars of ore from Madoc, shipped by Mr. Pusey, arrived this morning.

THE channel of the Napanee river has been marked with new buoys throughout.

MOTTO of the good collector—Never put off until to-morrow what can be dunned to-day.

THE shipment of iron ore by water has commenced. The first cargo is now being loaded.

THE net receipts from the Oddfellows' excursion to Peterborough on Tuesday were $26.

THE Lennox Agricultural Society will have an exhibition of stallions on Tuesday next, May 3rd.

THE net receipts accruing to No. 1 Company, 15th Batt., from the concert on Wednesday evening, were $30.

MR. SHELBY paid $13,000 for the three elephants,which are not the least attractive features of the Mastodon Show.

A FARMER of Adolphustown discovered in one of his fields the other day a grass bird's nest with young birds just hatching out.

THE name of the big elephant belonging to the Mastodon Show is "Emperor" not "Warrior," as we gave it in yesterday's issue.

SOME young men at Toronto have been fined $2 and costs each for shooting insectivorous birds. Let gunners here take warning.

PROF. DAWSON has been unanimously chosen Secretary of Belleville Lodge No. 81 I.O.O.F., in place of Bro. Jas. A. Dawson, resigned.

MR. H. CORBY, JR., ships on the *Alexandra* (which leaves here on Monday), two carloads of whiskey and one carload of bran for Brockville.

THE unfortunate boy Cummings, who was so badly injured on the Grand Trunk on Wednesday night, seemed somewhat stronger this morning.

THE canvas of the Mastodon Show was spread on the Hospital Lot this morning. The large tent is entirely new,never having been used before, and is as white as newly-washed linen.

MR. EDGARDO STRAKOSCH, the advance agent of the "My Partner" Company, was in town to-day making arrangements for the appearance of the Company here on Wednesday evening next.

THE municipal council of Amherst Island contemplate submitting a By-law to the ratepayers, granting the sum of six hundred dollars to lay a telegraph cable between the Island and the mainland.

THE adjourned Vestry meeting of Christ Church will be held this evening in the Workingman's Hall. The question of the site of the new church will be considered, and probably determined at this meeting.

THE Napanee cricket club have already indulged in a little practice. They are repairing the grounds and making great improvements. They are going to lay down about double the present area of sward, that is if they can find a man to do the work. So says the *Standard*.

THE Ferry Committee was to have met last night, but the business which they were to have considered, it was decided to have first considered by the Council. Consequently nothing was done. The business in hand was the consideration of Mr. Evans' report on the condition of the harbor.

"AL" THOMAS, an old Belleville boy who has been for some years located in Chicago, is in town. He is known to almost every Belleville boy who goes to the western metropolis and his barber-shop is a rendezvous for the Belleville colony in Chicago—which numbers a good many.

AT the Picton assizes concluded on Thursday last, the grand jury in their presentment declared strongly in favor of abolishing that system, believing that criminal justice can be effectually obtained without its aid, also on the ground of a large saving of cost to the country.

WEATHER PROBABILITIES. — Toronto, April 29.—Lakes: Fresh to brisk westerly to northerly winds, fine and cooler weather.

A LIBERAL OFFER.—The managers of the Mastodon Show have generously extended an invitation to Mr. Mathison, Superintendent of the Deaf and Dumb Institute, to have the pupils of the Institute, some 240 in number, attend the afternoon performance, which invitation has been accepted.

WINNIPEG STREET RAILWAY CO.—We learn from the Winnipeg *Times* of the 23rd inst., that the stock books of the above company were opened on that day at the office of the Secretary-Treasurer, and that the full amount of stock required was subscribed in one hour. The total amount subscribed was $50,000, and of this Mr. W. H. Marsh subscribed $11,400. The shares were $50,and it took one hundred to realize the stock necessary. "The work will," says the *Times*, "be pushed forward vigorously."

DANGEROUS.—A common amusement for small boys is riding on the cow-catchers of the G.J.R. engines when they are backing up. It is fun, no doubt, but it is dangerous fun, and should be prohibited. This morning an engine was backing a train up Pinnacle St.,and clinging to the cow-catcher were four small boys. Suppose the motion of the train had been suddenly reversed just at the moment one of those urchins was jumping on; the probability is that he would have been knocked down and perhaps have shared the fate that befell young Cummings at the station on Wednesday evening.

TERRIBLE ACCIDENT.—A Napanee despatch says:—Yesterday afternoon a terrible accident happened in Perry & Joy's saw mill. About half past five Stewart Babcock, eight years old, a son of Mrs. Thomas Babcock, was playing about the mill in the lower story. How the accident occurred nobody knows, as all the workmen were busy in the upper part of the mill. By some means the lad was drawn into the bevel gearing next the water wheel and crushed between the cogs. When found he was lying face down across the framework supporting the gearing, with his body at the hips smashed to a mince, the whole front of his abdomen torn out, and the intestines protruding. He only gasped a few times and died.

COLLAPSE OF A WALL.—All the day a heavy Northwest wind has been blowing, rising at times almost to a gale, which striking full on the eastern gable of the building owned by ex-Sheriff Taylor adjoining the site of the old Custom House (and which was itself damaged by the recent fire) weakened it and caused it to vibrate perceptibly. Nothing was thought of it, however, and the workmen engaged on the foundation of the new Nosworthy block, just beneath it, continued to work without any thought of danger, until about half-past one o'clock this afternoon, when the whole gable,extending the whole width of the wall and fully 25 feet to the top of the chimney, tottered outwards, paused a moment, then fell with a great crash into the cellarage below, sending up a cloud of dust almost as high as the building itself, and which for a moment or two obscured it from view. Fortunately only 2 of the workmen were engaged in the cellar at the time and they were beyond the reach of the falling wall. One man, however,—named Michael O'Reilly,—had a very narrow escape from being buried beneath the shower of bricks. As it was, two or three of the bricks struck the hod which he was carrying and knocked it out of his hand. Had the accident taken place a day or two ago, when the blasting operations were going on in the cellarage, two or three men at least would have been almost certain to be killed.

MOTHER AND CHILD.—After the conclusion of the trial of Mrs. Brown,wife of Rev. Jos. Brown, for cruelly beating Annie Vanalstine, a little girl in her employ, Annie was placed in charge of Mrs. George Roblin, who had taken a fancy to the child and wished to take her in. In the meantime her mother,who lives in the township of Barrie, Addington, was notified of what had taken place. On receiving the message she lost no time in coming down to Belleville to see after her abused child, and arrived here last night. The meeting between the mother and child took place this morning and was affecting in the extreme. Mrs. Vanalstine did not learn the whole history of the case until this morning, when, as might have been expected, her indignation and rage knew no bounds. It would not be safe for Mrs. Brown to come within striking distance of Mrs. Vanalstine during her stay here. And her indignation is not to be wondered at. She informed an INTELLIGENCER reporter, in the Chief of Police's office, this morning, that Annie was the quietest and brightest of her children; When the others were at play she would get off by herself with a book,and it was for this reason that she consented to allow her to go with Rev. Mr Brown. The family live in the 4th concession of Barrie, and work a farm of considerable size. In the winter it is impossible for the smaller children to go to school on account of the great depth of snow, and, as Annie was studiously inclined, her parents thought it a pity that she should be kept from her books when she could attend school regularly, and so consented to allow her to accompany Rev. Mr. Brown home. He said that he had had a little girl just about Annie's age, who had died, and he and his wife would like another to fill her place. He promised that if they should let Annie come to live with them she should be treated as their own child in every way—should sleep with their little girl; and should be a companion to Mrs. Brown. He also promised faithfully that she should be sent to school every day. He offered to clothe her also, but Mrs. Vanalstine would not consent to this, and sent him material for clothes for the child—which, she says,have never been made up. Naturally, Mrs. Vanalstine is as indignant against Mr. Brown as she is against his wife. In reply to a question by the reporter, she denied emphatically that she, as Mr. Brown swore in the witness-box, told him to have the child whipped if she did wrong. "Why," she said, "I never whip any of my children myself, and would never think of laying my hands roughly on Annie especially, and would it be likely that I would give her over to other persons to beat her as they thought fit?" She is dissatisfied with what she considers the meagre punishment meted out to Mrs. Brown ($5.00 fine), and declares that if it is possible to accomplish anything by taking legal action against the Browns it shall be done. In speaking of the treatment which her child had received, Mrs. Vanalstine could hardly proceed at times, owing to the strength of her emotions. She said that, though she had only been parted from Annie for four months, she would not have known her had she met her on the street, so great had been the change which had been wrought in her by the four months of common drudgery, cruel treatment, and shameful neglect. Had Mrs. Vanalstine seen the child when she was first given in charge of the Chief of Police her feelings would have been much more harrowing than they now are,for Annie has vastly improved since that time. The mother and child leave for home this evening.

The best Bargains in the City are:—A beautiful twilled silk Umbrella for $1; a very nice Zanilla Umbrella for 20 cts.; 11 yards of first class English washing Cambric for $1; 10 yds. of beautiful stuff dress goods for $1; 22 yds. of nice Embroidery for $1; a good suit of Halifax Tweed clothes for $6.50; to be had only at HENNESSY'S, the cheapest Dry Goods and Clothing house in town.

Railway Notes.

15 cars of Manitoba bound excursionists passed westward on Wednesday evening and were followed soon after by an emigrant train of four cars.

S. A. Lazier shipped two cars of baled straw yesterday for the N. Y. market.

Large shipments of potatoes have been made from this depot during the past three weeks, the average being two to three cars per day during that period.

Business is remarkably brisk just now both in freight and passenger traffic, and the large staff is kept constantly busied.

Marine Notes.

The tug *Traveller*, which wintered at Lachine, left Montreal on the 27th inst. for Kingston, having in tow five barges belonging to the Montreal and Kingston Forwarding Company. This is the first passage through the Beauharnois Canal this season.

Water was let into the Lachine canal on the 27th inst.

The steamer *Alexandra* returned from Ogdensburg to Kingston on Wednesday night.

The schr. *Ben Folger* has arrived and is loading iron ore at the Grand Junction wharf.

The steam barge *Norman* arrived yesterday afternoon with plaster for Rathbun & Son, and is now loading lumber at the Eagle mill.

FROM OTTAWA.

OTTAWA, April 29.

Miss Harman, of this city, has been awarded the prize of $40 presented by Dr. Thorburn to Queen's University, for the best history of the early settlement of the County of Frontenac.

Vice Chancellor Blake lectured last night before the Y. M. C. A., and a collection of $270 was made to wipe out the debt now existing. A Montreal firm contributed $40 of this amount.

The annual meeting of the Art Association was held last night. The report of the work accomplished during the year is regarded as satisfactory, but the refusal of the Ontario Government to aid the Association is complained of. The following officers were elected: President, Hon. Chief Justice Ritchie; 1st Vice-President, Mr. Allan Gilmour; 2nd Vice-President, Mr. H. O'Niel; Treasurer, Mr. J. W. Harper.

GRAND TRUNK RECEIPTS.—The Grand Trunk receipts for the week ending the 23rd inst. were $216,633, as against $183,546 the corresponding period last year—an increase of $34,087. The aggregate increase for 17 weeks has been $211,801. Under the head of freight and live stock, the increase has been about 25 per cent. while under the head of passengers it has been about 9 per cent.

—The Kaministiqua river opened on Wednesday. This is three days earlier than last year. It is not likely that Thunder Bay will open for about ten days yet.

—Messrs. Jam.s Macnee, James Richardson, B. M. Britton, John Breden and James Minnes have been appointed trustees of the Kingston Cotton Company, to invest the capital in land, buildings and plant. Mr. Richardson, a delegate of the Company to Montreal, said that one of the Montreal cotton mills, which employed 700 hands, paid 53 per cent.

Remember This.
Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist————and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints that have been stiff for years.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1.00.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

FOR ASTHMA AND PHTHISIC.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

"Hail bounteous, beauteous, gladsome Spring" - this was Mark Twain's prize poem-but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

MORNING DESPATCHES

EUROPEAN.

THE NIHILISTS.

A St. Petersburg letter says before the new Czar's court was removed to the castle of Gatschina, 30 miles from the capital, several hundred artizans of the Breobrajinsky regiment were sent to make the necessary alterations. At midnight they were assembled in the church at Gatschina, and were sworn secretly to silence, death or Siberia being the penalty for infraction of their oath. A subterranean passage was built from the Czar's room to the stables, where a number of horses are kept saddled and bridled day and night. Sentinels are posted at intervals of twenty yards all around the building. The Imperial bedroom has two windows, protected at night by massive iron shutters which can only be reached from the outside by passing through three ante chambers, in which are posted eighty Cossacks, armed to the teeth. They are allowed to speak and move about in the two outer rooms, but in the hall adjoining the Czar's bedroom perfect silence is maintained. The General on duty for the day sits in an easy chair, the Cossacks sitting on a divan which runs around the whole room. At the General's hand is the knob of an electric apparatus which rings a bell in every guard house within the palace grounds. When the Emperor is about to retire, before shutting the door he removes the outer handle, so that no entrance can be effected until he himself opens the door from the inside. He cannot endure the presence of an armed soldier in his bedroom.

AMERICAN.

Fearful Catastrophe.

50 LIVES LOST.

ELGIN, Ill., April 28.—A ferryboat crossing the Fox River this morning capsized. The passengers, including thirty little girls, were swept away by the current, uttering heart-rending cries. Twenty persons were rescued with boats. The number drowned is estimated as high as fifty. The boat, when first used yesterday, was condemned by the public.

FATAL EXPLOSION.

NEW YORK, April 29.—One workman was killed, and two others perhaps fatally injured at Hellgate yesterday, by the premature explosion of a blast in the submarine galleries at Flood Rock.

A LARGE CASTING.

The largest steamship cylinder in the world was cast here yesterday, nearly 100,000 pounds of iron was used for casting. The cylinder is 9 ft. 2 inches diameter, 14 feet stroke. It is intended for the new steamer to run on Long Island Sound.

AN ADVENTURESS.

Helen Garden was sentenced to penitentiary yesterday for assaulting Howard Ingersoll and throwing red pepper into his eyes on account of an alleged insult. She was proved to be a shameless adventuress, whose victims are numerous. Ingersoll went to great expense and neglected his business in order to obtain evidence for her case and clear his reputation. The woman was recently married to a young man who will now seek divorce.

WASHINGTON SPECIALS.

The *World* says Senators think an Executive session will be allowed for consideration of the Chinese treaties by Tuesday. Whenever the Executive session is ordered the Democrats intend to press for a consideration of the nomination of Matthews, Chandler, and Robertson. It is stated that the President's well known views with regard to civil service reform have not changed in the least; he has a record on the subject, and it is believed he will not depart from it himself, nor countenance departure from it on the part of any subordinate. The recent engagement of 150 clerks additional in the Interior department without the usual examinations, was due to the vast amount of business requiring immediate attention, and which allowed no time for examination.

OIL DISCOVERY.

CARBONDALE, Pa., April 29.—The discovery of oil at Honesdale, county seat of Wayne Co., has created the wildest excitement in this section.

OHIO POLITICS.

COLUMBUS, O., April 29.—It is stated a quiet thorough canvass of the State has been in progress of late in behalf of the nomination of Washington McLean as Democratic candidate for Governor.

TURNED HIS HEAD.

VICTORIA, B. C., April 29.—Methodist circles have been stirred by the secession from the communion of the Rev. A. H. Smith, Superintendent of Missions and head of the Church in the Province. Smith declared a disbelief in eternal punishment.

LOSS BY FLOODS.

ST. PAUL, April 29.—The total loss by floods along the Missouri river between Pierce and Sioux City is now estimated at $25,000. In James River Valley thousands of cattle and horses have been lost, many houses destroyed, and great suffering is reported among the inhabitants. All the bridges for 100 miles up the stream have been carried away. It is estimated the Government will have to furnish food to 2,500 persons in the flooded districts.

AFTERNOON DISPATCHES.

TUNIS MATTERS.

PARIS, April 29th.—A note from the Porte hints at deposing the Bey of Tunis in behalf of his brother. France declines the proffered intervention, as she does not desire to acknowledge the Porte's authority.

RUSSIAN POLICY.

PARIS, April 29.—A prominent diplomatist at St. Petersburg reports the Czar favor and Council disposed to adopt rigorous repressive measures, having no example in Russian history.

A FATAL QUARREL.

WILMINGTON, Del., April 29.—Morris Carberry, watchman of the old Ferry Rolling Mill, this morning shot and killed a colored workman named Adams, in a quarrel.

THE CATTLE DISEASE.

LIVERPOOL, April 29.—The statement of the disease discovered among the cattle landed recently from a steamer from Maine, is contradicted.

ELOPEMENT IN HIGH LIFE.

LONDON, April 29.—It is reported that a young, well-known Earl, has eloped to the continent with the wife of a proprietor of a large colliery.

TUNNEL BILL.

ALBANY, April 29.—In the Senate Williams introduced a bill amending the charter of the Tunnel Transit Co. It provides that if the tunnel is not commenced within 8 years and completed within 13, the right to construct it shall cease.

WASHINGTON SPECIAL.

NEW YORK, April 29.—The *Graphic's* Washington special states that ex-President Hayes writes that he knew nothing about the Star route frauds until the matter came before Congress, which had more power to investigate than he had, and he felt justified in leaving the matter to the Congressmen. The ex-President is severely criticized on all sides. The general verdict is that Hayes had a hobby, which was a reputation for a victorious administration, and advantage was taken of it to indulge in great iniquities.

WASHINGTON, April 29.—Indications: Lower lakes, fair.

Farmers and Mechanics.
If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

DR. LLOYD, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of ALLAN'S LUNG BALSAM, I have no hesitancy in stating that it was by the use of your LUNG BALSAM that I am now alive and enjoying good health.

In cases of Chronic disease which doctors have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

"THEY ALL DO IT." — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

Woman's True Friend.
A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Commercial.

A TRIAL.
A trial of Dr. Dow's Sturgeon Oil Liniment costs 25 cents. If found of value in the cure of the diseases for which it is intended, it will save many dollars a year and much suffering. Is it not then worth a trial? the more especially as
The Universal Testimony
of those who have used it is, that it cannot be too highly recommended for the cure of neuralgia, rheumatism, contracted joints, lumbago, sciatica, strains, bruises, erysipelas, burns, scalds, frost-bites, boils, felons, chilblains. A remedy for one or another of these ills is likely to be called upon at any time and at all times in the household, and it can be secured in no more handy form than that of Dr. Dow's Sturgeon Oil Liniment. The liniment also never fails in time of need. It can always be relied on.
It is put up in large bottles, and sold in every town in Canada at 25 cents a bottle.
J. W. BRAYLEY,

Daily Intelligencer.

LADY THORNHURST'S DAUGHTER.

By MRS. HARRIET LEWIS.

Author of "The Double Life," "Tresailian Court," &c., &c.

"I am sorry not to see Mrs. Dennis," said Sir Victor quietly, and in the same undertone he had before employed. "I will try to call again."

He raised his hat to the group of three eager-faced men, and would have departed quietly, but Captain Holm cried out insolently:

"You are Sir Victor Cheswick, I believe!"

The young Baronet bowed a grave assent, his hat in his hand.

"I am Captain Holm," continued that gentleman. "I want my daughter, sir."

Sir Victor looked amused. His lip curled slightly.

"Allow me me to recommend you to find her, then," he said half haughtily. "I have no knowledge of Miss Holm's present whereabouts."

"That is false sir," cried Holm savagely, his eyes gleaming. "You stole her away from my protection; you persuaded her to an elopement; and I demand her at your hands!"

"I have not persuaded Miss Holm to an elopement," returned Sir Victor calmly. "Miss Holm has too much self-respect to elope with any man, whatever her friendlessness or distresses. And I have too much respect for myself and her to persuade her to any step which she might misconstrue. It is true, Captain Holm, that I escorted Miss Holm to London; but business called me here. On my way to Wimborn Minster, on the night before last, I overtook a toiling girl in the snow. It was Miss Holm. She was on her way, on foot to the town, and was already benumbed with the cold and staggering from exhaustion. I took her into my vehicle, took her to town, and escorted her on her journey to her friends, not leaving her until I had placed her safely in their care. I make this explanation in justice to her whom your inquiries tend to defame. I may add that I have not seen her since yesterday, and that I do not know where she is."

This explanation was uttered with a quiet frankness and sincerity that convinced the police official of its truthfulness.

"He speaks the truth, Captain," said the police sergeant, in a whisper, conceiving a cordial respect for the young Baronet and his title. "He don't know where she is. Our best plan is to watch the house and Mrs. Dennis, or to go out to Clapham."

Sir Victor did not wait for a reply. While the police officer was thus speaking, he turned to the vacant-faced maid, and inquired the nearest way to an omnibus station.

The girl stepped out to the gate.

"This way, sir," she said, pointing to the eastward. "You'll find a bus in Kentish Town Road.

Sir Victor thanked her and dropped a coin in her hand, and received into his a tiny and minutely folded note. With this in hand he hurried away and was soon lost to view, disappearing around a neighboring corner.

Not until he was seated in a cab on his return to Belgravia, did the young Baronet open and read his letter.

It was from Tessa, and had been written at a late hour of the previous night. It was stained and blotted with tears, and contained a few heart-broken words to the import that she loved him and honored him, but that she could not become his wife. She said she had another besides herself to consider in the arrangement of her future, and that the duty to that other demanded her renunciation of him.

Sir Victor was amazed and almost stupified. "She cannot mean her father," he said perplexed and anxious. "Has she made some new discovery? Has she some Quixotic idea that her father's character is a bar to our marriage! Ah, little Tessa," and he smiled with a yearning tenderness, "you do not know me yet. As if I should let anything come between me and my promised wife! You are mine—my own—and not the whole world shall sever us! I will return to Kentish Town this evening and find from Mrs. Dennis where my darling is gone."

With this resolve, and with a very grave and anxious brow that belied his expressions of self-confidence, he returned to the West End and his sick friend.

Meanwhile Capt. Holm, Todhetly and the police officer emerged from the gate of Laburnum Villa, which was instantly closed and locked behind them.

After a brief further consultation, Holm dismissed his police with a liberal fee, and taking Todhetly's arm, the two strolled toward the Kentish Town Road.

"I tell you, Holm," said the Squire, 'we ought not to have let that young fellow—Cheswick, you know—off so easily. He knows where the girl is, you may be sure."

"I am of the same opinion," returned Holm gloomily. "He spoke of Tessa as if somehow she belonged to him. He's been making love to her, and the girl, of course, has promised to marry him."

"In that case he knows where she is."

"He's a deep one," said Holm. "He has removed the girl this morning, and then, expecting our return after the row we made last night, he came back like a casual visitor, and asked to see the girl, just to throw us off the scent. If I had only thought to follow him up!"

"The question is—where's the girl?"

"If Sir Victor wants to marry her, he has taken care to place her in charge of some noble lady who can protect her, and whose protection will enhance Tessa's reputation."

"Lord Thornhurst is his relative," suggested Todhetly.

Holm stopped short in the street, overwhelmed with a sudden and terrible agitation.

"By Heaven!" he muttered. "If he should have taken the girl to Lady Thornhurst!"

Todhetly looked aghast. The two men were silent for a space; then Capt. Holm said huskily:

"What did the girl do with that infernal sketch you showed her of Ignatia?"

"Put it in her pocket."

Capt. Holm breathed heavily.

"Fool," he muttered. "You'd better have burned the Grange, if necessary to rid yourself of that cursed portfolio. Why any man of sense should have kept such a remnant of his foolish days, I can't see. I thought you had more brain! You've ruined us! The girl took the picture with her in her flight from the Grange, being a romantic little fool. The Baronet asked her to marry him, and she simpered assent. Then like the young idiot she is—I know her kind—she must needs have no secrets from him, and so told him her history, her mother's history, her father's history, and how she had a mother living who was a titled lady. Curse her, and you, and everybody!" raved Holm. "If I had the power, I'd knock the earth into a cocked hat!"

He looked so pale with his furious rage that the Squire trembled, and begged him to come with him to a drinking saloon which they could see on the next corner.

"A little brandy will set you up," he suggested. "Come, Holm. You'll have a fit of apoplexy if you take this matter so hard."

"And you pretended to love the girl, and can take the matter so coolly?" asked Holm, foaming at the mouth. "Are you a mole, that you don't see the truth? This young Baronet is a relative of the Thornhurst's. He knows that Lady Thornhurst was the supposed widow of a Captain Digby Holm, who went out to Canada. When he heard Tessa's story, he put two and two together. He brought Tessa to Kentish Town, and went to Lady Thornhurst with his marvellous story. He came this morning and took Tessa to Belgrave Square. The Thornhursts are in town, or were the other day, for I saw a notice to that effect in some paper. And Tessa is at this moment with her mother billing and cooing."

"By George!" muttered Squire Todhetly in an utter consternation.

TO BE CONTINUED.

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig-headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestiible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everything else has failed. Satisfiy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle $1. For sale by JAS. CLARKE & Co

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Peaconsfield, P. Q, has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

SUBSTITUTES!

The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer**, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer**; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer**, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER.
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz, and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest

SPRING, 1881.

GOLDEN GRIFFIN!

128, 130, and 132 King-Street East, Toronto.
Globe, Saturday, March 12th, 1881.

We beg to notify our numerous patrons and the general public that we are now in receipt of our new Spring Stock of Fine Woollens, consisting principally of English, Irish, Scotch, and Canadian Tweeds; English, Irish and Scotch Serges; French and English Worsteds; Fine West of England Black and Blue Broadcloths; Black and Blue Venetians, Doeskins, Cassimeres, etc., making in all the largest and most Complete Stock of the kind in Canada.

Our Clothing is without doubt quite equal, if not superior, to the best New York Clothing, for Style, Fit and Material; a proof of which is the large number of First Prizes awarded us at Toronto, Hamilton, and other Exhibitions during the past season.

Gentlemen requiring Fine Clothing will find it to their advantage to inspect our Stock before purchasing. Thanking our numerous friends for their patronage in the past, and soliciting a continuance of the same in the future,

We remain, respectfully yours,

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired, Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health. Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

HALL'S
VEGETABLE
SICILIAN
HAIR
RENEWER

Has been in constant use by the public for over twenty years, and is the best preparation ever invented for RESTORING GRAY HAIR TO ITS YOUTHFUL COLOR AND LIFE.

It supplies the natural food and color to the hair glands without staining the skin. It will increase and thicken the growth of the hair, prevent its blanching and falling off, and thus AVERT BALDNESS.

It cures Itching, Eruptions and Dandruff. As a HAIR DRESSING it is very desirable, giving the hair a silken softness which all admire. It keeps the head clean, sweet and healthy.

The State Assayer and Chemist of Mass. and leading Physicians endorse and recommend it as a great triumph in medicine.

BUCKINGHAM'S DYE
FOR THE
WHISKERS

will change the beard to a BROWN or BLACK at discretion. Being in one preparation it is easily applied, and produces a permanent color that will not wash off.

PREPARED BY
R. P. HALL & CO., NASHUA, N. H.
Sold by all Dealers in Medicine.

MANHOOD RESTORED.

Prescription Free. For the speedy Cure of Seminal Weakness, Loss of Manhood, and all disorders brought on by indiscretion or excess. Any Druggist has the ingredients. Address

GRAY'S Specific Medicine.

Before Taking After Taking

The Great English Remedy—an unfailing cure for Seminal Weakness, Spermatorrhea, Impotency, and all diseases that follow as a sequence of Self Abuse, as Loss of Memory, Universal Lassitude, Pain in the Back, Dimness of Vision, Premature old Age, and many other diseases that lead to Insanity or Consumption and a Premature grave.

Full particulars in our pamphlet, which we desire to send free by mail to every one. The Specific Medicine is sold by all druggists at $1 per package, or six packages for $5, or will be sent by mail on receipt of the money, by addressing

THE GRAY MEDICINE Co.,
Toronto, Ont. Canada.
April 8 1880. d&wly

TO NERVOUS SUFFERERS—THE GREAT [illegible] REMEDY—DR. J. B. SIMPSON'S SPECIFIC MEDICINE.

BEFORE
AFTER

DR. J. B. SIMPSON'S SPECIFIC MEDICINE is a positive cure for Spermatorrhea, Impotency, Weakness and all diseases resulting from Self-Abuse, as Nervous Debility, Irritability, Mental Anxiety, Languor, Lassitude, Depression of Spirits and Functional Derangements of the Nervous system generally, Pains in back or side, Loss of memory, Premature Old Age and diseases that lead to Consumption, Insanity, and an early grave, or both. No matter how shattered the system may be from excesses of any kind, a short course of this Medicine will restore the lost functions and procure Health and Happiness, where before was despondency and gloom. The Specific Medicine is being used with wonderful success. Pamphlets sent free to all. Write for them and get full particulars.

Price, Specific, $1.00 per package, or six packages for $5.00. Will be sent by mail on receipt of money. Address all orders,

CINGALESE
HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge. Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

MANHOOD

HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the *radical and permanent cure* (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses.

☞Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and *radically.*

☞This Lecture should be in the hands of every youth and every man in the land.

TESTIMONIALS TO
MITCHELL'S CANADIAN HAIR RESTORER.

TO THE PUBLIC:

I desire to state that "Mitchell's Canadian Hair Restorer" has effected a *permanent* change in my hair, in completely restoring (not dyeing) it to its *natural color* and original healthy condition. Some months ago my hair got *so grey* and *thin* that my friends noticed the change. I then used *only one bottle* of the Restorer with the above satisfactory results.

CHARLES GREEN,
Butcher
Belleville, April 2nd, 1881.

BELLEVILLE, September 3rd, 1877.
MR. W. H. MITCHELL,

DEAR SIR:—I have used your "Canadian Hair Restorer, and find it to be a good article, the best, in fact, I have ever used, and knowing all the ingredients of which it is composed, I can recommend it to the public as a valuable preparation, free from all poisonous qualities.

JAMES FORD CURLETT, M. D.

BELLEVILLE, October 20th, 1880.
MR. W. H. MITCHELL, Hair Dresser, &c.,

DEAR SIR:—I have much pleasure in expressing my entire satisfaction in using your "Canadian Hair Restorer"; I have used what has been called the best in the market, namely, Hunt's, Ayer's, Hall's and Allen's, and thought no other could ever supersede these, but after a long use of your Restorer, I am convinced it is the best I have ever used, and my friends who have used it express the same opinion. It gives the Hair a very natural color, after it has faded or become grey. I recommend it to all.

Yours truly,
JOHN COLEMAN,
Artist.

FOR SALE OR TO RENT.

THAT valuable farm being composed first of lot No. 34 in the third con. of the township of Sidney, containing by admeasurement 200 acres, more or less. There are about 100 acres cleared and under cultivation, the balance timbered with beech, maple, ash, &c. There is a barn and sheds on the lot.

Should the above lot not be sold in block it will be put up in 100 or 50 acre lots.

2. The north seventy-five acres of lot No. 34 in the second con. of the township of Sidney. There is a new frame house and barn on the lot. There is about 60 acres under cultivation. There is a valuable supply of lime stone on this lot which has been partially worked and the lime is considered to be superior to any in the district. There is also a lime kiln on the 200 acres.

For terms and further particulars apply to the National Investment Company, Toronto, or to SAMUEL J. BULL, Esq., Belleville. 316d21t-8w1t.

TO LET—The store on the east side of Front Street next the Bank of Commerce, lately occupied by Bartman & Sintzel.

Are the Children at Home?

Each day when the glow of sunset
Fades in the western sky,
And the wee ones, tired of playing,
Go tripping lightly by,
I steal away from my husband,
Asleep in his easy-chair,
And watch from the open doorway
Their faces fresh and fair.

Alone in the dear old homestead
That once was full of life,
Ringing with girlish laughter,
Echoing boyish strife,
We two are waiting together;
And oft, as the shadows come,
With tremulous voice he calls me,
"It is night! are the children home?"

"Yes love!" I answer him gently,
"They're all home long ago;"
And I sing, in my quivering treble,
A song so soft and low,
Till the old man drops to slumber,
With his head upon his hand,
And I tell to myself the number
Home in the better land.

Home, where never a sorrow
Shall dim their eyes with tears,
Where the smile of God is on them
Through all the summer years!
I know—yet my arms are empty,
That fondly folded seven,
And the mother heart within me,
Is almost starved for heaven.

Sometimes, in the dusk of evening,
I only shut my eyes,
And the children are all about me,
A vision from the skies!
The babes whose dimpled fingers
Lost the way to my breast,
And the beautiful ones, the angels,
Passed to the world of the blest.

With never a cloud upon them,
I see their radiant brows;
My boys that I gave to freedom—
The red sword sealed their vows!
In a tangled Southern forest,
Twin brothers bold and brave,
They fell: and the flag they died for,
Thank God, floats over their grave.

A breath, and the vision is lifted
Away on wings of light,
And again we two are together,
All alone in the night.
They tell me his mind is failing,
But I smile at idle fears,
He is only back with the children,
In the dear and peaceful years.

And still as the summer sunset
Fades away in the west,
And the wee ones, tired of playing,
Go trooping home to rest,
My husband calls from his corner,
"Say, love! have the children come?"
And I answer, with eyes uplifted,
"Yes, dear! they are all at home!"

TABERNACLE SERMONS.

Discourse by Rev. T. De Witt Talmage.

MONEY ALL GONE.

"He began to be in want."—St. Luke, xv., 14.

When I need to get a good, warm-hearted text, I am very apt to go to one of the parables of the Lord, and to none more frequently than to this parable of the Prodigal Son. There are enough texts in it for a man to preach about fifty years. Then he must go into the eternal world, feeling that he had just opened the outside door of the subject. I will not rehearse the story. You all know it—the story of the Prodigal Son. You need not go to the Bible to find the story. You find it every day. I saw one day, on my way to church, a ragged, wretched young man going into a house where he would only administer to his dissipations. I said to myself, "Poor fellow! Had you had the advantages that I had of parental education and the tuition of God's spirit, and had I had your disadvantages, you would have been on your way to the House of God, and I would have been going in there." So, this subject is no novelty. I will simply say, however, that just as some years ago our young men went off to California to get their fortune, and as Englishmen used to go to Australia to get their fortune, so I suppose this young man of the text went off to get his fortune. You know it takes a great deal longer to make money than spend it. Although it is only a little while since this young man got one-third of his father's property, it is all gone—every cent of it. So you have known men toiling for twenty, thirty, forty years in commercial or in mechanical life, having acquired large property, to lie down and die, leaving a great estate; and in five years the boys have got all through with it. So this young man of the text and his money were soon parted. I do not know just how it went, but there, in the first place, were his travelling expenses. A man who had been brought up as luxuriously as he evidently was from the surroundings of that home could not lodge just anywhere, nor be contented with plain fare. He had been used to see things on a large scale and I do not suppose he closely calculated the expense. I do not suppose he always stopped to take change. I suppose that sometimes he bought things without any regard to what it cost. Then, besides that, there came in the bill for his personal apparel, and a young man who had a third of his father's property in his pocket could not afford to go shabbily dressed, and so he must have clothes of the best pattern and of the finest material. Besides that, the young man of the text had to meet the bill for social entertainment. He must treat, and it must be with the costliest wines and the rarest viands. Besides that, the sharpers found out that this young man had plenty of money, and they volunteer their services. They will show him the sights. They can tell him things he never imagined away off on that father's homestead. Well, they undertake to show this young man the sights, and after a while he wakes up one day and says, "I think I will county my money." And he counted his money. It was half gone; but as bad habits were thoroughly fastened upon him, he could not stop. After awhile he counted his money again, and it was three fourths gone; but he was on the down grade, going swifter and swifter and swifter, until, when he comes to look for his money, it is all gone. Now, these associates, who stuck to him as long as he had plenty of money, are gone. Morning glories bloom when the sun is coming up, not when the sun is going down. There is no money with which to meet his expenses. Beside that, the crops have failed, and there is famine in the land, and at a time when affluent men are straitened about getting their daily bread, what is to become of this poor fellow, with an empty pocket and a discouraged heart? "Oh!" you say "let him go to work." He cannot work. His hands, soft and tender, would be dreadfully blistered with toil. Perhaps he comes then to some place where he can get occupation, he thinks, appropriate for an educated young man. He comes to a commercial establishment and asks for work. "No" says the head man of the busines, "we can't have you. Why, you are nothing but a tramp of the street. Off of our premises!" Perhaps he comes to the office of some official of the Government and seeks employment by which he can support himself. "No" says the officer "a man clad as you are cannot find employment in my office." What is he to do? In a strange land. Money all gone. No friends. Ragged. Wretched. Undone. My text with one stroke gives the awful full-length photograph: "He began to be in want."

Now, what does all that mean? It means you and me. Our race had a good starting; but we all went away from God, our home, and we have found sin to be an expensive luxury. It despoiled us. It hungered us. It robbed us. It made us hopeless and godless. We had a fine spiritual fortune to start with, and we spent, "and we began to be in want." I care not how fine our worldly estate may be, or how much bank stock we may possess, or how elegant our social position, sin has paupered the whole race, and until we go back to God, our home, we are in an awful state of beggary and want. There is no exception to it. In hospitals you will find that there are different wards for different stages of disease. In one ward, those who are a little sick. Further on you will find those who are dangerously sick. In another ward, those who are hopelessly sick. Now, I have to tell you that in the hospital of this world there is only one ward, and in that they are sick unto death, and no human doctor can touch their cases, and unless some supernatural help come we must all die. We want healing. We want light. We want medicine. We want everything for the soul. It is no whim of mine, but a positive statement of the Bible, that we are by nature poor, and wretched, and miserable, and blind, and naked. Oh! that God this morning would help me to define the wants of an immortal soul. 'He began to be in want.'

I have to remark, my dear hearer, that if you are not a Christian, your first want is the Holy Ghost. Some of you have been familiar with these themes about which I am talking long before I was born. Some of you have heard a thousand, fifteen hundred, two thousand, three thousand sermons. Some of you have spent whole years of glorious Sabbaths, and had innumerable opportunities of religious contemplation, and yet you tell me frankly you are not Christians. Why? Because the Holy Ghost has not led you to the cross. What does all this service amount to this morning unless the divine spirit touch your soul? A wasted hour. What is all this Bible with its hopes and promises to you unless the Holy Spirit illume the page? It is a sealed book. What are all the advantages you have had for the last fifteen years in a religious sense, unless the spirit of God drive the truth to the heart? So many arguments for your condemnation. "Well," you say, "how can I get that spirit? Am I responsible for not having it?" Yes. You must, my dear brother, pray for His coming, and He will come. Plead for Him. Beseech his coming. Cry out, "Give me the Holy Ghost!" Why is that sometimes when we come to the people with an elaborate discourse, and we have carefully analyzed the subject and brought out the thoughts in a harmonious way, and we think it is about as good a sermon as we know how to preach, that it all amounts to nothing? It is because the Holy Spirit did not bless the truth that day. Why is it that on some other occasion, when we come with only a few thoughts lying in our mind, hardly arranged at all, but with a burning desire for the salvation of the souls of men, and the sermon is a poor sermon, judged by the rules of human rhetoric—that on that day the people come to God? Because the Lord sends His spirit to bless that sermon. Oh! if this morning the spirit of God would shine on your heart, you would wake up as from a long sleep, you would look around about you, and you would kneel down and cry for mercy. I never shall forget a scene in my first settlement. We had a morning prayermeeting in a time of religious interest, and there was a man who entered the door just before the close of the services. I said to myself, "I wish that man had stayed away; he has come in to disturb this meeting," I had heard him express his contempt for religion and all religious things, and I was sure he was there to interrupt us. He came in and sat down, and before the benediction was pronounced he arose. People shuddered, for all knew him in the village as a bold antagonist of religion. But, so far from disturbing the meeting, he said, "Oh, pray for my soul!" and that night he found his way into the kingdom of God, and his wife and his children. The spirit of God sought him out and brought him in, and by the time night came he was saved forever. If the Holy Spirit should strike off your chain, you would be free. If He should touch your eyes this moment, you would see not only your sin, but the grandeur of a Savior's ransom. Oh! He is a mighty spirit. People of God, if you will importune His coming, if you will with proper faith importune His coming, there would this morning be five hundred souls in all this audience who are out of Christ, who would march in solid column into the kingdom, and the house would be full of the glory of the Lord, and there would be here such praying, and weeping, and wailing, and singing, as you never heard. Oh! that the spirit would decend now. I wait His coming. Aged men, who know the way to pray, who have long been praying, implore the descent of that spirit. Men in midlife, young men, men who would be saved now—ask for the coming of that spirit.

> "Come, Holy Spirit, Heavenly Dove,
> With all thy quickening powers:
> Come, shed abroad a Saviour's love
> In these cold hearts of ours."

Twenty-five years ago I had a man standing before me one day preaching the gospel to my people. As I sat behind him I thought to myself, "Oh! if I only had that man's physical health, how much good I could do." Though I was well, he seemed to be more than well—athletic, exuberant. That was the last sermon he ever preached. That week he was dead. I never shall forget that man's last sermon. I shall not forget his text. It was so appropriate for my people then; it is so appropriate for this people now. The text was, "Have ye received the Holy Ghost?"

I remark again, that your want is pardon. That young man down in the wilderness, oh! how he thought of his father. He thought, "If I could only hear my father say 'I forgive you,' I would be happy." It was pardon he wanted. That is what you need. What has been the greatest sin in all your life? One man would say one thing. Another man would say another thing. I can tell you what has been the greatest sin of your life, the one that towers above all others, the ghastliest, the blackest crime that the soul can commit. It is not murder. It is not theft. It is not blasphemy. But worse than all these combined. It is the sin of driving back the Son of God from your souls, and re-crucifying the Lord of glory, and trampling on the bleeding heart of infinite love; and that sin we have all committed. To that chief sin you have added other sins. How many? In all your life how many do you suppose? A thousand? "Oh! yes," you say. Fifty thousand? "Yes," you say "in the course of my life." One hundred thousand? "Yes." But let us stop there. One hundred thousand transactions. Sins against Sabbaths, against Bibles, against God. Sins against yourself. Sins against the Cross. Sins against the ministering spirits that came to defend you. Sins against your own deathbed, your father's deathbed, your mother's deathbed. Sins against the judgment day. Sins against the glories of heaven and the grandeurs of eternity. Sins inexcusabe. Sins without number. All unforgiven! You know how rapidly the snowflakes accumulate on a winter's day, and you know how soon they aggregate on top of the Alps, and then in certain conditions of the weather, that great block of snow, which is made up of little snowflakes, shoves off an avalanche on the villages beneath destroying them. So the sins of your life—cold, freezing transactions—accumulating, accumulating, heaping up wrath against the day of wrath, at last, if unrepented of, will be an avalanche of darkness striking down upon your soul. They seem more like a cloud, black thunder-charged, aflash with all the lightnings of an incensed God, and they hover and swoop! about us until in the suffocation we gasp for mercy and hope that a gale from heaven will blow away the cloud. God is wiling to lift that cloud. He says He is long-suffering and patient. He is the God of great pity. He is willing to blot out your transgressions. He is willing to take you in the hands of His compassion. Oh! here is the letter. It is a letter to you, the wandering child. He says: "Come back! Come back! Though your sins were as scarlet, they shall be as snow; though they be red like crimson, they shall be as wool." Pardon for all. Free pardon! Everlasting pardon! "Oh," says some man in the gallery, "That is not for me. You don't know my case or you would not give such an indiscriminite offer as that." I do not know your case specifically, or just how much you may have offended against God; but I will suppose it was the worst case, and then I tell you there is salvation for you, for you, for you.

> "There is a fountain filled with blood,
> Drawn from Immanuel's veins;
> And sinners plunged beneath that flood
> Lose all their guilty stains.
>
> The dying thief rejoiced to see
> That fountain in his day;
> And there may I, as vile as he,
> Wash all my sins away."

Can it be that you want any better salvation than that?

Again, my unconverted friends, you want comfort. If this young man of the text had only had some one to come from his father's house and say to him: "Now you can go back if you want to. They will be glad to see you. Your estate will be restored, and you will have a glorious meeting if you will only go"—what a comfort it would have been to him. What he wanted, you want, and that is comfort. You have found this world to be a rough world. You have been disappointed again and again. The grave has opened and taken your friends—perhaps your very best friends. God only knows how many tears you have wept, how many sighs you have breathed, how many groans you have uttered. There is in your soul an aching void the world cannot fill. Worldly amusement cannot silence it. The intoxicating cup only makes the matter worse. The mirth of your godless companions cannot silence this unrest. You go about seeking for peace and happiness, and you find remorse and anguish. Do you know the reason? It is because the flower you are hunting does not grow on earthly soil. It is because the gem you are digging for cannot be found in an earthly mine.

But in Christ is your comfort. This is the peace that passeth all understanding. This is the balm for all wounds. This is liberty for all captives. This is life for all who are dead. What consolation it has given to many of these people who are before me to-day! Jesus has been all their comfort. They have had enough trouble to kill them, but Christ has sustained them, Christ has soothed them. He is content to do it. One of the Scotch martyrs said in his last moments: "I was turned out; I spent two nights in the fields; I had no place to lay my head, no covering but the darkness; but, oh, what a sweet time I had all these nights! I looked up and I saw the ocean of joy in which all heaven swims and swims!" Yes, there is consolation in this religion. Why do you go crouching under that pack of burdens when God would this morning give you comfort by Grace? I can tell by your looks that you are weary of sin. You are tired of the desert, famine-struck and simoon-blasted, and you want to come home; and it is my business this morning to tell you that God wants you to come home, and He wants you to come home now. I press this cup of everlasting life to your lips. Oh! why do you die of thirst within arm's reach of a fountain? I wish I could tell what a comfort this religion of Jesus Christ has been to my soul—what comfort it has been to the souls of many who are here. There are little children here who have who have found the Saviour's compassion. They have had more joy in their short life of ten years than you have had in sixty years, because they went to the Saviour, and they have put their hearts in His care, and all shall be well. They feel as well as a little child did who was dying. She had been in the Sabbath-school class, and the story was read about the Shepherd, and how he folds the lambs in his arms. And that week she was taken away. After she had come out of convulsions and was about to die, her mother said to her, "My dear, you are very tired, ain't you?" "No" said she, "I am not tired, I never shall be tired. They told me last Sunday that the Shepherd carries the lambs in his bosom, and I am one of His lambs. I can't be tired." Oh! the solace, the comfort, the peace of this glorious gospel! Will you not receive it?

Again I remark, that you want strength against temptation. What is the use of this young man trying to resist temptation down there in the wilderness? One pulling him this way and another that way. He could not resist it. The only way for him is to go home. Now, I know your temptations. I simply say that it is impossible that in Brooklyn or New York a man can maintain his integrity without the grace of God to help him. In the office, in the store, in the banking institution where you are, there are people who do not believe in these things. They caricature religion. Some of them spend their evenings whrre they ought not. They want you to go along with them. Some of them are given to strong drink. Some of them are unjust in their words or actions, and I simply announce as the fact that the chances are all against a young man in city life who has not the grace of God to sustain him, especially if he be of a generous and vivacious nature. Oh! I have stood where I could look off and see a young man go down. I have had letters from fathers and mothers in the country saying: "My son has come to the city. He attends your church. He is in such and such a store. I wish you would look after him." And we see the men of the world gather around that poor young fellow and drag him away from God, and away from his father's prayers, and away from his mother's Christian counsel, and he lives only long enough to break their old hearts. A young man in town is not safe a moment without the grace of God. And what is true of young men is true of you older people. I have seen men in midlife try to reform. They signed the pledge, and they did a great many things that were well enough to do; but they did not seek God's help or strength. I saw a change right away in their home. The children were better dressed, and went to a better school. The wife, who had not sung for five years, began to sing again. The furniture was brushed up. The piano, that had not been opened for years, was retuned or traded off for a better one. Everything brightened up about that house. It was frequently remarked, "How well those people are getting on now! There is a great change He has reformed." Then a year passed along and one night there was a burden carried along the street, and there was a loud ring of the door-bell, and the door opened, and the father, dead drunk, was thrown into the hall. And then the children came home from that school, and then their apparel, instead of being good was very mean, and the wife stopped the song, and the piano was not opened, and after a while it was opened, for the sheriff's mallet came down on it, "Gone, gone!" What is the history of that man? He tried to reform without appealing to the grace and help of God. That is all. And when a man strives to reform or quit any kind of sin and goes out in his own strength he is one against a thousand, he is one against a hundred thousand. In other words, all hell is against him. But I have seen other men with no more courage than the one I have spoken of, and not half the force of will, come right up to respectability and usefulness—marching right on until the gate of heaven opened before their soul. Why? They said: "Oh! Lord Jesus, Thou seest my trouble. Thou knowest my thirst. Thou art acquainted with all my ungovernable appetites. I can't get away from them. Oh! Jesus, help me by Thy omnipotent grace. I will try to do better, but I can't do it alone. Help me! Help me! The Lord God Almighty put his arm around that man and led him right out into the green pastures, and he shouted "Victory! victory! through the Lord Jesus Christ." He never was confounded again—never will be. God Almighty is the strength of a man that puts trust in Him. So I offer Him to you as a shelter against temptation, and there is not anybody in the house that has escaped temptation.

But I have one more important thought to present. Your great want is a hope for heaven. We cannot always stay here. Some day you will be going along the street for the last time. A little after that your friends will be going along the street where you do business, and say "Ah! the shutters are up. What's the matter?" And then they will go to the card on the door and read that you are gone. And your friends will be startled when they take up the newspaper and see your name in the list of those who yesterday went away from time into eternity, and you will be seen no more. You will never be seen in the Brooklyn Tabernacle or in any Christian assemblage on earth. The world may laugh, and shout, and thunder and applaud—you will not hear it. Spring may come with all its wealth of blossoms—you will not smell the aroma. Summer harvests will throw their crowns of gold at the feet of the husbandman. You will not lift your head from the dust pillow to look at them. Frosts of winter will come, but they will not send any additional chill through your last encampment. There will not be a single person in all this audience living after a while. Some of us will sleep in the country churchward; some of us in the more pretentious city cemetery; some of us down in the deep blue sea. But where will the soul be? What will our immortal nature be doing? What are your prospects? You need hope for heaven, and some of you have not got it. What have you been doing, my dear friends, all your life that you have not got this hope? You could have had it for the asking. Have you not asked for it? It is a most astounding thing that in this land, with so many gospel advantages and privileges, people will go out of this world without any hope of heaven. And friends standing around the room waiting for little indications that all is well—waiting for just one encouraging word from the departing spirit and then to have such a one, as I have seen him, turn over on the pillow with his face to the wall and breathe feebler and feebler, and then just give one long sigh, and then all was over. Oh! no. It is not: I must take that back. It is not all over. It has only begun. I make an appeal especially to the young. "Oh" you say, "I can't attend to this. I can't break away from my associations." Why, my dear friend, it will be a greater struggle at last to die without hope. Come! Come in bands, come in flocks. If there is any one over whom you have especial influence, bring that one along with you. Before this night comes, before the benediction after this service is pronounced, give your heart to Jesus. He will take it now just as well as He will ten years from now. He would rather take it now. Commend your case to him and be saved before you go out of this building. I appeal also to those who are in midlife. You have lived long enough to know that this world is an insufficient portion. Begin to pray to-day. Establish your family altar and gather your children around it. "Oh," says some one in the house, "I cannot pray." Cannot pray? You *can* pray. You *must* pray. Before twenty-four hours go by, let your household, which has been a prayerless household, be a praying household, lest the Lord come upon thee in a way thou knowest not; for do you not know the announcement of God's word in which He says: "I will pour out my fury upon the families that call not on my name." Oh! pray for yourselves; pray for your children.

I must have a word with the aged who are out of Christ. What father, mother, so long a prodigal? The sun is going rapidly down in the west, and the chill of the last darkness is coming on, and let me tell you that there is not more than one in a thousand that ever go so far as you have in life unpardoned and yet find peace. God grant that you may be that one in a thousand! Oh! come, aged man, aged woman. Father, mother, I call you by the tenderest of names. Father, mother, come and take hold of the arm of Jesus in your declining years. He has waited to have you. What I say to one I say to all. This day is salvation come to your house. Refuse Christ now and you refuse Him forever. To some in this building this morning it is the last chance. I wish I could go through the audience and take you all by the hand and invite you by the tender mercies of God, by the worth of your soul, by the thunders of the last day, by the glories of the saved, and by the sorrows of the everlasting discomfited!

ZOPESA FROM BRAZIL.—As a result of the new commercial enterprise just assuming importance with Brazil, is the introduction of *Zopesa,* so justly celebrated where it is known for the cure of all forms of Indigestion. The company have opened a larboratory in Toronto. *Zopesa* comes to us highly endorsed and recommended its wonderful affinity to the Digestive Organs, its certainty to relieve and cure Dyspepsia and Constipation, makes this remarkable compound a necessity in Canada. The company make sample bottles at trifling cost of 10 cents, to be had of L. W. YEOMANS.

Sensible Advice.

You are asked every day through the columns of newspapers and by your Druggist to use something for your Dyspepsia and Liver Complaint that you know nothing about; you get discouraged spending money with but little success. Now to give you satisfactory proof that GREEN'S AUGUST FLOWER will cure you of Dyspepsia and Liver Complaint with all its effects, such as sour stomach, Sick Headache, Habitual Costiveness, palpitation of the Heart Heart-burn, Water-brash, Fullness at the pit of the Stomach, Yellow Skin, Coated Tongue, Indigestion, swimming of the head, low spirits, &c., we ask you to go to your Druggist and get a Sample Bottle of GREEN'S AUGUST FLOWER for 10 cents and try it, or a regular size for 75 cents. Two doses will relieve you.

Stop that Cough.

If you are suffering with a Cough, Cold, Asthma, Bronchitis, Hay Fever, Consumption, loss of voice, tickling in the throat, or any affection of the Throat or Lungs, use DR. KING' NEW DISCOVERY for Consumption. This is the great remedy that is causing so much excitement by its wonderful cures, curing thousands of hopeless cases. Over one million bottles of DR. KING'S NEW DISCOVERY have been used within the last year, and have given perfect satisfaction in every instance. We can unhesitatingly say that this is really the only *sure cure* for throat and lung affections, and can cheerfully recommend it to all. Call and get a trial bottle for ten cents, or a regular size for $1.00. Jas. Clarke & Co.

Headache.

Why become a suffering martyr to headache, when Burdock Blood Bitters will surely cure the cause of all varieties of either Sick or Nervous Headache, cleanse the System, regulate the Secretions, relieve Constipation of of the Bowels, purify the Blood, renovate the Liver and tone up the Nervous system, and distressing headache will be unknown. Sample bottles 10 cents. Large bottles $1.00.

Were man to conform *more* to the laws of health and of nature, and be less addicted to the gratification of his passions, it would not be necessary to advertise Fellows' Compound Syrup of Hypophosphites as restorative for the power of the brain and nervous system, while the world's progress and enlightenment would indeed be marvellous.

A mistake.

It is a great and often fatal mistake to take repeated drastic purgatives, for constipation of the bowels, they induce piles and cause aebility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, arousing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys, and renovating and toning the system in the most perfect manner.

MERCHANT TAILORING

Establishment.

We beg to announce to the Gentlemen of Belleville and surrounding country that we have opened a First-class

TAILORING ESTABLISHMENT

in the spacious premises

Next the Bank of Commerce,

ASHLEY BLOCK.

Our Stock is all new comprising all the latest designs and coloring, and specially chosen for a first-class trade.

We purpose employing the best class of mechanics and have no doubt of being able to execute orders to the entire satisfaction of those who may favor us.

We would direct special attention to our selections for

Spring Suitings
—AND—
OVERCOATINGS

and solicit the favor of a call from all who wish to secure a really stylish article at a moderate figure

SANDERS BROTHERS.

Belleville, April 7. 837d1m

Please to Leave Your Orders Early at the
CITY BAKERY
—FOR—
HOT X BUNS!

Customers can rely on having them delivered in good time on Friday morning.

☞Expect oysters by express to-night.

TRAVELLERS' GUIDE.

GRAND TRUNK TIME TABLE.

February 13th, 1881.

GOING WEST.

No. 2, Day Express	6:20 p. m.
No. 4, Morning Express	6:40 a. m.
No. 8, Mixed	9:15 a. m.
Passenger	5:00 a. m.

GOING EAST.

No. 1, Day Express	12:15 p. m.
No. 3, Night Express	11:57 p. m.
No. 7, Mixed	7:15 p. m.
No. 5, Local	10:55 p. m.

GRAND JUNCTION RAILWAY.

On and after Monday, December 20th, trains will run as follows:

MAIN LINE.

Leave Belleville	7:30 a. m. and 3 p. m.
Arrive at Peterborough	11:30 a. m. and 7:30 p. m.
Leave Peterborough	7:30 a. m. and 3 p. m.
Arrive at Belleville	11:30 a. m. and 7:30 p. m.

MADOC BRANCH.

Leave Madoc	8.00 a. m.
Arrive in Belleville	10.00 a. m.
Leave Belleville	3:30 p. m.
Arrive in Madoc	5:30 p. m.

Trains are run by Belleville time.

Daily Intelligencer.

BELLEVILLE, SATURDAY, APRIL 30.

The Shipbuilding Trade.

When, some weeks ago, a Grit newspaper asserted that the N. P. was injuriously affecting the shipbuilding trade, we denied the assertion and gave as the reason of the slight decline in tonnage which last year's operations showed, the fact that ships of iron and of steel are largely superseding those built of wood, and that consequently the demand for the latter had declined. Some of our Opposition contemporaries disputed our statement and the conclusion based upon it, but we are now able to re-assert, with the concurrence of an indisputably good authority, that the facts were as alleged.

The St. John, N. B., *News*, in discussing the trade prospects of the city in which it is published, completely confirms our statements by saying:—"More or less may always be done here in the shipbuilding department. But the palmy days for shipbuilding in St. John are gone, never to return, for the simple but all sufficient reason that the wooden sailing ship's palmy days are gone the wide world over. The wooden sailing vessel, large or little, will probably always within certain limits find employment for the carriage of bulky articles. But the ship of the future will be preeminently a steel steamship. The iron built sailing ship had long ago become a dangerous competitor for the wood-built sailing vessel, and the iron-built steamship still more so. Latterly, however, in consequence of the wonderful discoveries cheapening the production of steel, the steel steamship has been displacing the iron steam vessel. The substitution must go on. The steel ship is lighter, stronger and more enduring than the iron ship, and carries the larger cargo in proportion to displacement. Already the iron or steel steamship is seen smoking over every sea, and more and more drawing to itself the carrying trade between all the great ports of the world.

"Year by year, month by month, and week by week the iron or steel steamship extends its supremacy. There is no help for it. We may some day share in this iron or steel steamship building industry; but we can never bring back or renew the glories of the old wooden shipbuilding times. Never, and we had better face the fact boldly, though what can yet be done profitably should be done."

The Sault Ste. Marie Railway.

The Montreal *Gazette* devotes an editorial article in its issue of the 13th to the above project, which is of great importance to Belleville, and of which it says:—"The scheme is one in which the people of Ontario take a very deep interest, and when it comes to be thoroughly understood it will present attractions to the merchants of Montreal which we venture to think will enlist their hearty sympathy and assistance in its support. A charter was granted in the last session of the Ontario Legislature for the construction of a line from the district of Muskoka to the Sault Ste. Marie by way of the north shore of the Georgian Bay. The distance from any point on the Midland Railway, in the neighborhood of Coldwater, to the Sault Ste. Marie by this route, is estimated to be about 320 miles. An examination of a map will show the importance of this projected line of railway. At the Sault Ste. Marie it will connect with an extension, now being constructed, of the Northern Pacific line, and thus form an additional route to the Northwestern States, to Manitoba and the Northwest Territories of the Dominion. From the Sault Ste. Marie to Toronto by this line, using the Toronto & Nipissing Road, the distance is only 429 miles. The distance from Toronto by the shortest route, using the Ontario & Pacific Junction line to Southeast Bay, the Canadian Pacific line from Southeast Bay, and the line proposed to be constructed in connection with the Canada Central Road, is, we believe, 520 miles.

"The Midland Railway Company is taking an active interest in promoting this line to the Sault, with which it will connect at the point of junction at or near Coldwater, and by it the Ontario and Sault Ste. Marie line will have the advantage of reaching Lake Ontario at Port Hope; while, under the legislation of the Ontario Legislature, having the right to exercise running powers over any and all lines which have received Provincial aid, it will be able to connect with the Grand Trunk at Belleville by running over the Grand Junction Railway from Peterborough to that point. It seems to be understood that the Grand Trunk are favorable to the construction of the Ontario and Sault Ste. Marie road, and are willing to afford traffic facilities for both East and West bound business, whether going to Ontario or towards Montreal. The distance from the Saulte Ste. Marie to Montreal, through Peterborough and Belleville, is about 670 miles, whilst the distance by way of the north shore of Lake Nipissing, the Canadian Pacific and Canada Central lines is somewhere about 640 miles. The road from the Saulte Ste. Marie to Duluth, would form almost a straight line, and as the Northern Pacific is intended to connect with the Manitoba & South-Western Road, another direct line to Winnipeg will be secured when this project has been carried out."

Mothers! Mothers!! Mothers!!! Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it; there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle. 264ly

"THEY ALL DO IT." — Every body uses "Teaberry," the new toilet gem to beautify the teeth and give fragrance to the breath. Get a five cent sample.

An Unfortunate Result.

The efforts of the Grit press to make it appear that the country is on the down grade owing to the operations of the tariff, and to cry up the United States, have been productive of very bad results. Some people who are easily worked upon became dissatisfied with their employments in Canada and emigrated to the States, only to find that they were not nearly as well off as they were in Canada. Amongst others who have had an experience of this nature were five young women who left their employment as waitresses in the Dafoe House about a month ago and went to Chicago to seek situations there. In this they were unsuccessful, as three of them returned to Belleville a few days ago and applied for their old places; but these being filled, they were obliged to go to their homes, poorer but wiser girls. The others are still in Chicago, without money and out of employment, and would gladly get back to Belleville if they could.

Unfavorable reports have also reached the friends of several of the party of mechanics who went to Pueblo, Colorado, they having found work scarce there, wages lower than reported, and rates for board very high.

These facts ought to cause people to pay no attention to the blatant assertions of the Grit press, that the tariff is ruining the country. Our local contemporary has been particularly strong in assertions of this kind, and on the departure of any persons from this city or neighborhood, whether for any other part of Canada or not, the cry of "exodus" has been raised and the N. P. blamed for the movement. When people read such statements, let them reflect that a removal from one place to another within the Dominion cannot be because of any possible effect of the tariff, and that, as above shown, there are very many who do not succeed in the United States.

Another Prop Gone.

Day by day as the Canadian Pacific Syndicate are getting things into shape, they are knocking the arguments used by the Opposition when the question was before Parliament, into a thousand pieces. The Montreal *Gazette* thus shows how another of their pet points is exploded:—"Another prop has gone from under the Opposition in their agitation against the Pacific Railway Company and the contract entered into with that Company for the construction of the railway. There was no clause in the contract which they dwelt on with greater earnestness, and, we are bound to say, with greater apparent effect in addressing especially city audiences, than that which authorized the Company to import free of duty certain material to be used in the original construction of the railway. This, we were told, was an attack upon the National Policy. It was a direct inducement to the Company to buy their supplies outside, and manufacturers were appealed to to resist this insidious blow at the policy of protection and at the interests of Canadian iron manufacturers. This prop is gone. On Wednesday last the Company gave an order for six hundred tons of spikes to Messrs. Peck, Benny & Co., of this city." That does not look very much like buying supplies from foreigners. It does look very much like a vindication of the arguments used in favor of the Syndicate that it would be to their interest to get all they possibly could in the way of supplies from Canadian manufacturers.

Editorial Notes.

FEARS, IDLE FEARS.

The local organ of the Grit party is in a terrible state anent the redemption of the promises which the Government have made as to public works in this locality. It fears that the light house will not be lit up until the fall; that the public building will not be gone on with; and that nothing more will be heard of the Murray Canal until the next election. Such ideas are the mere outcome of a diseased imagination—groundless, and in fact utterly without reason, other than the desire to discredit a Government which has taken a liberal view of the requirements of this city and this portion of the country, which the late Government shamefully neglected. Our rulers have already carried out the promise to build a light-house here, and, despite the fears of the local echo of the *Globe*, it will be supplied with coal oil at a very early day, placed in charge of a competent person, and devoted to the purposes for which it was erected. Thus, the Government having redeemed one promise, what better guarantee could be given that their other promises will not be fulfilled? To express such doubts as are above indicated is to utter so many absurdities, with which the writer will not care to be confronted hereafter, when the event has falsified them. Were the Mackenzie Government still in power, there would be no occasion for the expression of fears in regard to public works in this locality, for the very good reason that they would not have been undertaken. The Grit party attend chiefly to the requirements of the western part of the Province, whence their chief political strength was derived.

A CONTRAST.

Telegraphic accounts continue to reach us daily of disastrous floods in Dakota, Minnesota, Kansas, and others of the north-western, western, and even south-western States and territories. These floods are of course the result of the tremendously heavy snow-fall of the past winter in the country which is drained by the Mississippi and sundry of its tributaries, and which was the cause of much suffering, loss of human life, and destruction of valuable live stock. The freshets have proved more destructive than the snow and frost, and the loss of property caused by them has been immense. No such reports come from the Canadian North-west, where the winter was severe, but where the snow-fall was little, if any, heavier than usual. In fact the climate of the North-west is steady, the snow-fall never exceeds a certain depth, and blizzards such as desolate the North-western States are unknown. It is in every respect a better country than that to the south of the line, and Canadians who think of going west ought to be warned by recent occurrences against making their homes in Dakota, Minnesota, or Kansas. They will find within the Dominion cheaper lands, a better climate, and laws and institutions to which they are accustomed.

IMPROVED STOCK FOR CANADA.—The London (England) *Post* of April 14th, has a paragraph referring to the sale of Clydesdales at Merryton, near Hamilton, and at which Simon Beattie purchased several animals for shipment to Canada. The stallion Lord Harry, the leading purchase, was bought for 400 guineas. The stallion was once ridden in an unexpected and dashing style by the late Prince Imperial when, some years ago, he visited Merryton in company with the Prince of Wales. Mr. Beattie also purchased the blood mares:—"Leoline," "Prima Donna" and "Lovely" at 180, 90 and 100 guineas respectively.

In cases of Chronic disease which doctor have failed to cure, Burdock Blood Bitters has achieved its greatest triumph. All diseases of the Blood, Liver and Kidneys, scrofula, Dyspepsia, Nervous Debility, Rheumatism, Piles, Female Complaints and all forms of lost Vitality are promptly cured by this great renovating tonic. Trial bottles only cost 10 cents.

Beaconsfield and Gladstone.

Of Beaconsfield and Gladstone, in his Sunday sermon, Mr. Beecher said: "Two great natures had been struggling for superiority in England. One was now gone, the other holding the reins of power. It was not generous to speak harshly over a man's grave, but what had Beaconsfield done that would live in literature or statesmanship or inspiration to the human race? What new truth had he discovered, or what old one had he brought out in a fresh light? What noble ideas or advance in society or single quality had he made more resplendent? There were some names in history that were like a pyrotechnic display. They burst brilliantly into view, were admired by the crowd till the wheels were stopped, then they were forgotten. Beaconsfield's life was ended, and he had left nothing but a name, but when that other man, now high in authority, died, he would leave many works, not merely of a scholarly nature but an example of courage for the right, of ambition for advance in noble qualities, and of Christian statesmanship, which seeks for the best by the best way. He could carry England through the transition period in which she now lives. Mr. Beecher honored and revered Gladstone as a Christian statesman. There was not another like him, not even in Germany. Have we such a man here? No, he said. We have politicians, and many of them, but no man of eminence who lives for others. May God send us such a man."

That this prejudiced estimate of the deceased statesman is not shared in by all intelligent men amongst our neighbors is shown by the following comments of the New York *Commercial Advertiser*:—"The contrast between Beaconsfield and Gladstone, portrayed by Mr. Beecher in his sermon yesterday, will not be accepted as a perfect one by many intelligent people, who are quite as capable of comparison as the eloquent preacher of Plymouth Church. Had he finished his unheroic oratory with the first sentence he pronounced the world would know he feels that "over the grave no generous heart wishes to speak of faults." While the plaudits of the Christian ministry for semi-radical Gladstone may grow plainer with the growth of time, Beaconsfield will never cease to be as prominent a figure in the history of England and her literature as any she has produced."

N. P. Notes.

The Halifax *Herald* publishes a list of twenty-seven vessels, of 23,000 tons, that will be launched in Nova Scotia this season.

The Nova Scotia Glass Company is now regularly organized, and is to commence operations at once. Tenders for the erection of buildings are asked for, and the contract for the furnace has already been let. Stock is being readily subscribed, and every effort will be made to put forward the works with all possible speed so as to overtake the fall trade.

At the next meeting of the London Council a communication will be read from Mr. Fox, of Hamilton, who proposes to establish a scale factory in the former city. All he desires is exemption from taxation for five years, and for this he will guarantee to employ a large number of men. It is probable the request will be granted on certain considerations.

It is expected that the subscription list for the projected cotton company at Toronto will be opened next week. The capital is to be $1,000,000 in $25 shares, and a large proportion of the stock will be taken by English capitalists. Twelve hundred will find employment, the site of the new mill, as already stated, to be in the neighborhood of Garrison Common.

Another new knitting factory has been started at Berlin.

One cotton factory has orders which will occupy it until October next to fill.

The sales of coal mined in Nova Scotia during the quarter ended March 31st, are given at ninety-three thousand five hundred and thirty tons, an increase over the sales of the first quarter of 1880 of nearly seventeen thousand tons.

The contract for seven new locomotives for the Intercolonial Railway is awarded to Messrs. Fleming & Son, of St. John, N. B. The contract for 75 coal cars was awarded to the Cobourg, Ont., Car Works, and for 50 flat and box cars to Mr. Harris, of St. John.

The Wheat Duties.

It is reported on 'Change to-day, on the authority of a prominent miller, that the Government has determined to grant the request of the delegation of millers which waited upon the Honorable Minister of Customs with regard to the wheat duties. The petition was that instead of being forced to export the very product of the imported wheat, merely the equivalent in flour of any wheat, Canadian or other, be available to cancel the bonds. Of course this does completely away with any protection that the former may have enjoyed, if he ever enjoyed any, which is very doubtful. On the other hand it will enable the millers, so they claim, to secure a monopoly of the flour trade, and crush the flour importers by underselling them. It seems pretty clear that the consumer will not suffer at all events. Will the millers be allowed to cancel the bonds held by the Government for wheat imported last year? If they be allowed then the Government will be presenting them with a bonus of $50,000 or $60,000. The amount of duty owing the Government at present on the 410,000 bushels of wheat which is supposed to be in their mills being ground in bond, but which in all probability has passed into consumption long ago. The duties are not fair to the miller or to anybody else, and the only way in which they can be properly is by abolishing all duties on breadstuffs, both wheat and flour. Importers of flour have at present a decided advantage over the millers, that is if the duties are exacted."

So says the Montreal free trade *Witness* of 28th April. We have no doubt this journal, which is more concerned about what it can find to growl at than the good of the country, would be delighted to learn that the Ministry had done something upon which to base an attack and cajole the farmers into the belief that their interests were made subservient to those of the miller. We have good reason to believe that there is not the remotest chance of the Ministry changing the present Order in Council, which compels the exportation of the *product* of the wheat imported, and not its "*equivalent.*"

FIRE IN PRESCOTT.—A destructive fire occurred in Prescott yesterday morning. The fire took place in Buckley's Block, which was entirely destroyed. It then spread to the store and residence of Mrs. Carey, which was quickly in a mass of flames, and in a short time was entirely consumed. The fire spreading west attacked the Mechanics' Block, and in a short time that part owned by Nesfield Ward, and occupied by J. V. Miller, was consumed, with the exception of the lower story, which was fortunately saved. The fire spreading over the roof from that part of the block owned by N. Ward to that part owned and occupied by S. M. Coons, did considerable damage to the roof and interior—also to the roof of Thomas Coate's portion. The large building west of Mrs. Carey's owned by John Hugeson, though standing the fire best, had at last to succumb and was also destroyed. The firemen of Ogdensburg with their engines rendered valuable assistance. Messrs. Chamberlain & Co., are probably much the heaviest losers. Mr. Strohmyer was absent in Montreal, and his family had to beat a hasty retreat. Mrs. Strohmyer, it is said, lost $700 in money and a gold watch, which had been placed under her pillow for safety, and in the excitement was forgotten. Loss about $50,000; partly covered by insurance.

Correspondence.

Whilst correspondents will be accorded space for the expression of their ideas on topics of public interest, it must be in all cases understood that the views so expressed are simply those of the correspondents themselves.

East Northumberland.

To the Editor of the Intelligencer,

DEAR SIR,—We have heard a good deal in reference to the vote in East Northumberland but looking at it fairly and squarely there is no doubt Mr. Kennedy received the actual support of the general Conservative party, and if beaten we will for the present accept the defeat.

There may be a few lukewarm Conservative voters that did not vote for Mr. Kennedy, pressure of a peculiar nature being brought to bear, but I for one am convinced that Mr. Kennedy received the general Conservative vote of the riding, simply because he announced himself a Conservative and was the nominee of the party, and did not stoop to any low chicanery as to his particular religious belief.

I would ask my Grit friends how would the majority have been if they had brought out a Catholic Grit in East northumberland? Then we would have seen that the Reform vote would be hundreds less than the present vote. As proof of this we see the lack of approbation in connection with the late Catholic appointments in Hastings that has been made by the party of purity here. Why do not there *defeated* and *elected* candidates come forward over their signatures and stand by the men that stood by them and say that the party they represented are perfectly satisfied with these appointments, and not throw the whole blame on Fraser and his Government in Toronto? Why not help the men who carried them over the bridge, and publicly acknowledge it? Time works wondrous changes.

A CATHOLIC CONSERVATIVE.

A Time-Worn Suit Decided.

The following account of a time-worn suit, lasting 28 years, we take from the Montreal correspondence of the *Mail*:—An important case was decided in the Court of Appeals which has been in litigation here for many years. Mr. Miller, the appellant, in 1851 became acquainted with the Connolly family, composed of four sisters and one brother. One of them became his wife; another was Mrs. Coleman, while a third had taken the veil and entered a nunnery. Mrs. Coleman and Mrs. Miller were the only members of the family who ever married. Mr. Miller was a successful merchant and became, so to speak, the center of the family, which was in rather reduced circumstances. In 1852 Mr. Miller began to advance money to Mr. Coleman, his brother-in-law, who died in the same year. The appellant continued to advance money to the widow, who had two daughters, one of them Mrs. Globensky, the respondent. The other died single. After the death of Mr. Coleman his widow and her two daughters came to reside at Mr. Miller's house. The deceased Mr. Coleman had only one piece of property, situated in Belleville, and consisting of a mill and two houses which produced an income of about $500 per annum. This property was heavily mortgaged. Mrs. Coleman administered this property until her death in 1853, when the mortgages were left unpaid, and her two daughters consigned to the care of Mr. Miller. Catharine Connolly, who also had come to live with him, died in 1855, and Mrs. Miller the following year, so that Mr. Miller alone remained with his two nieces, the Misses Coleman. One of the nieces died in 1861, leaving the respondent alone. In 1868 the remaining niece became of age and married Mr. Globensky. Soon after her marriage she brought an action against Mr. Miller asking an account of the estate of her father and mother. In the interval since the death of Mr. and Mrs. Coleman, Mr. Miller had paid off the mortgages on the Belleville property. He answered to this action by rendering a minute account of his administration, claiming that he had spent $20,000 more than he had received from the estate. Although the evidence was confined to Mr. Miller's own statement, he was condemned by Judge Sicotte to pay $41,378 to respondent, the court holding that though never appointed a tutor he had acted as such, and was accountable in the same stringent manner as a legal tutor. A penal clause was attached to the judgment condemning him to go to gaol until the amount should be paid in principal, interest, and costs. The amount was so heavy that he could not afford to give security for the principal. While he appealed from the judgment he availed himself of a provision of the law which allowed him to declare that he did not object to the execution of the judgment, so that he was only bound to give security for the costs of appeal. The case in the Court of Appeals was a very heavy one on account of the number of details, extending over a period of twenty-eight years. The appellant was represented by Messrs. A. & W. Robertson, with Mr. Joseph Doutre, Q.C., and Mr. Strachan Bethune, Q. C., as counsel. The respondent was represented by Mr. A. L. Coste, Q. C. The argument of the case lasted five days. By the judgment which has just been rendered the judgment of the court below has been revised, Mr. Miller completely freed from all money indebtedness, and the respondent condemned to pay him a sum of about $1,000 on an incidental demand. The parties were to pay their own costs in the Superior Court, and the respondent to pay all the costs in appeal. Mr. Justice Baby dissented from the judgment, which was rendered by the Chief Justice and concurred in by the remaining judges.

The Hop Market.

(*From the Montreal Gazette.*)

There has been very little doing in this market for the past two or three weeks, the last sale we heard of being made a few days ago at 19c for a pretty fair sample, and we quote 19c to 21c nominally for good to choice. Advices from the English market, dated London, April 13th says:—"General business is of a retail character, and with buyers quality seems secondary to price. Last week a hundred bales of low grades sold at 99s@95s. We see no reason to reduce quotations and feel sure that brewers will be glad of every bale obtainable before the next crop comes on the market. Stocks are now barer than ever before at this time of the year, and there will probably be nothing to carry over into the new season. We will shortly send you some statistics regarding the supply, etc." The New York *Bulletin* says:—"The shipments and the purchases for export the past week more than equal the receipts from the interior, and in this we have at least one encouraging feature. There are, however, more favorable influences at work, for we learn of increasing orders from brewers and somewhat more numerous purchases on their part, while it is known that a large English brewer is negotiating in the London market for an amount of hops that can be secured only by drawing upon the United States for the greater portion. As compared with last week prices show no quotable change, but on the strength of purchase of several hundred sales of fair to good quality for export at 18@19c, the market is looking decidedly firmer in tone. The few firms holding strictly prime and choice grades are refusing less than 22@23c and 24c respectively but on the lower grade the buyer is occasionally granted some little favor."

EXPORT OF HORSES.—An American exchange says that "Canada horses are getting decidedly numerous on this side of the St. Lawrence, and the business of importing them seems to grow larger every year. The shipment of horses to the United States from Canada since January 1st has been unprecedented in the history of the trade. During that period over 3,000 horses have been exported to the United States, costing over $240,000. As the duties are twenty per cent *ad valorem*, the United States Customs have received some $50,000 therefrom. The average figure paid by buyers was $86.83 per head."

The Lips We Love to Press inclose pearly teeth, and exhale fragrance when opened. If this double charm were wanting, they would lack their attraction and probably remain unkissed. SOZODONT will secure it. Discoloration of the teeth, unhealthiness of the gums, and a breath which causes repugnance, are completely remedied by this incomparable beautifier and antiseptic of the teeth, which is as pleasant to taste and smell as it is reliable in its action.

REMINDERS.—Bellmen were appointed in London in 1556, to ring the bells at night and cry, "Take care of your fire and candle, be charitable to the poor, and pray for the dead." We are constantly reminded by circumstances to take care of our health, and preserve in a proper way our bodies. This, alas! is too often neglected. The dyspeptic and bilious are induced to make a trial of some drug or patent medicine, which often aggravates the malady. Be sure and provide yourself with Baxter's Mandrake Bitters; they are highly prized by all who have used them, as the most effectual cure for all disorders of the stomach.

News Condensed.

—Aurora (Ill.) is to be lighted by electricity.

—The Lowell (Mass.) bricklayers demand $3 per day.

—Hamilton (Ont.) coal heavers are the next to strike.

—There are said to be 17,000 vacant houses in Quebec city.

—The election of Mr. Irvine in Carleton, N. B., is to be contested.

—The machinery is being put up in the Knitting Mill at Kingston.

—Smallpox hospital nurses in Chicago struck for an advance in wages, and got it.

—Capt Coulson, of the 60th Rifles, formerly A. D. C. to Lord Dufferin, has arrived in Quebec.

—Sir Charles Dilke stated yesterday that negotiations were still proceeding relative to the Fortune Bay affair.

—The Danish Government organ officially denies the reports regarding the illness of the Empress of Russia.

—The mass of scientific workers in England are described as belonging to the middle and "the very middle class."

—The British Government intends on Monday to ask leave to introduce a measure amending the Parliamentaay Oath Act.

—On the 29th inst. Mrs. Roch, living at Grand Island, Nebraska, murdered her two children and then committed suicide.

—Chief Justice Ritchie has been elected President of the Art Association of Canada of which the Governor-General is patron.

—Evangelist Moody raised an $80,000 debt for the San Francisco Young Men's Christian Association during his labors in that city.

—A condensed milk factory has commenced business in Shawangunk, Maine, and at present receives 7,000 quarts of milk daily.

—A petition is in circulation on the American side of Niagara Falls to have the name of the place changed to that of Cataract City.

—During the winter a large number of neat houses have been erected on the Thousand Islands, on the Canadian as well as the American side.

—Riotous demonstrations against the Jews have taken place in West Prussia and in Russia some residences and a synagogue having been destroyed.

—The giving away of a large flume at Chaudiere has closed down the flouring mills and planing factories which were supplied with power by it.

—Mrs. Louisa G. Allan, the foster-mother of Edgar Allan Poe, died recently in Richmond, at the age of 83. She was a cousin of General Winfield Scott.

—Wise and Plaisted have signed articles for a three and a half mile race on Toronto Bay in 18 feet lap-streak boats, for $300 a side, on the 8th of June.

—The Canadian wrecking tug *McArthur* left Windsor yesterday to release the schooner *Kingfisher*, which went ashore last fall near Port Burwell, on Lake Erie.

—An extensive bed of salt has just been discovered at Port Clarence, near Middlesborough-on-Tees, Durham. The bed lies at a depth of 1,000 feet, and is 99 feet thick.

—It is reported that the Canada Pacific Railway Company will build extensive car works in Brockville, provided the corporation give them land on which to build the said works.

—The number of lives lost by the capsizing of the ferry-boat at Elgin, Ill., on Thursday is now placed at eight. Owing to the swiftness of the current none of the bodies have been recovered.

—Last week John Mance, of Chicago, gave his wife $300 to put in a safe place. Having one hand full of papers she intended to burn and the money in the other, she threw the bills into the fire.

—At present there are 279 prisoners in the Central Prison, Toronto, being about 70 less than during the same period last year. The Warden attributes this to the improved times in the United States.

—The following British regiments, in addition to those already wearing the kilt, will adopt it, viz.: the 72nd, 73rd, 75th and 91st. All other Scotch regiments will wear trews and the Highland jacket.

—The Rat Portage *Progress* and the Winnipeg *Times* contend that the Ontario Government has no right to establish civil courts in Keewatin, the disputed territory, and that the decisions therein are worthless.

—The Winnipeg *Times* calls attention to the fact that while the past winter has been exceptionally severe in every other part of the world, it has been mild and agreeable throughout the Canadian North-West.

—English colonists just arrived in Manitoba have purchased 10,000 acres from the South-Western Railway Company for $4 per acre. The price paid by the Company was $1 per acre, which leaves a very handsome profit.

—A Toronto man writes to a paper in Toronto from Saginaw City, Mich., that the streets there are filled with Canadians vainly hunting up jobs. If they could earn enough to take them back to Canada they would be off at once.

—According to a St. Petersburg correspondent the state of affairs in Russia is much like a great political volcano, ready to annihilate the Imperial structure at any time. The Czar's seclusion has a bad effect, as it is looked upon as a virtual abdication.

—It is expected that the United States Government will be compelled to supply food for some two thousand five hundred destitute persons who have lost their all by the floods along the Missouri valley. Some lives have also been lost during the inundations.

—A meeting of the Toronto Labor Union was held in Albert Hall, Toronto, on the 29th. The memebers decided to reject the offer of the employers to give $1.30 per day, and that unless the increase demanded, $1.50, be granted, the members will strike on Monday.

—The *Globe's* Ottawa correspondent says that the honor of Knighthood will shortly be conferred on Hon. Alex. Mackenzie. The correspondent says the latter gentleman, it will be remembered, refused this distinction, but it is understood he has consented to accept this recognition from his Sovereign.

—The Princess Louise, attended by the Hon. Harriet Phipps, on her return from Italy spent three days in Paris, and arrived at Osborne on the 13th inst. Prince Leopold attended by Captain Waller, met the Princess at Portsmouth, and accompanied her to Osborne in Her Majesty's yacht *Alberta*, Captain Thomson.

—A Toronto report says:—It is rumored that a member of a well-known firm of sash and door makers in this city has absconded with a goodly sum of money. As a sequel the works have been closed, and from twenty to thirty workmen, who have also to mourn the loss of their wages, have been thrown out of employment.

—The Kingston *Whig* says a painful and nearly fatal occurrence took place at Benjamin & Connelly's mine, Sydenham, on Wednesday. Four men were working taking out mineral. While two of them, Hill and Schultz, went to remove a blast it suddenly exploded. The men were badly injured and bruised, but not fatally.

—The nobby one-horse Herdic cabs, so successful in Washington, are to be introduced into Cleveland, and will doubtless be popular everywhere. The Cleveland line will number twenty-five cabs, and a uniform fare of five cents will be charged. We believe that English hansoms, on which the Herdic cabs are modelled, are to be started in Montreal.

—The production of maple sugar this season has been immense. Two of the handsomest maple groves in the State of New York are at North Harpersfield, Delaware county. They contain 4,200 trees, and furnish seven tons of sugar. In 1875 there were 200,000 pounds of sugar made in the town of Harpersfield, and it is estimated that the production this year will exceed that enormous quantity.

—A cable despatch from Limerick, April 29th, says:—An attempt to evict tenants at New Pallas to-day was frustrated. Five hundred military and police were present, but a mob of five thousand persons hooted and groaned and stoned the sheriff and his assistants. The police charged the mob several times, but the bailiff's life being threatened he refused to point out the houses of defaulting tenants. It is stated that two hundred persons in the mob were armed with revolver. Another attempt to evict the tenants will be made shortly.

THE SECRET OF HEALTH.

Keep the pores open, the digestive organs free from obstruction, and the blood and bile pure with an occasional dose of HERRICK'S SUGAR COATED VEGETABLE PILLS, and you are safe. They never fail in any case of sickness or inward pain. Try them.

"Hail bounteous, beauteous, gladsome Spring" — this was Mark Twain's prize poem—but the dire diseases incident to Spring, spoil the romance. Burdock Blood Bitters is the prize remedy, the remedy prized by all who have tried it as the best Blood Purifying Tonic and System Regulator in the market. It cures all Blood Humors from the worst Scrofula to common pimple. Sample Bottles 10 Cents, for sale by all dealers in medicine.

DYSPEPSIA.—Strengthen your digestion, tone the stomach for utilizing and assimilating every atom of food you take, the body needs it for strength and vigor. *Zopesa* cleanses the entire system, stimulates the liver, keeps you regular and able to eat ten-penny nails. Letters and postal cards come in daily extoling *Zopesa* from Brazil. *Positive proof* of health and vigor it gives, in a 10 cent sample. Sold by L. W. YEOMANS.

The Weekly Intelligencer.

Several of our exchanges have noticed in a very kindly man the improvements recently effected in WEEKLY INTELLIGENCER, for which m of appreciation we thank our brethren the quill. In order that our readers mote the opinions of those most qualified pronounce, we present the following qtions from the journals to which they credited:

IMPROVED.—The Bville WEEKLY INTELLIGENCER comes to l in eight page form, greatly improved in s and appearance. It is an excellent paper deserves the success with which it is appaly meeting.—*Picton Times.*

NEW FORM.—The eville WEEKLY INTELLIGENCER came to ast week in a new form. It has been ched to an eight page paper. The INTELLIGENCER is one of the best, if not the best ducted weekly in central Ontario. West that the expense incurred in the changey be rewarded by an increased patronag—*Brighton Ensign.*

The Belleville WEEKLY INTELLIGENCER finds its way to our o in an improved form. It has been chad to an eight page, with a new headingd is now classed among the largest week published in the Dominion.—*Cobourg Sael-Star.*

The WEEKLY INTELLIGENCER, eight pages, is a credit to the publiss. It indicates an amount of enterprise the worthy of special mention.—*Kingston Wi*

The Belleville WEEKINTELLIGENCER has changed its form to an et page journal, and it is now one of the fineweekly papers in the Dominion.—*Colbornepress.*

The weekly edition of, BELLEVILLE INTELLIGENCER has been lght out in the eight page form and in v handsome style. The copy of the paper weceived is beautifully printed, well arraxl and crammed with the latest and mcnsteresting news. Such enterprise on the paof our contemporary is most commenda, and cannot fail to bring its remunerativreward.—*Ottawa Herald.*

The WEEKLY INTELLIGENCER of last week came out in a changed fo—and now contains eight pages instead oour. The matter is well arranged and thontents are both varied and interesting Thaper now ranks amongst the best in easternntario, and the recent improvements shouldsure it a still greater measure of support.—*Picton Gazette.*

The Belleville WEEKLY INTELLIGENCER has changed its form to an eight ge paper. It is now a first class weekly jotal that should be the subject of fault by no bscriber, and is deservedly worth its subsction price.—*Campbellford Herald.*

The Belleville WEEKLY INTELLIGENCER finds its way to our office inn improved form. It has been changed to eight page, with a new heading, and is nowassed among the largest weeklies publishedn the Dominion.—*Trenton Courier.*

The WEEKLY INTELLIGENCERas changed its form, appearing now as a eight-page paper, The new issue is slightllarger than the old; the general appearan is much better; while for preservation t change is a decided advantage.—*Stirling Ns-Argus.*

The WEEKLY INTELLIGENCER a changed from the blanket sheet to an ght-page, fifty-six column paper, and is otherwise considerably improved. The chge is a decided improvement, and makeit one of the best weeklies in Canada, outsi of the larger cities.—*Trenton Advocate.*

ENLARGED AND IMPROVED.—Our steemed *cotem*, the WEEKLY INTELLIGENCER, has adopted the eight-page style, and ces out considerably enlarged and improved. It now ranks among the neatest and best wei s in the province.—*Madoc Review.*

FALLEN FLAT.—The London *Free Press* says: Nothing has fallen more flaupon the ears of the people than Mr. ake's demand for a federation of the Empi. It is felt that it does not touch any Cadian requirement, and is more of a politicallaything than a practical necessity. Thfederation that requires consolidating byood government is the Canadian Confederaon. There is enough in that to tax the enegies of a dozen Blakes for the next half centry.

—Castings for the charcoal works at Kingston have arrived from Syracuse.

DR. WILSON'S

PULMONARY CHERRY BALSAM!

This established fact is a wonderful one to contemplate, and while it remains, there is hope for the the sick and suffering from that terrible disease. This wonderful balsam is composed of various vegetable materials of the purest kind, each performing an important work.

THE WILD CHERRY

acts as a tonic to the stomach, giving a healthy appetite and assisting in converting the food into bright healthy blood, and at the same time exerts a soothing sedative action on the heart and large blood vessels. To the wild cherry as a base is added

AN INGREDIENT

which has a special solvent action on the tough stringy phlegm which clogs the air tubes and cells so that it is easily expectorated. Then there are the gum resins of the

WHITE PINE AND FIR

of Southern climes which assist the ulcerated tissues to heal. To these are added a

BLAND LUBRICATING FLUID

which acts as a healthy secretion of mucous does by coating the mucous membrane and keeping it soft and pliable.

ALL UNITED

assist each other to bring health to those whose throat or lungs are diseased and

HUNDREDS OF TESTIMONIALS

prove their great worth and the good they have already done.

Sold everywhere at 25 cents and 40 cents per bottle.

J. W. BRAYLEY,
Montreal.

EYE, EAR AND THROAT

DR. G. S. RYERSON, L.R.C.P. and S.E. Lecturer on Eye, Ear and Throat, Trinity College, Toronto, and Surgeon to Mercer Eye and Ear Infirmary, late Clinical Assistant, Moorfield's Eye Hospital, London, England, and Central London Throat and Ear Hospital 317 Church Street Toronto.

Will visit Belleville on

Tuesday, May the 10th,

and can be consulted at the

DAFOE HOUSE.

THE LATEST.—Talk about your little and your big sensations, but the great sensation is at the store opposite the Anglo-American Hotel, where people are obtaining goods of all kinds at half the ordinary prices. This is the greatest chance ever offered the citizens of Belleville to obtain genuine roll plate jewellery of all kinds, gold and silver watches, plated goods that are reliable and as good as are sold in the city. As these goods will soon be cleared out, it is to your interest to call early and secure great bargains. A word to the wise is sufficient. R. PURDY.

Daily Intelligencer.

BELLEVILLE, SATURDAY, APRIL 30.

5 O'CLOCK EDITION.

City and Vicinity.

THE City Council meets on Monday evening.

THERE was no stock market report from Montreal to-day.

Dogs have lately worried a number of sheep in Rawdon.

Two tramps shared the police cells between them last night.

THERE was another blank sheet at the Police Court this morning.

MRS. VANALSTINE and her daughter Annie left for home yesterday afternoon.

A FAKIR on the market square this morning did good business selling "notions."

ON Monday Messrs. McMullen will assume entire control of the Prince Edward Railway.

A NEW cheese factory has been erected on the farm of Mr. Sampson Grey, near Marysburg.

SEVEN more cars of ore were brought down this morning. The shipment of ore steadily continues.

THE public well on Cedar Street needs attention. The pump was taken out of it nearly a week ago.

A SERMON to young men will be preached to-morrow evening in Bridge St. Church, by the pastor, Rev. Dr. Jeffers.

MINIATURE bonfires are seen in every direction just now, the result of cleaning up for spring gardening operations.

WHY is the new lighthouse like the business of the local junk-shop keeper?—Because it is based upon *crib*-work.

THE service of watering Front Street was very badly performed yesterday, the dust blowing about the street in dense clouds.

A DOG belonging to Mr. Geo. Walton was run over by the G. J. R. construction train last evening, about 6 o'clock, and killed.

A HUNTER who had been lucky enough to shoot a wild goose, offered the bird for sale on the market this morning. It was a fine specimen.

MR. W. R. GOODWIN recently received a large number of fine game eggs, of the best breed, from England. Forty-nine arrived unbroken.

THE Italian Band have not been regaling us with music during the past ten days. Northwest winds and Italian music do not agree well together.

The first shipment of cheese of this season's make, consisting of one car load, was made to-day by Mr. Watkins. The price paid was 12c per pound.

THE annual meeting of the Rowing Club will be held on Monday night. Every member, and all those who intend to join the Club, should attend.

YOU may talk of the lean and hungry Cassius, but did you ever take a side view of the man who has run a store for ten years without advertising.

BY whose authority is rubbish still deposited on the vacant lots adjoining the foot of Dundas Street? It is time that this nuisance was put a stop to.

IT was almost cold enough for snow during this morning, but the weather is milder this afternoon, and promises to be favorable for the show this evening.

MR. JAMES A. ORR has become sole proprietor of the Trenton *Advocate*, which has been deservedly successful under the management of Messrs. Orr & Ward.

A FLOCK of wild geese flew over the city yesterday afternoon, and drew towards them the longing eyes of local sportsmen who love to indulge in wild-goose chases.

LAST Saturday the body of Mrs. Jenkins, of Marmora, who was supposed to have been drowned in February last, was found floating in the river two miles below the village.

THERE was a large market this morning both both the square and butter market were more rapidly emptied than usual, their occupants being anxious not to lose the sight of the parade.

FIGHT life's battles in the easiest way. Remember that it is the sutler, and not the soldier who makes money out of war.—[*Boston Transcript.*] Yes, the easier way is the su(b)tler way.

THE date for the next performance of the Histrionic Association—"The Ticket-of-Leave Man"—has been fixed. It is to take place on Thursday evening, May 12th, in the Metropolitan Hall.

MR. DAN DAVY, lessee of Hog Island, was in town yesterday. He is fitting up the island as a summer resort and has already rented twenty cottages. He will procure a number of skiffs for the use of his patrons.

JOHN SHEA, city bill poster, has erected a large new board on Bridge St., opposite the Dafoe House. It received its baptism of paste yesterday when the fine bills of the "My Partner" company were posted on it.

THE runaway of Mr. Pullman's horse last evening suggests the propriety of taking some action to prevent merchants from sweeping the refuse of their stores on to the street in front. Spirited horses are often frightened by bits of paper that are swept out on the street and flutter in the wind.

A TREMENDOUS northwest wind prevailed during yesterday, which was almost as cold as it was strong. The tropical animals at the Agricultural Grounds felt it keenly, and shivered all day like half-drowned kittens.

THE LICENSE COMMISSIONERS met this morning and granted a license to A. Filion and an extension of 3 months to H. McKeown, both of Trenton. The consideration of the five City Licenses was deferred till Monday.

The small propeller Silver Spray was burned on the night of the 28th inst. in Picton harbor. Insured in the Western for $1,100; loss about $2,000. The cause of the fire is unknown. She had not been fitted out yet, and had no fire or lights on her.

DURING this week special services have been held in St. Andrew's Church every evening. The meetings have been largely attended, and a good deal of interest has been manifested by the congregation. To-morrow is Communion Sunday in this Church.

THE Montreal *Journal of Commerce* highly but deservedly commends Messrs Beatty and Johnson's "Canadian Accountant" as follows:—"The 'Canadian Accountant' should be adopted as a text book in every school in Canada, and should be among every private collection of books, however limited.

AN examination of young men on probation in connection with the Methodist Church, for the Peterborough, Lindsay, Cobourg, Belleville and Picton Districts, was held this week in Wesley Church, Trenton. The examiners were Rev. W. H. Laird, Chairman of Cobourg District, and Rev. S. Sing, of Bloomfield.

A SENTIMENTAL poetess asks:—"Is there nothing for me to do?" Oh! you bet there is. Return the flour you borrowed from the woman next door, patch up your husband's clothes, let poetry alone and turn up that old last year's bonnet. There's plenty of work to do in this world. When you wish advice, enclose a stamp.

THE Street Surveyor did not get Front St. perfectly clean yesterday, as he endeavored to do in order to have it well prepared for the procession this morning. But he had a gang of men at work this morning as early as 6 o'clock, and the street between the two bridges was as clean as it could be made before the day's traffic commenced.

THERE are thousands of men in this city who never would drink if they were properly fed.—[*N. Y. Herald.*] And there are thousands in this city who would never feed if they were properly drunk.—[*Toronto Globe.*] And there are hundreds of men in this city who would never be properly drunk if they were n't improperly treated.

ADVERTISEMENTS are news. They tell the readers what they want to know—where goods can be bought, what they are sold for, who has houses to rent or sell, who wishes to purchase real estate, where employment and labor can be obtained and a thousand other things, that they want to know. It is an error to suppose that only the editors and reporters supply news worth reading.

YOUNG Mr. Smith Jones is highly indignant at the report which has been circulated to the effect that he is married. The way the report got about is in this wise: An ancient maiden lady overheard him say to a friend on the street, "Well, I must go to my partner," and instantly informed her feminine acquaintances that Jones had a wife. Jones merely meant that he was going to see "My Partner" at the Metropolitan Hall on Wednesday evening next.

"THE truth is," says the philosopher of the New York *Times*, "spring is the most objectionable of all seasons. The weather is certain to be disagreeable, and no man can successfully adapt his clothing to it. It is a season when one is equally uncomfortable in doors or out of doors. Of every hundred successful lovers, at least ninety-five never make love in the spring. That malign season should be stricken from the almanac, and summer should be made to promptly succeed winter on the 15th of every May.

WEATHER PROBABILITIES.—Toronto, April 30.—Lakes: Winds gradually shifting towards the south and east. Fine and slightly warmer weather, probably followed by showers to-morrow.

BRIGADE CAMP.—It is probable that the whole brigade of this district will this year go into camp to-gether near this city. The annual drill will extend over 12 days this year, instead of 6, as heretofore.

REVIVAL OF THE LUMBER TRADE.—A very large straw, which shows unmistakeably that the wind of prosperity is blowing in our direction, is found in the fact that a local lumberman has been offered by an American buyer, for his whole season's cut, $1.00 a thousand more than he received at this time last year.

NARROW ESCAPE.—The Trenton *Advocate* says:—"On Wednesday last six men had a narrow escape from drowning in the Trent. The men, who were in charge of George Fraser, pilot, were on a crib of timber belonging to Thomas Buck, when the crib ran upon Prison Island, and broke in two, half remaining on the island, and the other half rushing down into the dam at Gordon's Mills, where the men were rescued."

THE FINANCE COMMITTEE.—This committee should have had a meeting last last evening, but owing to the absence of the Chairman no regular meeting was held. There were present—His Worship the Mayor, and Aldermen Costello, Smith, Ostrom, Petrie, Lingham and McIninch. Mr. John H. Gordon was heard with reference to an error which had been made in the assessment of a lot on Queen St., owned by him. Mr. H. E. Filliter was also heard regarding an error in assessment; no action was taken in regard to either case. After waiting about half an hour the Committee adjourned till Monday afternoon at 4 o'clock.

CHRIST CHURCH.—The adjourned vestry meeting was held last night in the Workingman's Hall. The auditors presented their report, which was received and adopted. A Building Committee composed of the Rector and Wardens and Messrs. H. Corby, jr. J. W. Campion, W. R. Carmichael, C. L. Coleman, Hon. L. Wallbridge, R. Cooper and W. Hamilton (Merchant Bank) were appointed, and requested to procure plans and specifications for a new church, also to correspond with the Executive Committee of the Synod, relative to the site for the new building, and to report to an adjourned meeting of the Vestry next Wednesday evening, to be held in the old M. E. Church.

WHERE WILL THEY WINTER?—An effort should be made to induce Messrs. Shelby, Pullman & Hamilton to bring their show to Belleville again when the season closes, for the purpose of wintering here. Very few people have any idea of the benefit which the city has received from this concern. To speak within the mark, it has left $5,000 among our tradesmen. We are informed us that the firm intend erecting large stables in the next place where they will winter the show, and will keep all the horses and animals there. In this case, a still larger amount of money would be expended here. It would almost pay the city to give them a bonus in order to induce them to come back to Belleville in the fall.

LIVELY RUNAWAY.—A little before 5 o'clock last evening Mr. Giles Pullman, of Shelby, Pullman & Hamilton, drove up to the store of Brignall & Thompson with a fine new covered buggy drawn by a handsome and spirited grey belonging to the same show. He tied the animal securely in front of the store and went in to make some purchases; but he had not been gone but a very few moments, when the horse, having become frightened at a bit of paper that was fluttering in front of him, began to rear and plunge, and finally broke loose from the stout rope which secured him. What then took place occupied less time than it takes to write this sentence. The horse dashed up Front Street like a flash of lightning, and the buggy coming in contact with the next lamp post, was smashed to fragments, which flew in every direction. The shock also shivered to pieces the lantern surmounting the lamp post. The horse then rushed across the street, leaving the wreck of the buggy behind him; but finding himself free of all incumbrance, he recovered from his fright and stopped on the sidewalk of his own accord. The buggy was about as demoralized a concern as could be imagined. Hardly half a dozen pieces of it were left hanging together. The road in the vicinity of the accident was strewn with the fragments. The horse, however, was uninjured.

SLIGHT ACCIDENT.—About half past two o'clock this afternoon an old farmer named Brown fell out of his waggon in front of the Prince Edward house, and had one side of his face badly scratched. He was picked up and carried into the sitting-room of the hotel. When the women who were present saw the blood on his face some of them set up a scream and declared that he was dead. And so he was—dead drunk. With the exception of the scratches on his face he was uninjured.

DANGEROUS.—Yesterday afternoon a large piece of slate fell from the roof of the market building to the sidewalk, just in front of the door of the Police Station. This is the second piece that has fallen within the last two or three days. We would suggest a careful examination and, if necessary, repairing of the roof in that vicinity. Should one of those pieces of slate fall on the skull even of one of the members of Shelby & Co's Zulu Band, it would be apt to cleave it as neatly as a bit of kindling wood is split by a hatchet.

NO. 1 CO. LITERARY CLUB.—A very lively debate occurred at the meeting of this club on Thursday evening. The address from the throne was the subject of debate, and the wordy war was quite as fierce and hot as it usually is in a real legislative assembly. Several amendments were moved on constitutional grounds, in the consideration of which the oratorical strife was the most desperate. The new Speaker Mr. Jas. Burdett, who was just elected in place of Mr. Badgley, (resigned), did not at all relish the responsibility of the position and at 1 a. m. on Friday morning, he incontently closed the debate by leaving the chair, declaring he had the power to "sit on" long-winded debates, the present Speaker of the British House of Commons having established precedent to that effect with regard to the Irish obstructionists. The debate on the address will probably be concluded at the next meeting of the club—we beg pardon—sitting of the House.

A TELEPHONIC SYSTEM FOR BELLEVILLE.—We are pleased to be able to announce that the want of a proper system of telephonic communication in Belleville, which we referred to in Wednesday's issue, is about to be met. The Bell Telephone Company has established a central office here and placed it in charge of Mr. S. R. Balkwill. The apparatus has been placed in an enclosed space in the office of Mr. E. Laroche, Bridge St., where it will probably remain until the business of the agency is large enough to warrant a removal into an office specially fitted up for the purpose. Mr. Balkwill has not yet begun to canvas for orders, but will probably do so early next week. Eleven of the Bell telephones are now in use in Belleville, but they are not connected with any regular system of communication. When the system is completed any one having a telephone will be able to communicated with anyone else having a telephone in any part of the city or district.

"MY PARTNER."—This celebrated American drama is to be performed in the Metropolitan Hall next Wednesday evening, May 4th, by one of the most powerful companies on the road, including the well-known star actors Louis Aldrich and Chas. T. Parsloe. "My Partner" was written by Mr. Bartley Campbell, the author of "The Galley Slave," "Geraldine," &c., and has achieved a far greater success in the States than anything which has hitherto come from the pen of this popular playwright. The following review of the play and company is from a Chicago journal:—In "My Partner" the simple story of true love and friendship is cleverly told from beginning to end, and there is a mixture of genuine pathos and humor that keeps the audience laughing through a rainbow of tears during the performance. No American drama reaches the heart of the people so completely, or leaves such a lasting impression. There is no meretricious sentiment or awkward effort at sensationalism in the effect, and the cleanliness, health, strength and beauty of the work recommended it at once to admiration. The part of "Joel Saunders," in the hands of Louis Aldrich, becomes a creation of dramatic strength and beauty, worthy to be placed beside the best delineations of outline. Mr. Chas. T. Parsloe has become well known as the best Chinese character impersonator. His Celestial ways and pigeon-English are a source of much merriment, and are evidently a close study of those Mongolians who immigrate to our land. Of the various actors who have undertaken to personate the Chinaman, Mr. Parsloe is a long way in the lead. The other members of this strong organization are well-known artists; as Frank Mordaunt, Dora Goldthwaite, Mr. Geo. R. Parks and J. W. Hague.

STREET PARADE.—Front St., on both sides, was lined with crowds this morning, assembled to witness the street procession of the Mastodon Show. The people were kept waiting for considerably more than an hour—the procession having been advertised to take place at 9 o'clock, while it did not pass down Front St. until nearly 11 o'clock. This delay, however, is not to be wondered at, seeing that this was the first procession of the season, and the employees have not yet become thoroughly accustomed to their work. The parade was, upon the whole, a good one, having at least the merit of variety. It was headed by the principal band of the show in their fine new band-waggon. Mounted people followed in costumes which were all apparently new and were certainly handsome. The next object of interest was the car surmounted by a huge gilded alligator, which opened and closed its great mouth mechanically. It looked realistic enough to cause an involuntary shudder in persons of weak nerves. An elk with sprouting horn, and led by a keeper, followed, and was an object of intense curiosity to many inquisitive dogs. The car on which a lady representing the "Goddess of Liberty" sat—supported by four other ladies representing England, Ireland, Scotland and America—was attractive more on account of those who sat in it than for any merits of its own. The next object of interest was the cannon from which M'me Zazel is shot. It was drawn by four horses, and M'me Zazel herself—a comely looking and nicely dressed young woman—was seated in front on the cartridge-box. In contrast to the grim looking cannon was the beautiful little car drawn by the two smaller elephants. It was resplendent with gilding and bright colors, and was surmounted by a large gilt eagle with wings outspread. A chime of bells in this car was played by a young lady as the car moved through the street. Two led camels followed slowly, and were succeeded in their turn by an open cage in which were two lions with their keeper in full view of the crowd. Broncho ponies trotted along, each led by an employee, and caused many expressions of admiration from judges of horseflesh. A Roman chariot driven by a lady costumed in the ancient Roman toga was followed by a clown with a donkey. The "Zulu Band, composed of several darkies in the supposed costume of the Zulus, were more interesting on account of their appearance than by reason of their music. The great elephant "Emperor," gayly caprisoned and led by his wary keeper on foot, brought up the rear of the procession. Besides the objects mentioned, there were about a dozen cages containing wild beasts. These cages were freshly paintad and looked brighter and cleaner than the average menagerie cages seen in a procession. Indeed everything in the procession had the appearance of just being taken out of the bandbox, so to speak.

The best Bargains in the City are:—A beautiful twilled silk Umbrella for $1; a very nice Zanilla Umbrella for 20 cts.; 11 yards of first class English washing Cambric for $1; 10 yds. of beautiful stuff dress goods for $1; 22 yds. of nice Embroidery for $1; a good suit of Halifax Tweed clothes for $6.50; to be had only at HENNESSY'S, the cheapest Dry Goods and Clothing house in town.

Belleville Cheese Market.

SATURDAY, April 30.

Buyers have now commenced to operate in this district, the market opening at 12c., which was the price paid for a car load that was shipped to-day—the first shipment of the season. Cable has advanced to 70s. for old, but there is no quotation as yet for new, which buyers expect to open at about 62s. The prospects are therefore on the whole, favorable.

HAGYARD'S PECTORIAL BALSAM is composed of the most healing balsams and gums. The Balsams, which enter into its composition, were used by the natives when America was first discovered, and are combined with other vegetable tonics, so blended together, that it is a specific for all affections of the throat and lungs. Thousands of bottles are used annually, and it is considered one of the standard preparations of the day.

Yachting Notes.

It is expected that the sloop *Gracie* will be selected by the New York Yacht Club to defend the America cup against the *Atlanta*. The *Gracie* has been, at all events, thoroughly overhauled of late.

A Yacht Club has been formed at Gananoque with a numerous and influential membership. A regatta will be given on the Queen's birthday.

The yachts now in sailing trim here are the *Gracie*, *Sylvia* and *Pinafore*. The opinion of those who had seen the latter under canvas this season is that the recent alterations made in her hull have considerably improved her speed.

The annual meeting of the Bay of Quinte Yacht Club will be held on Friday evening next, May 6th.

The steamer *Varuna* broke her wheel at Thompson's Point yesterday and was taken to Deseronto to have another wheel put on.

Show Notes.

A number of cars are being fitted up for the accommodation of the employees of the circus, which will travel exclusively by rail.

As the ordinary cars in use are not sufficiently high for the elephant "Emperor," a special car of the required height had to be procured for the carriage of the leviathan and his two lesser sized comrades.

It is expected that all the paraphernalia, accoutrements and belongings of the show will leave here to-morrow morning at ten o'clock.

The next stand will be made at Picton, then Cobourg, Bowmanville and Guelph follow.

The train will consist of 16 flat, 2 box, 1 elephant, 5 cattle, 2 first-class and 1 sleeping car—a total of 27 cars.

A LARGE crowd witnessed the first performance which was given this afternoon.

Marine Notes.

The schr. *Parthenon*, which went ashore at Wellington last fall, has been thoroughly repaired, and is nearly ready for launching.

The tug *Chieftain* has gone to Weller's Bay to haul off the schooner *Garibaldi* which was driven ashore there in one of last fall's gales.

The Welland Canal will open for navigation *via* the feeder, on Monday, 2nd of May, and *via* Port Colborne about the same date.

The *Whig* says: A single spar appears above the water on the fatal spot near Consecon where the *Belle Sheridan* went to pieces, where her windlass and cable still lie. Several large sections of the wreck lie on the beach, partly buried in the sand, and similar portions in abundance, but no bodies have been found.

The current rate on wheat from Toronto to Kingston is 2c. per bushel.

The steamer *Hero* arrived last night on her first trip. She brought a large bill of freight.

The schr. *Minnie Blakely* has arrived with ties for Rathbun & Son and cider for Leavens & Corby.

MORNING DESPATCHES

EUROPEAN.

THE ELOPEMENT IN HIGH LIFE.

LONDON, April 30.—The young Earl who eloped with the wife of the proprietor of a large colliery, is said to be the Earl of Shrewsbury and Talbot, who is the Premier Earl of England. The Earl was made a ward in chancery in 1879 on the strength of a similar escapade. He is not yet of age.

AMERICAN.

WASHINGTON SPECIALS.

The *Times* says that records show that Congress is largely to blame for the wasteful criminal extravagance that characterized the administration of the contract office in the Post Office department in years past. Abuses were fully exposed by Congress at an investigation in 1876.

The *Sun* says a special Committee of the Republican caucus will meet to-day and will probably recommend nearly all the pending nominations for confirmation or for action. The nominations of Robertson and Chandler will go over until next winter. Congress discussed the Star route frauds matter yesterday. The evidence before the Attorney-General it is said warrants speedy criminal prosecution.

The *Herald* says Admiral D. D. Porter has been designated Inspector-General of the Navy. The Admiral has been for years without assigument

PERJURY.

NEW YORK, April 30.—Samuel S. Morey, indicted for perjury in connection with the "Morey letter," was discharged yesterday on account of turning State's evidence. It is said that a prominent employee of the street cleaning bureau will be indicted for perjury.

STOCK JOBBER PUNISHED.

F. M. Lockwood has been deprived of a $25,000 seat in the stock exchange for violation of the rules.

EXODUS TO EUROPE.

Several vessels sailed for Europe to-day. Accommodations were secured by passengers months ago. Many persons were unable to sail for want of accommodation.

SALE OF PAINTINGS.

The Sanford R. Gifford collection of paintings sold for $40,000.

A DENIAL.

Gen. Brady writes to the *Tribune* denying that he resigned under compulsion on charges of corruption and malfeasance. He remarks that Congress thrice decided that he acted strictly in accordance with the law.

PROHIBITION.

RALEIGH, N. C., April 30.—Ex-Senator Merrimon has given his opinion that the Prohibition Act is now law, and that the people will only vote upon the question as to the penalty pronounced in it against those who violate the laws. This created an excitement and will produce litigation.

THE PROPOSED NIAGARA PARK.

NEW YORK, April 30.—The *Herald's* Albany special says:—J. B. Plumb, member of the Dominion Parliament, who visited Albany in reference to the proposed park at Niagara Falls, has been obliged to return to Canada without seeing the Governor, who has been absent from the capital. Prominent members of the Legislature assured Plumb that the opposition of Cornell to the enterprise would probably be fatal to any hope of assistance from New York during the present executive term.

AFTERNOON DISPATCHES.

SCHOONER SUNK.

POINT JUDITH, R. I, April 30.—The schooner *Palladium* sunk last night. The captain's son and the mate were drowned.

NEW YORK, April 30.—Arrived the *Rhein* from Bremen.

LONDON, April, 30.—Arrived out the *Australia*, *Labrador* and *Parthia*.

BISMARCK AND BERLIN.

BERLIN, April 30.—During a debate in the Reichstag on the Bill restricting municipal house tax in case the Imperial employees to fix a maximum, Bismarck said he intended to move next session for the removal of the German and Prussian governments to some other city, which would be more equitable in the demands and less likely to influence parliament and officials.

DIPLOMATIC CHANGES.

LONDON, April 30.—It is possible that Thornton, British Minister at Washington, will succeed Dufferin at St. Petersburg, and Layard succeed Thornton at Washington.

PEACE WITH THE BASUTOS.

CAPE TOWN, April 30.—Peace is concluded between the Government and the Basutos.

THE MURDERERS OF ABDUL-AZIZ.

CONSTANTINOPLE, April 30.—Inquiry into the death of Sultan Abdul Aziz, revealed a plot concluded for the assassination of all the imperial princes and the proclamattan of a new Caliph. The trial will be conducted before thirty judges and several Councillors of State.

A FITTING DENOUEMENT.

LONDON, April 30.—The woman who eloped with Earl Shrewsbury, was Mrs. Miller Munday, of Shipley, Derbyshire. They fled to Strasburg, where the woman's relatives overtook them, gave the Earl a sound thrashing and brought the woman back to England.

HORRIBLE CRUELTY IN IRELAND.

GALWAY, April 30.—A Bailiff named King was roasted last night by disguised men over a fire until he swore he would resign his office. King's condition is believed to be hopeless.

THE MONETARY CONFERENCE.

PARIS, April 30th.—The monetary conference is expected to meet again about May 5th, to receive interrogatories compiled by the French delegate and Horton, the United States delegate.

WASHINGTON, April 30.—Indications: Lower lakes, fair preceded by higher temperature.

W. J. Thompson, Waterville, N. S., writes that a neighbor of his was severely afflicted with asthma and influenza. Consumption appeared inevitable. At this critical moment he began using Wilson's Pulmonary Cherry Balsam and was restored to perfect health.

Farmers and Mechanics.

If you wish to avoid great danger and trouble, besides a no small bill of expense, at this season of the year, you should take prompt steps to keep disease from your household. The system should be cleansed, blood purified, stomach and bowels regulated, and prevent and cure diseases arising from Spring malaria. We know of nothing that will so perfectly and surely do this as Electric Bitters, and at the trifling cost of fifty cents a bottle.—*Exch.*—Sold by all druggists.

Remember This.

Now is the time of the year for Pneumonia, Lung Fever, Coughs, Colds and fatal results of predisposition to Consumption, and other Throat and Lung disease. BOSCHEE'S GERMAN SYRUP has been used in the neighborhood for the past two or three years without a single failure to cure. If you have not used this medicine yourself, go to your Druggist—— ——and ask him of its wonderful success among his customers. Two doses will relieve the worst case. If you have no faith in medicine, just buy a sample bottle of Boschee's German Syrup for 10 cents and try it. Regular size Bottle 75 cents. Don't neglect a cough to save 75 cents.

Woman's True Friend.

A friend in need is a friend indeed. This none can deny, especially when assistance is sorely afflicted with disease, more particularly those complaints and weaknesses so common to our female population. Every woman should know that Electric Bitters are woman's true friend, and will positively restore her to health even when all other remedies fail. A single trial always proves our assertion. They are pleasant to the taste, and only cost fifty cents a bottle. Sold by all druggists.

Holloway's Pills.—In general debility, mental depression, and nervous irritability there is no medicine which operates so like a charm as these famous Pills. They purify the blood, soothe and strengthen the nerves and system, give tone to the stomach, elevate the spirits, and, in fact, make the patient sensible of a total and most delightful revolution in his whole system. They may be commended most unreservedly as the very best family medicine in existence. Though so powerfully efficacious, they are singularly mild in their operation, and might be given with perfect confidence to delicate women and young child. They contain not a grain of mercury, or any other noxious substance, and cannot do harm. Delicate females and all persons of sedentary habits will find these Pills a blessing.

DR. LLOYD, of Ohio, surgeon in the army during the war from exposure contracted consumption. He says in a letter addressed to Messrs. J. N. Harris & Co., proprietors of ALLAN'S LUNG BALSAM, I have no hesitancy in stating that it was by the use of your LUNG BALSAM that I am now alive and enjoying good health.

It has often been a matter of astonishment to us to see how quickly and thoroughly Dow's Sturgeon Oil Liniment will relax contracted ligaments and sinews. We have seen almost miraculous results from its use on joints that have been stiff for years.

FOR ASTHMA AND PHTHISIC.—Mix one teaspoonful of Perry Davis' Pain-Killer in three tablespoonfuls of syrup, and take two or three teaspoonfuls of the mixture every fifteen minutes, till relief is obtained.

Free the system of impurities, excite the secretions to a healthy action, cleanse the blood, and tone up the weakened nerves, with that matchless medicine Burdock Blood Bitters. It cures Scrofula, Liver and Kidney Complaints, Jaundice, Constipation, Dyspepsia, Headache, Nervous and General Debility, and all Female Complaints. Every dealer in medicines can supply you with Burdock Blood Bitters. Sample bottles 10 cents, regular size $1.00.

Every year we hear of more frequent sudden deaths from apoplexy. These fits are generally preceded by listlessness, dimness of sight, headache and obstructed bowels. A timely use of Dr. Wilson's Anti-bilious and Preserving Pills will quickly relieve these symptoms and prevent so fatal a result.

Commercial.

BELLEVILLE MARKETS

INTELLIGENCER OFFICE,
Belleville, April 30, 1881.

The grain market is steady. For small lots of rye 85c is paid, and for large clean lots 90c is paid.

Barley is nominal in the absence of receipts.

Peas and oats are steady at our quotations.

A TRIAL.

A trial of Dr. Dow's Sturgeon Oil Liniment costs 25 cents. If found of value in the cure of the diseases for which it is intended, it will save many dollars a year and much suffering. Is it not then worth a trial? the more especially as

The Universal Testimony

of those who have used it is, that it cannot be too highly recommended for the cure of neuralgia, rheumatism, contracted joints, lumbago, sciatica, strains, bruises, erysipelas, burns, scalds, frost-bites, boils, felons, chilblains. A remedy for one or another of these ills is likely to be called upon at any time and at all times in the household, and it can be secured in no more handy form than that of Dr. Dow's Sturgeon Oil Liniment. The liniment also never fails in time of need. It can always be relied on.

It is put up in large bottles, and sold in every town in Canada at 25 cents a bottle.

J. W. BRAYLEY,
Montreal.

NOTICE.

To Whom it may Concern.

WE, the undersigned, Health Officers of the City of Belleville, under an Act respecting the Public Health, R. S. O., Cap 190, do hereby give NOTICE that all persons resident within the City of Belleville are hereby called on to clean their premises and to remove what is so found there, on or before the

First Day of May, 1881.

The undersigned have secured grounds for the deposit of all night soil, and other accumulations injurious to health.

The person appointed by the Board of Health as Scavenger is William Hale, who, with the undersigned will give all information.

Any person who wilfully disobeys or resists any lawful order of the Health Officers, or wilfully obstructs any person acting under the authority or employed in the execution of this Act, will be dealt with as the law directs.

CITY HORTICULTURE.

Now dig your patch of garden up,
Clear off the last year's weeds,
Rake off the oyster cans and rags,
And then insert your seeds.

For two weeks, or perhaps for three,
That patch you'll guard with care,
And at intruding cats and dogs
Will diligently swear.

But, ah, at length there comes a time,
Just as the plants come up,
When a more formidable foe
Than casual yellow pup.

Intrudes in shape of neighbors' hens,
Who make a desert there,
The leaves devoured, the roots exposed,
You rave and rip and tear.

"Catch me trying gardening again,
The thing's a measly fraud,
Let in the hogs, let in the dogs,
The whole destroying horde."

THE LEGEND of EASTER EGGS

"Dearest Papa," says my boy to me
As he merrily climbs on his mother's knee.
"Why are those eggs that you see me hold
Colored so finely with blue and gold,
And what is the beautiful bird that lays
Such beautiful eggs on Easter days?"
"You have heard, my boy, of the Man who died
Crowned with Rose thorns and crucified—
And how Joseph the wealthy—whom God reward
Cared for the corpse of his martyred Lord,
And piously tombed it within the rock
And closed the gate with a mighty block.
Now close by the tomb a fair tree grew
With pendulous leaves and blossoms of blue,
And deep in the green tree's shadowy breast
A beautiful singing bird sat on her nest,
Which was bordered with mosses like Malachite
And held four eggs of an ivory white.
Now when the bird from her quiet recess
Beheld the Lord in his burial dress,
And looked on the heavenly face so pale,
The dear feet pierced with the cruel nail,
Her heart nigh broke with a sudden pang,
And out of the depths of her soul she sang.
All night long till the moon was up.
She sat and sang in her moss wreathed cup,
A song of sorrow so wild so shrill
As the homeless wind when it roams the hill
So full of tears, so loud and long,
That the grief of the world seemed turned to song
But soon there came thro' the weeping night
A glittering angel clothed in white;
He rolled the stone from the tomb away
Where the Lord of the earth and Heaven lay;
And Christ arose in the cavern's gloom
And in living lustre came from the tomb.
Now the bird that sat in the heart of the tree
Beheld the celestial mystery,
And its heart was filled with a sweet delight
And it poured a song on the throbbing night
Notes climbing notes 'till higher, higher
They shot to heaven like spears of fire.
When the glittering white-robed angel heard
The sorrowing song of the grieving bird
And heard the following chant of mirth
That hailed Christ *risen* again on Earth
He said, 'Sweet bird, be forever blest
Thyself, thy eggs and thy moss wreathed nest.'
And ever, my child, since that blessed night
When Death bowed down to the Lord of Light
The egg of that dear bird change their hue
And burn with red and gold and blue,
Reminding mankind in their simple way
Of the holy marvel of Easter day.

Teaching Him the Business.

RUBE HOFFENSTEIN'S INGENIOUS DEVICE FOR BOOMING THE CLOTHING TRADE.

(From the New Orleans Times.)

'Herman,' said a Poyras street merchant clothier, addressing his clerk. 'hafe ve sold all of dose overcoats vat was left over from last vinter?'

'No, sir, dere vas dree of dem here yet.'

'Vell, ve must sell 'em right away, as de vinter vill not last, you know, Herman. Pring me one uf de goats und I vill show you somedings about de pisness. I vill dell you how ve vill sell dem oud, und you must learn de pisness, Herman, de vinter vas gone, you know, und ve hav had dose goats in de store more as seex years.'

An eight dollar overcoat was handed him by his clerk, and smoothing it out, he took a buck-skin money purse from the show case, and stuffing it full of paper, dropped it into one of the pockets.

'Now, Herman, my poy.' he continued, 'vatch me sell dat coat. I haf sold ofer dirty five uf dem shust de same way, und I vant to deech you de pisness. Ven de nexd customer comes in de shop I vill show de vay Rube Heffenstein, mine brudder in Detroit, sells his clothing und udder dings.'

A few minutes later a negro, in quest of a suitable pair of cheap shoes, entered the store. The proprietor advanced smiling and inquired:

'Vat is it you vish?'

'Yer got any cheap shoes hear!' asked the negro.

'Blenty uf dem, my frent, blenty; at any brice you vant.'

The negro stated that he wanted a pair of brogans, and soon his pedal extremities were incased in them and a bargain struck. As he was about to leave the proprietor called him back.

"I ain't gwine ter buy nuffin else. I'se got all I want,' said the negro, suddenly.

'Dot may be so, my dear sir,' replied the proprietor, but I shust vants you to look at dis goat. It was de pure Russian vool, and dis dime last year year you doan get dot same goat for dwendy-fife dollars. Mine gracious, cloding was gone down to noding, und dere was no money in de pisness any longer. You vants someding dot will keep you from de vedder, and made you feel varm as summer dime. De gonsumption vos going round un de doctors dell me it vos de vedder. More den nine beoples died round vere I lif last week. Dink of dot. Mine frent, dat goat vas Russian vool, dick und hely. Vy, Mr. Jones, who owns de pank on Canal streed took dot goat home mit him yesterday, and vore it all day; but it vas a leedle dight across de shoulders und he brought ir pack shust a vile ago. Dry it on, dear sir. Ah! dot vas all right. Misder Jones vas a rich man und he liked dot goat. How deep de pockets vas, but it vas a leedle dight agross de shoulders.'

The negro buttoned up the coat, thrust the hands in the pocket and felt the purse. A peaceful smile played over his face when his touch disclosed to his mind the contents of the pockets, but he choked down his joy and inquired:

'Who did yer say wore this hyar coat?'

'Vy, Misder Jones vot owns de pank on Canal streed.'

'What yer gwine to ax fur it?'

'Dwenty dollars.'

'Dat's pow'ful high price fur dis coat, but I'll take it.'

'Herman, here, wrap up dis goat for the shentleman and drow in a caravat; it vill make him look nice mit the ladies.'

'Nebber mind, I'll keep the coat on,' remarked the negro, and pulling out a roll of money he paid for it and left the store.

While he was around the next corner moaning over the stuffed purse, Hoffenstein said to his clerk:

'Herman, fix up annuder von of dose goats de same vay, und doan forget to dell dem dot Misder Jones, vot runs de pank on Canal streed, vore it yesterday.'

No Secrets From Science.

The doctor arrives at the hospital to make his daily visit of inspection, and receives the ticket of a new patient, 'X., musician in German band; pulmonary consumption.'

He proceeds to the patient's bedside, surrounded by his admiring class.

'Well, my good fellow, you spit blood, don't you?'

'Yes, doctor; I—'

'That'll do; we all know about it. And you have cold sweats at night, eh?'

'Yes, sir, and—'

'I fancy now that by occupation you are a musician?'

'Yes, I play—'

'Be silent! You belong to a brass band and you have over exerted yourself—have fairly blown your lungs away puffing into your instrument. Gentlemen, you perceive that sickness has no secret from science. What instrument do you play, my good man?'

'The cymbals, sir.'

Suppressed laughter from the bystanders showed that it was a 'give away' on the learned medico.

It was a Boston girl who asked, 'Why is it that two souls, mated in the impenetrable mystery of their nativity, float by each other on the ocean currents of existence without being instinctively drawn together blended and beautified in the assimilated alembic of eternal love?' That is an easy one. It is because butter is forty-five cents a pound, and a good sealskin sacque costs as high as \$500. The necessaries of life must experience a fall in price before two souls will readily blend in the alembic and so forth.

Watering Some Grass.

A Salopian parish clerk seeing a woman crossing the church-yard with a bundle and watering can, followed her, curious to know what her intention might be, and discovered that she was a widow of a few months' standing. Enquiring what she was going to do with the watering-pot, she informed him that she had begged some grass-seed to sow on her husband's grave, and had brought a little water to make it spring up quickly. The clerk told her there was no occasion for her to take that trouble—the grave will be green in good time. "Ah that may be," was the frank reply; "but my poor husband made me promise not to marry again until the grass had grown over his grave: and having a good offer, I don't wish to break my word, or keep as I am any longer than I can help."—*Chambers Journal.*

James Bowie and His Knife.

James Bowie lay for months in his bed in the city of Natchez, before he recovered from his wound. He was a man of much mechanical ingenuity, and while thus confined whittled from a piece of white pine the model of a hunting-knife, which he sent to two brothers named Blackman, in the city of Natchez, and told them to spare no expense in making a duplicate of it in steel. This was the origin of the dreaded bowie-knife. It was made from a large saw mill file, and its temper afterward improved upon by the Arkansas blacksmiths. This is all that can be told about the origin of that death-dealing instrument. Since James Bowie became somewhat prominent in his efforts to advance the spread of republican institutions it is proper to speak of what he did. He seemed to have a natural disposition to protect the weak from the strong. At one time he was riding through the parish of Concordia, La., and saw a man lashing his slave with his whip. He told the man to desist, but he was met with curses. He dismounted from the horse, wrested the whip from the master, and laid it over his shoulders. This led to a shooting match, in which the slave-owner was badly wounded. Bowie, after submitting himself to the law, paid the doctor's bill, purchased the slave at double his value, and gave him his freedom.

In after years a Methodist preacher told the writer: He said he was one of the first Methodist ministers sent to Texas by the Methodist Conference. He travelled on horseback, crossing the Mississippi below Natchez; that the first day after crossing the Mississippi River he was overtaken by a horseman dressed in buckskin, armed with rifle, pistol and knife. They entered into conversation and he found him to be intelligent, pleasant and well acquainted with the geography of the country. Neither one inquired the name or business of the other. Both were aiming at the same destination, Texas. Finally they reached a new town filled with wild, desperate characters from other States. He posted a notice that he would preach at the Court House the first evening of his arrival there. At the hour named he found the rude structure thronged to overflowing—with men only. He gave out a hymn, and all joined in singing and sang it well, but when he announced his text and attempted to preach, one brayed in imitation of an ass, another hooted like an owl, etc. He disliked to be driven from his purpose and attempted again to preach, but was stopped again by the same species of interruption. He stood silent and still, not knowing whether to vacate the pulpit or not. Finally his travelling companion, whom he did not know was in the house, arose in the midst and with stentorian voice said: "Men, this man has come here to preach to you,—you need preaching to, and I'll (using an oath) if he shan't preach to you! The next man that disturbs him shall fight me. My name is Jim Bowie." The preacher said that after this announcement, he never had a more attentive and respectful audience, so much influence had Bowie over that reckless and dangerous element.—*San Francisco Chronicle.*

Humorous.

In Canada when a man is seen staggering along the street under the influence of liquor he is described as "doing the outer edge.'

Bridget (who had discovered the carpet sweeper)—'Luk at the music box, now, wid the long handle. I wonder how they plays on the instrument!'

A man in the suburbs has found a bed of remarkably fine clay on his property, but is undecided whether to start a brickyard or a French candy factory.

The Legislators of Maine are an honest set. They say there is not money enough in the State to corrupt them. Recent travellers through Maine state that this is true.

According to Josh Billings, "pashence is a good thing for a man to hev; but when he haz got so much ov it that he kan fish all day over the side ov a boat without eny bait on his hook lazyness is what's the matter with him.'

A butcher's boy carrying a tray on his shoulders accidently struck it against a lady's head, and nearly knocked her hat off. 'The deuce take the tray,' cried the lady, in a passion. 'Madam,' said the lad gravely, 'the deuce can not take the tray.'

At a gathering at which Moore was present they talked of Sir Alexander M——and his son, on whom the following conundrum was made: "Why is Sir A. like a Lapland winter?" "Because he is a long night, (knight), and his sun (son) never shines."

Scott told Moore of a Jew in some small theatre, saying at the very moment when the whole audience was in still and breathless attention to the sorrows of Mrs. Beverley in the "Gamester," "I should like mosh to know who dat was dat spat in my eye."

We suppose that a great bore in good health can be called an artesian well....A man is seasonably dressed when he is clothed in a 'pepper and salt' suit....A dish of fish in the market last week was marked 'cultivated.' This ought to give outside barbarians another opportunity to sneer at Boston culture.

Just as the company is about to sit down to table, the old grandmother cries with a shudder: "Thirteen at table—one of us will die within the year! Send out for some one to join us and remove the dishes till he is found." "Never mind, grandma," says her grandson, a growing boy of fourteen, "I'll eat for two."

An elderly lady, who was very indignant at the conduct of a man in a street car, who was smoking, punched the driver in the back with her umbrella, and asked, "Driver, ain't it agin the rules to smoke in this car?" "You can smoke as much as you please, madam, if the gentleman don't object," was the response. Then she rang the bell and got out.

The reason given by a colored man for not going too near the hind legs of a famous roan mule, was so satisfactory that we can afford to adopt it as an excuse for not doing a great many other things. "De reason," he said, "why I neber 'proach dat roan mule from de rear, is dat I'm too fond of my family, an' don't be long to no church nudder."

There were only two men at the funeral service in London for the dead Emperor of Russia who were not dressed in black. One was the Chinese ambassador, who was in spotless white, which in China denotes extreme sorrow. The other was an American newspaper correspondent, who was altogether too busy to substitute for his working suit.

Two Cincinnati ladies, who had lately returned from a trip abroad, were exchanging opinions in reference to the famous pictures they had seen. 'Give me the Reconnaisance school of art,' exclaimed one, so full of sympathy, of poetry; so different from the Pre-Rachelite.' 'It's very true what you say,' observed the other, 'but as for me, I just dote on the Dustledorp school, the paint is so much fresher.'

Druggist.—'Doctor, you must prescribe more calomel and less mandrake. I'm all out of the latter, and have an immense stock of calomel on hand, and must work it off this month or make a heavy loss." Physician—'Tell you the truth, I begin to think that calomel is much superior to mandrake." (Both wink, both smile, and both walk briskly off, like men who have done a good deed.) In unity there is strength.

'Do you believe in predestination?' inquired a Mississippi steamboat man of a clergyman who happened to be travelling with him.

'Of course I do," was the reply.

'Then you believe that whatever is to be, will be?'

'Certainly!'

'Well, I'm glad of it.'

'Why?'

'Because I'm going to pass that boat ahead in just fifteen consecutive minutes, if there is any virtue in pine knots and safety-valves. So don't be alarmed; if the boilers are not going to bust, they wont, that's all.'

Upon this the divine began to put on his hat, and looked as he was going to back out, which the captain observing, remarked:

'I thought that you believed in predestination?'

'So I do, but I prefer being a little nearer sterrn when it takes place.'

Rational Treatment, Positive Cures.

Dr. R. V. Pierce, President of the World's Dispensary Medical Association, is as earnest in selling his under positive guarantees, and if anybody who purchases and uses any of these widely celebrated remedies, does not derive benefit therefrom, the Association would like to hear from that person with description of symptoms and history of case. Organized and incorporated, as the Association is, to teach medicine and surgery and for the successful treatment of all chronic diseases and and managing annually thousands of cases through our original method of diagnosis without ever seeing the patients, and having also the largest sanitarium in the world for the accommodation of the more complicated cases, and also for surgical cases, the Faculty feel themselves prepared to undertake even the most discouraging cases. They resort to all the best remedial means known to modern medical science—neglecting nothing. Address, Worlds' Dispensary Medical Association, Buffalo, N. Y., or Great Russell Street Buildings, London, Eng.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the REV. JOSEPH T. INMAN, *Station D, New York City.* 4eod&wly

Rest and Comfort to the Suffering

"Brown's Household Panacea" has no equal for relieving pain, both internal and external. It cures Pain in the Side, Back or Bowels, Sore Throat, Rheumatism, Toothache, Lumbago and any kind of a Pain or Ache. "It will most surely quicken the Blood and Heal, as its acting power is wonderful," "Brown's Household Panacea," being acknowledged as great Pain Reliever, and of double the strength of any other Elixir or Liniment in the world, "as it really is the best remedy in the world for Cramps in the Stomach, and Pains and Aches of all kinds," and is for sale by all Druggists at 25 cents a bottle. 264ly

Bucklen's Arnica Salve.

The BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clarke & Co. 95-1y

Cruelty to animals.

There are societies for the prevention of cruelty to animals. But men and women grow pig headed when their stomachs are demoralized. They insist upon eating at all hours of the day and night whatever their perverted and normal appetites crave, until they become incurable dyspeptics. They will enlarge feelingly on the theme of "cruelty to animals" and then retire to the dining-room and gorge huge masses of indigestible food. Which is worse cruelty to animals or men? Every house should keep as a life blessing a quantity of DR. HERRICK'S SUGAR COATED PILLS, which will remedy this evil of cramming down indigestible food until we feel light headed from the table or suffer from paralysis. They carry away the offal and renovate the system. Sold by all druggists.

Its Just a Booming.

Such is the expression from all Druggists and dealers everywhere who are selling DR. KING'S NEW DISCOVERY for consumption. No like preparation can begin to have such an extensive and rapid sale. And why? Simply because of truly wonderful merits. No cough or cold, no matter of how long standing or how stubborn, can resist its healing qualities. Asthma, Bronchitis, Hoarseness Hay Fever, Pain in the Side or chest and difficulty of or any lingering disease of the Throat and Lungs rapidly yield to its marvellous powers. It will *positively cure* and that where everyhing else has failed. Satisfy yourself as thousands have already done by getting of your druggist, JAS. CLARK & Co, a trial bottle for 10 cents, or a regular size bottle \$1. For sale by JAS. CLARKE & Co

Hagyard's Pectoral Balsam; a few doses will relieves the most distressing cough, and a twenty-five cent bottle has cured many a sufferer from Asthma, Bronchitis, Croup, Influenza, Hoarseness and Soreness of the Chest. It is the grand specific for all throat and lung complaints leading to consumption.

THE FIRST OF THE KIND.—The Montreal *Post* of February 4th says:—"The firm of Gallagher & Gauthier, vine-growers at Beaconsfield, P. Q., has just received a Dominion Exhibition Diploma from the Government Exhibition Committee of the Province of Quebec, for wine grapes, table grapes and grape vines It is the only diploma ever issued for grapes and grape vines in this province."

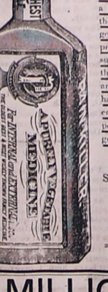
SUBSTITUTES!



MEDICINE CHEST IN ITSELF
PAIN KILLER
A PURELY VEGETABLE MEDICINE
For INTERNAL and EXTERNAL USE
THE OLDEST BEST & MOST WIDELY KNOWN FAMILY MEDICINE

The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of **Pain-Killer,** they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the **Pain-Killer;** and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine **Pain-Killer,** which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

FOR CHOLERA MORBUS, CRAMPS,
AND ALL
SUMMER OR BOWEL COMPLAINTS
PERRY DAVIS' PAIN-KILLER
IS UNEQUALLED.
IT CURES ALMOST INSTANTLY.

The PAIN-KILLER is put up in 2 oz, and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest.

SPRING, 1881.

GOLDEN GRIFFIN!

128, 130, and 132 King-Street East, Toronto.

Globe, Saturday, March 12th, 1881.

We beg to notify our numerous patrons and the general public that we are now in receipt of our new Spring Stock of Fine Woollens, consisting principally of English, Irish, Scotch, and Canadian Tweeds; English, Irish and Scotch Serges; French and English Worsteds; Fine West of England Black and Blue Broadcloths; Black and Blue Venetians, Doeskins, Cassimeres, etc., making in all the largest and most Complete Stock of the kind in Canada.

Our Clothing is without doubt quite equal, if not superior, to the best New York Clothing, for Style, Fit and Material; a proof of which is the large number of First Prizes awarded us at Toronto, Hamilton, and other Exhibitions during the past season.

Gentlemen requiring Fine Clothing will find it to their advantage to inspect our Stock before purchasing. Thanking our numerous friends for their patronage in the past, and soliciting a continuance of the same in the future,

We remain, respectfully yours,

PETLEY & COMPANY.

NORMAN'S

ACME ELECTRIC APPLIANCE.

THIS Electric Appliance is made of separate galvanic cells, connected with pliable wire, thus making a complete galvanic battery in belt form, which can be readily applied to any part of the body for curative purposes. This appliance may be used so as to direct the full force of the united cells directly through any part of the body, either lengthwise or across; or it can be used along or around any part, so that each cell may impart its amount of power consecutively. In one case it is a constant, intense current, which can be increased to a point almost unbearable; in the other it is a constant, mild current, nearly imperceptible. Medical men and electricians will at once see the immense advantage of this appliance for diseases of the Sexual Organs, Nervous Debility, and all those diseases peculiar to young men, and affections of the womb in women. It is particularly adapted to cases where the nerves are lacerated and the organs sore, contracted, weak or relaxed. A suspensory attachment is made to use with it where it is necessary. This appliance does not soil the underclothing like Pulvermacher's, and is much more powerful and beneficial, combining the best features of other belts without any of their disadvantages. It can be worn on any part of the body, either round the waist or down the back, or leg or arm, so that it can be used with advantage in all diseases where electricity is beneficial. [*See large Circulars.*] This appliance can be repaired at small cost, so that practically it is indestructible.

The price of the Acme Appliance is \$10.00 to \$15.00, according to power. The Suspensory Attachment \$1.00 extra. Short Belts of the same construction are made, and may be had at the following prices: Back Belt \$5.00 and \$7.50; Body Belt \$5.00 and \$7.50; Leg Belt, \$5.00; Arm Belt, \$3.00; Head Belt \$2.50; Chest Belt, \$5.00 and \$7.50.

These can be used in all the cases where the Belts of the same name are mentioned in large circulars.

The buckle end of the belt is a negative pole.

Consultation and large circular free.

A. NORMAN,
4 Queen Street East, Toronto.

WARNER'S BLOOD PURIFIER.

THE season is at hand when most people require to take such medicine as will cleanse the liver and stomach of the impurities which are not generally discharged by nature alone, but which must be removed, in order that those organs may perform their functions thoroughly. The most successful agents in such work are often the simplest, and in

Warner's Blood Purifier

are combined the three qualities of

Simplicity, Safety and Success.

A course of this valuable medicine just at this time of the year, has the desirable and certain effect of gradually but thoroughly purging and afterwards regulating the stomach, liver and bowels, and of cleansing the blood, and in this lies the grand secret of the enjoyment of health.

Warner's Blood Purifier sold at all druggists. Price 50 cents per bottle. d&wt.

SPECIAL NOTICE
TO THE AFFLICTED.

Drs. Williams and Nash

MAY still be consulted at the Dafoe House, Belleville, on all the various diseases of the Head, Throat, and Chest, including the Eye, Ear and Heart.

All Diseases of the Respiratory organs treated by Medical Inhalation.

We are astonished from day to day at the almost universal prevalence of Catarrh in this Province, and yet the saddest reflection is the fact that persons are dying every day with Catarrhal Consumption, which is nothing more than the outgrowth of catarrh. So quiet and so unostentatious is its progress that many persons do not notice it until the disease has continued for years, at which time the breath becomes offensive, the hearing or sight impaired, or it has begun its work of devastation upon the lungs. It is this insidious, this tame and common place phase of the disease in which the great danger lies. Its symptoms are too well known to require enumeration, for there is scarcely a family in the land but what is afflicted with it. Suffice it to say, when once it fastens upon the mucous lining of the nose, superinduced by whatever means, it spreads until every portion of the respiratory surface is involved, and the sufferer scarcely dreams of danger until he or she has consumption in its most advanced stages. In this condition the blood is completely poisoned, the vitality of the system lowered and the digestion and assimilation impaired. Emaciation goes on with a slow but steady stride. Sound sleep departs and memory is impaired, and there is a morbid sensitiveness to everything; in reality the whole system is a complete wreck, and in the language of one of old, "the brightness of life fades out and the subject is doomed to a living death."

There is a cure for catarrh at every stage. Medical science has developed new remedies and new modes of administration, until all the various diseases of the head, throat and chest can be cured, with the exception of the latter stages of consumption. Climatic changes alone will not effect a cure of ulcerated catarrh or ulcerated lungs. They require the direct application of the remedies to the diseased parts, and this we positively affirm can only be done through the most improved system of inhalation. By inhalation we do not mean a remedy, nor a special set of remedies, but a system fully developed and endorsed by the best physicians throughout the land. Do not wait for the disease to "wear off," as this is the very excuse that has sent thousands and millions over the precipice of despair. This is the time. Next week or next month may be too late.

CONSULTATION FREE and prices within the reach of all. If possible call personally for an examination, otherwise write for a List of Questions. Address

CINGALESE HAIR RENEWER

No other preparation yet discovered does its work so quickly and satisfactorily as the Cingalese. It never fails

To Restore Grey or Faded Hair

to its youthful color and life, as it contains the Specific Aliment, which is the life of the hair; and in this way its natural color is restored with rapidity.

It cures dandruff, itching and eruptions, and keeps the head clean, sweet and healthy. It is a very desirable hair dressing, imparting to the hair a silken lustre and softness which is the admiration of all. Try it and be convinced. Sold at 50 cents per bottle by all druggists.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge. Mich., says: I have been afflicted with Asthma for years. An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever procured.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.

At retail by all druggists.

Montreal, P. Q.

THE BEST REMEDY

FOR

Diseases of the Throat and Lungs.

AYER'S CHERRY PECTORAL.

In diseases of the pulmonary organs a safe and reliable remedy is invaluable. AYER'S CHERRY PECTORAL is such a remedy, and no other so eminently merits the confidence of the public. It is a scientific combination of the medicinal principles and curative virtues of the finest drugs, chemically united, of such power as to insure the greatest possible efficiency and uniformity of results. It strikes at the foundation of all pulmonary diseases, affording prompt relief and rapid cures, and is adapted to patients of any age or either sex. Being very palatable, the youngest children take it readily. In ordinary Coughs, Colds, Sore Throat, Bronchitis, Influenza, Clergyman's Sore Throat, Asthma, Croup, and Catarrh, the effects of AYER'S CHERRY PECTORAL are magical, and multitudes are annually preserved from serious illness by its timely and faithful use. It should be kept at hand in every household for the protection it affords in sudden attacks. In Whooping-cough and Consumption there is no other remedy so efficacious, soothing, and helpful.

Low prices are inducements to try some of the many mixtures, or syrups, made of cheap and ineffective ingredients, now offered, which, as they contain no curative qualities, can afford only temporary relief, and are sure to deceive and disappoint the patient. Diseases of the throat and lungs demand active and effective treatment; and it is dangerous experimenting with unknown and cheap medicines, from the great liability that these diseases may, while so trifled with, become deeply seated or incurable. Use AYER'S CHERRY PECTORAL, and you may confidently expect the best results. It is a standard medical preparation, of known and acknowledged curative power, and is as cheap as its careful preparation and fine ingredients will allow. Eminent physicians, knowing its composition, prescribe it in their practice. The test of half a century has proven its absolute certainty to cure all pulmonary complaints not already beyond the reach of human aid.
